WASHINGTON, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OF
THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2010
Commission File Number: 0-28846

Centrue Financial Corporation
(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

36-3145350
(I.R.S. Employer Identification
Number)

7700 Bonhomme Avenue, St. Louis, Missouri 63105
(Address of principal executive offices, including zip code)

(314) 505-5500
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Exchange Class	Name of Each Exchange which Registered
Common Stock (\$1.00 par value)	The NASDAQ Stock Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer as defined in Rule 403 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15 (d) of the Exchange Act.

Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if

Edgar Filing: CENTRUE FINANCIAL CORP - Form 10-K

any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="radio"/>	Accelerated filer	<input type="radio"/>
Non-accelerated filer	<input type="radio"/>	Smaller reporting company	<input checked="" type="radio"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b of the Exchange Act).
Yes No

As of March 1, 2011, the Registrant had issued and outstanding 6,048,405 shares of the Registrant's Common Stock. The aggregate market value of the voting stock held by non-affiliates of the Registrant as of June 30, 2010, the last business day of the Registrant's most recently completed second quarter, was \$7,368,130.*

* Based on the last reported price of \$2.00 of an actual transaction in the Registrant's Common Stock on June 30, 2010, and reports of beneficial ownership filed by directors and executive officers of the Registrant. Shares of Common Stock held by any executive officer or director of the Registrant have been excluded from the foregoing computation because such persons may be deemed to be affiliates; provided, however, such determination of shares owned by affiliates does not constitute an admission of affiliate status or beneficial interest in shares of the Registrant's Common Stock.

DOCUMENTS INCORPORATED BY REFERENCE

Certain portions of the Proxy Statement for the 2011 Annual Meeting of Stockholders (the "2011 Proxy Statement") are incorporated by reference into Part III of this Form 10-K.

As used in this report, the terms "we," "us," "our," "Centrue" and the "Company" mean Centrue Financial Corporation and subsidiary, unless the context indicates another meaning, and the term "Common Stock" means our common stock, par value \$1.00 per share.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

Item 1. Business

The Company

Centrue Financial Corporation

Centrue Financial Corporation (the “Company”) is a bank holding company incorporated in Delaware in 1982 for the purpose of becoming a holding company registered under the Bank Holding Company Act of 1956, as amended (the “Act”). The Company is a publicly traded banking company with assets of \$1.105 billion at year-end 2010 and is headquartered in St. Louis, Missouri. The Company provides a full range of banking services to individual and corporate customers extending from western and southern suburbs of the Chicago metropolitan area across Central Illinois down to metropolitan St. Louis area.

The Company operates one wholly owned subsidiary: Centrue Bank (the “Bank”), employing 291.5 full-time equivalent employees at December 31, 2010. The Company has responsibility for the overall conduct, direction, and performance of the Bank. The Company provides various services, establishes Company-wide policies and procedures, and provides other resources as needed, including capital.

Subsidiary

At December 31, 2010, the Bank had \$1.102 billion in total assets, \$934.1 million in total deposits, and twenty-eight offices (twenty-six full-service bank branches and two back-room sales support non-banking facilities) located in markets extending from the far western and southern suburbs of the Chicago metropolitan area across Central Illinois down to the metropolitan St. Louis area.

The Bank is engaged in commercial and retail banking and offers a broad range of lending, depository, and related financial services, including accepting deposits; commercial and industrial, consumer, and real estate lending and other banking services tailored for consumer, commercial and industrial, and public or governmental customers.

Competition

The Company’s market area is highly competitive with numerous commercial banks, savings and loan associations and credit unions. In addition, financial institutions, based in surrounding communities and in the southern and western metro area of Chicago and the suburban metro area of St. Louis, actively compete for customers within the Company’s market area. The Company also faces competition from finance companies, insurance companies, mortgage companies, securities brokerage firms, money market funds, loan production offices and other providers of financial services.

The Company competes for loans principally through the range and quality of the services it provides and through competitive interest rates and loan fees. The Company believes that its long-standing presence in the communities it serves and personal service philosophy enhance its ability to compete favorably in attracting and retaining individual and business customers. The Company actively solicits deposit-related customers and competes for deposits by offering customers personal attention, professional service and competitive interest rates.

Under the Gramm-Leach-Bliley Act of 1999 (the “GLB Act”), effective March 2000, securities firms and insurance companies that elect to become financial holding companies may acquire banks and other financial institutions. The Gramm-Leach-Bliley Act, and future action stemming from the Act, is expected to continue to significantly change the competitive environment in which the Company and the Bank conduct business. The financial services industry is also likely to become more competitive as further technological advances enable more companies to provide financial services. These technological advances may diminish the importance of depository institutions and other financial intermediaries in the transfer of funds between parties.

1.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

Supervision And Regulation

General

Financial institutions and their holding companies are extensively regulated under federal and state law. As a result, the growth and earnings performance of the Company can be affected not only by management decisions and general economic conditions, but also by the requirements of applicable state and federal statutes and regulations and the policies of various governmental regulatory authorities, including the Illinois Department of Financial and Professional Regulation (the “IDFPR”), the Board of Governors of the Federal Reserve System (the “Federal Reserve”), the Federal Deposit Insurance Corporation (the “FDIC”), the Internal Revenue Service, state taxing authorities, and the Securities and Exchange Commission (the “SEC”). The effect of applicable statutes, regulations and regulatory policies can be significant, and cannot be predicted with a high degree of certainty.

Federal and state laws and regulations generally applicable to financial institutions, such as the Company and the Bank, regulate, among other things, the scope of business, investments, reserves against deposits, capital levels relative to operations, the nature and amount of collateral for loans, the establishment of branches, mergers, consolidations and dividends. The system of supervision and regulation applicable to the Company and the Bank establishes a comprehensive framework for their respective operations and is intended primarily for the protection of the FDIC’s deposit insurance funds and the depositors, rather than the shareholders, of financial institutions.

The following is a summary of the material elements of the regulatory framework that applies to the Company and the Bank. It does not describe all of the statutes, regulations and regulatory policies that apply to the Company and the Bank, nor does it restate all of the requirements of the statutes, regulations and regulatory policies that are described. As such, the following is qualified in its entirety by reference to the applicable statutes, regulations and regulatory policies. Any change in applicable law, regulations or regulatory policies may have a material effect on the business of the Company and the Bank.

The Company

General. The Company, as the sole stockholder of the Bank, is a bank holding company. As a bank holding company, the Company is registered with, and is subject to regulation by, the Federal Reserve under the Bank Holding Company Act, as amended (the “BHCA”). In accordance with Federal Reserve policy, the Company is expected to act as a source of financial strength to the Bank and to commit resources to support the Bank in circumstances where the Company might not do so absent such policy. Under the BHCA, the Company is subject to periodic examination by the Federal Reserve and is required to file with the Federal Reserve periodic reports of operations and such additional information as the Federal Reserve may require. The Company is also subject to regulation by the IDFPR under the Illinois Bank Holding Company Act, as amended.

Investments and Activities. Under the BHCA, a bank holding company must obtain Federal Reserve approval before: (i) acquiring, directly or indirectly, ownership or control of any voting shares of another bank or bank holding company if, after the acquisition, it would own or control more than 5% of the shares of the other bank or bank holding company (unless it already owns or controls the majority of such shares); (ii) acquiring all or substantially all of the assets of another bank; or (iii) merging or consolidating with another bank holding company. Subject to certain conditions (including certain deposit concentration limits established by the BHCA), the Federal Reserve may allow a

bank holding company to acquire banks located in any state of the United States without regard to whether the acquisition is prohibited by the law of the state in which the target bank is located. In approving interstate acquisitions, however, the Federal Reserve is required to give effect to applicable state law limitations on the aggregate amount of deposits that may be held by the acquiring bank holding company and its insured depository institution affiliates in the state in which the target bank is located (provided that those limits do not discriminate against out-of-state depository institutions or their holding companies) and state laws which require that the target bank have been in existence for a minimum period of time (not to exceed five years) before being acquired by an out-of-state bank holding company.

