FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2017

OR
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission File Number 1-12815

CHICAGO BRIDGE & IRON COMPANY N.V.		
The Netherlands	Prinses Beatrixlaan 35	98-0420223
(State or other jurisdiction of incorporation or organization)	2595 AK The Hague	(I.R.S. Employer Identification No.)
	The Netherlands	
	31 70 373 2010	
	(Address and telephone number of principal executive offices)	

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
 Yes No

The number of shares outstanding of the registrant's common stock as of April 27, 2017 – 100,844,555

CHICAGO BRIDGE & IRON COMPANY N.V.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2017

(\$ and share values in thousands, except per share data)

(Unaudited)

1. ORGANIZATION AND NATURE OF OPERATIONS

Organization and Nature of Operations—Founded in 1889, Chicago Bridge & Iron Company N.V. (“CB&I” or the “Company”) provides a wide range of services, including conceptual design, technology, engineering, procurement, fabrication, modularization, construction and commissioning services to customers in the energy infrastructure market throughout the world. Our business is aligned into three operating groups, which represent our reportable segments: Engineering & Construction; Fabrication Services; and Technology. See Note 2 and Note 4 for discussions of our discontinued operations and Note 15 for a discussion of our reportable segments and related financial information.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting and Consolidation—The accompanying unaudited interim Condensed Consolidated Financial Statements (“Financial Statements”) are prepared in accordance with the rules and regulations of the United States (“U.S.”) Securities and Exchange Commission (the “SEC”) and accounting principles generally accepted in the United States of America (“U.S. GAAP”). These Financial Statements include all wholly-owned subsidiaries and those entities which we are required to consolidate. See the “Partnering Arrangements” section of this footnote for further discussion of our consolidation policy for those entities that are not wholly-owned. Intercompany balances and transactions are eliminated in consolidation.

Basis of Presentation—We believe these Financial Statements include all adjustments, which are of a normal recurring nature, necessary for a fair presentation of our results of operations for the three months ended March 31, 2017 and 2016, our financial position as of March 31, 2017 and our cash flows for the three months ended March 31, 2017 and 2016. The December 31, 2016 Condensed Consolidated Balance Sheet (the “Balance Sheet”) was derived from our December 31, 2016 audited Consolidated Balance Sheet, adjusted to conform to our current year presentation.

On February 27, 2017, we entered into a definitive agreement (the “Agreement”) with CSVC Acquisition Corp (“CSVC”) in which CSVC will acquire our capital services operations, which are primarily comprised of our former Capital Services reportable segment and provides comprehensive and integrated maintenance services, environmental engineering and remediation, construction services, program management, and disaster response and recovery services for private-sector customers and governments (“Capital Services Operations”). The Capital Services Operations are considered a discontinued operation as the divestiture represents a strategic shift and will have a material effect on our operations and financial results. Operating results of the Capital Services Operations have been classified as a discontinued operation within the Condensed Consolidated Statements of Operations (the “Statement of Operations”) for the three months ended March 31, 2017 and 2016. Further, the assets and liabilities of the Capital Services Operations have been classified as assets and liabilities of discontinued operations within our March 31, 2017 and December 31, 2016 Balance Sheets, with all balances reported as current on our March 31, 2017 Balance Sheet. Cash flows of the Capital Services Operations are not reported separately within our Condensed Consolidated Statements of Cash flows. See Note 4 for additional discussion of our discontinued operations. Unless otherwise noted, the footnotes to our Financial Statements relate to our continuing operations.

We believe the disclosures accompanying these Financial Statements are adequate to make the information presented not misleading. Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to the rules and regulations of the SEC for interim reporting periods. The results of operations and cash flows for the interim periods are not necessarily indicative of the results to be expected for the full year. The accompanying Financial Statements should be read in conjunction with our Consolidated Financial Statements and notes thereto included in our 2016 Annual Report on Form 10-K (“2016 Annual Report”).

Use of Estimates—The preparation of our Financial Statements in conformity with U.S. GAAP requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses and related disclosures of contingent assets and liabilities. We believe the most significant estimates and judgments are associated

with revenue recognition for our contracts, including estimating costs and the recognition of incentive fees and unapproved change orders and claims; fair value and recoverability assessments that must be periodically performed with respect to long-lived tangible assets, goodwill and other intangible assets; valuation of deferred tax assets and financial instruments; the determination of liabilities related to self-insurance programs and income taxes; and consolidation determinations with respect to our partnering arrangements. If the underlying estimates and assumptions upon which our Financial Statements are based change in the future, actual amounts may differ from those included in the accompanying Financial Statements.

Table of Contents

Chicago Bridge & Iron Company N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Revenue Recognition—Our revenue is primarily derived from long-term contracts and is generally recognized using the percentage of completion (“POC”) method, primarily based on the percentage that actual costs-to-date bear to total estimated costs to complete each contract. We follow the guidance of Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Revenue Recognition Topic 605-35 for accounting policies relating to our use of the POC method, estimating costs, and revenue recognition, including the recognition of incentive fees, unapproved change orders and claims, and combining and segmenting contracts. We primarily utilize the cost-to-cost approach to estimate POC as we believe this method is less subjective than relying on assessments of physical progress. Under the cost-to-cost approach, the use of estimated costs to complete each contract is a significant variable in the process of determining recognized revenue and is a significant factor in the accounting for contracts. Significant estimates that impact the cost to complete each contract are costs of engineering, materials, components, equipment, labor and subcontracts; labor productivity; schedule durations, including subcontractor or supplier progress; liquidated damages; contract disputes, including claims; achievement of contractual performance requirements; and contingency, among others. The cumulative impact of revisions in total cost estimates during the progress of work is reflected in the period in which these changes become known, including, to the extent required, the reversal of profit recognized in prior periods and the recognition of losses expected to be incurred on contracts in progress. Due to the various estimates inherent in our contract accounting, actual results could differ from those estimates. See Note 14 for discussion of projects with significant changes in estimated margins during the three months ended March 31, 2017 and 2016.

Our long-term contracts are awarded on a competitively bid and negotiated basis and the timing of revenue recognition may be impacted by the terms of such contracts. We use a range of contracting options, including cost-reimbursable, fixed-price and hybrid, which has both cost-reimbursable and fixed-price characteristics. Fixed-price contracts, and hybrid contracts with a more significant fixed-price component, tend to provide us with greater control over project schedule and the timing of when work is performed and costs are incurred, and accordingly, when revenue is recognized. Cost-reimbursable contracts, and hybrid contracts with a more significant cost-reimbursable component, generally provide our customers with greater influence over the timing of when we perform our work, and accordingly, such contracts often result in less predictability with respect to the timing of revenue recognition. Contract revenue for our long-term contracts recognized under the POC method reflects the original contract price adjusted for approved change orders and estimated recoveries for incentive fees, unapproved change orders and claims. We recognize revenue associated with incentive fees when the value can be reliably estimated and recovery is probable. We recognize revenue associated with unapproved change orders and claims to the extent the related costs have been incurred, the value can be reliably estimated and recovery is probable. Our recorded incentive fees, unapproved change orders and claims reflect our best estimate of recovery amounts; however, the ultimate resolution and amounts received could differ from these estimates. See Note 14 for additional discussion of our recorded unapproved change orders, claims and incentives.

With respect to our engineering, procurement, and construction (“EPC”) services, our contracts are not segmented between types of services, such as engineering and construction, if each of the EPC components is negotiated concurrently or if the pricing of any such services is subject to the ultimate negotiation and agreement of the entire EPC contract. However, an EPC contract including technology or fabrication services may be segmented if we satisfy the segmenting criteria in ASC 605-35. Revenue recorded in these situations is based on our prices and terms for similar services to third party customers. Segmenting a contract may result in different interim rates of profitability for each scope of service than if we had recognized revenue without segmenting. In some instances, we may combine contracts that are entered into in multiple phases, but are interdependent and include pricing considerations by us and the customer that are impacted by all phases of the project. Otherwise, if each phase is independent of the other and pricing considerations do not give effect to another phase, the contracts will not be combined.

Cost of revenue for our long-term contracts includes direct contract costs, such as materials and labor, and indirect costs that are attributable to contract activity. The timing of when we bill our customers is generally dependent upon advance billing terms, milestone billings based on the completion of certain phases of the work, or when services are

provided. Projects with costs and estimated earnings recognized to date in excess of cumulative billings is reported on the Condensed Consolidated Balance Sheet (“Balance Sheet”) as costs and estimated earnings in excess of billings. Projects with cumulative billings in excess of costs and estimated earnings recognized to date is reported on the Balance Sheet as billings in excess of costs and estimated earnings. The net balances on our Balance Sheet are collectively referred to as Contracts in Progress, net and the components of these balances at March 31, 2017 and December 31, 2016 were as follows:

9

	Asset	Liability	Asset	Liability
Costs and estimated earnings on contracts in progress	\$9,014,256	\$23,771,468	\$8,466,638	\$23,408,316
Billings on contracts in progress	(8,520,428)	(25,253,008)	(8,055,889)	(24,803,665)
Contracts in Progress, net	\$493,828	\$(1,481,540)	\$410,749	\$(1,395,349)

Any uncollected billed amounts, including contract retentions, are reported as accounts receivable. At March 31, 2017 and December 31, 2016, accounts receivable included contract retentions of approximately \$77,300 and \$72,100, respectively. Contract retentions due beyond one year were approximately \$42,900 and \$37,500 at March 31, 2017 and December 31, 2016, respectively.

Revenue for our service contracts that do not satisfy the criteria for revenue recognition under the POC method is recorded at the time services are performed. Revenue associated with incentive fees for these contracts is recognized when earned. Unbilled receivables for our service contracts are recorded within accounts receivable and were approximately \$9,200 and \$16,100 at March 31, 2017 and December 31, 2016, respectively.

Revenue for our pipe and steel fabrication and catalyst manufacturing contracts that are independent of an EPC contract, or for which we satisfy the segmentation criteria discussed above, is recognized upon shipment of the fabricated or manufactured units. During the fabrication or manufacturing process, all related direct and allocable indirect costs are capitalized as work in process inventory and such costs are recorded as cost of revenue at the time of shipment.

Our billed and unbilled revenue may be exposed to potential credit risk if our customers should encounter financial difficulties, and we maintain reserves for specifically-identified potential uncollectible receivables. At March 31, 2017 and December 31, 2016, our allowances for doubtful accounts were not material.

Other Operating Expense (Income), Net—Other operating expense (income), net generally represents (gains) losses associated with the sale or disposition of property and equipment.

Recoverability of Goodwill—Goodwill is not amortized to earnings, but instead is reviewed for impairment at least annually at a reporting unit level, absent any indicators of impairment or when other actions require an impairment assessment (such as a change in reporting units). We perform our annual impairment assessment during the fourth quarter of each year based upon balances as of October 1. We identify a potential impairment by comparing the fair value of the applicable reporting unit to its net book value, including goodwill. If the net book value exceeds the fair value of the reporting unit, an indication of potential impairment exists, and we measure the impairment by comparing the carrying value of the reporting unit's goodwill to its implied fair value. To determine the fair value of our reporting units and test for impairment, we utilize an income approach (discounted cash flow method) as we believe this is the most direct approach to incorporate the specific economic attributes and risk profiles of our reporting units into our valuation model. This is consistent with the methodology used to determine the fair value of our reporting units in previous years. We generally do not utilize a market approach given the lack of relevant information generated by market transactions involving comparable businesses. However, to the extent market indicators of fair value become available, we consider such market indicators in our discounted cash flow analysis and determination of fair value. See Note 6 for additional discussion of our goodwill.

Recoverability of Other Long-Lived Assets—We amortize our finite-lived intangible assets on a straight-line basis with lives ranging from 6 to 20 years, absent any indicators of impairment. We review tangible assets and finite-lived intangible assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. If a recoverability assessment is required, the estimated future cash flow associated with the asset or asset group will be compared to the asset's carrying amount to determine if an impairment exists. See Note 6 for additional discussion of our intangible assets.

Earnings Per Share ("EPS")—Basic EPS is calculated by dividing net income attributable to CB&I by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the assumed conversion of dilutive securities, consisting of restricted shares, performance based shares (where performance criteria have been met), stock options and directors' deferred-fee shares. See Note 3 for calculations associated with basic and diluted EPS.

Cash Equivalents—Cash equivalents are considered to be highly liquid securities with original maturities of three months or less.

Chicago Bridge & Iron Company N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Inventory—Inventory is recorded at the lower of cost and net realizable value and cost is determined using the first-in-first-out or weighted-average cost method. The cost of inventory includes acquisition costs, production or conversion costs, and other costs incurred to bring the inventory to a current location and condition. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. An allowance for excess or inactive inventory is recorded based upon an analysis that considers current inventory levels, historical usage patterns, estimates of future sales expectations and salvage value. See Note 5 for additional discussion of our inventory.

Foreign Currency—The nature of our business activities involves the management of various financial and market risks, including those related to changes in foreign currency exchange rates. The effects of translating financial statements of foreign operations into our reporting currency are recognized as a cumulative translation adjustment in accumulated other comprehensive income (loss) (“AOCI”) which is net of tax, where applicable. Foreign currency transactional and re-measurement exchange gains (losses) are included within cost of revenue and were not material for the three months ended March 31, 2017 and 2016.

Financial Instruments—We do not engage in currency speculation; however, we utilize foreign currency exchange rate derivatives on an ongoing basis to hedge against certain foreign currency related operating exposures. We generally seek hedge accounting treatment for contracts used to hedge operating exposures and designate them as cash flow hedges. Therefore, gains and losses, exclusive of credit risk and forward points (which represent the time value component of the fair value of our derivative positions), are included in AOCI until the associated underlying operating exposure impacts our earnings. Changes in the fair value of (1) credit risk and forward points, (2) instruments deemed ineffective during the period, and (3) instruments that we do not designate as cash flow hedges are recognized within cost of revenue.

For those contracts designated as cash flow hedges, we document all relationships between the derivative instruments and associated hedged items, as well as our risk-management objectives and strategy for undertaking hedge transactions. This process includes linking all derivatives to specific firm commitments or highly-probable forecasted transactions. We continually assess, at inception and on an ongoing basis, the effectiveness of derivative instruments in offsetting changes in the cash flow of the designated hedged items. Hedge accounting designation is discontinued when (1) it is determined that the derivative is no longer highly effective in offsetting changes in the cash flow of the hedged item, including firm commitments or forecasted transactions, (2) the derivative is sold, terminated, exercised, or expires, (3) it is no longer probable that the forecasted transaction will occur, or (4) we determine that designating the derivative as a hedging instrument is no longer appropriate. See Note 9 for additional discussion of our financial instruments.

Income Taxes—Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis using currently enacted income tax rates for the years in which the differences are expected to reverse. A valuation allowance (“VA”) is provided to offset any net deferred tax assets (“DTA(s)”) if, based upon the available evidence, it is more likely than not that some or all of the DTAs will not be realized. The realization of our net DTAs depends upon our ability to generate sufficient future taxable income of the appropriate character and in the appropriate jurisdictions.

Income tax and associated interest and penalty reserves, where applicable, are recorded in those instances where we consider it more likely than not that additional tax will be due in excess of amounts reflected in income tax returns filed worldwide, irrespective of whether or not we have received tax assessments. We continually review our exposure to additional income tax obligations and, as further information is known or events occur, changes in our tax and penalty reserves may be recorded within income tax expense and changes in interest reserves may be recorded in interest expense.

Partnering Arrangements—In the ordinary course of business, we execute specific projects and conduct certain operations through joint venture, consortium and other collaborative arrangements (collectively referred to as “venture(s)”). We have various ownership interests in these ventures, with such ownership typically proportionate to our

decision making and distribution rights. The ventures generally contract directly with the third party customer; however, services may be performed directly by the ventures, or may be performed by us, our partners, or a combination thereof.

Venture net assets consist primarily of working capital and property and equipment, and assets may be restricted from being used to fund obligations outside of the venture. These ventures typically have limited third party debt or have debt that is non-recourse in nature; however, they may provide for capital calls to fund operations or require participants in the venture to provide additional financial support, including advance payment or retention letters of credit.

Each venture is assessed at inception and on an ongoing basis as to whether it qualifies as a VIE under the consolidations guidance in ASC 810. A venture generally qualifies as a VIE when it (1) meets the definition of a legal entity, (2) absorbs the operational risk of the projects being executed, creating a variable interest, and (3) lacks sufficient capital investment from the partners, potentially resulting in the venture requiring additional subordinated financial support, if necessary, to finance its future activities.

