Forward-Looking Statements

Certain matters discussed in this Quarterly Report may constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the “1933 Act”) and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and as such, may involve risks and uncertainties. These forward-looking statements relate to, among other things, expectations of the environment in which the Company operates and projections of future performance including future earnings and financial condition. The Company’s actual results, performance, or achievements may differ significantly from the results, performance, or achievements expected or implied in such forward-looking statements. Such risk and uncertainties and other factors include, but are not limited to, adverse developments or conditions related to or arising from:

- our ability to integrate the former United Commercial Bank (“UCB”) operations and to achieve expected synergies, operating efficiencies or other benefits within expected time frames, or at all, or within expected cost projections;
 - our ability to integrate and retain former depositors and borrowers of United Commercial Bank;
- our ability to manage the loan portfolio acquired from United Commercial Bank within the limits of the loss protection provided by the Federal Deposit Insurance Corporation (“FDIC”);
 - changes in our borrowers’ performance on loans;
 - changes in the commercial and consumer real estate markets;
 - changes in our costs of operation, compliance and expansion;
 - changes in the economy, including inflation;
 - changes in government interest rate policies;
 - changes in laws or the regulatory environment;
 - changes in critical accounting policies and judgments;
- changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board or other regulatory agencies;
 - changes in the equity and debt securities markets;
 - changes in competitive pressures on financial institutions;
 - effect of additional provision for loan losses;
 - effect of any goodwill impairment;
 - fluctuations of our stock price;
 - success and timing of our business strategies;

- impact of reputational risk created by these developments on such matters as business generation and retention, funding and liquidity;
 - changes in our ability to receive dividends from our subsidiaries; and
- political developments, wars or other hostilities may disrupt or increase volatility in securities or otherwise affect economic conditions.

For a more detailed discussion of some of the factors that might cause such differences, see the Company's 2009 Form 10-K under the heading "ITEM 1A. RISK FACTORS" and the information set forth under "RISK FACTORS" in this Form 10-Q. The Company does not undertake, and specifically disclaims any obligation to update any forward-looking statements to reflect the occurrence of events or circumstances after the date of such statements except as required by law.

EAST WEST BANCORP, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
For Three Months Ended March 31, 2010 and 2009
(Unaudited)

1. BASIS OF PRESENTATION

The condensed consolidated financial statements include the accounts of East West Bancorp, Inc. (referred to herein on an unconsolidated basis as “East West” and on a consolidated basis as the “Company”) and its wholly-owned subsidiaries, East West Bank and subsidiaries (the “Bank”) and East West Insurance Services, Inc. Intercompany transactions and accounts have been eliminated in consolidation. East West also has nine wholly-owned subsidiaries that are statutory business trusts (the “Trusts”). In accordance with Financial Accounting Standards Board Accounting Standards Codification (“ASC”) 810, (previously FASB Interpretation No. 46(R), Consolidation of Variable Interest Entities, and Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R)), the Trusts are not consolidated into the accounts of East West Bancorp, Inc.

The interim condensed consolidated financial statements, presented in accordance with accounting principles generally accepted in the United States of America (“GAAP”), are unaudited and reflect all adjustments which, in the opinion of management, are necessary for a fair statement of financial condition and results of operations for the interim periods. All adjustments are of a normal and recurring nature. Results for the three months ended March 31, 2010 are not necessarily indicative of results that may be expected for any other interim period or for the year as a whole. Certain information and note disclosures normally included in annual financial statements prepared in accordance with GAAP have been condensed or omitted. Events subsequent to the condensed consolidated balance sheet date have been evaluated through the date the financial statements are issued for inclusion in the accompanying financial statements. The unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2009.

Certain prior year balances have been reclassified to conform to current year presentation.

2. SIGNIFICANT ACCOUNTING POLICIES

Recent Accounting Standards

In June 2009, the FASB issued ASC 860 (previously SFAS No. 166, Accounting for Transfers of Financial Assets, which amends Statement 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities), which requires more information about transfers of financial assets, including securitization transactions, and where companies have continuing exposure to the risks related to transferred financial assets. It eliminates the concept of a “qualifying special-purpose entity,” changes the requirements for derecognizing financial assets, and requires additional disclosures. It was effective for the Company on January 1, 2010. The adoption of this guidance did not have a material impact to the Company’s condensed consolidated financial statements.

In June 2009, the FASB issued ASC 810 (previously SFAS No. 167, Amendments to FASB Interpretation No. 46(R)), which is a revision to FASB Interpretation No. 46(R), Consolidation of Variable Interest Entities, and changes how a company determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. The determination of whether a company is required to consolidate an entity is based on, among other things, an entity’s purpose and design and a company’s ability to direct the activities of the entity that most significantly impact the entity’s economic performance. It was effective for the Company on January 1,

2010. The adoption of this guidance does not have a material effect on its financial condition, results of operations, or cash flows.

In January 2010, the FASB issued ASU 2010-06, Improving Disclosures about Fair Value Measurements. ASU 2010-06 requires separate disclosure of the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and reasons for the transfers and separate presentation of information about purchases, sales, issuances, and settlements in the reconciliation for Level 3 fair value measurements. Additionally, ASU 2010-06 clarifies existing disclosures regarding level of disaggregation and inputs and valuation techniques. The new disclosures and clarifications of existing disclosures under ASU 2010-06 are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years ending after December 15, 2010 and for interim periods within those fiscal years. The Company adopted the disclosure requirements of significant transfers in and out of Level 1 and Level 2 fair value measurements (see Note 3). The Company does not expect the adoption of the disclosure requirements to have a material effect on its financial condition, results of operations, or cash flows.

3. FAIR VALUE

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company uses various methods including market and income approaches. Based on these approaches, the Company utilizes certain assumptions that market participants would use in pricing the asset or liability. These inputs can be readily observable, market corroborated, or generally unobservable inputs. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Based on the observability of the inputs used in the valuation techniques, the Company is required to provide the information according to the fair value hierarchy noted below. The hierarchy is based on the quality and reliability of the information used to determine fair values. The hierarchy gives the highest priority to quoted prices available in active markets and the lowest priority to data lacking transparency. Financial assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

- Level 1 – Quoted prices for identical instruments that are highly liquid, observable and actively traded in over-the-counter markets. Level 1 financial instruments typically include U.S. Treasury securities.
- Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable and can be corroborated by market data. Level 2 financial instruments typically include U.S. Government debt and agency mortgage-backed securities, municipal securities, U.S. Government sponsored enterprise preferred stock securities, single issue trust preferred securities, equity swap agreements, and OREO.
- Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. This category typically includes mortgage servicing assets, impaired loans, private label mortgage-backed securities, pooled trust preferred securities, and derivatives payable.

In determining the appropriate hierarchy levels, the Company performs a detailed analysis of assets and liabilities that are subject to fair value disclosure. The following tables present both financial

and non-financial assets and liabilities that are measured at fair value on a recurring and non-recurring basis. These assets and liabilities are reported on the condensed consolidated balance sheets at their fair values as of March 31, 2010 and December 31, 2009. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to their fair value measurement. There were no transfers in and out of Levels 1 and 2 during the first quarter of 2010, also there were no transfers in and out of levels 1 and 3 or levels 2 and 3.

- (1) Total gains or losses represent the total realized and unrealized gains and losses recorded for Level 3 assets and liabilities. Realized gains or losses are reported in the condensed consolidated statements of operations.
- (2) Unrealized gains or losses as well as the noncredit portion of OTTI on investment securities are reported in accumulated other comprehensive loss, net of tax, in the condensed consolidated statements of changes in stockholders' equity and comprehensive income.
- (3) Purchases, issuances, sales and settlements represent Level 3 assets and liabilities that were either purchased, issued, sold, or settled during the period. The amounts are recorded at their end of period fair values.
- (4) Transfers in and/or out represent existing assets and liabilities that were either previously categorized as a higher level and the inputs to the model became unobservable or assets and liabilities that were previously classified as Level 3 and the lowest significant input became observable during the period. These assets and liabilities are recorded at their end of period fair values.

Valuation Methodologies

Investment Securities Available-for-Sale – The fair values of available-for-sale investment securities are generally determined by reference to the average of at least two quoted market prices obtained from independent external brokers or prices obtained from independent external pricing service providers who have experience in valuing these securities. In obtaining such valuation information from third parties, the Company has reviewed the methodologies used to develop the resulting fair values.

The Company's Level 3 available-for-sale securities include one private-label mortgage-backed security and four pooled trust preferred securities. The fair values of these investment securities represent less than 1% of the total available-for-sale investment securities. The fair values of the private-label mortgage-backed security and pooled trust preferred securities have traditionally been based on the average of at least two quoted market prices obtained from independent external brokers since broker quotes in an active market are given the highest priority. However, as a result of the global financial crisis and illiquidity in the U.S. markets, the market for these securities has been inactive since mid-2007. It is the Company's view that current broker prices (which are typically non-binding) on the private-label mortgage-backed security and certain pooled trust preferred securities are based on forced liquidation or distressed sale values in very inactive markets that are not representative of the fair value of these securities. As such, the Company considered what weight, if any, to place on transactions that are not orderly when estimating fair value.

For the private-label mortgage-backed security, the Company determined fair value by using the appropriate combination of the market approach reflecting current broker prices and a discounted cash flow approach. The values resulting from each approach (i.e. market and income approaches) were weighted to derive the final fair value on the private-label mortgage-backed security. For the pooled trust preferred securities, the fair value was derived based on discounted cash flow analyses (the income method) prepared by management. In order to determine the appropriate discount rate used in calculating fair values derived from the income method for the private-label mortgage-backed security and pooled trust preferred securities, the Company has made assumptions using an exit pricing approach related to the implied rate of return which have been adjusted for general changes in market rates, estimated changes in credit quality and liquidity risk premium, specific non-performance and default experience in

the collateral underlying the securities. The losses recorded in the period are recognized in noninterest income.

Equity Swap Agreements—The Company has entered into several equity swap agreements with a major investment brokerage firm to hedge against market fluctuations in a promotional equity index certificate of deposit product offered to bank customers. This deposit product, which has a term of 5 years or 5 1/2 years, pays interest based on the performance of the Hang Seng China Enterprises Index (“HSCEI”). The fair value of these equity swap agreements is based on the income approach. The fair value is based on the change in the value of the HSCEI and the volatility of the call option over the life of the individual swap agreement. The option value is derived based on the volatility, the interest rate and the time remaining to maturity of the call option. The Company’s consideration of its counterparty’s credit risk resulted in a \$6 thousand adjustment to the valuation of the equity swap agreements for the quarter ended March 31, 2010. The valuation of equity swap agreements falls within Level 2 of the fair value hierarchy due to the observable nature of the inputs used in deriving the fair value of these derivative contracts. The fair value of the derivative contracts is provided by a third party which the Company places reliance on.

Derivatives Payable—The Company’s derivatives payable are recorded in conjunction with the certificate of deposits (“host instrument”) that pays interest based on changes in the HSCEI and are included in interest-bearing deposits on the condensed consolidated balance sheets. The fair value of these embedded derivatives is based on the income approach. The Company’s consideration of its own credit risk resulted in a \$2 thousand adjustment to the valuation of the derivative liabilities for the quarter ended March 31, 2010. The valuation of the derivatives payable falls within Level 3 of the fair value hierarchy since the significant inputs used in deriving the fair value of these derivative contracts are not directly observable.

FX Option—The Company has entered into a foreign exchange option contract with a major investment firm. The settlement amount is determined based upon the performance of the Renminbi (“RMB”) relative to the US Dollar (“USD”) over the 5-year term of the contract. The performance amount is computed based on the average quarterly value of the RMB per the USD as compared to the initial value. The fair value of the derivative contract is provided by a third party and is determined based on the change in the RMB and the volatility of the option over the life of the agreement. The option value is derived based on the volatility of the option, interest rate and time remaining to the maturity. The Company has also considered the counterparty’s credit risk in determining the valuation. The valuation of the option contract falls within Level 2 of the fair value hierarchy due to the observable nature of the inputs used in deriving the fair value of this derivative contract.

Mortgage Servicing Assets (“MSAs”)—The Company records MSAs in conjunction with its loan sale and securitization activities since the servicing of the underlying loans is retained by the Bank. MSAs are initially measured at fair value using an income approach. The initial fair value of MSAs is determined based on the present value of estimated net future cash flows related to contractually specified servicing fees. The valuation for MSAs falls within Level 3 of the fair value hierarchy since there are no quoted prices for MSAs and the significant inputs used to determine fair value are not directly observable. The valuation of MSAs is determined using a discounted cash flow approach utilizing the appropriate yield curve and several market-derived assumptions including prepayment speeds, servicing cost, delinquency and foreclosure costs and behavior, and float earnings rate. Net cash flows are present valued using a market-derived discount rate. The resulting fair value is then compared to recently observed bulk market transactions with similar characteristics.

Impaired Loans—The Company’s impaired loans are generally measured using the fair value of the underlying collateral, which is determined based on the most recent valuation information received, which may be adjusted based on factors such as the Company’s historical knowledge and changes in

market conditions from the time of valuation. Impaired loans fall within Level 3 of the fair value hierarchy since they are measured at fair value based on the most recent valuation information received on the underlying collateral.

Other Real Estate Owned (“OREO”)—The Company’s OREO represents properties acquired through foreclosure or through full or partial satisfaction of loans, are considered held-for-sale, and are recorded at the lower of cost or estimated fair value at the time of foreclosure. The fair values of OREO properties are based on third-party appraisals, broker price opinions or accepted written offers. These valuations are reviewed and approved by the Company’s appraisal department, credit review, or OREO department. OREO properties are classified as Level 2 assets in the fair value hierarchy. The non-covered OREO balance of \$6.9 million included in the condensed consolidated balance sheets as of March 31, 2010 is recorded net of estimated disposal costs.

Fair Value of Financial Instruments

The carrying amounts and fair values of the Company’s financial instruments as of March 31, 2010 and December 31, 2009, were as follows:

	March 31, 2010		December 31, 2009	
	Carrying Notional or Contract Amount	Estimated Fair Value	Carrying Notional or Contract Amount	Estimated Fair Value
(In thousands)				
Financial Assets:				
Cash and cash equivalents	\$1,180,735	\$1,180,735	\$835,141	\$835,141
Short-term investments	457,184	457,184	510,788	510,788
Securities purchased under resale agreements	380,000	396,432	227,444	232,693
Investment securities available-for-sale	2,191,527	2,191,527	2,564,081	2,564,081
Loans receivable, net	13,471,529	13,396,993	13,844,840	13,519,060
Investment in Federal Home Loan Bank stock	180,124	180,124	180,217	180,217
Investment in Federal Reserve Bank stock	47,285	47,285	36,785	36,785
Accrued interest receivable	78,659	78,659	82,370	82,370
Equity swap agreements	30,038	5,951	38,828	14,177
FX option	30,000	1,841	-	-
Financial Liabilities:				
Customer deposit accounts:				
Demand, savings and money market deposits	7,745,686	6,780,364	7,088,822	6,214,848

Federal funds purchased	22	22	22	22
Federal Home Loan Bank advances	1,769,452	1,753,492	1,805,387	1,791,326
Securities sold under repurchase agreements	1,032,511	1,262,056	1,026,870	1,265,565
Notes payable	12,533	12,533	7,366	7,366
Accrued interest payable	17,343	17,343	19,386	19,386
Long-term debt	235,570	106,715	235,570	103,442
Derivatives payable	30,038	5,955	38,828	14,185

The methods and assumptions used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value are explained below:

Cash and Cash Equivalents—The carrying amounts approximate fair values due to the short-term nature of these instruments.

Short-Term Investments—The fair values of short-term investments generally approximate their book values due to their short maturities.

Securities Purchased Under Resale Agreements—For securities purchased under resale agreements with original maturities of 90 days or less, the carrying amounts approximate fair values due

to the short-term nature of these instruments. At March 31, 2010 and December 31, 2009, the securities purchased under resale agreements are long-term in nature and the fair value is estimated by discounting the cash flows based on expected maturities or repricing dates utilizing estimated market discount rates.

Investment Securities Available-For-Sale—The fair values of the investment securities available-for-sale are generally determined by reference to the average of at least two quoted market prices obtained from independent external brokers or independent external pricing service providers who have experience in valuing these securities. In obtaining such valuation information from third parties, the Company has reviewed the methodologies used to develop the resulting fair values. For private label mortgage-backed securities and pooled trust preferred securities, fair values are based on discounted cash flow analyses.

Loans Receivable, net—The fair value of loans is determined based on the discounted cash flow approach. The discount rate is derived from the associated yield curve plus spreads, and reflects the offering rates in the market for loans with similar financial characteristics. No adjustments have been made for changes in credit within the loan portfolio. It is management's opinion that the allowance for loan losses pertaining to performing and nonperforming loans results in a fair valuation of credit for such loans.

Federal Home Loan Bank and Federal Reserve Bank Stock—The carrying amount approximates fair value, as the stock may be sold back to the Federal Home Loan Bank and the Federal Reserve Bank at carrying value.

Accrued Interest Receivable—The carrying amount of accrued interest receivable approximates fair value due to its short-term nature.

Equity Swap Agreements—The fair value of the derivative contracts is provided by a third party and is determined based on the change in value of the HSCEI and the volatility of the call option over the life of the individual swap agreement. The option value is derived based on the volatility of the option, interest rate and time remaining to the maturity. The Company has also considered the counterparty's credit risk in determining the valuation.