2.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

The BHCA also generally prohibits the Company from acquiring direct or indirect ownership or control of more than 5% of the voting shares of any company which is not a bank and from engaging in any business other than that of banking, managing and controlling banks or furnishing services to banks and their subsidiaries. This general prohibition is subject to a number of exceptions. The principal exception allows bank holding companies to engage in, and to own shares of companies engaged in, certain businesses found by the Federal Reserve to be “so closely related to banking as to be a proper incident thereto.” Under current regulations of the Federal Reserve, the Company is permitted to engage in a variety of banking-related businesses, including the operation of a thrift, consumer finance or equipment leasing business, the operation of a computer service bureau (including software development), and the operation of mortgage banking and brokerage businesses. The BHCA generally does not place territorial restrictions on the domestic activities of non-bank subsidiaries of bank holding companies.

In November 1999, the GLB Act was signed into law. Under the GLB Act, bank holding companies that meet certain standards and elect to become “financial holding companies” are permitted to engage in a wider range of activities than those permitted for bank holding companies, including securities and insurance activities. Specifically, a bank holding company that elects to become a financial holding company may engage in any activity that the Federal Reserve Board, in consultation with the Secretary of the Treasury, determines is (i) financial in nature or incidental thereto, or (ii) complementary to any such financial-in-nature activity, provided that such complementary activity does not pose a substantial risk to the safety and soundness of depository institutions or the financial system generally. A bank holding company may elect to become a financial holding company only if each of its depository institution subsidiaries is well-capitalized, well-managed, and has a Community Reinvestment Act rating of “satisfactory” or better at their most recent examination.

The GLB Act specifies many activities that are financial in nature, including lending, exchanging, transferring, investing for others, or safeguarding money or securities; underwriting and selling insurance; providing financial, investment or economic advisory services; underwriting, dealing in, or making a market in securities; and those activities currently permitted for bank holding companies that are so closely related to banking or managing or controlling banks, as to be a proper incident thereto.

The GLB Act changed federal laws to facilitate affiliation between banks and entities engaged in securities and insurance activities. The law also established a system of functional regulation under which banking activities, securities activities, and insurance activities conducted by financial holding companies and their subsidiaries and affiliates will be separately regulated by banking, securities, and insurance regulators, respectively. The Company has no current plans to register as a financial holding company.

Federal law also prohibits any person or company from acquiring “control” of a bank or bank holding company without prior notice to the appropriate federal bank regulator. “Control” is defined in certain cases as the acquisition of 10% or more of the outstanding shares of a bank or bank holding company.

Capital Requirements. Bank holding companies are required to maintain minimum levels of capital in accordance with Federal Reserve capital adequacy guidelines. If capital falls below minimum guideline levels, a bank holding company, among other things, may be denied approval to acquire or establish additional banks or non-bank businesses.

The Federal Reserve's capital guidelines establish the following minimum regulatory capital requirements for bank holding companies: a risk-based requirement expressed as a percentage of total risk-weighted assets, and a leverage requirement expressed as a percentage of total assets. The risk-based requirement consists of a minimum ratio of total capital to total risk-weighted assets of 8%, at least one-half of which must be Tier 1 capital. The leverage requirement consists of a minimum ratio of Tier 1 capital to total assets of 3% for the most highly rated companies, with a minimum requirement of 4% for all others. For purposes of these capital standards, Tier 1 capital consists primarily of permanent stockholders' equity less intangible assets (other than certain mortgage servicing rights and purchased credit card relationships). Total capital consists primarily of Tier 1 capital plus certain other debt and equity instruments which do not qualify as Tier 1 capital and a portion of the company's allowance for loan and lease losses.

3.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

The risk-based and leverage standards described above are minimum requirements. Higher capital levels will be required if warranted by the particular circumstances or by the risk profiles of individual banking organizations. For example, the Federal Reserve's capital guidelines contemplate that additional capital may be required to take adequate account of, among other things, interest rate risk, or the risks posed by concentrations of credit, nontraditional activities or securities trading activities. Further, any banking organization experiencing or anticipating significant growth would be expected to maintain capital ratios, including tangible capital positions (i.e., Tier 1 capital less all intangible assets), well above the minimum levels.

As of December 31, 2010, the Company had regulatory capital as follows:

	Risk-Based Capital Ratio		Leverage Capital Ratio	
Company	9.35	%	5.08	%

The risk-based capital ratio and the leverage capital ratio were 1.35% and 1.08% respectively, in excess of the Federal Reserve's minimum requirements. See Note 18 in the Notes in Consolidated Financial Statements for further information.

Dividends. The Company is organized under the Delaware General Corporation Law (the "DGCL"). The DGCL allows the Company to pay dividends only out of its surplus (as defined and computed in accordance with the provisions of the DGCL) or if the Company has no such surplus, out of its net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year.

Additionally, the Federal Reserve has issued a policy statement with regard to the payment of cash dividends by bank holding companies. The policy statement provides that a bank holding company should not pay cash dividends which exceed its net income or which can only be funded in ways that weaken the bank holding company's financial health, such as by borrowing. The Federal Reserve also possesses enforcement powers over bank holding companies and their non-bank subsidiaries to prevent or remedy actions that represent unsafe or unsound practices or violations of applicable statutes and regulations. Among these powers is the ability to proscribe the payment of dividends by banks and bank holding companies.

As a result of the Company's issuance of Fixed Rate Cumulative Perpetual Preferred Stock, Series C (the "Preferred Shares") to the U. S. Department of Treasury (the "Treasury") pursuant to the Troubled Asset Relief Program's ("TARP") Capital Purchase Program ("CPP"), the Company is restricted in the payment of dividends and, without the Treasury's consent, may not declare or pay any dividend on the Company's common stock in excess of \$0.14 per share per quarter, as adjusted for any stock dividend or stock split. This restriction no longer applies on the earlier to occur of January 9, 2012 (the third anniversary of the issuance of the Preferred Shares to the Treasury) or the date on which the Company has redeemed all of the Preferred Shares issued or the date on which the Treasury has transferred all of the Preferred Shares to third parties not affiliated with the Treasury. In addition, as long as the Preferred Shares are outstanding, dividend payments are prohibited until all accrued and unpaid dividends are paid on such Preferred Shares, subject to certain limited exceptions. On August 10, 2009, the Company announced that it would defer scheduled dividend payments on the Preferred Shares.

4.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

Federal Securities Regulation. The Company's common stock is registered with the SEC under the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Consequently, the Company is subject to the information, proxy solicitation, insider trading and other restrictions and requirements of the SEC under the Exchange Act.

The SEC and the NASDAQ have adopted regulations and policies under the Sarbanes-Oxley Act of 2002 that will apply to the Company as a registered company under the Exchange Act and as a NASDAQ-traded company. The Sarbanes-Oxley Act of 2002 was enacted in response to public concerns regarding corporate accountability in connection with accounting scandals. The stated goals of the Sarbanes-Oxley Act are to increase corporate responsibility, to provide for enhanced penalties for accounting and auditing improprieties at publicly traded companies, and to protect investors by improving the accuracy and reliability of corporate disclosures pursuant to the securities laws. The Sarbanes-Oxley Act generally applies to all companies that file or are required to file periodic reports with the SEC, under the Exchange Act.

The Sarbanes-Oxley Act includes very specific additional disclosure requirements and new corporate governance rules requiring the SEC and securities exchanges to adopt extensive additional disclosure, corporate governance and other related rules, and mandates further studies of certain issues by the SEC. The Sarbanes-Oxley Act represents significant federal involvement in matters traditionally left to state regulatory systems, such as the regulation of the accounting profession, and to state corporate law, such as the relationship between a board of directors and management and between a board of directors and its committees. Sarbanes-Oxley section 404 requires significant oversight of a public company's internal control over the financial statements.