Table of Contents

Chicago Bridge & Iron Company N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

If at any time a venture qualifies as a VIE, we perform a qualitative assessment to determine whether we are the primary beneficiary of the VIE and, therefore, need to consolidate the VIE. We are the primary beneficiary if we have (1) the power to direct the economically significant activities of the VIE and (2) the right to receive benefits from, and obligation to absorb losses of, the VIE. If the venture is a VIE and we are the primary beneficiary, or we otherwise have the ability to control the venture, we consolidate the venture. If we are not determined to be the primary beneficiary of the VIE, or only have the ability to significantly influence, rather than control the venture, we do not consolidate the venture. We account for unconsolidated ventures using either proportionate consolidation for both the Balance Sheet and Statement of Operations, when we meet the applicable accounting criteria to do so, or utilize the equity method. See Note 7 for additional discussion of our material partnering arrangements.

New Accounting Standards—In May 2014, the FASB issued Accounting Standards Update (“ASU”) 2014-09, which provides a single comprehensive accounting standard for revenue recognition for contracts with customers and supersedes current industry-specific guidance, including ASC 605-35. The new standard prescribes a five-step revenue recognition model that focuses on transfer of control and entitlement to payment when determining the amount of revenue to be recognized. The new model requires companies to identify contractual performance obligations and determine whether revenue should be recognized at a point in time or over time for each of these obligations. These concepts, as well as other aspects of the ASU, may change the method and/or timing of revenue recognition for certain of our contracts, primarily associated with our fabrication and manufacturing contracts. We expect that revenue generated from our EPC and engineering services contracts will continue to be recognized over time utilizing the cost-to-cost measure of progress consistent with current practice. We also expect our revenue recognition disclosures to significantly expand due to the new qualitative and quantitative requirements regarding the nature, amount, timing and uncertainty of revenue and cash flows arising from our contracts. We will adopt the standard, including any updates to the standard, upon its effective date in the first quarter 2018 utilizing the modified retrospective approach. This approach will result in a cumulative adjustment to beginning equity in the first quarter 2018 for uncompleted contracts impacted by the adoption of the standard. We are continuing to assess the potential impact of the new standard on our Financial Statements.

In February 2016, the FASB issued ASU 2016-02, which requires the recognition of a right-of-use asset and a lease liability for most lease arrangements with a term greater than one year, and increases qualitative and quantitative disclosures regarding leasing transactions. The standard is effective for us in the first quarter 2019, although early adoption is permitted. Transition requires application of the new guidance at the beginning of the earliest comparative balance sheet period presented utilizing a modified retrospective approach. We are assessing the timing of adoption of the new standard and its potential impact on our Financial Statements.

In the first quarter 2017, we adopted ASU 2015-11, which simplifies the subsequent measurement of our inventory by requiring inventory to be measured at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. Our adoption of the standard did not have a material impact on our Financial Statements.

In the first quarter 2017, we adopted ASU 2016-09, which modified the accounting for excess tax benefits and tax deficiencies associated with share-based payments, amended the associated cash flow presentation, and allows for forfeitures to be either recognized when they occur, or estimated. ASU 2016-09 eliminated the requirement to recognize excess tax benefits in additional paid-in capital (“APIC”), and the requirement to evaluate tax deficiencies for APIC or income tax expense classification, and provided for these benefits or deficiencies to be recorded as an income tax expense or benefit in the Statement of Operations. Additionally, tax benefits of dividends on share-based payment awards are reflected as an income tax expense or benefit in the income statement. With these changes, tax-related cash flows resulting from share-based payments are classified as operating activities as opposed to financing, as previously presented. We have elected to recognize forfeitures as they occur, rather than estimating expected forfeitures. Our adoption of the standard did not have a material impact on our Financial Statements.

In the first quarter 2017, the FASB issued, and we early adopted, ASU 2017-04, which eliminated the second step of the goodwill impairment test that required a hypothetical purchase price allocation. ASU 2017-04 requires that if a

reporting unit's carrying value exceeds its fair value, an impairment charge would be recognized for the excess amount, not to exceed the carrying amount of goodwill. Our early adoption of the standard in the first quarter 2017 did not have a material impact on our Financial Statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

3. EARNINGS PER SHARE

A reconciliation of weighted average basic shares outstanding to weighted average diluted shares outstanding and the computation of basic and diluted EPS are as follows:

	Three Months Ended March 31,	
	2017	2016
Net income from continuing operations attributable to CB&I (net of \$26,837 and \$12,589 of noncontrolling interests)	\$15,574	\$101,334
Net income from discontinued operations attributable to CB&I (net of \$413 and \$448 of noncontrolling interests)	9,081	5,591
Net income attributable to CB&I	\$24,655	\$106,925
Weighted average shares outstanding—basic	100,451	104,803
Effect of restricted shares/performance based shares/stock options ⁽¹⁾	892	969
Effect of directors' deferred-fee shares	17	13
Weighted average shares outstanding—diluted	101,360	105,785
Net income attributable to CB&I per share (Basic):		
Continuing operations	\$0.16	\$0.97
Discontinued operations	0.09	0.05
Total	\$0.25	\$1.02
Net income attributable to CB&I per share (Diluted):		
Continuing operations	\$0.15	\$0.96
Discontinued operations	0.09	0.05
Total	\$0.24	\$1.01

⁽¹⁾ Antidilutive shares excluded from diluted EPS were not material for the three months ended March 31, 2017 or 2016.

Chicago Bridge & Iron Company N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

4. DISPOSITION OF CAPITAL SERVICES OPERATIONS

Transaction Summary— As discussed in Note 2, on February 27, 2017, we entered into the Agreement for the sale of our Capital Services Operations. Under the Agreement, we will receive estimated transaction consideration of approximately \$755,000 (the “Sales Price”) upon closing, which is anticipated in the second quarter 2017. The Sales Price will be reduced or increased to the extent working capital of the Capital Services Operations is below or exceeds, respectively, required closing working capital under the Agreement. Although differences between actual closing working capital and required closing working capital will impact our net proceeds, we do not anticipate a material pre-tax gain or loss to result from the transaction upon closing. In addition, the transaction is anticipated to result in a taxable gain (due to the non-deductibility of goodwill) and corresponding income tax expense of approximately \$100,000 in the quarter of close; however, we do not anticipate any material cash taxes associated with the taxable gain due to the use of previously recorded net operating loss carryforwards. The net proceeds of the transaction will be used to reduce our outstanding debt. At March 31, 2017, the fair value of the Capital Services Operations exceeded the carrying value of its net assets.

Assets and Liabilities—The carrying values of the major classes of assets and liabilities of the discontinued Capital Services Operations within our Balance Sheets at March 31, 2017 and December 31, 2016 were as follows:

	March 31, December 31,	
	2017	2016
Assets		
Cash	\$ 17,782	\$ 14,477
Accounts receivable, net	265,634	239,146
Costs and estimated earnings in excess of billings	163,404	153,275
Other assets	36,751	7,834
Property and equipment, net	56,256	—
Goodwill ⁽¹⁾	229,607	—
Other intangibles, net	145,890	—
Current assets of discontinued operations	915,324	414,732
Property and equipment, net	—	59,746
Goodwill ⁽¹⁾	—	229,607
Other intangibles, net	—	148,440
Other assets	—	24,351
Non-current assets of discontinued operations	—	462,144
Total assets of discontinued operations	\$ 915,324	\$ 876,876
Liabilities		
Accounts payable	\$ 116,702	\$ 141,028
Billings in excess of costs and estimated earnings	54,946	53,986
Other liabilities	87,169	52,455
Current liabilities of discontinued operations	258,817	247,469
Other liabilities	—	5,388
Non-current liabilities of discontinued operations	—	5,388
Total liabilities of discontinued operations	\$ 258,817	\$ 252,857
Noncontrolling interests of discontinued operations	\$ 7,288	\$ 6,874

- (1) The carrying value of goodwill for the Capital Services Operations includes the impact of a \$655,000 impairment charge recorded in the fourth quarter 2016 in connection with our annual impairment assessment.

Table of Contents

Chicago Bridge & Iron Company N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Results of Operations—The results of our Capital Services Operations that have been reflected within discontinued operations in our Statement of Operations for the three months ended March 31, 2017 and 2016 were as follows:

	Three Months Ended	
	March 31,	
	2017	2016
Revenue	\$552,947	\$564,981
Cost of revenue	518,687	532,946
Gross profit	34,260	32,035
Selling and administrative expense	13,038	11,651
Intangibles amortization	2,550	4,200
Other operating income	(372)	(424)
Operating income from discontinued operations	19,044	16,608
Interest expense ⁽¹⁾	(6,863)	(5,833)
Interest income	9	309
Income from discontinued operations before taxes	12,190	11,084
Income tax expense	(2,696)	(5,045)
Net income from discontinued operations	9,494	6,039
Net income from discontinued operations attributable to noncontrolling interests	(413)	(448)
Net income from discontinued operations attributable to CB&I	\$9,081	\$5,591

⁽¹⁾ Interest expense was allocated to the Capital Services Operations due to a requirement to use the net proceeds of the transaction to repay our debt on a pro-rata basis. The allocation was based upon the anticipated pro-rata debt amounts to be repaid.

Cash Flows—Cash flows for our Capital Services Operations for the three months ended March 31, 2017 and 2016 were as follows:

	Three Months Ended	
	March 31,	
	2017	2016
Operating cash flows	\$(17,544)	\$(11,696)
Investing cash flows	\$(844)	\$(793)

Unapproved Change Orders, Claims and Incentives—At March 31, 2017 and December 31, 2016, our Capital Services Operations had unapproved change orders, claims and incentives included in project price of approximately \$19,600 and \$8,400, respectively. Of the aforementioned amounts, approximately \$16,800 had been recognized as revenue for the discontinued operations on a cumulative POC basis through March 31, 2017.

5. INVENTORY

The components of inventory at March 31, 2017 and December 31, 2016 were as follows:

	March 31, December 31,	
	2017	2016
Raw materials	\$ 107,898	\$ 65,969
Work in process	62,041	51,625
Finished goods	32,827	72,508
Total	\$ 202,766	\$ 190,102

Table of Contents

Chicago Bridge & Iron Company N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

6. GOODWILL AND OTHER INTANGIBLES

Goodwill—At March 31, 2017 and December 31, 2016, our goodwill balances were \$2,816,232 and \$2,813,803, respectively, attributable to the excess of the purchase price over the fair value of net assets acquired in connection with our acquisitions. The change in goodwill for the three months ended March 31, 2017 is as follows:

	Total
Balance at December 31, 2016	\$2,813,803
Foreign currency translation and other	2,631
Amortization of tax goodwill in excess of book goodwill	(202)
Balance at March 31, 2017 ⁽¹⁾	\$2,816,232

At March 31, 2017, we had approximately \$453,100 of cumulative impairment losses which were recorded in our

⁽¹⁾ Engineering & Construction operating group during 2015 related to the sale of our nuclear power construction business (our “Nuclear Operations”) on December 31, 2015.

As discussed further in Note 2, goodwill is not amortized to earnings, but instead is reviewed for impairment at least annually at a reporting unit level, absent any indicators of impairment or when other actions require an impairment assessment (such as a change in reporting units). We perform our annual impairment assessment during the fourth quarter of each year based upon balances as of October 1. At December 31, 2016, we had the following three operating groups and reporting units:

• **Engineering & Construction**—Our Engineering & Construction operating group represented a reporting unit.

• **Fabrication Services**—Our Fabrication Services operating group represented a reporting unit.

• **Technology**—Our Technology operating group represented a reporting unit.

During the three months ended December 31, 2016, we performed a quantitative assessment of goodwill for each of the aforementioned reporting units. Based upon these quantitative assessments, the fair value of each of these reporting units substantially exceeded their respective net book values, and accordingly, no impairment charge was necessary as a result of our impairment assessments. During the three months ended March 31, 2017, no indicators of goodwill impairment were identified for any of these reporting units. If, based on future assessments our goodwill is deemed to be impaired, the impairment would result in a charge to earnings in the period of impairment. There can be no assurance that future goodwill impairment tests will not result in charges to earnings. See Note 4 for discussion of our goodwill impairment for the Capital Services Operations recorded in the fourth quarter 2016 in connection with our annual impairment assessment.

Other Intangible Assets—The following table presents our acquired finite-lived intangible assets at March 31, 2017 and December 31, 2016, including the March 31, 2017 weighted-average useful lives for each major intangible asset class and in total:

	Weighted Average Life	March 31, 2017		December 31, 2016	
		Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Backlog and customer relationships	18 Years	\$99,086	\$(22,758)	\$99,086	\$(21,374)
Process technologies	15 Years	259,189	(134,005)	258,516	(129,261)
Tradenames	12 Years	27,125	(15,430)	27,090	(14,648)
Total ⁽¹⁾	16 Years	\$385,400	\$(172,193)	\$384,692	\$(165,283)

⁽¹⁾ The decrease in other intangibles, net during the three months ended March 31, 2017 primarily related to amortization expense of approximately \$6,500.

Chicago Bridge & Iron Company N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

7. PARTNERING ARRANGEMENTS

As discussed in Note 2, we account for our unconsolidated ventures using either proportionate consolidation, when we meet the applicable accounting criteria to do so, or the equity method. Further, we consolidate any venture that is determined to be a VIE for which we are the primary beneficiary, or which we otherwise effectively control.

Proportionately Consolidated Ventures—The following is a summary description of our significant joint ventures which have been accounted for using proportionate consolidation:

CB&I/Zachry—We have a venture with Zachry (CB&I—50% / Zachry—50%) to perform EPC work for two liquefied natural gas (“LNG”) liquefaction trains in Freeport, Texas. Our proportionate share of the venture project value is approximately \$2,700,000. In addition, we have subcontract and risk sharing arrangements with Chiyoda to support our responsibilities to the venture. The costs of these arrangements are recorded in cost of revenue.

CB&I/Zachry/Chiyoda—We have a venture with Zachry and Chiyoda (CB&I—33.3% / Zachry—33.3% / Chiyoda—33.3%) to perform EPC work for an additional LNG liquefaction train at the aforementioned project site in Freeport, Texas. Our proportionate share of the venture project value is approximately \$675,000.

CB&I/Chiyoda—We have a venture with Chiyoda (CB&I—50% / Chiyoda—50%) to perform EPC work for three LNG liquefaction trains in Hackberry, Louisiana. Our proportionate share of the venture project value is approximately \$3,200,000.

The following table presents summarized balance sheet information for our share of our proportionately consolidated ventures at March 31, 2017 and December 31, 2016:

	March 31, December 31,	
	2017	2016
CB&I/Zachry		
Current assets ⁽¹⁾	\$ 284,106	\$ 260,934
Non-current assets	2,571	3,204
Total assets	\$ 286,677	\$ 264,138
Current liabilities ⁽¹⁾	\$ 397,540	\$ 379,339
CB&I/Zachry/Chiyoda		
Current assets ⁽¹⁾	\$ 92,371	\$ 84,279
Non-current assets	1,745	1,969
Total assets	\$ 94,116	\$ 86,248
Current liabilities ⁽¹⁾	\$ 76,741	\$ 73,138
CB&I/Chiyoda		
Current assets ⁽¹⁾	\$ 344,070	\$ 337,479
Current liabilities ⁽¹⁾	\$ 138,372	\$ 150,179

(1) Our venture arrangements allow for excess working capital of the ventures to be advanced to the venture partners. Such advances are returned to the ventures for working capital needs as necessary. Accordingly, at a reporting period end a venture may have advances to its partners which are reflected as an advance receivable within current assets of the venture. At March 31, 2017 and December 31, 2016, other current assets on the Balance Sheet included approximately \$398,600 and \$374,800, respectively, related to our proportionate share of advances from the ventures to our venture partners, and other current liabilities included approximately \$420,800 and \$394,400, respectively, related to advances to CB&I from the ventures.

Equity Method Ventures—The following is a summary description of our significant joint ventures which have been accounted for using the equity method:

Chevron-Lummus Global (“CLG”)—We have a venture with Chevron (CB&I—50% / Chevron—50%) which provides proprietary process technology licenses and associated engineering services and catalyst, primarily for the refining industry. As sufficient capital investments in CLG have been made by the venture partners, it does not qualify as a VIE.

