HICKORY TECH CORPORATION

SEPTEMBER 30, 2002

PART I. FINANCIAL INFORMATION

ITEM 1. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS.

NOTE 1. BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information necessary for a fair presentation of results of operations, financial position, and cash flows in conformity with accounting principles generally accepted in the United States of America. In the opinion of management, the condensed consolidated financial statements reflect all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation of Hickory Tech Corporation's (HickoryTech) results for the periods presented. Operating results for interim periods are not necessarily indicative of results that may be expected for the fiscal year as a whole. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses, and related disclosures at the date of the financial statements and during the reporting period. Actual results could differ from these estimates. These unaudited interim condensed consolidated financial statements should be read in conjunction with HickoryTech's Annual Report on Form 10-K for the year ended December 31, 2001.

The consolidated financial statements of HickoryTech include Hickory Tech Corporation and its subsidiaries in the following three business segments: (i) Telecom Sector, (ii) Information Solutions Sector and (iii) Enterprise Solutions Sector. An investment in an unconsolidated partnership for the Information Solutions Sector is accounted for using the equity method. All intercompany transactions have been eliminated from the consolidated financial statements.

Beginning in the first quarter 2002, HickoryTech reports its previously reported business segments of Telephone, Communications Services and Wireless Services as a single segment referred to as the Telecom Sector. This new basis of segment reporting reflects the integration of HickoryTech's management, sales, service and support functions in these three areas, as well as reflecting the level at which management now reviews and makes resource allocation and other management decisions regarding the operations of the company. All segment information reported in 2001 has been reclassified to conform to this new presentation.

In addition to the change in business segments, certain reclassifications were made to the financial statements as of and for the three months and nine months ended September 30, 2001 to conform to the 2002 presentation. These reclassifications had no impact on previously reported operating revenue, net income or shareholders' equity.

Operating expenses include all costs related to delivery of HickoryTech's communications services and products. These costs include all selling, general and administrative costs and all costs of performing services and providing related products, except for costs associated with the depreciation and amortization of property, plant and equipment and intangible assets and Enterprise Solutions Sector costs of sales.

NOTE 2. EARNINGS AND CASH DIVIDENDS PER COMMON SHARE

Basic earnings per share is computed by dividing net income by the weighted average number of shares of common stock outstanding during the quarter. Shares used in the earnings per share assuming dilution calculation are based on the weighted average number of shares of common stock outstanding during the quarter increased by potentially dilutive common shares. Potentially dilutive common shares include stock options and stock subscribed under the employee stock purchase plan (ESPP).

# Edgar Filing: HICKORY TECH CORP - Form 10-Q

	For Three Months Ended		For Nine Months Ended	
	9/30/02	9/30/01	9/30/02	9/30/01
Weighted Average Shares Outstanding	14,058,750	13,907,884	14,008,985	13,895,659
Stock Options (dilutive only)	42,885	105,745	68,996	95,720
Weighted Average Stock Subscribed (ESPP)	15,692	269	14,951	90
Weighted Average Dilutive Shares Outstanding	14,117,327	14,013,898	14,092,932	13,991,469

Options to purchase 117,150 shares and 39,750 shares for the three months ended September 30, 2002 and 2001, respectively, and 76,650 shares and 39,750 shares for the nine months ended September 30, 2002 and 2001, respectively, were not included in the computation of earnings per share assuming dilution because their effect on earnings per share would have been antidilutive.

Cash dividends are based on the number of common shares outstanding at the respective record dates. Listed below are the number of shares outstanding as of the record date for the first three quarters of 2002 and 2001.

Shares Outstanding on Record Date	2002	2001
First Quarter (Feb. 15)	13,971,484	13,886,669
Second Quarter (May 15)	14,007,250	13,892,254
Third Quarter (Aug. 15)	14,049,776	13,897,929

Dividends per share is based on the quarterly dividend per share as declared by the HickoryTech Board of Directors.

During the first nine months of 2002 and 2001, shareholders have elected to reinvest \$185,000 and \$184,000, respectively, of dividends into HickoryTech common stock pursuant to the HickoryTech Dividend Reinvestment Plan.

## NOTE 3. COMPREHENSIVE INCOME

For the three months and nine months ended September 30, 2002 and 2001, comprehensive income was comprised solely of net income.

## NOTE 4. INVENTORIES

Inventories, which consist of equipment for resale, materials and supplies, are stated at the lower of average cost or market.

