Prestige Brands Holdings, Inc.
Notes to Consolidated Financial Statements

1. Business and Basis of Presentation

Nature of Business

Prestige Brands Holdings, Inc. (referred to herein as the "Company" which reference shall, unless the context requires otherwise, be deemed to refer to Prestige Brands Holdings, Inc. and all of its direct or indirect wholly-owned subsidiaries on a consolidated basis) is engaged in the marketing, sales and distribution of over-the-counter healthcare, personal care and household cleaning brands to mass merchandisers, drug stores, supermarkets and club stores primarily in the United States, Canada and certain other international markets. Prestige Brands Holdings, Inc. is a holding company with no assets or operations and is also the parent guarantor of the senior credit facility and the senior subordinated notes more fully described in Note 9 to the consolidated financial statements.

Basis of Presentation

The unaudited consolidated financial statements presented herein have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial reporting and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. All significant intercompany transactions and balances have been eliminated. In the opinion of management, the financial statements include all adjustments, consisting of normal recurring adjustments, that are considered necessary for a fair presentation of the Company's consolidated financial position, results of operations and cash flows for the interim periods. Operating results for the six month period ended September 30, 2009 are not necessarily indicative of results that may be expected for the year ending March 31, 2010. This financial information should be read in conjunction with the Company's financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended March 31, 2009.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on the Company's knowledge of current events and the Company's expectations, actual results could differ from those estimates. As discussed below, the Company's most significant estimates include those made in connection with the valuation of goodwill and intangible assets, sales returns and allowances, trade promotional allowances and inventory obsolescence.

Cash and Cash Equivalents

The Company considers all short-term deposits and investments with original maturities of three months or less to be cash equivalents. Substantially all of the Company's cash is held by a large regional bank with headquarters in California. The Company does not believe that, as a result of this concentration, it is subject to any unusual financial risk beyond the normal risk associated with commercial banking relationships.

Accounts Receivable

The Company extends non-interest bearing trade credit to its customers in the ordinary course of business. The Company maintains an allowance for doubtful accounts receivable based upon historical collection experience and expected collectibility of the accounts receivable. In an effort to reduce credit risk, the Company (i) has established credit limits for all of its customer relationships, (ii) performs ongoing credit evaluations of customers' financial condition, (iii) monitors the payment history and aging of customers' receivables, and (iv) monitors open orders against an individual customer's outstanding receivable balance.

Inventories

Inventories are stated at the lower of cost or fair value, with cost determined by using the first-in, first-out method. The Company provides an allowance for slow moving and obsolete inventory, whereby it reduces

5

inventories for the diminution of value, resulting from product obsolescence, damage or other issues affecting marketability, equal to the difference between the cost of the inventory and its estimated market value. Factors utilized in the determination of estimated market value include (i) current sales data and historical return rates, (ii) estimates of future demand, (iii) competitive pricing pressures, (iv) new product introductions, (v) product expiration dates, and (vi) component and packaging obsolescence.

Property and Equipment

Property and equipment are stated at cost and are depreciated using the straight-line method based on the following estimated useful lives:

	Years
Machinery	5
Computer equipment	3
Furniture and fixtures	7

Leasehold improvements are amortized over the lesser of the term of the lease or 5 years.

Expenditures for maintenance and repairs are charged to expense as incurred. When an asset is sold or otherwise disposed of, the cost and associated accumulated depreciation are removed from the accounts and the resulting gain or loss is recognized in the consolidated statement of operations.

Property and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. An impairment loss is recognized if the carrying amount of the asset exceeds its fair value.

Goodwill

The excess of the purchase price over the fair market value of assets acquired and liabilities assumed in purchase business combinations is classified as goodwill. The Company does not amortize goodwill, but performs impairment tests of the carrying value at least annually. The Company tests goodwill for impairment at the reporting unit “brand” level which is one level below the operating segment level.

Intangible Assets

Intangible assets, which are composed primarily of trademarks, are stated at cost less accumulated amortization. For intangible assets with finite lives, amortization is computed on the straight-line method over estimated useful lives ranging from 3 to 30 years.

Indefinite-lived intangible assets are tested for impairment at least annually; however, at each reporting period an evaluation is made to determine whether events and circumstances continue to support an indefinite useful life. Intangible assets with finite lives are reviewed for impairment whenever events or changes in circumstances indicate that their carrying amounts exceed their fair values and may not be recoverable. An impairment loss is recognized if the carrying amount of the asset exceeds its fair value.

Deferred Financing Costs

The Company has incurred debt origination costs in connection with the issuance of long-term debt. These costs are capitalized as deferred financing costs and amortized using the effective interest method, over the term of the related debt.

Revenue Recognition

Revenues are recognized when the following criteria are met: (i) persuasive evidence of an arrangement exists; (ii) the selling price is fixed or determinable; (iii) the product has been shipped and the customer takes ownership and

assumes the risk of loss; and (iv) collection of the resulting receivable is reasonably assured. The Company has determined that these criteria are met and the transfer of the risk of loss generally occurs when product is received by the customer and, accordingly, recognizes revenue at that time. Provision is made for estimated discounts related to customer payment terms and estimated product returns at the time of sale based on the Company's historical experience.

As is customary in the consumer products industry, the Company participates in the promotional programs of its customers to enhance the sale of its products. The cost of these promotional programs varies based on the actual number of units sold during a finite period of time. The Company estimates the cost of such promotional

programs at their inception based on historical experience and current market conditions and reduces sales by such estimates. These promotional programs consist of direct to consumer incentives such as coupons and temporary price reductions, as well as incentives to the Company's customers, such as slotting fees and cooperative advertising. Estimates of the costs of these promotional programs are based on (i) historical sales experience, (ii) the current offering, (iii) forecasted data, (iv) current market conditions, and (v) communication with customer purchasing/marketing personnel. At the completion of the promotional program, the estimated amounts are adjusted to actual results.

Due to the nature of the consumer products industry, the Company is required to estimate future product returns. Accordingly, the Company records an estimate of product returns concurrent with recording sales which is made after analyzing (i) historical return rates, (ii) current economic trends, (iii) changes in customer demand, (iv) product acceptance, (v) seasonality of the Company's product offerings, and (vi) the impact of changes in product formulation, packaging and advertising.

Cost of Sales

Cost of sales includes product costs, warehousing costs, inbound and outbound shipping costs, and handling and storage costs. Shipping, warehousing and handling costs were \$5.5 million and \$10.0 million for the three and six month periods ended September 30, 2009, respectively. During the three and six month periods ended September 30, 2008, such costs were \$6.5 million and \$11.8 million, respectively.

Advertising and Promotion Costs

Advertising and promotion costs are expensed as incurred. Slotting fees associated with products are recognized as a reduction of sales. Under slotting arrangements, the retailers allow the Company's products to be placed on the stores' shelves in exchange for such fees. Direct reimbursements of advertising costs are reflected as a reduction of advertising costs in the period earned.

Stock-based Compensation

The Company recognizes employee stock-based compensation by measuring the cost of services to be rendered based on the grant-date fair value of the equity award. Compensation expense is to be recognized over the period an employee is required to provide service in exchange for the award, generally referred to as the requisite service period.

Income Taxes

Deferred tax assets and liabilities are determined based on the differences between the financial reporting and tax bases of assets and liabilities using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. A valuation allowance is established when necessary to reduce deferred tax assets to the amounts expected to be realized.

The Taxes Topic of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") prescribes a recognition threshold and measurement attributes for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. As a result, the Company has applied a more-likely-than-not recognition threshold for all tax uncertainties. The guidance only allows the recognition of those tax benefits that have a greater than 50% likelihood of being sustained upon examination by the various taxing authorities.

The Company is subject to taxation in the United States and various state and foreign jurisdictions. The Company remains subject to examination by tax authorities for years after 2004.

The Company classifies penalties and interest related to unrecognized tax benefits as income tax expense in the Statement of Operations.

Derivative Instruments

Companies are required to recognize derivative instruments as either assets or liabilities in the consolidated Balance Sheet at fair value. The accounting for changes in the fair value of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and, further, on the type of hedging relationship. For those derivative instruments that are designated and qualify as hedging instruments, a company

7

must designate the hedging instrument, based upon the exposure being hedged, as a fair value hedge, a cash flow hedge or a hedge of a net investment in a foreign operation.

The Company has designated its derivative financial instruments as cash flow hedges because they hedge exposure to variability in expected future cash flows that are attributable to interest rate risk. For these hedges, the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income (loss) and reclassified into earnings in the same line item associated with the forecasted transaction in the same period or periods during which the hedged transaction affects earnings. Any ineffective portion of the gain or loss on the derivative instruments is recorded in results of operations immediately. Cash flows from these instruments are classified as operating activities.

Earnings Per Share

Basic earnings per share is calculated based on income available to common stockholders and the weighted-average number of shares outstanding during the reporting period. Diluted earnings per share is calculated based on income available to common stockholders and the weighted-average number of common and potential common shares outstanding during the reporting period. Potential common shares, composed of the incremental common shares issuable upon the exercise of stock options, stock appreciation rights and unvested restricted shares, are included in the earnings per share calculation to the extent that they are dilutive.

Reclassifications

Certain prior year financial statements amounts have been reclassified to conform to the current year presentation.

Recently Issued Accounting Standards

In August 2009, the FASB issued authoritative guidance to provide clarification on measuring liabilities at fair value when a quoted price in an active market is not available. In these circumstances, a valuation technique should be applied that uses either the quote of the liability when traded as an asset, the quoted prices for similar liabilities or similar liabilities when traded as assets, or another valuation technique consistent with existing fair value measurement guidance, such as an income approach or a market approach. The new guidance also clarifies that when estimating the fair value of a liability, a reporting entity is not required to include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of the liability. This guidance is effective with the Company's fiscal 2010 third quarter. The Company does not anticipate this guidance will have a material impact on the Company's consolidated financial statements.

In June 2009, the FASB issued authoritative guidance to eliminate the exception to consolidate a qualifying special-purpose entity, change the approach to determining the primary beneficiary of a variable interest entity and require companies to more frequently re-assess whether they must consolidate variable interest entities. Under the new guidance, the primary beneficiary of a variable interest entity is identified qualitatively as the enterprise that has both (a) the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance, and (b) the obligation to absorb losses of the entity that could potentially be significant to the variable interest entity or the right to receive benefits from the entity that could potentially be significant to the variable interest entity. This guidance becomes effective for the Company's fiscal 2011 year-end and interim reporting periods thereafter. The Company does not expect this guidance to have a material impact on its consolidated financial statements.

In June 2009, the FASB established the FASB ASC as the source of authoritative accounting principles recognized by the FASB to be applied in the preparation of financial statements in conformity with generally accepted accounting principles. The new guidance explicitly recognizes rules and interpretive releases of the SEC under federal securities laws as authoritative GAAP for SEC registrants. The new guidance became effective for our financial statements issued for the three and six month periods ending on September 30, 2009; however, the adoption of the new guidance did not have a material impact on the Company's financial position, results from operations or cash flows.

In May 2009, guidance was issued under the topic Subsequent Events related to the accounting for and disclosure of events that occur after the balance sheet date, but before the financial statements are issued or are available to be issued. Additionally, the new guidance requires the Company to disclose the date through which subsequent

events have been evaluated, as well as whether that date is the date the financial statements were issued or the date the financial statements were available to be issued. For the three and six month periods ended September 30, 2009, the Company evaluated, for potential recognition and disclosure, events that occurred prior to the filing of the Company's Quarterly Report on Form 10-Q for the three and six month periods ended September 30, 2009 on November 6, 2009. As discussed in Note 2, subsequent to the period end the Company sold certain personal care products to an unrelated third party. The related assets and operating results were reclassified accordingly.

The Financial Instruments Topic of the FASB ASC requires disclosures about the fair values of financial instruments at interim reporting periods in addition to annual financial statements. Effective April 1, 2009, the new guidance involves in regard to the fair values of financial instruments only enhanced disclosures and did not have any impact on the Company's financial position, results from operations or cash flows.

The Investments-Debt and Equity Securities topic of the FASB ASC modified the threshold a company must meet to avoid recognizing other-than-temporary impairments of debt securities purchased as investments. Effective April 1, 2009, the implementation of the new guidance did not have any impact on the Company's financial position, results from operations or cash flows.

The Derivatives and Hedging Topic of the FASB ASC requires a company with derivative instruments to disclose information to enable users of the financial statements to understand (i) how and why the company uses derivative instruments, (ii) how derivative instruments and related hedged items are accounted for, and (iii) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. Accordingly, the Derivatives and Hedging Topic requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The Derivatives and Hedging Topic is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The implementation of the Derivatives and Hedging guidance involves enhanced disclosures of derivative instruments and the Company's hedging activities and did not have any impact on the Company's financial position, results from operations or cash flows.

In September 2006, the FASB issued guidance on Fair Value Measurements and Disclosures to address inconsistencies in the definition and determination of fair value pursuant to GAAP. The guidance provides a single definition of fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements in an effort to increase comparability related to the recognition of market-based assets and liabilities and their impact on earnings. The Fair Value Measurements and Disclosures guidance was effective for the Company's interim financial statements issued after April 1, 2008. However, on November 14, 2007, the FASB deferred the effective date of the guidance for one year for non-financial assets and non-financial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis. The implementation of the guidance, effective April 1, 2008, did not have a material effect on financial assets and liabilities included in the Company's consolidated financial statements as fair value is based on readily available market prices. Additionally, the implementation of the guidance did not have a material effect as it relates to non-financial assets and non-financial liabilities that are recognized or disclosed at fair value in the Company's financial statements on a non-recurring basis.

Management has reviewed and continues to monitor the actions of the various financial and regulatory reporting agencies and is currently not aware of any other pronouncement that could have a material impact on the Company's consolidated financial position, results of operations or cash flows.

