for the same offering. []

If this Form is a post-effective amendment filed pursuant to Rule 462 (d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. []

If delivery of the prospectus is expected to be made pursuant to Rule 434, please check the following box. []

If any of the securities being registered on this form are being offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, check the following box. [X]

CALCULATION OF REGISTRATION FEE

Title of each class of securities to be registered	Amount to be registered	Proposed maximum offering price per share	Proposed maximum aggregate offering
-----	-----	-----	-----
Common stock (par value \$.01 per share)	1,810,123	\$0.51 (1)	\$923,

- (1) Estimated solely for the purpose of calculating the registration fee pursuant to Rule 457(c) promulgated under the Securities Act on the basis of the average of the high and low sale prices of the common stock on June 27, 2001, as reported on the OTC Bulletin Board.
- (2) Pursuant to Rule 429, the registration fee does not include \$296 paid with respect to 1,810,123 shares, that are being carried forward from Registration Statement No. 333-60492.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8 (a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

Edgar Filing: SIMTEK CORP - Form SB-2/A

The information in this preliminary prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This preliminary prospectus is not an offer to sell these securities nor does it seek an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED JULY 2, 2001

PROSPECTUS
1,810,123 Shares

SIMTEK CORPORATION

Common stock

This prospectus is being used to register 1,810,123 shares of Simtek Corporation's common stock being offered by twenty-nine of our shareholders.

Our common stock is traded on the OTC Bulletin Board under the symbol "SRAM." On June 28, 2001, the closing sale price of our common stock was \$0.51 per share.

SEE "RISK FACTORS" BEGINNING ON PAGE 4 TO READ ABOUT FACTORS YOU SHOULD CONSIDER BEFORE BUYING OUR STOCK.

Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

The date of this Prospectus is _____, 2001.

SUMMARY

THIS SUMMARY HIGHLIGHTS SELECTED INFORMATION FROM THIS PROSPECTUS AND DOES NOT CONTAIN ALL OF THE INFORMATION THAT MAY BE IMPORTANT TO YOU. PLEASE CAREFULLY READ THE ENTIRE PROSPECTUS AND THE DOCUMENTS INCORPORATED BY REFERENCE.

INFORMATION ABOUT US AND OUR BUSINESS

We develop, market and subcontract the production of nonvolatile semiconductor memories and programmed semiconductor logic products. Nonvolatility prevents loss of programs and data when electrical power is removed. Our memory products feature fast data access and programming speeds. Our logic products route electronic signals to perform tasks in specific electronic systems. All of our products are targeted for use in commercial electronic equipment markets. These markets are industrial control systems, office automation, medical instrumentation, telecommunication systems, cable television, and numerous military systems, including communications, radar, sonar and smart weapons.

Our principal executive office is located at 4250 Buckingham Dr. #100; Colorado Springs, Colorado 80907. Our telephone number is 719-531-9444.

THE SHARES

We are registering 1,810,123 shares of our common stock being offered for sale by twenty-nine of our shareholders.

We will not receive any of the proceeds of the shares being sold by our shareholders.

RISK FACTORS

You should consider carefully the following risk factors, as well as the other information in this prospectus before buying our shares. The semiconductor industry is changing rapidly. Therefore, the forward-looking statements and statements of expectations, plans and intent in this prospectus are subject to a greater degree of risk than similar statements regarding some other industries.

OUR LIMITED OPERATING CAPITAL AND OUR ABILITY TO RAISE ADDITIONAL MONEY MAY HARM OUR ABILITY TO DEVELOP AND MARKET OUR PRODUCTS

To date, we have required significant capital for product development, subcontracted production and marketing. From the time we started business through March 31, 2001, we have raised approximately \$32.1 million of gross proceeds from the sale of our convertible debt and equity securities. During the same period, we earned approximately \$10.1 million of gross revenue from the sale of product and technology licenses, approximately \$55.0 million from net product sales and approximately \$600,000 in royalty income.

We believe that if we are able to increase our product sales substantially and with positive gross margins, our cash requirements for the development,

Edgar Filing: SIMTEK CORP - Form SB-2/A

subcontracted production and marketing of our existing product families will be satisfied. We are not sure, however, whether this increase in product sales and positive gross margins will occur. We may need more capital in the next year and after that to develop new products. We are not sure that we will be able to raise more capital on reasonable terms, if at all. If we cannot, then we may not be able to develop and market new products. The development, subcontracted production and marketing of our existing products may also suffer.

WE MAY EXPERIENCE OPERATING LOSSES IN THE NEXT SEVERAL YEARS

We began business in 1987. Through March 31, 2001, we had accumulated losses of approximately \$33.0 million. We realized net income for the first time for the year ended December 31, 1997 and continued to realize net income through June 30, 2000. However, through March 31, 2001, we realized a net loss primarily as a result of accounting charges from the purchase of incomplete research and development in September 2000. We may continue to experience net operating losses for the foreseeable future. Continuing net operating losses could materially harm our results of operations and increase our need for additional capital in the future. See "Management's Discussion and Analysis of Financial Condition and Results of Operations."

BECAUSE OUR INCOME IS DEPENDENT ON NUMEROUS FACTORS BEYOND OUR CONTROL, OUR INCOME MAY SUFFER IN THE FUTURE

Our ability to realize income depends on many factors, some of which we cannot control. These factors include market acceptance of our products and the prices that we are able to charge, our ability to reduce our costs on products sold to the commercial and military markets and our subcontractors' ability to manufacture our products to our specifications and costs effectively. These factors may harm our income in the future.

BECAUSE OUR COMMON STOCK IS LISTED ONLY ON THE OTC ELECTRONIC BULLETIN BOARD IT WILL BE MORE DIFFICULT TO SELL OUR COMMON STOCK

Our common stock is listed on the OTC Electronic Bulletin Board under the symbol "SRAM." Our common stock was listed on the NASDAQ Small-Cap Market until July 18, 1995 but because we no longer met NASDAQ's listing requirements, we transferred to the OTC Electronic Bulletin Board as mandated by NASDAQ rules. We may not be able to meet the requirements for relisting our common stock on NASDAQ in the near future or in the longer term.

Securities that are not listed on the NASDAQ Small-Cap Market are subject to a Securities and Exchange Commission rule that imposes special requirements on broker-dealers who sell those securities to persons other than their established customers and accredited investors. The broker-dealer must determine

that the security is suitable for the purchaser and must obtain the purchaser's written consent prior to the sale. These requirements may make it difficult for broker-dealers to sell our securities. This may also make it more difficult for our security holders to sell their securities and may affect our ability to raise more capital.

Edgar Filing: SIMTEK CORP - Form SB-2/A

IF OUR BOARD OF DIRECTORS AUTHORIZES THE ISSUANCE OF PREFERRED STOCK, HOLDERS OF OUR COMMON STOCK COULD BE DILUTED AND HARMED

Our board of directors has the authority to issue up to 2,000,000 shares of preferred stock in one or more series and to establish the preferred stock's voting powers, preferences and other rights and qualifications without any further vote or action by the shareholders. The issuance of preferred stock by our board of directors could dilute and harm the rights of the holders of our common stock. It could potentially be used to discourage attempts by others to obtain control of us through merger, tender offer, proxy contest or otherwise by making such attempts more difficult to achieve or more costly. Our board of directors has no specific intention to issue shares of preferred stock, but given our present capital requirements, it is possible that we may need to raise capital through the sale of preferred stock in the future.

SINCE WE DEPEND GREATLY ON SUBCONTRACTORS, THEIR POOR PERFORMANCE COULD HURT OUR OPERATIONS

We subcontract the silicon wafer processing, product assembly, and product testing portions of our business to independent companies. Our operating results depend on these subcontractors' ability to supply us with silicon wafers that meet our specifications and to assemble and test enough of our products to meet our customers' needs.

In September 1995, we entered into an agreement with Zentrum Mikroelektronik Dresden GmbH, or "ZMD," a German company that allowed us to purchase nonvolatile semiconductor memories, produced on a 0.8 micron technology process, which is manufactured with spacing between design elements of approximately eight-tenths of one millionth of one meter, from ZMD's foundry. We purchased these units from ZMD's foundry through the first half of 1998 and then transferred all of our manufacturing to products built from the wafers purchased from Chartered Semiconductor Manufacturing Plc. of Singapore, or "Chartered."

Currently, we depend on Chartered to manufacture all of our silicon wafers that support our memory products produced on a 0.8 micron technology process. Sales of our logic products are supported with silicon wafers purchased from United Memories Corp. of Taiwan, or "United Memories," manufactured on a 0.5 micron technology process, which is manufactured with spacing between design elements of approximately five-tenths of one millionth of one meter, and Chartered on a 0.35 micron technology process, which is manufactured with spacing between design elements of approximately thirty five hundredths of one millionth of one meter. These wafers are the raw materials required to manufacture our semiconductor products. Without these wafers, we would be unable to sell our products. If Chartered or United Memories is unable to meet our silicon wafer needs on time and at a price that we find acceptable, we would have to find other wafer manufacturers. If we cannot find other suppliers, manufacturers or assemblers on acceptable terms, we may not be profitable. In addition, our subcontractors must be audited and recertified by us on a regular basis for us to continue to produce military-qualified products. We cannot assure you that we will be able to complete this recertification successfully or in a timely manner.

WE DO NOT HAVE A CURRENT MANUFACTURING AGREEMENT WITH CHARTERED WHICH MAY LIMIT OUR ABILITY TO PURCHASE RAW MATERIALS

Our current manufacturing agreement with Chartered has expired. Under our old agreement, we had the right to purchase up to 600 six-inch silicon wafers per month from Chartered's facility in Singapore. If we are unable to renew our agreement with Chartered or the limit on wafers that we can purchase is not increased, we may be limited in the number of semiconductors that we can sell.

Edgar Filing: SIMTEK CORP - Form SB-2/A

All of our product sales for the year ended December 31, 2000 were based on wafers purchased from Chartered and United Memories.

5

THE COMPLEXITY INVOLVED IN MANUFACTURING SEMICONDUCTORS MAY REDUCE THE QUANTITY OF PRODUCTS THAT OUR SUBCONTRACTORS CAN PRODUCE AND HARM OUR REVENUES

Through subcontractors, we manufacture nonvolatile semiconductor memories and programmed semiconductor logic products. We purchase the silicon wafers that form the basis of our products from manufacturers such as Chartered. Semiconductor manufacturing is very complex and our success in manufacturing semiconductors depends on many factors that are difficult or impossible to control. For example, successful manufacturing is affected by the level of contaminants in the manufacturing environment, impurities in the materials used and the performance of our equipment. These complex factors could reduce the number of semiconductors that our subcontractors are able to make in a production run. If our subcontractors produce fewer of our products, our revenues may decline.

THE UNCERTAINTY INVOLVED IN MANUFACTURING SEMICONDUCTORS MAY INCREASE THE COSTS OF MANUFACTURING OUR PRODUCTS AND REDUCE OUR PROFITS

In order for us to be profitable, we must keep our manufacturing costs down. Semiconductor manufacturing depends on many factors beyond our control. See "The Complexity Involved in Manufacturing Semiconductors May Reduce the Quantity of Products That Our Subcontractors Can Produce And Harm Our Revenues." These factors could increase the cost of manufacturing our products and decrease our profits.

DELAYS IN MANUFACTURING MAY NEGATIVELY IMPACT REVENUE AND NET INCOME

It takes approximately three months for us to manufacture our semiconductors. Any delays in receiving silicon wafers will delay our ability to deliver our products to customers. This would delay sales revenue and could cause our customers to cancel existing orders or not place future orders. In addition, if we are not able to make all of our planned semiconductors in a production run this could delay delivery of our products. If our semiconductors have technical problems, we could be required to write off inventory or grant warranty replacements. These delays or technical problems could occur at any time and would affect our net income.

WE DEPEND ON INDEPENDENT SALES REPRESENTATIVES AND DISTRIBUTORS TO SELL OUR PRODUCTS AND THE TERMINATION OF ANY OF THESE RELATIONSHIPS MAY HARM OUR REVENUE

We use independent sales representatives and distributors to sell the majority of our products. The agreements with these sales representatives and distributors can be terminated without cause by either party with only 30 to 90 days written notice. If one or more of our sales representatives or distributors terminates our relationship, we may not be able to find replacement sales representatives and distributors on acceptable terms or at all. This would affect our profitability. In addition, during 2000, approximately 47% of our product sales were to two distributors and one direct customer. We are not sure that we will be able to maintain our relationship with these distributors.

OUR SOURCES OF REVENUE ARE LIMITED BECAUSE WE DO NOT EXPECT TO REALIZE ANY NEW

Edgar Filing: SIMTEK CORP - Form SB-2/A

LICENSE REVENUES

We received approximately \$10,100,000 in license revenues prior to 1996 under license agreements. We have not sold any new licenses, or received any license revenues, since 1996. We are not sure whether we will be able to sell any more product or technology licenses in the future and we do not anticipate any future revenue from license agreements.

DELAYS IN OR FAILURE OF PRODUCT QUALIFICATION MAY HARM OUR BUSINESS

Prior to selling a product, we must establish that it meets expected performance and reliability standards. As part of this testing process, known as product qualification, representative samples of products are subjected to a variety of tests to ensure that performance in accordance with commercial, industrial and military specifications. Delays or failure by us to accomplish product qualification for our future products will have an adverse effect on us. Even with successful initial product qualifications, we cannot be assured that we will be able to maintain product qualification or achieve sufficient sales to meet our operating requirements.

6

SINCE THE SEMICONDUCTOR INDUSTRY IS FAST CHANGING, OUR SUCCESS DEPENDS ON OUR ABILITY TO INTRODUCE NEW PRODUCTS

Our success in the semiconductor industry depends in part upon our ability to expand our existing product families and to develop and market new products. See "The Semiconductor Industry Changes Very Rapidly and Our Business Would be Harmed if We Cannot Keep Up with These Changes." The development of new semiconductor designs and technologies typically requires substantial costs for research and development. Even if we are able to develop new products, the success of each new product depends on several factors including whether we selected the proper product and our ability to introduce it at the right time, whether the product is able to achieve acceptable production yields and whether the market accepts the new product. We have not determined whether we will be successful in developing new products or whether any products that we do develop will satisfy the above factors.

OUR RECENT PURCHASE OF INCOMPLETE RESEARCH AND DEVELOPMENT MAY RESULT IN SIGNIFICANT EXPENDITURES

In an effort to expand our products, we recently acquired incomplete research and development products from WebGear, Inc., or "WebGear," a California corporation. We believe that the incomplete research and development we acquired should enable us to enter the wireless data communication market being developed under the "Bluetooth" trademark. "Bluetooth" is a new industry standard for wireless data communication developed by a consortium of electronic industry partners. See "Management's Discussion and Analysis of Financial Condition and Results of Operations-Results of Operations." If this technology is successful in establishing wide spread use it may create sales opportunities for component suppliers. We expect to spend approximately \$750,000 to bring products to this wireless market. However, we cannot assure you that we will be able, or have sufficient operating capital, to enter this market. See "Our Limited Operating Capital and Our Ability to Raise Money May Harm Our Ability to Develop and Market Our Products."

Edgar Filing: SIMTEK CORP - Form SB-2/A

THE SEMICONDUCTOR INDUSTRY CHANGES VERY RAPIDLY AND OUR BUSINESS WOULD BE HARMED IF WE CANNOT KEEP UP WITH THESE CHANGES

The semiconductor industry is characterized by rapid changes in technology and product obsolescence, volatile market patterns, price erosion, product oversupply, occasional shortages of materials, variations in manufacturing efficiencies and significant costs associated with capital equipment and product development. We are unable to determine whether the technology we currently use will be made obsolete by other competing memory technologies. Any one or more of these factors could have a material effect on our financial results.

THE INTENSE COMPETITION IN THE SEMICONDUCTOR INDUSTRY MAY CAUSE US TO LOSE SALES REVENUE TO OTHER SUPPLIERS

There is intense competition in the semiconductor industry. We experience competition from a number of domestic and foreign companies, most of which have significantly greater financial, technical, manufacturing and marketing resources than we have. Our competitors include major corporations with worldwide silicon wafer fabrication facilities and circuit production facilities and diverse, established product lines. We also compete with emerging companies attempting to obtain a share of the market for our product families. If any of our new products achieve market acceptance, other companies may sell competitive products at prices below ours. This would have an adverse effect on our operating results. We have sold product and technology licenses to Plessey Semiconductor, or "Plessey," Nippon Steel Corp., or "Nippon," and ZMD. Plessey, Nippon and ZMD have unlimited rights to much of our technology through their license agreements with us and have fulfilled all license and royalty payment requirements under these licenses. At this time Plessey and Nippon have not begun producing our products; however, they may choose to do so in the future. ZMD has entered the market, however, and may become one of our significant competitors.