FX Option—The fair value of the derivative contract is provided by a third party and is determined based on the change in the RMB and the volatility of the option over the life of the agreement. The option value is derived based on the volatility of the option, interest rate and time remaining to the maturity. The Company has also considered the counterparty's credit risk in determining the valuation.

Deposits—The fair value of deposits is determined based on the discounted cash flow approach. The discount rate is derived from the associated yield curve, plus spread, if any. For core deposits, the cash outflows are projected by the decay rate based on the Bank's core deposit premium study. Cash flows for all non-time deposits are discounted using the LIBOR yield curve. For time deposits, the cash flows are based on the contractual runoff and are discounted by the Bank's current offering rates, plus spread.

Federal Funds Purchased—The carrying amounts approximate fair values due to the short-term nature of these instruments.

Federal Home Loan Bank Advances—The fair value of FHLB advances is estimated based on the discounted value of contractual cash flows, using rates currently offered by the FHLB of San Francisco for fixed-rate credit advances with similar remaining maturities at each reporting date.

Securities Sold Under Repurchase Agreements—For securities sold under repurchase agreements with original maturities of 90 days or less, the carrying amounts approximate fair values due to the short-term nature of these instruments. At March 31, 2010 and December 31, 2009, most of the securities sold under repurchase agreements are long-term in nature and the fair values of securities sold under repurchase agreements are calculated by discounting future cash flows based on expected maturities or repricing dates, utilizing estimated market discount rates and taking into consideration the call features of each instrument.

Notes Payable—The carrying amount of notes payable approximates fair value as these notes are payable on demand.

Accrued Interest Payable—The carrying amount of accrued interest payable approximates fair value due to its short-term nature.

Long-Term Debt—The fair values of long-term debt are estimated by discounting the cash flows through maturity based on current market rates the Bank would pay for new issuances.

Derivatives Payable—The Company's derivatives payable are recorded in conjunction with the certificate of deposits ("host instrument") that pays interest based on changes in the HSCEI. The Company's derivatives payable are estimated using the income approach. The Company has also considered its own credit risk in determining the valuation.

The fair value estimates presented herein are based on pertinent information available to management as of each reporting date. Although the Company is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since that date, and therefore, current estimates of fair value may differ significantly from the amounts presented herein.

4. STOCK-BASED COMPENSATION

During the three months ended March 31, 2010 and 2009, total compensation cost recognized in the condensed consolidated statements of operations related to stock options and restricted stock awards amounted to \$1.4 million.

Stock Options

The Company issues fixed stock options to certain employees, officers, and directors. Stock options are issued at the current market price on the date of grant with a three-year or four-year vesting period and contractual terms of 7 or 10 years. The Company issues new shares upon the exercise of stock options.

A summary of activity for the Company's stock options as of and for the three months ended March 31, 2010 is presented below:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (In thousands) (1)
Outstanding at beginning of period	1,927,515	\$ 21.59		
Granted	-	-		
Exercised	(49,890)	11.56		
Forfeited	(34,322)	21.27		
Outstanding at end of period	1,843,303	21.87	3.29 years	\$ 3,915
Vested or expected to vest at end of period	1,793,335	\$ 21.94	3.25 years	\$ 3,791
Exercisable at end of period	1,185,625	\$ 23.33	2.39 years	\$ 2,678

(1) Includes in-the-money options only.

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following assumptions. The Company did not issue any stock options during the three months ended March 31, 2010.

	Three Months Ended March 31, 2009
Expected term (1)	4 years
Expected volatility (2)	60.5 %
Expected dividend yield (3)	0.6 %
Risk-free interest rate (4)	1.8 %

- (1) The expected term (estimated period of time outstanding) of stock options granted was estimated using the historical exercise behavior of employees.
- (2) The expected volatility was based on historical volatility for a period equal to the stock option's expected term.
- (3) The expected dividend yield is based on the Company's prevailing dividend rate at the time of grant.
- (4) The risk-free rate is based on the U.S. Treasury strips in effect at the time of grant equal to the stock option's expected term.

During the three months ended March 31, 2010 and 2009, information related to stock options is presented as follows:

	Three Months Ended March 31,	
	2010	2009
Weighted average fair value of stock options granted during the period (1)	\$-	\$3.00
Total intrinsic value of options exercised (in thousands)	\$277	\$1
Total fair value of options vested (in thousands)	\$1,671	\$1,351

(1) The Company did not issue any stock options during the first quarter of 2010.

As of March 31, 2010, total unrecognized compensation cost related to stock options amounted to \$1.9 million. The cost is expected to be recognized over a weighted average period of 1.9 years.

Restricted Stock

In addition to stock options, the Company also grants restricted stock awards to directors, officers and employees. The restricted shares awarded become fully vested after three to five years of continued employment from the date of grant. The Company becomes entitled to an income tax deduction in an amount equal to the taxable income reported by the holders of the restricted shares when

the restrictions are released and the shares are issued. Restricted shares are forfeited if officers and employees terminate prior to the lapsing of restrictions. The Company records forfeitures of restricted stock as treasury share repurchases.

The American Recovery and Reinvestment Act of 2009 ("ARRA") places additional restrictions on restricted stock grants. The executive compensation standards are more stringent under ARRA than those in effect under the U.S. Treasury's Troubled Asset Relief Program ("TARP").

A summary of the activity for restricted stock as of March 31, 2010, including changes during the three months then ended, is presented below:

	Shares	Weighted Average Price
Outstanding at beginning of period	864,717	\$20.12
Granted	903,469	16.89
Vested	(66,796)	34.87
Forfeited	(89,795)	18.85
Outstanding at end of period	1,611,595	17.77

The weighted average fair values of restricted stock awards granted during the three months ended March 31, 2010 and 2009, were \$16.89 and \$7.12, respectively.

As of March 31, 2010, total unrecognized compensation cost related to restricted stock awards amounted to \$20.7 million. This cost is expected to be recognized over a weighted average period of 2.8 years.

5. INVESTMENT SECURITIES

An analysis of the investment securities available-for-sale portfolio is presented as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In thousands)			
As of March 31, 2010				
Available-for-sale				
U.S. Treasury securities	\$53,979	\$31	\$(58)	\$53,952

U.S. Government sponsored enterprise equity securities	1,998	-	(216)	1,782
Other securities	9,023	-	-	9,023
Total investment securities available-for-sale	\$2,563,043	\$41,880	\$(40,842)	\$2,564,081

(1) For the three months ended March 31, 2010, the Company recorded through earnings \$4.8 million in additional increases to the amount related to the credit loss for which an other-than-temporary impairment was previously

recognized. The Company recorded \$107.7 million, on a pre-tax basis, of the credit portion of OTTI through earnings and \$8.2 million, net of tax, of the non-credit portion of OTTI for pooled trust preferred securities in other comprehensive income for the year ended December 31, 2009.

The Company did not have any investment securities held-to-maturity as of March 31, 2010 and December 31, 2009.

The fair values of investment securities are generally determined by reference to the average of at least two quoted market prices obtained from independent external brokers or prices obtained from independent external pricing service providers who have experience in valuing these securities. The

Company performs a monthly analysis on the broker quotes received from third parties to ensure that the prices represent a reasonable estimate of fair value. The procedures include, but are not limited to, initial and ongoing review of third party pricing methodologies, review of pricing trends, and monitoring of trading volumes. The Company assesses that prices received from independent brokers represent a reasonable estimate of fair value through the use of internal and external cash flow models developed that are based on spreads, and when available, market indices. As a result of this analysis, if the Company determines there is a more appropriate fair value based upon available market data, the price received from third parties is adjusted accordingly.

Prices from third-party pricing services are often unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations which utilize inputs that may be difficult to corroborate with observable market based data. Additionally, the majority of these independent broker quotations are non-binding.

As a result of the global financial crisis and illiquidity in the U.S. markets, the Company believes current broker prices obtained on the private-label mortgage-backed security and certain pooled trust preferred securities are based on forced liquidation or distressed sale values in very inactive markets that are not representative of the fair value of these securities. In light of these circumstances, the Company has modified its approach in determining the fair values of these securities. For the pooled trust preferred securities, the Company performed a cash flow analyses using the methodology set forth in Note 3 to determine the fair value of securities. For the private-label mortgage-backed security, the Company determined fair value by using the appropriate combination of the market approach reflecting current broker prices and a discounted cash flow approach. The values resulting from each approach (i.e. market and income approaches) were weighted to derive the final fair value on the private-label mortgage-backed security. In calculating the fair value derived from the income approach, the Company made assumptions related to the implied rate of return, general change in market rates, estimated changes in credit quality and liquidity risk premium, specific non-performance and default experience in the collateral underlying the security, as well as broker discount rates.

The following tables show the Company's rollforward of the amount related to other-than-temporary impairment credit losses for the three months ended March 31, 2010:

	Three Months Ended March 31,	
	2010	2009
	(In thousands)	
Beginning balance, January 1	\$107,671	\$-
Addition of other-than-temporary impairment that was not previously recognized	-	200
Additional increases to the amount related to the credit loss for which an other-than-temporary impairment was previously recognized	4,799	-
Ending balance	\$112,470	\$200

Edgar Filing: EAST WEST BANCORP INC - Form 10-Q

The following table shows the Company's investment portfolio's gross unrealized losses and related fair values, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, as of March 31, 2010 and December 31, 2009:

Corporate Debt Securities (Available-for-Sale)

The majority of unrealized losses at March 31, 2010 are related to six trust preferred debt securities with unrealized losses of 12 months or longer. As of March 31, 2010, these trust preferred securities had an estimated fair value of \$10.9 million, representing less than 1% of the total investment securities available-for-sale portfolio. Except for one security that has remained at investment grade status, the ratings for the other five trust preferred securities were downgraded to non-investment grade status during 2009 due to increased deferral and default activity from the issuers of the underlying debt collateralizing these instruments. As of March 31, 2010, these non-investment grade debt instruments had gross unrealized losses amounting to \$12.1 million, or 56% of the total amortized cost basis of these securities, comprised of \$2.8 million in gross unrealized losses and \$9.3 million in noncredit-related impairment losses as of March 31, 2010 pursuant to the provisions of ASC 320-10-65. As a result of the previously discussed diminishing collateral values, deteriorating cash flows, and increasing estimates of future deferrals and defaults, we recorded an impairment loss of \$4.8 million on our portfolio of pooled trust preferred securities during the first quarter of 2010 for additional increases to the amount related to the credit loss for which an other-than-temporary impairment was previously recognized.

Mortgage-backed Securities (Available-for-Sale)

As of March 31, 2010, the Company had one private-label available-for-sale mortgage-backed security with a fair value of \$12.2 million, with a gross unrealized loss of \$9.1 million, or 43% of the amortized cost basis of this security, for more than 12 months. This security is collateralized by single

family loans and secured by the first lien on these residential properties. Additionally, any principal and interest shortfall that may arise from the deterioration of the collateral will be covered by a monoline insurance provider. The Company does not intend to sell this security and it is not more likely than not that the Company will be required to sell this security before recovery of its amortized cost basis. As such, the Company does not deem this security to be other-than-temporarily impaired as of March 31, 2010.

As of March 31, 2010, there were seven individual securities that have been in a continuous unrealized loss position for twelve months or more. These securities are comprised of six trust preferred securities with a total fair value of \$10.9 million and one mortgage-backed security with a fair value of \$12.2 million. As of March 31, 2010, there were also thirty-six securities that have been in a continuous unrealized loss position for less than twelve months. The unrealized losses on these securities are primarily attributed to changes in interest rates as well as the liquidity crisis that has impacted all financial industries. The issuers of these securities have not, to our knowledge, established any cause for default on these securities. These securities have fluctuated in value since their purchase dates as market interest rates have fluctuated. However, the Company has the ability and the intention to hold these securities until their fair values recover to cost or maturity. As such, the Company does not deem these securities to be other-than-temporarily impaired.

The scheduled maturities of investment securities available-for-sale at March 31, 2010 are presented as follows:

	Amortized Cost	Estimated Fair Value
	(In thousands)	
Due within one year	\$1,181,715	\$1,175,262
Due after one year through five years	232,433	239,179
Due after five years through ten years	64,294	66,185
Due after ten years	707,442	709,073
Indeterminate maturity	1,998	1,828
Total investment securities available-for-sale	\$2,187,882	\$2,191,527

6. COVERED ASSETS AND FDIC INDEMNIFICATION ASSET

Covered Assets

Covered assets are loans receivable and OREO that were acquired in the UCB Acquisition on November 6, 2009 for which the Company entered into a shared-loss agreement (the “shared-loss agreement”) with the FDIC. The shared-loss agreement covered all the loans originated by United Commercial Bank in the domestic U.S. and Hong Kong. Loans originated by United Commercial Bank in China under its United Commercial Bank China (Limited) subsidiary were not included in the shared-loss agreement. The Company will share in the losses, which begins with the first dollar of loss incurred, on the loan pools (including single family residential mortgage loans, commercial loans, foreclosed loan collateral and other real estate owned), covered (“covered assets”) under the shared-loss agreement.

Pursuant to the terms of the shared-loss agreement, the FDIC is obligated to reimburse the Company 80% of eligible losses of up to \$2.05 billion with respect to covered assets. The FDIC will reimburse the Company for 95% of eligible losses in excess of \$2.05 billion with respect to covered assets. The Company has a corresponding obligation to reimburse the FDIC for 80% or 95%, as applicable, of eligible recoveries with respect to covered assets. The shared-loss agreement for commercial and single family residential mortgage loans is in effect for 5 years and 10 years,

respectively, from the November 6, 2009 acquisition date and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition date.

On January 14, 2020, the Company is required to pay to the FDIC 50% of the excess, if any of (i) \$410 million over (ii) the sum of (A) 25% of the asset discount plus (B) 25% of the Cumulative Shared-Loss Payments plus (C) the Cumulative Servicing Amount if net losses on covered loans subject to the stated threshold is not reached. As of March 31, 2010, the estimate for this liability is zero.

At the November 6, 2009 acquisition date, we accounted for the loan portfolio acquired from United Commercial Bank at fair value and estimated that the fair value of the loan portfolio subject to the shared-loss agreement at \$5.66 billion. This represents the expected cash flows from the portfolio. In estimating the nonaccretable difference, we (a) calculated the contractual amount and timing of undiscounted principal and interest payments (the “undiscounted contractual cash flows”) and (b) estimated the amount and timing of undiscounted expected principal and interest payments (the “undiscounted expected cash flows”). The amount by which the undiscounted expected cash flows exceed the estimated fair value (the “accretable yield”) is accreted into interest income over the life of the loans. The difference between the undiscounted contractual cash flows and the undiscounted expected cash flows is the nonaccretable difference. The nonaccretable difference represents our estimate of the credit losses expected and was considered in determining the fair value of the loans as of the acquisition date. In the determination of contractual cash flows and cash flows expected to be collected, we assumed no prepayment on the SOP 03-3 nonaccrual loan pools as we do not anticipate any significant prepayments on credit impaired loans. For the SOP 03-3 accrual loans for single-family, multi-family and commercial real estate, we used a third party vendor to obtain prepayment speeds, in order to be consistent with the market participants’ notion of the accounting standards. The third party vendor is recognized in the mortgage-industry for the delivery of prepayment and default models for the secondary market to identify loan level prepayment, delinquency, default, and loss propensities. The prepayment rates for the construction, land, commercial and consumer pools have historically been low and so we applied the prepayment assumptions of our current portfolio using our internal modeling. The Company has elected to account for all loans acquired in the FDIC-assisted acquisition of United Commercial Bank under ASC 310-30.

United Commercial Bank’s loan portfolio included unfunded commitments for commercial lines of credit, constructions draws and other lending activity. Any additional advances on these loans subsequent to November 6, 2009 are not accounted for under ASC 310-30. The total commitment outstanding as of the acquisition date is included under the shared-loss agreement. As such, any additional advances, up to the total commitment outstanding at the time of acquisition are covered loans.

The covered loans acquired are and will continue to be subject to the Bank’s internal and external credit review and monitoring. If credit deterioration is experienced subsequent to the November 6, 2009 acquisition fair value amount, such deterioration will be measured through our loss reserving methodology and a provision for credit losses will be charged to earnings with a partially offsetting noninterest income item reflecting the increase to the FDIC indemnification asset or receivable. As of March 31, 2010, no events have occurred that require an allowance for the UCB covered loans.

