QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2011

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

Commission file number: 001-34533

CELADON GROUP, INC.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

13-3361050
(IRS Employer
Identification No.)

9503 East 33rd Street
One Celadon Drive
Indianapolis, IN
(Address of principal executive offices)

46235-4207
(Zip Code)

(Registrant's telephone number, including area code): (317) 972-7000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Edgar Filing: CELADON GROUP INC - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.(Check one):

Large accelerated filer [] Accelerated filer [X] Non-accelerated filer []

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12-b2 of the Exchange Act).

Yes [] No

[X]

As of October 31, 2011 (the latest practicable date), 22,537,921 shares of the registrant's common stock, par value \$0.033 per share, were outstanding.

Table of Contents

CELADON GROUP, INC.
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 September 30, 2011
 (Unaudited)

1. Basis of Presentation

References in this Report on Form 10-Q to "we," "us," "our," "Celadon," or the "Company" or similar terms refer to Celadon Group, Inc. and its consolidated subsidiaries. All inter-company balances and transactions have been eliminated in consolidation.

The accompanying condensed consolidated unaudited financial statements of Celadon Group, Inc. and its subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States of America and Regulation S-X, instructions to Form 10-Q, and other relevant rules and regulations of the Securities and Exchange Commission (the "SEC"), as applicable to the preparation and presentation of interim financial information. Certain information and footnote disclosures have been omitted or condensed pursuant to such rules and regulations. We believe all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Results of operations in interim periods are not necessarily indicative of results for a full year. These condensed consolidated unaudited financial statements and notes thereto should be read in conjunction with our consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended June 30, 2011.

The preparation of the financial statements in conformity with United States generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

2. Earnings Per Share (in thousands, except per share data)

A reconciliation of the basic and diluted earnings per share is as follows:

	Three months ended September 30,	
	2011	2010
Weighted average common shares outstanding – basic	22,218	22,056
Dilutive effect of stock options and unvested restricted stock units	459	500
Weighted Average common shares outstanding – diluted	22,677	22,556
Net income	\$ 5,372	\$ 4,421
Earnings per common share		
Basic	\$ 0.24	\$ 0.20
Diluted	\$ 0.24	\$ 0.20

Edgar Filing: CELADON GROUP INC - Form 10-Q

Certain shares of common stock were excluded from the computation of diluted earnings per share because the options exercise prices were greater than the average market price of the common shares, and therefore, the effect would be anti-dilutive. A summary of those options follows:

	Three months ended September 30, 2011 2010	
Number of anti-dilutive shares	816	245

Table of Contents

 (Unaudited)

3. Stock Based Compensation

The following table summarizes the components of our share based compensation program expense (in thousands):

	For three months ended September 30,	
	2011	2010
Stock compensation expense for options, net of forfeitures	\$ 230	\$ 215
Stock compensation expense for restricted stock, net of forfeitures	389	390
Stock compensation income for stock appreciation rights, including forfeitures	(727)	(48)
Total stock compensation expense	\$ (108)	\$ 557

As of September 30, 2011, we have approximately \$1.2 million of unrecognized compensation cost related to unvested options granted under the Company's 2006 Omnibus Incentive Plan, as amended (the "2006 Plan"). This cost is expected to be recognized over a weighted-average period of 1.4 years and a total period of 3.5 years.

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option valuation model that uses the following assumptions:

- Dividend yield – the dividend yield is based on our historical experience and future expectation of dividend payouts.
- Expected volatility – we analyzed the volatility of our stock using historical data for three or four years through the end of the most recent period to estimate the expected volatility, as the historical data mirrors the vesting terms of the respective option.
- Risk-free interest rate – the risk-free interest rate assumption is based on U.S. Treasury securities at a constant maturity with a maturity period that most closely resembles the expected term of the stock option award.
- Expected terms – the expected terms of employee stock options represents the weighted-average period the stock options are expected to remain outstanding and has been determined based on an analysis of historical exercise behavior from 1995 through the end of the most recent period.

No option grants were issued in the three months ended September 30, 2011 or 2010.

Table of Contents

CELADON GROUP, INC.
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 September 30, 2011
 (Unaudited)

A summary of the award activity of the Company's stock option plans as of September 30, 2011, and changes during the three month period then ended is presented below:

Options	Option Totals	Weighted-Average Exercise Price per Share
Outstanding at July 1, 2011	1,432,083	\$ 10.60
Granted	—	—
Exercised	(11,250)	\$ 3.00
Forfeited or expired	(1,500)	\$ 8.79
Outstanding at September 30, 2011	1,419,333	\$ 10.66
Exercisable at September 30, 2011	1,035,835	\$ 10.74

As of September 30, 2011, we also have approximately \$2.9 million of unrecognized compensation expense related to restricted stock awards, which is anticipated to be recognized over a weighted-average period of 2.9 years and a total period of 3.8 years. A summary of the restricted stock award activity under the 2006 Plan as of September 30, 2011, and changes during the three-month period then ended is presented below:

	Number of Restricted Stock Awards	Weighted-Average Grant Date Fair Value
Unvested at July 1, 2011	355,630	\$ 12.27
Granted	5,000	\$ 13.38
Vested and Issued	(57,139)	\$ 11.89
Forfeited	(566)	\$ 11.89
Outstanding at September 30, 2011	302,925	\$ 12.36

The fair value of each restricted stock award is based on the closing market price on the date of grant.