GIVEN THE SCARCITY OF TRAINED PERSONNEL IN THE SEMICONDUCTOR INDUSTRY, THE LOSS OF KEY EMPLOYEES COULD MATERIALLY AFFECT OUR FINANCIAL RESULTS

Our success depends in large part on our ability to attract and retain qualified technical and management personnel. There are limited personnel trained in the semiconductor industry resulting in intense competition for these

7

personnel. If we lose any of our key personnel, this could have a material adverse affect on our ability to conduct our business and on our financial results.

OUR PATENTS MAY NOT PROVIDE US EFFECTIVE INTELLECTUAL PROPERTY PROTECTION; THIS COULD HARM OUR BUSINESS

We have been issued twenty-five U.S. patents relating to specific aspects of our current products and we have four applications pending. We have also applied outside the U.S. for patents on our technology. We plan to continue to protect our intellectual property. We are not sure that any of the patents for which we have applied will issue or, if issued, will provide us with meaningful protection from competition. We may also not have the money required to maintain or enforce our patent rights. Notwithstanding our patents, other companies may obtain patents similar or relating to our patents. We have not determined whether our products are free from patent infringement.

Edgar Filing: SIMTEK CORP - Form SB-2/A

IF OUR PRODUCTS AND TECHNOLOGY INFRINGE ON THIRD PARTY PATENTS, OUR PRODUCT SALES MAY SUFFER

If patent infringement claims are asserted against us and are upheld, we will try to modify our products so they are non-infringing. If we are unable to do so, we will have to obtain a license to sell those products or stop selling the products for which the claims are asserted. We may not be able to obtain the required licenses. Any successful infringement claim against us, our failure to obtain any required license or requirement for us to stop selling any of our products, may force us to discontinue production and shipment of these products. This may result in reduced product sales and harm our revenues.

We were notified of possible patent infringement by one company in December of 1989. After reviewing the related patents we responded in the same month with a position that our products were still under development, but that the analysis revealed no infringement. There was no further response from this company. In January of 1991 a second company sent us a package of nonvolatile memory and other memory patents for review to evaluate for any possible infringement and to seek licenses as appropriate. Our internal evaluation determined that there were no obvious infringements requiring the pursuit of licenses from this company. In both cases we believe that there are no definitive claims for infringement against our products, so no further actions have been taken, although there has not been direct recognition of this position by the other parties. However, we cannot assure you that these companies will not assert patent infringement claims against us in the future.

In 1998, we received notice of a claim for an unspecified amount from a foundation that owns approximately 180 patents and 70 pending applications. The foundation claimed that some of the machines and processes used in the building of our semiconductor devices infringe on the foundation's patents. In April 1999, we reached an agreement with the foundation for us to purchase a nonexclusive license of the foundation's patents, based on our product offerings and sales forecast at that time. If our products or actual sales revenue vary significantly from the time of the agreement, we may be subject to additional payments.

BECAUSE WE DO NOT INTEND TO PAY DIVIDENDS IN THE FORESEEABLE FUTURE, YOUR INVESTMENT RETURN MAY BE LIMITED

We have never paid cash dividends on our common stock. We do not expect to pay dividends in the foreseeable future. We intend to use any earnings to finance growth. You should not expect to receive dividends on your shares of common stock.

OUR FAILURE TO HOLD ANNUAL SHAREHOLDERS' MEETINGS TO RE-ELECT OFFICERS LIMITS OUR SHAREHOLDERS' CONTROL OVER MANAGEMENT

Since 1991, we have held only three annual shareholders' meetings. The lack of additional meetings is primarily due to the costs associated with having the meetings. At this time, we are unsure of when our next meeting will be. The infrequent annual shareholders' meetings limits the ability of shareholders to elect new members to the board of directors and to change our management.

Edgar Filing: SIMTEK CORP - Form SB-2/A

FOREIGN CURRENCY EXCHANGE RATE FLUCTUATIONS MAY INCREASE OUR COSTS, LOWER OUR REVENUES AND CAUSE LOSS OF CUSTOMERS TO OUR COMPETITORS

We purchase materials, including silicon wafers, from abroad. In 2000, over 57% of our sales were to customers located outside of the United States. We operate using U.S. dollars as the functional currency. Changes in foreign currency exchange rates can reduce our revenues and increase our costs. For example, Chartered may increase the prices it charges us, on a per purchase order basis, for silicon wafers if the U.S. dollar weakens. Any large exchange rate fluctuation could affect our ability to compete with manufacturers who operate using foreign currencies. We do not try to reduce our exposure to these exchange rate risks by using hedging transactions. Although we have not had any material losses due to exchange rate fluctuations over the last three years, we cannot assure you that we will not incur significant losses in the future.

9

USE OF PROCEEDS

We will receive no proceeds from the sale of shares by our shareholders.

CAPITALIZATION

The following table shows our capitalization at June 21, 2001.

Treasury stock, 10,000 shares
Preferred stock, \$1.00 par value, 2,000,000 shares authorized, none issued and outstanding
Common stock, \$0.01 par value, 80,000,000 shares authorized, 53,684,245 issued and outstanding
Additional paid in capital
Accumulated deficit as of March 31, 2001
Shareholders' equity

10

MARKET FOR OUR COMMON STOCK AND RELATED SECURITY HOLDER MATTERS

Our common stock is listed on the OTC Electronic Bulletin Board under the

Edgar Filing: SIMTEK CORP - Form SB-2/A

symbol SRAM. Securities not included in the NASDAQ Small-CAP Market are covered by the Commission rule that imposes additional sales practice requirements on broker-dealers who sell such securities to persons other than established customers and accredited investors (generally institutions with assets in excess of \$5,000,000 or individuals with net worth in excess of \$1,000,000 or annual income exceeding \$200,000 or \$300,000 jointly with their spouse). For transactions covered by the rule, the broker-dealer must make a special suitability determination for the purchaser and receive the purchaser's written agreement to the transaction prior to the sale. Consequently, the rule may affect the ability of broker-dealers to sell our securities, which will have an adverse effect on the ability of our security holders to sell their securities and the possibility of our ability to raise additional capital.

Shown below is the closing high bid and the closing low offer as reported by the OTC Electronic Bulletin Board on the last day of the quarter.

	Common Stock	
	High Bid	Low Bid
1998		
First Quarter.....	.4062	.3594
Second Quarter.....	.3594	.3125
Third Quarter.....	.2344	.2188
Fourth Quarter.....	.1562	.1406
1999		
First Quarter.....	.1875	.1875
Second Quarter.....	.2188	.2031
Third Quarter.....	.1562	.1562
Fourth Quarter.....	.2812	.2656
2000		
First Quarter.....	2.875	2.25
Second Quarter.....	1.5313	1.375
Third Quarter.....	.9688	.8438
Fourth Quarter.....	.3594	.2969
2001		
First Quarter.....	.7344	.6562
Second Quarter (through June 28, 2001).....	.52	.49

The quotations listed above reflect inter-dealer prices, without retail mark-up, mark-down or commission and may not represent actual transactions.

As of December 31, 2000, there were 379 shareholders of record, not including shareholders who beneficially own common stock held in nominee or "street name."

We have not paid any dividends on our common stock since inception and we do not intend to pay any in the foreseeable future.

Edgar Filing: SIMTEK CORP - Form SB-2/A

The statements of operations for the years ended December 31, 2000 and 1999 and the balance sheet data as of December 31, 2000 have been derived from the financial statements that have been audited by Hein + Associates, LLP, or "Hein," independent auditors. The balance sheet as of March 31, 2001 and the statements of operations for the three months ended March 31, 2001 and 2000 are unaudited. In our opinion, these financial statements include all adjustments necessary for the fair presentation of the financial position as of March 31, 2001 and statements of operations for the three months ended March 31, 2001 and 2000. The balance sheet as of March 31, 2001 and the statements of operations for the three months ended March 31, 2001 and 2000 were prepared on a consistent basis with our year end financial information. The balance sheet as of December 31, 2000 has been audited by Hein + Associates, LLP. This financial data should be read in conjunction with our financial statements and the notes thereto included elsewhere in this prospectus and "Management's Discussion and Analysis of Results of Operations and Financial Condition."

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW OF ACQUISITIONS AND OTHER TRANSACTIONS

During 2000 and the first quarter of 2001, we made several acquisitions of high technology companies, some of which we have accounted for as a pooling of interests.

On May 9, 2000, we acquired Integrated Logic Systems, Inc., or "Integrated Logic." We issued 3,000,000 shares of our common stock in exchange for all outstanding shares of all classes of Integrated Logic stock. Integrated Logic designs and sells programmed semiconductor logic products. We purchased approximately \$30,000 of product from Integrated Logic in the year preceding the acquisition. The acquisition was accounted for as a pooling of interest, and the results of Integrated Logic have been consolidated with ours, as if we have been merged throughout the periods presented.

On June 16, 2000, we acquired 1,875,000 shares of the common stock of WebGear in return for 1,250,000 shares of our common stock. On September 29, 2000, we purchased incomplete research and development, patents and trademarks from WebGear. The original contract price for the incomplete research and development totaled 1,875,000 shares of WebGear stock plus 3,400,000 shares of our common stock of which 500,000 were held in escrow based on WebGear fulfilling all obligations under the contract. In December 2000, WebGear defaulted on the one condition of the contract, thus forcing them to relinquish the 500,000 escrow shares of our common stock which reduced the shares issued to 2,900,000 of our common stock.

On July 31, 2000, we acquired Macrotech Semiconductor, or "Macrotech." We issued 1,250,000 shares of our common stock in exchange for all outstanding shares of all classes of Macrotech stock. Macrotech designs and sells programmed semiconductor logic products, which are an extension of the programmed semiconductor logic products that Integrated Logic manufactures. The acquisition was accounted for as a pooling of interest, and the results of Macrotech have been consolidated with ours, as if we have been merged throughout the periods presented.

On September 14, 2000, we entered into a one-year contract with two investment bankers, E.B.M. Associates, Inc., or "E.B.M.," and World Trade Partners, or "WTP." Each company has received 500,000 shares of our common stock. Both companies will assist us in broadening our financial market presence and establishing new relationships within the industry, investment community and financial media, by arranging meetings for our management with industry analysts, presenting company profiles to analysts and brokerage firms, mailings and constant personal communication with investors. E.B.M. supports these activities primarily in retail investment markets, while WTP supports these activities primarily in institutional markets. E.B.M. and WTP cooperate to

Edgar Filing: SIMTEK CORP - Form SB-2/A

coordinate their activities. On September 14, 2000, the closing share price for our common stock was \$ 1.0312 per share and accordingly \$1,031,000 has been assigned to prepaid investor relations. The cost associated with this transaction is being amortized over the life of the contract. Approximately \$301,000 was expensed in 2000. The balance will be expensed over the term of the contract, ending in the third quarter of 2001.

On September 29, 2000, we purchased incomplete research and development, patents and trademarks from WebGear. The incomplete research and development consists of hardware and software developed for wireless data communications, that needs to be modified for use with the Bluetooth technology standard. See "Risk Factors-Our Recent Purchase of Incomplete Research and Development May Result in Significant Expenditures." We originally issued 3,400,000 shares of our common stock which was amended in December 2000 to 2,900,000. We also returned to WebGear the 1,875,000 shares of WebGear common stock that we acquired from WebGear on June 16, 2000. On September 29, 2000, the closing price of our common stock was \$0.8438 per share. We have valued the purchased patents and trademarks at \$125,000, which was capitalized and recorded as intangible assets. We have valued the incomplete research and development acquired from WebGear at \$3,962,646, which was expensed immediately.

On December 6, 2000, we signed a letter of intent to acquire Q-DOT Group, Inc., or "Q-DOT." The merger was completed on March 13, 2001. We acquired Q-DOT in exchange for approximately 5,172,000 shares of our common stock, valued at \$4,000,000 based on a twenty day average share closing price of approximately \$0.77. Q- DOT specializes in advanced technology research and development for

13

data acquisition, signal processing, imaging and data communications. The company's projects have been supported by "conventional" government and commercial contracts in addition to government contacts sponsored by the Small Business Innovation Research program. Independent government agencies, such as the Department of the Army, Department of the Navy and Department of the Air Force may award contracts directly, or "conventionally," or may award contracts through the Small Business Innovation Research program. The Small Business Innovation Research program is a Department of Defense program that funds early-stage research projects at small technology companies. Q-DOT operates as a wholly owned subsidiary of us for its government contract research and development operations. The acquisition was accounted for as a pooling of interest, and the results of Q-DOT are consolidated with ours in our financials as if we have been merged throughout the periods.

We believe that earnings will increase due to increased shipment volumes of our semiconductor products which we believe will result in lower costs based on volume purchasing of raw materials and subcontract services.

RESULTS OF OPERATIONS

GENERAL. We have designed and developed nonvolatile semiconductor products since we commenced business operations in May 1987. We have concentrated on the design and development of our nonvolatile semiconductor memory product families and technologies, marketing, distribution channels, and sources of supply, including production at subcontractors. With the acquisition of Integrated Logic and Macrotech, we have added the capability to design, develop and produce gate array integrated circuits, or our logic products.

Edgar Filing: SIMTEK CORP - Form SB-2/A

Our business was founded on a specialized technology that supported development of nonvolatile semiconductor memories. We developed our current memory products out of this technology. This single product family does not allow growth into a broad range of applications. Therefore, in an effort to expand our products, we acquired from WebGear incomplete research and development of technology that we intend to apply within the emerging Bluetooth market segment. "Bluetooth" is an industry standard, short range wireless communications technology designed to allow a variety of electronic devices, such as wireless telephones, Personal Digital Assistants, notebook computers, desktop computers, peripheral input-output devices, television set-top boxes and Internet appliances to exchange data without the use of physical cabling. See "Risk Factors-Our Recent Purchase of Incomplete Research and Development May Result in Significant Expenditures."

We anticipate that our acquisition of Q-DOT will enable us to enter the high speed data communications market, addressing both wired and wireless applications, based on advanced "Silicon Germanium" process technology. Silicon Germanium is rapidly becoming the technology of choice for many analog, mixed signal and high speed digital circuits.

In September 1991, we began the sale of our commercially qualified 64 kilobit nonvolatile semiconductor memory products based on a 1.2 micron process technology, which is manufactured with spacing between design elements of approximately one and two tenths of one millionth of one meter. After initial qualification of our first product in 1991, we began expanding the 64 kilobit nonvolatile semiconductor memory product family. By the end of 1993, we had qualified the complete product family for commercial, industrial and military markets and had commenced sales of these products. When we say we "qualify" a product, we mean that our internal quality organization confirms the product's performance to the product's data sheet and accepted industry standards. Commercial products operate from 0 degrees to 70 degrees Fahrenheit, industrial products from -40 degrees to 85 degrees Fahrenheit and military products from -55 degrees to 125 degrees Fahrenheit. Specific customers require different temperatures for their applications. During 1995, we developed our 64 kilobit nonvolatile semiconductor memory products based on a 0.8 micron process technology. Qualification of this product occurred in 1996. In late 1996 and into 1997, we, along with assistance from ZMD, completed the design, installation and qualification of our 256 kilobit nonvolatile semiconductor memory product based on 0.8 micron process technology into ZMD's silicon wafer fabrication facility. In 1997, we installed the 256 kilobit nonvolatile semiconductor memory product built on 0.8 micron process technology in Chartered's silicon wafer fabrication facility. Qualification of this product for use in the commercial and industrial market occurred in 1997 and qualification for use in the military market occurred in the second quarter of 1998. In the fourth quarter 1997, we qualified the 64 kilobit nonvolatile semiconductor memory product built on 0.8 micron process technology for sale in the commercial and industrial market. Our programmed semiconductor logic products are supported with silicon wafers, built on 0.5 micron process

14

technology, purchased from United Memories and silicon wafers purchased from Chartered built on a 0.35 micron process technology. Sales of products built on wafers purchased from Chartered and United Memories accounted for all of our semiconductor product sales revenue for 2000.

THREE MONTHS MARCH 31, 2001 AND 2000. During the first quarter of 2001, we

Edgar Filing: SIMTEK CORP - Form SB-2/A

purchased our silicon wafers from Chartered to support the sales of our nonvolatile semiconductor memory products. Sales of our programmed semiconductor logic products were supported by silicon wafers purchased from United Memories.

We had net sales of \$4,331,721 for the first quarter of 2001 up from the \$3,826,027 recorded for the first quarter 2000. The products sales from our 4 kilobit, 16 kilobit, 64 kilobit and 256 kilobit nonvolatile semiconductor memory products were \$3,975,104 for the first quarter of 2001 and \$2,902,305 for the first quarter of 2000. The increase in sales was due primarily to an increase in large customers placing production orders of our products worldwide. Sales of our high end industrial and military products decreased in the three months ended March 31, 2001 as compared to the three months ended March 31, 2000. This decrease was due to a continued decrease in defense contracts. Two distributors of our nonvolatile semiconductor memory products account for approximately 44% of our net product sales for the first quarter 2001. Products sold to distributors are re-sold to various end customers. The revenue generated from research and development contracts acquired in the Q-DOT merger was \$356,617 for the first quarter of 2001 down from the \$923,632 recorded for the first quarter of 2000. This decrease was primarily due to reduced billing rates against government contracts due to employee attrition.