The carrying amounts and the composition of the covered loans as of March 31, 2010 and December 31, 2009 are as follows:

	Credit Impaired	Other Loans (In thousands)	Total
As of March 31, 2010			
Real estate loans			
Residential single family	\$20,573	\$596,512	\$617,085
Residential multifamily	141,952	993,575	1,135,527

Covered discount	(926,185)	(430,342)	(1,356,527)
Net valuation of loans	1,619,700	3,240,956	4,860,656
Subsequent acquisition loan advances	-	360,065	360,065
Total covered loans	\$1,619,700	\$3,601,021	\$5,220,721
As of December 31, 2009			
Real estate loans			
Residential single family	\$22,325	\$621,742	\$644,067
Residential multifamily	158,452	1,010,413	1,168,865
Commercial and industrial real estate	900,165	1,515,284	2,415,449
Construction and land	1,236,228	155,500	1,391,728
Total real estate	2,317,170	3,302,939	5,620,109
Other loans:			
Commercial business	603,507	580,260	1,183,767
Other consumer	422	100,377	100,799
Total other loans	603,929	680,637	1,284,566
Total principal balance	2,921,099	3,983,576	6,904,675
Covered discount	(1,033,720)	(474,948)	(1,508,668)
Net valuation of loans	1,887,379	3,508,628	5,396,007
Subsequent acquisition loan advances	-	202,148	202,148
Total covered loans	\$1,887,379	\$3,710,776	\$5,598,155

At March 31, 2010 and December 31, 2009, \$574.7 million and \$675.6 million of the credit impaired loans, respectively, were considered to be nonperforming loans. The following table sets forth information regarding covered nonperforming assets as of the dates indicated:

March 31,

	2010	December 31, 2009
	(Dollars in thousands)	
Covered nonaccrual loans	\$574,672	\$675,625
Covered loans past due 90 days or more but not on nonaccrual	-	-
Total nonperforming loans	574,672	675,625
Other real estate owned covered, net	78,354	44,273
Total covered nonperforming assets	\$653,026	\$719,898

We had forty-nine covered OREO properties as of March 31, 2010 with a combined aggregate carrying value of \$78.4 million. Approximately 87% of covered OREO properties as of March 31, 2010 were located in California. As of December 31, 2009, we had sixty-one covered OREO properties with an aggregate carrying value of \$44.3 million. During the first three months of 2010, we foreclosed on seventeen properties with an aggregate carrying value of \$72.4 million as of the foreclosure date. During the first three months of 2010, we sold twenty-nine covered OREO properties with a total carrying value of \$26.7 million resulting in a total combined net loss on sale of \$2.8 million. During the first quarter of 2010 we also recorded \$11.0 million in writedowns and \$644 thousand in net principal additions on covered OREO.

The following table shows the carrying amounts for the covered loans as of March 31, 2010 and December 31, 2009, respectively:

	March 31, 2010	December 31, 2009
	(In thousands)	
Contractually required payments of interest and principal	\$7,000,944	\$7,976,064
Nonaccretable difference	(1,368,739)	(1,596,950)
Cash flows expected to be collected (1)	5,632,205	6,379,114
Accretable difference	(771,549)	(983,107)
Carrying value of covered loans	\$4,860,656	\$5,396,007

(1) Represents undiscounted expected principal and interest cash flows.

Changes in the accretable yield for the covered loans for the three months ended March 31, 2010 is as follows:

	Accretable Yield (In thousands)
Beginning balance, January 1, 2010	\$983,107
Accretion	(3,853)
Disposals	(207,705)
Ending balance, March 31, 2010	\$771,549

The excess of cash flows expected to be collected over the initial fair value of acquired loans is referred to as the accretable yield and is accreted into interest income over the estimated life of the acquired loans using the effective yield method. The accretable yield will change due to:

- estimate of the remaining life of acquired loans which may change the amount of future interest income
- estimate of the amount of contractually required principal and interest payments over the estimated life that will not be collected (the nonaccretable difference); and
- indices for acquired loans with variable rates of interest.

From December 31, 2009 to March 31, 2010, excluding scheduled principal payments, a total of \$393.2 million of loans were removed from the covered loans accounted under ASC 310-30 due to loans being paid in full, sold, or transferred to covered OREO. The payoff activity during this period of time was higher than anticipated and what was modeled, however management does not believe this activity suggests the need for a change in the original prepayment assumptions at this time due to the short

duration of historical payoff activities. The loan discount related to these prepayments of \$70.9 million was recorded as an adjustment to interest income in the first quarter of 2010. No impairment write-downs were recorded in the first quarter of 2010.

FDIC Indemnification Asset

As of December 31, 2009, we recorded an FDIC indemnification asset of \$1.09 billion, consisting of the present value of the amounts the Company expects to receive from the FDIC under the shared-loss agreement. From the period of time from December 31, 2009 through March 31, 2010, the Company recorded \$11.5 million of accretion into income. Additionally, because of the high prepayment activity during this timeframe, the Company reduced the FDIC indemnification asset by \$122.3 million and recorded the adjustment to noninterest (loss) income. As of March 31, 2010, the recorded FDIC indemnification asset was \$981.0 million.

The table below shows FDIC indemnification asset activity for the three months ended March 31, 2010:

	FDIC Indemnification Asset (In thousands)
Beginning balance, January 1, 2010	\$ 1,091,814
Accretion	11,468
Reductions (1)(2)	(122,332)
Ending balance, March 31, 2010	\$ 980,950

- (1) Reductions relate to higher cash flows received from principal amortization, partial prepayments, loan payoffs, and loan sales.
- (2) The reduction amount of \$122.3 million also includes chargeoffs, of which \$61.9 million is recoverable from the FDIC and recorded in other assets.

7. ALLOWANCE FOR LOAN LOSSES

The following table summarizes activity in the allowance for loan losses for the periods indicated:

	Three Months Ended March 31,			
	2010		2009	
	(Dollars in thousands)			
Allowance balance, beginning of period	\$238,833		\$178,027	
Allowance for unfunded loan commitments and letters of credit	(808)	(1,008)
Provision for loan losses	76,421		78,000	
Chargeoffs:				
Single family real estate	3,538		3,853	
Multifamily real estate	4,963		1,746	
Commercial real estate	8,287		2,796	
Land	26,945		12,523	
Construction	14,255		18,443	
Commercial business	7,569		19,459	
Automobile	96		8	
Other consumer	520		1,312	
Total chargeoffs	66,173		60,140	
Recoveries:				
Single family real estate	112		21	
Multifamily real estate	103		122	
Commercial and industrial real estate	86		6	
Land	117		-	
Construction	584		119	
Commercial business	1,201		281	
Automobile	24		22	
Other consumer	17		-	
Total recoveries	2,244		571	
Net chargeoffs	63,929		59,569	
Allowance balance, end of period	\$250,517		\$195,450	
Average non-covered loans outstanding	\$8,614,742		\$8,197,173	
Total gross non-covered loans outstanding, end of period	\$8,539,286		\$8,064,315	
Annualized net chargeoffs to average non-covered loans	2.97	%	2.91	%
Allowance for loan losses to total gross non-covered loans, end of period	2.93	%	2.42	%

At March 31, 2010, the allowance for loan losses amounted to \$250.5 million, or 2.93% of total non-covered loans, compared with \$238.8 million or 2.81% of total non-covered loans at December 31, 2009, and \$195.5 million, or 2.42% of total gross loans as of March 31, 2009. The increase in the allowance for loan losses is primarily due to the \$76.4 million in provisions for loan losses recorded during the three months ended March 31, 2010. This compares to

\$78.0 million in provisions for loan losses recorded during the three months ended March 31, 2009. During the first three months of 2010, the Company recorded \$63.9 million in net chargeoffs, compared to \$59.6 million in net chargeoffs recorded during the first three months of 2009.

8. PREMISES AND EQUIPMENT

Premises and equipment consists of the following:

	March 31, 2010	December 31, 2009
	(In thousands)	
Land	\$15,545	\$15,545
Office Buildings	101,768	27,923
Leasehold improvements	24,725	24,663
Furniture, fixtures and equipment	46,323	39,253
Total cost	188,361	107,384
Accumulated depreciation and amortization	(53,194)	(48,285)
Net book value	\$135,167	\$59,099

The increase in office buildings during the first quarter of 2010 is due to the purchase of several properties totaling approximately \$78.6 million by the Company as part of the FDIC-assisted transaction of United Commercial Bank.

Capitalized assets are depreciated or amortized on a straightline basis in accordance with the estimated useful life for each fixed asset class. The estimated useful life for furniture and fixtures is seven years, office equipment is for five years and twenty-five years for buildings and improvements. Leasehold improvements are amortized over the term of the lease or useful life, whichever is shorter.

9. GOODWILL AND OTHER INTANGIBLE ASSETS

The carrying amount of goodwill remained at \$337.4 million at March 31, 2010 and December 31, 2009. Goodwill is tested for impairment on an annual basis as of December 31, or more frequently as events occur, or as current circumstances and conditions warrant. The Company records impairment writedowns as charges to noninterest expense and adjustments to the carrying value of goodwill. Subsequent reversals of goodwill impairment are prohibited.

As of March 31, 2010, the Company's market capitalization based on total outstanding common and preferred shares was \$3.06 billion and its total stockholders' equity was \$2.31 billion. The Company performed its annual impairment test as of December 31, 2009 to determine whether and to what extent, if any, recorded goodwill was impaired. The analysis compared the fair value of each of the reporting units, including goodwill, to the respective carrying amounts. If the carrying amount of the reporting unit, including goodwill exceeds the fair value of that reporting unit, then further testing for goodwill impairment is performed.

The Company also has premiums on acquired deposits which represent the intangible value of depositor relationships resulting from deposit liabilities assumed in various acquisitions. Other intangibles are tested for impairment on an annual basis, or more frequently as events occur, or as current circumstances and conditions warrant. The gross carrying amount of deposit premiums totaled \$115.4 million and \$117.5 million, respectively, and the related accumulated amortization totaled \$28.2 million and \$26.9 million, respectively, at March 31, 2010 and December 31, 2009. During 2009, the Company added \$74.4 million in deposit premiums as a result of the UCB Acquisition. The Company amortizes premiums on acquired deposits based on the projected useful lives of the related deposits.

The following table provides the estimated future amortization expense of premiums on acquired deposits for 2010 and the succeeding four years as follows:

Estimate For The Year Ending December 31,	Amount (In thousands)
2010	\$ 9,675
2011	11,959
2012	10,563
2013	9,047
2014	8,162

10. COMMITMENTS AND CONTINGENCIES

Credit Extensions - In the normal course of business, the Company has various outstanding commitments to extend credit that are not reflected in the accompanying condensed consolidated financial statements. As of March 31, 2010 and December 31, 2009, respectively, undisbursed loan commitments amounted to \$2.27 billion and \$2.46 billion, respectively. Commercial and standby letters of credit amounted to \$697.8 million and \$715.2 million as of March 31, 2010 and December 31, 2009, respectively.

Guarantees – From time to time, the Company sells or securitizes loans with recourse in the ordinary course of business. For loans that have been sold or securitized with recourse, the recourse component is considered a guarantee. When the Company sells or securitizes a loan with recourse, it commits to stand ready to perform if the loan defaults, and to make payments to remedy the default. As of March 31, 2010, total loans sold or securitized with recourse amounted to \$488.4 million and were comprised of \$69.7 million in single family loans with full recourse and \$418.7 million in multifamily loans with limited recourse. In comparison, total loans sold or securitized with recourse amounted to \$497.5 million at December 31, 2009, comprised of \$72.6 million in single family loans with full recourse and \$425.0 million in multifamily loans with limited recourse. The recourse provision on multifamily loans is limited to 2.5% of the top loss on the underlying loans. The Company's recourse reserve related to loan sales and securitizations totaled \$3.2 million as of March 31, 2010 and \$2.9 million as of December 31, 2009, and is included in accrued expenses and other liabilities in the accompanying condensed consolidated balance sheets. Despite the challenging conditions in the real estate market, the Company continues to experience relatively minimal losses from the single family and multifamily loan portfolios.

The Company also sells or securitizes loans without recourse that may have to be subsequently repurchased if a defect that occurred during the loan origination process results in a violation of a representation or warranty made in connection with the securitization or sale of the loan. When a loan sold or securitized to an investor without recourse fails to perform according to its contractual terms, the investor will typically review the loan file to determine whether defects in the origination process occurred and if such defects give rise to a violation of a representation or warranty made to the investor in connection with the sale or securitization. If such a defect is identified, the Company may be required to either repurchase the loan or indemnify the investor for losses sustained. If there are no such defects, the Company has no commitment to repurchase the loan. As of March 31, 2010 and December 31, 2009, the amount of loans sold without recourse totaled \$1.65 billion and \$1.50 billion, respectively. Total loans securitized without recourse amounted to \$348.4 million and \$358.1 million, respectively, at March 31, 2010 and December 31, 2009. The loans sold or securitized without recourse represent the unpaid principal balance of the Company's loans serviced for others portfolio.

Litigation – Neither the Company nor the Bank is involved in any material legal proceedings at March 31, 2010. The Bank, from time to time, is a party to litigation which arises in the ordinary course of business, such as claims to enforce liens, claims involving the origination and servicing of loans, and other issues related to the business of the Bank. After taking into consideration information furnished by counsel to the Company and the Bank, management believes that the resolution of such issues will not have a material adverse impact on the financial position, results of operations, or liquidity of the Company or the Bank.

11. STOCKHOLDERS' EQUITY

Series A Preferred Stock Offering - In April 2008, the Company issued 200,000 shares of 8% Non-Cumulative Perpetual Convertible Preferred Stock, Series A ("Series A"), with a liquidation preference of \$1,000 per share. The Company received \$194.1 million of additional Tier 1 qualifying capital, after deducting stock issuance costs. The holders of the Series A preferred stock have the right at any time to convert each share of Series A preferred stock into 64.9942 shares of the Company's common stock, plus cash in lieu of fractional shares. This represents an initial conversion price of approximately \$15.39 per share of common stock or a 22.5% conversion premium based on the closing price of the Company's common stock on April 23, 2008 of \$12.56 per share. On or after May 1, 2013, the Company will have the right, under certain circumstances, to cause the Series A preferred stock to be converted into shares of the Company's common stock. Dividends on the Series A preferred stock, if declared, will accrue and be payable quarterly in arrears at a rate per annum equal to 8% on the liquidation preference of \$1,000 per share, on February 15, May 15, August 15 and November 15 of each year. The proceeds from this offering were used to augment the Company's liquidity and capital positions and reduce its borrowings. As of March 31, 2010, 85,741 shares were outstanding.

Series B Preferred Stock Offering - On December 5, 2008, the Company issued 306,546 shares of Fixed Rate Cumulative Perpetual Preferred Stock, Series B ("Series B"), with a liquidation preference of \$1,000 per share. The Company received \$306.5 million of additional Tier 1 qualifying capital from the U.S. Treasury by participating in the U.S. Treasury's Capital Purchase Program ("TCPP"). The Series B preferred shares will pay cumulative dividends at a rate of 5% per annum until the fifth anniversary of the investment date and thereafter at a rate of 9% per annum. The Series B preferred shares are transferable by the U.S. Treasury at any time. Subject to the approval of the Federal Reserve Board, the Series B preferred shares may be reacquired by the Company at 100% of liquidation preference (plus any accrued and unpaid dividends).

Series C Preferred Stock - On November 5, 2009, we entered into investment agreements with various investors, pursuant to which the investors purchased an aggregate of \$500 million of our common stock and newly-issued shares of our Mandatorily Convertible Cumulative Non-Voting Perpetual Preferred Stock, Series C, or the Series C Preferred Stock, in a private placement transaction, which closed on November 6, 2009. In the private placement, we issued to certain qualified institutional buyers and accredited investors, several of whom were already our largest institutional stockholders, the following securities:

- an aggregate of 335,047 shares of our Series C Preferred Stock, each share of which automatically converted into 110.74197 shares of our common stock (an aggregate of 37,103,734 shares of our common stock) at a per common share conversion price of \$9.03, as adjusted in accordance with the terms of the Series C Preferred Stock; and
- an aggregate of 18,247,012 shares of our common stock.

On March 25, 2010, at a special meeting of the stockholders, our stockholders voted to approve the issuance of 37,103,734 shares of our common stock upon conversion of the 335,047 shares of the Series C Preferred Stock. The Series C Preferred Stock was subsequently automatically converted into

shares of our common stock on March 30, 2010, and, as a result, no shares of the Series C Preferred Stock remain outstanding.

Warrants – During 2008, in conjunction with the Series B preferred stock offering, the Company issued warrants with an initial price of \$15.15 per share of common stock for which the warrants may be exercised, with an allocated fair value of \$25.2 million. The warrants may be exercised at any time on or before December 5, 2018. During the fourth quarter of 2009, the Company received a 50% reduction in the warrants we issued to the U.S. Treasury in conjunction with the TARP capital we received in December, 2008. This adjustment to the warrants was due to the fact that within one year of issuance, the Company raised new capital in excess of the TARP capital issued in December, 2008. The warrants, and all rights under the warrants, are freely transferable. As of March 31, 2010, there were 1,517,555 warrants outstanding.

Stock Repurchase Program – During 2007, the Company’s Board of Directors authorized a new stock repurchase program to buy back up to \$80.0 million of the Company’s common stock. The Company did not repurchase any shares during the three months ended March 31, 2010 in connection with this stock repurchase program.

Quarterly Dividends – On January 26, 2010, the Company’s Board of Directors declared first quarter preferred stock cash dividends of \$20.00 per share on its Series A preferred stock payable on or about February 1, 2010 to shareholders of record on January 15, 2010. On January 26, 2010, the Company’s Board of Directors also declared and paid quarterly preferred cash dividends on its Series B preferred shares. Total cash dividends accrued and paid in conjunction with the Company’s Series A and B preferred stock amounted to \$5.5 million during the three months ended March 31, 2010.

On January 26, 2010, the Company’s Board of Directors also declared quarterly common stock cash dividends of \$0.01 per share payable on or about February 24, 2010 to shareholders of record on February 10, 2010. Cash dividends totaling \$1.1 million were paid to the Company’s common shareholders during the first quarter of 2010.

Earnings (Loss) Per Share (“EPS”) – The actual number of shares outstanding at March 31, 2010 was 147,907,806. Basic EPS excludes dilution and is computed by dividing income or loss available to common stockholders by the weighted-average number of shares outstanding during the period. Diluted EPS is calculated on the basis of the weighted average number of shares outstanding during the period plus restricted stock and shares issuable upon the assumed exercise of outstanding convertible preferred stock, common stock options and warrants, unless they have an antidilutive effect.