NOTE 5. INTANGIBLE ASSETS

HickoryTech adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets, effective January 1, 2002. SFAS No. 142 required that goodwill and intangible assets with indefinite useful lives no longer be amortized, but instead tested for impairment at least annually. Accordingly, at January 1, 2002, HickoryTech ceased amortizing its goodwill (net carrying value as of September 30, 2002 of \$25,086,000) and FCC licenses (net carrying value as of September 30, 2002 of \$75,635,000). HickoryTech tested these intangible assets for impairment at January 1, 2002 pursuant to the method prescribed by SFAS No. 142 and determined that these assets carrying values were not impaired.

# Edgar Filing: HICKORY TECH CORP - Form 10-Q

The following table adjusts previously reported net income to exclude amortization expense recognized from goodwill and FCC licenses as if SFAS No. 142 had taken effect in 2001:

<i>(Dollars in Thousands, except Per Share Amount and shown Net of Income Tax)</i>	<b>For Three Months Ended</b>		<b>For Nine Months Ended</b>	
	<b>9/30/02</b>	<b>9/30/01</b>	<b>9/30/02</b>	<b>9/30/01</b>
Reported Net Income	\$ 2,094	\$ 2,740	\$ 5,986	\$ 6,707
Goodwill Amortization		113		339
FCC License Amortization		258		776
Adjusted Net Income	\$ 2,094	\$ 3,111	\$ 5,986	\$ 7,822
Basic and Diluted Earnings Per Share:				
Reported Net Income	\$ 0.15	\$ 0.20	\$ 0.43	\$ 0.48
Goodwill Amortization		0.01		0.03
FCC License Amortization		0.02		0.06
Adjusted Net Income	\$ 0.15	\$ 0.23	\$ 0.43	\$ 0.57

Upon adoption at January 1, 2002, SFAS No. 142 also required HickoryTech to reassess the useful lives over which its other intangible assets are amortized. These useful lives were not changed as a result of this reassessment and, accordingly, these assets continue to be amortized over periods ranging from two to eight years.

The components of HickoryTech's intangible assets are shown in the following table:

	<b>As of September 30, 2002</b>		<b>As of December 31, 2001</b>	
	<b>Gross Carrying Amount</b>	<b>Accumulated Amortization</b>	<b>Gross Carrying Amount</b>	<b>Accumulated Amortization</b>
<b>Definite-Lived Intangible Assets</b>				
Customers	\$ 1,701	\$ 989	\$ 1,701	\$ 780
Other Intangibles	538	245	538	103
Total	\$ 2,239	\$ 1,234	\$ 2,239	\$ 883
<b>Indefinite-Lived Intangible Assets</b>				
FCC Licenses	\$ 75,635		\$ 75,635	

Amortization expense related to the definite-lived intangible assets for the three months and nine months ended September 30, 2002 amounted to \$124,000 and \$351,000, respectively. Total estimated amortization expense for 2002 and the five years subsequent to 2002 is as follows: 2002 - \$466,000; 2003 - \$326,000; 2004 - \$185,000; 2005 - \$102,000; 2006 - \$102,000 and 2007 - \$102,000.

## NOTE 6. RECENT ACCOUNTING DEVELOPMENTS

## Edgar Filing: HICKORY TECH CORP - Form 10-Q

HickoryTech adopted the provisions of SFAS No. 144, Accounting for Impairment or Disposal of Long-Lived Assets, as of January 1, 2002. SFAS No. 144 requires that long-lived assets that are to be disposed of by sale be measured at the lower of book value or fair value less cost to sell and also sets forth requirements for recognizing and measuring impairment losses on certain long-lived assets to be held or used. The adoption of SFAS No. 144 had no impact on HickoryTech's financial position or its results of operations.

In June 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 143, Accounting for Asset Retirement Obligations, which addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets that result from the acquisition, construction, development or normal use of the asset. SFAS No. 143 is effective January 1, 2003. HickoryTech is currently evaluating the provisions of SFAS No. 143 and does not expect that adoption will have a material impact on its financial position or its results of operations.

# Edgar Filing: HICKORY TECH CORP - Form 10-Q

In April 2002, the FASB issued SFAS No. 145, Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections. SFAS No. 145 rescinds FASB Statement No. 4, Reporting Gains and Losses from Extinguishment of Debt, and an amendment of that Statement, FASB Statement No. 64, Extinguishments of Debt Made to Satisfy Sinking-Fund Requirements. SFAS No. 145 also rescinds FASB Statement No. 44, Accounting for Intangible Assets of Motor Carriers, and amends FASB Statement No. 13, Accounting for Leases. In June 2000, HickoryTech recorded an extraordinary loss of \$233,000, net of income tax benefit of \$158,000, as a result of an extinguishment of debt. Under SFAS No. 145, this extraordinary loss on debt extinguishment will be reclassified to operating expenses when HickoryTech adopts SFAS No. 145 in the first quarter of 2003.