We saw an approximately 15% decrease in our gross margin percentages for the first quarter of 2001 as compared to the first quarter of 2000. This decrease was due primarily to an increase in the cost of the silicon wafers required to produce our products. In March 2001, we were able to negotiate better pricing from this supplier, our assembly and test manufacturers and we reduced some of our internal costs. We believe that these cost reduction measures should have an impact on the gross margins beginning in the third quarter of 2001.

Total operating expenses saw an increase of approximately \$670,000 in the three months ended March 31, 2001 as compared to the three months ended March 31, 2000. Administration saw the largest increase of approximately \$491,000. Of the approximate \$491,000 increase, approximately \$258,000 was related to the amortization of the shares of stock issued in September 2000, to two investment bank firms in return for services to us. Approximately \$172,000, \$16,000 and \$25,000 were related in increases in legal fees, audit costs and labor related to the merger with Q-DOT, respectively. The remaining \$20,000 was related to an increase in payroll costs. Marketing saw the next largest increase of approximately \$142,000, primarily due to approximately \$86,000 paid in sales commission to independent sales representatives as a direct result of our increased revenue. The balance of approximately \$56,000 was related to the increase in payroll and benefits costs, due to the addition on a new employee. Research and development saw an approximate increase of \$37,000 which was related to increased payroll and benefit costs, due to the addition of a new employee.

We recorded a net loss of \$514,564 in the first quarter of 2001 as compared to a net income of \$538,147 for the first quarter of 2000. This decrease was due primarily to the decrease in gross margins and the increase in administration costs.

REVIEW OF 2000 OPERATIONS. Total sales for 2000 were \$14,467,814. \$12,150,750 was directly related to the sale of our semiconductor memories and \$2,317,064 was related to revenue generated from our research and development contracts. Our product sales could have been greater if not for a shortage in the second half of 2000 of the wafers required to produce our nonvolatile semiconductor memory products. During 2000, total market demand exceeded Chartered's ability to supply silicon wafers to many of its customers. This condition persisted through 2000 limiting our raw materials supplies, but has improved in 2001 as total market demand has decreased. We believe that the lack of a long term contract with Chartered may have impacted our ability to receive

Edgar Filing: SIMTEK CORP - Form SB-2/A

silicon wafers because a long term contract could have obligated Chartered to provide us with silicon wafers. We did see an increase in volume production orders in 2000, which caused an increase in unit shipments and a slightly overall lower average selling price as compared to 1999. Sales of our 4 kilobit and 16 kilobit products decreased in 2000 by approximately 9% over 1999. This decrease was due to customers using higher density parts in their applications. Sales, based on dollar revenues, of our 64 kilobit and 256 kilobit commercial products saw an increase in 2000 by approximately 63% and 145%, respectively. These increases were due to larger production volume orders, or orders of high

15

volume manufacturing of systems, targeted at competitive growth markets being placed in 2000 as compared to 1999. Sales of our 64 kilobit high-end industrial and military market saw a slight increase of 3% in 2000, while our 256 kilobit high-end industrial and military market saw a decrease in 2000 of approximately 65% as compared to 1999. This decrease was due to a decrease in defense contracts in 2000 resulting from federal policies which reduced production of defense systems using our products. We believe that future defense spending will increase to historic levels as a result of policy changes within the new administration, but it remains unclear when this will occur. Sales of our logic products saw an increase of approximately 79% in 2000 as compared to 1999. This increase was due primarily to increased product demand generated by our increased sales activities. The revenue generated from research and development contracts acquired in the Q-DOT merger decreased approximately 35%. This decrease was primarily due to reduced billing rates against government contracts which was a direct result of employee attrition.

With the return of production volume orders being placed for our nonvolatile semiconductor commercial memory products and an increase in competition, we saw a decrease in our overall average selling prices as compared to 1999. These orders reflect high volume manufacturing of systems targeted at competitive growth markets. However, with this decrease, we saw an increase in unit shipments for 2000 as compared to 1999 of approximately 6%, 56%, 178% and 76% for our 16 kilobit, 64 kilobit, 256 kilobit, and logic commercial products, respectively. Our 256 kilobit high-end industrial and military products saw a decrease of approximately 55% in unit shipments.

Due to the decrease in high-end industrial and military sales, we had an approximate 3% decrease in our gross margins for 2000 as compared to 1999.

YEARS ENDED DECEMBER 31, 2000 AND 1999. Our net sales for 2000 totaled \$14,467,814 compared to \$11,168,624 in 1999. \$12,150,750 was directly related to the sale of our semiconductor memories and \$2,317,064 was related to revenue generated from our research and development contracts. The increase in net product sales for the year ended December 31, 2000 was due primarily to increased volume production orders in the Far East and North America. During 2000, sales of our 64 kilobit and 256 kilobit nonvolatile semiconductor memory military products accounted for approximately 12% of our sales, while 64 kilobit and 256 kilobit commercial and industrial nonvolatile semiconductor memory products accounted for approximately 34% and 25% of sales in 2000 and 1999, respectively. Sales of our programmed semiconductor logic products account for approximately 9% of our sales. Revenue from research and development contracts accounted for approximately 15% of our sales. Sales of our 4 kilobit and 16 kilobit nonvolatile semiconductor memory products accounted for the balance of the sales in 2000. Two distributors and one direct customer of our nonvolatile semiconductor memory products accounted for approximately 42% of our net product

Edgar Filing: SIMTEK CORP - Form SB-2/A

sales for the year ended December 31, 2000. Products sold to distributors are resold to a larger number of system manufacturers.

The increase in net loss in 2000 is primarily the result of expensing approximately \$3,963,000 of purchased incomplete research and development from WebGear. We realized a positive gross margin of \$6,044,285 in 2000 compared to \$4,995,981 in 1999 for percentages of 42% and 45%, respectively.

Operating expenses were approximately \$4,500,000 more for the year ended December 31, 2000 than for the year ended December 31, 1999. The largest part of this increase, was related to research and development which had an approximate \$3,900,000 increase. Of the approximate \$3,900,000 increase, approximately \$3,963,000 was due to the issuance of stock to WebGear for the purchase of their Bluetooth technology, an approximate \$100,000 decrease in indirect costs related to our research and development contracts which was related to a decrease headcount, an approximate \$100,000 increase in headcount additions, an approximate \$18,000 increase in depreciation and an approximate decrease of \$55,000, \$14,000 and \$12,000 related to product development, legal fees and repairs and maintenance, respectively. The increase in headcount was due to the addition of engineers required to develop the programmed semiconductor logic products, the decrease in product development was due to a reduction in development costs assigned to processing silicon wafers for development of a higher density of our nonvolatile semiconductor memory products. The next largest increase of approximately \$360,000 was in general and administration. Of the approximate \$360,000 increase, approximately \$301,000 was related to the amortization of the issuance of 1,000,000 shares of stock to two investment banker firms in September 2000 for services performed by us. Approximately \$157,000 was related to increased legal and approximately \$80,000 was related to audit fees incurred with the acquisitions of Integrated Logic, Macrotech and Q-DOT, and the purchase of Bluetooth technology from WebGear. The remaining decrease of \$178,000 was the net effect of a \$300,000 decrease in payroll and

16

benefits costs related to the administration of our government contracts and increase in payroll and benefits costs resulting from the addition of one employee, pay rate raises and bonuses for the administration of our semiconductor products. The decrease in payroll and benefits for our government contract business was due to the reduction in the amount of administrative employees. Sales and marketing saw an approximate \$250,000 increase, primarily due to approximately \$186,000 paid in sales commission to our independent sales representatives as a direct result of our increased revenue and an approximately \$64,000 increase due to the addition of one employee.

Other income for the year ended December 31, 2000 increased from an approximate \$83,000 expense at December 31, 1999 to an approximate income of \$91,000 at December 31, 2000. This increase was primarily due to an increase of approximately \$69,000 in interest income, a decrease of approximately \$97,000 in interest expense and an increase of approximately \$8,000 in other income.

We had a net loss of \$3,540,342 for the year ended December 31, 2000 compared to a net loss of \$122,926 for the year ended December 31, 1999.

FUTURE RESULTS OF OPERATIONS

Our ability to maintain profitability will depend primarily on our ability

Edgar Filing: SIMTEK CORP - Form SB-2/A

to continue reducing our manufacturing costs and increasing net product sales by improving the availability of existing products, by the introduction of new products and by expanding our customer base.

As of March 31, 2001, we had a backlog of unshipped customer orders of approximately \$6,439,000 expected to be filled by September 30, 2001. Orders are cancelable without penalty at the option of the purchaser prior to 30 days before scheduled shipment and therefore are not necessarily a measure of future product revenue.

In 2000 and the first quarter of 2001, we purchased all of our silicon wafers for our nonvolatile semiconductor memory products from a single supplier, Chartered. Approximately 89% of our sales for 2000 and 93% of sales for the first quarter of 2001 were from finished units produced from these silicon wafers. We had an agreement with Chartered to provide wafers through September 1998. Although Chartered continues to provide us wafers under the terms defined in this contract we do not have a current agreement signed. We are, however, negotiating with Chartered to renew the contract. In 2000, we purchased all of our silicon wafers built on a 0.5 micron process technology and our silicon wafers built on a 0.35 process technology for our programmed semiconductor logic products from United Memories and Chartered, respectively. Approximately 9% of our sales for 2000 were from finished units produced from these wafers. Currently, we do not have a current agreement signed for either of these companies to furnish us wafers, however, we have seen no disruption in their supply to us. Any disruptions in our relationship with Chartered could have an adverse impact on our operating results.

ZMD, through their license agreement with us, has the worldwide right to sell nonvolatile semiconductor memory products developed jointly by us and ZMD. With volume production being established at ZMD, ZMD has begun selling such nonvolatile semiconductor memory products. In the past year, we did not see increased competition with ZMD as compared to the previous year. However, due to ZMD creating a second source for nonvolatile semiconductor memory products, we believe that their presence may have a positive impact because many large manufacturers require two sources from which to purchase product. We will not be receiving any further license payments from our contract with ZMD.

17

We intend to continue designing, developing and subcontracting the production of our memory products. We also propose to continue to sell to existing and new customers through our normal sales and marketing efforts. We also intend to extend our logic product offerings. We will also begin development of high performance data communications products based on Silicon Germanium process expertise gained through our acquisition of Q-DOT. We believe that the additional logic and data communication products offered through these acquisitions will allow us to expand our product offering into new applications and additional customers. We anticipate that this will reduce our dependence on any single product line and provide additional potential sources of revenue.

LIQUIDITY AND CAPITAL RESOURCES

From inception through December 31, 2000, we have received approximately \$32,100,000 of gross proceeds from the sale of convertible debt and equity securities. From inception through December 31, 2000, we generated approximately \$10,085,000 of gross revenue from the sale of product and technology licenses, approximately \$45,215,000 from net product sales and approximately \$600,000 in royalty income.

Edgar Filing: SIMTEK CORP - Form SB-2/A

Under the Cooperation Agreement entered into with ZMD in September 1995, ZMD had the right to convert all financing into shares of our common stock at a price of \$0.175 per share for all monies paid in 1995 and at the average share price of the quarter the monies were paid for all monies paid in 1996. In 1996, we received \$378,551 under this agreement of which \$248,398 was converted into 1,353,374 shares of our common stock at a price of \$.1548 and 165,000 shares of our common stock at a price of \$.2358. The payable to ZMD of \$130,153 that showed on the balance sheet at December 31, 1999 was converted into 551,964 shares of our common stock. During 2000, ZMD began selling their shares of our common stock.

In 1998, we closed a \$1,500,000 financing transaction with Renaissance Capital. This offering involved convertible debentures with a seven year term bearing interest at 9 percent per annum. In the first quarter of 2000, Renaissance converted all \$1,500,000 of the debentures into an aggregate of 7,692,308 shares of our common stock. At the time of the conversion of the debentures, we were able to cease making interest payments and the underlying note was paid in full.

During 2000 and the first quarter of 2001, we acquired three companies in exchange for a total of approximately 9,420,000 shares of our common stock. Each of these acquisitions were handled as a pooling of interest and therefore the financial activities were integrated retroactively through 1999. We were not required to pay any cash as part of the purchase price in these transactions.

During 2000, we issued a total of 3,900,000 shares of our common stock to three separate companies. We issued 2,900,000 in exchange for incomplete research and development that we acquired from WebGear and 500,000 shares of our common stock to each of two separate investment banker firms, WTP and E.B.M., for their services.

For the three months ended March 31, 2001, the cash flows from operating activities was \$62,704, which is primarily due to a net loss of \$514,563, which is offset by depreciation and amortization of \$111,272, a decrease of prepaid expenses and other of \$305,608, and a decrease in accrued expenses of \$86,970. Increases in accounts receivable, inventory and accounts payable of \$380,109, \$750,648 and \$1,356,691, respectively were related to increased product demand. The cash flows from investing activities of \$188,769 were primarily due to the purchases of equipment and furniture related to the testing of our 64 kilobit and 256 kilobit nonvolatile semiconductor memory products built on 0.8 micron process technology and the purchase of computer and software required for research and development. The cash flows from financing activities of \$112,078 were due primarily to the payments on a line of credit, notes payable, the buyback of Simtek common stock and cash required to fund a subsidiary of Q-DOT.

For the three months ended March 31, 2000, cash flow provided by operating activities was \$131,403, which was primarily due to a net income of \$538,147, depreciation and amortization of \$111,646, an increase in reserves of \$68,951, accounts receivable of \$374,074, inventory of \$106,515, prepaid expenses and other of \$87,265, accounts payable of \$56,028, customer deposits of \$41,750 and

a decrease in accrued expenses of \$76,426. Cash flows from investing activities were primarily a result of the purchases of test fixtures and printed circuit boards used to electrically exercise our nonvolatile semiconductor memory products and a reduction in a certificate of deposit. Cash flows from financing activities were primarily due to payments on a line of credit of \$222,769 and

Edgar Filing: SIMTEK CORP - Form SB-2/A

the exercise of stock options by our employees.

For the year ended December 31, 2000, cash flow provided by operations was \$962,821, which is primarily due to a net loss of \$3,540,342, which is offset by the WebGear asset purchase of \$3,962,645, depreciation and amortization of \$430,962, stock issuance for services of \$22,932, a change in reserve accounts of \$196,407, an increase of accounts receivable of \$152,364, an increase of inventory of \$85,270, a decrease in prepaid and other of \$174,311 and a decrease in accounts payable of \$39,689, an increase in accrued expenses of \$44,371 and a decrease in customer deposits of \$53,010. The increase in depreciation was due primarily to the addition of computers and software required to develop our programmed semiconductor logic products and the addition of equipment required to test our products nonvolatile semiconductor memory products. \$300,767 of the stock issuance for services was related to the amortization of the stock issued to E.B.M. and WTP, the balance was related to the issuance of stock for services performed by our board of directors. The change in reserve accounts, accounts receivable, and inventory was due to increased product sales. The increase in prepaid and other was due primarily by our requirement to prepay for our silicon wafer deliveries if we are above our credit limit. The decrease in customer deposits was primarily due to customers prepaid orders at the end of 1999 and the product did not ship to them until 2000.

The use of cash flows in investing activities was due to purchases of equipment related to the purchase of test fixtures and printed circuit boards used to electrically exercise our nonvolatile semiconductor memory products manufactured at Chartered and the purchase of computers and software required for development of our programmed semiconductor logic products.

The cash flows provided by financing were primarily the result of the exercise of stock options of \$297,068, borrowings from a line of credit and the issuance of a note of \$908,231 which was offset by the payments on the line of credit of \$1,133,000 and a notes payable of \$136,135.

For the year ended December 31, 1999, cash flow provided by operations was \$354,236, which was primarily due to depreciation and amortization of \$391,718, a change in reserve accounts of \$90,936, an increase of accounts receivable of \$174,426, and an increase in accounts payable of \$342,754, a decrease in accrued expenses of \$179,291 and an increase in customer deposits of \$51,850. The increase in accounts receivable was due to a large revenue month in December 1999, from which the cash was not received until the first quarter of 2000. The increase in accounts payable was due primarily to an increase in product demand which requires us to maintain a larger wafer and work-in-progress inventory, which is payable to our subcontractors on 30 day terms and to the purchase of software that is being paid for on a five year capital lease.