2. Discontinued Operations and Assets Held for Sale

In October 2009, the Company sold certain assets previously included in its Personal Care products segment to an unrelated third party. In accordance with the Discontinued Operations Topic of the ASC, the Company classified the

related assets as held for sale in the consolidated balance sheets as of September 30, and March 31, 2009 and classified the related operating results as discontinued in the consolidated financial statements and related notes for all periods presented. The Company will recognize a gain of approximately \$150,000, net of tax effects, on the sale in the quarter ended December 31, 2009.

Edgar Filing: Prestige Brands Holdings, Inc. - Form 10-Q

The following table presents the assets related to the discontinued operations as of September 30, 2009 and March 31, 2009 (in thousands):

	September 30, 2009	March 31, 2009
Inventory	\$ 1,535	\$ 1,038
Intangible assets	7,574	8,472
Total assets held for sale	\$ 9,109	\$ 9,510

The following table summarizes the results of discontinued operations (in thousands):

Components of Income	Three Months Ended September 30		Six Months Ended September 30	
	2009	2008	2009	2008
Revenues	\$2,135	\$2,511	\$4,347	\$5,048
Income before income taxes	391	577	924	1,218

The total purchase price for the assets was \$9 million, subject to adjustments for inventory, as defined, with \$8 million received upon closing, and the remaining \$1 million to be paid on the first anniversary of the closing.

3. Accounts Receivable

Accounts receivable consist of the following (in thousands):

	September 30, 2009	March 31, 2009
Accounts receivable	\$ 41,672	\$ 37,521
Other receivables	486	1,081
	42,158	38,602
Less allowances for discounts, returns and uncollectible accounts	(3,006)	(2,577)
	\$ 39,152	\$ 36,025

4. Inventories

Inventories consist of the following (in thousands):

	September 30, 2009	March 31, 2009
Packaging and raw materials	\$ 1,858	\$ 1,955

Finished goods	23,097	23,984
	\$ 24,955	\$ 25,939

Inventories are shown net of allowances for obsolete and slow moving inventory of \$2.7 million and \$1.4 million at September 30, 2009 and March 31, 2009, respectively.

5. Property and Equipment

Property and equipment consist of the following (in thousands):

	September	
	30, 2009	March 31, 2009
Machinery	\$ 1,610	\$ 1,556
Computer equipment	1,189	1,021
Furniture and fixtures	239	239
Leasehold improvements	367	357
	3,405	3,173
Accumulated depreciation	(2,114)	(1,806)
	\$ 1,291	\$ 1,367

6. Goodwill

A reconciliation of the activity affecting goodwill by operating segment is as follows (in thousands):

	Over-the-Counter Healthcare	Household Cleaning	Personal Care	Consolidated
Balance – March 31, 2009				
Goodwill	\$ 229,627	\$72,549	\$2,751	\$ 304,927
Accumulated impairment losses	(125,527)	(65,160)	--	(190,687)
	104,100	7,389	2,751	114,240
Net adjustments	--	--	--	--
Balance – September 30, 2009				
Goodwill	229,627	72,549	2,751	304,927
Accumulated impairment losses	(125,527)	(65,160)	--	(190,687)
	\$ 104,100	\$7,389	\$2,751	\$ 114,240

At March 31, 2009, in conjunction with the annual test for goodwill impairment, the Company recorded an impairment charge aggregating \$190.7 million to adjust the carrying amounts of goodwill related to several reporting units within the Over-the-Counter Healthcare and Household Cleaning segments to their respective fair values. These charges were a consequence of the challenging economic environment experienced in during our fiscal year ended March 31, 2009, the dislocation of the debt and equity markets, and contracting consumer demand for the Company's product offerings. Although the impairment charges represent management's best estimate, the estimates and assumptions made in assessing the fair value of the Company's reporting units and the valuation of the underlying assets and liabilities are inherently subject to significant uncertainties. Consequently, changing rates of interest and inflation, declining sales or margins, increases in competition, changing consumer preferences, technical advances or reductions in advertising and promotion may require additional impairments in the future.

7. Intangible Assets

A reconciliation of the activity affecting intangible assets is as follows (in thousands):

	Six Months Ended September 30, 2009			Totals
	Indefinite Lived Trademarks	Finite Lived Trademarks	Non Compete Agreement	
Carrying Amounts				
Balance – March 31, 2009	\$ 500,176	\$ 106,773	\$ 158	\$ 607,107
Reclassifications	(45,605)	45,605	--	--
Balance – September 30, 2009	\$ 454,571	\$ 152,378	\$ 158	\$ 607,107
Accumulated Amortization				
Balance – March 31, 2009	\$--	\$ 37,828	\$ 142	\$ 37,970
Additions	--	4,862	16	4,878
Balance – September 30, 2009	\$--	\$ 42,690	\$ 158	\$ 42,848

At March 31, 2009, in a manner similar to goodwill, the Company completed a test for impairment of its intangible assets. Accordingly, the Company recorded an impairment charge aggregating \$58.9 million during the three month period ended March 31, 2009 to the Over-the-Counter Healthcare and Household Cleaning segments as facts and circumstances indicated that the carrying values of the assets exceeded their fair values and may not be recoverable.

The economic events experienced during the fiscal year ended March 31, 2009, as well as the Company's plans and projections for its brands indicated that several of such brands can no longer support indefinite useful lives. Each of these brands incurred an impairment charge during the three month period ended March 31, 2009 and has been adversely affected by increased competition and the macroeconomic environment in the United States. Consequently, at April 1, 2009, management reclassified \$45.6 million of previously indefinite lived intangibles to intangibles with definite lives. Management estimates the useful lives of these intangibles to be 20 years.

The fair values and the annual amortization charges of the reclassified intangibles are as follows (in thousands):

Intangible	Fair Value as of March 31, 2009	Annual Amortization
Household Trademarks	\$ 34,888	\$ 1,745
O T C H e a l t h c a r e Trademark	10,717	536
	\$ 45,605	\$ 2,281

At September 30, 2009, intangible assets are expected to be amortized over a period of 3 to 30 years as follows (in thousands):

Edgar Filing: Prestige Brands Holdings, Inc. - Form 10-Q

Year Ending
September 30

2010	\$ 9,725
2011	9,513
2012	9,017
2013	8,167
2014	6,807
Thereafter	66,459
	\$ 109,688

12

8. Other Accrued Liabilities

Other accrued liabilities consist of the following (in thousands):

	September 30, 2009	March 31, 2009
Accrued marketing costs	\$ 6,510	\$ 3,519
Accrued payroll	2,969	750
Accrued commissions	331	312
Accrued income taxes	1,819	679
Accrued professional fees	2,678	1,906
Interest rate swap obligation	1,572	2,152
Severance	2,067	-
Other	5	89
	\$ 17,951	\$ 9,407

During the second quarter of 2009, the Company completed a staff reduction program to eliminate approximately 10% of its workforce. The accrued severance balance as of September 30, 2009 is related to this reduction in workforce and consists primarily of salaries, bonuses and other benefits.

The Company has reclassified the interest rate swap liability of \$2.2 million as of March 31, 2009 from accounts payable to accrued liabilities.

9. Long-Term Debt

Long-term debt consists of the following (in thousands):

	September 30, 2009	March 31, 2009
Senior secured term loan facility (“Tranche B Term Loan Facility”) that bears interest at the Company’s option at either the prime rate plus a margin of 1.25% or LIBOR plus a margin of 2.25%. At September 30, 2009, the average interest rate on the Tranche B Term Loan Facility was 2.51%. The interest rate is adjusted either monthly or quarterly at the Company’s option. Principal payments of \$887,500 plus accrued interest are payable quarterly. Current amounts outstanding under the Tranche B Term Loan Facility mature on April 6, 2011 and are collateralized by substantially all of the Company’s assets.	\$ 212,337	\$ 252,337
Senior Subordinated Notes that bear interest at 9.25% which is payable on April 15th and October 15th of each year. The Senior Subordinated Notes mature on April 15, 2012; however, the Company may redeem some or all of the Senior Subordinated Notes at redemption prices set forth in the indenture governing the Senior Subordinated Notes. The Senior Subordinated Notes are unconditionally guaranteed by Prestige Brands Holdings, Inc., and its domestic wholly-owned subsidiaries other than Prestige Brands, Inc., the issuer. Each of these guarantees is joint and several. There are no significant restrictions on the ability of any of the guarantors to obtain funds from their	126,000	126,000

subsidiaries.

	338,337	378,337
Current portion of long-term debt	(3,550)	(3,550)
	\$334,787	\$374,787

The Tranche B Term Loan Facility contains various financial covenants, including provisions that require the Company to maintain certain leverage ratios, interest coverage ratios and fixed charge coverage ratios. The Tranche B Term Loan Facility and the Senior Subordinated Notes also contain provisions that restrict the Company from undertaking certain specified corporate actions, such as asset dispositions, acquisitions, dividend payments, repurchase of common shares outstanding, changes of control, incurrence of indebtedness, creation of liens, making of loans and transactions with affiliates. Additionally, the Tranche B Term Loan Facility and the Senior Subordinated Notes contain cross-default provisions whereby a default pursuant to the terms and conditions of either indebtedness will cause a default on the remaining indebtedness. At September 30, 2009, the Company was in compliance with its applicable financial and other covenants under the Tranche B Term Loan Facility and the Senior Subordinated Notes.

Future principal payments required in accordance with the terms of the Tranche B Term Loan Facility and the Senior Subordinated Notes are as follows (in thousands):

Year Ending
September 30

2010	\$ 3,550
2011	208,787
2012	126,000
	\$ 338,337

10.

Fair Value Measurements

As deemed appropriate, the Company uses derivative financial instruments to mitigate the impact of changing interest rates associated with its long-term debt obligations. At September 30, 2009, the outstanding obligation under the Company's variable rate Tranche B Term Loan Facility was \$212.3 million. Although the Company does not enter into derivative financial instruments for trading purposes, all of the Company's derivatives are over-the-counter instruments with liquid markets. The notional, or contractual, amount of the Company's derivative financial instruments is used to measure the amount of interest to be paid or received and does not represent an actual liability. The Company is accounting for the interest rate cap and swap agreements as cash flow hedges.

The Company entered into an interest rate swap agreement, effective March 26, 2008, in the notional amount of \$175.0 million that decreased to \$125.0 million at March 26, 2009. The Company has agreed to pay a fixed rate of 2.88% while receiving a variable rate based on LIBOR. The agreement terminates on March 26, 2010.

As more fully described in Note 1, the Company adopted fair value accounting for all financial instruments. The Fair Value Measurements and Disclosures Topic of the FASB ASC requires fair value to be determined based on the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market assuming an orderly transaction between market participants. The Fair Value Measurements and Disclosures Topic established market (observable inputs) as the preferred source of fair value to be followed by the Company's assumptions of fair value based on hypothetical transactions (unobservable inputs) in the absence of observable market inputs.

Based upon the above, the following fair value hierarchy was created:

Level 1 – Quoted market prices for identical instruments in active markets,

Level 2 – Quoted prices for similar instruments in active markets, as well as quoted prices for identical or similar instruments in markets that are not considered active, and

Level 3 – Unobservable inputs developed by the Company using estimates and assumptions reflective of those that would be utilized by a market participant.

Quantitative disclosures about the fair value of the Company's derivative hedging instruments are as follows (in thousands):

Description	September 30, 2009	Fair Value Measurements at September 30, 2009		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Interest Rate Swap Liability	\$1,572	\$--	\$1,572	\$ --

Fair Value Measurements at March 31, 2009

		For the Six Months Ended September 30, 2008					
		September 30, 2008			Income	Amount	Amount

Edgar Filing: Prestige Brands Holdings, Inc. - Form 10-Q

				Statement Account	Income	Gains
Cash Flow Hedging Instruments	Balance Sheet Location	Notional Amount	Fair Value Asset/ (Liability)	Gains/ Losses Charged	(Expense) Recognized In Income	(Losses) Recognized In OCI
Interest Rate Swap	Prepaid expenses	\$ 175,000	\$ 775	Interest Expense	\$ (136)	\$ 2,302

15

The Company recorded charges to interest expense of \$729,000 and \$19,000 during the three month periods ended September 30, 2009 and 2008, respectively, and \$1.3 million and \$136,000 during the six month periods ended September 30, 2009 and 2008, respectively, in connection with this interest rate swap agreement. Assuming that the LIBOR rate does not fluctuate subsequent to September 30, 2009, the Company estimates that it will recognize approximately \$1.6 million in additional interest expense during the remaining six months of its fiscal year ending March 31, 2010.

At September 30, 2009 and March 31, 2009, the fair values of the interest rate swap were \$1.6 million and \$2.2 million, respectively. Such amounts were included in other accrued liabilities. The determination of fair value is based on closing prices for similar instruments traded in liquid over-the-counter markets. The changes in the fair value of this interest rate swap are recorded in Accumulated Other Comprehensive Income in the balance sheet due to its designation as a cash flow hedge.

For certain of our financial instruments, including cash, accounts receivable, accounts payable and other current liabilities, the carrying amounts approximate their respective fair values due to the relatively short maturity of these amounts.

At September 30, 2009, the carrying value of the Tranche B Term Loan Facility was \$212.3 million. The terms of the facility provide that the interest rate is adjusted, at the Company's option, on either a monthly or quarterly basis, to the prime rate plus a margin of 1.25% or LIBOR plus a margin of 2.25%. The market value of the Company's Tranche B Term Loan Facility was approximately \$207.5 million and \$244.8 million at September 30, 2009 and March 31, 2009, respectively. At September 30, 2009 and March 31, 2009, the carrying value of the Company's 9.25% Senior Subordinated Notes was \$126.0 million. The market value of these notes was approximately \$128.5 million and \$119.7 million at September 30, 2009 and March 31, 2009, respectively. The market values of the notes have been determined from market transactions in the Company's debt securities.

11. Stockholders' Equity

The Company is authorized to issue 250.0 million shares of common stock, \$0.01 par value per share, and 5.0 million shares of preferred stock, \$0.01 par value per share. The Board of Directors may direct the issuance of the undesignated preferred stock in one or more series and determine preferences, privileges and restrictions thereof.