The following table sets forth earnings (loss) per share calculations for the three months ended March 31, 2010 and 2009:

	2010	Three Months Ended March 31,			2009	Number of Weighted Average Shares	Per Share Amounts
		Net income available to common stockholders	Number of Weighted Average Shares	Per Share Amounts			
(In thousands, except per share data)							
Basic EPS							
Net income (loss)							
as reported	\$ 24,916			\$ (22,466)			
Less: Preferred stock dividends	(6,138)			(8,743)			

and							
amortization of							
preferred stock							
discount							
Basic earnings							
(loss) per share	\$ 18,778	109,961	\$ 0.17	\$ (31,209)	62,998	\$ (0.50)	
Diluted EPS							
Effect of dilutive							
securities:							
Stock options	-	170	-	-	-	-	
Restricted stock	3	332	-	-	-	-	
Stock warrants	-	163	-	-	-	-	
Convertible							
Preferred Stock	-	36,239	-	-	-	-	
Diluted earnings							
(loss) per share	\$ 18,781	146,865	\$ 0.13	\$ (31,209)	62,998	\$ (0.50)	

The following outstanding convertible preferred stock, stock options, and restricted stock for the three months ended March 31, 2010 and 2009, respectively, were excluded from the computation of diluted EPS because including them would have had an antidilutive effect:

	Three Months Ended March 31,	
	2010	2009
	(In thousands)	
Convertible preferred stock	5,573	12,772
Stock options	1,067	2,570
Restricted stock	503	779

12. BUSINESS SEGMENTS

The Company utilizes an internal reporting system to measure the performance of various operating segments within the Bank and the Company overall. We have identified three operating segments for purposes of management reporting: retail banking, commercial banking, and other. For the Bank, the chief operating decision maker is the Chief Executive Officer (“CEO”). Specifically, our business focus has culminated in a two-segment core business structure: Retail Banking and Commercial Banking. A third segment, “Other”, provides broad administrative support to these two core segments. During the fourth quarter of 2009, a fourth operating segment, the United Commercial Bank segment (the “UCB segment”) was identified as a result of the UCB Acquisition. The UCB segment was identified as a segment due to the significant size of the transaction and meets the other requirements of a segment, that is, the segment engages in business activities from which it earns revenues and incur expenses and whose operating results are regularly reviewed by the Company’s chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance and for which discrete financial information is available.

During the first quarter of 2010, the Company’s management made the decision to fully integrate the UCB segment into its two-segment core business structure: Retail Banking and Commercial Banking. With this integration, effective the first quarter of 2010, the Company’s business focus reverted back to a three-segment core business structure: Retail Banking, Commercial Banking and Other.

The Retail Banking segment focuses primarily on retail operations through the Bank’s branch network. The Commercial Banking segment, which includes commercial real estate, primarily generates commercial loans through the efforts of the commercial lending offices located in the Bank’s northern and southern California production offices. Furthermore, the Company’s Commercial Banking segment also offers a wide variety of international finance and trade services and products. The remaining centralized functions, including Treasury activities and eliminations of intersegment amounts, have been aggregated and included in “Other.”

The Company’s funds transfer pricing assumptions are intended to promote core deposit growth and to reflect the current risk profiles of various loan categories within the credit portfolio. Transfer pricing assumptions and methodologies are reviewed at least annually to ensure that the Company’s process is reflective of current market conditions. The transfer pricing process is formulated with the goal of incenting loan and deposit growth that is consistent with the Company’s overall growth objectives as well as provide a reasonable and consistent basis for the measurement of the Company’s business segments and product net interest margins. Changes to the Company’s transfer pricing assumptions and methodologies are approved by the Asset Liability Committee.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies. Operating segment results are based on the Company's internal management reporting process, which reflects assignments and allocations of capital, certain operating

and administrative costs and the provision for loan losses. Net interest income is based on the Company's internal funds transfer pricing system which assigns a cost of funds or a credit for funds to assets or liabilities based on their type, maturity or repricing characteristics. Noninterest income and noninterest expense, including depreciation and amortization, directly attributable to a segment are assigned to that business. Indirect costs, including overhead expense, are allocated to the segments based on several factors, including, but not limited to, full-time equivalent employees, loan volume and deposit volume. The provision for credit losses is allocated based on actual chargeoffs for the period as well as average loan balance for each segment during the period. The Company evaluates overall performance based on profit or loss from operations before income taxes excluding nonrecurring gains and losses.

The following tables present the operating results and other key financial measures for the individual operating segments for the three months ended March 31, 2010 and 2009:

	Three Months Ended March 31, 2010			
	Retail Banking	Commercial Banking	Other	Total
	(In thousands)			
Interest income	\$90,061	\$202,001	\$26,641	\$318,703

Segment pretax (loss) profit	(11,706)	(6,903)	(17,322)	(35,931)
Segment assets	6,489,624	4,864,092	1,210,808	12,564,524

13. BUSINESS COMBINATIONS

During the first quarter of 2010, the Company recognized an \$8.1 million purchase price adjustment related to the fair value of investments obtained in the acquisition of United Commercial Bank with a corresponding increase to the gain on acquisition. This adjustment represents accrued interest related to certain available-for-sale investments acquired in the FDIC assisted acquisition of United Commercial Bank that was not previously recognized. The adjustment is included in noninterest income for the quarter ended March 31, 2010.

Under ASC 805, Business Combinations, the Company is allowed to recognize additional assets and liabilities related to the November 6, 2009 acquisition of UCB if new information is obtained about facts and circumstances that existed as of the acquisition date that, if known, would have resulted in the recognition of those assets and those liabilities as of that date. The measurement period ends as soon as the Company receives the information it was seeking about facts and circumstances that existed as of the acquisition date or learns that more information is not obtainable. However, the measurement period shall not exceed one year from the acquisition date.

14. SUBSEQUENT EVENTS

Dividend Payout

On April 26, 2010, the Company's Board of Directors approved the payment of second quarter dividends of \$20.00 per share on the Company's Series A preferred stock. The dividend is payable on or about May 1, 2010 to shareholders of record as of April 15, 2010. Additionally, the Board declared a dividend of \$0.01 per share on the Company's common stock payable on or about May 24, 2010 to shareholders of record as of May 10, 2010.

The Board has also authorized the payment of second quarter dividends of \$12.50 per share on the Company's Series B Preferred Stock to be paid on May 15, 2010.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion provides information about the results of operations, financial condition, liquidity, and capital resources of East West Bancorp, Inc. and its subsidiaries. This information is intended to facilitate the understanding and assessment of significant changes and trends related to our financial condition and the results of our operations. This discussion and analysis should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2009, and the condensed consolidated financial statements and accompanying notes presented elsewhere in this report.

Critical Accounting Policies

Our financial statements are prepared in accordance with accounting principles generally accepted in the United States of America and general practices within the banking industry. The financial information contained within these statements is, to a significant extent, financial information that is based on approximate measures of the financial effects of transactions and events that have already occurred. Various elements of our accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. In addition, certain accounting policies require significant judgment in applying complex accounting principles to individual transactions to determine the most appropriate treatment. We have established procedures and processes to facilitate making the judgments necessary to prepare financial statements.

The following is a summary of the areas which require more judgment and complex accounting estimates and principles. In each area, we have identified the variables most important in the estimation process. We have used the best information available to make the estimations necessary to value the related assets and liabilities. Actual performance that differs from our estimates and future changes in the key variables could change future valuations and impact the results of operations.

- fair valuation of financial instruments;
 - investment securities;
 - covered loans;
- FDIC indemnification asset;
- allowance for loan losses;
- other real estate owned;
 - loan sales;
- goodwill impairment;
- share-based compensation; and
- income taxes and deferred tax asset valuation

Our significant accounting policies are described in greater detail in our 2009 Annual Report on Form 10-K in the “Critical Accounting Policies” section of Management’s Discussion and Analysis and in Note 1 to the Consolidated

Financial Statements—“Significant Accounting Policies” which are essential to understanding Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Overview

37

For the first quarter 2010, net income was \$24.9 million, an increase of \$47.4 million over a net loss of \$22.5 million reported in the first quarter of 2009. The increase in net income was largely driven by our larger asset size and increased earnings power resulting primarily from the UCB acquisition on November 6, 2009.

During the first quarter of 2010, we experienced a small decline in deposits with total deposits decreasing to \$14.61 billion as of March 31, 2010, representing a 3%, or \$380.9 million, decrease from the total deposits of \$14.99 billion as of December 31, 2009. The decrease in deposits is primarily due to strategically reducing brokered deposits by \$582.6 million during the first quarter of 2010 partially offset by growth in deposits of \$201.7 million from our retail network and commercial customers. Our cost of deposits decreased 18 basis points to 0.93% for the first quarter of 2010, compared to 1.11% for the fourth quarter of 2009. Our ongoing efforts to deleverage our balance sheet have resulted in a lower loan to deposit ratio of 93.9% at March 31, 2010, compared to 94.0% at December 31, 2009 and 96.8% at September 30, 2009.

Our total borrowing capacity and holdings of cash and short-term investments increased to \$5.49 billion as of March 31, 2010, compared to \$4.24 billion as of December 31, 2009. As of March 31, 2010, we had \$1.18 billion in cash and cash equivalents and approximately \$3.86 billion in available borrowing capacity from various sources including the Federal Home Loan Bank (“FHLB”), the Federal Reserve Bank (“FRB”) and federal funds facilities with several financial institutions. We believe that our liquidity position is more than sufficient to meet our operating expenses, borrowing needs and other obligations.

Our capital position also remains strong. In 2009, we raised a total \$588.6 million, net of costs, in capital primarily through the issuance of \$335.0 million in Series C Preferred Shares and \$272.8 million in common stock. These issuances of preferred and common stock have bolstered our capital ratios well above regulatory minimums and “well-capitalized” thresholds for banks. As of March 31, 2010, our total risk-based capital ratio was 20.9% or \$1.17 billion more than the 10.0% regulatory requirement for well-capitalized banks. Our Tier 1 risk-based capital ratio of 18.9% and our Tier 1 leverage ratio of 10.2% as of March 31, 2010 also significantly exceeded regulatory guidelines for well-capitalized banks.

Non-covered nonperforming assets totaled \$181.3 million representing 0.89% of total assets at March 31, 2010. This compares to \$187.0 million or 0.91% of total assets at December 31, 2009. Non-covered nonperforming assets as of March 31, 2010 are comprised of nonaccrual loans totaling \$174.4 million and OREO totaling \$6.9 million.

We believe that the early identification of problem loans and potential future problem loans has enabled us to resolve credit issues with substantially less risk and ultimate losses. At March 31, 2010, the allowance for loan losses amounted to \$250.5 million or 2.93% of total gross non-covered loans, compared to \$238.8 million or 2.81% of total gross non-covered loans as of December 31, 2009. We recorded \$76.4 million in loan loss provisions during the first quarter of 2010, compared to \$140.0 million and \$78.0 million recorded during the fourth and first quarters of 2009, respectively. Total net chargeoffs amounted to \$63.9 million during the first quarter of 2010, compared to \$130.7 million during the fourth quarter of 2009 and \$59.6 million during the first quarter of 2009. Approximately 42%, or \$26.8 million, of the total net chargeoffs recorded during the first quarter of 2010 were related to land loans. The charge-offs reflect the Company’s ongoing strategy to reduce its exposure to land loans.

Net interest income for the first quarter increased to \$261.7 million, a \$182.0 million or a 228% increase over the first quarter of 2009. The net interest margin for the first quarter increased to 5.92%, up 318 basis points from 2.74% in the prior year period. Included in net interest income is \$81.3 million of

discount accretion on early payoffs and recoveries on loans from the UCB acquisition, which is offset by a corresponding \$43.6 million net reduction in the FDIC indemnification asset and receivable. The \$43.6 million net reduction in the FDIC indemnification asset and receivable is included in noninterest income.

In the first quarter of 2010, East West took several actions to better position the balance sheet and reduce our sensitivity to future interest rate risk. East West sold \$599.7 million in fixed rate investment securities to mitigate the impact of future interest rate increases. As a result of the sale of these securities, East West recorded a gain of \$16.1 million. As previously discussed, East West also prepaid higher cost FHLB advances during the first quarter. Additionally, East West unwound reverse repurchase agreements totaling \$150.0 million and recorded a termination gain of \$2.5 million during the first quarter as a yield adjustment. Although a non-GAAP measure, a reconciliation of our net interest income to adjusted net interest income is as follows:

	Three Months Ended March 31, 2010		
	Interest	Yield	
	(Dollars in thousands)		
Net interest income before provision for loan losses	\$261,724	5.92	%
Less yield adjustment related to:			
Loan dispositions and recoveries on loans from the UCB acquisition	81,343		
Reverse repurchase agreement termination gain	2,536		
Total yield adjustments	83,879		
Adjusted net interest income	\$177,845	4.02	%

Total noninterest income (loss) decreased 161% to \$(8.5) million during the first quarter of 2010, compared with \$13.8 million for the corresponding quarter in 2009. The decrease in noninterest income (loss) is primarily due to a charge recorded for the decrease in FDIC indemnification asset and receivable and impairment loss on investment securities available-for-sale. These decreases were partially offset by higher net gains on sales of investment securities available-for-sale, branch-related revenues, and an \$8.1 million purchase price adjustment on the acquisition of United Commercial Bank recorded during the first quarter of 2010. Adjusted noninterest income increased to \$15.7 million during the first quarter of 2010, compared to \$10.4 million during the same period in 2009. The adjusted noninterest income of \$15.7 million for the first quarter of 2010 excludes the decrease in FDIC indemnification asset and receivable of \$43.6 million, purchase price adjustment on the acquisition of United Commercial Bank of \$8.1 million, non-cash OTTI charges of \$4.8 million and net gain on sale of investment securities of \$16.1 million. For the same period of 2009, adjusted noninterest income excludes non-cash OTTI charges of \$200 thousand and a \$3.5 million net gain on sale of investment securities. Although a non-GAAP measure, a reconciliation of our noninterest income to adjusted noninterest income is as follows:

	Three Months Ended		
	March 31, 2010	December 31, 2009	March 31, 2009
	(In thousands)		
Noninterest (loss) income	\$(8,451)	\$420,838	\$13,794
Add:			
Impairment loss on investment securities	4,799	45,775	200
Decrease in FDIC indemnification asset and receivable	43,572	23,338	-
Subtract:			
Net gain on sale of investment securities	(16,111)	(4,545)	(3,521)
Fair value purchase price adjustment on the acquisition of United Commercial Bank	(8,095)	(471,009)	-
Adjusted noninterest income	\$15,714	\$14,397	\$10,473

Total noninterest expense increased 170% to \$138.9 million during the first quarter of 2010, compared with \$51.4 million for the same period in 2009. The increase in total noninterest expense during the first quarter of 2010, as compared to the first quarter of 2009, can be attributed primarily to the higher staffing levels resulting from the November 6, 2009 UCB acquisition. The higher staffing levels contributed to increased compensation and related benefit costs as well as an increase in occupancy and operational related expenses. Higher OREO expenses and credit cycle related expenses as well as higher deposit insurance premiums and regulatory assessments also contributed to the increase. Also during the first quarter of 2010, the Company prepaid \$379.1 million in FHLB advances with an average cost of 4.26% and paid a prepayment penalty of \$9.9 million, which is included in noninterest expense. Our efficiency ratio, which represents noninterest expense (excluding amortization and impairment losses on intangible assets, amortization of investments in affordable housing partnerships, and prepayment penalty for FHLB advances) divided by the aggregate of net interest income before provision for loan losses and noninterest income, was 58.45% during the first quarter of 2010 compared with 51.80% during the same quarter of 2009. We will continue to focus on cost management throughout the remainder of 2010.

Total consolidated assets at March 31, 2010 decreased to \$20.30 billion, compared with \$20.56 billion at December 31, 2009. The net decrease in total assets is comprised predominantly of decreases of investment securities available-for-sale of \$372.6 million, covered loans of \$377.4 million, and FDIC indemnification asset of \$110.9 million. These decreases were partially offset by increases in cash and cash equivalents of \$345.6 million and

securities purchased under resale agreements of \$152.6 million.

Total liabilities decreased 2% to \$17.99 billion as of March 31, 2010, compared to \$18.27 billion as of December 31, 2009. The net decrease in liabilities is primarily due to a decrease in total deposits of \$380.9 million.

Total average assets increased 63% to \$20.40 billion during the first quarter of 2010, compared to \$12.50 billion for the first quarter of 2009, due primarily to the UCB acquisition.

On April 26, 2010, the Board of Directors declared second quarter dividends on our common stock and remaining Series A preferred stock.

Results of Operations

Net income for the first quarter of 2010 totaled \$24.9 million, compared with a net loss of \$22.5 million for the first quarter of 2009. On a per diluted share basis, net income (loss) was \$0.13 and \$(0.50) for the first quarter of 2010 and first quarter of 2009, respectively. Our annualized return on average total assets increased to 0.49% for the quarter ended March 31, 2010, from (0.72)% for the same period in 2009. The annualized return on average stockholders' equity increased to 4.71% for the first quarter of 2010, compared with (11.69)% for the first quarter of 2009.