Recent Developments. The Emergency Economic Stabilization Act of 2008 ("EESA") was enacted on October 3, 2008. Pursuant to its authority under EESA, the Treasury created the TARP CPP under which the Treasury was authorized to invest in non-voting, senior preferred stock of U.S. banks and savings associations or their holding companies. The Company participated in the TARP CPP and on January 9, 2009, completed the sale of \$32.7 million in preferred shares to the Treasury. The Company issued the Preferred Shares (32,668 shares), with a \$1,000 per share liquidation preference, and a warrant to purchase up to 508,320 shares of the Company's common stock at an exercise price of \$9.64 per share (the "Warrant").

The Preferred Shares issued by the Company pay cumulative dividends of 5% a year for the first five years and 9% a year thereafter. Both the Preferred Shares and the Warrant are accounted for as components of regulatory Tier 1 capital. Among other restrictions, the securities purchase agreement between the Company and the Treasury limits the Company's ability to repurchase its stock and subjects the Company to certain executive compensation limitations. The terms of the Preferred Shares, as amended by the American Recovery and Reinvestment Act of 2009 ("ARRA"), provide that the Preferred Shares, may be redeemed by the Company, in whole or in part, upon approval of the Treasury and the Company's primary banking regulators. In addition, if dividends on the Preferred Shares are not paid in full for six dividend periods, the Treasury will have the right to elect two directors to the Company's Board of Directors. The Treasury's right to elect directors ends when full dividends have been paid for four consecutive dividend periods. As detailed in the Dividends section above, the Company has announced that it would defer scheduled dividend payments on the Preferred Shares.

ARRA was enacted on February 17, 2009. Among other things, ARRA sets forth additional limits on executive compensation at all financial institutions receiving federal funds under any program, including the TARP CPP, both

retroactively and prospectively. The executive compensation restrictions in ARRA include, among others: limits on compensation incentives, prohibitions on “Golden Parachute Payments” to certain employees, the establishment by publicly registered TARP CPP recipients of a board compensation committee comprised entirely of independent directors for the purpose of reviewing employee compensation plans, and the requirement of a non-binding vote on executive pay packages at each annual shareholder meeting until the government funds are repaid.

5.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

In June 2010, the Federal Reserve issued final guidance to ensure that incentive compensation arrangements at financial institutions take into account risk and are consistent with safe and sound practices. The guidance does not set forth any formulas or pay caps, but sets forth certain principles which companies would be required to follow with respect to certain employees and groups of employees that may expose the institution to material amounts of risk.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) became law on July 21, 2010. The Dodd-Frank Act constitutes one of the most significant efforts in recent history to comprehensively overhaul the financial services industry and will affect large and small financial institutions alike. While some of the provisions of the Dodd-Frank Act take effect immediately, many of the provisions have delayed effective dates and their implementation will require the issuance of numerous new regulations.

The Dodd-Frank Act deals with a wide range of regulatory issues including, but not limited to: mandating new capital requirements that would require certain bank holding companies to be subject to the same capital requirements as their depository institutions; eliminating (with certain exceptions) trust preferred securities; codifying the Federal Reserve’s Source of Strength doctrine; creating a Bureau of Consumer Financial Protection which will have the power to exercise broad regulatory, supervisory and enforcement authority concerning both existing and new consumer financial protection laws; permanently increasing federal deposit insurance protection to \$250,000 per depositor; extending the unlimited coverage for qualifying non-interest bearing transactional accounts until December 31, 2012; increasing the ratio of reserves to deposits minimum to 1.35 percent; assessing premiums for deposit insurance coverage on average consolidated total assets less average tangible equity, rather than on a deposit base; authorizing the assessment of examination fees; establishing new standards and restrictions on the origination of mortgages; permitting financial institutions to pay interest on business checking accounts; limiting interchange fees payable on debit card transactions; and implementing requirements on boards, corporate governance and executive compensation for public companies.

The complete impact of the Dodd-Frank Act is unknown since many of the substantive requirements will be contained in the many rules and regulations to be implemented. However, the Dodd-Frank Act will have significant and immediate effects on banks and bank holding companies in many areas.

The Bank

Centrue Bank

The Bank is an Illinois-chartered bank, the deposit accounts of which are insured by the FDIC. The Bank is also a member of the Federal Reserve System (“member bank”). As an Illinois-chartered, FDIC-insured member bank, the Bank is subject to the examination, supervision, reporting and enforcement requirements of the IDFP, as the chartering authority for Illinois banks, the Federal Reserve, as the primary federal regulator of member banks, and the FDIC, as administrator of deposit insurance.

Deposit Insurance. As an FDIC-insured institution, pursuant to a risk-based assessment system, the Bank is required to pay deposit insurance premium assessments to the Deposit Insurance Fund. The Dodd-Frank Act permanently raised the basic limit on deposit insurance coverage from \$100,000 to \$250,000 per depositor. In addition, in November 2010, pursuant to the Dodd-Frank Act, the FDIC issued a final rule to provide temporary unlimited deposit insurance coverage for non-interest bearing accounts from December 31, 2010 through December 31, 2012, at no additional

surcharge.

6.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

Under the FDIC's risk-based assessment regulations, there are four risk categories, and each insured institution is assigned to a risk category based on capital levels and supervisory ratings. Well-capitalized institutions with CAMELS composite ratings of 1 or 2 are placed in Risk Category I while other institutions are placed in Risk Categories II, III or IV depending on their capital levels and CAMELS composite ratings. The assessment rates may be changed by the FDIC as necessary to maintain the deposit insurance fund at the reserve ratio designated by the FDIC. The FDIC may set the reserve ratio annually at between 1.15% and 1.50% of insured deposits.

Due to a decrease in the reserve ratio of the deposit insurance fund, in October 2008, the FDIC established a restoration plan to restore the reserve ratio to at least 1.15% within five years (the FDIC has extended this time to eight years). The reserve ratio has now been increased to 1.35% by the Dodd-Frank Act. The FDIC has been directed to offset the effects of increased assessments on depository institutions with less than \$10 billion in assets. To achieve these levels, the FDIC is authorized by the Dodd-Frank Act to make special assessments and charge examination fees.

On December 16, 2008, the FDIC adopted and issued a final rule increasing the rates banks pay for deposit insurance uniformly by 7 basis points (annualized) effective January 1, 2009. Under the final rule, risk-based rates for the first quarter 2009 assessment ranged between 12 and 50 basis points (annualized). The 2009 first quarter assessment rates varied depending on an institution's risk category. On February 27, 2009, the FDIC adopted a final rule amending the way that the assessment system differentiates for risk and setting new assessment rates beginning with the second quarter of 2009. As of April 1, 2009, for the highest rated institutions, those in Risk Category I, the initial base assessment rate was between 12 and 16 basis points and for the lowest rated institutions, those in Risk Category IV, the initial base assessment rate was 45 basis points. The final rule modified the means to determine a Risk Category I institution's initial base assessment rate. It also provided for the following adjustments to an institution's assessment rate: (1) a decrease for long-term unsecured debt, including most senior and subordinated debt and, for small institutions, a portion of Tier 1 capital; (2) an increase for secured liabilities above a threshold amount; and (3) for institutions in risk categories other than Risk Category I, an increase for brokered deposits above a threshold amount. After applying these adjustments, for the highest rated institutions, those in Risk Category I, the total base assessment rate is between 7 and 24 basis points and for the lowest rated institutions, those in Risk Category IV, the total base assessment rate is between 40 and 77.5 basis points.

On May 22, 2009, the FDIC also imposed a special assessment of five basis points on each FDIC-insured depository institution's assets, minus its Tier 1 capital, as of June 30, 2009. The special assessment was collected on September 30, 2009, and the Bank paid an additional assessment of \$0.6 million.

On November 12, 2009, the FDIC adopted the final rule that required insured institutions to prepay on December 31, 2009, estimated quarterly risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011 and 2012. For purposes of calculating the prepayment amount, the institution's third quarter 2009 assessment base was increased quarterly at a five percent annual rates uniformly by three basis beginning in 2011. Based on the Bank's risk rating, no prepayment of these assessments was required.