The use of cash flows in investing activities for the year ended December 31, 1999, was due to purchases of equipment related to the testing of our nonvolatile semiconductor memory products and manufacturing and test equipment for our programmed semiconductor logic products and from the purchase of a restricted certificate of deposit. Of the \$317,625 of equipment purchased, \$179,310 related primarily of test fixtures and printed circuit boards used to electrically exercise our products manufactured at Chartered and wafer processing hardware used to support manufacturing of our programmed semiconductor logic products at United Memories. The balance of \$138,315 was related to computers and software purchased for use with our research and development contracts. A \$300,000 certificate of deposit was established as collateral for a \$300,000 letter of credit that is required by one of our suppliers in the event that we default on payments.

The cash flows provided by financing activities were primarily the result of proceeds from notes payable and capital contributions. We are not aware of any material commitments for capital expenditures, or any known trends, events,

Edgar Filing: SIMTEK CORP - Form SB-2/A

uncertainties that have had or expected to have a material impact on our sales, revenues or income, other than what we discussed above. We are also not aware of any seasonal aspects that had a material effect on our financial condition or results of operations.

19

SHORT-TERM LIQUIDITY.

Our cash balance at March 31, 2001 was \$2,615,626.

Our future liquidity will depend on our revenue growth and our ability to sell our products at positive gross margins and control of our operating expenses. We currently do not have any material plan of financing or demands on our cash.

LONG-TERM LIQUIDITY.

We will continue to evaluate our long term liquidity. We currently do not have any material plan of financing or demands of our cash.

ACCOUNTING STATEMENTS

In 1998, Statement of Financial Accounting Standards 133, Accounting for Derivative Instruments and Hedging Activities was issued. Statement 133 establishes accounting and reporting standards for derivative instruments and for hedging activities. It requires that an entity recognize all derivatives as either assets or liabilities in the statement of financial position and measure those instruments as fair value. This statement is effective for the Company's financial statements for the year ended December 31, 2001 and the adoption of this standard is not expected to have a material effect on the Company's financial statements.

INFLATION

The impact of inflation on our business has not been material.

20

BUSINESS

GENERAL

We provide integrated circuits to the electronics market for use in a variety of systems, such as computers, copiers, factory controllers, electric meters and military systems. We design, market and sell our products, but we subcontract the majority of our manufacturing requirements. We have designed and developed nonvolatile semiconductor products since we began business operations in May 1987. We have concentrated on the design and development of the 4, 16, 64 and 256 kilobit nonvolatile semiconductor memory product families and

Edgar Filing: SIMTEK CORP - Form SB-2/A

technologies, distribution channels, and sources of supply, including production at subcontractors. Kilobits are a measure of the amount of data that can be stored, more kilobits imply more storage. With our acquisitions of Integrated Logic and Macrotech, we have added the capability to design, develop and produce programmed semiconductor logic products.

In September 2000, we purchased incomplete research and development, patents and trademarks from WebGear. Simtek has established a core business within the nonvolatile memory application segment, and is now expanding into other technology areas including logic and data communication markets. These additional product families are intended to allow more rapid total revenue growth and to reduce the risk inherent in our historic dependence on one product family.

As of March 31, 2001, our backlog for released purchase orders was approximately \$6,439,000, all of which we expect to ship by September 30, 2001. Orders are cancelable without penalty at the option of the purchaser prior to 30 days before scheduled shipment and therefore are not necessarily a measure of future product revenue.

We are in production of our first four families of memory products, 256 kilobit, 64 kilobit, 16 kilobit and 4 kilobit nonvolatile semiconductor memories. Our 256 kilobit nonvolatile semiconductor memory product was qualified by our internal quality organization to the product's data sheet and in accordance with accepted industry standard practices in 1997 for sales into commercial and industrial markets and in 1998 for shipment into the military market. Our 64 kilobit nonvolatile semiconductor memories meet or exceed the requirements for sales into commercial, industrial and military markets. Our 16 kilobit and 4 kilobit nonvolatile semiconductor memories have been qualified for sales into commercial and industrial markets. Our nonvolatile semiconductor memories are physically smaller and require less maintenance than SRAM devices that achieve nonvolatility through the use of internal batteries and are more convenient to use than SRAM devices that achieve nonvolatility by being combined with additional chips.

Our programmed semiconductor logic products are used to replace programmable logic devices when a customer has completed his system design and requires cost-reduced integrated circuits for volume manufacturing. Each programmed semiconductor logic product is configured using the individual customer's design files and is built to his specific requirements.

We reduce capital requirements by subcontracting all phases of the manufacturing process. Chartered began providing silicon wafers for our nonvolatile semiconductor memory products in September 1993 and continues to provide wafers based on our product technology. United Memories and Chartered provide silicon wafers for our programmed semiconductor logic products based on 0.5 micron and 0.35 micron product technology, respectively. Amkor Technology and Amkor Test Services provide assembly and final test services, respectively, for our nonvolatile semiconductor memory products built from the wafers purchased from Chartered. Advanced Semiconductor Engineering and IPAC provide assembly services for our programmed semiconductor logic products. Testing of our programmed semiconductor logic products is done either internally or by Multitech Design and Test.

During 2000, all of the wafers used to produce our nonvolatile semiconductor memories were purchased from Chartered. Sales of these products accounted for approximately 75% of our revenue for 2000. Wafers were purchased from both Chartered and United Memories in 2000 to support our programmed semiconductor logic products. Sales of these products accounted for approximately 9% of our revenue for 2000. The remaining 16% of our revenue was from research and development contracts.

We currently have three sales and marketing offices, located in Colorado Springs, Colorado, Bristol, England and Atlanta, Georgia. We have engaged 17 independent representative organizations with 40 sales offices and 31 distributor organizations with 105 sales offices. These organizations have multiple sales offices and sales personnel covering specific territories. Through these organizations and their sales offices we are capable of serving a worldwide market.

In the last 12 months, we have made three acquisitions and issued stock instead of paying cash to three companies for the purchase of goods and services.

MEMORY INDUSTRY AND PRODUCT BACKGROUND

The semiconductor memory market is large and highly differentiated. This market covers a wide range of product densities, speeds, features and prices. The ideal memory would have (1) high bit density per chip to minimize the number of chips required in a system; (2) fast data read and write speeds to allow a system's microprocessor to access data without having to wait; (3) the ability to read and modify data an unlimited number of times; (4) the ability to retain its data indefinitely when power is interrupted (i.e. nonvolatility); (5) availability in a variety of package types for modern assembly techniques; and (6) the ability to be tested completely by the manufacturer to ensure the highest quality and reliability. Although customers would like to have memory components with all of these attributes it currently is not technically feasible. Therefore, the memory market is segmented with different products combining different mixes of these attributes.

Semiconductor memories can be divided into two main categories, volatile and nonvolatile. Volatile memories generally offer high densities and fast data access and programming speeds, but lose data when electrical power is interrupted. Nonvolatile memories retain data in the absence of electrical power, but typically have been subject to speed and testing limitations they also wear out if they are modified too many times. There are a number of common volatile and nonvolatile product types, as set forth below. The list of products under "Combinations" is limited to single packages and does not include combinations of the listed memories in separate packages, such as SRAMs in combination with EPROMs and EEPROMs.

Volatile -----	Nonvolatile -----	Combinations -----
SRAM	EEPROM	nvSRAM
DRAM	Flash Memory	NVRAM
	EPROM	SRAM plus lithium battery ("Batram")
	PROM	
	ROM	

VOLATILE MEMORIES. Rewritable semiconductor memories store varying amounts of electronic charge within individual memory cells to perform the memory function. In a Dynamic Random Access Memory, or "DRAM", the charge must be electrically refreshed many times per second or data are lost even when power is continuously applied. In a Static Random Access Memory, or "SRAM", the charge

Edgar Filing: SIMTEK CORP - Form SB-2/A

need not be refreshed, but data can be retained only if power is not interrupted.

NONVOLATILE MEMORIES. A Read Only Memory, or "ROM" is programmed (written) once in the later stages of the manufacturing process and cannot be reprogrammed by the user. Programmable Read Only Memory, or "PROM" can be programmed once by the user, while Erasable "EPROM", or EPROM may be reprogrammed by the user a limited number of times if the EPROM is removed from the circuit board in the equipment. Both Flash memory and Electrically Erasable PROM, or "EEPROM" may be reprogrammed electrically by the user without removing the memory from the equipment. However, the reprogramming time on both EEPROM and Flash memory is excessively long compared to the read time such that in most systems the microprocessor must stop for a relatively long time to rewrite the memory.

22

COMBINATIONS. Many customers use a combination of volatile and nonvolatile memory functions to achieve the desired performance for their electronic systems. By using SRAMs in combination with EPROM and EEPROM chips, customers can achieve nonvolatility in their systems and still retain the high data read and write speeds associated with SRAM memories. This approach, however, is not desirable in many applications because of the size and cost disadvantages associated with using two or more chips to provide a single memory function. Also, it may take up to several seconds to transfer the data from the SRAM to the EEPROM; an excessive time at power loss. As a result, attempts have been made to combine nonvolatile and volatile memory features in a single package or silicon chip. One approach combines an SRAM with lithium batteries in a single package.

Nonvolatile random access memories, or "NVRAMs" combine volatile and nonvolatile memory cells on a single chip and do not require a battery. We believe our nonvolatile semiconductor memory represents a significant advance over existing products that combine volatility and nonvolatility on a single silicon chip. We combine an SRAM memory cell with an EEPROM memory cell to create a small nonvolatile semiconductor memory cell. Our unique and patented memory cell design enables the nonvolatile semiconductor memory to be produced at densities higher than existing NVRAMs and at a lower cost per bit. In addition to high density and nonvolatility, the nonvolatile semiconductor memory has fast data access and program speeds and the SRAM portion of the memory can be modified an unlimited number of times without wearing out.

MEMORY TECHNOLOGY

We use an advanced implementation of silicon-nitride-oxide-semiconductor, or "SNOS" technology. SNOS technology stores electrical charge within an insulator, silicon nitride, and uses a thin tunnel oxide layer to separate the silicon nitride layer from the underlying silicon substrate. SNOS technology prevents tunnel oxide rupture in the memory cell from causing an immediate loss of data. Oxide rupture has been a major cause of failures in Flash and EEPROMs using floating gate technology, where charge is stored on a polysilicon conductor surrounded by insulators. To protect against these failures, many floating gate EEPROMs have required error correction circuitry and redundant memory cells. This increases product cost by requiring more silicon area. Error correction and redundancy are not required for our products to protect against tunnel oxide rupture. In addition, our product designs incorporate a special test feature which can predict data retention time for every individual memory cell based on measuring the rate of charge loss out of the silicon nitride.

Edgar Filing: SIMTEK CORP - Form SB-2/A

The SNOS technology coupled with our nonvolatile semiconductor memory cell allows high performance nonvolatile SRAMs to be manufactured using complementary metal oxide semiconductor, or "CMOS" technology. The SNOS technology that we use has proven to be highly reliable, as demonstrated by our product qualification results to date.

MEMORY PRODUCTS

Nonvolatile Static Random Access Memories. Our 256 kilobit, 64 kilobit, 16 kilobit and 4 kilobit nonvolatile semiconductor memory product families consist of nonvolatile memories that combine fast SRAM and nonvolatile EEPROM characteristics within each memory cell on a single chip of silicon. The SRAM portion of the nonvolatile semiconductor memories is operated in the same manner as most existing SRAM products. The SRAM can be written to and read from an unlimited number of times. The EEPROM can be programmed, depending upon device type, by user control or automatically by transferring the SRAM contents into the EEPROM. The EEPROM data can be transferred back into the SRAM by user control or the data can be transferred automatically.

Our nonvolatile semiconductor memories have fast data access speeds of 20, 25, 35 and 45 nanoseconds. These data access speeds correspond to those of fast SRAMs and meet the requirements of much of the fast SRAM market. The high speed characteristics of our nonvolatile semiconductor memories allow them to be used in applications with various high performance microprocessors and digital signal processors such as those manufactured by Intel Corp., Texas Instruments and Motorola. Our nonvolatile semiconductor memories can be used to replace SRAMs with lithium batteries and multiple chip solutions such as SRAM plus EEPROM or Flash Memory.

23

The various combinations of density and speed allow our nonvolatile semiconductor memory products to meet the design and performance requirements of many different types of systems.

We finalized commercial and industrial qualification of two versions of our initial 64 kilobit nonvolatile semiconductor memory product offering in September 1991 and April 1992, respectively. We completed military qualification of our initial nonvolatile semiconductor memories in May 1992. We began sales into the commercial market of our initial 16 kilobit nonvolatile semiconductor memory product family in 1992. The nonvolatile semiconductor memory product family also includes the 4 kilobit version. We completed the development and product qualification of the 64 kilobit AutoStore™ nonvolatile semiconductor memory in 1993. The AutoStore™ version automatically detects power loss and transfers the data from the SRAM cells into the EEPROM cells. This device does not require instructions or intervention from the system microprocessor to notify it of the power loss. Commercial and industrial qualification of our 256 kilobit nonvolatile semiconductor memory occurred in 1997 and military qualification of our 256 kilobit nonvolatile semiconductor memory was completed in the second quarter of 1998.

PROGRAMMABLE LOGIC DEVICE INDUSTRY

The electronics industry uses logic integrated circuits to route electrical signals to perform tasks unique to that system. These unique operations differentiate one system capability from another. Field Programmable Gate Arrays, or "FPGAs" and Complex Programmable Logic Devices, or "CPLDs" have

Edgar Filing: SIMTEK CORP - Form SB-2/A

become popular for this purpose, and are supplied by a number of major suppliers, such as Xilinx and Altera. These products provide high performance, flexible solutions, but the technology required to allow these products to be programmable is expensive when compared to non-programmable, fixed function, application specific products. Our programmed semiconductor logic products are not programmable, but provide a low-cost, high volume alternative to the programmable logic products. The nonprogrammable replacements use less silicon which reduces material cost and allows us to produce larger volumes. We entered this product segment through our acquisitions of Integrated Logic and Macrotech in 2000.

PROGRAMMED SEMICONDUCTOR TECHNOLOGY

We use standard logic wafer processing available from various subcontract fabrication facilities. We currently contract with United Memories for 0.5 micron technology and with Chartered for 0.35 micron technology, in each case through purchase orders on a case-by-case basis. We plan to migrate the technology to a 0.25 micron process as the market develops.

By using the system designers' design files, our software conversion tools translate the design, which supports direct netlist conversion to create drop-in replacements at a fraction of the FPGA or CPLD cost. By the term "direct netlist" we mean description of the customers design and by the terms "drop in replacements" we mean package size, package type and functional equivalent device. We can support up to approximately 1 million logic gates plus dual port RAM. We also support full scan test without any area penalty with our integrated testability feature, which is nested within the existing logic cells, requiring no dedicated chip area.

PROGRAMMED SEMICONDUCTOR LOGIC PRODUCTS

Programmed semiconductor logic products are built to order based on customer designs that are electronically transferred to our design workstations. Our engineers then verify the design and implement it in the appropriate technology to provide the most cost effective solution available for the customer.

PRODUCT WARRANTIES. We presently provide a one-year limited warranty on our products.

RESEARCH AND DEVELOPMENT

Many of our research and development activities are centered around developing new products and reducing the cost of our nonvolatile semiconductor memory products and the development and design of customer specific programmed

semiconductor logic products. We have reduced our costs by introducing our 0.8 micron process technology. This technology reduced the size of the 64 kilobit nonvolatile semiconductor memory chip and enabled us to develop a cost effective 256 kilobit nonvolatile semiconductor memory. We are continuing our efforts to improve yield on the 0.8 micron technology. In order to further reduce costs, we engaged Integra Technologies, now Amkor Test Services in the fourth quarter 1997 for testing of our products. We have a test floor used for evaluation of our technologies, product designs and product quality. The test floor is also used for production testing of silicon wafers.

Edgar Filing: SIMTEK CORP - Form SB-2/A

In an effort to expand our products, we acquired, from WebGear, incomplete research and development of technology that we intend to apply within the emerging Bluetooth market segment. "Bluetooth" is an industry standard, short range wireless communications technology designed to allow a variety of electronic devices, such as wireless telephone, Personal Digital Assistants, notebook computers, desktop computers, peripheral input-output devices, television set-top boxes and Internet appliances to exchange data without the use of physical cabling. We plan to spend approximately \$750,000 over the next year in order to develop and manufacture integrated circuits using the technology in Bluetooth applications.

We anticipate that our acquisition of Q-DOT will enable us to enter the high speed data communications market, addressing both wired and wireless applications, based on advanced Silicon Germanium process technology. Silicon Germanium (SiGe) is rapidly becoming the technology of choice for many analog, mixed signal and high speed digital circuits. We plan to spend approximately \$350,000 over the next year in order to develop and manufacture integrated circuits using the SiGe process technology.

Our research and development expenditures for the years ended December 31, 2000 and 1999 were \$6,158,189 and \$2,240,273, respectively. Of the \$6,158,189 expenditure incurred in 2000, \$3,962,646 was related to the incomplete research and development we purchased from WebGear with stock. We intend to continue expenditures on research and development; however, the percentage of research and development expenditures is expected to decrease relative to expenditures relating to the commercial production of our existing products.