Each share of common stock has the right to one vote on all matters submitted to a vote of stockholders. The holders of common stock are also entitled to receive dividends whenever funds are legally available and when declared by the Board of Directors, subject to prior rights of holders of all classes of stock outstanding having priority rights as to dividends. No dividends have been declared or paid on the Company's common stock through September 30, 2009.

During the year ended March 31, 2009, the Company repurchased 65,000 shares of restricted common stock from former employees pursuant to the provisions of the various employee stock purchase agreements. All of such shares have been recorded as treasury stock. There were no share repurchases during the three or six month periods ended September 30, 2009.

12. Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share (in thousands):

	Three Months Ended September 30		Six Months Ended September 30	
	2009	2008	2009	2008
Numerator				
Income from continuing operations	\$9,680	\$8,163	\$17,674	\$15,547
Income from discontinued operations	243	359	574	756
Net income	\$9,923	\$8,522	\$18,248	\$16,303
Denominator				
Denominator for basic earnings per share – weighted average shares	50,012	49,924	49,997	49,902
Dilutive effect of unvested restricted common stock, options and stock appreciation rights issued to employees and directors	43	113	83	134
Denominator for diluted earnings per share	50,055	50,037	50,080	50,036
Earnings per Common Share:				
Basic earnings per share from continuing operations	\$0.19	\$0.16	\$0.35	\$0.31
Basic earnings per share from discontinued operations	0.01	0.01	0.01	0.02
Basic net earnings per share	\$0.20	\$0.17	\$0.36	\$0.33
Diluted earnings per share from continuing operations	\$0.19	\$0.16	\$0.35	\$0.31
Diluted earnings per share from discontinued operations	0.01	0.01	0.01	0.02
Diluted net earnings per share	\$0.20	\$0.17	\$0.36	\$0.33

At September 30, 2009, 209,952 shares of restricted stock granted to employees, subject only to time vesting, were unvested and excluded from the calculation of basic earnings per share; however, such shares were included in the calculation of diluted earnings per share. Additionally, 101,802 shares of restricted stock granted to employees have been excluded from the calculation of both basic and diluted earnings per share because vesting of such shares is subject to contingencies which have not been met as of the Balance Sheet date. Lastly, at September 30, 2009, there were options to purchase 1,391,172 shares of common stock outstanding that were not included in the computation of diluted earnings per share because their exercise price was greater than the average market price of the common stock, and therefore, their inclusion would be antidilutive.

At September 30, 2008, 226,000 shares of restricted stock granted to employees, subject only to time-vesting, were unvested and excluded from the calculation of basic earnings per share; however, such shares were included in the calculation of diluted earnings per share. Additionally, 442,000 shares of restricted stock granted to employees, as well as 15,000 stock appreciation rights have been excluded from the calculation of both basic and diluted earnings per share because vesting of such shares is subject to contingencies. Lastly, at September 30, 2008, there were options to purchase 667,000 shares of common stock outstanding that were not included in the computation of diluted earnings because their exercise price was greater than the average market price of the common stock, and therefore, their inclusion would be antidilutive.

13. Comprehensive Income

The following table describes the components of comprehensive income for each of the three and six month periods ended September 30, 2009 and 2008 (in thousands):

Components of Comprehensive Income	Three Months Ended September 30	
	2009	2008
Net income	\$9,923	\$8,522
Unrealized gain/(loss) on interest rate caps, net of income tax of \$168 (2009) and (\$125) (2008)	276	(204)
Comprehensive Income	\$10,199	\$8,318
Components of Comprehensive Income	Six Months Ended September 30	
	2009	2008
Net income	\$18,248	\$16,303
Amortization of interest rate caps reclassified into earnings, net of income tax of \$32	--	53
Unrealized gain on interest rate caps, net of income tax of \$220 (2009) and \$876 (2008)	360	1,426
Comprehensive Income	\$18,608	\$17,782

14. Share-Based Compensation

In connection with the Company's initial public offering, the Board of Directors adopted the 2005 Long-Term Equity Incentive Plan ("Plan") which provides for the grant, to a maximum of 5.0 million shares, of restricted stock, stock options, restricted stock units, deferred stock units and other equity-based awards. Directors, officers and other employees of the Company and its subsidiaries, as well as others performing services for the Company, are eligible for grants under the Plan. The Company believes that such awards better align the interests of its employees with those of its stockholders.

During the six month period ended September 30, 2009, net compensation costs charged against income and the related income tax benefit recognized were \$848,000 and \$321,000, respectively. During the six month period ended September 30, 2008, net compensation costs charged against income, and the related tax benefits recognized were \$1.6 million and \$591,000, respectively.

Restricted Shares

Restricted shares granted to employees under the Plan generally vest in 3 to 5 years, contingent on attainment by the Company of revenue and earnings before income taxes, depreciation and amortization growth targets, or the attainment of certain time vesting thresholds. Certain restricted share awards provide for automatic accelerated vesting if there is a change of control. The fair value of nonvested restricted shares is determined as the closing price of the Company's common stock on the day preceding the grant date. The weighted-average fair values of restricted

Edgar Filing: Prestige Brands Holdings, Inc. - Form 10-Q

shares granted during the six month periods ended September 30, 2009 and 2008 were \$7.16 and \$10.85, respectively.

A summary of the Company's restricted shares granted under the Plan is presented below:

Restricted Shares	Shares (in thousands)	Weighted-Average Grant-Date Fair Value
Nonvested at March 31, 2009	342.4	\$ 11.31
Granted	171.6	7.16
Vested	(47.8)	10.97
Forfeited	(152.2)	11.54
Nonvested at September 30, 2009	314.0	8.94
Nonvested at March 31, 2008	484.7	11.78
Granted	303.5	10.85
Vested	(29.9)	10.88
Forfeited	(128.0)	12.30
Nonvested at September 30, 2008	630.3	11.27

Options

The Plan provides that the exercise price of the option granted shall be no less than the fair market value of the Company's common stock on the date the option is granted. Options granted have a term of no greater than 10 years from the date of grant and vest in accordance with a schedule determined at the time the option is granted, generally 3 to 5 years. Certain option awards provide for automatic accelerated vesting if there is a change in control.

The fair value of each option award is estimated on the date of grant using the Black-Scholes Option Pricing Model ("Black-Scholes Model") that uses the assumptions noted in the following table. Expected volatilities are based on the historical volatility of the Company's common stock and other factors, including the historical volatilities of comparable companies. The Company uses both historical and current data to estimate option exercise and employee termination behaviors. Employees that are expected to exhibit similar exercise or termination behaviors are grouped together for the purposes of valuation. The expected terms of the options granted are derived from management's estimates and consideration of information derived from the public filings of companies similar to the Company and represent the period of time that options granted are expected to be outstanding. The risk-free rate represents the yield on U.S. Treasury bonds with a maturity equal to the expected term of the granted option. The weighted-average grant-date fair value of the options granted during the six month period ended September 30, 2009 and 2008 was \$3.64 and \$5.04, respectively.

	Six Month Period Ended	
	September 30	
	2009	2008
Expected volatility	45.6 %	43.3 %
Expected dividends	--	--
Expected term in years	7.0	6.0
Risk-free rate	2.8 %	3.2 %

A summary of option activity under the Plan is as follows:

Options	Shares (in thousands)	Weighted-Average Exercise Price	Weighted- Average Remaining Contractual Term	Aggregate Intrinsic Value (in thousands)
Outstanding at March 31, 2008	253.5	\$ 12.86	9.2	\$--
Granted	413.3	10.91	10.0	--
Exercised	--	--	--	--
Forfeited or expired	--	--	--	--
Outstanding at September 30, 2008	666.8	11.65	9.3	--
Outstanding at March 31, 2009	662.6	11.65	8.8	--
Granted	1,125.0	7.16	10.0	--
Exercised	--	--	--	--
Forfeited or expired	(142.6)	11.26	1.5	--
Outstanding at September 30, 2009	1,645.0	8.61	9.4	--
Exercisable at September 30, 2009	304.7	11.98	8.1	--

Stock Appreciation Rights (“SARs”)

In July 2006, the Board of Directors granted SARs to a group of selected executives; however, no SARs have been granted since that date. The terms of the SARs provided that on the vesting date, the executive would receive for each SAR awarded to an executive the excess of the market price of the Company’s common stock on such date over the market price of the Company’s common stock on the date of issuance. The Board of Directors, in its sole discretion, may settle the Company’s obligation to the executive in shares of the Company’s common stock, cash, other securities of the Company or any combination thereof.

The Plan provides that the issuance price of a SAR shall be no less than the market price of the Company’s common stock on the date the SAR is granted. SARs may be granted with a term of no greater than 10 years from the date of grant and will vest in accordance with a schedule determined at the time the SAR is granted, generally 3 to 5 years. The weighted-average grant date fair value of the SARs granted was \$3.68. The fair value of each SAR award was estimated on the date of grant using the Black-Scholes Model. The SARs vested on March 31, 2009; however, no compensation was paid because the grant-date market price of the Company’s common stock exceeded the market value of the Company’s common stock on the vesting date.

A summary of SAR activity under the Plan is as follows:

SARs	Shares (in thousands)	Grant Date Stock Price	Weighted- Average Remaining Contractual Term	Aggregate Intrinsic Value (in thousands)
Outstanding at March 31, 2008	16.1	\$9.97	1.00	\$--
Granted	--	--	--	--
Forfeited or expired	(1.2)	9.97	0.25	--
Outstanding at September 30, 2008	14.9	9.97	0.25	--
Outstanding at March 31, 2009	--	--	--	--
Granted	--	--	--	--
Forfeited or expired	--	--	--	--
Outstanding at September 30, 2009	--	--	--	--
Exercisable at September 30, 2009	--	--	--	--

At September 30, 2009, there was \$6.3 million of unrecognized compensation costs related to nonvested share-based compensation arrangements under the Plan based on management’s estimate of the shares that will ultimately vest. The Company expects to recognize such costs over the next 4.4 years. However, certain of the restricted shares vest upon the attainment of Company performance goals and if such goals are not met, no compensation costs would ultimately be recognized and any previously recognized compensation cost would be reversed. The total fair value of shares vested during the six months ended September 30, 2009 and 2008 was \$525,000 and \$300,000, respectively. There were no options exercised during either of the six month periods ended September 30, 2009 and 2008; hence, there were no tax benefits realized during these periods. At September 30, 2009, there were 2.9 million shares available for issuance under the Plan.

15. Income Taxes

Income taxes are recorded in the Company's quarterly financial statements based on the Company's estimated annual effective income tax rate subject to adjustments for discrete events should they occur. The effective tax rates used in the calculation of income taxes were 37.9% for the three and six month period ended September 30, 2009 and 2008.

At September 30, 2009, Medtech Products Inc., a wholly-owned subsidiary of the Company, had a net operating loss carryforward of approximately \$2.0 million which may be used to offset future taxable income of the consolidated group and which begins to expire in 2020. The net operating loss carryforward is subject to an annual limitation as to usage pursuant to Internal Revenue Code Section 382 of approximately \$240,000.

Uncertain tax liability activity is as follows:

	2009	2008
(In thousands)		
Balance - March 31	\$225	\$--
Adjustments based on tax positions related to the current year	--	--
Balance - September 30	\$225	\$--

The Company recognizes interest and penalties related to uncertain tax positions as a component of income tax expense. The Company does not anticipate any significant events or circumstances that would cause a change to these uncertainties during the ensuing year.

16. Commitments and Contingencies

Securities Class Action Litigation

The Company and certain of its officers and directors are defendants in a consolidated securities class action lawsuit filed in the United States District Court for the Southern District of New York (the "Consolidated Action"). The first of the six consolidated cases was filed on August 3, 2005. Plaintiffs purport to represent a class of stockholders of the Company who purchased shares from February 9, 2005 through November 15, 2005 (the "Class Period"). Plaintiffs also name as defendants the underwriters in the Company's initial public offering and a private equity fund that was a selling stockholder in the offering. The District Court has appointed a Lead Plaintiff. On December 23, 2005, the Lead Plaintiff filed a Consolidated Class Action Complaint, which asserted claims under Sections 11, 12(a)(2) and 15 of the Securities Act of 1933 and Sections 10(b), 20(a) and 20A of the Securities Exchange Act of 1934. The Lead Plaintiff generally alleged that the Company issued a series of materially false and misleading statements in connection with its initial public offering and thereafter in regard to the following areas: the accounting issues described in the Company's press release issued on or about November 15, 2005; and the alleged failure to disclose that demand for certain of the Company's products was declining and that the Company was planning to withdraw several products from the market. Plaintiffs seek an unspecified amount of damages. The Company filed a motion to dismiss the Consolidated Class Action Complaint in February 2006. On July 10, 2006, the Court dismissed all claims against the Company and the individual defendants arising under the Securities Exchange Act of 1934.

On June 1, 2007, a hearing before the Court was held regarding Plaintiffs' pending motion for class certification in the Consolidated Action. On September 4, 2007, the United States District Court for the Southern District of New York issued an Order certifying a class consisting of all persons who purchased the Company's common stock pursuant, or traceable to, the Company's initial public offering during the Class Period and were damaged thereby.

On January 16, 2009, the Court ordered that notice of the pending class action lawsuit be sent to all persons who purchased the Company's common stock during the Class Period pursuant or traceable to the Company's initial public offering. In March 2009, the notice of class action law suit was mailed. The defendants and the lead plaintiffs have reached an agreement in principle to settle the class action lawsuit without any admission of liability by the defendants, subject to the execution of appropriate settlement documents and court approval. It is expected that the settlement funds will come entirely out of insurance proceeds. The settlement has received preliminary fairness approval by the Court and class members have been notified. The settlement is expected to be presented to the Court for a final fairness determination at a hearing scheduled for December 4, 2009. If final approval of the settlement is obtained from the Court, the settlement would result in dismissal of all claims against the Company, our officers and directors and the other defendants in the action with prejudice. If the settlement is not completed, then the parties may attempt to reach agreement on another settlement or resume the litigation.