As required by the Dodd-Frank Act, on February 7, 2011, the FDIC adopted a final rule that redefines its deposit insurance premium assessment base to be an insured depository institution's average consolidated total assets minus average tangible equity. In addition, the FDIC has revised its deposit insurance rate schedules as a consequence of the changes to the assessment base. The proposed rate schedule and other revisions become effective on April 1, 2011.

On November 21, 2008, the FDIC adopted final regulations implementing the Temporary Liquidity Guarantee Program (“TLGP”) pursuant to which depository institutions could elect to participate. Pursuant to the TLGP, the FDIC provides full FDIC deposit insurance coverage for non-interest bearing deposit transaction accounts regardless of dollar amount for an additional fee assessment by the FDIC (the “Transaction Account Guarantee”). These accounts are mainly payment-processing accounts, such as business payroll accounts. The Bank did not opt out of the Transaction Account Guarantee portion of the TGLP. The Transaction Account Guarantee was to expire on December 31, 2009, but was extended until December 31, 2010. The Dodd-Frank Act provides unlimited federal deposit insurance until January 1, 2013 for non-interest bearing demand transaction accounts at all insured depository institutions. There is no additional surcharge related to this coverage.

7.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

Also pursuant to the TLGP, the FDIC will guarantee, through the earlier of maturity or December 31, 2012, certain newly issued senior unsecured debt issued by participating institutions on or after October 14, 2008 and before October 31, 2009 (the “Debt Guarantee”). The Company and the Bank opted out of the Debt Guarantee portion of TLGP.

In 2006, the FDIC adopted a final rule allocating a one-time assessment credit among insured financial institutions. This credit may be used to offset deposit insurance assessments (not to include FICO assessments) beginning in 2007. The Company began taking advantage of this credit in 2007 and realized benefits from this credit thru the second quarter of 2009.

The FDIC may terminate the deposit insurance of any insured depository institution if the FDIC determines, after a hearing, that the institution (i) has engaged or is engaging in unsafe or unsound practices, (ii) is in an unsafe or unsound condition to continue operations or (iii) has violated any applicable law, regulation, order, or any condition imposed in writing by, or written agreement with, the FDIC. The FDIC may also suspend deposit insurance temporarily during the hearing process for a permanent termination of insurance, if the institution has no tangible capital. Management of the Company is not aware of any activity or condition that could result in termination of the deposit insurance of the Bank.

FICO Assessments. FDIC insured institutions are also subject to assessments to cover interest payments due on the outstanding obligations of the Financing Corporation (“FICO”). FICO was created in 1987 to finance the recapitalization of the Federal Savings and Loan Insurance Corporation. These FICO assessments are in addition to amounts assessed by the FDIC for deposit insurance until the final maturity of the outstanding FICO obligations in 2019. FDIC insured institutions will share the cost of the interest on the FICO bonds on a pro rata basis. During the year ended December 31, 2010, the FICO assessment rate for DIF members ranged between approximately 0.0104% of deposits and approximately 0.0106% of deposits. During the year ended December 31, 2010 the Bank paid FICO assessments totaling \$0.1 million.

For the first quarter of 2011, the rate established by the FDIC for the FICO assessment is 0.0102% of deposits.

Supervisory Assessments. All Illinois banks are required to pay supervisory assessments to the IDFPR to fund the operations of the IDFPR. The amount of the assessment is calculated based on the institution’s total assets, including consolidated subsidiaries, as reported to the IDFPR. During the year ended December 31, 2010, the Bank paid supervisory assessments to the IDFPR totaling \$0.2 million.

Capital Requirements. The Federal Reserve has established the following minimum capital standards for state-chartered Federal Reserve System member banks, such as the Bank: a leverage requirement consisting of a minimum ratio of Tier 1 capital to total assets of 3% for the most highly-rated banks with a minimum requirement of at least 4% for all others, and a risk-based capital requirement consisting of a minimum ratio of total capital to total risk-weighted assets of 8%, at least one-half of which must be Tier 1 capital. For purposes of these capital standards, Tier 1 capital and total capital consist of substantially the same components as Tier 1 capital and total capital under the Federal Reserve’s capital guidelines for bank holding companies (see “—The Company—Capital Requirements”).

The capital requirements described above are minimum requirements. Higher capital levels will be required if warranted by the particular circumstances or risk profiles of individual institutions. For example, the regulations of the

Federal Reserve provide that additional capital may be required to take adequate account of, among other things, interest rate risk or the risks posed by concentrations of credit, nontraditional activities or securities trading activities.

8.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

During the year ended December 31, 2010, the Bank was not required by the Federal Reserve to increase its capital to an amount in excess of the minimum regulatory requirement. As of December 31, 2010, the Bank had regulatory capital as follows:

	Risk-Based Capital Ratio		Leverage Capital Ratio	
The Bank	9.69	%	5.96	%

The risk-based capital ratio and the leverage capital ratio are 1.69% and 1.96% in excess of the Federal Reserve's minimum requirements. See Note 18 in the Notes in Consolidated Financial Statements for further information.

Federal law provides the federal banking regulators with broad power to take prompt corrective action to resolve the problems of undercapitalized institutions. The extent of the regulators' powers depends on whether the institution in question is "well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized" or "critically undercapitalized," in each case as defined by regulation. Depending upon the capital category to which an institution is assigned, the regulators' corrective powers include: requiring the institution to submit a capital restoration plan; limiting the institution's asset growth and restricting its activities; requiring the institution to issue additional capital stock (including additional voting stock) or to be acquired; restricting transactions between the institution and its affiliates; restricting the interest rate the institution may pay on deposits; ordering a new election of directors of the institution; requiring that senior executive officers or directors be dismissed; prohibiting the institution from accepting deposits from correspondent banks; requiring the institution to divest certain subsidiaries; prohibiting the payment of principal or interest on subordinated debt; and ultimately, appointing a receiver for the institution. As of December 31, 2010, the Bank was considered adequately capitalized.

Additionally, institutions insured by the FDIC may be liable for any loss incurred by, or reasonably expected to be incurred by, the FDIC in connection with the default of commonly controlled FDIC insured depository institutions or any assistance provided by the FDIC to commonly controlled FDIC insured depository institutions in danger of default.

Regulatory Agreements. On December 18, 2009, the Bank entered into a written agreement (the "Agreement") with the Federal Reserve Bank of Chicago (the "Federal Reserve-Chicago") and the IDFPFR. The Agreement describes commitments made by the Bank to address and strengthen banking practices relating to credit risk management practices; improving loan underwriting and loan administration; improving asset quality by enhancing the Bank's position on problem loans through repayment, additional collateral or other means; reviewing and revising as necessary the Bank's allowance for loan and lease losses policy; maintaining sufficient capital at the Bank, implementing an earnings plan and comprehensive budget to improve and sustain the Bank's earnings; and improving the Bank's liquidity position and funds management practices. The Bank has implemented enhancements to its processes to address the matters identified by the Federal Reserve-Chicago and the IDFPFR and continues its efforts to comply with all the requirements specified in the Agreement. In the meantime, the Agreement results in the Bank's ineligibility for certain actions and expedited approvals without the prior written consent and approval of the Federal Reserve-Chicago and the IDFPFR. These prohibited actions include, among other things, the Bank paying dividends to the Company, the Company paying dividends on its common or preferred stock, distributions of interest or principal on subordinated debentures, note payable to Cole Taylor and Trust Preferred securities, the Company increasing its

debt level and the Company redeeming or repurchasing any shares of its stock.

9.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

Dividends. Under the Illinois Banking Act, Illinois-chartered banks may not pay dividends in excess of their net profits then on hand, after deducting losses and bad debts. The Federal Reserve Act also imposes limitations on the amount of dividends that may be paid by state member banks, such as the Bank. Generally, a member bank may pay dividends out of its undivided profits, in such amounts and at such times as the bank's board of directors deems prudent. Without prior Federal Reserve approval, however, a state member bank may not pay dividends in any calendar year which, in the aggregate, exceed such bank's calendar year-to-date net income plus such bank's retained net income for the two preceding calendar years, less any required transfers to additional paid-in capital or to a fund for the retirement of preferred stock.