Components of Net Income (Loss)

	Three Months Ended March 31,	
	2010	2009
	(In millions)	
Net interest income	\$261.7	\$79.7
Provision for loan losses	(76.4)	(78.0)
Noninterest (loss) income	(8.5)	13.8
Noninterest expense	(138.9)	(51.4)
(Provision) benefit for income taxes	(13.0)	13.4
Net income (loss)	\$24.9	\$(22.5)
Annualized return on average total assets	0.49	% (0.72)%
Annualized return on average total equity	4.35	% (5.83)%
Annualized return on average common equity	4.71	% (11.69)%

Net Interest Income

Our primary source of revenue is net interest income, which is the difference between interest earned on loans, investment securities and other earning assets less the interest expense on deposits, borrowings and other interest-bearing liabilities. Net interest income for the first quarter of 2010 totaled \$261.7 million, a 228% increase over net interest income of \$79.7 million for the same period in 2009.

Net interest margin, defined as net interest income divided by average interest earning assets, increased 318 basis points to 5.92% during the quarter ended March 31, 2010, from 2.74% during the first quarter of 2009. The increase in the net interest margin is primarily due to a yield adjustment related to the \$81.3 million of discount accretion on early payoffs and recoveries on loans from the UCB acquisition as well as the 116 basis points decrease in the cost of funds during the first quarter of 2010.

Edgar Filing: EAST WEST BANCORP INC - Form 10-Q

The following table presents the net interest spread, net interest margin, average balances, interest income and expense, and the average yields and rates by asset and liability component for the three months ended March 31, 2010 and 2009:

	2010		Three Months Ended March 31, 2009

(1) Annualized.

(2) Amounts calculated on a fully taxable equivalent basis using the current statutory federal tax rate.

(3) Total interest income and average yield rate on an unadjusted basis for tax-exempt investment securities available-for-sale is \$29 thousand and 2.51% for the three months ended March 31, 2010. Total interest income and average yield rate on an unadjusted basis for tax-exempt investment securities held-to-maturity is \$187 thousand and 4.49% for the three months ended March 31, 2009.

Analysis of Changes in Net Interest Income

Changes in net interest income are a function of changes in rates and volumes of both interest-earning assets and interest-bearing liabilities. The following table sets forth information regarding changes in interest income and interest expense for the periods indicated. The total change for each category of interest-earning asset and interest-bearing liability is segmented into the change attributable to variations in volume (changes in volume multiplied by old rate) and the change attributable to variations in interest rates (changes in rates multiplied by new volume). Nonaccrual loans are included in average loans used to compute this table.

	Three Months Ended March 31, 2010 vs. 2009		
	Total Change	Changes Due to Volume (1)	Rates (1)
	(In thousands)

CHANGE IN NET INTEREST INCOME	\$181,967	\$146,466	\$35,501

Provision for Loan Losses

We recorded \$76.4 million in provisions for loan losses during the first quarter of 2010. In comparison, we recorded \$78.0 million in provision for loan losses during the first quarter of 2009. The Company recorded \$63.9 million in net chargeoffs during the first three months of 2010, compared to \$59.6 million in net chargeoffs recorded during the first three months of 2009. We continue to aggressively monitor delinquencies and proactively review the credit risk exposure of our loan portfolio to minimize and mitigate potential losses. Throughout the course of 2009 and the first quarter of 2010, we have actively reduced exposure to land and construction loans, reducing both outstanding loan balances as well as total commitments.

Provisions for loan losses are charged to income to bring the allowance for credit losses as well as the allowance for unfunded loan commitments, off-balance sheet credit exposures, and recourse provisions to a level deemed appropriate by the Company based on the factors discussed under the "Allowance for Loan Losses" section of this report.

Noninterest (Loss) Income

Components of Noninterest (Loss) Income

	Three Months Ended March 31,	
	2010	2009
	(In millions)	
Decrease in FDIC indemnification asset and receivable	\$(43.6) \$-
Impairment loss on investment securities	(4.8) (0.2
Net gain on sale of investment securities	16.1	3.5
Branch fees	8.8	4.8
Gain related to the fair value of investments from the acquisition of United Commercial Bank	8.1	-
Letters of credit fees and commissions	2.7	1.9
Ancillary loan fees	1.7	2.2
Income from life insurance policies	1.1	1.1
Other operating income	1.4	0.5
Total noninterest (loss) income	\$(8.5) \$13.8

Noninterest (loss) income includes revenues earned from sources other than interest income. These sources include service charges and fees on deposit accounts, fees and commissions generated from trade finance activities and the issuance of letters of credit, ancillary fees on loans, net gains on sales of loans, investment securities available-for-sale, and other assets, impairment losses on investment securities and other assets, and other noninterest-related revenues.

We recorded a noninterest loss of \$8.5 million during the three months ended March 31, 2010, a 161% decrease from the noninterest income of \$13.8 million recorded for the same period in 2009. The decrease in noninterest income for the quarter ended March 31, 2010, as compared to the same quarter in 2009, is primarily due to the decrease in FDIC indemnification asset and receivable recorded during the first quarter of 2010. In addition, impairment loss on investments securities was higher in the first quarter of 2010 compared to the same period in 2009. These decreases to noninterest income were partially offset by increases in branch fees, net gain on sale of investment securities, and a purchase accounting adjustment on the UCB acquisition.

The decrease of \$43.6 million in FDIC indemnification asset and receivable was primarily related to early payoffs on covered loans.

Impairment loss on investment securities of \$4.8 million for the first quarter of 2010 comes from additional increases to the amount related to the credit loss on three corporate debt securities for which an other-than-temporary impairment was previously recognized.

Branch fees, which represent revenues derived from branch operations, increased 83% to \$8.8 million in the first quarter of 2010, from \$4.8 million for the same quarter in 2009. The increase in branch-related fees can be attributed primarily to higher revenues from service and transaction charges on deposit accounts.

During the first quarter of 2010, we also recorded an \$8.1 million purchase price adjustment on the acquisition of United Commercial Bank.

During the first quarter of 2010, net gain on sale of investment securities increased to \$16.1 million, compared to \$3.5 million recorded during the first quarter of 2009. Proceeds from the sale on

investment securities provide additional liquidity to purchase additional investment securities, to fund loan originations, and to pay down borrowings.

Noninterest Expense

Components of Noninterest Expense

	Three Months Ended		
	2010	March 31, 2009	
	(In millions)		
Compensation and employee benefits	\$50.8	\$17.1	
Other real estate owned expense	18.0	7.0	
Occupancy and equipment expense	11.9	7.4	
Deposit insurance premiums and regulatory assessments	11.6	3.3	
Prepayment penalty for FHLB advances	9.9	-	
Amortization and impairment writedowns of premiums on deposits acquired	3.4	1.1	
Amortization of investments in affordable housing partnerships	3.0	1.8	
Loan related expenses	3.0	1.4	
Legal expense	2.9	1.8	
Data processing	2.5	1.2	
Consulting expense	2.2	0.4	
Deposit-related expenses	1.0	0.9	
Other operating expenses	18.7	8.0	
Total noninterest expense	\$138.9	\$51.4	
Efficiency ratio (1)	58.45	% 51.80	%

- (1) Represents noninterest expense, excluding the amortization and/or impairment losses of intangibles, amortization of investments in affordable housing partnerships, and prepayment penalty for FHLB advances, divided by the aggregate of net interest income before provision for loan losses and noninterest income, excluding impairment loss on investment securities.

Noninterest expense, which is comprised primarily of compensation and employee benefits, occupancy and other operating expenses increased 170% to \$138.9 million during the first quarter of 2010, from \$51.4 million for the same quarter in 2009.

Compensation and employee benefits increased to \$50.8 million, a \$33.7 million increase from the first quarter of 2009 resulting from the acquisition of UCB. Included in this amount is \$6.2 million in compensation and severance expense that is not expected to be incurred in future quarters. The other integration related expenses of \$3.7 million were largely due to consultant fees, legal fees and other expenses incurred in the first quarter related to the UCB integration and are expected to not be incurred in future quarters. East West prepaid \$379.1 million in FHLB advances and paid a prepayment penalty of \$9.9 million.

We recorded OREO expenses, net of OREO revenues and gains, totaling \$18.0 million during the quarter ended March 31, 2010, compared with \$7.0 million during the same period in 2009. The \$18.0 million in total OREO expenses incurred during the first three months of 2010 is comprised of \$2.1 million in various operating and maintenance expenses related to our higher volume of OREO properties, \$13.3 million in valuation losses, and \$2.6

million in net losses from the sale of forty-two OREO properties consummated during the first quarter of 2010. As of March 31, 2010, total OREO amounted to \$85.3 million, compared to \$38.6 million as of March 31, 2009.

Deposit insurance premiums and regulatory assessments increased 248% to \$11.6 million during the quarter ended March 31, 2010, compared with \$3.3 million during the same period in 2009. The increase in deposit insurance premiums and regulatory assessments is primarily due to the increase in the

FDIC deposit assessment rate beginning the second quarter of 2009 and the assumption of deposit balances resulting from the UCB acquisition.

Amortization expense and impairment losses on premiums on deposits acquired increased 201% to \$3.4 million during the quarter ended March 31, 2010, compared with \$1.1 million during the same period in 2009. The increase is due to the increase in net premiums on deposits acquired resulting from the UCB acquisition. The projected deposit runoff rates incorporated into the core deposit amortization models simulate the decay rates used in the Company's current asset liability model. Premiums on acquired deposits are amortized over their estimated useful lives.

Other operating expenses include advertising and public relations, telephone and postage, stationery and supplies, bank and item processing charges, insurance expenses, other professional fees, and charitable contributions. Other operating expenses increased 135% to \$18.7 million during the quarter ended March 31, 2010, compared with \$8.0 million during the same period in 2009 due to a full quarter of additional operating expenses related to the UCB acquisition.

Our efficiency ratio increased to 58.45% for the quarter ended March 31, 2010, compared to 51.80% for the corresponding period in 2009. The increase in our efficiency ratio during the first quarter of 2010 can be attributed largely to higher operating expenses primarily related to the UCB acquisition.

Income Taxes

The provision for income taxes amounted to \$13.0 million for the first quarter of 2010, representing an effective tax provision rate of 34.3%. In comparison, the income tax benefit of \$13.5 million represented an effective tax benefit rate of 37.5% for the first quarter of 2009. Included in the income tax recognized during the first quarter of 2010 and 2009 are \$2.9 million and \$1.6 million, respectively, in tax credits generated from our investments in affordable housing partnerships.

Management regularly reviews the Company's tax positions and deferred tax assets. Factors considered in this analysis include future reversals of existing temporary differences, future taxable income exclusive of reversing differences, taxable income in prior carryback years, and tax planning strategies. The Company accounts for income taxes using the asset and liability approach, the objective of which is to establish deferred tax assets and liabilities for the temporary differences between financial reporting basis and tax basis of the Company's assets and liabilities at enacted tax rates expected to be in effect when such amounts are realized or settled. A valuation allowance is established for deferred tax assets if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. A valuation allowance is established, when necessary, to reduce the deferred tax assets to the amount that is more likely than not to be realized.

The Company adopted the provisions of FIN 48 on January 1, 2007. The Company believes that adequate provisions have been made for all income tax uncertainties consistent with this standard.

As of March 31, 2010, the Company had a net deferred tax liability of \$4.2 million. The Company anticipates that the deferred tax assets will reverse in future periods such that the resulting tax deductions will be offset with taxable income resulting from the reversal of existing taxable temporary differences. One of the deferred tax assets is a capital loss of approximately \$25 million. For tax purposes, capital losses can only be utilized to the extent that capital gains are available for offset. Capital losses may be carried back to the three years preceding the loss and carried forward for five years. Based on capital gains available in the carryback period and capital gains that are available through the utilization of available tax planning strategies, the Company expects to fully utilize the portion of the deferred tax asset relating to capital losses.

Operating Segment Results

We have identified three operating segments for purposes of management reporting: retail banking, commercial banking, and other. For the Bank, the chief operating decision maker is the Chief Executive Officer (“CEO”). Specifically, our business focus has culminated in a two-segment core business structure: Retail Banking and Commercial Banking. A third segment, “Other”, provides broad administrative support to these two core segments. During the fourth quarter of 2009, a fourth operating segment, the United Commercial Bank segment (the “UCB segment”) was identified as a result of the UCB Acquisition. The UCB segment was identified as a segment due to the significant size of the transaction and meets the other requirements of a segment, that is, the segment engages in business activities from which it earns revenues and incur expenses and whose operating results are regularly reviewed by the Company’s chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance and for which discrete financial information is available.

During the first quarter of 2010, the Company’s management made the decision to fully integrate the UCB segment into its two-segment core business structure: Retail Banking and Commercial Banking. With this integration, effective the first quarter of 2010, the Company’s business focus reverted back to a three-segment core business structure: Retail Banking, Commercial Banking and Other.

The Retail Banking segment focuses primarily on retail operations through the Bank’s branch network. The Commercial Banking segment, which includes commercial real estate, primarily generates commercial loans through the efforts of the commercial lending offices located in the Bank’s northern and southern California production offices. Furthermore, the Commercial Banking segment also offers a wide variety of international finance and trade services and products. The remaining centralized functions have been aggregated and included in “Other.”

Changes in our management structure or reporting methodologies may result in changes in the measurement of operating segment results. Results for prior periods are generally restated for comparability for changes in management structure or reporting methodologies unless it is not deemed practicable to do so.

The Company’s funds transfer pricing assumptions are intended to promote core deposit growth and to reflect the current risk profiles of various loan categories within our credit portfolio. Our transfer pricing assumptions and methodologies are reviewed at least annually to ensure that our process is reflective of current market conditions. Our transfer pricing process is formulated with the goal of incenting loan and deposit growth that is consistent with the Company’s overall growth objectives as well as provide a reasonable and consistent basis for measurement of our business segments and product net interest margins. Changes to our transfer pricing assumptions and methodologies are approved by the Asset Liability Committee.

For more information about our segments, including information about the underlying accounting and reporting process, please see Note 12 to the Company’s condensed consolidated financial statements presented elsewhere in this report.

Retail Banking

The retail banking segment reported a \$9.5 million pretax loss for the three months ended March 31, 2010, compared to an \$11.7 million pretax loss for the same quarter in 2009. The lower pretax loss for this segment during the first quarter of 2010 is comprised of a \$29.7 million increase in net interest income and an \$8.0 million decrease in provision for loan losses, partially offset by a \$29.4 million increase in noninterest expense and \$6.5 million increase in corporate overhead allocations.

The increase in net interest income during the first quarter of 2010 is attributable to the increase in total loans receivable resulting from the UCB acquisition. The decrease in loan loss provisions for this segment during the first quarter of 2010, relative to the same period in 2009, was due to decreased chargeoff activity. Loan loss provisions are also impacted by average loan balances for each reporting segment.

Noninterest income for this segment increased 24% to \$9.0 million for the quarter ended March 31, 2010, from \$7.3 million recorded during the same period in 2009. The increase in noninterest income for the first quarter of 2010 is primarily due to an increase in branch-related fees.

Noninterest expense for this segment increased 95% to \$60.2 million during the first quarter of 2010, compared with \$30.8 million recorded during the first quarter of 2009. The increase in noninterest expense for the first quarter of 2010 is primarily due to an increase in compensation and employee benefits, FDIC insurance premiums, occupancy expenses and amortization of premiums on deposits acquired, partially offset by lower OREO expenses.

Commercial Banking

The commercial banking segment reported pretax income of \$37.8 million during the quarter ended March 31, 2010, or a 648% increase, compared with a pretax loss of \$6.9 million for the same period in 2009. The primary driver of the increase in pretax income for this segment is due to a significant increase in net interest income, partially offset by an increase in noninterest expense.

Net interest income for this segment increased 254% to \$169.7 million during the quarter ended March 31, 2010, compared to \$47.9 million for the same period in 2009. The increase in net interest income is primarily due to a significant increase in interest income as a result of the increase in total loans receivable.

Noninterest (loss) income for this segment decreased 827% to \$(38.3) million during the first quarter of 2010, compared with \$5.3 million noninterest income recorded in the same quarter of 2009. The decrease in noninterest income is primarily due to the decrease in FDIC indemnification asset and receivable.

Noninterest expense for this segment increased to \$31.1 million during the first quarter of 2010, compared with \$13.1 million recorded during the same quarter in 2009. The increase in noninterest expense is primarily due to an increase in compensation and employee benefits and FDIC insurance premiums.

Other

This segment reported pretax income of \$9.6 million during the quarter ended March 31, 2010, compared with a pretax loss of \$17.3 million recorded in the same quarter of 2009. The increase in pretax

income is primarily due to a \$30.6 million increase in net interest income and a \$19.6 million increase in noninterest income, partially offset by a \$40.2 million increase in noninterest expense.

Net interest income for this segment increased to \$7.9 million during the quarter ended March 31, 2010, compared to net interest expense of \$22.7 million recorded in the same quarter of 2009. Since this segment includes the treasury function, which is responsible for liquidity and interest rate risk management, it bears the cost of adverse movements in interest rates affecting our net interest margin and supports the retail and commercial banking segments through funds transfer pricing.

Noninterest income for this segment increased to \$20.9 million during the quarter ended March 31, 2010, compared with \$1.3 million recorded in the same quarter of 2009. The increase in noninterest income during the first quarter of 2010 is primarily due to the increase in the net gain on sale of investment securities available-for-sale.