MANUFACTURING AND QUALITY CONTROL

Our manufacturing strategy is to use subcontractors whose production capabilities meet the requirements of our product designs and technologies.

In 1992, we entered into a manufacturing agreement with Chartered to provide us with silicon wafers for our products. Under the manufacturing agreement with Chartered, Chartered has installed a manufacturing process for versions of our current and future memory products.

Finished wafer procurement reverted to Chartered during 1998 as we ceased purchasing finished units from ZMD. We used United Memories for wafer procurement of our 0.5 micron Programmed semiconductor logic products and Chartered for wafer procurement of our 0.35 micron Programmed semiconductor logic products. During 2000, all of our product revenue was based on wafers purchased from Chartered and United Memories.

Device packaging of our nonvolatile semiconductor memory products continued at the Amkor facilities in the Philippines and South Korea. Final test for our nonvolatile semiconductor memory products was established successfully at Integra Technologies, now Amkor Test Services, in Wichita, Kansas. Device packaging of our programmed semiconductor logic products continued at Advanced Semiconductor Eng., Inc. in Taiwan. Final test of our programmed semiconductor logic products was completed in our Colorado Springs facility and at Multitech Design and Test in San Jose, California.

Our subcontractors provide quality control for the manufacture of our products. We maintain our own quality assurance personnel and testing capability to assist the subcontractors with their quality programs and to perform periodic audits of the subcontractors' facilities and finished products to ensure product integrity.

Our quality and reliability programs were audited by several commercial and military customers during 2000 as part of routine supplier certification procedures. All such audits were completed satisfactorily.

MARKETS

Our memory products are targeted at fast nonvolatile SRAM markets, SRAM plus EEPROM markets and other nonvolatile memory products broadly used in commercial, industrial and military electronic systems.

Our Programmed semiconductor logic products are built to customer requirements in many application areas. Therefore, we believe that our products will address very broad markets including these applications:

Airborne and Space Computers *	Lighting *
Automotive Control & Monitoring	Medical Instruments *
Portable Telephone Modems	Control Systems *
Portable Computers	Currency Changers
Postal Meters	Data Monitoring Equipment *
Printers *	Disk Drives *
Process Control Equipment *	Facsimile Machines *
Radar and Sonar Systems *	Gaming *
Telecommunications Systems *	GPS Navigational Systems
Terminals *	Guidance and Targeting Systems *
Test Equipment *	High Performance Workstations
Utility Meters *	Laser Printers *
Vending Machines	Mainframe Computers
Weapon Control Systems *	CD Writers
Security Systems *	Copiers *
Broadcast Equipment *	Cable TV Set Top Converter Boxes *
Studio Recording Equipment *	

The applications marked with an asterisk currently use our products. The other applications use similar products, but may use our products in newer designs.

We are increasing marketing and sales emphasis on office automation products such as copiers and mass storage systems as well as beginning new sales efforts in data communication applications.

SALES AND DISTRIBUTION

Our strategy is to generate sales through the use of independent sales representative agencies and distributors. We believe this strategy provides the fastest and most cost effective way to assemble a large and professional sales force.

We currently have three sales and marketing offices, located in Colorado Springs, Colorado, Bristol, England and Atlanta, Georgia. We have engaged 17 independent representative organizations with 40 sales offices and 31 distributor organizations with 105 sales offices. Both organizations have multiple sales offices and sales personnel covering specific territories. Through these organizations and their sales offices we are capable of serving a worldwide market.

Edgar Filing: SIMTEK CORP - Form SB-2/A

Independent sales representatives typically sell a limited number of noncompeting products to semiconductor users in particular geographic assigned territories. Distributors inventory and sell products from a larger number of product lines to a broader customer base. These sales channels are complementary, as representatives and distributors often work together to consummate a sale, with the representative receiving a commission from us and the distributor earning a markup on the sale of the products. We supply sales materials to the sales representatives and distributors.

26

For our marketing activities, we evaluate external marketing surveys and forecasts and perform internal studies based, in part, on inputs from our independent sales representative agencies. We prepare brochures, data sheets and application notes on our products.

CUSTOMERS AND BACKLOG

We have shipped qualified nonvolatile semiconductor memory products to customers directly and through distributors since the September 1991 commercial product qualification; the majority of our customers are Fortune 500 companies. Approximately 40% of our net product sales during 2000 were to customers in the Pacific Rim and approximately 17% were to customers in Europe. The remaining product sales were to customers in North America.

As of March 31, 2001, we had a backlog of unshipped customer orders of approximately \$6,439,000, which is expected to be filled by September 30, 2001. Orders are cancelable without penalty at the option of the purchaser prior to 30 days before scheduled shipment and therefore are not necessarily a measure of future product revenue.

During 2000, we continued to receive initial and scheduled production orders on our 64 kilobit and 256 kilobit nonvolatile semiconductor memory product. We believe that we will continue to receive volume production orders on these products.

LICENSES

PRODUCT AND TECHNOLOGY LICENSE SALES. We have sold product and technology licenses to Nippon, Plessey and ZMD. These licenses provided for unlimited use in perpetuity of the process technology and circuit designs required to manufacture nonvolatile memory integrated circuits using our technology. Since neither Nippon nor Plessey has used the licenses in any way since their initial sale in 1988 and 1991, respectively, we don't anticipate any future activity on the licenses with Nippon and Plessey.

ZMD. In June of 1994, we signed a joint development agreement with ZMD to install the 1.2 micron products for manufacture at ZMD and to jointly develop the 0.8 micron technology at Chartered. The agreement was modified in August of 1994 by a Letter of Intent between us to bypass the installation of our nonvolatile semiconductor memory products based on a 1.2 micron process technology at ZMD and instead modify the 0.8 micron technology to run in the ZMD factory. ZMD has paid us all the monetary requirements under this agreement including any royalties we may receive from sales of these jointly developed products.

Edgar Filing: SIMTEK CORP - Form SB-2/A

CHARTERED. In September of 1992, we entered into a manufacturing agreement with Chartered which expired in September 1998. We continue to use Chartered to manufacture our silicon wafers on a purchase order basis without a long term contract.

FUTURE LICENSE SALES. We intend to sell product and technology licenses on a selective basis. We will continue to seek licensing partners who can contribute to the development of the nonvolatile semiconductor memory market and provide a meaningful level of revenue to us while not posing an undue threat in the marketplace.

COMPETITION

Our products compete on the basis of several factors, including data access and programming speeds, density, data retention, reliability, testability, space savings, manufacturability, ease of use and price.

Products that compete with our family of nonvolatile semiconductor memories fall into three categories. The first category of products that compete with our nonvolatile semiconductor memories are volatile and nonvolatile chips used in combination, such as fast SRAMs used with EPROMs, EEPROMs, or Flash memory. We believe that we have advantages over these applications because the nonvolatile semiconductor memory allows data to be stored in milliseconds as compared to seconds for chips used in pairs. Our single chip solution provides a space

27

savings and easier manufacturing. Our single chip solution generally provides increased reliability versus multiple chips. We believe it will be able to compete with many solutions requiring density up to 256 kilobits; however, in those instances where the density requirement is beyond 256 kilobits the nonvolatile semiconductor memory does not compete. New systems designs tend to use larger memory densities greater than 256 kilobits, reducing the market available to us. We estimate that less than 10% of the market uses 256 kilobit or smaller memories. Competitors in the multiple chip category include Cypress Semiconductor Corp., Integrated Technology, Inc., Toshiba, Fujitsu, Advanced Micro Devices, Inc., Atmel and National Semiconductor Corp. We currently hold less than 1% market share this market category.

The second category of products that compete with our nonvolatile semiconductor memories are products that combine SRAMs with lithium batteries in specially adapted packages. These products generally are slower in access speeds than our nonvolatile semiconductor memories due in part to limitations caused by life of the lithium battery when coupled with a faster SRAM. Our nonvolatile semiconductor memories are offered in standard, smaller, less expensive packages, and do not have the limitation on lifetime imposed on the SRAM/battery solutions by the lithium battery. Our nonvolatile semiconductor memories can also be used for wave soldered automatic insertion circuit board assembly since they do not have the temperature limitations of lithium batteries. However, lithium battery-backed SRAM products are available in densities of 1 megabit and greater per package. Companies currently supplying products with lithium batteries include Dallas Semiconductor Corp., ST Microelectronics and Texas Instruments. We currently hold approximately 10% of this market category.

The third category consists of NVRAMs that combine SRAM memory cells and EEPROM memory cells on a monolithic chip of silicon. Our current product offerings are of higher density, faster access times and we believe can be

Edgar Filing: SIMTEK CORP - Form SB-2/A

manufactured at lower costs per bit than NVRAMS. We believe that traditional manufactures of NVRAM's have discontinued manufacturing their products.

ZMD, through their license agreement with us, has the worldwide right to sell under the ZMD label nonvolatile semiconductor memories developed jointly by ZMD and us. With volume production established at ZMD, ZMD is selling such nonvolatile semiconductor memories. This has had a positive impact for us by creating a second source, which is required by many larger companies, for our nonvolatile semiconductor memory products. However, in 2000, we were required to reduce prices to specific markets due to the increased competition from ZMD. We believe that the competition from ZMD has increased the number of companies using nonvolatile semiconductor memories, but may have put downward pressure on average selling prices.

We are aware of other semiconductor technologies for nonvolatile memory products. These technologies include ferroelectric memory and thin film magnetic memory. Each of these requires a newly developed process technology which has processing risk, but may deliver performance characteristics superior to our technology if perfected. Each of these processes integrates materials into the silicon processing steps which are not commonly used for semiconductor memory products today. If successful, these products could perform the same functions in a system that our products currently perform, but may be manufactured in higher density or lower cost products. Ramtron, Raytheon, Symetrix, and others are developing ferroelectric products. Honeywell, Inc. is developing magnetic film products.

Programmed semiconductor logic-type solutions are supported by semiconductor companies such as AMI Semiconductor, NEC and Temic. These competitors provide a wide variety of solutions using semiconductor processes ranging from 0.8 micron process technology to 0.25 micron process technology. The business of converting customers' programmable logic products to non-programmable logic products is highly dependent on the customers' designs and system performance requirements. Each competitor's process technology and software tools will affect its ability to support any particular requirement.

PATENTS AND INTELLECTUAL PROPERTY

We undertake to protect our product designs and technologies under the relevant intellectual property laws as well as by utilizing internal disclosure safeguards. Under our licensing programs, we exercise control over the use of our protected intellectual property and have not permitted our licensees to sublicense our nonvolatile semiconductor memory products or technology.

It is common in the semiconductor industry for companies to obtain copyright, trademark and patent protection of their intellectual property. We believe that patents are significant in our industry, and we are seeking to build a patent portfolio. We expect to enter into patent license and cross-license agreements with other companies. We have been issued twenty five patents in the United States on our nonvolatile semiconductor memory cell and other circuit designs. These patents relate to circuit implementations used to design our nonvolatile memory products. The use of these patents allows us to design circuits with lower power consumption and faster store timing than would be possible otherwise giving us a competitive advantage over other technologies. These patents have terms that expire through 2008 to 2013. We have also taken steps to obtain European patents in the large European countries, including

Edgar Filing: SIMTEK CORP - Form SB-2/A

Germany, France, the United Kingdom and Sweden on the nonvolatile memory patents that would have potential value in international markets. We have four applications that have been allowed and intend to prepare patent applications on additional circuit designs we have developed. However, as with many companies in the semiconductor industry, it may become necessary or desirable in the future for us to obtain licenses from others relating to our products.

We have received federal registration of the term "Novcel" a term we use to describe our technology. We have not sought federal registration of any other trademarks, including "Simtek" and "QuantumTrapTM" or our logo.

EMPLOYEES

As of the date of this prospectus, we had 45 full-time employees.

FACILITIES

We lease approximately 12,000 square feet of space in Colorado Springs, Colorado. This space includes a product engineering test floor of approximately 2,350 square feet. The lease expires on December 31, 2001. During 2000, we signed a lease for a new location in Colorado Springs, Colorado for approximately 16,000 square feet of space that includes a product engineering test floor of approximately 3,000 square feet. The new lease agreement requires the new landlord to begin paying all costs related to the old location at the time we take occupancy at the new location. In March 2001, we moved into the new facility, located at 4250 Buckingham Drive #100, Colorado Springs, CO 80907.

LEGAL PROCEEDINGS

There were no legal proceedings against us as of the date of this report.

MATTERS SUBMITTED TO A VOTE OF SECURITY HOLDERS

On November 16, 2000, we had a special meeting of shareholders to ratify the selection of Hein + Associates, LLP as our independent auditors for the year ending December 31, 2000. The proposal was passed with the voting of 32,532,148 For, 97,355 Against, and 138,458 Abstained.

MANAGEMENT

DIRECTORS AND EXECUTIVE OFFICERS

Our directors and executive officers are as follows:

Name	Age	Position
----	---	-----
Douglas M. Mitchell.....	51	Director, Chief Executive Officer and Financial Officer (acting)
Klaus C. Wiemer.....	63	Director

Edgar Filing: SIMTEK CORP - Form SB-2/A

Robert H. Keeley.....	59	Director
John Heightley.....	64	Director

DOUGLAS M. MITCHELL, served as our Chief Operating Officer from July 1, 1997 until January 1, 1998 at which time he became Chief Executive Officer, President and a director. Mr. Mitchell has over 20 years of experience in the semiconductor and electronics systems industry holding various marketing and sales management positions. Prior to joining us, he was President and Chief Executive Officer of a wireless communications company, Momentum Microsystems. Prior to this Mr. Mitchell was Vice President of Marketing with SGS-Thomson Microelectronics, responsible for marketing and applications engineering of Digital Signal Processing, transputer, microcontroller and graphics products in North America. SGS-Thomson had acquired Inmos Corporation where Mr. Mitchell had been Manager, US Marketing and Sales. Mr. Mitchell has held management positions at Texas Instruments and Motorola and has been responsible for various product definition and product development. Mr. Mitchell holds a Bachelors degree in electrical engineering from the University of Texas and a Masters of Business Administration degree from National University.

KLAUS C. WIEMER, has served as a director since May 1993. He also serves on the boards of Neomagic Corp (NMGC) of Santa Clara, CA and InterFET Corp of Garland, TX. From July 1993 to May 1994, Dr. Wiemer served as President and Chief Executive Officer of our company. Since May 1994, Dr. Wiemer has been an independent consultant. From April 1991 to April 1993, Dr. Wiemer was President and Chief Executive Officer of Chartered , and from July 1987 to March 1991, Dr. Wiemer was President and Chief Operating Officer of Taiwan Semiconductor Manufacturing Company. Prior to 1987, Dr. Wiemer was a consultant for the Thomas Group specializing in the area of integrated circuit manufacturing and previously worked for fifteen years with Texas Instruments. Dr. Wiemer holds a Bachelors degree in physics from Texas Western College, a Masters degree in physics from the University of Texas and a Ph.D. in physics from Virginia Polytechnic Institute.

ROBERT H. KEELEY, has served as a director since May 1993. He is currently the El Pomar Professor of Business Finance at the University of Colorado at Colorado Springs. From 1986 until he joined the faculty at the University of Colorado at Colorado Springs in 1992, Dr. Keeley was a professor in the Department of Industrial Engineering and Engineering Management at Stanford University. Prior to joining Stanford, he was a general partner of Hill and Carmen (formerly Hill, Keeley and Kirby), a venture capital firm. Dr. Keeley holds a Bachelors degree in electrical engineering from Stanford University, an M.B.A. from Harvard University and a Ph.D. in business administration from Stanford University. Dr. Keeley is also a director of Analytical Surveys, Inc. and a number of private companies.

JOHN HEIGHTLEY, was appointed as a director in September 1998. Mr. Heightley is currently executive vice president and chief technology officer for United Memories of Colorado Springs. From 1990 to 1996, Mr. Heightley was president and chief executive officer of Adaptive Solutions, Inc. In 1986 and 1987, he held the position of president and chief executive officer of Gigabit Logic, Inc.; in 1987 he was appointed chairman of Gigabit along with his responsibilities as president and chief executive officer. Mr. Heightley held these positions until 1990. Prior to Gigabit, Mr. Heightley served as president and chief executive officer of Ramtron Corporation from 1985 to 1986 and from 1978 to 1985 he served as a member of the board of directors, president, chief

operating officer and vice president of memory products for Inmos International, plc. Mr. Heightley was granted a B.S. degree in Engineering Science from Penn State University and earned a M.S. degree in Electrical Engineering from M.I.T.

Mr. Harold Blomquist resigned as a member of our board of directors on June 28, 2001. We will fill the vacancy on our board in accordance with our bylaws.