DenTek Litigation

In April 2007, the Company filed a lawsuit in the United States District Court in the Southern District of New York against DenTek Oral Care, Inc. (“DenTek”) alleging (i) infringement of intellectual property associated with The Doctor’s®NightGuard™ dental protector which is used for the protection of teeth from nighttime teeth grinding; and (ii) the violation of unfair competition and consumer protection laws. On October 4, 2007, the Company filed a Second Amended Complaint in which it named Kelly M. Kaplan, Raymond Duane and C.D.S. Associates, Inc. (“CDS”) as additional defendants in this action and added other claims to the previously filed complaint. Kaplan and Duane were formerly employed by the Company, and CDS is a corporation controlled by Duane through which Duane provided services to the Company. In the Second Amended Complaint, the Company has asserted claims for patent, trademark and copyright infringement, unfair competition, unjust enrichment, violation of New York’s Consumer Protection Act, breach of contract, tortious interference with contractual and business relations, civil conspiracy and trade secret misappropriation. On October 19, 2007, the Company filed a motion for preliminary injunction, asking the Court to enjoin the defendants from (i) continuing to improperly use the Company’s trade secrets; (ii) continuing to breach any contractual agreements with the Company; and (iii) marketing and selling any dental protector products or other products in which Duane or Kaplan has had any involvement or provided any assistance to DenTek. A hearing date for the motion for preliminary injunction has not yet been set by the Court.

On September 30, 2008, after considering the defendants’ motions to dismiss, the Company’s responses (including a motion to strike the motions to dismiss) and the Magistrate’s Report and Recommendations, the Court granted in part and denied in part the defendants’ Motions to Dismiss, with the following claims being dismissed without prejudice: (1) breach of the Proprietary Information and Inventions Agreement (“PIIA”) against Duane; (2) breach of the PIIA against Kaplan; (3) tortious interference with contractual relations against DenTek; (4) tortious interference with contractual relations against Duane; and (5) tortious interference with advantageous business relationship/economic advantage against all defendants. The Court denied the Company’s Motions to Strike the Motions to Dismiss filed by DenTek and CDS. The following claims included in the Company’s Second Amended Complaint remain in the action: (1) patent, trademark and copyright infringement against DenTek; (2) unjust enrichment against DenTek; (3) violation of a New York consumer protection statute against DenTek; (4) breach of the consulting agreement against Duane; (5) breach of the PIIA against CDS; (6) breach of the release against Kaplan and Duane; and (7) trade secret misappropriation against DenTek, Kaplan, Duane and CDS.

In October 2008, DenTek, Kaplan, Duane and CDS filed Answers to the Second Amended Complaint. In their Answers, each of DenTek, Duane and CDS has asserted counterclaims against the Company. DenTek’s counterclaims allege false advertising, violation of New York consumer protection statutes and unfair competition relating to The Doctor’s® NightGuard™ Classic™ dental protector. Duane’s counterclaim is a contractual indemnity claim seeking to recover attorneys’ fees pursuant to the release between Duane and Dental Concepts LLC (“Dental Concepts”), a predecessor-in-interest to Medtech Products Inc., plaintiff in the DenTek litigation and another wholly-owned subsidiary of Prestige Brands Holdings, Inc. CDS’s counterclaim alleges a breach of the consulting agreement between CDS and Dental Concepts.

In November 2008, in response to the counterclaims filed against the Company by DenTek, Duane and CDS, the Company filed a Motion to Dismiss and Strike the counterclaims made by DenTek, which motion is currently pending before the Court. In addition, in November 2008, the Company filed an Answer to the counterclaims asserted by Duane and CDS.

On March 24, 2009, Duane submitted a petition for a Chapter 7 bankruptcy with the United States Bankruptcy Court for the District of Nevada (the “Nevada Bankruptcy Court”) which automatically stayed the DenTek litigation in which Duane is a defendant. On July 21, 2009, the Nevada Bankruptcy Court granted the Company’s motion for relief from automatic stay with respect to the DenTek litigation against DenTek, Kaplan, Duane and CDS. Accordingly, the DenTek litigation has resumed although the Nevada Bankruptcy Court retains exclusive jurisdiction over any damage claims and other issues which may affect Duane’s bankruptcy proceeding, except for orders of injunctive relief that

may be issued in the DenTek litigation.

On November 5, 2009, the Court issued an Opinion and Order construing one of the claims of the Company's U.S. Patent No. 6,830,051, which forms the basis for the patent infringement claims in the DenTek litigation. The Company believes the Opinion and Order issued by the Court is favorable to the Company's patent infringement claim against DenTek.

The Company's management believes that the counterclaims asserted by DenTek, Duane and CDS are legally deficient and that it has meritorious defenses to the counterclaims. The Company intends to vigorously defend against the counterclaims; however, the Company cannot, at this time, reasonably estimate the potential range of loss, if any.

In addition to the matters described above, the Company is involved from time to time in other routine legal matters and other claims incidental to its business. The Company reviews outstanding claims and proceedings internally and with external counsel as necessary to assess probability and amount of potential loss. These

assessments are re-evaluated at each reporting period and as new information becomes available to determine whether a reserve should be established or if any existing reserve should be adjusted. The actual cost of resolving a claim or proceeding ultimately may be substantially different than the amount of the recorded reserve. In addition, because it is not permissible under GAAP to establish a litigation reserve until the loss is both probable and estimable, in some cases there may be insufficient time to establish a reserve prior to the actual incurrence of the loss (upon verdict and judgment at trial, for example, or in the case of a quickly negotiated settlement). The Company believes the resolution of routine matters and other incidental claims, taking into account reserves and insurance, will not have a material adverse effect on its business, financial condition or results from operations.

Lease Commitments

The Company has operating leases for office facilities and equipment in New York and Wyoming, which expire at various dates through 2014.

The following summarizes future minimum lease payments for the Company's operating leases (in thousands):

Year Ending September 30	Facilities	Equipment	Total
2010	\$ 694	\$ 83	\$ 777
2011	591	80	671
2012	568	54	622
2013	587	36	623
2014	348	--	348
	\$ 2,788	\$ 253	\$ 3,041

Rent expense for the three and six month periods ended September 30, 2009 was \$158,000 and \$348,000, respectively, while rent expense for the three and six month periods ended September 30, 2008 was \$148,000 and \$306,000, respectively.

Purchase Commitments

The Company has entered into a 10 year supply agreement for the exclusive manufacture of a portion of one of its household cleaning products. Although the Company is committed under the supply agreement to pay the minimum amounts set forth in the table below, the Company estimates that it will purchase in excess of \$270.0 million of the product during the term of the agreement.

(In thousands)

Year Ending September 30	
2010	\$ 10,753
2011	9,921
2012	1,192
2013	1,148
2014	1,105
Thereafter	4,801
	\$ 28,920

17.

Concentrations of Risk

The Company's sales are concentrated in the areas of over-the-counter healthcare, household cleaning and personal care products. The Company sells its products to mass merchandisers, food and drug accounts, and dollar and club stores. During the three and six month periods ended September 30, 2009, approximately 63.2% and 63.1%, respectively, of the Company's total sales were derived from its four major brands, while during the three and six month periods ended September 30, 2008 approximately 59.5% and 60.4%, respectively, of the Company's total sales were derived from its four major brands. During the three and six month periods ended September 30, 2009, approximately 24.4% and 25.0%, respectively, of the Company's sales were made to one customer, while during the three and six month periods ended September 30, 2008, 24.5% and 25.6%,

23

respectively, of sales were to this customer. At September 30, 2009, approximately 22.6% of accounts receivable were owed by the same customer.

The Company manages product distribution in the continental United States through a main distribution center in St. Louis, Missouri. A serious disruption, such as a flood or fire, to the main distribution center could damage the Company's inventories and could materially impair the Company's ability to distribute its products to customers in a timely manner or at a reasonable cost. The Company could incur significantly higher costs and experience longer lead times associated with the distribution of its products to its customers during the time that it takes the Company to reopen or replace its distribution center. As a result, any such disruption could have a material adverse affect on the Company's sales and profitability.

The Company has relationships with over 36 third-party manufacturers. Of those, the top 10 manufacturers produced items that accounted for approximately 79% of the Company's gross sales for the six months ended September 30, 2009 compared to 75% during the six months ended September 30, 2008. The Company did not have long-term contracts with manufacturers of product of approximately 20% of our gross sales for the six months ended September 30, 2009 compared to 20% during the six months ended September 30, 2008. The lack of manufacturing agreements for these products exposes the Company to the risk that a manufacturer could stop producing the Company's products at any time for any reason, increase the cost we are charged for our products, or fail to provide the Company with the level of products the Company needs to meet its customers' demands. Should one or more of our manufacturers stop producing product on our behalf or increase our costs in excess of our ability to increase our sales price, it could have a material adverse effect on our business, financial condition and results from operations.

18. Business Segments

Segment information has been prepared in accordance with the Segment Topic of the FASB ASC. The Company's operating and reportable segments consist of (i) Over-the-Counter Healthcare, (ii) Household Cleaning and (iii) Personal Care.

There were no inter-segment sales or transfers during any of the periods presented. The Company evaluates the performance of its operating segments and allocates resources to them based primarily on contribution margin.

The table below summarizes information about the Company's operating and reportable segments.

	Three Months Ended September 30, 2009			Consolidated

------------	-----------

During the three and six month periods ended September 30, 2009, approximately 94.9% and 95.9%, respectively, of the Company's sales were made to customers in the United States and Canada while during the three and six month periods ended September 30, 2008, approximately 97.0% and 96.4%, respectively, of sales were made to customers in the United States and Canada. Other than the United States, no individual geographical area accounted for more than 10% of net sales in any of the periods presented.

At September 30, 2009, substantially all of the Company's long-term assets were located in the United States of America and have been allocated to the operating segments as follows:

(In thousands)	Over-the- Counter Healthcare	Household Cleaning	Personal Care	Consolidated
Goodwill	\$104,100	\$7,389	\$2,751	\$ 114,240

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

The following discussion of our financial condition and results of operations should be read together with the consolidated financial statements and the related notes included in this Quarterly Report on Form 10-Q, as well as our Annual Report on Form 10-K for the fiscal year ended March 31, 2009. This discussion and analysis may contain forward-looking statements that involve certain risks, assumptions and uncertainties. Future results could differ materially from the discussion that follows for many reasons, including the factors described in Part I, Item 1A., "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended March 31, 2009, as well as those described in future reports filed with the SEC. See also "Cautionary Statement Regarding Forward-Looking Statements" on page 44 of this Quarterly Report on Form 10-Q.

General

We are engaged in the marketing, sales and distribution of brand name over-the-counter healthcare, household cleaning and personal care products to mass merchandisers, drug stores, supermarkets and club stores primarily in the United States and Canada. We continue to use the strength of our brands, our established retail distribution network, a low-cost operating model and our experienced management team as a competitive advantage to grow our presence in these categories and, as a result, grow our sales and profits.

We have grown our brand portfolio by acquiring strong and well-recognized brands from larger consumer products and pharmaceutical companies, as well as other brands from smaller private companies. While the brands we have purchased from larger consumer products and pharmaceutical companies have long histories of support and brand development, we believe that at the time we acquired them they were considered "non-core" by their previous owners and did not benefit from the focus of senior level management or strong marketing support. We believe that the brands we have purchased from smaller private companies have been constrained by the limited resources of their prior owners. After acquiring a brand, we seek to increase its sales, market share and distribution in both existing and new channels. We pursue this growth through increased spending on advertising and promotion, new marketing strategies, improved packaging and formulations and innovative new products.

Discontinued Operations and Assets Held for Sale

In October 2009, the Company sold certain assets previously included in its Personal Care products segment to an unrelated third party. In accordance with the Discontinued Operations Topic of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC"), the Company classified the related assets as held for sale in the consolidated balance sheets as of September 30, and March 31, 2009 and classified the related operating results as discontinued in the consolidated financial statements and related notes for all periods presented. The Company will recognize a gain of approximately \$150,000, net of tax effects, on the sale in the quarter ended December 31, 2009.

Edgar Filing: Prestige Brands Holdings, Inc. - Form 10-Q

The following table presents the assets related to the discontinued operations as of September 30, 2009 and March 31, 2009 (in thousands):

	September 30, 2009	March 31, 2009
Inventory	\$ 1,535	\$ 1,038
Intangible assets	7,574	8,472
Total assets held for sale	\$ 9,109	\$ 9,510

The following table summarizes the results of discontinued operations (in thousands):

	Three Months Ended September 30		Six Months Ended September 30	
	2009	2008	2009	2008
Components of Comprehensive Income				
Revenues	\$2,135	\$2,511	\$4,347	\$5,048
Income before income taxes	391	577	924	1,218

The total purchase price for the assets was \$9 million, subject to adjustments for inventory, as defined, with \$8 million received upon closing, and the remaining \$1 million to be paid on the first anniversary of the closing.

Three Month Period Ended September 30, 2009 compared to the
Three Month Period Ended September 30, 2008

Revenues (in thousands)

	2009		2008		Increase (Decrease)	
	Revenues	%	Revenues	%	(Decrease)	%
OTC Healthcare	\$51,377	61.0	\$50,342	58.8	\$1,035	2.1
Household Cleaning	29,013	34.5	32,140	37.6	(3,127)	(9.7)
Personal Care	3,791	4.5	3,058	3.6	733	24.0
	\$84,181	100.0	\$85,540	100.0	\$(1,359)	(1.6)

Revenues for the three month period ended September 30, 2009 were \$84.2 million, a decrease of \$1.4 million, or 1.6%, versus the three month period ended September 30, 2008. Revenues for both the Over-the-Counter and Personal Care segments increased versus the comparable period in the prior year. Revenues for the Household Cleaning segment declined during the period. Revenues from customers outside of North America, which represent 5.2% of total revenues, increased by \$1.7 million or 64.5% during 2009 compared to 2008 due to timing of eye care shipments to our Australian distributor and stronger sales of Chloraseptic in the United Kingdom.