The company had 143,156 and 144,844 outstanding stock appreciation rights as of September 30, 2011 and September 30, 2010, respectively. These stock appreciation rights were granted at a fair value market price of \$8.64 based on the

closing market price on the date of the grant.

4. Segment Information (in thousands)

We have two reportable segments comprised of an asset-based segment and an asset-light-based segment. Our asset-based segment includes our asset based dry van carrier and rail services, which are geographically diversified but have similar economic and other relevant characteristics, as they all provide truckload carrier services of general commodities to a similar class of customers. Our asset-light based segment consists of our warehousing, brokerage, and less-than-load ("LTL") operations, and Truckers B2B (through March 2011 when the majority interest was sold and de-consolidated), which we have determined qualifies as a reportable segment under ASC 280-10 Segment Reporting.

	Operating Revenues Three Months Ended September 30,	
	2011	2010
Asset Based	\$ 131,478	\$ 129,461
Asset-light Based	10,001	10,828
Total	\$ 141,479	\$ 140,289

	Operating Income Three Months Ended September 30,	
	2011	2010
Asset Based	\$ 8,276	\$ 7,269
Asset-light Based	652	812
Total	\$ 8,928	\$ 8,081

Information as to the Company's operating revenue by geographic area is summarized below. The Company allocates operating revenue based on country of origin of the tractor hauling the freight:

	Operating Revenue Three Months Ended September 30,	
	2011	2010
United States	\$ 122,213	\$ 123,098
Canada	\$ 11,077	\$ 10,161
Mexico	\$ 8,189	\$ 7,030
Consolidated	\$ 141,479	\$ 140,289

Table of Contents

CELADON GROUP, INC.
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 September 30, 2011
 (Unaudited)

5. Comprehensive Income

Comprehensive income includes net income and changes in fair value on foreign currency and fuel derivatives, which qualified for hedge accounting, foreign currency translation adjustments, and changes in fair value of available for sale securities. A reconciliation of net income and comprehensive income follows (in thousands):

	Three months ended September 30,	
	2011	2010
Net income	\$ 5,372	\$ 4,421
Unrealized gain (loss) on fuel derivative instruments	(649)	860
Unrealized gain (loss) on currency derivative instruments	(437)	306
Unrealized gain on available for sale securities	280	–
Foreign currency translation adjustments	(3,590)	543
Comprehensive income	\$ 976	\$ 6,130

6. Income Taxes

Our effective income tax rate was 41.5% for the three-month period ended September 30, 2011, compared with 42.6% for the three-month period ended September 30, 2010. In determining our quarterly provision for income taxes, we use an estimated annual effective tax rate, which is based on our expected annual income, statutory tax rates, nontaxable and nondeductible items of income and expense and the ultimate outcome of tax audits.

The Company follows ASC Topic 740-10-25 in Accounting for Uncertainty in Income Taxes. Topic 740 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. As of September 30, 2011, the Company recorded a \$0.4 million liability for unrecognized tax benefits, a portion of which represents penalties and interest.

As of September 30, 2011, we are subject to U.S. Federal income tax examinations for the tax years 2007 through 2010. We file tax returns in numerous state jurisdictions with varying statutes of limitations.

7. Commitments and Contingencies

We are involved in certain claims and pending litigation arising from the normal conduct of business. Based on our present knowledge of the facts and, in certain cases, opinions of outside counsel, we believe the resolution of these claims and pending litigation will not have a material adverse effect on our financial condition, results of operations or our liquidity.

Table of Contents

CELADON GROUP, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2011
(Unaudited)

8. Fair Value Measurements

Effective January 1, 2009, we adopted ASC 820-10 Fair Value Measurements and Disclosure for non-recurring fair value measurements of non-financial assets and liabilities. This standard defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. This standard establishes a three-level hierarchy for fair value measurements based upon the significant inputs used to determine fair value. Observable inputs are those which are obtained from marked participants external to the Company while unobservable inputs are generally developed internally, utilizing management's estimates assumptions, and specific knowledge of the nature of the assets or liabilities and related markets. The three levels are defined as follows:

Level 1 – Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date. An active market is defined as a market in which transactions for the assets or liabilities occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 – Inputs include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active (markets with few transactions), inputs other than quoted prices that are observable for the asset or liability (i.e., interest rates, yield curves, etc), and inputs that are derived principally from or corroborated by observable market data correlation or other means (market corroborated inputs).

Level 3 – Unobservable inputs, only used to the extent that observable inputs are not available, reflect the Company's assumptions about the pricing of an asset or liability.

Table of Contents

CELADON GROUP, INC.
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 September 30, 2011
 (Unaudited)

In accordance with the fair value hierarchy described above, the following table shows the fair value of the Company's financial assets and liabilities (in thousands) that are required to be measured at fair value as of September 30, 2011 and June 30, 2011.

	Level 1		Level 2		Level 3			
	Balance at September 30, 2011	Balance at June 30, 2011	Balance at September 30, 2011	Balance at June 30, 2011	Balance at September 30, 2011	Balance at June 30, 2011		
Foreign currency derivatives	(332)	105	–	–	(332)	105	–	–
F u e l derivatives	(262)	387	–	–	(262)	387	–	–
Available for Sale Securities	4,670	–	4,670	–	–	–	–	–

9. Dividend

On August 17, 2011, the Company declared a cash dividend of \$0.02 per share of common stock. The dividend was payable to shareholders of record on September 26, 2011 and was paid on October 7, 2011. Future payment of cash dividends, and the amount of any such dividends, will depend on our financial condition, results of operations, cash requirements, tax treatment, and certain corporate law requirements, as well as other factors deemed relevant by our Board of Directors.