Table of Contents

Chicago Bridge & Iron Company N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

NET Power—We have a venture with Exelon and 8 Rivers Capital (CB&I—33.3% / Exelon—33.3% / 8 Rivers Capital—33.3%) to commercialize a new natural gas power generation system that recovers the carbon dioxide produced during combustion. NET Power is building a first-of-its-kind demonstration plant which is being funded by contributions and services from the venture partners and other parties. We have determined the venture to be a VIE; however, we do not effectively control NET Power and therefore do not consolidate it. Our cash commitment for NET Power totals \$47,300 and at March 31, 2017, we had made cumulative investments totaling approximately \$44,900.

CB&I/CTCI—We have a venture with CTCI (CB&I—50% / CTCI—50%) to perform EPC work for a liquids ethylene cracker and associated units in Sohar, Oman. We have determined the venture to be a VIE; however, we do not effectively control the venture and therefore do not consolidate it. Our proportionate share of the venture project value is approximately \$1,400,000. Our venture arrangement allows for excess working capital of the venture to be advanced to the venture partners. Such advances are returned to the venture for working capital needs as necessary. At March 31, 2017 and December 31, 2016, other current liabilities included approximately \$167,700 and \$147,000, respectively, related to advances to CB&I from the venture.

Consolidated Ventures—The following is a summary description of our significant joint ventures we consolidate due to their designation as VIEs for which we are the primary beneficiary:

CB&I/Kentz—We have a venture with Kentz (CB&I—65% / Kentz—35%) to perform the structural, mechanical, piping, electrical and instrumentation work on, and to provide commissioning support for, three LNG trains, including associated utilities and a gas processing and compression plant, for the Gorgon LNG project, located on Barrow Island, Australia. Our venture project value is approximately \$5,900,000.

CB&I/AREVA—We have a venture with AREVA (CB&I—52% / AREVA—48%) to design, license and construct a mixed oxide fuel fabrication facility in Aiken, South Carolina. Our venture project value is approximately \$5,800,000.

The following table presents summarized balance sheet information for our consolidated ventures at March 31, 2017 and December 31, 2016:

	March 31, 2017	December 31, 2016
CB&I/Kentz		
Current assets	\$ 126,162	\$ 68,867
Current liabilities	\$ 117,520	\$ 87,822
CB&I/AREVA		
Current assets	\$ 25,674	\$ 16,313
Current liabilities	\$ 43,349	\$ 47,652
All Other ⁽¹⁾		
Current assets	\$ 34,285	\$ 69,785
Non-current assets	16,634	16,382
Total assets	\$ 50,919	\$ 86,167
Current liabilities	\$ 9,475	\$ 7,748

(1) Other ventures that we consolidate are not individually material to our financial results and are therefore aggregated as “All Other”.

Other—The use of these ventures exposes us to a number of risks, including the risk that our partners may be unable or unwilling to provide their share of capital investment to fund the operations of the venture or complete their obligations to us, the venture, or ultimately, our customer. Differences in opinions or views among venture partners could also result in delayed decision-making or failure to agree on material issues, which could adversely affect the business and operations of the venture. In addition, agreement terms may subject us to joint and several liability for our venture partners, and the failure of our venture partners to perform their obligations could impose additional performance and financial obligations on us. The aforementioned factors could result in unanticipated costs to complete the projects, liquidated damages or contract disputes, including claims against our partners.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

8. DEBT

Our outstanding debt at March 31, 2017 and December 31, 2016 was as follows:

	March 31, 2017	December 31, 2016
Current		
Revolving facility and other short-term borrowings	\$917,500	\$ 407,500
Current maturities of long-term debt	225,000	506,250
Less: unamortized debt issuance costs	(1,171)	(2,340)
Current maturities of long-term debt, net of unamortized debt issuance costs	223,829	503,910
Current debt, net of unamortized debt issuance costs	\$1,141,329	\$ 911,410
Long-Term		
Term Loan: \$1,000,000 term loan (interest at LIBOR plus a floating margin)	\$—	\$ 300,000
Second Term Loan: \$500,000 term loan (interest at LIBOR plus a floating margin)	500,000	500,000
Senior Notes: \$800,000 senior notes, series A-D (fixed interest ranging from 4.15% to 5.30%)	800,000	800,000
Second Senior Notes: \$200,000 senior notes (fixed interest of 4.53%)	200,000	200,000
Less: unamortized debt issuance costs	(8,973)	(5,827)
Less: current maturities of long-term debt	(225,000)	(506,250)
Long-term debt, net of unamortized debt issuance costs	\$1,266,027	\$ 1,287,923

Committed Facilities—We have a five-year, \$1,350,000 committed revolving credit facility (the “Revolving Facility”) with Bank of America N.A. (“BofA”), as administrative agent, and BNP Paribas Securities Corp., BBVA Compass, Credit Agricole Corporate and Investment Bank (“Credit Agricole”) and TD Securities, each as syndication agents, which expires in October 2018. The Revolving Facility has a \$270,000 financial letter of credit sublimit and has financial and restrictive covenants described further below. The Revolving Facility also includes customary restrictions regarding subsidiary indebtedness, sales of assets, liens, investments, type of business conducted, and mergers and acquisitions, and includes a limitation for dividend payments and share repurchases, among other restrictions. In addition to interest on debt borrowings, we are assessed quarterly commitment fees on the unutilized portion of the facility as well as letter of credit fees on outstanding instruments. The interest, commitment fee, and letter of credit fee percentages are based upon our quarterly leverage ratio. In the event we borrow funds under the facility, interest is assessed at either prime plus an applicable floating margin, or LIBOR plus an applicable floating margin, as described further below. At March 31, 2017, we had \$505,000 of outstanding borrowings under the facility and \$69,073 of outstanding letters of credit under the facility (none of which were financial letters of credit), providing \$775,927 of available capacity. During the three months ended March 31, 2017, our weighted average interest rate on borrowings under the facility was approximately 2.9%, inclusive of the applicable floating margin. We have a five-year, \$800,000 committed revolving credit facility (the “Second Revolving Facility”) with BofA, as administrative agent, and BNP Paribas Securities Corp., BBVA Compass, Credit Agricole and Bank of Tokyo Mitsubishi UFJ, each as syndication agents, which expires in July 2020. The Second Revolving Facility supplements our Revolving Facility, has a \$50,000 financial letter of credit sublimit and has financial and restrictive covenants described further below. In addition to interest on debt borrowings, we are assessed quarterly commitment fees on the unutilized portion of the facility as well as letter of credit fees on outstanding instruments. The interest, commitment fee, and letter of credit fee percentages are based upon our quarterly leverage ratio. In the event we borrow funds under the facility, interest is assessed at either prime plus an applicable floating margin, or LIBOR plus an applicable floating margin, as described further below. At March 31, 2017, we had \$212,500 of outstanding borrowings and \$7,551 of outstanding letters of credit under the facility (including \$2,757 of financial letters of credit), providing \$579,949 of available capacity. During the three months ended March 31, 2017, our weighted average interest rate on borrowings under the facility was approximately 5.0%, inclusive of the applicable floating margin.

Uncommitted Facilities—We also have various short-term, uncommitted letter of credit and borrowing facilities (the “Uncommitted Facilities”) across several geographic regions of approximately \$4,567,776, of which \$563,000 may be utilized for borrowings. At March 31, 2017, we had \$200,000 of outstanding borrowings and \$1,737,589 of outstanding letters of credit under these facilities, providing \$2,630,187 of available capacity, of which \$363,000 may be utilized for borrowings. During the three months ended March 31, 2017, our weighted average interest rate on borrowings under the facilities was approximately 2.2%.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Term Loans—On February 13, 2017, we paid the remaining \$300,000 of principal on our four-year, \$1,000,000 unsecured term loan (the “Term Loan”) with BofA as administrative agent. Interest was based upon LIBOR plus an applicable floating margin for the period (0.98% and 2.25%, respectively). In conjunction with the settlement of the Term Loan, we also settled our associated interest rate swap that hedged against a portion of the Term Loan, which resulted in a weighted average interest rate of approximately 2.6% during the three months ended March 31, 2017. At March 31, 2017, we had \$500,000 outstanding on a five-year, \$500,000 term loan (the “Second Term Loan”) with BofA as administrative agent. Interest and principal under the Second Term Loan is payable quarterly in arrears beginning in June 2017 and bears interest at LIBOR plus an applicable floating margin, as described further below. During the three months ended March 31, 2017, our weighted average interest rate on the Second Term Loan was approximately 2.4%, inclusive of the applicable floating margin. Future annual maturities for the Second Term Loan are \$56,250, \$75,000, \$75,000 and \$293,750 for 2017, 2018, 2019, and 2020, respectively. The Second Term Loan has financial and restrictive covenants described further below.

Senior Notes—We have a series of senior notes totaling \$800,000 in the aggregate (the “Senior Notes”) with Merrill Lynch, Pierce, Fenner & Smith Incorporated, and Credit Agricole, as administrative agents. The Senior Notes have financial and restrictive covenants described further below. The Senior Notes include Series A through D, which contain the following terms:

Series A—Interest due semi-annually at a fixed rate of 4.15%, with principal of \$150,000 due in December 2017

Series B—Interest due semi-annually at a fixed rate of 4.57%, with principal of \$225,000 due in December 2019

Series C—Interest due semi-annually at a fixed rate of 5.15%, with principal of \$275,000 due in December 2022

Series D—Interest due semi-annually at a fixed rate of 5.30%, with principal of \$150,000 due in December 2024

We have senior notes totaling \$200,000 (the “Second Senior Notes”) with BofA as administrative agent. Interest is due semi-annually at a fixed rate of 4.53%, with principal of \$200,000 due in July 2025. The Second Senior Notes have financial and restrictive covenants described further below.

Compliance and Other—On February 24, 2017, and effective for the period ended December 31, 2016, we amended our Revolving Facility, Second Revolving Facility, Second Term Loan, Senior Notes and Second Senior Notes (collectively, “Senior Facilities”). The amendments established a new maximum leverage ratio of 3.50 at December 31, 2016, decreasing to 3.00 at December 31, 2017, or 45 days subsequent to the closing of the sale of our Capital Services Operations (the “Closing Date”) as described in Note 4, if earlier. The amendments also established a new minimum net worth of \$1,201,507, maintained our required fixed charge ratio at 1.75, and will reduce our Revolving Facility from \$1,350,000 to \$1,150,000 at the Closing Date. The amendments also included other financial and restrictive covenants.

On May 8, 2017, and effective for the period ended March 31, 2017, we further amended our Senior Facilities. The amendments require us to secure the Senior Facilities through the pledge of cash, accounts receivable, inventory, fixed assets, and stock of subsidiaries. In addition, the amendments require us to repay the Senior Facilities on a pro-rata basis with the proceeds from the sale of our Capital Services Operations, the issuance of any unsecured debt that is subordinate (“Subordinated Debt”) to the Senior Facilities, the issuance of any equity securities, or the sale of any assets. The amendments also establish new maximum leverage ratios for borrowings under the Senior Facilities (“Senior Secured Leverage Ratio”) as follows: 4.00 at March 31, 2017; 4.50 at June 30, 2017 and September 30, 2017; 3.00 at December 31, 2017 and March 31, 2018; and 2.50 at June 30, 2018. The amendments prohibit mergers and acquisitions, open-market share repurchases, and increases to dividends until our leverage ratio is below 3.00 for two consecutive quarters. In addition to the Senior Secured Leverage Ratio, the amendments establish total maximum leverage ratios for all borrowings among the Senior Facilities and any Subordinated Debt as follows: 5.25 at June 30, 2017; 6.00 at September 30, 2017; 4.00 at December 31, 2017 and March 31, 2018; 3.25 at June 30, 2018; and 3.00 at September 30, 2018.

Interest on outstanding borrowings under the amended Revolving Facility, Second Revolving Facility and the Second Term Loan is based on our quarterly leverage ratio and is assessed at either prime plus an applicable floating margin (4.00% and 1.50%, respectively at March 31, 2017), or LIBOR plus an applicable floating margin (0.98% and 2.50%,

respectively at March 31, 2017). Our fixed rate interest on our amended Senior Notes and Second Senior Notes was increased by an incremental 0.50% over the rates in effect at March 31, 2017 discussed above. Further, the amended Senior Notes and Second Senior Notes include provisions relating to our credit profile, which if not maintained will result in an incremental annual cost of up to 2.00% of the outstanding balance under the notes.

Table of Contents

Chicago Bridge & Iron Company N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

During the three months ended March 31, 2017, maximum outstanding borrowings under our Revolving Facility and Second Revolving Facility (collectively, “Committed Facilities”) and Uncommitted Facilities were approximately \$1,709,000. At March 31, 2017, we were in compliance with all our amended financial and restrictive covenants of our Senior Facilities with a leverage ratio of 3.91, a fixed charge coverage ratio of 3.07, and net worth of \$1,460,718. If we are unable to remain in compliance with these covenants, and such covenants are not further amended, it could result in all of our debt becoming current. Our ability to remain in compliance with such covenants in the second quarter 2017, and over the next twelve months, will require the successful securitization of the assets required under the amendments to our Senior Facilities and will likely require us to complete the sale of our Capital Services Operations during the second quarter 2017 to reduce our debt, which we believe is probable.

In addition to providing letters of credit, we also issue surety bonds in the ordinary course of business to support our contract performance. At March 31, 2017, we had \$837,707 of outstanding surety bonds. Capitalized interest was insignificant for the three months ended March 31, 2017 and 2016.

9. FINANCIAL INSTRUMENTS**Derivatives**

Foreign Currency Exchange Rate Derivatives—At March 31, 2017, the notional value of our outstanding forward contracts to hedge certain foreign exchange-related operating exposures was approximately \$143,600. These contracts vary in duration, maturing up to five years from period-end. We designate certain of these hedges as cash flow hedges and accordingly, changes in their fair value are recognized in AOCI until the associated underlying operating exposure impacts our earnings. Forward points, which are deemed to be an ineffective portion of the hedges, are recognized within cost of revenue and are not material.

Financial Instruments Disclosures

Fair Value—Financial instruments are required to be categorized within a valuation hierarchy based upon the lowest level of input that is significant to the fair value measurement. The three levels of the valuation hierarchy are as follows:

Level 1—Fair value is based upon quoted prices in active markets.

Level 2—Fair value is based upon internally-developed models that use, as their basis, readily observable market parameters. Our derivative positions are classified within level 2 of the valuation hierarchy as they are valued using quoted market prices for similar assets and liabilities in active markets. These level 2 derivatives are valued utilizing an income approach, which discounts future cash flow based upon current market expectations and adjusts for credit risk.

Level 3—Fair value is based upon internally-developed models that use, as their basis, significant unobservable market parameters. We did not have any level 3 classifications at March 31, 2017 or December 31, 2016.

The following table presents the fair value of our foreign currency exchange rate derivatives and interest rate derivatives at March 31, 2017 and December 31, 2016, respectively, by valuation hierarchy and balance sheet classification:

	March 31, 2017				December 31, 2016			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Derivative Assets ⁽¹⁾								
Other current assets	\$-\$1,220	\$	—\$1,220	\$-\$1,146	\$	—\$1,146		
Other non-current assets	—242	—	242	—82	—	82		
Total assets at fair value	\$-\$1,462	\$	—\$1,462	\$-\$1,228	\$	—\$1,228		
Derivative Liabilities								
Other current liabilities	\$-\$ (4,372)	\$	—\$ (4,372)	\$-\$ (3,509)	\$	—\$ (3,509)		
Other non-current liabilities	—(581))	—(581))	—(725))	—(725))
Total liabilities at fair value	\$-\$ (4,953)	\$	—\$ (4,953)	\$-\$ (4,234)	\$	—\$ (4,234)		

(1)

We are exposed to credit risk on our hedging instruments associated with potential counterparty non-performance, and the fair value of our derivatives reflects this credit risk. The total level 2 assets at fair value above represent the maximum loss that we would incur on our outstanding hedges if the applicable counterparties failed to perform according to the hedge contracts. To help mitigate counterparty credit risk, we transact only with counterparties that are rated as investment grade or higher and monitor all counterparties on a continuous basis.

Table of Contents

Chicago Bridge & Iron Company N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The carrying values of our cash and cash equivalents (primarily consisting of bank deposits), accounts receivable and accounts payable approximate their fair values because of the short-term nature of these instruments. At March 31, 2017, the fair values of our Second Term Loan, based upon the current market rates for debt with similar credit risk and maturities, approximated its carrying value as interest is based upon LIBOR plus an applicable floating margin. Our Senior Notes and Second Senior Notes are categorized within level 2 of the valuation hierarchy. Our Senior Notes had a total fair value of approximately \$796,100 and \$785,700 at March 31, 2017 and December 31, 2016, respectively, based on current market rates for debt with similar credit risk and maturities. Our Second Senior Notes had a total fair value of approximately \$204,000 and \$206,400 at March 31, 2017 and December 31, 2016, respectively, based on current market rates for debt with similar credit risk and maturities.