In June 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit of Disposal Activities, which replaces Emerging Issues Task Force (EITF) Issue No. 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring). SFAS No. 146 requires companies to recognize costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. SFAS No. 146 is effective for, and HickoryTech will apply this standard on, exit or disposal activities that are initiated after December 31, 2002.

NOTE 8. CONTINGENCIES

HickoryTech is involved in certain contractual disputes in the ordinary course of business. HickoryTech does not believe the ultimate resolution of any of these existing matters will have a material adverse effect on its financial position, results of operations or cash flows.

In the second quarter of 2002, HickoryTech's Board of Directors modified the terms of the stock options of a retiring officer. The modification extended the period after retirement during which the officer can exercise options. This modification may result in HickoryTech recognizing up to \$173,000 of compensation expense during the first quarter of 2003.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION.

FORWARD-LOOKING STATEMENTS

*This Form 10-Q contains forward-looking statements that are based on management's current expectations, estimates and projections about the industry in which HickoryTech operates and management's beliefs and assumptions. Such forward-looking statements are subject to important risks and uncertainties that could cause HickoryTech's future actual results to differ materially from such statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and probabilities, which are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements, whether as a result of new information, future events or otherwise. Factors that might cause such a difference include, but are not limited to, those contained in this Management's Discussion and Analysis (Item 2) and Exhibit 99 (Cautionary Statement for Purposes of the Safe Harbor Provision of the Private Securities Litigation Reform Act of 1995) to HickoryTech's Annual Report on Form 10-K for the year ended December 31, 2001. You are cautioned not to place undue reliance on these forward looking statements, which speak only as of the date on which they were made. Except as otherwise required by law, HickoryTech undertakes no obligation to update any of its forward-looking statements for any reason.*

## **BUSINESSES**

The business segments of HickoryTech are:

### ***TELECOM SECTOR***

HickoryTech's Telecom Sector (formerly the individual Telephone Sector, Communications Services Sector and Wireless Services Sector) provides local exchange wireline and wireless telephone service, long distance, dial-up internet access and owns and operates fiber optic cable facilities. This sector includes three incumbent local exchange carriers (ILECs). Two ILECs provide telephone service in south central Minnesota, specifically Mankato (a small urban city) and eleven rural communities surrounding Mankato. The third ILEC provides telephone service for eleven rural communities in northwest Iowa. This sector also includes HickoryTech's competitive local exchange carrier (CLEC), which provides local telephone service, long distance and dial-up Internet access on a competitive basis to customers in eight rural communities in Minnesota and six rural communities in Iowa not in HickoryTech's ILEC service areas. The Telecom Sector also includes a wireless telephone business in south central Minnesota. The wireless telephone business consists of the A-side FCC cellular license to operate in Minnesota's Rural Service Area (RSA) 10, the Minneapolis/St. Paul Metro A-2 cellular license and two digital personal communications services (PCS) licenses covering the Minnesota Basic Trading Areas (BTAs) of Mankato-Fairmont and Rochester-Austin-Albert Lea. HickoryTech also owns and operates fiber optic cable facilities in Minnesota, which are used to transport interexchange communications as a service to telephone industry customers. HickoryTech's Minnesota ILECs and its CLEC are the primary users of the fiber optic cable facilities.

### ***INFORMATION SOLUTIONS SECTOR***

HickoryTech's Information Solutions Sector provides data processing and related services, principally for HickoryTech, other ILECs, CLECs, interexchange network carriers, wireless companies, municipalities and utilities. HickoryTech's Information Solutions Sector's principal activity is the provision of monthly batch processing of computerized data. This sector has developed a new integrated billing and management system called SuiteSolution. For internal use, SuiteSolution enables HickoryTech to become a full-service billing provider for all aspects of the telecommunications industry. For external use, SuiteSolution can provide a billing platform for wireline and wireless carriers. The Information Solutions Sector also has legacy systems, such as its carrier access billing products.

*ENTERPRISE SOLUTIONS SECTOR*

The Enterprise Solutions Sector's activities are focused on the sale, installation and service of business telephone systems and data communications equipment to companies based in metropolitan Minneapolis/St. Paul, Minnesota. This sector also supports the business telephone system service for HickoryTech ILEC and CLEC operations in Minnesota and Iowa.