10. Fuel Derivatives

In the Company's day to day business activities we are exposed to certain market risks, including the effects of changes in fuel prices. The company continually reviews new ways to reduce the potentially adverse effects that the volatility of fuel markets may have on operating results. In an effort to reduce the variability of the ultimate cash flows associated with fluctuations in diesel fuel prices, the company has begun to enter into futures contracts. These instruments will be heating oil futures contracts as the related index, New York Mercantile Exchange ("NYMEX"), generally exhibits high correlation with the changes in the dollars of the forecasted purchase of diesel fuel. The Company does not engage in speculative transactions, nor does it hold or issue financial instruments for trading purposes.

In fiscal 2012, we entered into futures contracts, which pertain to 3.2 million gallons (210,000 gallons per month) or approximately 7% of our monthly projected fuel requirements through December 2012. Under these contracts, we pay a fixed rate per gallon of heating oil and receive the monthly average price of New York heating oil per the

NYMEX. The Company has done retrospective and prospective regression analyses that showed the changes in the prices of diesel fuel and heating oil were deemed to be highly effective based on the relevant authoritative guidance. Accordingly, we have designated the respective hedges as cash flow hedges.

We perform both a prospective and retrospective assessment of the effectiveness of our hedge contracts at inception and quarterly. If our analysis shows that the derivatives are not highly effective as hedges, we will discontinue hedge accounting for the period and prospectively recognize changes in the fair value of the derivative being recognized through earnings. As a result of our effectiveness assessment at inception and at September 30, 2011, we believe our hedge contracts have been and will continue to be highly effective in offsetting changes in cash flows attributable to the hedged risk.

Table of Contents

CELADON GROUP, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2011
(Unaudited)

We recognize all derivative instruments at fair value on our consolidated condensed balance sheets in other assets or other accrued expenses. The Company's derivative instruments are designated as cash flow hedges, thus the effective portion of the gain or loss on the derivative is reported as a component of accumulated other comprehensive income and will be reclassified into earnings in the same period during which the hedged transactions affect earnings. The effective portion of the derivative represents the change in fair value of the hedge that offsets the change in fair value of the hedged item. To the extent the change in the fair value of the hedge does not perfectly offset the change in the fair value of the hedged item, the ineffective portion of the hedge is immediately recognized in other income or expense on our consolidated condensed statements of operations. The ineffective portion of the hedge for the quarter was immaterial and therefore not recognized through earnings.

Based on the amounts in accumulated other comprehensive income as of September 30, 2011 and the expected timing of the purchases of the diesel hedged, we expect to reclassify \$0.3 million of losses on derivative instruments from accumulated other comprehensive income to the statement of income, as an offset to fuel expense, during the next fifteen months due to the actual diesel fuel purchases. The amounts actually realized will be dependent on the fair values as of the date of settlement.

Outstanding financial derivative instruments expose us to credit loss in the event of nonperformance by the companies with which we have these agreements. Our credit exposure related to these financial instruments is represented by the fair value of contracts reported as assets. To evaluate credit risk, we review each counterparty's audited financial statements and credit ratings and obtain references. Any credit valuation adjustments deemed necessary would be reflected in the fair value of the instrument. As of September 30, 2011, there have not been any adjustments made.

11. Marketable Equity Securities

In the first quarter of fiscal year 2012, the company invested \$4.4 million in marketable equity securities that are classified as available-for-sale securities. These securities are carried at fair value on our balance sheet in the Other Assets category, with unrealized gains and losses recorded through accumulated other comprehensive income. Any future realized gains and losses will be included in net income. As of September 30, 2011, the value of available-for-sale securities included in Other Assets was \$4.8 million, which included unrealized gains of \$0.3 million.

12. Recent Accounting Pronouncements

In June 2011, the FASB issued ASU No. 2011-05, "Comprehensive Income (ASC Topic 220): Presentation of Comprehensive Income" ("ASU 2011-05"), which amends current comprehensive income guidance. This accounting update eliminates the option to present the components of other comprehensive income as part of the statement of shareholders' equity. Instead the Company must report comprehensive income in either a single continuous statement of comprehensive income which contains two sections, net income and other comprehensive income, or in two separate but consecutive statements. ASU 2011-05 will be effective during interim and annual periods beginning after December 15, 2011; with early adoption permitted. Adoption of ASU 2011-05 is not expected to have a material impact on the Company's consolidated financial statements.