Derivatives Disclosures

Fair Value—The following table presents the total fair value by underlying risk and balance sheet classification for derivatives designated as cash flow hedges and derivatives not designated as cash flow hedges at March 31, 2017 and December 31, 2016:

	Other Current and Non-Current Assets		Other Current and Non-Current Liabilities	
	March 31, 2017	December 31, 2016	March 31, 2017	December 31, 2016
Derivatives designated as cash flow hedges				
Interest rate	\$—	\$ 49	\$—	\$ —
Foreign currency	505	109	(325)	(536)
Fair value	\$505	\$ 158	\$(325)	\$(536)
Derivatives not designated as cash flow hedges				
Foreign currency	\$957	\$ 1,070	\$(4,628)	\$(3,698)
Fair value	\$957	\$ 1,070	\$(4,628)	\$(3,698)
Total fair value	\$1,462	\$ 1,228	\$(4,953)	\$(4,234)

Master Netting Arrangements (“MNAs”)—Our derivatives are executed under International Swaps and Derivatives Association MNAs, which generally allow us and our counterparties to net settle, in a single net payable or receivable, obligations due on the same day, in the same currency and for the same type of derivative instrument. We have elected the option to record all derivatives on a gross basis in our Balance Sheet. The following table presents our derivative assets and liabilities at March 31, 2017 on a gross basis and a net settlement basis:

	Gross Amounts Recognized (i)	Gross Amounts Offset on the Balance Sheet (ii)	Net Amounts Presented on the Balance Sheet (iii) = (i) - (ii)	Gross Amounts Not Offset on the Balance Sheet (iv) Financial Instruments	Cash Collateral Received	Net Amount (v) = (iii) - (iv)
Derivative Assets						
Foreign currency	1,462	—	1,462	(167)	—	1,295
Total assets	\$ 1,462	\$	—\$ 1,462	\$ (167)	\$	—\$ 1,295
Derivative Liabilities						
Foreign currency	(4,953)	—	(4,953)	167	—	(4,786)

10. RETIREMENT BENEFITS

Our 2016 Annual Report disclosed anticipated 2017 defined benefit pension and other postretirement plan contributions of approximately \$17,000 and \$2,500, respectively. The following table provides updated contribution information for these plans at March 31, 2017:

	Pension Plans	Other Postretirement Plans
Contributions made through March 31, 2017	\$ 7,384	\$ 479
Contributions expected for the remainder of 2017	9,817	1,857
Total contributions expected for 2017	\$ 17,201	\$ 2,336

The following table provides a breakout of the components of net periodic benefit cost (income) associated with our defined benefit pension and other postretirement plans for the three months ended March 31, 2017 and 2016:

	Three Months Ended March 31,	
	2017	2016
Pension Plans		
Service cost	\$2,782	\$2,327
Interest cost	4,591	5,918
Expected return on plan assets	(5,786)	(6,796)
Amortization of prior service credits	(150)	(154)
Recognized net actuarial losses	1,498	1,461
Net periodic benefit cost	\$2,935	\$2,756
Other Postretirement Plans		
Service cost	\$171	\$176
Interest cost	342	340
Recognized net actuarial gains	(685)	(840)
Net periodic benefit income	\$(172)	\$(324)

11. COMMITMENTS AND CONTINGENCIES

Legal Proceedings

General—We have been and may from time to time be named as a defendant in legal actions claiming damages in connection with engineering and construction projects, technology licenses, other services we provide, and other matters. These are typically claims that arise in the normal course of business, including employment-related claims and contractual disputes or claims for personal injury or property damage which occur in connection with services performed relating to project or construction sites. Contractual disputes normally involve claims relating to the timely completion of projects, performance of equipment or technologies, design or other engineering services or project construction services provided by us. We do not believe that any of our pending contractual, employment-related personal injury or property damage claims and disputes will have a material adverse effect on our results of operations, financial position or cash flow. See Note 14 for additional discussion of claims associated with our projects.

Project Arbitration Matter—The customer for one of our large cost-reimbursable projects has filed a request for arbitration with the International Chamber of Commerce, alleging cost overruns on the project. The customer has not provided evidence to substantiate its allegations and we believe all amounts incurred and billed on the project, including outstanding receivables of approximately \$241,000 as of March 31, 2017, are contractually due under the provisions of our contract and are recoverable, but have been classified as a non-current asset on our Balance Sheet as we do not anticipate collection within the next year. We do not believe a risk of material loss is probable related to this matter, and accordingly, no amounts have been accrued. While it is possible that a loss may be incurred, we are unable to estimate the range of potential loss, if any. Further, we have asserted counterclaims for our outstanding receivables.

Chicago Bridge & Iron Company N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Dispute Related to Sale of Nuclear Operations—On December 31, 2015, we sold our Nuclear Operations to Westinghouse Electric Company LLC (“WEC”). In connection with the transaction, a customary post-closing purchase price adjustment mechanism was negotiated between CB&I and WEC (the “Parties”) to account for any difference between target working capital and actual working capital as finally determined. On April 28, 2016, WEC delivered to us a purported closing statement estimating closing working capital to be negative \$976,506, which was \$2,150,506 less than target working capital. In contrast, we calculated closing working capital to be \$1,601,805, which is \$427,805 greater than target working capital. On July 21, 2016, we filed a complaint against WEC in the Court of Chancery in the State of Delaware (the “Court”) seeking a declaration that WEC has no remedy for the vast majority of its claims and requesting an injunction barring WEC from bringing such claims. On December 2, 2016, the Court granted WEC’s motion for judgment on the pleadings and dismissed our complaint, stating that the dispute should follow the dispute resolution process as set forth in the sales agreement. We filed an appeal of the Court’s ruling to the Delaware Supreme Court. Due to the bankruptcy filing by WEC on March 29, 2017, the claim resolution proceedings were automatically stayed pursuant to the Bankruptcy Code. At the parties request, the Bankruptcy Court lifted the automatic stay to permit the appeal and dispute resolution process to continue. As such, the oral argument before the Delaware Superior Court was held on May 3, 2017 and we anticipate a decision within approximately 30 days. The Parties intend to move forward with the dispute resolution process, involving the selection of a new independent auditor to replace the previous auditor that resigned. We do not believe a risk of material loss is probable related to this matter, and accordingly, no amounts have been accrued. While it is possible that a loss may be incurred, we are unable to estimate the range of potential loss, if any. We intend to vigorously pursue this litigation and our rights under the purchase agreement.

Asbestos Litigation—We are a defendant in lawsuits wherein plaintiffs allege exposure to asbestos due to work we may have performed at various locations. We have never been a manufacturer, distributor or supplier of asbestos products. Over the past several decades and through March 31, 2017, we have been named a defendant in lawsuits alleging exposure to asbestos involving approximately 6,100 plaintiffs and, of those claims, approximately 1,200 claims were pending and 4,900 have been closed through dismissals or settlements. Over the past several decades and through March 31, 2017, the claims alleging exposure to asbestos that have been resolved have been dismissed or settled for an average settlement amount of approximately two thousand dollars per claim. We review each case on its own merits and make accruals based upon the probability of loss and our estimates of the amount of liability and related expenses, if any. While we have seen an increase in the number of recent filings, especially in one specific venue, we do not believe the increase or any unresolved asserted claims will have a material adverse effect on our future results of operations, financial position or cash flow, and at March 31, 2017, we had approximately \$8,800 accrued for liability and related expenses. With respect to unasserted asbestos claims, we cannot identify a population of potential claimants with sufficient certainty to determine the probability of a loss and to make a reasonable estimate of liability, if any. While we continue to pursue recovery for recognized and unrecognized contingent losses through insurance, indemnification arrangements or other sources, we are unable to quantify the amount, if any, that we may expect to recover because of the variability in coverage amounts, limitations and deductibles, or the viability of carriers, with respect to our insurance policies for the years in question.

Environmental Matters—Our operations are subject to extensive and changing U.S. federal, state and local laws and regulations, as well as the laws of other countries, that establish health and environmental quality standards. These standards, among others, relate to air and water pollutants and the management and disposal of hazardous substances and wastes. We are exposed to potential liability for personal injury or property damage caused by any release, spill, exposure or other accident involving such pollutants, substances or wastes.

In connection with the historical operation of our facilities, including those associated with acquired operations, substances which currently are or might be considered hazardous were used or disposed of at some sites that will or may require us to make expenditures for remediation. In addition, we have agreed to indemnify parties from whom we have purchased or to whom we have sold facilities for certain environmental liabilities arising from acts occurring before the dates those facilities were transferred.

We believe we are in compliance, in all material respects, with environmental laws and regulations and maintain insurance coverage to mitigate our exposure to environmental liabilities. We do not believe any environmental matters will have a material adverse effect on our future results of operations, financial position or cash flow. We do not anticipate we will incur material capital expenditures for environmental controls or for the investigation or remediation of environmental conditions during the remainder of 2017 or 2018.

12. ACCUMULATED OTHER COMPREHENSIVE INCOME

The following table presents changes in AOCI, net of tax, by component, during the three months ended March 31, 2017:

	Currency Translation Adjustment (1)	Unrealized Fair Value Of Cash Flow Hedges	Defined Benefit Pension and Other Postretirement Plans	Total
Balance at December 31, 2016	\$(264,562)	\$ (213)	\$ (130,841)	\$(395,616)
OCI before reclassifications	23,935	451	(2,081)	22,305
Amounts reclassified from AOCI	—	(98)	572	474
Net OCI	23,935	353	(1,509)	22,779
Balance at March 31, 2017	\$(240,627)	\$ 140	\$ (132,350)	\$(372,837)

During the three months ended March 31, 2017, the currency translation adjustment component of AOCI was (1) favorably impacted by net movements in the Australian Dollar, British Pound, and Euro exchange rates against the U.S. Dollar.

The following table presents reclassification of AOCI into earnings, net of tax, for each component, during the three months ended March 31, 2017:

	Amount Reclassified From AOCI
Unrealized Fair Value Of Cash Flow Hedges (1)	
Interest rate derivatives (interest expense)	\$ (49)
Foreign currency derivatives (cost of revenue)	(124)
Total before tax	\$ (173)
Tax	75
Total net of tax	\$ (98)
Defined Benefit Pension and Other Postretirement Plans (2)	
Amortization of prior service credits	\$ (150)
Recognized net actuarial losses	813
Total before tax	\$ 663
Tax	(91)
Total net of tax	\$ 572

(1) See Note 9 for further discussion of our cash flow hedges, including the total value reclassified from AOCI to earnings.

(2) See Note 10 for further discussion of our defined benefit and other postretirement plans, including the components of net periodic benefit cost.

13. EQUITY-BASED INCENTIVE PLANS AND OTHER EQUITY ACTIVITY

General—Under our equity-based incentive plans (our “Incentive Plans”), we can issue shares to employees and directors in the form of restricted stock units (“RSUs”), performance based shares (including those based upon financial or stock price performance) and stock options. Changes in common stock, APIC and treasury stock during the three months ended March 31, 2017 and 2016 primarily relate to activity associated with our Incentive Plans and share repurchases.

Share Grants—During the three months ended March 31, 2017, we had the following share grants associated with our Incentive Plans:

	Shares ⁽¹⁾	Weighted Average Grant-Date Fair Value per Share
RSUs	852	\$ 35.98
Financial performance based shares	597	\$ 36.00
Stock performance based shares	149	\$ 44.21
Total shares granted	1,598	

⁽¹⁾ No stock options were granted during the three months ended March 31, 2017.

Share Issuances—During the three months ended March 31, 2017, we had the following share issuances associated with our Incentive Plans and employee stock purchase plan (“ESPP”):

	Shares
Financial performance based shares (issued upon vesting)	49
RSUs (issued upon vesting)	617
Stock options (issued upon exercise)	32
ESPP shares (issued upon sale)	110
Total shares issued	808

Stock-Based Compensation Expense—During the three months ended March 31, 2017 and 2016, we recognized stock-based compensation expense, primarily within selling and administrative expense, of \$10,247 and \$14,500, respectively (including \$676 and \$922, respectively, associated with our discontinued Capital Services Operations).

We recognize forfeitures as they occur, rather than estimating expected forfeitures.

Share Repurchases—During the three months ended March 31, 2017, we repurchased 219 shares for \$7,359 (an average price of \$33.60) for taxes withheld on taxable share distributions.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

14. UNAPPROVED CHANGE ORDERS, CLAIMS, INCENTIVES AND OTHER PROJECT MATTERS

Unapproved Change Orders, Claims and Incentives—At March 31, 2017 and December 31, 2016, we had unapproved change orders and claims included in project price totaling approximately \$505,800 and \$121,100, respectively, for projects within our Engineering & Construction and Fabrication Services operating groups. Our unapproved change orders and claims at March 31, 2017 are primarily related to a proportionately consolidated joint venture project and a consolidated joint venture project. The change orders and claims are primarily related to schedule related delays, fabrication activities and disputes regarding certain reimbursable billings. Approximately \$166,000 of the unapproved change orders and claims are subject to arbitration proceedings that are in the early stages and the remainder are subject to early commercial discussions. At March 31, 2017 and December 31, 2016, we also had incentives included in project price of approximately \$38,200 and \$43,000, respectively, for projects within our Engineering & Construction and Fabrication Services operating groups. Of the aforementioned unapproved change orders, claims and incentives, approximately \$454,300 had been recognized as revenue on a cumulative POC basis through March 31, 2017.

The aforementioned amounts recorded in project price reflect our best estimate of recovery amounts; however, the ultimate resolution and amounts received could differ from these estimates and could have a material adverse effect on our results of operations, financial position and cash flow. See Note 11 for further discussion of outstanding receivables related to one of our large cost-reimbursable projects. See Note 4 for discussion of unapproved change orders, claims and incentives related to our Capital Services Operations.

Westinghouse Bankruptcy—At March 31, 2017, we had approximately \$40,000 of accounts receivable and unbilled amounts due from Westinghouse. On March 29, 2017, Westinghouse filed voluntary petitions to reorganize under Chapter 11 of the U.S. Bankruptcy Code (“Westinghouse Bankruptcy”). We currently do not believe the Westinghouse Bankruptcy will impact the realizability of the receivable amounts and therefore, no amounts have been reserved as of March 31, 2017.

Other Project Matters—Backlog for each of our operating groups generally consists of several hundred contracts and our results may be impacted by changes in estimated project margins. For the three months ended March 31, 2017, significant changes in estimated margins on three projects resulted in a decrease to our income from operations of approximately \$167,000, and two projects resulted in an increase to our income from operations of approximately \$103,000, all within our Engineering & Construction operating group. For the three months ended March 31, 2016, individual projects with significant changes in estimated margins did not have a material net impact on our income from continuing operations.

Two of the projects that resulted in a decrease to our income from operations for the 2017 period (approximately \$143,000 combined) were in a loss position at March 31, 2017. Both loss projects were impacted primarily by lower than anticipated labor productivity and further extensions of schedule. At March 31, 2017, one project was approximately 67% complete, had a reserve for estimated losses of approximately \$70,000, and is forecasted to be completed in January 2018. The other loss project was approximately 85% complete, had a reserve for estimated losses of approximately \$12,000, and is forecasted to be completed in September 2017. The other project that resulted in a decrease to our income from operations was impacted by the net effects (approximately \$24,000, including the dilutive effect) of cost increases related to increased fabrication costs and craft labor, subcontractor and indirect costs associated with an extension of schedule, partly offset by the benefit of an increase in project price for claims on the project. Our current forecast for these projects anticipates improvement in productivity from our recent historical experience through modified execution plans and a favorable commercial resolution of schedule liquidated damages for the two loss projects. If future labor productivity differs from our current estimates, our schedules are further extended, or the loss projects incur schedule liquidated damages due to our inability to reach a favorable commercial resolution on such matters, the projects may experience additional forecast cost increases.