The payment of dividends by any financial institution or its holding company is affected by the requirement to maintain adequate capital pursuant to applicable capital adequacy guidelines and regulations, and a financial institution generally is prohibited from paying any dividends if, following payment thereof, the institution would be undercapitalized. In addition, notwithstanding the availability of funds for dividends, the Federal Reserve may prohibit the payment of any dividends by the Bank if the Federal Reserve determines such payment would constitute an unsafe or unsound practice. As discussed above, the Agreement requires the Bank to obtain the prior written consent of the Federal Reserve-Chicago for the payment of dividends. During 2011, the Bank will not be expected to pay dividends.

Insider Transactions. The Bank is subject to certain restrictions imposed by federal law on extensions of credit to the Company, on investments in the stock or other securities of the Company and the acceptance of the stock or other securities of the Company as collateral for loans. Certain limitations and reporting requirements are also placed on extensions of credit by the Bank to its directors and officers, to directors and officers of the Company, to principal stockholders of the Company, and to "related interests" of such directors, officers and principal stockholders. In addition, federal law and regulations may affect the terms upon which any person becoming a director or officer of the Company or a principal stockholder of the Company may obtain credit from the banks with which the Bank maintains a correspondent relationship.

Safety and Soundness Standards. The federal banking agencies have adopted guidelines which establish operational and managerial standards to promote the safety and soundness of federally insured depository institutions. The guidelines set forth standards for internal controls, information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, compensation, fees and benefits, asset quality and earnings.

In general, the safety and soundness guidelines prescribe the goals to be achieved in each area, and each institution is responsible for establishing its own procedures to achieve those goals. If an institution fails to comply with any of the standards set forth in the guidelines, the institution's primary federal regulator may require the institution to submit a plan for achieving and maintaining compliance. If an institution fails to submit an acceptable compliance plan, or fails in any material respect to implement a compliance plan that has been accepted by its primary federal regulator, the regulator is required to issue an order directing the institution to cure the deficiency. Until the deficiency cited in the regulator's order is cured, the regulator may restrict the institution's rate of growth, require the institution to increase its capital, restrict the rates the institution pays on deposits or require the institution to take any action the regulator deems appropriate under the circumstances. Noncompliance with the standards established by the safety and soundness guidelines may also constitute grounds for other enforcement action by the federal banking regulators, including cease and desist orders and civil money penalty assessments.

Branching Authority. Illinois banks, such as the Bank, have the authority under Illinois law to establish branches anywhere in the State of Illinois, subject to receipt of all required regulatory approvals. Additionally, the Bank has authority under Missouri law to establish branches anywhere in the State of Missouri, subject to receipt of all required regulatory approvals.

Under the Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 (the “Riegle-Neal Act”), both state and national banks were allowed to establish interstate branch networks through acquisitions of other banks, subject to certain conditions, including certain limitations on the aggregate amount of deposits that may be held by the surviving bank and all of its insured depository institution affiliates. The establishment of new interstate branches or the acquisition of individual branches of a bank in another state (rather than the acquisition of an out-of-state bank in its entirety) was allowed by the Riegle-Neal Act only if specifically authorized by state law. However, as a result of the Dodd-Frank Act, interstate branching authority has been expanded. A state or national bank may open a de novo branch in another state if the law of the state where the branch is to be located would permit a state bank chartered by that state to open the branch.

10.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

State Bank Activities. Under federal law and FDIC regulations, FDIC insured state banks are prohibited, subject to certain exceptions, from making or retaining equity investments of a type, or in an amount, that are not permissible for a national bank. Federal law and FDIC regulations also prohibit FDIC insured state banks and their subsidiaries, subject to certain exceptions, from engaging as principal in any activity that is not permitted for a national bank or its subsidiary, respectively, unless the bank meets, and continues to meet, its minimum regulatory capital requirements and the FDIC determines the activity would not pose a significant risk to the deposit insurance fund of which the bank is a member.

The GLB Act also authorizes insured state banks to engage in financial activities, through subsidiaries, similar to the activities permitted for financial holding companies. If a state bank wants to establish a subsidiary engaged in financial activities, it must meet certain criteria, including that it and all of its affiliated insured depository institutions are well-capitalized and have a Community Reinvestment Act rating of at least “satisfactory” and that it is well-managed. There are capital deduction and financial statement requirements and financial and operational safeguards that apply to subsidiaries engaged in financial activities. Such a subsidiary is considered to be an affiliate of the bank and there are limitations on certain transactions between a bank and a subsidiary engaged in financial activities of the same type that apply to transactions with a bank’s holding company and its subsidiaries.

Reserve Requirement. Federal Reserve regulations, as presently in effect, require depository institutions including the Bank to maintain cash reserves against their net transaction accounts (primarily NOW and regular checking accounts). Effective October 9, 2008, the Federal Reserve Banks are now authorized to pay interest on such reserves.

EXECUTIVE OFFICERS

The term of office for the executive officers of the Company is from the date of election until the next annual organizational meeting of the board of directors. In addition to the information provided in the 2011 Proxy Statement, the names and ages of the executive officers of the Company, as well as the offices of the Company and the Subsidiary held by these officers on that date, and principal occupations for the past five years are set forth below.

Thomas A. Daiber, 53, is the President & Chief Executive Officer of Centrue Financial Corporation and the Bank. Mr. Daiber joined Centrue Financial in October of 2002 as its President and Chief Executive Officer.

Kurt R. Stevenson, 44, is the Senior Executive Vice President & Chief Financial Officer of Centrue Financial Corporation and the Bank and has held that role since 2003.

Everett J. Solon, 58, is the Market President for the Bank’s Streator, Dwight, Ottawa and Peru locations, a position held since 2003. In 2007, he also acted as the Bank’s Head of Mortgage Banking.

Robert L. Davidson, 65, is the Bank’s Executive Vice President, Chief Investment Officer and ALCO Manager, a position held since January of 2006. He had previously served as the Bank’s Senior Vice President, Chief Investment Officer and ALCO Manager since 2001.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

Roger D. Dotson, 63, is the Bank's Executive Vice President, a position held since late 2007. In 2009, he was also named the Head of Operations. In this capacity, he is responsible for oversight in the operations, IT, deposit operations, and loan operations areas. He had previously served as the Bank's Head of Retail Banking. Mr. Dotson joined Centrue Bank as their Regional President in 2005. Prior to joining the Bank, Mr. Dotson served as the President & CEO of Illinois Community Bank located in Effingham, Illinois.

Heather M. Hammitt, 36, is the Bank's Executive Vice President & Head of Human Resources & Corporate Communications. Ms. Hammitt joined the Bank in March of 1998 and has served in various positions of management in the human resources department during that time.

Kenneth A. Jones, 47, is the Bank's Executive Vice President & Chief Credit Officer. Mr. Jones joined the Bank in October 2000 and, prior to his current position, he served in the role of Commercial Collector.

James J. Kerley, Jr., 62, is the Bank's Executive Vice President & Senior Lender. Prior to joining the Bank in May of 2009, Mr. Kerley was an agent with Fiduciary Asset Management, an investment management firm, since 1999 and was also a partner of KD Advisory LLC, a consulting firm providing workout services to banks, since 2007.

Diane F. Leto, 49, is the Bank's Executive Vice President & Chief Risk Officer. She had previously served as the Bank's Executive Vice President & Head of Operations through year-end 2008. She has been with the Bank since June of 2004.

Ricky R. Parks, 45, is the Market President for the Bank's Fairview Heights, Aviston, Belleville, and St. Rose locations. Mr. Parks joined Centrue Bank in January of 2004 as a Senior Vice President and Senior Lender and in October of 2004 was named its Regional Bank President.