In September 2011, the Financial Accounting Standards Board ("FASB") issued ASU 2011-08, Goodwill and Other (Topic 350) – Testing Goodwill for Impairment. The new guidance permits an entity to first assess qualitative factors

to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount before applying the two-step goodwill impairment model that is currently in place. If it is determined through the qualitative assessment that a reporting unit's fair value is more likely than not greater than its carrying value, the remaining impairment steps would be unnecessary. The qualitative assessment is optional, allowing companies to go directly to the quantitative assessment. The new guidance is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011; however, early adoption is permitted. We do not expect the adoption of ASU 2011-08 will have a material impact on the consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Disclosure Regarding Forward Looking Statements

This Quarterly Report contains certain statements that may be considered forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements involve known and unknown risks, uncertainties, and other factors which may cause the actual results, events, performance, or achievements of the Company to be materially different from any future results, events, performance, or achievements expressed in or implied by such forward-looking statements. Such statements may be identified by the fact that they do not relate strictly to historical or current facts. These statements generally use words such as "believe," "expect," "anticipate," "project," "forecast," "should," "estimate," "plan," "intend," "outlook," "goal," "will," "may," and similar expressions. While it is impossible to identify all factors that may cause actual results to differ from those expressed in or implied by forward-looking statements, the risks and uncertainties that may affect the Company's business, include, but are not limited to, those discussed in the section entitled Item 1A. Risk Factors set forth below.

All such forward-looking statements speak only as of the date of this Form 10-Q. You are cautioned not to place undue reliance on such forward-looking statements. The Company expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in the Company's expectations with regard thereto or any change in the events, conditions, or circumstances on which any such statement is based.

References to the "Company," "we," "us," "our," and words of similar import refer to Celadon Group, Inc. and its consolidated subsidiaries.

Business Overview

We are one of North America's twenty largest truckload carriers as measured by revenue. We generated \$556.7 million in operating revenue during our fiscal year ended June 30, 2011. We provide asset-based dry van truckload carrier and rail services and asset-light based services including brokerage services, less-than-truckload (LTL), and warehousing services. Through our asset and asset-light services, we are able to transport or arrange for transportation throughout the United States, Canada, and Mexico.

We generated approximately 44% of our revenue in fiscal 2011 from international movements, and we believe our annual border crossings make us the largest provider of international truckload movements in North America. We believe that our strategically located terminals and experience with the language, culture, and border crossing requirements of each North American country provide a competitive advantage in the international trucking marketplace.

We believe our international operations, particularly those involving Mexico, offer an attractive business niche. The additional complexity of and need to establish cross-border business partners and to develop strong organization and adequate infrastructure in Mexico affords some barriers to competition that are not present in traditional U.S. truckload services.

Recent Results of Operations

Our results of operations for the quarter ended September 30, 2011, compared to the same period in 2010 are:

- Freight revenue decreased 6.0% to \$112.3 million from \$119.5 million;

- Net income increased to \$5.4 million from \$4.4 million; and
- Net income per diluted share increased to \$0.24 from \$0.20.

In the September 2011 quarter, average revenue per seated tractor per week was flat and average miles per seated tractor declined 2.8% from the September 2010 quarter. Average revenue per total mile increased 3.1% and average revenue per loaded mile increased 3.7% from the September 2010 quarter. We believe that we are making progress improving our freight mix and contract pricing.

Table of Contents

Our seated line haul tractors decreased to 2,529 tractors in the quarter ended September 30, 2011, compared to 2,688 tractors for the same period a year ago. The net change of 159 units is comprised of a 55-unit decrease in independent contractor tractors, and a 104-unit decrease in company tractors. The decrease in company tractors was primarily driven by difficulty recruiting drivers because of the tight driver market. We anticipate this number to increase in the current quarter as we hire drivers through our asset acquisition of the dry van division of Frozen Food Express Industries, Inc. The number of tractors operated by independent contractors decreased 12.7% from a year ago, and now represents 14.9% of our total fleet.

Revenue and Expenses

We primarily generate revenue by transporting freight for our customers. Generally, we are paid a predetermined rate per mile or per load for our services. We enhance our revenue by charging for tractor and trailer detention, loading and unloading activities, brokerage operations, and other specialized services, as well as through the collection of fuel surcharges to mitigate the impact of the cost of fuel. The main factors that affect our revenue are the revenue per mile we receive from our customers, the percentage of miles for which we are compensated, and the number of miles we generate with our equipment. These factors relate to, among other things, the general level of economic activity in the United States, inventory levels, specific customer demand, the level of capacity in the trucking industry, and driver availability.

The main factors that impact our profitability in terms of expenses are the variable costs of transporting freight for our customers. These costs include fuel expense, driver-related expenses, such as wages, benefits, training and recruitment, and independent contractor and third party carrier costs, which are recorded on the "Purchased Transportation" line of our consolidated statements of income. Expenses that have both fixed and variable components include maintenance, insurance, and claims. These expenses generally vary with the miles we travel, but also have a controllable component based on safety, fleet age, efficiency, and other factors. Our main fixed costs are the acquisition and depreciation of long-term assets, such as revenue equipment and the compensation of non-driver personnel. Effectively controlling our expenses and managing our net cost of revenue equipment acquisitions and dispositions, including any related gains or losses, are important elements of assuring our profitability. We evaluate our profitability using operating ratio, excluding the impact of fuel surcharge revenue (operating expenses, net of fuel surcharge, expressed as a percentage of revenue, before fuel surcharge), and income before income taxes, which eliminates shifting operating lease expenses "above the line" from interest expense on owned or capital leased equipment.