Noninterest expense for this segment increased 537% to \$47.6 million for the first quarter of 2010, compared with \$7.5 million recorded during the same quarter in 2009. The increase is primarily due to salary expenses and OREO expenses.

Balance Sheet Analysis

Total assets decreased \$260.0 million, or 1%, to \$20.30 billion at March 31, 2010, relative to total assets of \$20.56 billion at December 31, 2009. The decrease in total assets is comprised predominantly of decreases in covered loans totaling \$377.4 million, investment securities available-for-sale totaling \$372.6 million, and FDIC indemnification asset amounting to \$110.9 million, partially offset by increases in cash and cash equivalents totaling \$345.6 million, and securities purchased under resale agreements totaling \$152.6 million.

Securities Purchased Under Resale Agreements

We purchase securities under resale agreements (“resale agreements”) with terms that range from one day to several years. Total resale agreements increased to \$380.0 million as of March 31, 2010, compared with \$227.4 million at December 31, 2009. The increase as of March 31, 2010 reflects additional resale agreement for \$300.0 million entered into during 2010 offset by the early termination of two resale agreements totaling \$150.0 million with a gain of \$2.5 million.

Purchases of securities under resale agreements are overcollateralized to ensure against unfavorable market price movements. We monitor the market value of the underlying securities which collateralize the related receivable on resale agreements, including accrued interest. In the event that the fair market value of the securities decreases below the carrying amount of the related repurchase agreement, our counterparty is required to designate an equivalent value of additional securities. The counterparties to these agreements are nationally recognized investment banking firms that meet credit eligibility criteria and with whom a master repurchase agreement has been duly executed.

Investment Securities

Income from investing activities provides a significant portion of our total income. We aim to maintain an investment portfolio with an adequate mix of fixed-rate and adjustable-rate securities with relatively short maturities to minimize overall interest rate risk. Our investment securities portfolio primarily consists of U.S. Treasury securities, U.S. Government agency securities, U.S. Government sponsored enterprise debt securities, U.S. Government sponsored and other mortgage-backed securities, municipal securities, corporate debt securities, and U.S. Government sponsored enterprise equity securities. We classify certain investment securities as held-to-maturity, and accordingly, these

securities

49

are recorded based on their amortized cost. We also classify certain investments as available-for-sale, and accordingly, these securities are carried at their estimated fair values with the corresponding changes in fair values recorded in accumulated other comprehensive income, as a component of stockholders' equity.

We did not have any investment securities held-to-maturity as of March 31, 2010 and December 31, 2009.

Total investment securities available-for-sale decreased 15% to \$2.19 billion as of March 31, 2010, compared with \$2.56 billion at December 31, 2009. Total repayments/maturities and proceeds from sales of investment securities amounted to \$482.3 million and \$615.8 million, respectively, during the three months ended March 31, 2010. We recorded net gains on sales of investment securities totaling \$16.1 million and \$3.5 million during the first quarter of 2010 and 2009, respectively.

A portion of the proceeds from repayments, maturities, sales, and redemptions of investment securities were applied towards additional investment securities purchases totaling \$712.0 million.

At March 31, 2010, investment securities available-for-sale securities with an aggregate par value of \$1.54 billion were pledged to secure public deposits, repurchase agreements, the FRB discount window, and other purposes required or permitted by law.

We perform regular impairment analyses on our portfolio of investment securities. If we determine that a decline in fair value is other-than-temporary, a credit-related impairment loss is recognized in current earnings. Noncredit-related impairment losses are charged to other comprehensive income. Other-than-temporary declines in fair value are assessed based on factors including the duration the security has been in a continuous unrealized loss position, the severity of the decline in value, the rating of the security, the probability that we will be unable to collect all amounts due, and our ability and intent to not sell the security before recovery of its amortized cost basis. For securities that are determined to not have other-than-temporary declines in value, we have both the ability and the intent to hold these securities and it is not more likely than not that we will be required to sell these securities before recovery of their amortized cost basis.

The fair values of investment securities are generally determined by reference to the average of at least two quoted market prices obtained from independent external brokers or prices obtained from independent external pricing service providers who have experience in valuing these securities. We perform a monthly analysis on the broker quotes received from third parties to ensure that the prices represent a reasonable estimate of fair value. Our procedures include, but are not limited to, initial and ongoing review of third party pricing methodologies, review of pricing trends, and monitoring of trading volumes. We ensure that prices received from independent brokers represent a reasonable estimate of fair value through the use of internal and external cash flow models that are developed based on spreads, and when available, market indices. As a result of this analysis, if we determine that there is a more appropriate fair value based upon available market data, the price received from third parties is adjusted accordingly.

Prices from third party pricing services are often unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations which utilize inputs that may be difficult to corroborate with observable market based data. Additionally, the majority of these independent broker quotations are non-binding.

As a result of the global financial crisis and illiquidity in the U.S. markets, we believe that current broker prices obtained on one private-label mortgage-backed security and certain pooled trust preferred securities are based on forced liquidation or distressed sale values in very inactive markets that

are not representative of the economic value of these securities. The fair values of the private-label mortgage-backed security and pooled trust preferred securities have traditionally been based on the average of at least two quoted market prices obtained from independent external brokers since broker quotes in an active market are given the highest priority. However, in light of these circumstances, we modified our approach in determining the fair values of these securities. For the pooled trust preferred securities, we believe that the cash flow analyses [income approach] should be the primary factor considered when making a judgment about other-than-temporary impairment. For the private-label mortgage-backed security, we determined fair value by using the appropriate combination of the market approach reflecting current broker prices and a discounted cash flow income approach. The values resulting from each approach (i.e. market and income approaches) were weighted to derive the final fair value on the private-label mortgage-backed security. In calculating the fair value derived from the income approach, we made assumptions related to the implied rate of return, general change in market rates, estimated changes in credit quality and liquidity risk premium, specific non-performance and default experience in the collateral underlying the security, as well as broker discount rates.

Corporate Debt Securities (Available-for-Sale)

The majority of unrealized at March 31, 2010 are related to six trust preferred debt securities with unrealized losses of 12 months or longer. As of March 31, 2010, these trust preferred securities had an estimated fair value of \$10.9 million, representing less than 1% of the total investment securities available-for-sale portfolio. Except for one security that has remained at investment grade status, the ratings for the other five trust preferred securities were downgraded to non-investment grade status during 2009 due to increased deferral and default activity from the issuers of the underlying debt collateralizing these instruments. As of March 31, 2010, these non-investment grade debt instruments had gross unrealized losses amounting to \$12.1 million, or 56% of the total amortized cost basis of these securities, comprised of \$2.8 million in gross unrealized losses and \$9.3 million in noncredit-related impairment losses as of March 31, 2010 pursuant to the provisions of ASC 320-10-65.

Almost all of the pooled trust preferred securities held by us have underlying collateral issued by banks and insurance companies. Continued deterioration in market conditions have resulted in many more small banks either deferring or defaulting on their trust preferred debt during the first quarter of 2010. As a result of diminishing collateral values, deteriorating cash flows, and increasing estimates of future deferrals and defaults, we recorded an impairment loss of \$4.8 million on our portfolio of trust preferred securities during the first quarter of 2010 for additional increases to the amount related to the credit loss for which an other-than-temporary impairment was previously recognized. We determined the amount of credit-related impairment by discounting the expected future cash flows with the effective yield of the security in accordance with generally accepted accounting principles.

Mortgage-backed Securities (Available-for-Sale)

As of March 31, 2010, we had one private-label available-for-sale mortgage-backed security with a fair value of \$12.2 million, with a gross unrealized loss of \$9.1 million, or 43% of the amortized cost basis of this security, for more than 12 months. This security is collateralized by single family loans and secured by the first lien on these residential properties. Additionally, any principal and interest shortfall that may arise from the deterioration of the collateral will be covered by a monoline insurance provider. We do not intend to sell this security and it is not more likely than not that the Company will be required to sell this security before recovery of its amortized cost basis. As such, we do not deem this security to be other-than-temporarily impaired as of March 31, 2010.

We have seven individual securities that have been in a continuous unrealized loss position for twelve months or longer as of March 31, 2010. These securities are comprised of six corporate debt securities with a total fair value of \$10.9 million and one mortgage-backed security with a fair value of \$12.2 million. As of March 31, 2010, there were also thirty-six securities that have been in a continuous unrealized loss position for less than twelve months. The unrealized losses on these securities are primarily attributed to changes in interest rates. The issuers of these securities have not, to our knowledge, established any cause for default on these securities. These securities have fluctuated in value since their purchase dates as market interest rates have fluctuated. We do not intend to sell these securities and it is not more likely than not that we will be required to sell the investments before recovery of their amortized cost bases. As such, we do not deem these securities to be other-than-temporarily impaired as of March 31, 2010.

The following table sets forth the amortized cost and fair value of investment securities available-for-sale as of March 31, 2010 and December 31, 2009:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value

(1) For the three months ended March 31, 2010, the Company recorded through earnings \$4.8 million in additional increases to the amount related to the credit loss for which an other-than-temporary impairment was previously recognized. The Company recorded \$107.7 million, on a pre-tax basis, of the credit portion of OTTI through earnings and \$8.2 million, net of tax, of the non-credit portion of OTTI for pooled trust preferred securities in other comprehensive income for the year ended December 31, 2009.

The following table sets forth certain information regarding the fair value of our investment securities available-for-sale, as well as the weighted average yields, and contractual maturity distribution, excluding periodic principal payments, of our investment securities available-for-sale portfolio at March 31, 2010. Securities with no stated maturity dates, such as equity securities, are included in the "indeterminate maturity" category.

available-for-sale

Covered Assets

Covered assets are loans receivable and OREO that were acquired in the UCB acquisition on November 6, 2009 for which the Company entered into a shared-loss agreement (the “shared-loss agreement”) with the FDIC. The shared-loss agreement covered all the loans originated by United Commercial Bank in the domestic U.S. and Hong Kong. Loans originated by United Commercial Bank in China under its United Commercial Bank China (Limited) subsidiary were not included in the shared-loss agreement. The Company will share in the losses, which begins with the first dollar of loss incurred, on the loan pools (including single family residential mortgage loans, commercial loans, foreclosed loan collateral and other real estate owned), covered (“covered assets”) under the shared-loss agreement.

Pursuant to the terms of the shared-loss agreement, the FDIC is obligated to reimburse the Company 80% of eligible losses of up to \$2.05 billion with respect to covered assets. The FDIC will reimburse the Company for 95% of eligible losses in excess of \$2.05 billion with respect to covered assets. The Company has a corresponding obligation to reimburse the FDIC for 80% or 95%, as applicable, of eligible recoveries with respect to covered assets. The shared-loss agreement for commercial and single family residential mortgage loans is in effect for 5 years and 10 years, respectively, from the November 6, 2009 acquisition date and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition date.

On January 14, 2020, the Company is required to pay to the FDIC 50% of the excess, if any of (i) \$410 million over (ii) the sum of (A) 25% of the asset discount plus (B) 25% of the Cumulative Shared-Loss Payments plus (C) the Cumulative Servicing Amount if net losses on covered loans subject to the stated threshold is not reached. As of March 31, 2010, the estimate for this liability is zero.

At the November 6, 2009 acquisition date, we accounted for the loan portfolio acquired from United Commercial Bank under the fair value accounting requirements as stated in ASC 805 and estimated that the fair value of the loan portfolio subject to the shared-loss agreement at \$5.66 billion. This represents the expected cash flows from the portfolio. In estimating the nonaccretable difference, we (a) calculated the contractual amount and timing of undiscounted principal and interest payments (the “undiscounted contractual cash flows”) and (b) estimated the amount and timing of undiscounted expected principal and interest payments (the “undiscounted expected cash flows”). The amount by which the undiscounted expected cash flows exceed the estimated fair value (the “accretable yield”) is accreted into interest income over the life of the loans. The difference between the undiscounted contractual cash flows and the undiscounted expected cash flows is the nonaccretable difference. The nonaccretable difference represents our estimate of the credit losses expected and was written off as of the acquisition date. In the determination of contractual cash flows and cash flows expected to be collected, we assumed no prepayment on the SOP 03-3 nonaccrual loan pools as we do not anticipate any

significant prepayments on credit impaired loans. For the SOP 03-3 accrual loans for single-family, multi-family and commercial real estate, we used a third party vendor to obtain the prepayment speed. The third party vendor is recognized in the mortgage-industry for the delivery of prepayment and default models for the secondary market to identify loan level prepayment, delinquency, default, and loss propensities. The prepayment rates for the construction, land, commercial and consumer pools have historically been low and so we applied the prepayment assumptions of our current portfolio using our internal modeling. The Company has elected to account for all loans acquired in the FDIC-assisted acquisition of United Commercial Bank under ASC 310-30 as the accounting treatment subsequent to acquisition date fair value.

United Commercial Bank's loan portfolio included unfunded commitments for commercial lines of credit, constructions draws and other lending activity. Any additional advances on these loans subsequent to November 6, 2009 are not accounted for under ASC 310-30. The total commitment outstanding as of the acquisition date is included under the shared-loss agreement. As such, any additional advances, up to the total commitment outstanding at the time of acquisition are covered loans.

The covered loans acquired are and will continue to be subject to the Bank's internal and external credit review and monitoring. If credit deterioration is experienced subsequent to the November 6, 2009 acquisition fair value amount, such deterioration will be measured through our loss reserving methodology and a provision for credit losses will be charged to earnings with a partially offsetting noninterest income item reflecting the increase to the FDIC indemnification asset or receivable.

The carrying amounts and the composition of the covered loans as of March 31, 2010 and December 31, 2009 are as follows:

	Credit Impaired	Other Loans (In thousands)	Total
As of March 31, 2010			
Real estate loans

Covered discount	(1,033,720)	(474,948)	(1,508,668)
Net valuation of loans	1,887,379	3,508,628	5,396,007
Subsequent acquisition loan advances	-	202,148	202,148
Total covered loans	\$1,887,379	\$3,710,776	\$5,598,155

At March 31, 2010 and December 31, 2009, \$574.7 million and \$675.6 million of the credit impaired loans, respectively, were considered to be nonperforming loans. The following table sets forth information regarding covered nonperforming assets as of the dates indicated:

	March 31,	December 31,
--	-----------	-----------------

	2010	2009
	(Dollars in thousands)	
Covered nonaccrual loans	\$574,672	\$675,625
Covered loans past due 90 days or more but not on nonaccrual	-	-
Total nonperforming loans	574,672	675,625
Other real estate owned covered, net	78,354	44,273
Total covered nonperforming assets	\$653,026	\$719,898

We had forty-nine covered OREO properties as of March 31, 2010 with a combined aggregate carrying value of \$78.4 million. Approximately 87% of covered OREO properties as of March 31, 2010 were located in California. As of December 31, 2009, we had sixty-one covered OREO properties with an aggregate carrying value of \$44.3 million. During the first three months of 2010, we foreclosed on seventeen properties with an aggregate carrying value of \$72.4 million as of the foreclosure date. During the first three months of 2010, we sold twenty-nine covered OREO properties with a total carrying value of \$26.7 million resulting in a total combined net loss on sale of \$2.8 million. During the first quarter of 2010 we also recorded \$11.0 million in writedowns and \$644 thousand in net principal reductions on covered OREO.

The following table shows the carrying amount for the covered loans as of March 31, 2010 and December 31, 2009:

	March 31, 2010	December 31, 2009
	(In thousands)	
Contractually required payments of interest and principal	\$7,000,944	\$7,976,064
Nonaccretable difference	(1,368,739)	(1,596,950)
Cash flows expected to be collected (1)	5,632,205	6,379,114
Accretable difference	(771,549)	(983,107)
Carrying value of covered loans	\$4,860,656	\$5,396,007

(1) Represents undiscounted expected principal and interest cash flows.

Changes in the accretable yield for the covered loans for the three months ended March 31, 2010 is as follows:

	Accretable Yield (In thousands)
Beginning balance, January 1, 2010	\$983,107
Accretion	(3,853)
Disposals	(207,705)
Ending balance, March 31, 2010	\$771,549

The excess of cash flows expected to be collected over the initial fair value of acquired loans is referred to as the accretable yield and is accreted into interest income over the estimated life of the acquired loans using the effective yield method. The accretable yield will change due to:

- estimate of the remaining life of acquired loans which may change the amount of future interest income;
- estimate of the amount of contractually required principal and interest payments over the estimated life that will not be collected (the nonaccretable difference); and
 - indices for acquired loans with variable rates of interest.

From December 31, 2009 to March 31, 2010, excluding scheduled principal payments, a total of \$393.2 million of loans were removed from the covered loans accounted under ASC 310-30 due to loans being paid in full, sold, or transferred to covered OREO. The payoff activity during this period of time was higher than anticipated and what was modeled, however management does not believe this activity suggests the need for a change in the original prepayment assumptions at this time due to the short duration of historical payoff activities. The loan discount related to these prepayments of \$70.9 million

was recorded as a yield adjustment to interest income. No impairment write-downs were recorded in 2010.

FDIC Indemnification Asset

As of December 31, 2009, we recorded an FDIC indemnification asset of \$1.09 billion, consisting of the present value of the amounts the Company expects to receive from the FDIC under the shared-loss agreement. The difference between the present value and the undiscounted cash flow the Company expects to collect from the FDIC is accreted into noninterest income over the life of the FDIC indemnification asset. From the period of time from December 31, 2009 through March 31, 2010, the Company recorded \$11.5 million of accretion into income. Additionally, because of the high prepayment activity during this timeframe, the Company reduced the FDIC indemnification asset by \$122.3 million and recorded the adjustment as noninterest income. As of March 31, 2010, the recorded FDIC indemnification asset was \$981.0 million.