The projects that resulted in an increase to our income from operations for the 2017 period (approximately \$103,000 combined) benefited from changes in estimated recoveries and included a large consolidated joint venture project and a separate cost reimbursable project.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

15. SEGMENT INFORMATION

Our management structure and internal and public segment reporting are aligned based upon the services offered by our three operating groups, which represent our reportable segments: Engineering & Construction; Fabrication Services; and Technology. Our chief operating decision maker evaluates the performance of the aforementioned operating groups based upon revenue and income from operations. Each operating group's income from operations reflects corporate costs, allocated based primarily upon revenue. Intersegment revenue for our continuing operations is netted against the revenue of the segment receiving the intersegment services. For the three months ended March 31, 2017 and 2016, intersegment revenue totaled approximately \$141,400 and \$40,900, respectively. Intersegment revenue for the aforementioned periods primarily related to services provided by our Fabrication Services operating group to our Engineering & Construction operating group.

As a result of the classification of our Capital Services Operations (which is primarily comprised of our former Capital Services reportable segment) as a discontinued operation, the 2016 information for our remaining segments presented below has been recast to reflect: 1) a reallocation of certain corporate amounts previously allocated to the Capital Services segment that were not assignable to the discontinued operation, and 2) the portions of the previously reported Capital Services segment that are not included in the Capital Services Operations and the portions of other segments that are included in the Capital Services Operations. In addition, revenue for the remaining segments has been recast to reflect the intersegment revenue with our Capital Services Operations that was previously eliminated prior to the discontinued operations classification (approximately \$15,900 and \$31,900 for the three months ended March 31, 2017 and 2016, respectively).

The following table presents total revenue and income from operations by reportable segment for the three months ended March 31, 2017 and 2016:

	Three Months Ended March 31,	
	2017	2016
Revenue		
Engineering & Construction	\$1,280,753	\$1,536,361
Fabrication Services	478,572	533,706
Technology	68,027	64,562
Total revenue	\$1,827,352	\$2,134,629
Income From Continuing Operations		
Engineering & Construction	\$5,414	\$108,073
Fabrication Services	52,059	37,110
Technology	21,515	26,149
Total income from operations from continuing operations	\$78,988	\$171,332

The following table presents total assets by reportable segment at March 31, 2017 and December 31, 2016:

	March 31,	December 31,
	2017	2016
Assets		
Engineering & Construction	\$3,898,095	\$3,572,399
Fabrication Services	2,306,088	2,394,041
Technology	944,464	996,104
Total assets of continuing operations	7,148,647	6,962,544
Assets of discontinued operations (Note 4)	915,324	876,876
Total assets	\$8,063,971	\$7,839,420

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following "Management's Discussion and Analysis of Financial Condition and Results of Operations" is provided to assist readers in understanding our financial performance during the periods presented and significant trends that may impact our future performance. This discussion should be read in conjunction with our Financial Statements and the related notes thereto.

OVERVIEW

General—We provide a wide range of services through our three operating groups, including conceptual design, technology, engineering, procurement, fabrication, modularization, construction and commissioning services to customers in the energy infrastructure market throughout the world. Our operating groups, which represent our reportable segments, include: Engineering & Construction; Fabrication Services; and Technology. Our Capital Services Operations (primarily comprised of our former Capital Services reportable segment), which provides comprehensive and integrated maintenance services, environmental engineering and remediation, construction services, program management, and disaster response and recovery services for private-sector customers and governments, is reported as a discontinued operation and is described further in Note 2 and Note 4 to our Financial Statements.

We continue to be broadly diversified across the global energy infrastructure market with a backlog of \$13.9 billion at March 31, 2017 (including approximately \$1.5 billion related to our equity method joint ventures and excluding \$5.3 billion related to our discontinued Capital Services Operations). Our geographic diversity is illustrated by approximately 25% of our year to date 2017 revenue coming from projects outside the U.S. and approximately 25% of our March 31, 2017 backlog being comprised of projects outside the U.S. The geographic mix of our revenue will evolve consistent with changes in our backlog mix, as well as shifts in future global energy demand. Our diversity in energy infrastructure end markets ranges from downstream activities such as gas processing, LNG, refining, and petrochemicals, to fossil based power plants and upstream activities such as offshore oil and gas and onshore oil sands projects. Planned investments across the natural gas value chain, including LNG and petrochemicals, remain strong, and we anticipate additional benefits from continued investments in projects based on U.S. shale gas. Global investments in power and petrochemical facilities are expected to continue, as are investments in various types of facilities which require storage structures and pre-fabricated pipe.

Our long-term contracts are awarded on a competitively bid and negotiated basis using a range of contracting options, including cost-reimbursable, fixed-price and hybrid, which has both cost-reimbursable and fixed-price characteristics. Under cost-reimbursable contracts, we generally perform our services in exchange for a price that consists of reimbursement of all customer-approved costs and a profit component, which is typically a fixed rate per hour, an overall fixed fee or a percentage of total reimbursable costs. Under fixed-price contracts, we perform our services and execute our projects at an established price. The timing of our revenue recognition may be impacted by the contracting structure of our contracts. Cost-reimbursable contracts, and hybrid contracts with a more significant cost-reimbursable component, generally provide our customers with greater influence over the timing of when we perform our work, and accordingly, such contracts often result in less predictability with respect to the timing of our revenue. Fixed-price contracts, and hybrid contracts with a more significant fixed-price component, tend to provide us with greater control over project schedule and the timing of when work is performed and costs are incurred, and accordingly, when revenue is recognized. Our shorter-term contracts and services are generally provided on a cost-reimbursable, fixed-price or unit price basis. Our March 31, 2017 backlog distribution by contracting type was approximately 85% fixed-price, hybrid, or unit based, and 15% cost-reimbursable and is further described below within our operating group discussion.

New awards represent the expected revenue value of new contract commitments received during a given period, as well as scope growth on existing commitments. Backlog represents the unearned value of our new awards. New awards and backlog include the entire award values for joint ventures we consolidate and our proportionate share of award values for joint ventures we proportionately consolidate. New awards and backlog also include our pro-rata share of the award values for unconsolidated joint ventures we account for under the equity method. As the net results for our equity method joint ventures are recognized as equity earnings, their revenue is not presented in our Condensed Consolidated Statement of Operations ("Statement of Operations").

Table of Contents

Backlog for each of our operating groups generally consists of several hundred contracts, which are being executed globally. These contracts vary in size from less than one hundred thousand dollars in contract value to several billion dollars, with varying durations that can exceed five years. The timing of new awards and differing types, sizes, and durations of our contracts, combined with their geographic diversity and stages of completion, often results in fluctuations in our quarterly operating group results as a percentage of operating group revenue. In addition, the relative contribution of each of our operating groups, and selling and administrative expense fluctuations, will impact our quarterly consolidated results as a percentage of consolidated revenue. Selling and administrative expense fluctuations are impacted by our stock-based compensation costs, which are generally higher in the first quarter of each year due to the timing of stock awards and the accelerated expensing of awards for participants that are eligible to retire. Although quarterly variability is not unusual in our business, absent the impact of our Capital Services Operations, which is reported as a discontinued operation and is described further in Note 2 and Note 4, we are currently not aware of any fundamental change in our backlog or business that would give rise to future operating results that would be significantly different from our recent historical norms.

Engineering & Construction—Our Engineering & Construction operating group provides EPC services for major energy infrastructure facilities.

Backlog for our Engineering & Construction operating group comprised approximately \$10.8 billion (77%) of our consolidated March 31, 2017 backlog (including approximately \$1.0 billion related to our equity method joint ventures). The backlog composition by end market was approximately 40% petrochemical, 30% LNG, 25% power, and 5% refining. Our petrochemical backlog was primarily concentrated in the U.S. and the Middle East region and we anticipate significant opportunities will continue to be derived from these regions. Our LNG backlog was primarily concentrated in the Asia Pacific and North American regions. We anticipate significant opportunities will be derived from North America and Africa. Our power backlog was primarily concentrated in the U.S. and we anticipate that our significant future opportunities will be derived from North America. The majority of our refining-related backlog was derived from the Middle East and Russia and we anticipate that our future opportunities will continue to be derived from these regions. Our March 31, 2017 backlog distribution for this operating group by contracting type was approximately 80% fixed-price and hybrid and 20% cost-reimbursable.

Fabrication Services—Our Fabrication Services operating group provides fabrication and erection of steel plate structures; fabrication of piping systems and process modules; manufacturing and distribution of pipe and fittings; and engineered products for the oil and gas, petrochemical, power generation, water and wastewater, mining and mineral processing industries.

Backlog for our Fabrication Services operating group comprised approximately \$2.1 billion (15%) of our consolidated March 31, 2017 backlog. The backlog composition by end market was approximately 40% petrochemical, 30% LNG (including low temp and cryogenic), 15% power, 5% refining, 5% gas processing and 5% other end markets. Our March 31, 2017 backlog distribution for this operating group by contracting type was approximately 95% fixed-price, hybrid, or unit based, with the remainder being cost-reimbursable.

Technology—Our Technology operating group provides proprietary process technology licenses and associated engineering services and catalysts, primarily for the petrochemical and refining industries, and offers process planning and project development services and a comprehensive program of aftermarket support. Technology also has a 50% owned unconsolidated joint venture that provides proprietary process technology licenses and associated engineering services and catalyst, primarily for the refining industry, as well as a 33.3% owned unconsolidated joint venture that is commercializing a new natural gas power generation system that recovers the carbon dioxide produced during combustion.

Backlog for our Technology operating group comprised approximately \$1.1 billion (8%) of our consolidated March 31, 2017 backlog (including approximately \$499.0 million related to our equity method joint ventures) and was primarily comprised of fixed-price contracts.

Table of Contents

RESULTS OF OPERATIONS

As a result of the classification of the operating results of our Capital Services Operations (which is primarily comprised of our former Capital Services reportable segment) as a discontinued operation, the results of our remaining segments for the 2016 periods presented have been recast to reflect: 1) a reallocation of certain corporate amounts previously allocated to the Capital Services segment that were not assignable to discontinued operations, and 2) the portions of the previously reported Capital Services segment that are not included in the Capital Services Operations and the portions of other segments that are included in the Capital Services Operations. In addition, backlog, new awards and revenue for the remaining segments has been recast in the tables below to reflect the intersegment amounts with our Capital Services Operations that was previously eliminated prior to the discontinued operations classification. Unless otherwise noted, the tables and discussions below relate to our continuing operations.

Our backlog, new awards, revenue and income from operations by reportable segment are as follows:

	March 31, 2017	% of Total	December 31, 2016	% of Total
Backlog	(In thousands)			
Engineering & Construction	\$10,792,597	77%	\$9,871,208	76%
Fabrication Services	2,060,384	15%	2,117,567	16%
Technology	1,095,801	8%	1,025,723	8%
Total backlog	\$13,948,782		\$13,014,498	

	Three Months Ended March 31, (In thousands)			
	2017	% of Total	2016	% of Total
New Awards				
Engineering & Construction	\$2,236,173	79%	\$341,665	43%
Fabrication Services	446,260	16%	374,139	47%
Technology	160,354	5%	83,620	10%
Total new awards	\$2,842,787		\$799,424	

	2017	% of Total	2016	% of Total
Revenue				
Engineering & Construction	\$1,280,753	70%	\$1,536,361	72%
Fabrication Services	478,572	26%	533,706	25%
Technology	68,027	4%	64,562	3%
Total revenue	\$1,827,352		\$2,134,629	

	2017	% of Revenue	2016	% of Revenue
Income From Continuing Operations				
Engineering & Construction	\$5,414	0.4%	\$108,073	7.0%
Fabrication Services	52,059	10.9%	37,110	7.0%
Technology	21,515	31.6%	26,149	40.5%
Total income from operations from continuing operations	\$78,988	4.3%	\$171,332	8.0%

Consolidated Results

New Awards/Backlog—As discussed above, new awards represent the expected revenue value of new contract commitments received during a given period, as well as scope growth on existing commitments. Backlog represents the unearned value of our new awards. New awards and backlog include the entire award values for joint ventures we consolidate and our proportionate share of award values for joint ventures we proportionately consolidate. New

awards and backlog also include our pro-rata share of the award values for unconsolidated joint ventures we account for under the equity method. As the net results for our equity method joint ventures are recognized as equity earnings, their revenue is not presented in our Statement of Operations. Our new awards may vary significantly each reporting period based upon the timing of our major new contract commitments.

32

Table of Contents

New awards were \$2.8 billion for the first quarter 2017 (including approximately \$46.7 million related to our equity method joint ventures), compared with \$799.4 million (including approximately \$30.0 million related to our equity method joint ventures) for the corresponding 2016 period. Significant new awards for the first quarter 2017 included an ethane cracker project in the U.S. (approximately \$1.3 billion) within our Engineering & Construction and Fabrication Services operating groups and a gas turbine power project in the U.S. (approximately \$600.0 million) within our Engineering & Construction operating group. Significant new awards for the first quarter 2016 included scope increases on our LNG mechanical erection project in the Asia Pacific region (approximately \$235.0 million) within our Engineering & Construction operating group.

Backlog at March 31, 2017 was approximately \$13.9 billion (including approximately \$1.5 billion related to our equity method joint ventures), compared with \$13.0 billion at December 31, 2016 (including approximately \$1.7 billion related to our equity method joint ventures), with the increase primarily reflecting the impact of new awards exceeding revenue by \$1.0 billion (including \$83.7 million of revenue for our unconsolidated equity method ventures).

Certain contracts within our Engineering & Construction operating group are dependent upon funding from the U.S. government, where funds are appropriated on a year-by-year basis, while contract performance may take more than one year. Approximately \$303.0 million of our backlog at March 31, 2017 for the operating group was for contractual commitments that are subject to future funding decisions.

Revenue—Revenue was \$1.8 billion for the first quarter 2017, representing a decrease of \$307.3 million (14.4%) compared with the corresponding 2016 period. Our first quarter 2017 was primarily impacted by decreased activity on our large cost reimbursable LNG mechanical erection project in the Asia Pacific region and the wind down of various projects in the Middle East, Europe and Asia Pacific region within our Engineering & Construction operating group, and the timing of progress on projects within our Fabrication Services operating group. These impacts were partly offset by the benefit of increased activity on our LNG export facility projects in the U.S. within our Engineering & Construction operating group. See Operating Group Results below for further discussion.

Gross Profit—Gross profit was \$151.0 million (8.3% of revenue) for the first quarter 2017, compared with \$255.6 million (12.0% of revenue) for the corresponding 2016 period. Our first quarter 2017 gross profit percentage decreased compared to the 2016 period primarily due to the net impact of changes in forecast costs and changes in estimated recoveries on certain projects, and a lower margin mix. See Operating Group Results below for further discussion.

Selling and Administrative Expense—Selling and administrative expense was \$73.1 million (4.0% of revenue) for the first quarter 2017, compared with \$80.9 million (3.8% of revenue) for the corresponding 2016 period. The decrease for the first quarter 2017 was primarily due to lower incentive plan costs (approximately \$3.0 million) and the impact of cost reduction initiatives, partly offset by inflationary increases. Stock-based compensation expense totaled approximately \$10.2 million and \$14.5 million for the first quarter 2017 and 2016, respectively, or 23% and 37% of estimated annual expense for each of the respective periods.

Intangibles Amortization—Intangibles amortization was \$6.5 million for the first quarter 2017, compared with \$7.1 million for the corresponding 2016 period. The decrease relative to the 2016 period was primarily due to intangible assets that became fully amortized during the first quarter 2016.

Equity Earnings—Equity earnings were \$7.6 million for the first quarter 2017, compared with \$3.6 million for the corresponding 2016 period and were primarily associated with our unconsolidated CTCI and CLG joint ventures within our Engineering & Construction and Technology operating groups, respectively. The change in equity earnings is due to increased activity for our CTCI joint venture, partly offset by decreased activity for our CLG joint venture.

Income from Operations—Income from operations was \$79.0 million (4.3% of revenue) for the first quarter 2017, compared with \$171.3 million (8.0% of revenue) for the corresponding 2016 period. The changes in our first quarter 2017 income from operations compared to the 2016 period were due to the reasons noted above. See Operating Group Results below for further discussion.

Interest Expense and Interest Income—Interest expense was \$24.1 million for the first quarter 2017, compared with \$20.1 million for the corresponding 2016 period. Our first quarter 2017 was impacted by higher revolving credit facility borrowings. Approximately \$6.9 million and \$5.8 million of interest expense for the first quarter 2017 and

2016, respectively, has been classified within discontinued operations as the net proceeds from the sale of our discontinued Capital Services Operations will be used to repay our debt. Interest income was \$1.2 million for the first quarter 2017, compared with \$2.2 million for the corresponding 2016 period.