Table of Contents

Results of Operations

The following table sets forth the percentage relationship of expense items to freight revenue for the periods indicated:

	For the three months ended September 30,	
	2011	2010
Freight revenue(1)	100.0 %	100.0 %
Operating expenses:		
Salaries, wages, and employee benefits	33.4 %	31.9 %
Fuel(1)	8.3 %	9.6 %
Purchased transportation	24.2 %	21.7 %
Revenue equipment rentals	5.3 %	6.2 %
Operations and maintenance	8.7 %	8.5 %
Insurance and claims	2.7 %	3.5 %
Depreciation and amortization	5.0 %	6.3 %
Cost of products and services sold	0.0 %	1.2 %
Communications and utilities	0.8 %	0.9 %
Operating taxes and licenses	2.2 %	2.0 %
General and other operating	1.4 %	1.4 %
Total operating expenses	92.0 %	93.2 %
Operating income	8.0 %	6.8 %
Other expense:		
Interest expense	0.0 %	0.4 %
Other expense (income), net	(0.2 %)	0.0 %
Income before income taxes	8.2 %	6.4 %
Provision for income taxes	3.4 %	2.7 %
Net income	4.8 %	3.7 %

(1) Freight revenue is total revenue less fuel surcharges. In this table, fuel surcharges are eliminated from revenue and subtracted from fuel expense. Fuel surcharges were \$29.2 million and \$20.8 million for the first quarter of fiscal 2012 and 2011, respectively.

Comparison of Three Months Ended September 30, 2011 to Three Months Ended September 30, 2010

Total revenue increased by \$1.2 million, or 0.9%, to \$141.5 million for the first quarter of fiscal 2012, from \$140.3 million for the first quarter of fiscal 2011. Freight revenue decreased by \$7.2 million, or 6.0%, to \$112.3 million for the first quarter of fiscal 2012, from \$119.5 million for the first quarter of fiscal 2011. This decrease was primarily attributable to a decrease in loaded miles to 59.0 million for the first quarter of fiscal 2012 from 65.3 million in the first quarter of fiscal 2011, offset by an increase to revenue per loaded mile to \$1.526 for the first quarter of fiscal 2012 from \$1.471 for the first quarter of fiscal 2011. Additionally, the decrease in revenue was also the result of a reduction in seated line-haul tractors offset by the rate increases we were able to implement over the last year and improving freight selection. This combination of factors resulted in a flat average revenue per tractor per week, which is our primary measure of asset productivity, of \$2,971 in the first quarter of fiscal 2012, from \$2,961 for the first quarter of fiscal 2011. The decrease in company tractors was primarily driven by difficulty recruiting drivers because of the tight driver market. We anticipate revenue to increase in the near term due to an anticipated increase in our seated line-haul tractors through the hiring of certain drivers from the acquisition of the dry van division of Frozen Food Express Industries, Inc.

Revenue for our asset-light segment decreased to \$10.0 million in the first quarter of fiscal 2012 from \$10.8 million in the first quarter of fiscal 2011.

Table of Contents

Fuel surcharge revenue increased to \$29.2 million in the first quarter of fiscal 2012 from \$20.8 million for the first quarter of fiscal 2011.

In discussing our results of operations, we use freight revenue ("revenue") and fuel, net of fuel surcharge, because we believe that eliminating the impact of the sometimes volatile source of revenue affords more consistent basis for comparing our results of operations from period to period.

Salaries, wages, and employee benefits were \$37.6 million, or 33.4% of revenue, for the first quarter of fiscal 2012, compared to \$38.1 million, or 31.9% of revenue, for the first quarter of fiscal 2011. The decrease in absolute dollars was the result of a decrease in driver payroll related to a decrease in company miles and a decrease in stock compensation related expenses, partially offset by increases in administrative wages and insurance benefits.

Fuel expenses, net of fuel surcharge revenue, decreased to \$9.3 million, or 8.3% of revenue, for the first quarter of fiscal 2012, compared to \$11.5 million, or 9.6% of revenue, for the first quarter of fiscal 2011. This decrease was primarily attributable to a decrease in gallons purchased due to lower total company miles offset by the average fuel price increasing to \$3.46 per gallon in the first quarter of fiscal 2012, compared to \$2.55 per gallon in the first quarter of fiscal 2011. We expect that our continued efforts to reduce idling, operate more fuel-efficient tractors, and aerodynamic trailer skirts will continue to have a positive impact on our miles per gallon; however, we expect this positive impact to be partially offset by lower fuel economy on EPA-mandated new engines and use of more costly ultra-low sulfur diesel fuel.

Purchased transportation increased to \$27.1 million, or 24.2% of revenue, for the first quarter of fiscal 2012, from \$25.9 million, or 21.7% of revenue, for the first quarter of fiscal 2011. These increases were primarily related to an increase in purchased transportation for our intermodal business, offset by a decrease in independent contractor miles to 11.6 million in the first quarter of fiscal 2012 compared to 13.1 million miles in the first quarter of fiscal 2011. Independent contractors are drivers who cover all their operating expenses (fuel, driver salaries, maintenance, and equipment costs) for a fixed payment per mile. We expect purchased transportation to increase as we continue to increase our purchased transportation for our brokerage and intermodal operations.

Revenue equipment rentals decreased to \$5.9 million, or 5.3% of revenue, for the first quarter of fiscal 2012, compared to \$7.5 million, or 6.2% of revenue, for the first quarter of fiscal 2011. This decrease was attributable to a decrease in the number of tractors financed under operating leases, offset by an increase in the number of trailers financed under operating lease. At September 30, 2011, 1,297 tractors were held under operating leases, compared to 1,668 tractors at September 30, 2010. We expect our revenue equipment rental as a percentage of revenue to be similar to the current level going forward.