Over-the-Counter Healthcare Segment

Revenues of the Over-the-Counter Healthcare segment increased \$1.0 million, or 2.1%, during 2009 versus 2008. Revenue increases for Clear Eyes, Murine Tears, Chloraseptic and Compound W were partially offset by revenue decreases on Murine Ear, Allergen Block and Wartner. The increase in revenues for Clear Eyes is primarily the result of an increase in consumer consumption. The increase in revenues for Murine Tears was primarily the result

of higher shipments to markets outside North America. Chloraseptic revenues increased as a result of stronger shipments to customers in advance of the anticipated strong Fall cough/cold flu season. Compound W revenues increased due to strong consumer consumption particularly in the Salicylic acid product line. Murine Ear's revenues decreased primarily as the result of slowing consumer consumption, particularly on Earigate. Allergen Block revenues decreased due to the anniversary of pipeline shipments from the introduction in the same period last year. The Wartner revenues decrease was primarily due to distribution losses.

Household Cleaning Segment

Revenues for the Household Cleaning segment decreased \$3.1 million, or 9.7%, during 2009 versus 2008. Comet's revenues decreased primarily due to softer consumer consumption of bathroom spray. Chore Boy revenues declined in line with weaker consumer consumption and distribution losses due to heavy competitor activity. Spic and Span's revenues decreased primarily due to softer consumer consumption in traditional

channels of trade and timing of promotional shipments to the dollar store class of trade.

Personal Care Segment

Revenues of the Personal Care segment increased \$733,000, or 24.0%, during 2009 versus 2008. Increased revenues for Cutex were partially offset by declines on other brands in this segment. The revenue increase was driven by Cutex and was primarily due to increased consumer consumption in the nail polish remover category.

Gross Profit (in thousands)

	2009		2008		Increase	
	Gross Profit	%	Gross Profit	%	(Decrease)	%
OTC Healthcare	\$32,160	62.6	\$32,775	65.1	\$(615)	(1.9)
Household Cleaning	10,530	36.3	11,203	34.9	(673)	(6.0)
Personal Care	1,644	43.4	1,160	37.9	484	41.7
	\$44,334	52.7	\$45,138	52.8	\$(804)	(1.8)

Gross profit from the three month period ended September 30, 2009 decreased \$804,000, or 1.8%, versus the three month period ended September 30, 2008. As a percent of total revenues, gross profit decreased from 52.8% in 2008 to 52.7% in 2009. The decrease in gross profit as a percent of revenues was primarily due to increased obsolescence costs and costs associated with the transition to the new Comet powder supplier, offset by decreases in product and distribution costs.

Over-the-Counter Healthcare Segment

Gross profit for the Over-the-Counter Healthcare segment decreased \$615,000, or 1.9%, during 2009 versus 2008. The decrease in gross profit percentage was the result of higher promotional and obsolescence costs and unfavorable sales mix. The increase in promotional costs was primarily the result of an increase in trade promotion activity behind Chloraseptic, Little Remedies, Clear Eyes and Allergen Block products. The increase in obsolescence costs was a result of short dated and slow moving eye care and Allergen Block inventory. As a percent of Over-the-Counter Healthcare revenue, gross profit decreased from 65.1% during 2008 to 62.6% during 2009.

Household Cleaning Segment

Gross profit for the Household Cleaning segment decreased by \$673,000, or 6.0%, during 2009 versus 2008. As a percent of Household Cleaning revenue, gross profit increased from 34.9% during 2008 to 36.3% during 2009. The increase in gross profit percentage was the result of decreased product costs for Chore Boy and Comet, lower distribution costs for Comet and Spic and Span partially offset by costs associated with the transition to a new Comet powder supplier.

Personal Care Segment

Gross profit for the Personal Care segment increased \$484,000, or 41.7%, during 2009 versus 2008. As a percent of Personal Care revenues, gross profit increased from 37.9% during 2008 to 43.4% during 2009. The increase in gross profit percentage was due to lower promotional allowances and lower distribution and obsolescence costs for Cutex.

Contribution Margin (in thousands)

	2009		2008		Increase	
	Contribution Margin	%	Contribution Margin	%	(Decrease)	%
OTC Healthcare	\$ 24,782	48.2	\$ 22,121	43.9	\$ 2,661	12.0
Household Cleaning	8,245	28.4	8,472	26.4	(227)	(2.7)
Personal Care	1,525	40.2	1,002	32.8	523	52.2
	\$ 34,552	41.0	\$ 31,595	36.9	\$ 2,957	9.4

Contribution Margin, defined as gross profit less advertising and promotional expenses, for the three month period ended September 30, 2009 increased \$3.0 million, or 9.4%, versus the three month period ended September 30, 2008. The contribution margin increase was the result of a \$3.8 million, or 27.8%, decrease in advertising and promotional spending, partially offset by the decrease in gross profit as previously discussed. The decrease in advertising and promotional spending was primarily attributable to decreases in media support and market research expenditures in the Over-the-Counter and Household Segments.

Over-the-Counter Healthcare Segment

Contribution margin for the Over-the-Counter Healthcare segment increased \$2.7 or 12.0%, during 2009 versus 2008. The contribution margin increase was the result of a \$3.3 million, or 30.7%, decrease in advertising and promotional spending, partially offset by the decrease in gross margin as previously discussed. The decrease in advertising and promotional spending was primarily attributable to a decrease in media support for the Allergen Block products from introductory levels in the prior year and Murine Earigate products, as well as decreased market research expenditures for Clear Eyes and Compound W.

Household Cleaning Segment

Contribution margin for the Household Cleaning segment decreased \$227,000 million, or 2.7%, during 2009 versus 2008. The contribution margin decrease was the result of the decrease in gross profit as previously discussed, partially offset by a decrease in media support for Comet Mildew Spray Gel.

Personal Care Segment

Contribution margin for the Personal Care segment increased \$523,000, or 52.2%, during 2009 versus 2008. The contribution margin increase was the result of the increase in gross profit as previously discussed and a modest reduction in trade promotion and market research for Cutex.

General and Administrative

General and administrative expenses were \$10.5 million for the three month period ended September 30, 2009 versus \$9.4 million for the three month period ended September 30, 2008. The increase in expense was due to a \$2.5 million net charge associated with the reduction in workforce and the CEO change, partially offset by favorable currency translation costs and a reduction in legal expenses.

Depreciation and Amortization

Depreciation and amortization expense was \$2.8 million for the three month period ended September 30, 2009 versus \$2.3 million the three month period ended September 30, 2008. Amortization was impacted by the transfer of two trademarks in the Household Cleaning segment and one trademark in the Over-the-Counter segment, aggregating \$45.6 million, from indefinite-lived status to intangibles with finite lives. Commencing April 1, 2009, these intangibles are being amortized to operations over a 20 year estimated useful life. This increase in amortization expense was partially offset by a reduction in amortization resulting from a trademark that became fully amortized at March 31, 2009, resulting in a net increase in depreciation and amortization expense of \$533,000 for the period.

Interest Expense

Net interest expense was \$5.6 million during the three month period ended September 30, 2009 versus \$6.8 million during the three month period ended September 30, 2008. The reduction in interest expense was primarily the result of a lower level of indebtedness combined with a reduction of variable interest rates on our senior debt. The

Edgar Filing: Prestige Brands Holdings, Inc. - Form 10-Q

average cost of funds decreased from 6.9% for 2008 to 6.4% for 2009 while the average indebtedness decreased from \$392.6 million during 2008 to \$347.7 million during 2009.

Income Taxes

The provision for income taxes during 2009 was \$5.9 million versus \$5.0 million during 2008. The effective tax rate of 37.9% was unchanged period-to-period.

Six Month Period Ended September 30, 2009 compared to the
Six Month Period Ended September 30, 2008

Revenues (in thousands)

	2009		2008		Increase	
	Revenues	%	Revenues	%	(Decrease)	%
OTC Healthcare	\$ 91,660	59.1	\$ 89,588	57.2	\$ 2,072	2.3
Household Cleaning	56,460	36.4	61,162	39.1	(4,702)	(7.7)
Personal Care	7,073	4.5	5,787	3.7	1,286	22.2
	\$ 155,193	100.0	\$ 156,537	100.0	\$ (1,344)	(0.9)

Revenues for the six month period ended September 30, 2009 were \$155.2 million, a decrease of \$1.3 million, or 0.9%, versus the six month period ended September 30, 2008. Revenues for both the Over-the-Counter and Personal Care segments increased versus the comparable period. Revenues for the Household Cleaning segment declined during the period. Revenues from customers outside of North America, which represent 4.2% of total revenues, increased by \$727,000 or 12.7% during 2009 versus 2008.

Over-the-Counter Healthcare Segment

Revenues for the Over-the-Counter Healthcare segment increased \$2.1 million, or 2.3%, during 2009 versus 2008. Revenue increases for Clear Eyes, Chloraseptic, Compound W, Little Remedies and The Doctor's were partially offset by revenue decreases on Murine Ear and Wartner. Clear Eyes revenues increased primarily due to the launch of a new line of Clear Eyes Tears products and stronger shipments of the smaller convenience size item. Chloraseptic revenues increased as the result of a stronger Spring cough/cold season driving consumer consumption and strong orders in advance of the Fall cough/cold season. Compound W revenues increased due to increased consumer consumption, particularly behind the non-cryogenic products. Little Remedies revenues increased as the result of distribution gains and increased consumer consumption of its non-medicated pediatric products. The Doctor's revenues increased due to an increase in advertising and the absence of promotional allowances related to the restage of The Advanced Comfort NightGuard dental protector in 2008. Murine Ear's revenues decreased primarily as the result of slowing consumer consumption, particularly on Earigate. Wartner's revenues decreased as the result of lost distribution and softness in the cryogenic segment of the wart treatment category. Allergen Block revenues decreased as current year sales did not equal the pipeline orders during the fiscal year ended March 31, 2009 introductory period.

Household Cleaning Segment

Revenues for the Household Cleaning segment decreased \$4.7 million, or 7.7%, during 2009 versus 2008. Comet's revenues decreased primarily due to softer consumer consumption of bathroom spray. Chore Boy and Spic and Span revenues declined as a result of weaker consumer consumption.

Personal Care Segment

Revenues for the Personal Care segment increased \$1.3 million, or 22.2%, during 2009 versus 2008. The revenue increase was driven by Cutex and was due to improving consumption across most classes of trade.

Gross Profit (in thousands)

	2009 Gross Profit	%	2008 Gross Profit	%	Increase (Decrease)	%
OTC Healthcare	\$58,915	64.3	\$58,813	65.6	\$102	0.2
Household Cleaning	20,176	35.7	22,302	36.5	(2,126)	(9.5)
Personal Care	3,073	43.4	2,113	36.5	960	45.4
	\$82,164	52.9	\$83,228	53.2	\$(1,064)	(1.3)

Gross profit from the six month period ended September 30, 2009 decreased \$1.1 million, or 1.3%, versus the six month period ended September 30, 2008. As a percent of total revenue, gross profit decreased from 53.2% in 2008 to 52.9% in 2009. The decrease in gross profit as a percent of revenues was primarily due to increased obsolescence costs and supplier transitional costs, partially offset by decreases in distribution costs.

Over-the-Counter Healthcare Segment

Gross profit for the Over-the-Counter Healthcare segment increased \$102,000, or 0.2%, during 2009 versus 2008. As a percent of Over-the-Counter Healthcare revenue, gross profit decreased from 65.6% during 2008 to 64.3% during 2009. The decrease in gross profit percentage was primarily the result of increased obsolescence costs partially offset by lower distribution costs. The increase in obsolescence costs is a result of short dated and slow moving eye care and Allergen Block inventory.

Household Cleaning Segment

Gross profit for the Household Cleaning segment decreased \$2.1 million, or 9.5%, during 2009 versus 2008. As a percent of Household Cleaning revenue, gross profit decreased from 36.5% during 2008 to 35.7% during 2009. The decrease in gross profit percentage was the result of increased product costs for Comet and Spic and Span and costs associated with the transition to a new Comet powder supplier, partially offset by decreased product costs for Chore Boy and lower distribution costs for Comet and Spic and Span.

Personal Care Segment

Gross profit for the Personal Care segment increased \$960,000, or 45.4%, during 2009 versus 2008. As a percent of Personal Care revenues, gross profit increased from 36.5% during 2008 to 43.4% during 2009. The increase in gross profit percentage was due to lower promotional allowances, lower distribution costs, and absence of obsolescence costs for Cutex.

Contribution Margin (in thousands)

	2009 Contribution Margin	%	2008 Contribution Margin	%	Increase (Decrease)	%
OTC Healthcare	\$44,797	48.9	\$43,122	48.1	\$1,675	3.9
Household Cleaning	15,972	28.3	17,501	28.6	(1,529)	(8.7)
Personal Care	2,848	40.3	1,825	31.5	1,023	56.1
	\$63,617	41.0	\$62,448	39.9	\$1,169	1.9

Contribution Margin, defined as gross profit less advertising and promotional expenses, for the six month period ended September 30, 2009 increased \$1.2 million, or 1.9%, versus the six month period ended September 30, 2008.

The contribution margin increase was the result of a \$2.2 million, or 10.7%, decrease in advertising and promotional spending, partially offset by the decrease in gross profit as previously discussed. The decrease in advertising and promotional spending was primarily attributable to decreases in media support for both the Over-the-Counter and Household Cleaning segments, and market research for the Over-the-Counter segment.

Over-the-Counter Healthcare Segment

Contribution margin for the Over-the-Counter Healthcare segment increased \$1.7 million, or 3.9%, during 2009 versus 2008. The contribution margin increase was the result of a \$1.6 million, or 10.0%, decrease in advertising and promotional spending and the increase in gross margin as previously discussed. The decrease in advertising and promotional spending was primarily attributable to a decrease in media support and consumer promotion for the Murine Earigate product, which was partially offset by an increase in media support for the Allergen Block products and a decrease in market research for Clear Eyes and Compound W.

Household Cleaning Segment

Contribution margin for the Household Cleaning segment decreased \$1.5 million, or 8.7%, during 2009 versus 2008. The contribution margin decrease was the result of the decrease in gross profit as previously discussed, partially offset by a decrease in media support for Comet Mildew Spray Gel.