Mary Jane Raymond, 54, is the Bank's Executive Vice President & Head of Retail Banking. Ms. Raymond joined Centrue Bank in March of 2005 as a Vice President/Regional Sales Manager. Prior to joining Centrue Bank, Ms. Raymond worked as a Vice President for Regions Bank from May of 1997 to March of 2005.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

Item 1A. Risk Factors

An investment in the Company's common stock is subject to risks inherent to the Company's business. The Company faces a variety of risks that are inherent in its business, including interest rate, credit, liquidity, capital, price/market, transaction/operation, compliance/legal, strategic and reputation. Following is a discussion of these risk factors. While the Company's business, financial condition and results of operations could be harmed by any of the following risks or other factors discussed elsewhere in this report, including Management's Discussion and Analysis and Notes to the Consolidated Financial Statements, the mere existence of risk is not necessarily reason for concern. However, the following risks could cause actual results to materially differ from those discussed in any forward-looking statement.

The Company and the Bank are subject to Regulatory Agreements and Orders that restrict the Company from taking certain actions.

On December 18, 2009, the Company and the Bank entered into a written agreement with the Federal Reserve Bank of Chicago and the Illinois Department of Financial & Professional Regulation ("IDFPR"). The Agreement describes commitments made by the Company and the Bank to address and strengthen banking practices relating to credit risk management practices; improving loan underwriting and loan administration; improving asset quality by enhancing the Bank's position on problem loans through repayment, additional collateral or other means; reviewing and revising as necessary the Bank's allowance for loan and lease losses policy; maintaining sufficient capital at the Company and the Bank, implementing an earnings plan and comprehensive budget to improve and sustain the Bank's earnings; and improving the Bank's liquidity position and funds management practices. The Bank has implemented enhancements to its processes to address the matters identified by the Federal Reserve-Chicago and the IDFPR and continues its efforts to comply with all the requirements specified in the Agreement. In the meantime, the Agreement results in the Bank's ineligibility for certain actions and expedited approvals without the prior written consent and approval of the Federal Reserve-Chicago and the IDFPR. These prohibited actions include, among other things, the Bank paying dividends to the Company, the Company paying dividends on its common or preferred stock, distributions of interest or principal on subordinated debentures or Trust Preferred securities, the Company increasing its debt level and the Company redeeming or repurchasing any shares of its stock.

The Company's earnings and cash flows are largely dependent upon net interest income.

The Company's earnings and cash flows are largely dependent upon its net interest income. Interest rates are highly sensitive to many factors that are beyond the Company's control, including general economic conditions and policies of various governmental and regulatory agencies and, in particular, the Federal Reserve. Changes in monetary policy, including changes in interest rates, could influence not only the interest the Company receives on loans and securities and the amount of interest it pays on deposits and borrowings, but such changes could also affect (i) the Company's ability to originate loans and obtain deposits, (ii) the fair value of the Company's financial assets and liabilities, and (iii) the average duration of the Company's mortgage-backed securities portfolio and other interest-earning assets. If the interest rates paid on deposits and other borrowings increase at a faster rate than the interest rates received on loans and other investments, the Company's net interest income, and therefore earnings, could be adversely affected. Earnings could also be adversely affected if the interest rates received on loans and other investments fall more quickly than the interest rates paid on deposits and other borrowings.

Although management believes it has implemented effective asset and liability management strategies to reduce the potential effects of changes in interest rates on the Company's results of operations, any substantial, unexpected, prolonged change in market interest rates could have a material adverse effect on the Company's financial condition and results of operations. In addition, the Company's interest rate risk modeling techniques and assumptions likely may not fully predict or capture the impact of actual interest rate changes on the Company's balance sheet. See Part II sections "Net Interest Income" and "Interest Rate Risk" in "Management's Discussion and Analysis of Financial Condition and Results of Operations," for further discussion related to the Company's management of interest rate risk.

13.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

The Company and the Bank may not be able to maintain adequate capital levels.

Maintaining sufficient capital serves as a buffer against potential credit and other losses that the Company may encounter during difficult times. There are five levels of capital defined by regulation: “well-capitalized”, “adequately capitalized”, “undercapitalized”, “significantly undercapitalized” and “critically undercapitalized”. The Federal Reserve-Chicago and IFDRR has advised the Bank that it is being treated as “adequately capitalized”. Capital risk includes the potential effect on the Company’s reputation as well as certain other potential consequences should the capital level fall below adequately capitalized. As a result of the Bank being “adequately capitalized”, the Bank is currently experiencing changes in the Bank’s borrowing costs and terms from regulatory authorities and other third parties, the Bank’s FDIC deposit insurance premiums, and its ability to access brokered CD markets.

We incurred net losses for 2010 and 2009 and cannot make any assurances that we will not incur further losses.

We incurred a net loss of \$65.8 million and \$38.1 million for the years ended December 31, 2010 and 2009, respectively, due to high levels of provision for loan losses, deferred tax valuation allowance, security impairments, and goodwill impairment. We cannot provide any assurances that we will not incur future losses, especially in light of economic conditions that continue to adversely affect our borrowers.

Nonperforming assets take significant time to resolve and adversely affect our results of operations and financial condition, and could result in further losses in the future.

At December 31, 2010 and 2009, our nonperforming loans (which consist of non-accrual loans, troubled debt restructures and loans past due 90 days or more and still accruing loans) totaled \$70.0 million and \$80.9 million, or 9.7% and 9.1% of our loan portfolio, respectively. At December 31, 2010 and 2009, our nonperforming assets (which include non-performing loans plus other real estate owned) were \$95.6 million and \$97.1 million, or 8.7% and 7.4% of total assets, respectively. Our nonperforming assets adversely affect our net income in various ways. While we pay interest expense to fund nonperforming assets, we do not record interest income on nonaccrual loans or other real estate owned, thereby adversely affecting our income and returns on assets and equity, and our loan administration costs increase and our efficiency ratio is adversely affected. When we take collateral in foreclosures and similar proceedings, we are required to mark the collateral to its then-fair market value, which, when compared to the value of the loan, may result in a loss. These nonperforming loans and other real estate owned also increase our risk profile and the capital our regulators believe is appropriate in light of such risks. The resolution of nonperforming assets requires significant time commitments from management, which can be detrimental to the performance of their other responsibilities. There is no assurance that we will not experience further increases in non-performing loans in the future, or that our nonperforming assets will not result in further losses in the future.

Our allowance for loan losses may be insufficient.

Managing the Company’s allowance for loan losses is based upon, among other things, (1) historical experience, (2) an evaluation of local and national economic conditions, (3) regular reviews of delinquencies and loan portfolio quality, (4) current trends regarding the volume and severity of past due and problem loans, (5) the existence and effect of concentrations of credit, and (6) results of regulatory examinations. Based upon such factors, management makes various assumptions and judgments about the ultimate collectability of the respective loan portfolios. Although the Company believes that the allowance for loan losses is adequate, there can be no assurance that such allowance will

prove sufficient to cover future losses. Future adjustments may be necessary if economic conditions change or adverse developments arise with respect to nonperforming or performing loans or if regulatory supervision changes. Material additions to the allowance for loan losses would result in a material decrease in the Company's net income, and possibly its capital, among other adverse consequences.

14.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

We are subject to lending risk.

As of December 31, 2010 approximately 75.61% of the Company's loan portfolio consisted of commercial, agricultural production and agricultural real estate, construction, land and development, and commercial real estate loans (collectively, "commercial loans"). Commercial loans are generally viewed as having more inherent risk of default than residential mortgage loans or retail loans. In addition, the commercial loan balance per borrower is typically larger than that for residential mortgage loans and retail loans, inferring higher potential losses on an individual loan basis. Because the Company's loan portfolio contains a number of commercial loans with large balances, the deterioration of one or a few of these loans could cause a significant increase in nonperforming loans. An increase in nonperforming loans could result in a net loss of earnings from these loans, an increase in the provision for loan losses, and an increase in loan charge offs, all of which could have a material adverse effect on the Company's financial condition and results of operations. See Part II "Loans" in "Management's Discussion and Analysis of Financial Condition and Results of Operations," for further discussion of credit risks related to different loan types.