Operations and maintenance decreased to \$9.8 million, or 8.7% of revenue, for the first quarter of fiscal 2012, from \$10.2 million, or 8.5% of revenue, for the first quarter of fiscal 2011. Operations and maintenance consist of direct operating expense, maintenance, and tire expense. The dollar decrease in the first quarter of fiscal 2012 is primarily related to a decrease in costs associated with trailer maintenance as we have continued to reduce the age of our trailer fleet. We expect our operations and maintenance expense to be similar to the current level going forward, subject to implementation of CSA 2010 that may impact these expenses.

Insurance and claims expense decreased to \$3.0 million, or 2.7% of revenue, for the first quarter of fiscal 2012, from \$4.1 million, or 3.5% of revenue, for the first quarter of fiscal 2011. Insurance consists of premiums for liability, physical damage, cargo damage, and workers' compensation insurance, in addition to claims expense. These decreases are primarily from decreases in workers' compensation claims expense and liability insurance claims. Our insurance program involves self-insurance at various risk retention levels. Claims in excess of these risk levels are covered by insurance in amounts we consider to be adequate. We accrue for the uninsured portion of claims based on known

claims and historical experience. We continually revise and change our insurance program to maintain a balance between premium expense and the risk retention we are willing to assume. Insurance and claims expense will vary based primarily on the frequency and severity of claims, the level of self-retention, and the premium expense.

Table of Contents

Depreciation and amortization, consisting primarily of depreciation of revenue equipment, decreased to \$5.6 million, or 5.0% of revenue, for the first quarter of fiscal 2012, compared to \$7.5 million, or 6.3% of revenue, for the first quarter of fiscal 2011. These decreases were primarily attributable to decreased trailer depreciation, related to a net decrease of trailers in our owned fleet as compared to the first quarter of fiscal 2011. This decrease included a gain on sale of equipment in the first quarter of fiscal 2012, which include expenses to prepare the equipment for sale. Revenue equipment held under operating leases is not reflected on our balance sheet and the expenses related to such equipment are reflected on our statements of income in revenue equipment rentals, rather than in depreciation and amortization and interest expense, as is the case for revenue equipment that is financed with borrowings or capital leases. We anticipate that we will dispose of substantially all of the equipment acquired from Frozen Food Express Industries, Inc. during the quarter ending December 31, 2011. We expect our depreciation and amortization to be similar to the current level going forward.

All of our other operating expenses are relatively minor in amount, and there were no significant changes in such expenses. Accordingly, we have not provided a detailed discussion of such expenses.

Income taxes increased to \$3.8 million, with an effective tax rate of 41.5%, for the first quarter of fiscal 2012, from \$3.3 million, with an effective tax rate of 42.6%, for the first quarter of fiscal 2011. As pre-tax net income increases, our non-deductible expenses, such as per diem expense, have a lesser impact on our effective rate.

Liquidity and Capital Resources

Trucking is a capital-intensive business. We require cash to fund our operating expenses (other than depreciation and amortization), to make capital expenditures and acquisitions, and to repay debt, including principal and interest payments. Other than ordinary operating expenses, we anticipate that capital expenditures for the acquisition of revenue equipment will constitute our primary cash requirement over the next twelve months. We frequently consider potential acquisitions, and if we were to consummate an acquisition, our cash requirements would increase and we may have to modify our expected financing sources for the purchase of tractors. Subject to any required lender approval, we may make acquisitions in the future. Our principal sources of liquidity are cash generated from operations, bank borrowings, capital and operating lease financing of revenue equipment, and proceeds from the sale of used revenue equipment. At September 30, 2011, our total balance sheet debt, including capital lease obligations and current maturities, was \$6.7 million, compared to \$2.1 million at June 30, 2011.

As of September 30, 2011, we had a capital commitment for revenue equipment of \$63.8 million for delivery through fiscal 2012. These capital commitments are amounts before considering the proceeds of equipment dispositions. In fiscal 2012, we expect to purchase our new tractors with both cash and off-balance sheet operating leases and our new trailers with off-balance sheet operating leases.

On August 29, 2011, the Company increased our credit facility to \$100 million and reset the term on our five-year revolving credit facility agented by Bank of America, N.A. The facility refinanced the Company's existing credit facility and provides for ongoing working capital needs and general corporate purposes. Bank of America, N.A. continues to serve as the lead arranger in the facility and Wells Fargo Bank, N.A. continues to participate in the new facility. At September 30, 2011, we were authorized to borrow up to \$100 million under this revolving line of credit, which expires August 29, 2016. The applicable interest rate under this agreement is based on either a base rate equal to Bank of America, N.A.'s prime rate or LIBOR plus an applicable margin between 0.75% and 1.125% that is adjusted quarterly based on the Company's lease adjusted total debt to EBITDAR ratio. At September 30, 2011, we had \$4.7 million in outstanding borrowings related to our credit facility and \$0.4 million utilized for letters of credit. The agreement is collateralized by the assets of all the US subsidiaries of the Company. We are obligated to comply with certain financial covenants under our credit agreement and we were in compliance with these covenants at September 30, 2011.