Personal Care Segment

Contribution margin for the Personal Care segment increased \$1.0 million, or 56.1%, during 2009 versus 2008. The contribution margin increase was the result of the increase in gross profit as previously discussed and a modest reduction in trade promotion and market research for Cutex.

General and Administrative

General and administrative expenses were \$18.7 million for the six month period ended September 30, 2009 versus \$17.3 million for the six month period ended September 30, 2008. The increase in expense was due to a \$2.5 million net charge associated with the reduction in workforce and the CEO change, partially offset by favorable currency translation costs and a reduction in legal expenses.

Depreciation and Amortization

Depreciation and amortization expense was \$5.2 million for the six month period ended September 30, 2009 versus \$4.6 million for the six month period ended September 30, 2008. Amortization was impacted by the transfer of two trademarks in the Household Cleaning segment and one trademark in the Over-the-Counter segment, aggregating \$45.6 million, from indefinite-lived status to intangibles with finite lives. Commencing April 1, 2009, these intangibles are being amortized to operations over a 20 year estimated useful life. This increase in amortization expense was partially offset by a reduction in amortization resulting from a trademark that became fully amortized at March 31, 2009, resulting in a net increase in depreciation and amortization expense of \$571,000 for the period.

Interest Expense

Net interest expense was \$11.3 million during the six month period ended September 30, 2009 versus \$15.6 million during the six month period ended September 30, 2008. The reduction in interest expense was primarily the result of a lower level of indebtedness combined with a reduction of interest rates on our senior debt. The average cost of funds decreased from 7.7% for 2008 to 6.3% for 2009 while the average indebtedness decreased from \$399.4 million during 2008 to \$359.0 million during 2009.

Income Taxes

The provision for income taxes during 2009 was \$10.8 million versus \$9.5 million in 2008. The effective tax rate of 37.9% was unchanged period-to-period.

Liquidity and Capital Resources

Liquidity

We have financed and expect to continue to finance our operations with a combination of borrowings and funds generated from operations. Our principal uses of cash are for operating expenses, debt service, brand acquisitions, working capital and capital expenditures. Because we allowed our revolving credit facility to expire in April 2009 and due to the uncertain credit markets, the Company has increased its cash reserves by an additional \$30.0 million to provide an additional margin of liquidity.

(In thousands)	Six Months Ended September	
	2009	2008
Cash provided by (used for):		
Operating Activities	\$ 39,880	\$ 36,676

Edgar Filing: Prestige Brands Holdings, Inc. - Form 10-Q

Investing Activities	(232)	(4,109)
Financing Activities	(40,000)	(26,015)

Operating Activities

Net cash provided by operating activities was \$39.9 million for the six month period ended September 30, 2009 compared to \$36.7 million for the six month period ended September 30, 2008. The \$3.2 million increase in net cash provided by operating activities was primarily the result of the increases in net income, accounts payable and accrued liabilities.

Consistent with the six months ended September 30, 2008, the Company's cash flow from operations exceeded net income due to the substantial non-cash charges related to depreciation and amortization of intangibles, increases in deferred income tax liabilities resulting from differences in the amortization of intangible assets and goodwill for income tax and financial reporting purposes, the amortization of certain deferred financing costs, as well as stock-based compensation costs.

Investing Activities

Net cash used for investing activities was \$0.2 million for the six month period ended September 30, 2009 compared to \$4.1 million for the six month period ended September 30, 2008. The net cash used for investing activities during the six month period ended September 30, 2009 was for the acquisition of property and equipment. Net cash used for investing activities during the six month period ended September 30, 2008 was primarily due to the \$4.0 million settlement of a purchase price adjustment associated with the Wartner USA BV acquisition in 2006. The remainder was for the acquisition of property and equipment.

Financing Activities

Net cash used for financing activities was \$40.0 million for the six month period ended September 30, 2009 compared to \$26.0 million for the six month period ended September 30, 2008. During the six month period ended September 30, 2009, the Company repaid \$38.2 million of indebtedness in excess of normal maturities with cash generated from operations. This reduced our outstanding indebtedness to \$338.3 million at September 30, 2009 from \$378.3 million at March 31, 2009.

Capital Resources

As of September 30, 2009, we had an aggregate of \$338.3 million of outstanding indebtedness, which consisted of the following:

- \$212.3 million of borrowings under the Tranche B Term Loan Facility, and
- \$126.0 million of 9.25% Senior Subordinated Notes due 2012.

All loans under the senior secured term loan facility ("Senior Credit Facility") bear interest at floating rates, based on either the prime rate, or at our option, the LIBOR rate, plus an applicable margin. At September 30, 2009, an aggregate of \$212.3 million was outstanding under the Senior Credit Facility at a weighted average interest rate of 2.51%.

The Company uses derivative financial instruments to mitigate the impact of changing interest rates associated with its long-term debt obligations. Although the Company does not enter into derivative financial instruments for trading purposes, all of the Company's derivatives are straightforward over-the-counter instruments with liquid markets. The notional, or contractual, amount of the Company's derivative financial instruments is used to measure the amount of interest to be paid or received and does not represent an actual liability. The Company accounts for these financial instruments as cash flow hedges.

In February 2008, the Company entered into an interest rate swap agreement in the notional amount of \$175.0 million, decreasing to \$125.0 million at March 26, 2009 to replace and supplement a \$50.0 million interest rate cap agreement

that expired on May 30, 2008. Under this swap, the Company agreed to pay a fixed rate of 2.88% while receiving a variable rate based on LIBOR. The agreement terminates on March 26, 2010. The fair value of the interest rate swap agreement is included in either other assets or accrued liabilities at the balance sheet date. At September 30, 2009 and March 31, 2009, the fair values of the interest rate swap were \$1.6 million and \$2.2 million, respectively. Such amounts were included in other accrued liabilities.

The Senior Credit Facility contains various financial covenants, including provisions that require us to maintain certain leverage ratios, interest coverage ratios and fixed charge coverage ratios. The Senior Credit Facility, as well as the Indenture governing the Senior Subordinated Notes, contain provisions that accelerate our indebtedness on certain changes in control and restrict us from undertaking specified corporate actions, including asset dispositions, acquisitions, payment of dividends and other specified payments, repurchasing the Company's equity securities in the public markets, incurrence of indebtedness, creation of liens, making loans and investments and transactions with affiliates. Specifically, we must:

- Have a leverage ratio of less than 4.0 to 1.0 for the quarter ended September 30, 2009, decreasing over time to 3.75 to 1.0 for the quarter ending September 30, 2010, and remaining level thereafter,
- Have an interest coverage ratio of greater than 3.0 to 1.0 for the quarter ended September 30, 2009, increasing over time to 3.25 to 1.0 for the quarter ending March 31, 2010, and remaining level thereafter, and
- Have a fixed charge coverage ratio of greater than 1.5 to 1.0 for the quarter ended September 30, 2009, and for each quarter thereafter until the quarter ending March 31, 2011.

At September 30, 2009, we were in compliance with the applicable financial and restrictive covenants under the Senior Credit Facility and the Indenture governing the Senior Subordinated Notes. Additionally, management anticipates that in the normal course of operations, the Company will be in compliance with the financial and restrictive covenants during the ensuing year.

At September 30, 2009, we had \$212.3 million outstanding under the Tranche B Term Loan Facility which matures in April 2011. We are obligated to make quarterly principal payments on the Tranche B Term Loan Facility equal to \$887,500, representing 0.25% of the initial principal amount of the term loan.

As a result of the expiration of certain credit facilities, the current economic environment and the state of the credit markets, the Company established and reached its goal of enhancing its liquidity position and used its strong cash flow generated from operations to build its cash reserves. Management estimates that cash reserves of approximately \$30.0 million are sufficient to provide adequate liquidity, allowing the Company to meet its current and future obligations as they come due. Accordingly, management made repayments against outstanding indebtedness of \$29.3 million in excess of scheduled maturities during the year ended March 31, 2009 and \$38.2 million in excess of scheduled maturities during the six month period ended September 30, 2009. While management intends to replace these credit facilities during the ensuing year, the uncertainties of the credit markets could impede our ability to do so. As an example, the following factors could influence the amounts available to us and the interest rates associated with such an effort:

- A deterioration of the Company's earnings and its strong cash flows from operations,
- Prevailing interest rates in the market for similar offerings by companies with comparable credit ratings,
 - Total amount borrowed and the Company's intended use of such proceeds,
 - Ratio of amounts bearing fixed and variable rates of interest, and
- Total amount outstanding at the time, giving effect to the Company's ability to refinance its existing indebtedness.

In the current credit environment, management would expect the average interest rate associated with such a refinancing to be in excess of the Company's current average borrowing rate of 4.86%. However, we can give no assurances that financing will be available, or if available, that it can be obtained on terms favorable to us or on a basis that is not dilutive to our stockholders.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements or financing activities with special-purpose entities.

Inflation

Inflationary factors such as increases in the costs of raw materials, packaging materials, purchased product and overhead may adversely affect our operating results. Although we do not believe that inflation has had a material impact on our financial condition or results from operations for the periods referred to above, a high rate of inflation in the future could have a material adverse effect on our business, financial condition or results from operations. The recent volatility in crude oil prices has had an adverse impact on transportation costs, as well as certain petroleum based raw materials and packaging material. Although the Company takes efforts to minimize the impact of inflationary factors, including raising prices to our customers, a high rate of pricing volatility associated with crude oil supplies may continue to have an adverse effect on our operating results.

Critical Accounting Policies and Estimates

The Company's significant accounting policies are described in the notes to the unaudited financial statements included elsewhere in this Quarterly Report on Form 10-Q, as well as in our Annual Report on Form 10-K for the year ended March 31, 2009. While all significant accounting policies are important to our consolidated financial statements, certain of these policies may be viewed as being critical. Such policies are those that are both most important to the portrayal of our financial condition and results from operations and require our most difficult, subjective and complex estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses or the related disclosure of contingent assets and liabilities. These estimates are based upon our historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ materially from these estimates under different conditions. The most critical accounting estimates are as follows:

Revenue Recognition

We recognize revenue when the following revenue recognition criteria are met: (i) persuasive evidence of an arrangement exists; (ii) the product has been shipped and the customer takes ownership and assumes the risk of loss; (iii) the selling price is fixed or determinable; and (iv) collection of the resulting receivable is reasonably assured. We have determined that the transfer of risk of loss generally occurs when product is received by the customer, and, accordingly recognize revenue at that time. Provision is made for estimated discounts related to customer payment terms and estimated product returns at the time of sale based on our historical experience.

As is customary in the consumer products industry, we participate in the promotional programs of our customers to enhance the sale of our products. The cost of these promotional programs is recorded as either advertising and promotional expenses or as a reduction of sales. Such costs vary from period-to-period based on the actual number of units sold during a finite period of time. We estimate the cost of such promotional programs at their inception based on historical experience and current market conditions and reduce sales by such estimates. These promotional programs consist of direct to consumer incentives such as coupons and temporary price reductions, as well as incentives to our customers, such as slotting fees and cooperative advertising. We do not provide incentives to customers for the acquisition of product in excess of normal inventory quantities since such incentives increase the potential for future returns, as well as reduce sales in the subsequent fiscal periods.

Estimates of costs of promotional programs are based on (i) historical sales experience, (ii) the current offering, (iii) forecasted data, (iv) current market conditions, and (v) communication with customer purchasing/marketing personnel. At the completion of the promotional program, the estimated amounts are adjusted to actual results. Our

related promotional expense for the year ended March 31, 2009 was \$17.4 million. We believe that the estimation methodologies employed, combined with the nature of the promotional campaigns, makes the likelihood remote that our obligation would be misstated by a material amount. However, for illustrative purposes, had we underestimated the promotional program rate by 10% for the year ended March 31, 2009, our sales and operating income would have been adversely affected by approximately \$1.7 million. Net income would have been adversely affected by approximately \$1.1 million. Similarly, had we underestimated the

promotional program rate by 10% for the three and six month periods ended September 30, 2009, our sales and operating income would have been adversely affected by approximately \$561,000, and \$946,000, respectively. Net income would have been adversely affected by approximately \$348,000 and \$587,000 for the three and six month periods ended September 30, 2009, respectively.

We also periodically run coupon programs in Sunday newspaper inserts or as on-package instant redeemable coupons. We utilize a national clearing house to process coupons redeemed by customers. At the time a coupon is distributed, a provision is made based upon historical redemption rates for that particular product, information provided as a result of the clearing house's experience with coupons of similar dollar value, the length of time the coupon is valid, and the seasonality of the coupon drop, among other factors. During the year ended March 31, 2009, we had 16 coupon events. The amount recorded against revenues and accrued for these events during the year was \$1.4 million; redemptions during the year were \$1.3 million. During the six month period ended September 30, 2009, we had 16 coupon events. The amounts recorded against revenue and accrued for these events during the three and six month periods ended September 30, 2009 were \$533,000 and \$847,000, respectively. The redemption amounts during the three and six month periods ended September 30, 2009 were \$273,000 and \$571,000, respectively.

Allowances for Product Returns

Due to the nature of the consumer products industry, we are required to estimate future product returns. Accordingly, we record an estimate of product returns concurrent with the recording of sales. Such estimates are made after analyzing (i) historical return rates, (ii) current economic trends, (iii) changes in customer demand, (iv) product acceptance, (v) seasonality of our product offerings, and (vi) the impact of changes in product formulation, packaging and advertising.

We construct our returns analysis by looking at the previous year's return history for each brand. Subsequently, each month, we estimate our current return rate based upon an average of the previous six months' return rate and review that calculated rate for reasonableness giving consideration to the other factors described above. Our historical return rate has been relatively stable; for example, for the years ended March 31, 2009, 2008 and 2007, returns represented 3.8%, 4.4% and 3.3%, respectively, of gross sales. The increase in the returns rate from 2007 to 2008 of 1.1% was due to the voluntary withdrawal from the marketplace of Little Remedies medicated pediatric cough and cold products in October 2007. Had the voluntary withdrawal not occurred, the actual returns rate would have been 3.9%. For the three and six month periods ended September 30, 2009, product returns represented 3.0% and 3.1% of gross sales, respectively. At September 30, 2009 and March 31, 2009, the allowance for sales returns was \$2.5 million and \$2.2 million, respectively.