Non-Covered Loans

We offer a broad range of products designed to meet the credit needs of our borrowers. Our lending activities consist of residential single family loans, residential multifamily loans, commercial real estate loans, land loans, construction loans, commercial business loans, trade finance loans, and consumer loans. Net non-covered loans receivable increased \$4.1 million, or 0.05%, to \$8.25 billion at March 31, 2010, relative to December 31, 2009. During the first quarter of 2010, the Company purchased \$179.4 million of new student loans.

The following table sets forth the composition of the loan portfolio as of the dates indicated:

	March 31, 2010		December 31, 2009			
	Amount	Percent	Amount	Percent		
(Dollars in thousands)

Non-Covered Nonperforming Assets

57

Non-covered nonperforming assets are comprised of nonaccrual loans, accruing loans past due 90 days or more, and other real estate owned, net. Non-covered nonperforming assets totaled \$181.3 million, or 0.89% of total assets, at March 31, 2010 and \$187.0 million, or 0.91% of total assets, at December 31, 2009. Nonaccrual loans amounted to \$174.4 million at March 31, 2010, compared with \$173.2 million at year-end 2009. During the first three months of 2010, we took aggressive actions to reduce our exposure to problem assets. In conjunction with these efforts, we sold \$61.8 million in problem loans and \$7.6 million in OREO properties during the first three months of 2010. These sales of problem assets have resulted in net chargeoffs of \$17.2 million for the first quarter of 2010.

Approximately \$39.1 million, or 63%, of our problem loan sales during the first three months of 2010 were all-cash transactions. We also partially financed selected loan sales to unrelated third parties. Problem loans are sold on a servicing released basis and the shortfall between the loan balance and any new notes is charged off. A substantial down payment, typically in the range of 25% to 40%, is received from the new borrower purchasing the problem loan. The underlying sales agreements provide for full recourse to the new borrower and require that periodic updated financial information be provided to demonstrate their ability to service the new loan. The Company maintains no effective control over the transferred loans.

Loans totaling \$103.0 million were placed on nonaccrual status during the first quarter of 2010. As a part of our comprehensive loan review, loans totaling \$66.1 million which were not 90 days past due as of March 31, 2010, were classified as nonaccrual loans due to concerns regarding collateral values and future collectibility. Additions to nonaccrual loans were offset by \$46.0 million in net chargeoffs, \$37.8 million in payoffs and principal paydowns, \$4.1 million in loans that were transferred to other real estate owned and other real estate investments, and \$13.8 million in loans brought current. The additions to nonaccrual loans during the first quarter of 2010 were comprised of \$14.9 million in single family loans, \$14.5 million in multifamily loans, \$19.3 million in commercial real estate loans, \$17.3 million in land loans, \$21.8 million in construction loans, \$13.4 million in commercial business loans including SBA loans, \$505 thousand in trade finance loans, and \$1.3 million in automobile and other consumer loans.

All loans that were past due 90 days or more were on nonaccrual status as of March 31, 2010 and December 31, 2009.

We had \$37.9 million and \$114.0 million in total performing restructured loans as of March 31, 2010 and December 31, 2009, respectively, that were excluded from nonperforming assets. As of March 31, 2010, the \$37.9 million of restructured loans includes \$35.0 million of performing, accrual loans that were structured as A/B notes. In these A/B notes, the original loan was restructured into two notes where the A note represents the portion of the original loan that has demonstrated sustained repayment and performance and is expected to be collected in full. The B note represents the portion of the original loan which was the shortfall in value and was fully charged off. The A/B notes balance as of March 31, 2010 is comprised of the A note balances. As of March 31, 2010, restructured loans were comprised of \$6.6 million in single family loans, \$12.8 million in multifamily loans, \$2.6 million in commercial real estate loans, \$27.4 million in construction loans, \$1.5 million in commercial business loans and \$4.9 million in land loans.

Non-covered other real estate owned includes properties acquired through foreclosure or through full or partial satisfaction of loans. We had seventeen OREO properties as of March 31, 2010 with a combined aggregate carrying value of \$6.9 million. The majority of these properties were related to our construction and land loan portfolios. Approximately 81% of OREO properties as of March 31, 2010 were located in California and 7% were located in Texas. As of December 31, 2009, we had twenty-eight OREO properties with an aggregate carrying value of \$13.8 million. During the first three months of 2010, we foreclosed on eleven properties with an aggregate carrying value of \$4.1 million as of the

foreclosure date. During the first three months of 2010, we sold twenty-two OREO properties with a total carrying value of \$7.6 million resulting in a total combined net gain on sale of \$183 thousand and charges against the allowance for loans losses totaling \$482 thousand. As previously mentioned, losses on sale of OREO properties that are sold shortly after they are received in a foreclosure are charged against the allowance for loan losses. During the first three months of 2009, we sold twenty-two OREO properties with a combined carrying value of \$24.3 million for a total net loss on sale of \$3.0 million. During the first quarter of 2010, we also recorded \$1.1 million in chargeoffs, \$2.2 million in writedowns, and \$27 thousand in net principal reductions on non-covered OREO.

The following table sets forth information regarding non-covered nonperforming assets and performing restructured loans as of the dates indicated:

	March 31, 2010	December 31, 2009		
	(Dollars in thousands)			
Non-covered nonaccrual loans	\$174,427	\$173,180		
Non-covered loans past due 90 days or more but not on nonaccrual	-	-		
Total non-covered nonperforming loans	174,427	173,180		
Non-covered other real estate owned, net	6,907	13,832		
Total non-covered nonperforming assets	\$181,334	\$187,012		
Non-covered performing restructured loans	\$37,910	\$114,013		
Total non-covered nonperforming assets to total assets	0.89	%	0.91	%
Allowance for loan losses to non-covered nonperforming loans	143.62	%	137.91	%
Non-covered nonperforming loans to total gross non-covered loans	2.04	%	2.04	%

We evaluate loan impairment in accordance with applicable GAAP principles. Loans are considered impaired when it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement, including scheduled interest payments. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as an expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent, less costs to sell. If the measure of the impaired loan is less than the recorded investment in the loan, the deficiency will be charged off against the allowance for loan losses or, alternatively, a specific allocation will be established. Additionally, loans that are considered impaired are specifically excluded from the quarterly migration analysis when determining the amount of the allowance for loan and lease losses required for the period.

At March 31, 2010, our total recorded investment in impaired loans was \$191.4 million, compared with \$191.5 million at December 31, 2009. All nonaccrual loans are included in impaired loans. Impaired loans at March 31, 2010 are comprised of single family loans totaling \$13.7 million, multifamily loans totaling \$17.2 million, commercial real estate loans totaling \$101.2 million, construction loans totaling \$28.7 million, commercial business loans totaling \$29.8 million, SBA loans totaling \$178 thousand, trade finance loans amounting to \$505 thousand, and automobile and other consumer loans totaling \$156 thousand.

Specific reserves on impaired loans amounted to \$17.1 million and \$19.6 million at March 31, 2010 and December 31, 2009, respectively. Our average recorded investment in impaired loans for the three months ended March 31, 2010 and 2009 were \$213.4 million and \$281.8 million, respectively. During the three months ended March 31, 2010

and 2009, gross interest income that would have been recorded on impaired loans had they performed in accordance with their original terms, totaled \$3.8

million and \$4.8 million, respectively. Of this amount, actual interest recognized on impaired loans, on a cash basis, was \$1.1 million, for the three months ended March 31, 2010 and 2009.

Allowance for Loan Losses

We are committed to maintaining the allowance for loan losses at a level that is commensurate with estimated and known risks in the loan portfolio. In addition to regular quarterly reviews of the adequacy of the allowance for loan losses, we perform an ongoing assessment of the risks inherent in the loan portfolio. While we believe that the allowance for loan losses is adequate at March 31, 2010, future additions to the allowance will be subject to a continuing evaluation of estimated and known, as well as inherent, risks in the loan portfolio.

The allowance for loan losses is increased by the provision for loan losses which is charged against current period operating results, and is increased or decreased by the amount of net recoveries or chargeoffs, respectively, during the period. At March 31, 2010, the allowance for loan losses amounted to \$250.5 million, or 2.93% of total non-covered loans, compared with \$238.8 million, or 2.81% of total non-covered loans, at December 31, 2009, and \$195.5 million, or 2.42% of total non-covered loans, at March 31, 2009. The \$11.7 million increase in the allowance for loan losses at March 31, 2010, from year-end 2009, reflects \$75.6 million in additional loss provisions, less \$63.9 million in net chargeoffs recorded during the first quarter of 2010. The allowance for unfunded loan commitments, off-balance-sheet credit exposures, and recourse provisions is included in accrued expenses and other liabilities and amounted to \$8.9 million at March 31, 2010, compared to \$8.1 million at December 31, 2009.

We recorded \$76.4 million in loan loss provisions during the first quarter of 2010, as compared to \$78.0 million in loan loss provisions for the same period in 2009. During the first quarter of 2010, we recorded \$63.9 million in net chargeoffs representing 2.97% of average non-covered loans outstanding during the quarter. In comparison, we recorded net chargeoffs totaling \$59.6 million, or 2.91% of average non-covered loans outstanding for the same period in 2009.

The following table summarizes activity in the allowance for loan losses for the three months ended March 31, 2010 and 2009:

	Three Months Ended March 31,			
	2010	2009		
	(Dollars in thousands)			
Allowance balance, beginning of period	\$238,833	\$178,027		
Allowance for unfunded loan commitments and letters of credit	(808)	(1,008)		
Provision for loan losses	76,421	78,000		
Chargeoffs:				
Single family real estate	3,538	3,853		
Multifamily real estate	4,963	1,746

Net chargeoffs	63,929	59,569		
Allowance balance, end of period	\$250,517	\$195,450		
Average non-covered loans outstanding	\$8,614,742	\$8,197,173		
Total gross non-covered loans outstanding, end of period	\$8,539,286	\$8,064,315		
Annualized net chargeoffs to average non-covered loans	2.97	%	2.91	%
Allowance for loan losses to total gross non-covered loans, end of period	2.93	%	2.42	%

Our methodology to determine the overall appropriateness of the allowance is based on a classification migration model and qualitative considerations. The technique of migration analysis essentially looks at pools of loans having similar characteristics and analyzes their loss rates over a historical period. We utilize historical loss factors derived from trends and losses associated with each pool over a specified period of time. Based on this process, we assign loss factors to each loan grade within each category of loans. Loss rates derived by the migration model are based

predominantly on historical loss trends that may not be indicative of the actual or inherent loss potential for loan categories. As such, we utilize qualitative and environmental factors as adjusting mechanisms to supplement the historical results of the classification migration model.

Qualitative considerations include, but are not limited to, prevailing economic or market conditions, relative risk profiles of various loan segments, the strength or deficiency of the internal control environment, volume concentrations, growth trends, delinquency and nonaccrual status, problem

loan trends, and geographic concentrations. Qualitative and environmental factors are reflected as percent adjustments and are added to the historical loss rates derived from the classified asset migration model to determine the appropriate allowance amount for each loan category.

In consideration of the significant growth and increasing diversity and credit risk profiles of loans in our portfolio over the past several years, our classification migration model utilizes eighteen risk-rated or heterogeneous loan pool categories and three homogeneous loan categories. The loan sectors included in the heterogeneous loan pools are residential single family, residential multifamily, commercial real estate, construction, commercial business, trade finance, and automobile loans. With the exception of automobile loans, all other heterogeneous loan categories have been broken down into additional subcategories. For example, the commercial real estate loan category is further segmented into six subcategories based on industry sector. These subcategories include retail, office, industrial, land, hotel/motel, and other special purpose or miscellaneous. By sectionalizing these broad loan categories into smaller subgroups, we are better able to isolate and identify the risks associated with each subgroup based on historical loss trends.

In addition to the eighteen heterogeneous loan categories, our classification migration model also utilizes three homogeneous loan categories which encompass predominantly consumer-related credits. Specifically, these homogeneous loan categories are home equity lines, overdraft protection lines, and credit card loans.

The following table reflects management's allocation of the allowance for loan losses by loan category and the ratio of each loan category to total loans as of the dates indicated:

	March 31, 2010		December 31, 2009			
	Amount	%	Amount	%		
	(Dollars in thousands)					
Residential single family	\$18,798	11.3	%	\$18,693	10.9	%
Residential multifamily	19,466	11.7	%	19,332	12.0	%
Commercial and industrial real estate, land	108,411	45.5	%	110,628	46.6	%
Construction	52,156	4.9	%	36,963	5.4	%
Commercial business	42,997	14.5	%	43,774	15.1	%
Trade finance	5,197	2.4	%	6,713	2.6	%
Automobile	99	0.1	%	75	0.1	%
Other consumer	3,393	9.6	%	2,655	7.3	%
Total	\$250,517	100.0	%	\$238,833	100.0	%

Deposits

Deposits decreased 3% to \$14.61 billion at March 31, 2010 from \$14.99 billion at December 31, 2009. The net decrease in deposits primarily came from time deposits, which decreased \$1.04 billion, or 13%. This was offset by an increase in money market accounts of \$705.5 million, or 22%. During the first quarter of 2010, the Company strategically reduced brokered deposits by \$582.6 million. In addition, deposits from our retail network and commercial customers grew by \$201.7 million during the first quarter of 2010.

As of March 31, 2010, time deposits within the Certificate of Deposit Account Registry Service ("CDARS") program amounted to \$588.9 million, compared with \$995.0 million at December 31, 2009. The CDARS program allows customers with deposits in excess of FDIC-insured limits to obtain full coverage on time deposits through a network of banks within the CDARS program. Additionally, we partner with another financial institution to offer a retail sweep product for non-time deposit accounts to

provide added deposit insurance coverage for deposits in excess of FDIC-insured limits. Deposits gathered through these programs are considered brokered deposits under regulatory reporting guidelines.

The following table sets forth the composition of the deposit portfolio as of the dates indicated:

	March 31 2010	December 31, 2009
	(In thousands)	
Noninterest-bearing demand	\$2,289,933	\$2,291,259
Interest-bearing checking	628,759	667,177
Money market	3,844,378	3,138,866
Savings	982,616	991,520
Total core deposits	7,745,686	7,088,822
Time deposits	6,861,016	7,898,791
Total deposits	\$14,606,702	\$14,987,613

Borrowings

We utilize a combination of short-term and long-term borrowings to manage our liquidity position. Federal funds purchased generally mature within one business day to six months from the transaction date. At March 31, 2010, federal funds purchased did not change from the \$22 thousand balance at December 31, 2009. FHLB advances decreased 2% to \$1.77 billion as of March 31, 2010, compared to \$1.81 billion at December 31, 2009. The decrease in FHLB advances is consistent with our overall strategy to deleverage our balance sheet. During the first three months of 2010, a portion of the proceeds from the maturities and sales of investment securities and redemption of our money-market mutual funds were used to pay down our borrowings. During the first three months of 2010, several long-term FHLB advances totaling \$379.1 million were prepaid in addition to a prepayment penalty of \$9.9 million. As of March 31, 2010 and December 31, 2009, we had no overnight FHLB advances.

In addition to federal funds purchased and FHLB advances, we also utilize securities sold under repurchase agreements (“repurchase agreements”) to manage our liquidity position. Repurchase agreements totaled \$1.03 billion as of March 31, 2010 and December 31, 2009. Included in these balances are \$37.5 million and \$31.9 million in short-term repurchase agreements as of March 31, 2010 and December 31, 2009, respectively. The interest rates on these short-term repurchase agreements ranged from 0.50% to 0.75% as of March 31, 2010 and were 0.51% at December 31, 2009. Repurchase agreements are accounted for as collateralized financing transactions and recorded at the amounts at which the securities were sold. The collateral for these agreements consist of U.S. Government agency and U.S. Government sponsored enterprise debt and mortgage-backed securities. All of these repurchase agreements have an original term of ten years. As of March 31, 2010, all of these repurchase agreements were past the floating rate period.

Long-term Debt

Long-term debt remained at \$235.6 million at March 31, 2010, and December 31, 2009. Long-term debt is comprised of subordinated debt which qualifies as Tier II capital and junior subordinated debt issued in connection with our various trust preferred securities offerings which qualify as Tier I capital for regulatory purposes.

Accrued Interest Payable, Accrued Expenses and Other Liabilities

63

Undisbursed loan commitments	\$ 2,272,409
Standby letters of credit	634,091
Commercial letters of credit	63,669

Capital Resources

At March 31, 2010, stockholders' equity totaled \$2.31 billion, a 1% increase from the year-end 2009 balance of \$2.28 billion. The increase is comprised of the following: (1) net income of \$24.9 million recorded during the first three months of 2010; (2) additional unrealized gain on investment securities available-for-sale of \$1.5 million; (3) stock compensation costs amounting to \$1.6 million related to grants of restricted stock and stock options; and (4) issuance of common stock totaling \$577 thousand, representing 953,359 shares, pursuant to various stock plans and agreements. These transactions were offset by: (1) tax benefit of

\$341 thousand from various stock plans; (2) purchase of treasury shares related to vested restricted stock amounting to \$419 thousand, representing 22,457 shares; and (3) accrual and payment of quarterly cash dividends on common and preferred stock totaling \$6.7 million during the first three months of 2010.