We believe we will be able to fund our operating expenses, as well as our current commitments for the acquisition of revenue equipment over the next twelve months, with a combination of cash generated from operations, borrowings available under our primary credit facility, and lease financing arrangements. We will continue to have significant capital requirements over the long term, and the availability of the needed capital will depend upon our financial condition and operating results and numerous other factors over which we have limited or no control, including prevailing market conditions and the market price of our common stock. However, based on our operating results, anticipated future cash flows, current availability under our credit facility, and sources of equipment lease financing that we expect will be available to us, we do not expect to experience significant liquidity constraints in the foreseeable future.

Table of Contents

Cash Flows

Net cash provided by operations for the three months ended September 30, 2011 was \$2.6 million, compared to \$8.8 million for the three months ended September 30, 2010. Cash provided by operations decreased due to a decrease in accounts payable and accrued expenses.

Net cash used in investing activities was \$27.0 million for the three months ended September 30, 2011, compared to net cash used in investing activities of \$8.1 million for the three months ended September 30, 2010. Cash used in investing activities includes the net cash effect of acquisitions and dispositions of property and revenue equipment during each period. Capital expenditures for property and equipment totaled \$42.1 million for the three months ended September 30, 2011, and \$16.3 million for the three months ended September 30, 2010. We generated proceeds from the sale of property and equipment of \$15.2 million and \$8.2 million for the three months ended September 30, 2011, and September 30, 2010, respectively. Cash used in the quarter also included \$4.4 million for the purchase of available for sale securities.

Net cash provided by financing activities was \$4.7 million for the three months ended September 30, 2011, compared to net cash used of \$7.8 million for the three months ended September 30, 2010. The decrease in cash used for financing activities was primarily due to an increase in borrowings on our line of credit. Financing activity represents borrowings (new borrowings, net of repayment) and payments of the principal component of capital lease obligations.

Cash dividends accrued for the three months ended September 30, 2011, also increased approximately \$0.4 million, due to the accrual of our first quarterly dividend of \$0.02 per share that became effective in the first quarter of fiscal 2012. We currently expect to continue to pay quarterly cash dividends in the future. Future payment of cash dividends, and the amount of any such dividends, will depend upon our financial condition, results of operations, cash requirements, tax treatment, and certain corporate law requirements, as well as other factors deemed relevant by our Board of Directors.

Contractual Obligations

As of September 30, 2011, our operating leases, capitalized leases, other debts, and future commitments have stated maturities or minimum annual payments as follows:

	Total	Annual Cash Requirements As of September 30, 2011 (in thousands)			
		Payments Due by Period			
		Less than 1 year	1-3 years	3-5 Years	More than 5 years
Operating leases	\$ 79,826	\$ 29,403	\$ 31,485	\$ 10,830	\$ 8,108
Lease residual value guarantees	94,048	26,417	29,604	19,777	18,250
Capital leases(1)	2,120	446	1,674	–	–
Long-term debt(1)	4,780	35	4,745	–	–
Sub total	\$ 180,774	\$ 56,301	\$ 67,508	\$ 30,607	\$ 26,358
Future Purchase of R e v e n u e	\$ 63,829	\$ 4,702	\$ 12,540	\$ 21,198	\$ 25,389

Equipment					
Employment and consulting agreements(2)	700	700	-	-	-
Standby letters of credit	438	438	-	-	-
Total	\$ 245,741	\$ 62,141	\$ 80,048	\$ 51,805	\$ 51,747

(1) Includes interest

(2) The amounts reflected in the table do not include amounts that could become payable to our Chief Executive Officer and Chief Operating Officer under certain circumstances if their employment by the Company is terminated.

Table of Contents

Off-Balance Sheet Arrangements

Operating leases have been an important source of financing for our revenue equipment. Our operating leases include some under which we do not guarantee the value of the asset at the end of the lease term ("walk-away leases") and some under which we do guarantee the value of the asset at the end of the lease term ("residual value"). Therefore, we are subject to the risk that equipment values may decline, in which case we would suffer a loss upon disposition and be required to make cash payments because of the residual value guarantees. We were obligated for residual value guarantees related to operating leases of \$94.0 million at September 30, 2011, compared to \$82.5 million at September 30, 2010. We believe that any residual payment obligations will be satisfied by the value of the related equipment at the end of the lease. To the extent the expected value at the lease termination date is lower than the residual value guarantee; we would accrue for the difference over the remaining lease term. We anticipate that going forward we will use a combination of cash generated from operations and operating leases to finance tractor purchases and operating leases to finance trailer purchases.

Critical Accounting Policies

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America require that management make a number of assumptions and estimates that affect the reported amounts of assets, liabilities, revenue, and expenses in our consolidated financial statements and accompanying notes. Management bases its estimates on historical experience and various other assumptions believed to be reasonable. Although these estimates are based on management's best knowledge of current events and actions that affect, or could affect our financial statements materially and involve a significant level of judgment by management. The accounting policies we deem most critical to use include revenue recognition, allowance for doubtful accounts, depreciation, claims accrual, and accounting for income taxes. There have been no significant changes to our critical accounting policies and estimates during the three months ended September 30, 2011, compared to those disclosed in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operation," included in our 2011 Annual Report on Form 10-K.