While we utilize the methodology described above to estimate product returns, actual results may differ materially from our estimates, causing our future financial results to be adversely affected. Among the factors that could cause a material change in the estimated return rate would be significant unexpected returns with respect to a product or products that comprise a significant portion of our revenues in a manner similar to the Little Remedies voluntary withdrawal discussed above. Based upon the methodology described above and our actual returns' experience, management believes the likelihood of such an event remains remote. As noted, over the last three years our actual product return rate has stayed within a range of 4.4% to 3.3% of gross sales. An increase of 0.1% in our estimated return rate as a percentage of gross sales would have adversely affected our reported sales and operating income for the year ended March 31, 2009 by approximately \$357,000. Net income would have been adversely affected by approximately \$222,000. An increase of 0.1% in our estimated return rate as a percentage of gross sales for the three and six month period ended September 30, 2009 would have adversely affected our reported sales and operating income by approximately \$100,000 and \$184,000, respectively, while our net income would have been adversely affected by approximately \$62,000 and \$114,000, respectively.

Allowances for Obsolete and Damaged Inventory

We value our inventory at the lower of cost or market value. Accordingly, we reduce our inventories for the diminution of value resulting from product obsolescence, damage or other issues affecting marketability equal to the

difference between the cost of the inventory and its estimated market value. Factors utilized in the determination of estimated market value include (i) current sales data and historical return rates, (ii) estimates of future demand, (iii) competitive pricing pressures, (iv) new product introductions, (v) product expiration dates, and (vi) component and packaging obsolescence.

Many of our products are subject to expiration dating. As a general rule our customers will not accept goods with expiration dating of less than 12 months from the date of delivery. To monitor this risk, management utilizes a detailed compilation of inventory with expiration dating between zero and 15 months and reserves for 100% of the cost of any item with expiration dating of 12 months or less. At September 30, 2009 and March 31, 2009, the allowance for obsolete and slow moving inventory was \$2.7 million and \$1.4 million, representing 9.7% and 5.1%, respectively, of total inventory. Inventory obsolescence costs charged to operations were \$2.2 million for the year ended March 31, 2009, while for the three and six month periods ended September 30, 2009, the Company recorded obsolescence costs of \$1.5 million and \$1.8 million, respectively. A 1.0% increase in our allowance for obsolescence at March 31, 2009 would have adversely affected our reported operating income and net income for the year ended March 31, 2009 by approximately \$273,000 and \$170,000, respectively. Similarly, a 1.0% increase in our allowance at September 30, 2009 would have adversely affected our reported operating income and net income for the three and six month periods ended September 30, 2009 by approximately \$276,000 and \$171,000, respectively.

Allowance for Doubtful Accounts

In the ordinary course of business, we grant non-interest bearing trade credit to our customers on normal credit terms. We maintain an allowance for doubtful accounts receivable which is based upon our historical collection experience and expected collectibility of the accounts receivable. In an effort to reduce our credit risk, we (i) establish credit limits for all of our customer relationships, (ii) perform ongoing credit evaluations of our customers' financial condition, (iii) monitor the payment history and aging of our customers' receivables, and (iv) monitor open orders against an individual customer's outstanding receivable balance.

We establish specific reserves for those accounts which file for bankruptcy, have no payment activity for 180 days or have reported major negative changes to their financial condition. The allowance for bad debts amounted to 0.5% and 0.3% of accounts receivable at September 30, 2009 and March 31, 2009, respectively. Bad debt expense for the year ended March 31, 2009 was \$130,000, while during the three and six month periods ended September 30, 2009, the Company recorded bad debt expense of \$50,000 and \$100,000, respectively.

While management believes that it is diligent in its evaluation of the adequacy of the allowance for doubtful accounts, an unexpected event, such as the bankruptcy filing of a major customer, could have an adverse effect on our future financial results. A 0.1% increase in our bad debt expense as a percentage of sales during the year ended March 31, 2009 would have resulted in a decrease in reported operating income of approximately \$303,000, and a decrease in our reported net income of approximately \$188,000. Similarly, a 0.1% increase in our bad debt expense as a percentage of sales for the three and six month periods ended September 30, 2009 would have resulted in a decrease in reported operating income of approximately \$84,000 and \$155,000, respectively, and a decrease in our reported net income of approximately \$52,000 and \$99,000, respectively.

Valuation of Intangible Assets and Goodwill

Goodwill and intangible assets amounted to \$678.5 million and \$683.4 million at September 30, 2009 and March 31, 2009, respectively. At September 30, 2009, goodwill and intangible assets were apportioned among our three operating segments as follows:

(In thousands)	Over-the-Counter Healthcare	Household Cleaning	Personal Care	Consolidated
Goodwill	\$104,100	\$7,389	\$2,751	\$ 114,240
Intangible assets				
Indefinite-lived	334,750	119,821	--	454,571

Edgar Filing: Prestige Brands Holdings, Inc. - Form 10-Q

Finite-lived	69,572	34,016	6,100	109,688
	404,322	153,837	6,100	564,259
	\$ 508,422	\$ 161,226	\$ 8,851	\$ 678,499

37

Our Clear Eyes, New-Skin, Chloraseptic, Compound W and Wartner brands comprise the majority of the value of the intangible assets within the Over-The-Counter Healthcare segment. The Comet, Spic and Span and Chore Boy brands comprise substantially all of the intangible asset value within the Household Cleaning segment. Cutex comprised the majority of the intangible asset value within the Personal Care segment.

Goodwill and intangible assets comprise substantially all of our assets. Goodwill represents the excess of the purchase price over the fair value of assets acquired and liabilities assumed in a purchase business combination. Intangible assets generally represent our trademarks, brand names and patents. When we acquire a brand, we are required to make judgments regarding the value assigned to the associated intangible assets, as well as their respective useful lives. Management considers many factors, both prior to and after, the acquisition of an intangible asset in determining the value, as well as the useful life, assigned to each intangible asset that the Company acquires or continues to own and promote. The most significant factors are:

- Brand History

A brand that has been in existence for a long period of time (e.g., 25, 50 or 100 years) generally warrants a higher valuation and longer life (sometimes indefinite) than a brand that has been in existence for a very short period of time. A brand that has been in existence for an extended period of time generally has been the subject of considerable investment by its previous owner(s) to support product innovation and advertising and promotion.

- Market Position

Consumer products that rank number one or two in their respective market generally have greater name recognition and are known as quality product offerings, which warrant a higher valuation and longer life than products that lag in the marketplace.

- Recent and Projected Sales Growth

Recent sales results present a snapshot as to how the brand has performed in the most recent time periods and represent another factor in the determination of brand value. In addition, projected sales growth provides information about the strength and potential longevity of the brand. A brand that has both strong current and projected sales generally warrants a higher valuation and a longer life than a brand that has weak or declining sales. Similarly, consideration is given to the potential investment, in the form of advertising and promotion, which is required to reinvigorate a brand that has fallen from favor.

- History of and Potential for Product Extensions

Consideration also is given to the product innovation that has occurred during the brand's history and the potential for continued product innovation that will determine the brand's future. Brands that can be continually enhanced by new product offerings generally warrant a higher valuation and longer life than a brand that has always "followed the leader".

After consideration of the factors described above, as well as current economic conditions and changing consumer behavior, management prepares a determination of the intangible's value and useful life based on its analysis. Under accounting guidelines goodwill is not amortized, but must be tested for impairment annually, or more frequently if an event or circumstances change that would more likely than not reduce the fair value of the reporting unit below the carrying amount. In a similar manner, indefinite-lived assets are no longer amortized. They are also subject to an annual impairment test, or more frequently if events or changes in circumstances indicate that the asset may be impaired. Additionally, at each reporting period an evaluation must be made to determine whether events and circumstances continue to support an indefinite useful life. Intangible assets with finite lives are amortized over their respective estimated useful lives and must also be tested for impairment whenever events or changes in circumstances indicate that the carrying value of the asset may not be recoverable and exceeds its fair value.

On an annual basis, or more frequently if conditions indicate that the carrying value of the asset may not be recovered, management performs a review of both the values and useful lives assigned to goodwill and intangible assets and tests

for impairment.

38

Finite-Lived Intangible Assets

As mentioned above, when events or changes in circumstances indicate the carrying value of the assets may not be recoverable, management performs a review to ascertain the impact of events and circumstances on the estimated useful lives and carrying values of our trademarks and trade names. In connection with this analysis, management:

- Reviews period-to-period sales and profitability by brand,
- Analyzes industry trends and projects brand growth rates,
- Prepares annual sales forecasts,
- Evaluates advertising effectiveness,
- Analyzes gross margins,
- Reviews contractual benefits or limitations,
- Monitors competitors' advertising spend and product innovation,
- Prepares projections to measure brand viability over the estimated useful life of the intangible asset, and
- Considers the regulatory environment, as well as industry litigation.

Should analysis of any of the aforementioned factors warrant a change in the estimated useful life of the intangible asset, management will reduce the estimated useful life and amortize the carrying value prospectively over the shorter remaining useful life. Management's projections are utilized to assimilate all of the facts, circumstances and expectations related to the trademark or trade name and estimate the cash flows over its useful life. In the event that the long-term projections indicate that the carrying value is in excess of the undiscounted cash flows expected to result from the use of the intangible assets, management is required to record an impairment charge. Once that analysis is completed, a discount rate is applied to the cash flows to estimate fair value. The impairment charge is measured as the excess of the carrying amount of the intangible asset over fair value as calculated using the discounted cash flow analysis. Future events, such as competition, technological advances and reductions in advertising support for our trademarks and trade names could cause subsequent evaluations to utilize different assumptions.

Indefinite-Lived Intangible Assets

In a manner similar to finite-lived intangible assets, at each reporting period, management analyzes current events and circumstances to determine whether the indefinite life classification for a trademark or trade name continues to be valid. Should circumstance warrant a finite life, the carrying value of the intangible asset would then be amortized prospectively over the estimated remaining useful life.

The economic events experienced during the year ended March 31, 2009, as well as the Company's plans and projections for its brands, indicated that several of our brands could no longer support indefinite useful lives. Each of these brands incurred an impairment charge during the three month period ended March 31, 2009 and has been adversely affected by increased competition. Consequently, at April 1, 2009, management reclassified \$45.6 million of previously indefinite-lived intangibles to intangibles with definite lives. Management estimates the useful lives of these intangibles to be 20 years.

The fair values and the annual amortization charges of the reclassified intangibles are as follows (in thousands):

Intangible	Fair Value as of March 31, 2009	Annual Amortization
Household Trademarks	\$ 34,888	\$ 1,745
OTC Healthcare Trademark	10,717	536
	\$ 45,605	\$ 2,281

Management tests the indefinite-lived intangible assets for impairment by comparing the carrying value of the intangible asset to its estimated fair value. Since quoted market prices are seldom available for trademarks and trade names such as ours, we utilize present value techniques to estimate fair value. Accordingly, management's

39

projections are utilized to assimilate all of the facts, circumstances and expectations related to the trademark or trade name and estimate the cash flows over its useful life. In performing this analysis, management considers the same types of information as listed above in regards to finite-lived intangible assets. Once that analysis is completed, a discount rate is applied to the cash flows to estimate fair value. Future events, such as competition, technological advances and reductions in advertising support for our trademarks and trade names could cause subsequent evaluations to utilize different assumptions.

Goodwill

As part of its annual test for impairment of goodwill, management estimates the discounted cash flows of each reporting unit, which is at the brand level, and one level below the operating segment level, to estimate their respective fair values. In performing this analysis, management considers the same types of information as listed above in regards to finite-lived intangible assets. In the event that the carrying amount of the reporting unit exceeds the fair value, management would then be required to allocate the estimated fair value of the assets and liabilities of the reporting unit as if the unit was acquired in a business combination, thereby revaluing the carrying amount of goodwill. In a manner similar to indefinite-lived assets, future events, such as competition, technological advances and reductions in advertising support for our trademarks and trade names could cause subsequent evaluations to utilize different assumptions.

Impairment Analysis

In estimating the value of trademarks and trade names, as well as goodwill at March 31, 2009, management applied a discount rate of 11.0%, the Company's estimated future weighted-average cost of funds, to the projected cash flows. This discounted cash flow methodology is a widely-accepted valuation technique utilized by market participants in the valuation process and has been applied consistently. In addition, we considered the Company's market capitalization at March 31, 2009, as compared to the aggregate fair values of our reporting units to assess the reasonableness of our estimates pursuant to the discounted cash flow methodology.

During the three month period ended March 31, 2009, as a direct consequence of the challenging economic environment, the dislocation of the debt and equity markets, and contracting consumer demand for our branded products, we recorded a non-cash charge in the amount of \$249.6 million related to the impairment of intangible assets and goodwill across the entire product line because the carrying amount of these "branded" assets exceeded their respective fair values. A summary of the impairment activity by segment is as follows:

(In thousands)	Over-the-Counter Healthcare	Household Cleaning	Personal Care	Consolidated
Goodwill	\$125,527	\$65,160	\$--	\$ 190,687
Intangible assets				
Indefinite-lived	28,603	16,184	--	44,787
Finite-lived	12,420	--	1,696	14,116
	41,023	16,184	1,696	58,903
	\$166,550	\$81,344	\$1,696	\$ 249,590

The discount rate utilized in the analyses, as well as future cash flows may be influenced by such factors as changes in interest rates and rates of inflation. Additionally, should the related fair values of goodwill and intangible assets continue to be adversely affected as a result of declining sales or margins caused by competition, changing consumer preferences, technological advances or reductions in advertising and promotional expenses, the Company may be required to record additional impairment charges in the future. However, the Company was not required to recognize

an additional impairment charge during the three or six month period ended September 30, 2009.