Historically, our primary source of capital has been the retention of operating earnings. In order to ensure adequate levels of capital, we conduct an ongoing assessment of projected sources, needs and uses of capital in conjunction with projected increases in assets and the level of risk. As part of this ongoing assessment, the Board of Directors reviews the various components of capital and the adequacy of capital. Although we are not one of the 19 large financial institutions required to conduct a forward-looking capital assessment, or “stress test”, pursuant to the U.S. Treasury’s Capital Assistance Program (“CAP”), the stress assessment requirements under the CAP or similar requirements could be extended or otherwise impact financial institutions beyond the 19 participating institutions, including us. As a result, we could determine independently, or our regulators could require us, to raise additional capital.

Series C Preferred Stock

On November 5, 2009, we entered into investment agreements with various investors, pursuant to which the investors purchased an aggregate of \$500 million of our common stock and newly-issued shares of our Mandatorily Convertible Cumulative Non-Voting Perpetual Preferred Stock, Series C, or the Series C Preferred Stock, in a private placement transaction, which closed on November 6, 2009. In the private placement, we issued to certain qualified institutional buyers and accredited investors, several of whom were already our largest institutional stockholders, the following securities:

- an aggregate of 335,047 shares of our Series C Preferred Stock, each share of which automatically converted into 110.74197 shares of our common stock (an aggregate of 37,103,734 shares of our common stock) at a per common share conversion price of \$9.03, as adjusted in accordance with the terms of the Series C Preferred Stock; and
 - an aggregate of 18,247,012 shares of our common stock.

On March 25, 2010, at a special meeting of the stockholders, our stockholders voted to approve the issuance of 37,103,734 shares of our common stock upon conversion of the 335,047 shares of the Series C Preferred Stock. The Series C Preferred Stock was subsequently automatically converted into shares of our common stock on March 30, 2010, and, as a result, no shares of the Series C Preferred Stock remain outstanding.

Risk-Based Capital

We are committed to maintaining capital at a level sufficient to assure our shareholders, our customers and our regulators that our company and our bank subsidiary are financially sound. We are subject to risk-based capital regulations and capital adequacy guidelines adopted by the federal banking regulators. These guidelines are used to evaluate capital adequacy and are based on an institution’s asset risk profile and off-balance sheet exposures. According to these guidelines, institutions whose Tier I and total capital ratios meet or exceed 6.0% and 10.0%, respectively, may be deemed “well-capitalized.” At March 31, 2010, the Bank’s Tier I and total capital ratios were 16.7% and 18.7%, respectively, compared to 15.7% and 17.7%, respectively, at December 31, 2009.

The following table compares East West Bancorp, Inc.'s and East West Bank's actual capital ratios at March 31, 2010, to those required by regulatory agencies for capital adequacy and well-capitalized classification purposes:

	East West Bancorp		East West Bank		Minimum Regulatory Requirements		Well Capitalized Requirements	
Total Capital (to Risk-Weighted Assets)	20.9	%	18.7	%	8.0	%	10.0	%
Tier 1 Capital (to Risk-Weighted Assets)	18.9	%	16.7	%	4.0	%	6.0	%
Tier 1 Capital (to Average Assets)	10.2	%	9.0	%	4.0	%	5.0	%

ASSET LIABILITY AND MARKET RISK MANAGEMENT

Liquidity

Liquidity management involves our ability to meet cash flow requirements arising from fluctuations in deposit levels and demands of daily operations, which include funding of securities purchases, providing for customers' credit needs and ongoing repayment of borrowings. Our liquidity is actively managed on a daily basis and reviewed periodically by the Asset/Liability Committee and the Board of Directors. This process is intended to ensure the maintenance of sufficient funds to meet the needs of the Bank, including adequate cash flow for off-balance sheet instruments.

Our primary sources of liquidity are derived from financing activities which include the acceptance of customer and brokered deposits, federal funds facilities, repurchase agreement facilities, advances from the Federal Home Loan Bank of San Francisco, and issuances of long-term debt. These funding sources are augmented by payments of principal and interest on loans. In addition, government programs, such as the FDIC's TLGP, may influence deposit behavior. Primary uses of funds include withdrawal of and interest payments on deposits, originations and purchases of loans, purchases of investment securities, and payment of operating expenses.

During the first quarter of 2010, we experienced net cash inflows from operating activities of \$261.2 million, compared to net cash inflows of \$40.5 million for the first quarter of 2009.

Net cash inflows from investing activities totaled \$533.6 million for the first quarter of 2010 compared with net cash outflows of \$531.9 million for the first quarter of 2009. Net cash inflows from investing activities for the first quarter of 2010 were due primarily to the proceeds from the sale of investment securities, collections on covered loans and repayments, maturities and redemptions of investment securities. These factors were partially offset by the purchase of securities purchased under resale agreements and investment securities. Net cash outflows from investing activities for the first quarter of 2009 were due primarily to purchases of short-term investments and investment securities. These factors were partially offset by proceeds from the sale of investment securities, as well as repayments, maturities and redemptions of investment securities, and a decrease in loans receivable due to the higher level of chargeoffs during the first quarter of 2009.

We experienced net cash outflows from financing activities of \$449.2 million during the first quarter of 2010, primarily due to the net decrease in deposits resulting from the Company's strategy to reduce brokered deposits. We experienced net inflows from financing activities of \$153.6 million for the first quarter of 2009 primarily due to the net increase in deposits. This was partially offset by net decreases in federal funds purchased and FHLB advances.

As a means of augmenting our liquidity, we have available a combination of borrowing sources comprised of the Federal Reserve Bank's discount window, FHLB advances, federal funds lines with

various correspondent banks, and several master repurchase agreements with major brokerage companies. We believe our liquidity sources to be stable and adequate to meet our day-to-day cash flow requirements.

The liquidity of East West Bancorp, Inc. has historically been dependent on the payment of cash dividends by its subsidiary, East West Bank, subject to applicable statutes and regulations. The Bank is permitted to pay dividends to the Company as long as the banking regulatory authorities of the Bank are notified of the proposed dividend and there is no objections language from the banking regulatory authorities. For the quarter ended March 31, 2010, no dividends were paid by the Bank to the Company. For the quarter ended March 31, 2009, total dividends paid by the Bank to the Company amounted to \$10.1 million.

On April 26, 2010, the Company's Board of Directors approved the declaration of second quarter 2010 dividends on our Series A preferred stock and on our common shares. Additionally, our Board of Directors also approved the payment of second quarter dividends on our Series B preferred stock payable on May 15, 2010. The quarterly dividend rate is \$0.01 per share on our common stock payable on or about May 24, 2010 to shareholders of record as of May 10, 2010.

Interest Rate Sensitivity Management

Our success is largely dependent upon our ability to manage interest rate risk, which is the impact of adverse fluctuations in interest rates on our net interest income and net portfolio value.

The fundamental objective of the asset liability management process is to manage our exposure to interest rate fluctuations while maintaining adequate levels of liquidity and capital. Our strategy is formulated by the Asset/Liability Committee, which coordinates with the Board of Directors to monitor our overall asset and liability composition. The Committee meets regularly to evaluate, among other things, the sensitivity of our assets and liabilities to interest rate changes, the book and market values of assets and liabilities, unrealized gains and losses on the available-for-sale portfolio (including those attributable to hedging transactions, if any), purchase and securitization activity, and maturities of investments and borrowings.

Our overall strategy is to minimize the adverse impact of immediate incremental changes in market interest rates (rate shock) on net interest income and net portfolio value. Net portfolio value is defined as the present value of assets, minus the present value of liabilities and off-balance sheet instruments. The attainment of this goal requires a balance between profitability, liquidity and interest rate risk exposure. To minimize the adverse impact of changes in market interest rates, we simulate the effect of instantaneous interest rate changes on net interest income and net portfolio value on a quarterly basis. The table below shows the estimated impact of changes in interest rates on net interest income and market value of equity as of March 31, 2010 and December 31, 2009, assuming a non-parallel shift of 100 and 200 basis points in both directions:

Change in Interest Rates (Basis Points)	Net Interest Income Volatility (1)			Net Portfolio Value Volatility (2)		
	March 31, 2010	December 31, 2009		March 31, 2010	December 31, 2009	
+200	1.0	1.5	%	0.4	(4.3)	%
+100	(0.8)	0.3	%	1.0	(2.2)	%
-100	6.5	3.9	%	5.2	1.6	%
-200	8.5	6.8	%	4.4	1.1	%

(1)

The percentage change represents net interest income for twelve months in a stable interest rate environment versus net interest income in the various rate scenarios.

- (2) The percentage change represents net portfolio value of the Bank in a stable interest rate environment versus net portfolio value in the various rate scenarios.

All interest-earning assets, interest-bearing liabilities and related derivative contracts are included in the interest rate sensitivity analysis at March 31, 2010 and December 31, 2009. In a declining rate environment, the interest rate floors on these loans contribute to the favorable impact on our net interest income. However, in a rising rate environment, these interest rate floors also serve to lessen the full benefit of higher interest rates.

Our primary analytical tool to gauge interest rate sensitivity is a simulation model used by many major banks and bank regulators, and is based on the actual maturity and repricing characteristics of interest-rate sensitive assets and liabilities. The model attempts to predict changes in the yields earned on assets and the rates paid on liabilities in relation to changes in market interest rates. As an enhancement to the primary simulation model, prepayment assumptions and market rates of interest provided by independent broker/dealer quotations, an independent pricing model and other available public sources are incorporated into the model. Adjustments are made to reflect the shift in the Treasury and other appropriate yield curves. The model also factors in projections of anticipated activity levels by product line and takes into account our increased ability to control rates offered on deposit products in comparison to our ability to control rates on adjustable-rate loans tied to the published indices.

The following table provides the outstanding principal balances and the weighted average interest rates of our financial instruments as of March 31, 2010. The information presented below is based on the repricing date for variable rate instruments and the expected maturity date for fixed rate instruments.

(1) Includes hybrid securities that have fixed interest rates for the first three or five years. Thereafter, interest rates become adjustable based on a predetermined index.

Expected maturities of assets are contractual maturities adjusted for projected payment based on contractual amortization and unscheduled prepayments of principal as well as repricing frequency. Expected maturities for deposits are based on contractual maturities adjusted for projected rollover rates for deposits with no stated maturity dates. We utilize assumptions supported by documented analyses for the expected maturities of our loans and repricing of our deposits. We also use prepayment projections for amortizing securities. The actual maturities of these instruments could vary significantly if future prepayments and repricing frequencies differ from our expectations based on historical experience.

The fair values of interest-bearing deposits in other banks are based on the discounted cash flow approach. The discount rate is derived from the Bank's time deposit rate curve. The fair values of short-term investments generally approximate their book values due to their short maturities. For securities purchased under resale agreements, fair values are calculated by discounting future cash flows based on expected maturities or repricing dates utilizing estimated market discount rates and taking into consideration the call features of each instrument. The fair values of the investment securities are generally determined by reference to the average of at least two quoted market prices obtained from independent external brokers or prices obtained from independent external pricing service providers who have experience in valuing these securities. In obtaining such valuation information from third parties, the Company has reviewed the methodologies used to develop the resulting fair values. For the private-

label mortgage-backed security, the fair value was derived based on a combination of broker prices and discounted cash flow analyses that is weighted as deemed appropriate. For the pooled trust preferred securities, the fair value was derived based on a discounted cash flow analyses. The discount rate is derived from assumptions using an exit pricing approach related to the implied rate of return which have been adjusted for general change in market rates, estimated changes in credit quality and liquidity risk premium, and specific non-performance and default experience in the collateral underlying the securities.

The fair value of deposits is determined based on the discounted cash flow approach. The discount rate is derived from the associated yield curve, plus spread, if any. For core deposits, the cash outflows are projected by the decay rate based on the Bank's core deposit premium study. Cash flows for all non-time deposits are discounted using the LIBOR yield curve. For time deposits, the cash flows are based on the contractual runoff and are discounted by the Bank's current offering rates, plus spread. For federal funds purchased, fair value approximates book value due to their short maturities. The fair value of FHLB term advances is estimated by discounting the cash flows through maturity or the next repricing date based on current rates offered by the FHLB for borrowings with similar maturities. Customer repurchase agreements, which have maturities ranging from one to three days, are presumed to have equal book and fair values because the interests rates paid on these instruments are based on prevailing market rates. The fair values of securities sold under repurchase agreements are calculated by discounting future cash flows based on expected maturities or repricing dates, utilizing estimated market discount rates and taking into consideration the call features of each instrument. For both subordinated and junior subordinated debt instruments, fair values are estimated by discounting cash flows through maturity based on current market rates the Bank would pay for new issuances.

The Asset/Liability Committee is authorized to utilize a wide variety of off-balance sheet financial techniques to assist in the management of interest rate risk. We may elect to use derivative financial instruments as part of our asset and liability management strategy, with the overall goal of minimizing the impact of interest rate fluctuations on our net interest margin and stockholders' equity. Currently, derivative instruments do not have a material impact on our operating results or financial position.

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES OF MARKET RISKS

For quantitative and qualitative disclosures regarding market risks in our portfolio, see, "Management's Discussion and Analysis of Consolidated Financial Condition and Results of Operations -- Asset Liability and Market Risk Management."

ITEM 4: CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As of March 31, 2010, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(e) and 15d-15(e). Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures are effective as of March 31, 2010.

Our disclosure controls and procedures are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Our disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file under the Exchange Act is

accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Internal Controls

During our most recent fiscal quarter, there have been no changes in our internal control over financial reporting that has materially affected or is reasonably likely to materially affect our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Neither the Company nor the Bank is involved in any material legal proceedings. The Bank, from time to time, is party to litigation which arises in the ordinary course of business, such as claims to enforce liens, claims involving the origination and servicing of loans, and other issues related to the business of the Bank. After taking into consideration information furnished by counsel to the Company and the Bank, management believes that the resolution of such issues would not have a material adverse impact on the financial position, results of operations, or liquidity of the Company or the Bank.

ITEM 1A. RISK FACTORS

The Company's 2009 Form 10-K contains disclosure regarding the risks and uncertainties related to the Company's business under the heading "Item A. Risk Factors." The information presented below updates and should be read in conjunction with the risk factors and information disclosed in the 2009 Form 10-K. Other than as set forth below, there are no material changes to our risk factors as presented in the Company's Form 10-K.

We may engage in additional acquisitions of banks, which may involve FDIC-assisted transactions, which could present additional risks to our business. We may have opportunities to acquire other banks and this may include the acquisition of the assets and liabilities of failed banks in FDIC-assisted transactions. Although failed bank transactions typically provide for FDIC assistance to an acquirer to mitigate certain risks, such as sharing exposure to loan losses and providing indemnification against certain liabilities of the failed institution, we would still be subject to many of the same risks we would face in acquiring another bank in negotiated transactions, including risks associated with maintaining customer relationships and failure to realize the anticipated acquisition benefits in the amounts and within the timeframes we expect. In addition, because these acquisitions are structured in a manner that would not allow us the time and access to information normally associated with preparing for and evaluating a negotiated acquisition, we may face additional risk in FDIC-assisted transactions, including additional strain on management resources, management of problem loans, problems related to integration of personnel and operating systems and impact to our capital resources requiring us to raise additional capital. We cannot assure you that we will be successful in overcoming these risks or any other problems encountered in connection with FDIC-assisted or other transactions. Our inability to overcome these risks could have a material adverse effect on our business, financial condition and net income.

If we were to undergo an "ownership change" for tax purposes, our ability to use certain tax benefits would be limited. If we were to undergo an "ownership change" for tax purposes, our ability to deduct then existing net operating loss carryforwards would be limited. In addition, our ability to claim certain subsequent deductions could be limited if we had a "net unrealized built-in loss" at the time of the ownership change. The rules for determining when a company has an ownership change and the subsequent calculation of applicable limitations are highly complex. If we were to undergo an ownership change, limitations on our ability to use our tax benefits could have a materially adverse effect on us.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Except as previously disclosed on Reports on Form 8-K, there were no unregistered sales of equity securities during the quarter ended March 31, 2010. The following summarizes share repurchase activities during the first quarter of 2010:

Month Ended	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs	Approximate Dollar Value in Millions of Shares that May Yet Be Purchased Under the Programs (2)
January 31, 2010	-	\$ -	-	\$ 26.2
February 28, 2010	-	-	-	26.2
March 31, 2010	-	-	-	26.2
Total	-	\$ -	-	\$ 26.2

(1) Excludes 112,252 in repurchased shares totaling \$958 thousand due to forfeitures and vesting of restricted stock awards pursuant to the Company's 1998 Stock Incentive Plan.

(2) During the first quarter of 2007, the Company's Board of Directors announced a repurchase program authorizing the repurchase of up to \$80.0 million of its common stock. This repurchase program has no expiration date and, to date, 1,392,176 shares totaling \$53.8 million have been purchased under this program.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not applicable.

ITEM 5. OTHER INFORMATION

Not applicable.

ITEM 6. EXHIBITS

- (i) Exhibit 31.1 Chief Executive Officer Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
- (ii) Exhibit 31.2 Chief Financial Officer Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
- (iii) Exhibit 32.1 Chief Executive Officer Certification Pursuant to 18 U.S.C. Section 1350, As Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

- (iv) Exhibit 32.2 Chief Financial Officer Certification Pursuant to 18 U.S.C. Section 1350, As Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

All other material referenced in this report which is required to be filed as an exhibit hereto has previously been submitted.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