Table of Contents

Income Tax Expense—Income tax expense was \$13.7 million (24.4% of pre-tax income) for the first quarter 2017, compared with \$39.5 million (25.8% of pre-tax income) for the corresponding 2016 period. Our first quarter 2017 tax rate benefited from earnings represented by noncontrolling interests (approximately 2.0%) and previously unrecognized tax benefits (approximately 4.0%), partly offset by the impact of tax deficiencies associated with share-based payments (approximately 5.0%). Our first quarter 2016 tax rate benefited from earnings represented by noncontrolling interests (approximately 1.5%) and the net impact of previously unrecognized tax benefits and changes in tax rates enacted during the quarter on our U.S. state deferred tax assets (approximately 2.0% combined). Our 2017 tax rate decreased relative to the 2016 period, excluding the impacts of the aforementioned items for 2017 and 2016 due to anticipated lower pre-tax income in higher tax rate jurisdictions, primarily the U.S. (approximately 2.0%). Our tax rate may continue to experience fluctuations due primarily to changes in the geographic distribution of our pre-tax income.

Net Income Attributable to Noncontrolling Interests—Noncontrolling interests are primarily associated with our consolidated joint venture projects within our Engineering & Construction operating group and certain operations in the Middle East within our Fabrication Services operating groups. Net income attributable to noncontrolling interests was \$27.3 million for the first quarter 2017, compared with \$13.0 million for the corresponding 2016 period. The change compared to the 2016 periods was commensurate with the level of applicable operating results for the aforementioned projects and operations. See Operating Group Results below for further discussion.

Segment Results**Engineering & Construction**

New Awards—New awards were \$2.2 billion for the first quarter 2017, compared with \$341.7 million for the corresponding 2016 period. Significant new awards for the first quarter 2017 included an ethane cracker project in the U.S. (approximately \$1.2 billion) and a gas turbine power project in the U.S. (approximately \$600.0 million). Significant new awards for the first quarter 2016 included scope increases on our LNG mechanical erection project in the Asia Pacific region (approximately \$235.0 million).

Revenue—Revenue was \$1.3 billion for the first quarter 2017, representing a decrease of \$255.6 million (16.6%) compared with the corresponding 2016 period. Our first quarter 2017 revenue was primarily impacted by decreased activity on our large cost reimbursable LNG mechanical erection project in the Asia Pacific region (approximately \$197.0 million) and the wind down of various projects in the Middle East, Europe and Asia Pacific region, partly offset by the benefit of increased activity on our LNG export facility projects in the U.S. (approximately \$110.0 million).

Approximately \$632.0 million of the operating group's first quarter 2017 revenue was attributable to our LNG export facility projects in the U.S., compared with approximately \$522.0 million for the corresponding 2016 period.

Approximately \$107.0 million of the operating group's first quarter 2017 revenue was attributable to our large cost reimbursable LNG mechanical erection project in the Asia Pacific region, compared with approximately \$304.0 million for the corresponding 2016 period.

Income from Operations—Income from operations was \$5.4 million (0.4% of revenue) for the first quarter 2017, compared with a \$108.1 million (7.0% of revenue) for the corresponding 2016 period.

Our first quarter 2017 results were impacted by lower revenue volume and a lower margin mix. In addition, our results were impacted by cost increases on two projects in the U.S. (approximately \$143.0 million combined) that were in a loss position. Both loss projects were impacted primarily by lower than anticipated labor productivity and further extensions of schedule. At March 31, 2017, one project was approximately 67% complete, had a reserve for estimated losses of approximately \$70.0 million, and is forecasted to be completed in January 2018. The other loss project was approximately 85% complete, had a reserve for estimated losses of approximately \$12.0 million, and is forecasted to be completed in September 2017. Our results were also impacted by the net effects (approximately \$24.0 million, including the dilutive effect) of cost increases on a proportionately consolidated joint venture project related to increased fabrication costs and craft labor, subcontractor and indirect costs associated with an extension of schedule, partly offset by the benefit of an increase in project price for claims on the project. Our current forecast for these projects anticipates improvement in productivity from our recent historical experience through modified execution plans and a favorable commercial resolution of schedule liquidated damages for the two loss projects. If future labor

productivity differs from our current estimates, our schedules are further extended, or the loss projects incur schedule liquidated damages due to our inability to reach a favorable commercial resolution on such matters, the projects may experience additional forecast cost increases.

The aforementioned impacts for the first quarter 2017 were partly offset by the benefit of changes in estimated recoveries (approximately \$103.0 million combined) on a large consolidated joint venture project and a separate cost reimbursable project.

Table of Contents

Fabrication Services

New Awards—New awards were \$446.3 million for the first quarter 2017, compared with \$374.1 million for the corresponding 2016 period. New awards for the first quarter 2017 included work scopes we will perform for the aforementioned ethane cracker project in the U.S. (approximately \$80.0 million) and various storage and pipe fabrication awards throughout the world. Significant new awards for the first quarter 2016 included refurbishment of crude oil storage tanks in the Middle East (approximately \$60.0 million) and crude oil storage tanks in Canada (approximately \$50.0 million).

Revenue—Revenue was \$478.6 million for the first quarter 2017, representing a decrease of \$55.1 million (10.3%) compared with the corresponding 2016 period. Our first quarter 2017 revenue was primarily impacted by the timing of progress on our projects.

Income from Operations—Income from operations was \$52.1 million (10.9% of revenue) for the first quarter 2017, compared with \$37.1 million (7.0% of revenue) for the corresponding 2016 period. Our first quarter 2017 results benefited from lower overhead costs. Our first quarter 2016 results were impacted by cost increases on two projects in North America and the Asia Pacific region (approximately \$26.0 million combined), partly offset by savings on various projects, primarily in North America.

Technology

New Awards—New awards were \$160.4 million for the first quarter 2017 (including approximately \$46.7 million related to our equity method joint ventures), compared with \$83.6 million for the corresponding 2016 period (including approximately \$30.0 million related to our equity method joint ventures). New awards for the first quarter 2017 included petrochemical and refining licensing, catalyst and proprietary equipment awards, primarily in the Asia Pacific region. New awards for the first quarter 2016 included petrochemical licensing in the Asia Pacific region and catalyst awards in the Middle East.

Revenue—Revenue was \$68.0 million for the first quarter 2017, representing an increase of \$3.5 million (5.4%) compared with the corresponding 2016 period. Our first quarter 2017 revenue benefited from increased petrochemical licensing, partly offset by lower catalyst activity.

Income from Operations—Income from operations was \$21.5 million (31.6% of revenue) for the first quarter 2017, compared with \$26.1 million (40.5% of revenue) for the corresponding 2016 period. Our first quarter 2017 was impacted by lower equity earnings (approximately \$3.0 million) and a lower margin mix.

Discontinued Capital Services Operations

	March 31, 2017	December 31, 2016
	(In thousands)	
Backlog	\$5,329,149	\$5,447,202
	Three Months Ended March 31,	
	2017	2016
	(In thousands)	
New Awards	\$472,358	\$415,490
Revenue	\$552,947	\$564,981
Income From Operations	\$19,044	\$16,608
% of Revenue	3.4	% 2.9

Our discontinued Capital Services Operations provide comprehensive and integrated maintenance services, environmental engineering and remediation, construction services, program management, and disaster response and recovery services for private-sector customers and governments.

Backlog/New Awards—Backlog for the operating group was approximately \$5.3 billion at March 31, 2017, compared with \$5.4 billion at December 31, 2016, with the decrease primarily reflecting the impact of revenue exceeding new awards by \$80.6 million. The backlog composition by end market was approximately 65% operations and maintenance services, 15% environmental services, 15% construction services and 5% program and project

management, and was primarily concentrated in the U.S. The March 31, 2017 backlog distribution for this operating group by contracting type was approximately 70% cost-reimbursable and 30% fixed-price, hybrid and unit based.

Table of Contents

Certain contracts within this operating group are dependent upon funding from the U.S. government, where funds are appropriated on a year-by-year basis, while contract performance may take more than one year. At March 31, 2017, approximately \$565.0 million of backlog for the operating group was for contractual commitments that are subject to future funding decisions.

New awards were \$472.4 million for the first quarter 2017, compared with \$415.5 million for the corresponding 2016 period. Significant new awards for the first quarter 2017 included power plant services in North America (approximately \$180.0 million) and environmental remediation work for the U.S. Navy (approximately \$55.0 million). Significant new awards for the first quarter 2016 included environmental remediation work for the U.S. Navy (approximately \$70.0 million).

Revenue—Revenue was \$552.9 million for the first quarter 2017, representing a decrease of \$12.0 million (2.1%) compared with the corresponding 2016 period. Our first quarter 2017 revenue was primarily impacted by lower construction services and industrial maintenance activity, partly offset by increased emergency response activity.

Income from Operations—Income from operations for the first quarter 2017 was \$19.0 million (3.4% of revenue), compared with \$16.6 million (2.9% of revenue) for the corresponding 2016 period.

LIQUIDITY AND CAPITAL RESOURCES**General**

Cash and Cash Equivalents—At March 31, 2017, our cash and cash equivalents were \$402.3 million, and were maintained in local accounts throughout the world, substantially all of which were maintained outside The Netherlands, our country of domicile. With the exception of \$234.3 million of cash and cash equivalents within our variable interest entities (“VIEs”) associated with our partnering arrangements, which is generally only available for use in our operating activities when distributed to the partners, at March 31, 2017, there were no material restrictions on our cash and cash equivalents.

With respect to tax consequences associated with repatriating our foreign earnings, distributions from our European Union (“EU”) subsidiaries to their Netherlands parent companies are not subject to taxation. Further, for our non-EU companies and their subsidiaries and our U.S. companies, to the extent taxes apply, the amount of permanently reinvested earnings becomes taxable upon repatriation of assets from the subsidiary or liquidation of the subsidiary. We have accrued taxes on undistributed earnings that we intend to repatriate and we intend to permanently reinvest the remaining undistributed earnings in their respective businesses, and accordingly, have accrued no taxes on such amounts.

Summary of Cash Flow Activity

Operating Activities—During the first quarter 2017, net cash used in operating activities was \$290.7 million (including approximately \$17.5 million related to our discontinued Capital Services Operations), primarily resulting from cash generated from earnings, offset by a net change of \$330.6 million in our accounts receivable, inventory, accounts payable and net contracts in progress account balances (collectively “Contract Capital”). The components of our net Contract Capital balances at March 31, 2017 and December 31, 2016 (including our discontinued Capital Services Operations), and changes during the first quarter 2017, were as follows:

	March 31, 2017	December 31, 2016	Change
	(In thousands)		
Total billings in excess of costs and estimated earnings ⁽¹⁾	\$ (1,536,486)	\$ (1,449,335)	\$ (87,151)
Total costs and estimated earnings in excess of billings ⁽¹⁾	657,232	564,024	93,208
Contracts in Progress, net	(879,254)	(885,311)	6,057
Accounts receivable, net	944,781	727,659	217,122
Inventory	206,476	194,130	12,346
Accounts payable	(1,010,459)	(1,105,576)	95,117
Contract Capital, net	\$ (738,456)	\$ (1,069,098)	\$ 330,642

Represents our cash position relative to revenue recognized on projects, with (i) billings in excess of costs and ⁽¹⁾ estimated earnings representing a liability reflective of future cash expenditures and non-cash earnings, and (ii) costs and estimated earnings in excess of billings representing an asset reflective of future cash receipts.

Table of Contents

Fluctuations in our Contract Capital balance, and its components, are not unusual in our business and are impacted by the size of our projects and changing mix of cost-reimbursable versus fixed-price backlog. Our cost-reimbursable projects tend to have a greater working capital requirement (“costs and estimated earnings in excess of billings”), while our fixed-price projects are generally structured to be cash flow positive (“billings in excess of costs and estimated earnings”). Our Contract Capital is particularly impacted by the timing of new awards and related payments in advance of performing work, and the achievement of billing milestones on backlog as we complete certain phases of work. Contract Capital is also impacted at period-end by the timing of accounts receivable collections and accounts payable payments for our large projects.

The \$330.6 million increase in our Contract Capital during the first quarter 2017 (including approximately \$58.0 million related to our discontinued Capital Services Operations) was primarily due to a net increase in contracts in progress and accounts receivable and a decrease in accounts payable. The net increase in Contract Capital is primarily due to the net use of advance payments on our large projects in the U.S. and increase in receivables on our large consolidated joint venture project in the Asia Pacific region. The decrease in accounts payable was due to the timing of payments on our projects. Our net cash used in operating activities, combined with payments in advance of performing work for our unconsolidated equity method joint ventures, which are reflected in financing activities because the joint ventures are not consolidated, totaled approximately \$270.0 million during the first quarter 2017. We anticipate future quarterly variability in our operating cash flows due to ongoing fluctuations in our Contract Capital balance. See “Credit Facilities and Debt” below for further discussion of our liquidity.

Investing Activities—During the first quarter 2017, net cash used in investing activities was \$43.3 million, primarily related to net advances of \$23.8 million to our venture partners by our proportionately consolidated ventures (see Note 7 to our Financial Statements for further discussion), capital expenditures of \$12.3 million and other investments of \$8.3 million.

Financing Activities—During the first quarter 2017, net cash provided by financing activities was \$227.6 million, primarily related to net revolving facility and other short-term borrowings of \$510.0 million, net advances from our equity method and proportionately consolidated ventures of \$47.1 million (see Note 7 to our Financial Statements for further discussion) and cash proceeds from the issuance of shares associated with our stock plans of \$3.9 million. These cash inflows were partly offset by repayments on our long-term debt of \$300.0 million, distributions to our noncontrolling interest partners of \$19.0 million, stock-based compensation-related withholding taxes on taxable share distributions totaling \$7.4 million (0.2 million shares at an average price of \$33.60 per share) and dividends paid to our shareholders of \$7.0 million.

Effect of Exchange Rate Changes on Cash and Cash Equivalents—During the first quarter 2017, our cash and cash equivalents balance increased by \$21.3 million due to the impact of changes in functional currency exchange rates against the U.S. Dollar for non-U.S. Dollar cash balances, primarily for net changes in the Australian Dollar, British Pound, and Euro exchange rates. The net unrealized gain on our cash and cash equivalents resulting from these exchange rate movements is reflected in the cumulative translation adjustment component of OCI. Our cash and cash equivalents held in non-U.S. Dollar currencies are used primarily for project-related and other operating expenditures in those currencies, and therefore, our exposure to realized exchange gains and losses is not anticipated to be material.

Credit Facilities and Debt

General—Our primary internal source of liquidity is cash flow generated from operations. Capacity under our revolving credit and other facilities discussed below is also available, if necessary, to fund operating or investing activities and provide necessary letters of credit. Letters of credit are generally issued to customers in the ordinary course of business to support advance payments and performance guarantees, in lieu of retention on our contracts, or in certain cases, are issued in support of our insurance programs.

Committed Facilities—We have a five-year, \$1.35 billion committed revolving credit facility (the “Revolving Facility”) with Bank of America N.A. (“BoFA”), as administrative agent, and BNP Paribas Securities Corp., BBVA Compass, Credit Agricole Corporate and Investment Bank (“Credit Agricole”) and TD Securities, each as syndication agents, which expires in October 2018. The Revolving Facility has a \$270.0 million financial letter of credit sublimit and has financial and restrictive covenants described further below. The Revolving Facility also includes customary restrictions regarding subsidiary indebtedness, sales of assets, liens, investments, type of business conducted, and

mergers and acquisitions, and includes a limitation for dividend payments and share repurchases, among other restrictions. In addition to interest on debt borrowings, we are assessed quarterly commitment fees on the unutilized portion of the facility as well as letter of credit fees on outstanding instruments. The interest, commitment fee, and letter of credit fee percentages are based upon our quarterly leverage ratio. In the event we borrow funds under the facility, interest is assessed at either prime plus an applicable floating margin, or LIBOR plus an applicable floating margin, as described further below. At March 31, 2017, we had \$505.0 million of outstanding borrowings under the facility and \$69.1 million of outstanding letters of credit under the facility (none of which were financial letters of credit), providing \$775.9 million of available capacity. During the three months ended March 31, 2017, our weighted average interest rate on borrowings under the facility was approximately 2.9%, inclusive of the applicable floating margin.