We are subject to economic conditions of our geographic market.

The Company's success depends to a large degree on the general economic conditions of the geographic markets served by the Bank in the States of Illinois and Missouri and, to a lesser extent, contiguous states. The local economic conditions on these areas have a significant impact on the generation of the Bank's commercial, real estate commercial, and real estate construction loans; the ability of borrowers to repay these loans; and the value of the collateral securing these loans. Adverse changes in the economic conditions of the counties in which we operate could also negatively impact the financial results of the Company's operations and have a negative effect on its profitability. For example, these factors could lead to reduced interest income and an increase in the provision for loan losses.

A portion of the loans in the Company's portfolio is secured by real estate. Most of these loans are secured by properties located in the north central, east central, south central and St. Louis's suburban east counties of Illinois, as well as, the St. Louis metro area of Missouri. Negative conditions in the real estate markets where collateral for a mortgage loan is located could adversely affect the borrower's ability to repay the loan and the value of the collateral securing the loan. Real estate values are affected by various factors, including changes in general or regional economic conditions, supply and demand for properties and governmental rules or policies.

We are subject to current levels of market volatility.

The capital and credit markets have been experiencing volatility and disruption for more than a year. In recent months, the volatility and disruption have reached unprecedented levels. In some cases, the markets have produced downward pressure on stock prices and credit availability for certain issuers without regard to those issuers' underlying financial strength. If current levels of market disruption and volatility continue or worsen, there can be no assurance that we will not experience an adverse effect, which may be material, on our ability to access capital and on our business, financial condition and results of operations.

Future growth or operating results may require the Company to raise additional capital but that capital may not be available or it may be dilutive.

To the extent the Company's future operating results erode capital or the Company elects to expand through loan growth or acquisition it may be required to raise capital. The Company's ability to raise capital will depend on conditions in the capital markets, which are outside of its control, and on the Company's financial performance. Accordingly, the Company cannot be assured of its ability to raise capital when needed or on favorable terms. If the Company cannot raise additional capital when needed, it will be subject to increased regulatory supervision and the imposition of restrictions on its growth and business. These could negatively impact the Company's ability to operate or further expand its operations through acquisitions or the establishment of additional branches and may result in increases in operating expenses and reductions in revenues that could have a material adverse effect on its financial condition and results of operations.

15.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

Real estate market volatility and future changes in disposition strategies could result in net proceeds that differ significantly from other real estate owned (“OREO”) fair value appraisals.

The Company’s OREO portfolio consists of properties that it obtained through foreclosure in satisfaction of loans. OREO properties are recorded at the lower of the recorded investment in the loans for which the properties served as collateral or estimated fair value, less estimated selling costs. Generally, in determining fair value an orderly disposition of the property is assumed, except where a different disposition strategy is expected. Significant judgment is required in estimating the fair value of OREO property, and the period of time within which such estimates can be considered current is significantly shortened during periods of market volatility, as experienced during 2008 through 2010.

In response to market conditions and other economic factors, the Company may utilize alternative sale strategies other than orderly dispositions as part of its OREO disposition strategy, such as immediate liquidation sales. In this event, as a result of the significant judgments required in estimating fair value and the variables involved in different methods of disposition, the net proceeds realized from such sales transactions could differ significantly from estimates used to determine the fair value of the Company’s OREO properties.

We are subject to the risk of additional impairment charges relating to our securities portfolio.

Our investment securities portfolio is our second largest earning asset. The value of our investment portfolio has been adversely affected by the unfavorable conditions of the capital markets in general as well as declines in values of the securities we hold. We have taken an aggregate of \$19.7 million in charges against earnings since the fourth quarter of 2008 for impairments to the value of pooled collateralized debt obligations and certain collateralized mortgage obligations that we have concluded were “other than temporary.” The value of this segment is particularly sensitive to adverse developments affecting the banking industry and the financial condition or performance of the issuing banks – factors that we have no control over and as to which we may receive no advance warning, as was the case in the second quarter for one of these securities. Although we believe we have appropriately valued our securities portfolio, we cannot assure you that there will not be additional material impairment charges which could have a material adverse effect on our financial condition and results of operations.

The Company is a bank holding company and its sources of funds are limited.

The Company is a bank holding company, and its operations are primarily conducted by the Bank, which is subject to significant federal and state regulation. Cash available to pay dividends to stockholders of the Company is derived primarily from dividends received from the Bank. The Company’s ability to receive dividends or loans from its subsidiaries is restricted. Dividend payments by the Bank to the Company in the future will require generation of future earnings by the Bank and would require regulatory approval. Further, the Company’s right to participate in the assets of the Bank upon its liquidation, reorganization, or otherwise will be subject to the claims of the Bank’s creditors, including depositors, which will take priority except to the extent the Company may be a creditor with a recognized claim. As of December 31, 2010, the Company’s subsidiary had deposits and other liabilities of \$1.028 billion.

The Company could experience an unexpected inability to obtain needed liquidity.

Liquidity measures the ability to meet current and future cash flow needs as they become due. The liquidity of a financial institution reflects its ability to meet loan requests, to accommodate possible outflows in deposits, and to take advantage of interest rate market opportunities. The ability of a financial institution to meet its current financial obligations is a function of its balance sheet structure, its ability to liquidate assets, and its access to alternative sources of funds. The Company seeks to ensure its funding needs are met by maintaining a level of liquidity through asset and liability management. If the Company becomes unable to obtain funds when needed, it could have a material adverse effect on the Company's business and, in turn, the Company's financial condition and results of operations.

16.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

Our information systems may experience an interruption or breach in security.

The Company relies heavily on communications and information systems to conduct its business. Any failure, interruption, or breach in security of these systems could result in failures or disruptions in the Company's customer relationship management, general ledger, deposit, loan, and other systems. While the Company has policies and procedures designed to prevent or limit the effect of the failure, interruption, or security breach of its information systems, we cannot assure you that any such failures, interruptions, or security breaches will not occur or, if they do occur, that they will be adequately addressed. The occurrence of any failures, interruptions, or security breaches of the Company's information systems could damage the Company's reputation, result in a loss of customer business, subject the Company to additional regulatory scrutiny, or expose the Company to civil litigation and possible financial liability, any of which could have a material adverse effect on the Company's financial condition and results of operations.

The Bank's deposit insurance premiums have increased which could have a material adverse effect on future earnings.

Due to the impact on the FDIC insurance fund resulting from the recent increase in bank failures, the FDIC raised its insurance premiums and levied special assessments on all financial institutions. In addition, the FDIC uses a risk-based premium system that assesses higher rates on those institutions that pose greater risks to the deposit insurance fund. The FDIC places all financial institutions into one of four risk categories using a two-step process based first on the respective institution's capital ratios and then on the CAMELS composite supervisory rating assigned to the institution by its primary federal regulator in connection with its periodic regulatory examinations. As of December 31, 2010, the Bank is "adequately capitalized" under regulatory guidelines. Due to the "adequately capitalized" status of the Bank and other factors indicating higher risk, the FDIC will charge the Bank a higher premium for deposit insurance. The combination of the general increase in FDIC insurance rates and higher FDIC insurance rates resulting from the classification of the Bank in a higher risk category will have an adverse impact on the Company's results of operations.

The Company may fail to meet continued listing requirements with NASDAQ.

The Company's common stock is listed on the NASDAQ Global Select Market. As a NASDAQ Global Select Market listed company, Centrue is required to comply with the continued listing requirements of the NASDAQ Market Place Rules.

On December 28, 2010, the Company received a notice from the NASDAQ Stock Market that it was not in compliance with NASDAQ's Marketplace Rule, which requires it to maintain a minimum Market Value of Publicly Held Shares ("MVPHS") of \$5,000,000.