Subject to the requirement that the board of directors be classified if it consists of six or more persons, directors serve until the next annual meeting or until their successors are elected and have qualified. Officers serve at the discretion of the board of directors. Vacancies on the board of directors are filled by the existing directors. Under and subject to compliance with, agreements entered into with ZMD, ZMD has the right to appoint two members to the board of directors. ZMD has a competitive position to us in the marketplace and at this time has no representation on our board of directors. All conditions of the ZMD agreement are defined the Product License Development and Support Agreement and the Cooperation Agreement between Simtek Corporation and ZMD.

SPECIAL PROVISIONS IN ARTICLES OF INCORPORATION

Our articles of incorporation contain a provision limiting the liability of directors to the fullest extent permitted under the Colorado Corporation Code (the "Code"). The Code allows a corporation to limit the personal liability of a director to the corporation or its shareholders for monetary damages for breaches of fiduciary duty as a director except for

- (1) breaches of the director's duty of loyalty,
- (2) acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of the law,
- (3) specific other acts specified in the Code, and
- (4) transactions from which the director derived an improper benefit.

The provisions of the Code will not impair our ability to seek injunctive relief for breaches of fiduciary duty. Such relief, however, may not always be available as a practical matter.

Our articles of incorporation also contain a provision that requires us to indemnify, to the fullest extent permitted under the Code, directors and officers against all costs and expenses reasonably incurred in connection with the defense of any claim, action, suit or proceeding, whether civil, criminal, administrative, investigative or other, in which such person may be involved by virtue of being or having been a director, officer or employee.

Insofar as indemnification for liabilities arising under the securities Act of 1933 (the "Act") may be permitted to directors, officers and controlling persons of Simtek pursuant to the foregoing provisions, or otherwise, Simtek has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is,

therefore, unenforceable.

EXECUTIVE COMPENSATION

The following table sets forth specific information for each of our last three fiscal years with respect to the annual and long-term compensation of the only individual acting as the Chief Executive Officer during the fiscal year ended December 31, 2000. No other executive officers as of December 31, 2000 had combined annual salary and bonus for the fiscal year ended December 31, 1998 that exceeded \$100,000.

Summary Compensation Table

Name and Principal Position	Year	Annual Compensation			Long Term Compensation	
		Salary (\$)	Bonus (\$)	Other Annual Compensation (\$)	Awards	Options/SARs (#)
Douglas M. Mitchell(1) Chief Executive Officer and President	2000	\$150,000	\$62,500	--	--	40,000
	1999	\$120,000	--	--	--	30,000
	1998	\$120,000	--	--	--	250,000

(1) Mr. Mitchell became our Chief Executive Officer and President on January 1, 1998.

OPTION GRANT TABLE

The following table sets forth specific information with respect to options granted by us during the fiscal year ended December 31, 2000 to the individual named in the summary compensation table above.

Name	Shares subject to Options/SAR's Granted	Shares subject to Options/SAR's in Fiscal % of Total	Exercise Price Per Share	Market Price per Share on Date of Grant	Expiration Date
-----	-----	-----	-----	-----	-----

Edgar Filing: SIMTEK CORP - Form SB-2/A

Douglas M. Mitchell 40,000 (1) 4.1% \$0.25 \$0.25 1/14/2007

(1) 40,000 options were granted to Mr. Mitchell in his capacity as Chief Executive Officer and President, these options vest at 1/36th per month over 3 years.

YEAR-END OPTION TABLE

The following table sets forth as of December 31, 2000 the number of shares subject to unexercised options held by the individual named in the summary compensation table above. 550,000 options had an exercise price greater than the last sale price of our common stock underlying the options as reported by the OTC Electronic Bulletin Board on the last trading day of the fiscal year ended December 31, 2000.

Aggregated Option/SAR Exercises in Last Fiscal Year
and Fiscal Year-End Option/SAR Values

Name	Shares Acquired on Exercise (#)	Value Realized (\$)	Number of Unexercised Options/SARs at Fiscal Year-End		Value at Exercisab (\$)
			Exercisable (#)	Unexercisable (#)	
Douglas M. Mitchell	100,000	\$198,952	541,389	78,611	\$10,111

EMPLOYMENT AGREEMENTS

Mr. Mitchell is employed as President and Chief Executive Officer pursuant to an employment agreement with us. Under the terms of the employment agreement, Mr. Mitchell receives an annual salary of \$150,000 and such additional benefits that are generally provided other employees. Mr. Mitchell's employment agreement expires June 1, 2001 but is automatically renewed for successive one-year terms unless we or Mr. Mitchell elects not to renew. If we terminate the employment of Mr. Mitchell without cause, Mr. Mitchell is entitled to continuation of his base salary and benefits, mitigated by income Mr. Mitchell may earn, for the remainder of the term of the agreement. Mr. Mitchell is subject to a noncompetition covenant for a period of one year from the date of termination.

CONFIDENTIALITY AND NONDISCLOSURE AGREEMENTS

We generally require our employees to execute confidentiality and nondisclosure agreements upon the commencement of employment with us. The agreements generally provide that all inventions or discoveries by the employee

Edgar Filing: SIMTEK CORP - Form SB-2/A

related to our business and all confidential information developed or made known to the employee during the term of employment shall be the exclusive property of us and shall not be disclosed to third parties without the prior approval of us.

DIRECTORS' COMPENSATION

Each director who is not also an employee receives \$1,000 for each meeting of the Board, attended in person, and \$500 for each meeting of a committee of the Board. Directors are also reimbursed for their reasonable out-of-pocket expenses incurred in connection with their duties to us. During the fiscal year ended December 31, 2000, 15,000 stock options were granted, at the market price on date of grant, each to Dr. Klaus Wiemer, Dr. Robert Keeley, Mr. Harold Blomquist and Mr. John Heightley.

SECURITY OWNERSHIP

The first table below sets forth specific information regarding ownership of our common stock as of June 21, 2001, by each person who is known by us to beneficially own more than five percent of our common stock, by each director, by each executive officer named in the summary compensation table and by all directors and executive officers as a group. Shares issuable within sixty days upon the exercise of options are deemed outstanding for the purpose of computing the percentage ownership of persons beneficially owning such options or holding such notes but are not deemed outstanding for the purpose of computing the

33

percentage ownership of any other person. To the best of our knowledge, the persons listed below have sole voting and investment power with respect to the shares indicated as owned by them subject to community property laws where applicable and the information contained in the notes to the table.

Name and Address of Beneficial Owner -----	Number of Shares Owned -----	Percentage of Class -----

* Less than 1 percent

The selling security holders received as part of our merger with Q-DOT the shares of Simtek common stock that we are registering. Under the merger agreement, Q-DOT merged with and into us and Q-DOT, Inc., by virtue of the merger, became a wholly owned subsidiary of us. Although duly notified of their appraisal rights, no Q-DOT stockholders exercised appraisal rights. Q-DOT's 30 stockholders received, on a pro rata basis, a total of 1,810,123 shares of our common stock. The transaction was valued at \$4 million. The transaction closed on or about March 14, 2001, on which date we had received all consideration for our common stock. The transaction was a private placement exempt from registration pursuant to Rule 506 of Regulation D promulgated by the SEC. There were fewer than 35 purchasers of our securities, of whom 12 were accredited investors. We provided each purchaser with the information required under Regulation D. We reasonably believed that each purchaser, either alone or with a purchaser representative, was capable of evaluating the risks and merits of investing in Simtek stock. To the best of our knowledge, no general solicitation or advertising occurred. Following the merger, we filed a Form D with the SEC as required by Regulation D.

Mr. Douglas Mitchell, our Chief Executive Officer, President, Chief Financial Officer (acting), and one of our directors, served as a director and stockholder of Q-DOT immediately prior to the merger. Mr. Mitchell owned 44,386 shares of our common stock (excluding stock options) on the date of this prospectus and, following the offering and sale of 15,536 shares, he will own 28,850 shares, or less than 1% of our common stock.

SPECIFIC RELATIONSHIPS AND RELATED TRANSACTIONS

Our president and director, Douglas Mitchell was also a director of Q-DOT prior to our acquisition of Q-DOT. Mr. Mitchell disclosed all material facts as to his conflict of interest in the acquisition. The board of directors determined that the acquisition was fair to us and in our best interest. Mr. Mitchell abstained from the vote of the Q-DOT and Simtek board of directors decision to approve the acquisition. At the time of acquisition, Mr. Mitchell owned approximately 1% of the Q-DOT shares and he received 44,386 shares of our common stock in connection with our acquisition of Q-DOT, pro rata with the terms that all of the other Q-DOT shareholders'.

37

DESCRIPTION OF SECURITIES

COMMON STOCK

We are authorized to issue 80,000,000 shares of common stock, par value \$0.01 per share. Each share of common stock entitles the holder thereof to one vote on all matters submitted to a vote of the shareholders. Holders of common stock do not have preemptive rights or rights to convert their common stock into other securities. Holders of common stock are entitled to receive ratably such dividends as may be declared by the board of directors out of funds legally available therefor. In the event of our liquidation, dissolution or winding up, holders of the common stock have the right to a ratable portion of the assets

Edgar Filing: SIMTEK CORP - Form SB-2/A

remaining after payment of liabilities.

PREFERRED STOCK

Our Articles of Incorporation authorize 2,000,000 shares of \$1.00 par value preferred stock. The board of directors has the authority to issue preferred stock in one or more series and to fix the rights, preferences, privileges and restrictions thereof, including dividend rights, dividend rates, conversion rights, voting rights, terms of redemption, redemption prices, liquidation preferences and the number of shares constituting any series and the designation of such series, without further vote or action by the shareholders. The issuance of preferred stock may have the effect of delaying, deferring or preventing a change in control of us without further action by the shareholders and may adversely affect the voting power and other rights of the holders of common stock, including the loss of voting control to others. As of the date of this prospectus, there are not shares of preferred stock outstanding.

PLAN OF DISTRIBUTION

These shares are being offered hereby for sale by twenty nine of our shareholders who received these shares in a unregistered transaction. These shares will be offered by the selling shareholders from time to time (i) on the over-the-counter market, where the common stock is traded, or elsewhere, at fixed prices which may be changed, at market prices prevailing at the time of offer and sale, at prices related to such prevailing market prices or at negotiated prices and (ii) in negotiated transactions, through the writing of options on the shares, or a combination of such methods of sale. The selling shareholders may effect such transactions by offering and selling the shares directly or to or through securities broker-dealers, and such broker-dealers may receive compensation in the form of discounts, concessions or commissions from the selling shareholders and/or the purchasers of the shares for whom such broker-dealers may act as agent or to whom the selling shareholders may sell as principal, or both (which compensation as to a particular broker-dealer might be in excess of customer commissions).

The selling shareholders and any broker-dealers who are in connection with the sale of the shares hereunder may be deemed to be "underwriters" within the meaning of Section 2(11) of the Securities Act, and any commissions received by them and profit on any resale of the shares as principal might be deemed to be underwriting discounts and commissions under the Securities Act.

We have advised the selling shareholders that they and any securities broker-dealers or others who may be deemed to be statutory underwriters will be subject to the prospectus deliver requirements under the Securities Act. We have also advised the selling shareholders that in the event of a "distribution" of shares, any "affiliated purchasers," and any broker-dealer or other person who participates in such distribution may be subject to Regulation M under the Exchange Act until his or its participation in that distribution is completed. A "distribution" is defined in Rule 101 of Regulation M as an offering of securities "that is distinguished from ordinary trading transactions by the magnitude of the offering and the presence of special selling efforts and selling methods." Regulation M makes it unlawful for any person who is participating in a distribution to bid for or purchase stock of the same class as is the subject of the distribution.

LEGAL MATTERS

The validity of the shares offered hereby will be passed by Holme Roberts & Owen LLP, Denver, Colorado.

38

EXPERTS

The financial statements of Simtek Corporation as of December 31, 2000 and for the years ended December 31, 2000 and December 31, 1999 included within this Prospectus have been so included in reliance on the report of Hein + Associates, LLP, independent auditors, given on the authority of said firm as experts in auditing and accounting.

39

AVAILABLE INFORMATION

We are subject to the information requirements of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Accordingly, we file reports, proxy statements and other information with the Securities and Exchange Commission. You may inspect our reports, proxy statements and other information without charge at the public reference facilities of the Commission's principal office at 450 Fifth Street, N.W., Washington, D.C. 20549 and at the Commission's regional offices at 500 West Madison Street, Suite 1400, Chicago, Illinois 60661 and 7 World Trade Center, Suite 1300, New York, NY 10048. You may also obtain copies there at the prescribed rates. You may obtain information on the operation of the Commission's public reference facilities by calling the Commission in the United States at 1-800-SEC-0330. The Commission also maintains a web site at <http://www.sec.gov> that contains reports, proxy and information statements and other information regarding registrants that file electronically with the Commission.

We have filed with the Commission, a registration statement on Form SB-2 under the Securities Act of 1933, as amended (the "Securities Act"), with respect to the common stock we are offering (the "registration statement"). This prospectus does not contain all of the information set forth in the registration statement and the exhibits and schedules thereto. For further information about us and the common stock offered, you should refer to the registration statement, including the exhibits and schedules thereto, which may be inspected at, and copies thereof may be obtained at prescribed rates from, the public reference facilities of the Commission at the addresses set forth above.

INDEPENDENT AUDITOR'S REPORT

Board of Directors and Shareholders
Simtek Corporation
Colorado Springs, Colorado

We have audited the accompanying consolidated balance sheet of Simtek Corporation and subsidiary as of December 31, 2000 and the related statements of operations, changes in shareholders' equity and cash flows for each of the years in the two-year period ended December 31, 2000. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Simtek Corporation

Edgar Filing: SIMTEK CORP - Form SB-2/A

as of December 31, 2000, and the results of their operations and their cash flows for each of the years in the two-year period ended December 31, 2000, in conformity with general accepted accounting principles.

F-7

SIMTEK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. NATURE OF BUSINESS AND SIGNIFICANT ACCOUNTING POLICIES:

Edgar Filing: SIMTEK CORP - Form SB-2/A

NATURE OF BUSINESS OPERATIONS - Simtek Corporation (the "Company") designs, develops, markets and subcontracts the production of high performance nonvolatile semiconductor memories and programmed semiconductor logic products. The Company's operations have concentrated on the design and development of the 256 kilobit, 64 kilobit, and 16 kilobit nonvolatile semiconductor memory product families and associated products and technologies as well as the development of sources of supply and distribution channels. The Company also provides electronics engineering research and development contracts.

CONSOLIDATION POLICY - The accompanying consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary Q-DOT. The Company holds 1% interest in Q-DOT Acoustics, LLC (QDA) but has effective control over it due to an operating agreement which gives the Company control of all operational decisions. In addition, all losses of QDA are allocated to the company and net profits are allocated first to the Company to the extent of any previous allocations of losses. Any additional profits of QDA are allocated prorata based on percentage of ownership. The other major shareholders of QDA are minor shareholders of the Company. QDA is accounted for by the equity method of accounting.

REVENUE RECOGNITION SEMICONDUCTOR PRODUCTS - Product sales revenue is recognized when a valid purchase order has been received and the products are shipped to customers, including distributors. Customers receive a one-year product warranty and sales to distributors are subject to a limited product exchange program and product pricing protection in the event of changes in the Company's product price. The Company provides a reserve for possible product returns, price changes and warranty costs at the time the sale is recognized.

REVENUE RECOGNITION GOVERNMENT CONTRACTS - Revenues from cost-plus-fee contracts are recognized on the basis of costs incurred during the period plus the fee earned. Revenues from fixed-price contracts are recognized on the percentage-of-completion method. The percentage-of-completion is measured by the total costs incurred to date to estimated total costs for each contract. This method is used because management considers costs incurred to be the best available measure of progress on these contracts. Because of inherent uncertainties in estimating costs, it is reasonably possible that the estimates used will change within the near term.

CONTRACT REVENUES AND RELATED COSTS - Substantially all of Q-DOT revenues result from contract services performed for the various agencies of United States Government (the "Government") under a variety of contracts and subcontracts, some of which provide for reimbursement of costs-plus-fees, and others which are fixed-price. The majority of the contracts are for services performed in Colorado. For some services rendered on Government contracts which the time between providing the services and the final cash realization from the sale of such services may extend two or more years.

Costs on contracts with the government (including allocable indirect costs) are subject to audit and adjustment by negotiations between the Company and Government representatives. Costs submitted for reimbursement are subject to Government audits for compliance with government costs accounting

F-8

SIMTEK CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Edgar Filing: SIMTEK CORP - Form SB-2/A

standards, federal acquisitions regulations and other contract terms. Negotiations for all of the years through March 31, 1997 have been completed without any material adjustments. Management does not believe the results of the March 31, 1998, March 31, 1999, March 31, 2000 and December 31, 2000 Government audits and subsequent negotiations will have a material effect on the accompanying financial statements.

Direct costs of contracts include all direct labor, supplies, and equipment costs. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are determined. Changes in job performance, job conditions, and estimated profitability and final contract settlements may result in revisions to costs and income and are recognized in the period in which the revisions are determined.