Seasonality

In the trucking industry, revenue generally decreases as customers reduce shipments during the winter holiday season and as inclement weather impedes operations. At the same time, operating expenses generally increase, with fuel efficiency declining because of engine idling and inclement weather. We have substantial operations in the Midwestern and Eastern United States and Canada. For the reasons stated, in those geographic regions in particular, third quarter net income historically has been lower than net income in each of the other three quarters of the year excluding charges. Our equipment utilization typically improves substantially between May and October of each year because of seasonal increased shipping and better weather. Also, during September and October, business generally increases as a result of increased retail merchandise shipped in anticipation of the holidays.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We experience various market risks, including fluctuations in interest rates, variability in currency exchange rates, and fuel prices. We have established policies, procedures and internal processes governing our management of market risks and the use of financial instruments to manage our exposure to such risks.

Interest Rate Risk. We are exposed to interest rate risk principally from our primary credit facility. The credit facility carries a variable interest rate equal to either Bank of America, N.A.'s prime rate or LIBOR plus an applicable margin between 0.75% and 1.125% that is adjusted quarterly based on the Company's lease adjusted total debt to EBITDAR ratio. At September 30, 2011 the interest rate for revolving borrowings under our credit facility was 0.989%. At

September 30, 2011, we had \$4.7 million variable rate term loan borrowings outstanding under the credit facility. A hypothetical 10% increase in the bank's base rate and LIBOR would be immaterial to our net income.

Currency Exchange Rate Risk. We are subject to variability in foreign currency exchange rates in our international operations. Exposure to this variability is periodically managed primarily through the use of natural hedges, whereby funding obligations and assets are both managed in the local currency. We, from time-to-time, enter into currency exchange agreements to manage our exposure arising from fluctuating exchange rates related to specific and forecasted transactions. We operate this program pursuant to documented corporate risk management policies and do not enter into derivative transactions for speculative purposes.

Table of Contents

Our currency risk consists primarily of foreign currency denominated firm commitments and forecasted foreign currency denominated intercompany and third party transactions. At September 30, 2011, we had outstanding foreign exchange derivative contracts in notional amounts of \$3.5 million with a fair value of these contracts approximately \$0.3 million less than the original contract value. Derivative gains/(losses), initially reported as a component of other comprehensive income, are reclassified to earnings in the period when the forecasted transaction affects earnings.

Assuming revenue and expenses for our Canadian operations identical to that in the first quarter of fiscal 2012 (both in terms of amount and currency mix), we estimate that a \$0.01 decrease in the Canadian dollar exchange rate would reduce our annual net income by approximately \$35,000. Also, we estimate that a \$0.01 decrease in the Mexican peso exchange rate would reduce our annual net income by approximately \$46,000.

Commodity Price Risk. Shortages of fuel, increases in prices, or rationing of petroleum products can have a materially adverse effect on our operations and profitability. Fuel is subject to economic, political, and market factors that are outside of our control. We believe fuel surcharges are effective at mitigating most, but not all, of the risk of high fuel price because we do not recover the full amount of fuel price increases. In fiscal 2012, we entered into contracts to hedge up to 0.3 million gallons per month for 15 months ending on December 31, 2012. This represents approximately 7% of our monthly projected fuel requirements through December 2012. At September 30, 2011, we had outstanding contracts in place for a notional amount of \$8.2 million with a fair value of these contracts approximately \$0.3 million less than the original contract value. Derivative gains/(losses), initially reported as a component of other comprehensive income, are reclassified to earnings in the period when the forecasted transaction affects earnings. Based on our expected fuel consumption for fiscal 2012, a 10% change in the related price of heating oil or diesel per gallon would not have a material financial impact, assuming no further changes to our fuel hedging program or our fuel surcharge recovery.

Item 4. Controls and Procedures

As required by Rules 13a-15 and 15d-15 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the Company has carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q. This evaluation was carried out under the supervision and with the participation of the Company's management, including our principal executive officer and our principal financial officer. Based upon that evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this Quarterly Report on Form 10-Q. There were no changes in the Company's internal control over financial reporting that occurred during the first quarter of fiscal 2012 that have materially affected, or that are reasonably likely to materially affect, the Company's internal control over financial reporting.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. Disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed in Company reports filed under the Exchange Act is accumulated and communicated to management, including the Company's principal executive and principal financial officer as appropriate, to allow timely decisions regarding disclosures.

The Company has confidence in its disclosure controls and procedures. Nevertheless, the Company's management, including the principal executive officer and principal financial officer, does not expect that our disclosure controls and procedures will prevent all errors or intentional fraud. An internal control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of such internal controls are met. Further, the design of an internal control system must reflect the fact that there are resource constraints, and the

benefits of controls must be considered relative to their costs. Because of the inherent limitations in all internal control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

Table of Contents

Part II. Other Information

Item 1. Legal Proceedings

There are various claims, lawsuits, and pending actions against the Company and its subsidiaries which arose in the normal course of the operations of its business. The Company believes many of these proceedings are covered in whole or in part by insurance and that none of these matters will have a material adverse effect on its consolidated financial position or results of operations in any given period.

Item 1A. Risk Factors

While we attempt to identify, manage, and mitigate risks and uncertainties associated with our business, some level of risk and uncertainty will always be present. Our Annual Report on Form 10-K for the year ended June 30, 2011, in the section entitled Item 1A. Risk Factors, describes some of the risks and uncertainties associated with our business. These risks and uncertainties have the potential to materially affect our business, financial condition, results of operations, cash flows, projected results, and future prospects.