In accordance with this Marketplace Rule, the Company is provided a grace period of 180 calendar days, or until June 27, 2011, in which to regain compliance with the MVPHS rule. If at anytime during the grace period the Company's MVPHS closes at \$5,000,000 or more for a minimum of ten consecutive business days, the Company will have complied with the rule and the matter will be closed. If compliance with the rule cannot be demonstrated by June 27, 2011, NASDAQ will provide the Company written notification that the Company's common stock will be delisted, at which time the Company may appeal the determination.

Part I

(Table Amounts In Thousands, Except Share Data)

On February 22, 2011, the Company received a notice from the NASDAQ Stock Market that it was not in compliance with NASDAQ's Marketplace Rule, which requires it to maintain a minimum bid price of \$1.00 per share.

In accordance with this Marketplace Rule, the Company is provided a grace period of 180 calendar days, or until August 22, 2011, in which to regain compliance with the Minimum Bid Price Rule. If at anytime during the grace period the Company's minimum bid price of the Company's common stock closes at \$1.00 or more for a minimum of ten consecutive business days, the Company will have complied with the rule and the matter will be closed. If compliance with the rule cannot be demonstrated by August 22, 2011, NASDAQ will provide the Company written notification that the Company's common stock will be subject to delisting. The Company may, however, be eligible for an additional grace period if it satisfies the initial listing standards (with the exception of the Minimum Bid Price Rule) for listing on the NASDAQ Capital Market, and it submits a timely application to NASDAQ to transfer the listing of its common stock to the NASDAQ Capital Market and provides written notice of its intention to cure the deficiency during the second compliance period by effecting a reverse stock split if necessary.

During the grace periods described above, the Company will consider its alternatives, including whether to apply to transfer its common stock listing to an alternative exchange or inter-dealer quotation system such as the OTC Bulletin Board.

Loss of or damage to the Company's reputation may affect ongoing profitability.

Reputation risk arises from the possibility that negative publicity regarding the Company's business practices, whether true or not, will cause a decline in its customer base or result in costly litigation. In a service industry, such as the financial services industry, where product choices between companies are not always clearly distinguishable and which in many cases are interchangeable, a company's reputation for honesty, fair-dealing and good corporate governance may be one of its most important assets. Loss of or damage to that reputation can have severe consequences.

We are subject to current financial market risk.

In 2010 and continuing in 2011, governments, regulators and central banks in the United States and worldwide have taken numerous steps to increase liquidity and to restore investor confidence, but asset values have continued to decline and access to liquidity continues to be very limited.

The EESA authorizes the U. S. Treasury to, among other things, purchase up to \$700 billion of mortgages, mortgage-backed securities and certain other financial instruments from financial institutions and their holding companies, under TARP. The purpose of TARP is to restore confidence and stability to the United States banking system and to encourage financial institutions to increase their lending to customers and to each other. Under the Capital Purchase Program, which the Company participated in, the U. S. Treasury is purchasing equity securities from participating institutions. The EESA also increased federal deposit insurance on most deposit accounts from \$100,000 to \$250,000. This increase is in place until December 31, 2013 and is not covered by deposit insurance premiums paid by the banking industry. The ARRA, which was signed into law on February 17, 2009, includes a wide array of programs intended to stimulate the economy and provide for extensive infrastructure, energy, health and education needs. The failure of these significant legislative measures to help stabilize the financial markets and a continuation or worsening of current financial market conditions could materially and adversely affect our business, financial

condition, results of operations, access to credit or the trading price of our Common Stock.

The EESA and the ARRA followed, and have been followed by, numerous actions by the Federal Reserve Board, the United States Congress, the U. S. Treasury, the FDIC, the SEC and others to address the current liquidity and credit crisis that has followed the sub-prime mortgage meltdown that began in 2007. These measures include homeowner relief that encourages loan restructuring and modification; the establishment of significant liquidity and credit facilities for financial institutions and investment banks; the lowering of the federal funds rate; emergency action against short selling practices; a temporary guaranty program for money market funds; the establishment of a commercial paper funding facility to provide back-stop liquidity to commercial paper issuers; and coordinated international efforts to address illiquidity and other weaknesses in the banking sector. The purpose of these legislative and regulatory actions is to stabilize the United States banking system. The EESA, the ARRA and the other regulatory initiatives described above may not have their desired effects. If the volatility in the markets continues and economic conditions fail to improve or worsen, our business, financial condition and results of operations could be materially and adversely affected.

Centrue Financial Corporation

Part I

(Table Amounts In Thousands, Except Share Data)

We operate in a highly regulated industry.

The banking industry is heavily regulated. The banking business of the Company and the Bank are subject, in certain respects, to regulation by the Federal Reserve, the FDIC, the IDFP and the SEC. The Company's success depends not only on competitive factors but also on state and federal regulations affecting banks and bank holding companies. The regulations are primarily intended to protect depositors, not stockholders or other security holders. The ultimate effect of recent and proposed changes to the regulation of the financial institution industry cannot be predicted. Regulations now affecting the Company may be modified at any time, and there is no assurance that such modifications, if any, will not adversely affect the Company's business.

We operate in an industry that is interrelated such that defaults by other larger institutions could adversely affect financial markets generally.

The commercial soundness of many financial institutions may be closely interrelated as a result of relationships between the institutions. As a result, concerns about, or a default or threatened default by, one institution could lead to significant market-wide liquidity and credit problems, losses or defaults by other institutions. This is sometimes referred to as "systemic risk" and may adversely affect our business.

We operate in an industry that is significantly affected by general business and economic conditions.

The Company's operations and profitability are impacted by general business and economic conditions in the United States and abroad. These conditions include short-term and long-term interest rates, inflation, money supply, political issues, legislative and regulatory changes, fluctuations in both debt and equity capital markets, broad trends in industry and finance, and the strength of the U. S. economy and the local economies in which the Company operates, all of which are beyond the Company's control. Deterioration in economic conditions could result in an increase in loan delinquencies and nonperforming assets, decreases in loan collateral values, and a decrease in demand for the Company's products and services among other things, any of which could have a material adverse impact on the Company's financial condition and results of operations.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

At December 31, 2010, the Company operated twenty-eight offices (twenty-five full-service bank branches and two back-room sales support nonbanking facilities in Illinois and one full-service bank branch in Missouri). The principal offices of the Company are located in St. Louis, Missouri. All of the Company's offices are owned by the Bank and are not subject to any mortgage or material encumbrance, with the exception of four offices that are leased: one is located in LaSalle County in Illinois, one in Will County in Illinois, one in St. Clair County in Illinois and one in St. Louis County in Missouri. The Company believes that its current facilities are adequate for its existing business.

Affiliate	Markets Served	Property/Type Location
The Company		Administrative Office: St. Louis, MO
Centrue Bank	Bureau, Champaign, Clinton, DeKalb, Grundy, Kankakee, Kendall, LaSalle, Livingston, St. Clair and Will Counties in Illinois	Main Office: Streator, IL Twenty-five full-service banking offices and two non-banking offices located in markets served.
	St. Louis County in Missouri	One full-service banking office

In addition to the banking locations listed above, the Bank owns twenty-seven automated teller machines, all of which are housed within banking offices.

At December 31, 2010 the properties and equipment of the Company had an aggregate net book value of approximately \$25.7 million.

Item 3. Legal Proceedings

Neither the Company nor its subsidiary are involved in any pending legal proceedings other than routine legal proceedings occurring in the normal course of business, which, in the opinion of management, in the aggregate, are not material to the Company's consolidated financial condition.

Item 5. Market For Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The Company's Common Stock was held by approximately 868 stockholders of record as of March 1, 2011, and is traded on The NASDAQ Stock Market under the symbol "TRUE." The table below indicates the high and low sales prices of the Common Stock as reported by NASDAQ for transactions of which the Company is aware, and the dividends declared per share for the Common Stock during the periods indicated. Because the Company is not aware of the price at which certain private transactions in the Common Stock have occurred, the prices shown may not necessarily represent the complete range of prices at which transactions in the Common Stock have occurred during such periods.