At the time a loss on a contract becomes known, the entire amount of the estimated loss on both short and long-term contracts is accrued.

CASH AND CASH EQUIVALENTS - The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents. As of December 31, 2000, substantially all of the Company's cash and cash equivalents were held by a single bank, of which approximately \$2,894,630 was in excess of Federally insured amounts.

INVENTORY - The Company records inventory using the lower of cost (first-in, first-out) or market. Inventory at December 31, 2000 includes:

Raw materials	\$ 177,947
Work in process	872,948
Finished goods	176,398

	1,227,293
Less reserves	(96,664)

	\$1,130,629
	=====

DEPRECIATION - Equipment and furniture are recorded at cost. Depreciation is provided over the assets' estimated useful lives of three to seven years using the straight-line and accelerated methods. The cost and accumulated depreciation of furniture and equipment sold or otherwise disposed of are removed from the accounts and the resulting gain or loss is included in operations. Maintenance and repairs are charged to operations as incurred and betterments are capitalized.

RESEARCH AND DEVELOPMENT COSTS - Research and development costs are charged to operations in the period incurred.

ADVERTISING - The Company incurs advertising expense in connection with the marketing of its product. Advertising costs are expensed as advertising takes place. Advertising expense was \$87,672 and \$94,936 in 2000 and 1999, respectively.

LOSS PER SHARE - The loss per share is presented in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 128, Earnings Per Share. SFAS No. 128 replaced the presentation of primary and

Edgar Filing: SIMTEK CORP - Form SB-2/A

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

fully diluted earnings (loss) per share (EPS) with a presentation of basic EPS and diluted EPS. Basic EPS is calculated by dividing the income or loss available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. As the Company incurred losses in 1999 and 2000, all common stock equivalents would be considered anti-dilutive. For purposes of calculating diluted EPS, 2,817,722 and 1,337,750 options for 2000 and 1999, respectively, were excluded from diluted EPS as they had an anti-dilutive effect. The convertible debentures also had an anti-dilutive effect on 1999 and were, therefore, excluded from the computation of diluted EPS.

ACCOUNTING ESTIMATES - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and the accompanying notes. The actual results could differ from those estimates. The Company's financial statements are based upon a number of estimates, including the allowance for doubtful accounts, technological obsolescence of inventories, the estimated useful lives selected for property and equipment, sales returns, warranty reserve, percentage of completion on projects in process at year-end, and the valuation allowance on the deferred tax assets. Due to the uncertainties inherent in the estimation process, it is at least reasonably possible that the estimates for these items could be further revised in the near term and such revisions could be material.

FINANCIAL INSTRUMENTS - The estimated fair values for financial instruments are determined at discrete points in time based on relevant market information. These estimates involve uncertainties and cannot be determined with precision. The carrying amounts of the accounts receivable, accounts payable and accrued liabilities approximate fair value because of the short-term maturities of these instruments. The fair value of notes payable approximates their carrying value as generally their interest rates reflect the Company's current effective annual borrowing rate.

CONCENTRATION OF CREDIT RISK - Financial instruments that potentially subject the Company to significant considerations of credit risk consist primarily of accounts receivable. The Company has no significant off-balance sheet concentrations of credit risk. Accounts receivable are typically unsecured and are derived from transactions with and from customers located in the United States.

IMPAIRMENT OF LONG-LIVED ASSETS - In the event that facts and circumstances indicate that the cost of assets or other assets may be impaired, an evaluation of recoverability would be performed. If an evaluation is required, the estimated future undiscounted cash flows associated with the asset would be compared to the asset's carrying amount to determine if a write-down to market value or discounted cash flow value is required.

STOCK-BASED COMPENSATION - As permitted under the SFAS No. 123, Accounting for Stock-Based Compensation, the Company accounts for its stock-based compensation in accordance with the provisions of Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees. As such, compensation expense is recorded on the date of grant if the current market price of the underlying stock exceeds the exercise price. Certain pro forma net income and EPS disclosures for employee stock option grants

SIMTEK CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

are also included in the notes to the financial statements as if the fair value method as defined in SFAS No. 123 had been applied. Transactions in equity instruments with non-employees for goods or services are accounted for by the fair value method. In fiscal 2000, the Company adopted the Financial Accounting Standards Board Interpretation No. 44 which requires that outside directors be considered employees for purposes of stock option accounting, if the Company is accounting for its employee stock-based compensation in accordance with APB 25. It also affects modifications to fixed stock options or awards that effects the life, exercise price, or the number of shares to be issued. The adoption of this interpretation did not have a material effect on the Company's consolidated financial statements.

INCOME TAXES - The Company accounts for income taxes under the liability method of SFAS No. 109, whereby current and deferred tax assets and liabilities are determined based on tax rates and laws enacted as of the balance sheet date. Deferred tax expense represents the change in the deferred tax asset/liability balance. Valuation allowances are recorded for deferred tax assets that are not expected to be realized.

BUSINESS SEGMENTS - The Company has adopted Statement of Accounting Standards No. 131, Disclosures About Segments of an Enterprise and Related Information ("SFAS 131"), which established standards for the way companies report information about their operating segments. Prior period amounts have been restated to conform to the requirements of this new statement.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS - SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, was issued in June 1998. This statement establishes accounting and reporting standards for derivative instruments and for hedging activities. It requires that an entity recognize all derivatives as either assets or liabilities in the statement of financial position and measure those instruments at fair value. This statement is effective for the Company's financial statements for the year ended December 31, 2001 and the adoption of this standard is not expected to have a material effect on the Company's financial statements.

In December 1999, the Securities and Exchange Commission (SEC) released Staff Accounting Bulletin (SAB) 101, Revenue Recognition in Financial Statements. SAB 101 establishes guidelines in applying generally accepted accounting principles to the recognition of revenue in financial statements based on the following four criteria; persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the seller's price to the buyer is fixed or determinable, and collectibility is reasonably assured. SAB 101, as amended, was effective no later than the fourth fiscal quarter of the Company's fiscal year ending year 2000. The adoption of SAB 101 did not have a material effect on its financial position or result of operations.

2. ACQUISITIONS:

On May 9, 2000, Simtek Corporation acquired 100% of the outstanding stock of Integrated Logic Systems Incorporated (Integrated Logic) which designs

Edgar Filing: SIMTEK CORP - Form SB-2/A

and sells metal gate array integrated circuits in Colorado Springs, Colorado for common stock (3,000,000 shares) with a market value at the date of issuance of \$3.75 million. The acquisition was accounted for as a pooling of interests, and the results of the Integrated Logic business have been combined with those of Simtek Corporation, as if the two businesses had been merged throughout the periods presented.

F-11

SIMTEK CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following is Integrated Logic's operating results for the period from January 1, 2000 to May 9, 2000 which has been included in the Company's results of operations for the year ending December 31, 2000:

Revenue	\$ 279,585
Expenses	(233,763)

Net	\$ 45,822
	=====

On July 31, 2000, Simtek Corporation acquired 100% of the outstanding stock of Macrotech Semiconductor, Inc. (Macrotech) which is involved in the design, development and production of gate array integrated circuits and related services in San Jose, California for common stock (1,250,000 shares) with a market value at the date of issuance of \$1.76 million. The acquisition was accounted for as a pooling of interests, and the results of the Macrotech business have been combined with those of Simtek Corporation, as if the two businesses had been merged throughout the periods presented.

The following is Macrotech's operating results for the period from January 1, 2000 to July 31, 2000 which has been included in the Company's results of operations for the year ending December 31, 2000:

Revenue	\$ 291,835
Expenses	(248,508)

Net	\$ 43,327
	=====

On March 13, 2001, the Company acquired Q-DOT in exchange for approximately 5,172,000 shares of our Common Stock. Q-DOT specializes in advanced technology research and development for data acquisition, signal processing, imaging and data communications. Q-DOT will be operated as a wholly owned subsidiary of Simtek for its government contract research and development operations. The acquisition has been accounted for as a pooling of interest, and the results of Q-DOT have been consolidated with those of Simtek as if the two businesses had been merged throughout the periods presented.

Q-DOT had a March 31, fiscal year-end and, accordingly, the Q-DOT statements of operations for the year ended March 31, 2000 have been combined with the Company's statements of operations for the fiscal year ended December 31, 1999. In order to conform Q-DOT's March 31 year-end to the Company's December 31, year-end, the consolidated statement of stockholders' equity was adjusted for the \$136,929 for the operations from January 1, 2000 to March 31, 2000, which are included in the consolidated

Edgar Filing: SIMTEK CORP - Form SB-2/A

statements of operations in both the years ended December 31, 1999 and 2000. The following is a summary of operating results for that period:

Revenue	\$ 923,632
Expenses	786,703

Net income	\$ 136,929
	=====

Separate revenues and net income of the Company, Integrated Logic Systems, Macrotech Semiconductors, Inc. and Q-DOT Group, Inc. are presented in the following table:

F-12

SIMTEK CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

	2000	1999
	----	----

3. EQUIPMENT AND FURNITURE:

Equipment and furniture at December 31, 2000 consists of the following:

Leased software under capital leases	\$ 255,573
Research and development equipment	1,622,860
Computer equipment and software	1,808,613
Office furniture	248,709
Other equipment	135,644

	4,071,399
Less accumulated depreciation and amortization	(3,183,103)

Edgar Filing: SIMTEK CORP - Form SB-2/A

\$ 888,296
=====

The cost of equipment and furniture acquired for research and development activities that has alternative future use is capitalized and depreciated over its estimated useful life.

Depreciation and amortization expense of \$430,962 and \$391,718 was charged to operations for the years ended December 31, 2000 and 1999, respectively. Included in the amortization expense for 2000 and 1999 was \$51,120 and \$17,040, respectively, of amortization of software under capital leases. At December 31, 2000, accumulated amortization for software under capital leases was \$68,160.

4. REVOLVING LINE-OF-CREDIT AND LETTER-OF-CREDIT:

As of December 31, 2000, the Company had a \$250,000 revolving line-of-credit (LOC), a reduction of \$100,000 since December 31, 1999. The

F-13

SIMTEK CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

LOC bears interest at prime plus .75% (9.5% at December 31, 2000) and matures in March 2001. At December 31, 2000, the Company had no balance outstanding. As of December 31, 2000, the Company had a second revolving bank line of credit that expires February 1, 2001. At December 31, 2000, the Company had \$84,050 outstanding against this line of credit. Interest is payable monthly and accrues at 10.25% annually.

The Company also has a note payable of \$34,809 with the bank that bears interest at prime plus 1%. The note is payable in monthly installments of \$2,083, plus interest, through June 30, 2002. Future payments on this note payable are as follows: 2001 - \$24,996; 2002 - \$9,813.

Borrowings outstanding under these loan agreements are collateralized by all of the Company's assets. The Company has certain covenants in connection with these loans. The Company was not in compliance at December 31, 2000 and 1999 with certain covenants. Therefore, all bank borrowings are classified as current, as the bank could demand repayment if the non compliance is not cured. Subsequent to year end these notes were paid off.

Interest Expense for fiscal 2000 and 1999 was \$77,234 and \$172,424, respectively.

The Company has a letter of credit arrangement with one of the Company's suppliers which requires the Company to maintain a \$300,000 certificate of deposit as collateral, which is reflected as restricted cash.

5. CONVERTIBLE DEBENTURES:

During June 1998, the Company received proceeds of \$1,500,000 from the

Edgar Filing: SIMTEK CORP - Form SB-2/A

issuance of convertible debentures (the "Debentures"). The Debentures were convertible into shares of common stock of the Company. After a one-time conversion price adjustment calculated pursuant to the original agreement, the debentures conversion price changed from \$.35 per share to \$.195 per share in May 1999. In February 2000, the entire \$1,500,000 of convertible debt was converted into 7,692,308 shares of common stock of the Company at the conversion rate of \$.195 per share.

6. COMMITMENTS:

OFFICES LEASES - The Company leases office space under a lease, which expires on December 31, 2001. Monthly lease payments are approximately \$12,000 (not including CAM charges). The Company has moved where monthly lease payments will be approximately \$14,000. The new lease agreement effective March 1, 2001 to February 28, 2008 requires the new landlord to begin paying all costs related to the old location starting on March 1, 2001.

Through the acquisition of Q-DOT, the Company has non-cancelable long-term lease agreements for office space, office furnishings and equipment that expire at various dates through April 2005. A facility lease and the equipment leases contain an option to extend the leases for an additional one-year period.

The Company leases furniture, equipment, and its office under operating leases, which expire over the next seven years.

F-14

SIMTEK CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Future minimum lease payments under the equipment, furniture and office leases described above are approximately as follows:

Year	

2001	\$ 384,262
2002	328,368
2003	342,701
2004	354,125
2005 & After	715,719

	\$2,125,175
	=====

Office rent and equipment lease expense totaled \$733,645 and \$641,693 for the years ended December 31, 2000 and 1999, respectively.

In addition, the Company leases research and development software under a capital lease, which will expire over the next five years. At December 31, 2000, future minimum lease payments under the lease described above is

Edgar Filing: SIMTEK CORP - Form SB-2/A

approximately as follows:

Year -----	
2001	\$ 63,888
2002	63,888
2003	63,888
2004	47,916

Total net minimum lease payments	239,580
Less amount representing interest	(38,566)

Present value of net minimum lease payments	\$ 201,014
	=====

ACCRUED SALARY - Due to limited working capital of the Company, the Company's former CFO agreed with the Company's Board of Directors to defer his salary from April 1, 1994 through December 31, 1996. As of December 31, 2000, a total of \$210,000 was accrued and unpaid.

7. SHAREHOLDERS' EQUITY:

In 1999, the shareholders' of Macrotech, which was acquired by Simtek in 2000 and accounted for as a pooling of interest, contributed \$70,000 in services and paid for \$132,000 of Marcotech's expenses. In 2000, shareholders' of Macrotech contributed \$16,103 in services prior to the acquisition.

In February and March 2000, Renaissance Capital Group of Dallas, Texas ("Renaissance") converted the \$1,500,000 debenture established in June 1998 into 7,692,308 shares of the Simtek Common Stock.

F-15

SIMTEK CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

During April, 2000, as significant shareholder of the Company (ZMD) converted \$130,153 liability into 551,964 shares of common stock of the Company.

On May 9, 2000, the Company acquired Integrated Logic. The Company issued 3,000,000 shares of its common stock in exchange for all outstanding shares of all classes of Integrated Logic stock. Integrated Logic designs and sells programmed semiconductor logic products. The Company purchased approximately \$30,000 of product from Integrated Logic in the year preceding the acquisition. The acquisition was accounted for as a pooling of interest, and the results of Integrated Logic have been consolidated with the Company's, as if the two had been merged throughout the periods presented.

Edgar Filing: SIMTEK CORP - Form SB-2/A

On June 16, 2000, the Company acquired 1,875,000 shares of the common stock of WebGear, Inc., in return for 1,250,000 shares of Simtek's common stock. On September 29, 2000, the Company purchased incomplete research and development, patents and certain trademarks from WebGear, Inc. The original contract price for the incomplete research and development totaled the 1,875,000 shares of WebGear, Inc. stock plus 3,400,000 shares of our common stock of which 500,000 were held in escrow based on WebGear, Inc. fulfilling all obligations under the contract. In December 2000, WebGear, Inc. defaulted on one condition of the contract, thus forcing them to relinquish the 500,000 escrow shares of Simtek's common stock which reduced the shares issued to 2,900,000 of our common stock.

On July 31, 2000, the Company acquired Macrotech. The Company issued 1,250,000 shares of our common stock in exchange for all outstanding shares of all classes of Macrotech stock. Macrotech designs and sells programmed semiconductor logic products, which are an extension of the programmed semiconductor logic products that Integrated Logic manufactures. The acquisition was accounted for as a pooling of interest, and the results of Macrotech have been consolidated with Simtek's, as if the two had been merged throughout the periods presented.

On September 14, 2000, the Company entered into a one-year contract with two investment bankers, E.B.M. Associates, Inc. and World Trade Partners. Each company has received 500,000 shares of common stock, which were fully vested upon issuance. Both companies will assist the Company in broadening our financial market presence and establishing new relationships within the industry, investment community and financial media, by arranging meetings for our management with industry analysts, presenting company profiles to analysts and brokerage firms, mailings and constant personal communication with investors. E.B.M. Associates Inc. supports these activities primarily in retail investment markets, while World Trade Partners supports these activities primarily in institutional markets. E.B.M. Associates and World Trade Partners cooperate to coordinate their activities. On September 14, 2000, the closing share price for the Company's common stock was \$ 1.0312 per share and accordingly \$1,031,000 was assigned to prepaid investor relations. The cost associated with this transaction is being amortized over the life of the contract, of which approximately \$301,000 was expensed in 2000. The balance will be expensed over the term of the contract, ending in the third quarter of 2001.