Stock-Based Compensation

The Compensation and Equity Topics of the FASB ASC requires the Company to measure the cost of services to be rendered based on the grant-date fair value of the equity award. Compensation expense is to be recognized over the period

40

which an employee is required to provide service in exchange for the award, generally referred to as the requisite service period. Information utilized in the determination of fair value includes the following:

- Type of instrument (i.e.: restricted shares vs. an option, warrant or performance shares),
 - Strike price of the instrument,
- Market price of the Company's common stock on the date of grant,
 - Discount rates,
 - Duration of the instrument, and
- Volatility of the Company's common stock in the public market.

Additionally, management must estimate the expected attrition rate of the recipients to enable it to estimate the amount of non-cash compensation expense to be recorded in our financial statements. While management uses diligent analysis to estimate the respective variables, a change in assumptions or market conditions, as well as changes in the anticipated attrition rates, could have a significant impact on the future amounts recorded as non-cash compensation expense. The Company recorded net non-cash compensation expense of \$2.4 million and \$1.1 million during the years ended March 31, 2009 and 2008, respectively. However, during the year ended March 31, 2009, management was required to reverse previously recorded stock-based compensation costs of \$193,000 and \$705,000 related to the May 2008 and 2007 grants, respectively, as it was determined that the Company would not meet the performance goals associated with such grants of restricted stock. During the year ended March 31, 2008, management for the same reasons was required to reverse previously recorded stock-based compensation costs of \$538,000, \$394,000 and \$166,000 related to the October 2005, July 2006 and May 2007 grants, respectively. The Company recorded non-cash compensation expense of \$177,000 and \$848,000 during the three and six month periods ended September 30, 2009 and 2008, respectively, and non-cash compensation of \$948,000 and \$1.6 million during the three and six month periods ended September 30, 2008, respectively. During the six months ended September 30, 2009, management was required to reverse previously recorded stock-based compensation costs of \$564,000 recorded in 2009, as the service requirements related to those grants were not met.

Loss Contingencies

Loss contingencies are recorded as liabilities when it is probable that a liability has been incurred and the amount of such loss is reasonably estimable. Contingent losses are often resolved over longer periods of time and involve many factors including:

- Rules and regulations promulgated by regulatory agencies,
- Sufficiency of the evidence in support of our position,
 - Anticipated costs to support our position, and
 - Likelihood of a positive outcome.

Recent Accounting Pronouncements

In August 2009, the FASB issued authoritative guidance to provide clarification on measuring liabilities at fair value when a quoted price in an active market is not available. In these circumstances, a valuation technique should be applied that uses either the quote of the liability when traded as an asset, the quoted prices for similar liabilities or similar liabilities when traded as assets, or another valuation technique consistent with existing fair value measurement guidance, such as an income approach or a market approach. The new guidance also clarifies that when estimating the fair value of a liability, a reporting entity is not required to include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of the liability. This guidance is effective with the Company's fiscal 2010 third quarter. The Company does not anticipate this guidance will have a material impact on the Company's consolidated financial statements.

In June 2009, the FASB issued authoritative guidance to eliminate the exception to consolidate a qualifying special-purpose entity, change the approach to determining the primary beneficiary of a variable interest entity and

require companies to more frequently re-assess whether they must consolidate variable interest entities. Under the new guidance, the primary beneficiary of a variable interest entity is identified qualitatively as the enterprise that has both (a) the power to direct the activities of a variable interest entity that most significantly

impact the entity's economic performance, and (b) the obligation to absorb losses of the entity that could potentially be significant to the variable interest entity or the right to receive benefits from the entity that could potentially be significant to the variable interest entity. This guidance becomes effective for the Company's fiscal 2011 year-end and interim reporting periods thereafter. The Company does not expect this guidance to have a material impact on its consolidated financial statements.

In June 2009, the FASB established the FASB ASC as the source of authoritative accounting principles recognized by the FASB to be applied in the preparation of financial statements in conformity with generally accepted accounting principles. The new guidance explicitly recognizes rules and interpretive releases of the SEC under federal securities laws as authoritative accounting principles generally accepted in the United States of America ("GAAP") for SEC registrants. The new guidance became effective for our financial statements issued for the three and six month periods ending on September 30, 2009; however, the adoption of the FASB ASC did not have a material impact on the Company's financial position, results from operations or cash flows.

In May 2009, guidance was issued under the topic Subsequent Events related to the accounting for and disclosure of events that occur after the balance sheet date, but before the financial statements are issued or are available to be issued. Additionally, the new guidance requires the Company to disclose the date through which subsequent events have been evaluated, as well as whether that date is the date the financial statements were issued or the date the financial statements were available to be issued. As discussed above, subsequent to the period end the Company sold certain personal care products to an unrelated third party. The related assets and operating results were reclassified accordingly.

The Financial Instruments Topic of the FASB ASC requires disclosures about the fair values of financial instruments at interim reporting periods in addition to annual financial statements. Effective April 1, 2009, the new guidance involves in regard to the fair values of financial instruments only enhanced disclosures and did not have any impact on the Company's financial position, results from operations or cash flows.

The Investments-Debt and Equity Securities topic of the FASB ASC modified the threshold a company must meet to avoid recognizing other-than-temporary impairments of debt securities purchased as investments. Effective April 1, 2009, the implementation of the new guidance did not have any impact on the Company's financial position, results from operations or cash flows.

The Derivatives and Hedging Topic of the FASB ASC requires a company with derivative instruments to disclose information to enable users of the financial statements to understand (i) how and why the company uses derivative instruments, (ii) how derivative instruments and related hedged items are accounted for, and (iii) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. Accordingly, the new guidance requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The implementation of the new guidance at January 1, 2009 involved enhanced disclosures of derivative instruments and the Company's hedging activities and did not have any impact on the Company's financial position, results from operations or cash flows.

In September 2006, the FASB issued guidance on Fair Value Measurements and Disclosures, which provides a single definition of fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements in an effort to increase comparability related to the recognition of market-based assets and liabilities and their impact on earnings. The Fair Value Measurements and Disclosures guidance is effective for the Company's interim financial statements issued after April 1, 2008. However, on February 12, 2008, the FASB deferred the effective date of the guidance for one year for non-financial assets and non-financial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis. The implementation of the guidance, effective April 1, 2008, did not have a material effect on financial assets and liabilities included in the Company's consolidated financial statements as fair value is based on readily available market prices. Additionally,

the implementation of the Fair Value Measurements and Disclosures guidance did not have a material effect as it relates to non-financial assets and non-financial liabilities that are recognized or disclosed at fair value in the Company's financial statements on a non-recurring basis.

Management has reviewed and continues to monitor the actions of the various financial and regulatory reporting agencies and is currently not aware of any other pronouncement that could have a material impact on the Company's consolidated financial position, results of operations or cash flows.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 (the “PSLRA”), including, without limitation, information within Management’s Discussion and Analysis of Financial Condition and Results of Operation. The following cautionary statements are being made pursuant to the provisions of the PSLRA and with the intention of obtaining the benefits of the “safe harbor” provisions of the PSLRA. Although we believe that our expectations are based on reasonable assumptions, actual results may differ materially from those in the forward-looking statements.

Forward-looking statements speak only as of the date of this Quarterly Report on Form 10-Q. Except as required under federal securities laws and the rules and regulations of the SEC, we do not have any intention to update any forward-looking statements to reflect events or circumstances arising after the date of this Quarterly Report on Form 10-Q, whether as a result of new information, future events or otherwise. As a result of these risks and uncertainties, readers are cautioned not to place undue reliance on forward-looking statements included in this Quarterly Report on Form 10-Q or that may be made elsewhere from time to time by, or on behalf of, us. All forward-looking statements attributable to us are expressly qualified by these cautionary statements.

These forward-looking statements generally can be identified by the use of words or phrases such as “believe,” “anticipate,” “expect,” “estimate,” “project,” “will be,” “will continue,” “will likely result,” or other similar words or phrases. Forward-looking statements and our plans and expectations are subject to a number of risks and uncertainties that could cause actual results to differ materially from those anticipated, and our business in general is subject to such risks. For more information, see “Risk Factors” contained in Part II, Item 1A. of this Quarterly Report on Form 10-Q. In addition, our expectations or beliefs concerning future events involve risks and uncertainties, including, without limitation:

- General economic conditions affecting our products and their respective markets,
- Our ability to increase organic growth via new product introductions or line extensions,
 - The high level of competition in our industry and markets,
 - Our ability to invest in research and development,
- Our dependence on a limited number of customers for a large portion of our sales,
 - Disruptions in our distribution center,
- Acquisitions, dispositions or other strategic transactions diverting managerial resources, or incurrence of additional liabilities or integration problems associated with such transactions,
- Changing consumer trends or pricing pressures which may cause us to lower our prices,
 - Increases in supplier prices,
 - Increases in transportation and fuel charges,
 - Changes in our senior management team,
 - Our ability to protect our intellectual property rights,
 - Our dependency on the reputation of our brand names,

- Shortages of supply of sourced goods or interruptions in the manufacturing of our products,
 - Our level of indebtedness, and ability to service our debt,
 - Any adverse judgments rendered in any pending litigation or arbitration,
 - Our ability to obtain additional financing, and
- The restrictions imposed by our Senior Credit Facility and the indenture on our operations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to changes in interest rates because our Senior Credit Facility is variable rate debt. Interest rate changes generally do not affect the market value of the Senior Credit Facility, but do affect the amount of our interest payments and, therefore, our future earnings and cash flows, assuming other factors are held constant. At September 30, 2009 we had variable rate debt of approximately \$212.3 million related to our Tranche B term loan.

In February 2008, the Company entered into an interest rate swap agreement, effective March 26, 2008, in the notional amount of \$175.0 million, decreasing to \$125.0 million at March 26, 2009, to replace and supplement a \$50.0 million interest rate cap agreement that expired on May 30, 2008. Under the swap agreement, the Company pays a fixed rate of 2.88% while receiving a variable rate based on LIBOR. The fair value of the interest rate swap agreement of \$1.6 million was included in other accrued liabilities at September 30, 2009. The agreement terminates on March 26, 2010.

Holding other variables constant, including levels of indebtedness, a one percentage point increase in interest rates on our variable rate debt would have an adverse impact on pre-tax earnings and cash flows for the twelve months ending September 30, 2010 of approximately \$2.1 million.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company's management, with the participation of its Chief Executive Officer and the Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934 ("Exchange Act") as of September 30, 2009. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of September 30, 2009, the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in the reports the Company files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There have been no changes during the quarter ended September 30, 2009 in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The legal proceedings in which we are involved have been disclosed previously in our Annual Report on Form 10-K for the fiscal year ended March 31, 2009 and our Quarterly Report on Form 10-Q for the fiscal quarter ended June 30, 2009. Except as set forth below, there have been no material developments in our pending legal proceedings since June 30, 2009. For more information regarding our pending legal proceedings which we deem to be material to the Company, please see the legal proceedings disclosure contained in Part I, Item 3. of our Annual Report on Form 10-K for the fiscal year ended March 31, 2009 and Part II, Item 1. of our Quarterly Report on Form 10-Q for the fiscal quarter ended June 30, 2009.

Securities Class Action

The settlement agreed to by the Company and the lead plaintiffs has received preliminary fairness approval by the Court and class members have been notified. The settlement is expected to be presented to the Court for a final fairness determination at a hearing scheduled for December 4, 2009. If final approval of the settlement is obtained from the Court, the settlement would result in dismissal of all claims against us, our officers and directors and the other defendants in the action with prejudice. If the settlement is not completed, then the parties may attempt to reach agreement on another settlement or resume the litigation.

DenTek Litigation

On November 5, 2009, the Court issued an Opinion and Order construing one of the claims of the Company's U.S. Patent No. 6,830,051, which forms the basis for the patent infringement claims in the DenTek litigation. The Company believes the Opinion and Order issued by the Court is favorable to the Company's patent infringement claim against DenTek Oral Care, Inc.

In addition, the Company is involved from time to time in other routine legal matters and other claims incidental to its business. The Company reviews outstanding claims and proceedings internally and with external counsel as necessary to assess probability and amount of potential loss. These assessments are re-evaluated at each reporting period and as new information becomes available to determine whether a reserve should be established or if any existing reserve should be adjusted. The actual cost of resolving a claim or proceeding ultimately may be substantially different than the amount of the recorded reserve. In addition, because it is not permissible under GAAP to establish a litigation reserve until the loss is both probable and estimable, in some cases there may be insufficient time to establish a reserve prior to the actual incurrence of the loss (upon verdict and judgment at trial, for example, or in the case of a quickly negotiated settlement). The Company believes the resolution of routine matters and other incidental claims, taking into account reserves and insurance, will not have a material adverse effect on its business, financial condition, results from operations or cash flows.

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors previously disclosed in Part I, Item 1A. of our Annual Report on Form 10-K for the year ended March 31, 2009.

ITEM SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

4.

The Company's 2009 Annual Meeting of Stockholders was held on August 4, 2009 (the "Annual Meeting"). Proxies for the Annual Meeting were solicited in accordance with the Exchange Act to elect directors to serve until the 2010 Annual Meeting of Stockholders or until their earlier removal or resignation and to ratify the appointment of PricewaterhouseCoopers LLP as the independent registered public accounting firm for the fiscal year ending March 31, 2010. The following nominees were elected to the Company's Board of Directors to serve until the 2010 Annual Meeting of Stockholders or until their respective successors have been elected and qualified, or until their earlier death, resignation or retirement. The voting information for each elected nominee is set forth below:

	For	Withheld
Mark Pettie	44,250,178	1,919,571
L. Dick Buell	44,913,164	1,256,585
John E. Byom	45,062,758	1,106,991
Gary E. Costley	44,450,818	1,718,931
Vincent J. Hemmer	42,152,920	4,016,829
Patrick Lonergan	45,088,845	1,080,904
Peter C. Mann	44,669,582	1,500,167

The votes for the ratification of the appointment of PricewaterhouseCoopers LLP as the Company's independent registered public accounting firm for the audit of the Company's financial statements for the fiscal year ending March 31, 2010 were as follows:

	For	Against	Abstain
	46,065,535	55,475	48,739