Table of Contents

We have a five-year, \$800.0 million committed revolving credit facility (the “Second Revolving Facility”) with BofA, as administrative agent, and BNP Paribas Securities Corp., BBVA Compass, Credit Agricole and Bank of Tokyo Mitsubishi UFJ, each as syndication agents, which expires in July 2020. The Second Revolving Facility supplements our Revolving Facility, has a \$50.0 million financial letter of credit sublimit and has financial and restrictive covenants described further below. In addition to interest on debt borrowings, we are assessed quarterly commitment fees on the unutilized portion of the facility as well as letter of credit fees on outstanding instruments. The interest, commitment fee, and letter of credit fee percentages are based upon our quarterly leverage ratio. In the event we borrow funds under the facility, interest is assessed at either prime plus an applicable floating margin, or LIBOR plus an applicable floating margin, as described further below. At March 31, 2017, we had \$212.5 million of outstanding borrowings and \$7.6 million of outstanding letters of credit under the facility (including \$2.8 million of financial letters of credit), providing \$579.9 million of available capacity. During the three months ended March 31, 2017, our weighted average interest rate on borrowings under the facility was approximately 5.0%, inclusive of the applicable floating margin.

Uncommitted Facilities—We also had various short-term, uncommitted letter of credit and borrowing facilities (the “Uncommitted Facilities”) across several geographic regions of approximately \$4.6 billion, of which \$563.0 million may be utilized for borrowings. At March 31, 2017, we had \$200.0 million of outstanding borrowings and \$1.7 billion of outstanding letters of credit under these facilities, providing \$2.6 billion of available capacity, of which \$363.0 million was available for borrowings. During the three months ended March 31, 2017, our weighted average interest rate on borrowings under the facilities was approximately 2.2%.

Term Loans—On February 13, 2017, we paid the remaining \$300.0 million of principal on our four-year, \$1.0 billion unsecured term loan (the “Term Loan”) with BofA as administrative agent. Interest was based upon LIBOR plus an applicable floating margin for the period (0.98% and 2.25%, respectively). In conjunction with the settlement of the Term Loan, we also settled our associated interest rate swap that hedged against a portion of the Term Loan, which resulted in a weighted average interest rate of approximately 2.6% during the first quarter 2017.

At March 31, 2017, we had \$500.0 million outstanding on a five-year, \$500.0 million term loan (the “Second Term Loan”) with BofA as administrative agent. Interest and principal under the Second Term Loan is payable quarterly in arrears beginning in June 2017 and bears interest at LIBOR plus an applicable floating margin as described further below. During the three months ended March 31, 2017, our weighted average interest rate on the Second Term Loan was approximately 2.4%, inclusive of the applicable floating margin. Future annual maturities for the Second Term Loan are \$56.3 million, \$75.0 million, \$75.0 million and \$293.8 million for 2017, 2018, 2019, and 2020, respectively. The Second Term Loan has financial and restrictive covenants described further below.

Senior Notes—We have a series of senior notes totaling \$800.0 million in the aggregate (the “Senior Notes”) with Merrill Lynch, Pierce, Fenner & Smith Incorporated, and Credit Agricole, as administrative agents. The Senior Notes have financial and restrictive covenants described further below. The Senior Notes include Series A through D, which contain the following terms:

Series A—Interest due semi-annually at a fixed rate of 4.15%, with principal of \$150.0 million due in December 2017

Series B—Interest due semi-annually at a fixed rate of 4.57%, with principal of \$225.0 million due in December 2019

Series C—Interest due semi-annually at a fixed rate of 5.15%, with principal of \$275.0 million due in December 2022

Series D—Interest due semi-annually at a fixed rate of 5.30%, with principal of \$150.0 million due in December 2024

We have senior notes totaling \$200.0 million (the “Second Senior Notes”) with BofA as administrative agent. Interest is due semi-annually at a fixed rate of 4.53%, with principal of \$200.0 million due in July 2025. The Second Senior Notes have financial and restrictive covenants described further below.

Compliance and Other—On February 24, 2017, and effective for the period ended December 31, 2016, we amended our Revolving Facility, Second Revolving Facility, Second Term Loan, Senior Notes and Second Senior Notes (collectively, “Senior Facilities”). The amendments established a new maximum leverage ratio of 3.50 at December 31, 2016, decreasing to 3.00 at December 31, 2017, or 45 days subsequent to the closing of the sale of our Capital Services Operations (the “Closing Date”) as described in Note 4 to our Financial Statements, if earlier. The amendments also established a new minimum net worth of \$1.2 billion, maintained our required fixed charge ratio at 1.75, and will reduce our Revolving Facility from \$1.4 billion to \$1.2 billion at the Closing Date. The amendments also included

other financial and restrictive covenants.

On May 8, 2017, and effective for the period ended March 31, 2017, we further amended our Senior Facilities. The amendments require us to secure the Senior Facilities through the pledge of cash, accounts receivable, inventory, fixed assets, and stock of subsidiaries. In addition, the amendments require us to repay the Senior Facilities on a pro-rata basis with the proceeds from the sale of our Capital Services Operations, the issuance of any unsecured debt that is subordinate (“Subordinated Debt”) to the Senior Facilities, the issuance of any equity securities, or the sale of any assets. The amendments also establish new maximum leverage ratios for borrowings under the Senior Facilities (“Senior Secured Leverage Ratio”) as follows: 4.00 at March 31, 2017; 4.50 at June 30, 2017 and September 30, 2017; 3.00 at December 31, 2017 and March 31,

Table of Contents

2018; and 2.50 at June 30, 2018. The amendments prohibit mergers and acquisitions, open-market share repurchases, and increases to dividends until our leverage ratio is below 3.00 for two consecutive quarters. In addition to the Senior Secured Leverage Ratio, the amendments establish total maximum leverage ratios for all borrowings among the Senior Facilities and any Subordinated Debt as follows: 5.25 at June 30, 2017; 6.00 at September 30, 2017; 4.00 at December 31, 2017 and March 31, 2018; 3.25 at June 30, 2018; and 3.00 at September 30, 2018.

Interest on outstanding borrowings under the amended Revolving Facility, Second Revolving Facility and the Second Term Loan is based on our quarterly leverage ratio and is assessed at either prime plus an applicable floating margin (4.00% and 1.50%, respectively at March 31, 2017), or LIBOR plus an applicable floating margin (0.98% and 2.50%, respectively at March 31, 2017). Our fixed rate interest on our amended Senior Notes and Second Senior Notes was increased by an incremental 0.50% over the rates in effect at March 31, 2017 discussed above. Further, the amended Senior Notes and Second Senior Notes include provisions relating to our credit profile, which if not maintained will result in an incremental annual cost of up to 2.00% of the outstanding balance under the notes.

During the three months ended March 31, 2017, maximum outstanding borrowings under our Revolving Facility and Second Revolving Facility (collectively, "Committed Facilities") and Uncommitted Facilities were approximately \$1.7 billion. At March 31, 2017, we were in compliance with all our amended financial and restrictive covenants of our Senior Facilities with a leverage ratio of 3.91, a fixed charge coverage ratio of 3.07, and net worth of \$1.5 billion. If we are unable to remain in compliance with these covenants, and such covenants are not further amended, it could result in all of our debt becoming current. Our ability to remain in compliance with such covenants in the second quarter 2017, and over the next twelve months, will require the successful securitization of the assets required under the amendments to our Senior Facilities and will likely require us to complete the sale of our Capital Services Operations during the second quarter 2017 to reduce our debt, which we believe is probable.

We believe our cash on hand, cash flow from operations, and amounts available under our Committed Facilities and Uncommitted Facilities will be sufficient to finance our capital expenditures, settle our commitments and contingencies (as more fully described in Note 11 to our Financial Statements) and address our working capital needs for the foreseeable future. However, there can be no assurance that such funding will continue to be available, as our ability to generate cash flows from operations, our ability to access funding under our Committed Facilities and Uncommitted Facilities at reasonable terms, and our ability to comply with our financial and restrictive covenants may be impacted by a variety of business, economic, legislative, financial and other factors which may be outside of our control, including, but not limited to, our ability to access appropriate capital markets and complete asset dispositions, delay or cancellation of projects, decreased profitability on our projects, the timing of approval or settlement of unapproved change orders and claims, changes in foreign currency exchange or interest rates, performance of pension plan assets, or changes in actuarial assumptions. Further, we could be impacted if our customers experience a material change in their ability to pay us or if the banks associated with our lending facilities were to cease or reduce operations, or if there is a full or partial break-up of the European Union (the "EU") or its currency, the Euro. In addition, while we had approximately \$4.6 billion of Uncommitted Facilities at March 31, 2017, these facilities are all unsecured. There can be no assurance that the Uncommitted Facilities will remain available for new letter of credit or borrowing needs in the future as a result of the Senior Facilities becoming secured. We expect that any new borrowing or letter of credit needs would be sourced from the Senior Facilities.

Other

In addition to providing letters of credit, we also issue surety bonds in the ordinary course of business to support our contract performance. At March 31, 2017, we had \$837.7 million of outstanding surety bonds. While we currently have significant uncommitted bonding facilities, a termination or reduction of these bonding facilities could result in the utilization of letters of credit in lieu of performance bonds, thereby reducing the available capacity under the Committed Facilities. Although we do not anticipate a reduction or termination of the bonding facilities, there can be no assurance that such facilities will continue to be available at reasonable terms to service our ordinary course obligations.

A portion of our pension plans' assets are invested in EU government securities, which could be impacted by economic turmoil in Europe or a full or partial break-up of the EU or its currency, the Euro. However, given the long-term nature of pension funding requirements, in the event any of our pension plans (including those with investments in EU

government securities) become materially underfunded from a decline in value of our plan assets, we believe our cash on hand and amounts available under our existing Committed Facilities and Uncommitted Facilities would be sufficient to fund any increases in future contribution requirements.

We are a defendant in a number of lawsuits arising in the normal course of business and we have in place appropriate insurance coverage for the type of work that we perform. As a matter of standard policy, we review our litigation accrual quarterly and as further information is known on pending cases, increases or decreases, as appropriate, may be recorded. See Note 11 to our Financial Statements for a discussion of pending litigation.

Table of Contents

OFF-BALANCE SHEET ARRANGEMENTS

We use operating leases for facilities and equipment when they make economic sense, including sale-leaseback arrangements. Our sale-leaseback arrangements are not material to our Financial Statements, and we have no other significant off-balance sheet arrangements.

NEW ACCOUNTING STANDARDS

See the applicable section of Note 2 to our Financial Statements for a discussion of new accounting standards.

CRITICAL ACCOUNTING ESTIMATES

The discussion and analysis of our financial condition and results of operations are based upon our Financial Statements, which have been prepared in accordance with U.S. GAAP. The preparation of these Financial Statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses and related disclosures of contingent assets and liabilities. We continually evaluate our estimates based upon historical experience and various other assumptions that we believe to be reasonable under the circumstances. Our management has discussed the development and selection of our critical accounting estimates with the Audit Committee of our Supervisory Board. Actual results may differ from these estimates under different assumptions or conditions. We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our Financial Statements.

Revenue Recognition

Our revenue is primarily derived from long-term contracts and is generally recognized using the POC method, primarily based on the percentage that actual costs-to-date bear to total estimated costs to complete each contract. We follow the guidance of FASB ASC Revenue Recognition Topic 605-35 for accounting policies relating to our use of the POC method, estimating costs, and revenue recognition, including the recognition of incentive fees, unapproved change orders and claims, and combining and segmenting contracts. We primarily utilize the cost-to-cost approach to estimate POC as we believe this method is less subjective than relying on assessments of physical progress. Under the cost-to-cost approach, the use of estimated costs to complete each contract is a significant variable in the process of determining recognized revenue and is a significant factor in the accounting for contracts. Significant estimates that impact the cost to complete each contract are costs of engineering, materials, components, equipment, labor and subcontracts; labor productivity; schedule durations, including subcontractor or supplier progress; liquidated damages; contract disputes, including claims; achievement of contractual performance requirements; and contingency, among others. The cumulative impact of revisions in total cost estimates during the progress of work is reflected in the period in which these changes become known, including, to the extent required, the reversal of profit recognized in prior periods and the recognition of losses expected to be incurred on contracts in progress. Due to the various estimates inherent in our contract accounting, actual results could differ from those estimates. See Note 14 to our Financial Statements for discussion of projects with significant changes in estimated margins during the three months ended March 31, 2017 and 2016.

Our long-term contracts are awarded on a competitively bid and negotiated basis and the timing of revenue recognition may be impacted by the terms of such contracts. We use a range of contracting options, including cost-reimbursable, fixed-price and hybrid, which has both cost-reimbursable and fixed-price characteristics. Fixed-price contracts, and hybrid contracts with a more significant fixed-price component, tend to provide us with greater control over project schedule and the timing of when work is performed and costs are incurred, and accordingly, when revenue is recognized. Cost-reimbursable contracts, and hybrid contracts with a more significant cost-reimbursable component, generally provide our customers with greater influence over the timing of when we perform our work, and accordingly, such contracts often result in less predictability with respect to the timing of revenue recognition. Contract revenue for our long-term contracts recognized under the POC method reflects the original contract price adjusted for approved change orders and estimated recoveries for incentive fees, unapproved change orders and claims. We recognize revenue associated with incentive fees when the value can be reliably estimated and recovery is probable. We recognize revenue associated with unapproved change orders and claims to the extent the related costs have been incurred, the value can be reliably estimated and recovery is probable. Our recorded incentive fees, unapproved change orders and claims reflect our best estimate of recovery amounts; however, the ultimate resolution and amounts received could differ from these estimates. See Note 14 to our Financial

Statements for additional discussion of our recorded unapproved change orders, claims and incentives.

40

Table of Contents

With respect to our EPC services, our contracts are not segmented between types of services, such as engineering and construction, if each of the EPC components is negotiated concurrently or if the pricing of any such services is subject to the ultimate negotiation and agreement of the entire EPC contract. However, an EPC contract including technology or fabrication services may be segmented if we satisfy the segmenting criteria in ASC 605-35. Revenue recorded in these situations is based on our prices and terms for similar services to third party customers. Segmenting a contract may result in different interim rates of profitability for each scope of service than if we had recognized revenue without segmenting. In some instances, we may combine contracts that are entered into in multiple phases, but are interdependent and include pricing considerations by us and the customer that are impacted by all phases of the project. Otherwise, if each phase is independent of the other and pricing considerations do not give effect to another phase, the contracts will not be combined.

Cost of revenue for our long-term contracts includes direct contract costs, such as materials and labor, and indirect costs that are attributable to contract activity. The timing of when we bill our customers is generally dependent upon advance billing terms, milestone billings based on the completion of certain phases of the work, or when services are provided. Projects with costs and estimated earnings recognized to date in excess of cumulative billings is reported on the Balance Sheet as costs and estimated earnings in excess of billings. Projects with cumulative billings in excess of costs and estimated earnings recognized to date is reported on the Balance Sheet as billings in excess of costs and estimated earnings. Any uncollected billed amounts, including contract retentions, are reported as accounts receivable. Revenue for our service contracts that do not satisfy the criteria for revenue recognition under the POC method is recorded at the time services are performed. Revenue associated with incentive fees for these contracts is recognized when earned. Unbilled receivables for our service contracts are recorded within accounts receivable.

Revenue for our pipe and steel fabrication and catalyst manufacturing contracts that are independent of an EPC contract, or for which we satisfy the segmentation criteria discussed above, is recognized upon shipment of the fabricated or manufactured units. During the fabrication or manufacturing process, all related direct and allocable indirect costs are capitalized as work in process inventory and such costs are recorded as cost of revenue at the time of shipment.

Goodwill

Goodwill Summary and Reporting Units—At March 31, 2017, our goodwill balance was \$2.8 billion. Goodwill is not amortized to earnings, but instead is reviewed for impairment at least annually at a reporting unit level, absent any indicators of impairment or when other actions require an impairment assessment (such as a change in reporting units). We perform our annual impairment assessment during the fourth quarter of each year based upon balances as of October 1. At December 31, 2016, we had the following three operating groups and reporting units:

• **Engineering & Construction**—Our Engineering & Construction operating group represented a reporting unit.

• **Fabrication Services**—Our Fabrication Services operating group represented a reporting unit.

• **Technology**—Our Technology operating group represented a reporting unit.

Impairment Assessment—During the fourth quarter 2016, we performed a quantitative assessment of goodwill for each of the aforementioned reporting units. Based upon these quantitative assessments, the fair value of each of these reporting units substantially exceeded their respective net book values, and accordingly, no impairment charge was necessary as a result of our annual impairment assessment.