On September 29, 2000, the Company purchased incomplete research and development, patents and certain trademarks from WebGear, Inc. The incomplete research and development consists of hardware and software

F-16

SIMTEK CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

developed for wireless data communications that needs to be modified for use with the Bluetooth technology standard. The Company originally issued 3,400,000 shares of our common stock which was amended in December 2000 to 2,900,000 by the return of 500,000 shares of common stock which were previously held in escrow. The Company also returned to WebGear, Inc. the 1,875,000 shares of WebGear, Inc. common stock that Simtek acquired from WebGear, Inc. on June 16, 2000. On September 29, 2000, the closing price of Simtek's common stock was \$0.8438 per share. The Company has valued the purchased patents and trademarks at \$125,000, which was capitalized and

Edgar Filing: SIMTEK CORP - Form SB-2/A

recorded as intangible assets. The Company has valued the incomplete research and development acquired from WebGear, Inc. at \$3,962,646, which was expensed immediately.

The discounted cash flow method was used to value the in-process technology acquired. A ten year life and a 27.5% discount rate were used for valuation. Calculations assumed revenues from products developed from the incomplete research and development would commence in late 2001 and that gross margins could be sustained at an average 50% over the projected product lives. The Company has assumed that operating costs would follow the normal percentage of revenue rates that the Company has established over the past five years.

WebGear developed a wireless networking product that operates with a 900 MHz narrow-band radio and uses protocol conversion techniques, firmware and software which are similar to the requirements to implement Bluetooth bridging technology. These will be used as base-line technologies to implement our integrated circuits, along with system architecture definitions developed by WebGear that include hardware descriptions and software protocol stacks. The Company estimates that we will invest approximately \$750,000 in further development costs to bring the first product to market. Samples are scheduled for the second half of 2001 with production within 3 months of sampling.

The Company estimates that the use of the purchased incomplete research and development accomplishes two-thirds of the product development required for sampling and management of the Company believes they have an 80% probability of technical success. There is technical risk as the Bluetooth industry standards organization is modifying and upgrading the specification and potential market delays as major Bluetooth product suppliers implement the standard in consumer products.

On March 13, 2001, the Company acquired Q-DOT in exchange for approximately 5,172,000 shares of Simtek's common stock. Q-DOT specializes in advanced technology research and development for data acquisition, signal processing, imaging and data communications. Q-DOT's projects have been supported by conventional government and commercial contracts in addition to government contracts sponsored by the Small Business Innovation Research (SBIR) contracts. Q-DOT will be operated as a wholly owned subsidiary of Simtek for its government contract research and development operations. The acquisition will be accounted for as a pooling of interest, and the results of Q-DOT will be consolidated with Simtek's as if they had been merged throughout the periods.

STOCK OPTION PLANS - The Company has approved two stock option plans that authorize an aggregate of 7,000,000 shares for stock options that may be granted to directors, employees, and consultants. Subsequently, on January 2, 2001, the Company authorized an additional 2,000,000 shares that can be issued under the stock option plans. The plans permit the issuance of incentive and non-statutory options and provide for a minimum exercise

F-17

SIMTEK CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

price equal to 100% of the fair market value of the Company's common stock on the date of grant. The maximum term of options granted under the plans

Edgar Filing: SIMTEK CORP - Form SB-2/A

is 10 years and options granted to employees expire three months after the termination of employment. None of the options may be exercised during the first six months of the option term. No options may be granted after 10 years from the adoption date of each plan. The Incentive Stock Option Plan was adopted in 1991, and the Non-Qualified Stock Option Plan was adopted in 1994.

Following is a summary of activity under these stock option plans for the years ended December 31, 2000 and 1999:

	2000		1999	
	Number of Shares	Weighted Average Exercise Price	Number of Shares	Wei Av Exe P
Outstanding, beginning of year	4,182,486	\$.20	4,137,736	\$
Granted	1,036,750	.97	296,750	
Expired	(81,000)	(.17)	(42,000)	
Exercised	(1,863,016)	(.16)	(210,000)	
Canceled	(137,498)	(.37)	-	
	-----		-----	
Outstanding, end of year	3,137,722	\$.47	4,182,486	\$

All options granted during 2000 and 1999, were at the current market price and the weighted average fair value was \$.77 and .14, respectively. At December 31, 2000, options for 2,226,979 shares were exercisable and of the remaining options of 456,583, 327,250, and 126,910 shares will become exercisable in 2001, 2002, and 2003, respectively.

If not previously exercised or forfeited, options outstanding at December 31, 2000, will expire as follows:

Year Ending December 31,	Number of Shares	Weighted Average Exercise Price
2001	387,100	\$.14
2002	498,986	.14
2003	190,000	.17
2004	459,608	.33
2005	398,085	.37
2006	225,471	.17
2007	978,472	1.01

	3,137,772	\$.47

Edgar Filing: SIMTEK CORP - Form SB-2/A

Incentive Stock Option Plan - At the time of the acquisition of Q-DOT, Q-DOT had an Incentive Stock Option Plan for the benefit of its employees. At December 31, 2000, Q-DOT had granted options to purchase 7,380 shares of its stock. At the time of closing, these options converted into 130,350 options to purchase Simtek Common Stock. These options have not been included in the above tables.

Pro Forma Stock-Based Compensation Disclosures - The Company applies APB Opinion 25 and related interpretations in accounting for its stock options and warrants which are granted to employees. Accordingly, no compensation cost has been recognized for grants of options and warrants to employees since the exercise prices were not less than the market value of the Company's common stock on the grant dates. Had compensation cost been determined based on the fair value at the grant dates for awards under those plans consistent with the method of SFAS No. 123, the Company's net income and EPS would have been reduced to the pro forma amounts indicated below.

	Year Ended December 31,	
	2000	1999
Net loss applicable to common shareholders:		
As reported	\$ (3,540,342)	\$ (149,470)
Pro forma	(3,765,937)	(272,062)
Net loss per common shareholders:		
As reported - basic and diluted	\$ (.07)	\$ -
Pro forma - basic and diluted	(.07)	-

The fair value of each option granted in 2000 and 1999 was estimated on the date of grant, using the Black-Scholes option-pricing model with the following:

	Options Granted During	
	2000	1999
Expected volatility	127.0%	119.7%
Risk-free interest rate	5.5%	5.5%
Expected dividends	-	-
Expected terms (in years)	4.0	4.0

OTHER - Preferred Stock may be issued in such series and preferences as determined by the Board of Directors.

Edgar Filing: SIMTEK CORP - Form SB-2/A

8. SIGNIFICANT CONCENTRATION OF CREDIT RISK, MAJOR CUSTOMERS, AND OTHER RISKS

 AND UNCERTAINTIES:

Sales by location for the ended December 31, 2000 and 1999 were as follows (as a percentage of sales):

	2000	1999
	----	----
United States	46%	63%
Europe	14%	11%
Far East	34%	25%
All Others	6%	1%
	----	----
Total	100%	100%

Sales from government contracts accounted for approximately 15% and 33% of total sales for the years ended December 31, 2000 and 1999, respectively. Sales from our military products accounted for approximately 12% and 18% of total sales for the years ended December 31, 2000 and 1999, respectively.

Sales to unaffiliated customers which represent 10% or more of the Company's sales for the years ended December 31, 2000 and 1999 were as follows (as a percentage of sales):

Customer	2000	1999
-----	-----	-----
A	18%	31%
B	-	13%
C	14%	-
D	10%	-
E	-	12%

At December 31, 2000, the Company had gross trade receivables totaling \$898,020 due from the above three customers.

In 2000 and 1999, the Company purchased all of its memory wafers, based on 0.8 micron technology from a single supplier located in Singapore. Approximately 89% and 96% of the Company's memory sales for 2000 and 1999, respectively, were from finished units produced from these wafers. The Company had an agreement with this supplier to provide wafers, which expired in September 1998. This agreement has not been extended or terminated, however, this supplier still provides wafers to the Company. In addition, the Company purchased all of its logic wafers from two suppliers located in Singapore and Taiwan. Approximately 11% and 9% of its logic sales in 2000 and 1999, respectively, were from finished units produced from these wafers. The Company does not have an agreement with either supplier, however, the Company has not seen any disruption in wafer deliveries. In 1999, the Company also purchased finished units from ZMD for

Edgar Filing: SIMTEK CORP - Form SB-2/A

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

\$22,480, and sales from these products accounted for approximately 4% of the Company's sales in 1999. Any disruptions in the Company's relationships with these suppliers could have an adverse impact on the Company's operating results. Assuming an alternate manufacturer of the Company's products could be procured, management believes there could be significant delays in manufacturing while the manufacturer incorporates the Company's products and processes.

9. TAXES:

Under SFAS No. 109, deferred taxes result from temporary differences between the financial statement carrying amounts and the tax bases of assets and liabilities. The components of deferred taxes are as follows:

	Deferred Tax Assets (Liability) -----
Current:	
Allowance for doubtful accounts	\$ 3,000
Inventory reserve	36,000
Accrued expenses	276,000

Net current deferred tax before valuation allowance	315,000
Valuation allowance	(315,000)

Total current deferred tax	\$ - =====
 Non-Current:	
Property and equipment	\$ 205,000
Incomplete research and development	1,431,000
Net operating losses	10,126,000
R&D credit carryforward	1,200,000
AMT credit	8,000

Net non-current deferred tax asset before valuation allowance	12,970,000
Valuation allowance	(12,970,000)

Total non-current deferred tax asset	\$ - =====

The net current and non-current deferred tax assets have a 100% valuation allowance resulting from the inability to predict sufficient future taxable income to utilize the assets. The valuation allowance for 2000 increased \$91,000 and decreased \$219,000 in 1999.

At December 31, 2000, the Company has approximately \$27,000,000 available in net operating loss carryforwards which begin to expire from 2004 to 2015. As a result of certain non-qualified stock options which have been exercised, approximately \$3,200,000 of the net operating loss carryforward will be charged to "paid in capital," when, and if, the losses are utilized. Also, a substantial portion of the net operating loss may be subject to Internal Revenue Code Section 382 limitations.

Edgar Filing: SIMTEK CORP - Form SB-2/A

SIMTEK CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Total income tax expense for 2000 and 1999 differed from the amounts computed by applying the U.S. Federal statutory tax rates to pre-tax income as follows:

	1999	1
	-----	---
Statutory rate	(34.0)%	(3
State income taxes, net of Federal income tax benefit	(3.3)%	(
Increase (reduction) in valuation allowance related to of net operating loss carryforwards and change in temporary differences	37.3%	3
	-----	---
	\$ -	\$
	=====	===

10. BUSINESS SEGMENTS

The Company has two reportable segments. One segment designs and produces semiconductor devices for sale into the semiconductor market. The second segment specializes in advanced technology research and development for data acquisition, signal processing, imaging and data communications that is supported by government and commercial contracts. Although both segments are managed as part of an integrated enterprise, they are reported herein in a manner consistent with the internal reports prepared for management.

Transactions between reportable segments are recorded at cost. Substantially all operating expenses are identified per each segment. Substantially all of the Company's assets are located in the United States of America.

(Unaudited)

1. SIGNIFICANT ACCOUNTING POLICIES:

The financial statements included herein are presented in accordance with the requirements of Form 10-QSB and consequently do not include all of the disclosures normally made in the registrant's annual Form 10-KSB filing. These financial statements should be read in conjunction with the financial statements and notes thereto included on page F-3 To F-23.

In the opinion of management, the unaudited financial statements reflect all adjustments of a normal recurring nature necessary to present a fair statement of the results of operations for the respective interim periods. The year-end balance sheet data was derived from audited financial statements, but does not include all disclosures required by generally accepted accounting principles. Results of operations for the interim periods are not necessarily indicative of the results of operations for the full fiscal year.

2. LINE OF CREDIT:

In April 2001, Simtek Corporation ("Simtek" or the "Company") renewed its revolving line of credit for another year in the amount of \$250,000.

3. GEOGRAPHIC CONCENTRATION:

Sales by location for the three months ended March 31, 2001 and 2000 were as follows (as a percentage of sales):

PART II INFORMATION NOT REQUIRED IN PROSPECTUS

Capitalized terms used but not otherwise defined in Part II are used as defined in the prospectus contained in this registration statement.

ITEM 24. INDEMNIFICATION OF DIRECTORS AND OFFICERS

Article Six of our Articles of Incorporation requires us to indemnify, to the fullest extent authorized by applicable law, any person who is or is threatened to be made a party to any civil, criminal, administrative, investigative, or other action or proceeding instituted or threatened by reason of the fact that he is or was our director or officer or is or was serving at our request as a director or officer of another corporation, partnership, joint venture, trust or other enterprise.

Edgar Filing: SIMTEK CORP - Form SB-2/A

Article Five of our Articles of Incorporation provides that, to the fullest extent permitted by the Colorado Corporation Code, our directors shall not be liable to us or any of our shareholders for damages caused by a breach of a fiduciary duty by such director.

The above discussion of the Company's Articles of Incorporation is intended to be only a summary and is qualified in its entirety by the full test.

ITEM 25. OTHER EXPENSES OF ISSUANCE AND DISTRIBUTION

The following table sets forth the expenses (other than underwriting discounts and commissions) expected to be incurred in connection with the issuance and distribution of the securities registered hereby, all of which expenses, except for the Commission registration fee are estimated:

Securities and Exchange Commission registration fee.....	\$ 268
Legal fees and expenses.....	3,000
Accounting fees.....	2,500
Miscellaneous.....	2,500

Total.....	\$8,268
	=====

The above expenses will be borne by us.

ITEM 26. RECENT SALES OF UNREGISTERED SECURITIES

In May 2000, we issued 3,000,000 shares of our common stock to Hugh Norman Chapman as consideration for our acquisition of 100% of the issued and outstanding stock of Integrated Logic, one of the companies that house our semiconductor logic business. No advertising or general solicitation occurred. We only offered to issue, and did issue, stock to one person--Mr. Chapman. Mr. Chapman had substantial business dealings with us prior to this transaction. Mr. Chapman received or had access to the same type of information about us as a registration statement would disclose. We reasonably believed that Mr. Chapman was financially sophisticated.

In June 2000, we issued 1,250,000 shares of our common stock to WebGear, as consideration for our acquisition of 1,250,000 shares of WebGear common stock. In September, we issued 2,900,000 shares of our common stock to WebGear as consideration, together with 1,250,000 shares of WebGear common stock, for our acquisition of intellectual property assets of WebGear. These assets primarily relate to the wireless data communications industry. No advertising or general solicitation occurred with respect to these transactions involving WebGear. WebGear received or had access to the same type of information about us as a registration statement would disclose. WebGear was financially sophisticated and an "accredited investor."

II-1

In July 2000, we issued 625,000 shares of our common stock to each of Jaskarn Johal and Kashmira S. Johal as consideration for our acquisition of 100% of the stock of Macrotech, one of the companies that house our semiconductor logic business. No advertising or general solicitation occurred with respect to the Macrotech transaction. We only offered to issue, and did issue, stock to Messrs. Johal and Johal. Messrs. Johal had substantial business dealings with us

Edgar Filing: SIMTEK CORP - Form SB-2/A

prior to this transaction. Messrs. Johal received or had access to the same type of information about us as a registration statement would disclose. We reasonably believed that Messrs. Johal were financially sophisticated.

In September 2000, we issued 500,000 shares of our common stock each to both E.B.M. and WTP in consideration for their agreement to provide financial advisory services. No advertising or general solicitation occurred with respect to our issuance of stock to E.B.M. or WTP. We only offered to issue, and did issue, stock to E.B.M. and WTP. E.B.M. and WTP received or had access to the same type of information about us as a registration statement would disclose. We reasonably believed that E.B.M. and WTP were financially sophisticated.

The issuances described above were deemed to be exempt from registration under the Securities Act of 1933, as amended (the "Act"), in reliance on Section 4(2) of the Act as transactions by an issuer not involving a public offering. With respect to our acquisition of Q-DOT, we issued stock in reliance upon Rule 506 of Regulation D.

ITEM 28. UNDERTAKINGS

Insofar as indemnification for liabilities arising under the Act may be permitted to directors, officers and controlling persons of Simtek pursuant to the foregoing provisions, or otherwise, Simtek has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable.

In the event that a claim for indemnification against such liabilities (other than the payment by Simtek of expenses incurred or paid by a director, officer or controlling person of Simtek in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, Simtek will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

Simtek will (1) file, during the period in which it offers or sells securities, a post-effective amendment to this registration statement to: (i) include any prospectus required by section 10(a)(3) of the Securities Act; (ii) reflect in the prospectus any facts or events which, individually or together, represent a fundamental change in the information in the registration statement (notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20% change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement); (2) include any additional or changed material information on the plan of distribution (for determining liability under the Securities Act, treat each post effective amendment as a new registration statement of the securities offered, and the offering of the securities at that time to be the initial bona fide offering), and (3) file a post-effective amendment to remove from registration any of the securities that remain unsold at the end of the offering.