Determination of Reporting Unit Fair Values—To determine the fair value of our reporting units and test for impairment, we utilized an income approach (discounted cash flow method) as we believe this is the most direct approach to incorporate the specific economic attributes and risk profiles of our reporting units into our valuation model. This is consistent with the methodology used to determine the fair value of our reporting units in previous years. We generally do not utilize a market approach given the lack of relevant information generated by market transactions involving comparable businesses. However, to the extent market indicators of fair value become available, we consider such market indicators in our discounted cash flow analysis and determination of fair value. The discounted cash flow methodology is based, to a large extent, on assumptions about future events, which may or may not occur as anticipated, and such deviations could have a significant impact on the calculated estimated fair values of our reporting units. These assumptions include, but are not limited to, estimates of discount rates, future growth rates, and terminal values for each reporting unit. The discounted cash flow analysis included forecasted cash

flows over a seven-year forecast period (2017 through 2023), with our 2017 business plan used as the basis for our 2017 projections. These forecasted cash flows took into consideration historical and recent results, the reporting unit's backlog and near term prospects, and management's outlook for the future. A terminal value was also calculated using a terminal value growth assumption to derive the annual cash flows after the discrete forecast period. A reporting unit specific discount rate was applied to the forecasted cash flows and terminal cash flows to determine the discounted future cash flows, or fair value, of each reporting unit.

See Note 6 to our Financial Statements for further discussion regarding goodwill.

Table of Contents

Other Long-Lived Assets

We amortize our finite-lived intangible assets on a straight-line basis with lives ranging from 6 to 20 years, absent any indicators of impairment. We review tangible assets and finite-lived intangible assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. If a recoverability assessment is required, the estimated future cash flow associated with the asset or asset group will be compared to the asset's carrying amount to determine if an impairment exists. During the three months ended March 31, 2017, we noted no indicators of impairment. See Note 6 to our Financial Statements for additional discussion of our intangible assets.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis using currently enacted income tax rates for the years in which the differences are expected to reverse. A valuation allowance ("VA") is provided to offset any net deferred tax assets ("DTA(s)") if, based upon the available evidence, it is more likely than not that some or all of the DTAs will not be realized. The realization of our net DTAs depends upon our ability to generate sufficient future taxable income of the appropriate character and in the appropriate jurisdictions.

On a periodic and ongoing basis we evaluate our DTAs and assess the appropriateness of our VA's. In assessing the need for a VA, we consider both positive and negative evidence related to the likelihood of realization of the DTAs. If, based on the weight of available evidence, our assessment indicates that it is more likely than not that a DTA will not be realized, we record a VA. Our assessments include, among other things, the value and quality of our backlog, evaluations of existing and anticipated market conditions, analysis of recent and historical operating results and projections of future results, strategic plans and alternatives for associated operations, as well as asset expiration dates, where applicable. If the factors upon which we based our assessment of realizability of our DTAs differ materially from our expectations, including future operating results being lower than our current estimates, our future assessments could be impacted and result in an increase in VA and increase in tax expense.

Income tax and associated interest and penalty reserves, where applicable, are recorded in those instances where we consider it more likely than not that additional tax will be due in excess of amounts reflected in income tax returns filed worldwide, irrespective of whether or not we have received tax assessments. We continually review our exposure to additional income tax obligations and, as further information is known or events occur, changes in our tax and penalty reserves may be recorded within income tax expense and changes in interest reserves may be recorded in interest expense.

Insurance

We maintain insurance coverage for various aspects of our business and operations. However, we retain a portion of anticipated losses through the use of deductibles and self-insured retentions for our exposures related to third party liability and workers' compensation. We regularly review estimates of reported and unreported claims through analysis of historical and projected trends, in conjunction with actuaries and other consultants, and provide for losses through insurance reserves. As claims develop and additional information becomes available, adjustments to loss reserves may be required. If actual results are not consistent with our assumptions, we may be exposed to gains or losses that could be material.

Partnering Arrangements

In the ordinary course of business, we execute specific projects and conduct certain operations through joint venture, consortium and other collaborative arrangements (collectively referred to as "venture(s)"). We have various ownership interests in these ventures, with such ownership typically proportionate to our decision making and distribution rights. The ventures generally contract directly with the third party customer; however, services may be performed directly by the ventures, or may be performed by us, our partners, or a combination thereof.

Venture net assets consist primarily of working capital and property and equipment, and assets may be restricted from being used to fund obligations outside of the venture. These ventures typically have limited third party debt or have debt that is non-recourse in nature; however, they may provide for capital calls to fund operations or require participants in the venture to provide additional financial support, including advance payment or retention letters of credit.

Each venture is assessed at inception and on an ongoing basis as to whether it qualifies as a VIE under the consolidations guidance in ASC 810. A venture generally qualifies as a VIE when it (1) meets the definition of a legal entity, (2) absorbs the operational risk of the projects being executed, creating a variable interest, and (3) lacks sufficient capital investment from the partners, potentially resulting in the venture requiring additional subordinated financial support, if necessary, to finance its future activities.

Table of Contents

If at any time a venture qualifies as a VIE, we perform a qualitative assessment to determine whether we are the primary beneficiary of the VIE and, therefore, need to consolidate the VIE. We are the primary beneficiary if we have (1) the power to direct the economically significant activities of the VIE and (2) the right to receive benefits from, and obligation to absorb losses of, the VIE. If the venture is a VIE and we are the primary beneficiary, or we otherwise have the ability to control the venture, we consolidate the venture. If we are not determined to be the primary beneficiary of the VIE, or only have the ability to significantly influence, rather than control the venture, we do not consolidate the venture. We account for unconsolidated ventures using either proportionate consolidation for both the Balance Sheet and Statement of Operations, when we meet the applicable accounting criteria to do so, or utilize the equity method. See Note 7 to our Financial Statements for additional discussion of our material partnering arrangements.

Financial Instruments

We do not engage in currency speculation; however, we utilize foreign currency exchange rate derivatives on an ongoing basis to hedge against certain foreign currency related operating exposures. We generally seek hedge accounting treatment for contracts used to hedge operating exposures and designate them as cash flow hedges. Therefore, gains and losses, exclusive of credit risk and forward points (which represent the time value component of the fair value of our derivative positions), are included in AOCI until the associated underlying operating exposure impacts our earnings. Changes in the fair value of (1) credit risk and forward points, (2) instruments deemed ineffective during the period, and (3) instruments that we do not designate as cash flow hedges, are recognized within cost of revenue.

See Note 9 to our Financial Statements for additional discussion of our financial instruments.

FORWARD-LOOKING STATEMENTS

This quarterly report on Form 10-Q, including all documents incorporated by reference, contains forward-looking statements regarding CB&I and represents our expectations and beliefs concerning future events. These forward-looking statements are intended to be covered by the safe harbor for forward-looking statements provided by the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve known and unknown risks and uncertainties. When considering any statements that are predictive in nature, depend upon or refer to future events or conditions, or use or contain words, terms, phrases, or expressions such as “achieve,” “forecast,” “plan,” “propose,” “strategy,” “envision,” “hope,” “will,” “continue,” “potential,” “expect,” “believe,” “anticipate,” “project,” “estimate,” “predict,” “could,” “may,” “might,” or similar forward-looking statements, we refer you to the cautionary statements concerning risk factors and “Forward-Looking Statements” described under “Risk Factors” in Item 1A of our 2016 Annual Report and any updates to those risk factors or “Forward-Looking Statements” included in our subsequent quarterly reports on Form 10-Q filed with the SEC, which cautionary statements are incorporated herein by reference.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Foreign Currency Risk—We are exposed to market risk associated with changes in foreign currency exchange rates, which may adversely affect our results of operations, financial condition and cash flows.

One form of exposure to fluctuating exchange rates relates to the effects of translating financial statements of entities with functional currencies other than the U.S. Dollar into our reporting currency. With respect to the translation of our balance sheet, net movements in the Australian Dollar, British Pound, and Euro exchange rates against the U.S. Dollar unfavorably impacted the cumulative translation adjustment component of AOCI; however our cash balance was favorably impacted by approximately \$21.3 million. We generally do not hedge our exposure to potential foreign currency translation adjustments.

Another form of exposure to fluctuating exchange rates relates to the effects of transacting in currencies other than those of our entity’s functional currencies. We do not engage in currency speculation; however, we utilize foreign currency exchange rate derivatives on an ongoing basis to hedge against certain foreign currency related operating exposures. We generally seek hedge accounting treatment for contracts used to hedge operating exposures and designate them as cash flow hedges. Therefore, gains and losses, exclusive of credit risk and forward points (which represent the time value component of the fair value of our derivative positions), are included in AOCI until the associated underlying operating exposure impacts our earnings. Changes in the fair value of (1) credit risk and forward points, (2) instruments deemed ineffective during the period, and (3) instruments that we do not designate as cash flow

hedges, are recognized within cost of revenue and were not material during the first quarter 2017.

43

Table of Contents

At March 31, 2017, the notional value of our outstanding forward contracts to hedge certain foreign currency exchange-related operating exposures was \$143.6 million, including net foreign currency exchange rate exposure associated with the purchase of U.S. Dollars (\$88.4 million), Thai Baht (\$17.4 million), Japanese Yen (\$14.7 million), Kuwaiti Dinars (\$3.2 million), and the sale of Euros (\$20.0 million). The total fair value of these contracts was a net liability of approximately \$3.5 million at March 31, 2017. The potential change in fair value for our outstanding contracts resulting from a hypothetical ten percent change in quoted foreign currency exchange rates would have been approximately \$7.7 million and \$6.3 million at March 31, 2017 and December 31, 2016, respectively. This potential change in fair value of our outstanding contracts would be offset by the change in fair value of the associated underlying operating exposures.

Other—The carrying values of our accounts receivable and accounts payable approximate their fair values because of the short-term nature of these instruments. At March 31, 2017, the fair value of our Second Term Loan, based on current market rates for debt with similar credit risk and maturities, approximated its carrying values as interest is based upon LIBOR plus an applicable floating margin. Our Senior Notes and Second Senior Notes are categorized within level 2 of the valuation hierarchy. Our Senior Notes had a total fair value of approximately \$796.1 million and \$785.7 million at March 31, 2017 and December 31, 2016, respectively, based on current market rates for debt with similar credit risk and maturities. Our Second Senior Notes had a total fair value of approximately \$204.0 million and \$206.4 million at March 31, 2017 and December 31, 2016, respectively, based on current market rates for debt with similar credit risk and maturities. See Note 9 to our Financial Statements for additional discussion of our financial instruments.

Item 4. Controls and Procedures

Disclosure Controls and Procedures—For the period covered by this quarterly report on Form 10-Q, we carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), of the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended). Based upon such evaluation, the CEO and CFO have concluded that, as of the end of such period, our disclosure controls and procedures are effective.

Changes in Internal Control—There were no changes in our internal controls over financial reporting that occurred during the first quarter 2017, that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

General—We have been and may from time to time be named as a defendant in legal actions claiming damages in connection with engineering and construction projects, technology licenses, other services we provide, and other matters. These are typically claims that arise in the normal course of business, including employment-related claims and contractual disputes or claims for personal injury or property damage which occur in connection with services performed relating to project or construction sites. Contractual disputes normally involve claims relating to the timely completion of projects, performance of equipment or technologies, design or other engineering services or project construction services provided by us. We do not believe that any of our pending contractual, employment-related personal injury or property damage claims and disputes will have a material adverse effect on our results of operations, financial position or cash flow. See Note 14 for additional discussion of claims associated with our projects.

Project Arbitration Matter—The customer for one of our large cost-reimbursable projects has filed a request for arbitration with the International Chamber of Commerce, alleging cost overruns on the project. The customer has not provided evidence to substantiate its allegations and we believe all amounts incurred and billed on the project, including outstanding receivables of approximately \$241.0 million as of March 31, 2017, are contractually due under the provisions of our contract and are recoverable, but have been classified as a non-current asset on our Balance Sheet as we do not anticipate collection within the next year. We do not believe a risk of material loss is probable related to this matter, and accordingly, no amounts have been accrued. While it is possible that a loss may be incurred, we are unable to estimate the range of potential loss, if any. Further, we have asserted counterclaims for our outstanding receivables.

Dispute Related to Sale of Nuclear Operations—On December 31, 2015, we sold our Nuclear Operations to Westinghouse Electric Company LLC (“WEC”). In connection with the transaction, a customary post-closing purchase price adjustment mechanism was negotiated between CB&I and WEC (the “Parties”) to account for any difference between target working capital and actual working capital as finally determined. On April 28, 2016, WEC delivered to us a purported closing statement estimating closing working capital to be negative \$976.5 million, which was \$2.2 billion less than target working capital. In contrast, we calculated closing working capital to be \$1.6 billion, which is \$427.8 million greater than target working capital. On July 21, 2016, we filed a complaint against WEC in the Court of Chancery in the State of Delaware (the “Court”) seeking a declaration that WEC has no remedy for the vast majority of its claims and requesting an injunction barring WEC from bringing such claims. On December 2, 2016, the Court granted WEC’s motion for judgment on the pleadings and dismissed our complaint, stating that the dispute should follow the dispute resolution process as set forth in the sales agreement. We filed an appeal of the Court’s ruling to the Delaware Supreme Court. Due to the bankruptcy filing by WEC on March 29, 2017, the claim resolution proceedings were automatically stayed pursuant to the Bankruptcy Code. At the parties request, the Bankruptcy Court lifted the automatic stay to permit the appeal and dispute resolution process to continue. As such, the oral argument before the Delaware Superior Court was held on May 3, 2017 and we anticipate a decision within approximately 30 days. The Parties intend to move forward with the dispute resolution process, involving the selection of a new independent auditor to replace the previous auditor that resigned. We do not believe a risk of material loss is probable related to this matter, and accordingly, no amounts have been accrued. While it is possible that a loss may be incurred, we are unable to estimate the range of potential loss, if any. We intend to vigorously pursue this litigation and our rights under the purchase agreement.

Asbestos Litigation—We are a defendant in lawsuits wherein plaintiffs allege exposure to asbestos due to work we may have performed at various locations. We have never been a manufacturer, distributor or supplier of asbestos products. Over the past several decades and through March 31, 2017, we have been named a defendant in lawsuits alleging exposure to asbestos involving approximately 6,100 plaintiffs and, of those claims, approximately 1,200 claims were pending and 4,900 have been closed through dismissals or settlements. Over the past several decades and through March 31, 2017, the claims alleging exposure to asbestos that have been resolved have been dismissed or settled for an average settlement amount of approximately two thousand dollars per claim. We review each case on its own merits and make accruals based upon the probability of loss and our estimates of the amount of liability and related

expenses, if any. While we have seen an increase in the number of recent filings, especially in one specific venue, we do not believe the increase or any unresolved asserted claims will have a material adverse effect on our future results of operations, financial position or cash flow, and at March 31, 2017, we had approximately \$8.8 million accrued for liability and related expenses. With respect to unasserted asbestos claims, we cannot identify a population of potential claimants with sufficient certainty to determine the probability of a loss and to make a reasonable estimate of liability, if any. While we continue to pursue recovery for recognized and unrecognized contingent losses through insurance, indemnification arrangements or other sources, we are unable to quantify the amount, if any, that we may expect to recover because of the variability in coverage amounts, limitations and deductibles, or the viability of carriers, with respect to our insurance policies for the years in question.

Table of Contents

Environmental Matters—Our operations are subject to extensive and changing U.S. federal, state and local laws and regulations, as well as the laws of other countries, that establish health and environmental quality standards. These standards, among others, relate to air and water pollutants and the management and disposal of hazardous substances and wastes. We are exposed to potential liability for personal injury or property damage caused by any release, spill, exposure or other accident involving such pollutants, substances or wastes.

In connection with the historical operation of our facilities, including those associated with acquired operations, substances which currently are or might be considered hazardous were used or disposed of at some sites that will or may require us to make expenditures for remediation. In addition, we have agreed to indemnify parties from whom we have purchased or to whom we have sold facilities for certain environmental liabilities arising from acts occurring before the dates those facilities were transferred.

We believe we are in compliance, in all material respects, with environmental laws and regulations and maintain insurance coverage to mitigate our exposure to environmental liabilities. We do not believe any environmental matters will have a material adverse effect on our future results of operations, financial position or cash flow. We do not anticipate we will incur material capital expenditures for environmental controls or for the investigation or remediation of environmental conditions during the remainder of 2017 or 2018.

Item 1A. Risk Factors

There have been no material changes to risk factors as previously disclosed in our 2016 Annual Report on Form 10-K for the year ended December 31, 2016 filed with the SEC on March 1, 2017.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.