**RESULTS OF OPERATIONS**

**CONSOLIDATED OPERATING RESULTS**

The following is a summarized discussion of consolidated results of operations. More detailed discussion of operating results by segment follows this discussion.

**OPERATING REVENUES** - Consolidated operating revenues were \$1,153,000 or 4.2% higher for the three months ended September 30, 2002 than for the three months ended September 30, 2001. The revenue increase in the third quarter was attributable to a 10.7% increase in HickoryTech's total customer base in its Telecom Sector, local rate increases by HickoryTech's ILECs and revenue recognized as a result of services provided under terms of a multi-year contract awarded to HickoryTech effective July 1, 2002 to provide Internet access and video conferencing to schools and libraries in south central Minnesota served by the Project SOCRATES distance-learning network. Consolidated operating revenues were \$2,429,000 or 3.0% lower for the nine months ended September 30, 2002 than for the nine months ended September 30, 2001. The revenue decrease was primarily attributable to a lower volume of business in the Enterprise Solutions Sector and a decline in wireless roaming revenue in the Telecom Sector. These decreases were partially offset by the increase in HickoryTech's total customer base in its Telecom Sector, in addition to the impact of local rate increases by HickoryTech's ILECs, also in the Telecom Sector.

**COST OF SALES, ENTERPRISE SOLUTIONS** Cost of sales in the Enterprise Solutions Sector were \$178,000 or 4.6% lower for the three months ended September 30, 2002 than for the three months ended September 30, 2001. Cost of sales were \$2,598,000 or 24.7% lower for the nine months ended September 30, 2002 than for the nine months ended September 30, 2001. The decrease in cost of sales is the result of the decrease in revenue and a related decrease in volume in the Enterprise Solutions Sector. The gross profit margin in the Enterprise Solutions Sector for the three months and nine months ended September 30, 2002 was 29.8% and 32.2%, respectively, as compared to 29.4% and 32.2% for the same periods in 2001.

**OPERATING EXPENSES (excluding Depreciation and Amortization)** - Operating expenses for the three months ended September 30, 2002 increased \$2,216,000 or 16.9% compared with the same period in 2001. Operating expenses for the nine months ended September 30, 2002 increased \$1,987,000 or 4.9% compared with the same period in 2001. Operating

expenses in the three months and nine months ended September 30, 2002 were higher due to bad debt expense of \$551,000 and \$1,746,000, respectively, due in large part to bankruptcies of interexchange carriers in the telecommunications industry. Telecom Sector operating expenses in the third quarter were also higher due to higher customer counts in this sector, along with higher advertising and marketing expenses. Another reason for the increased operating expenses in the third quarter were higher corporate costs related to executive management, insurance and human resource studies.

**DEPRECIATION AND AMORTIZATION** - Depreciation expense for the three months ended September 30, 2002 was \$781,000 or 23.9% higher than for the same period in 2001. Depreciation expense for the nine months ended September 30, 2002 was \$2,580,000 or 28.0% higher than for the same period in 2001. The buildout of HickoryTech's CLEC and fiber optic networks primarily account for the increase in depreciation expense. Amortization expense for the three months ended September 30, 2002 was \$685,000 or 64.3% lower than for the same period in 2001. Amortization expense for the nine months ended September 30, 2002 was \$1,523,000 or 57.6% lower than for the same period in 2001. If SFAS No. 142 had taken effect in 2001, amortization expense for the third quarter 2002 would have decreased \$55,000 over the third quarter 2001 and amortization expense would have increased \$367,000 over the first nine months of 2001. The increase in amortization expense for the first nine months of 2002 was due to amortization of capitalized software development costs related to the Information Solutions Sector's SuiteSolution billing software, which began in the third quarter 2001.

**OPERATING INCOME** - Operating income was 15.7% lower for the three months ended September 30, 2002 than for the three months ended September 30, 2001. Operating income was 15.6% lower for the nine months ended September 30, 2002 than for the nine months ended September 30, 2001. The decrease in operating income primarily reflects the impact of the increase in operating expenses for this period, along with the increase in depreciation expense related to building out the infrastructure of the CLEC business in the Telecom Sector and the decrease in operating revenues for the Enterprise Solutions Sector. These impacts were partially offset by lower amortization expense due to the adoption of SFAS No. 142.

**INTEREST EXPENSE** - Interest expense decreased \$1,001,000 or 36.4% for the three months ended September 30, 2002, compared to the same period in 2001. Interest expense decreased \$2,878,000 or 34.1% for the nine months ended September 30, 2002, compared to the same period in 2001. The decrease in interest expense was primarily due to a decrease in the weighted average interest rate on HickoryTech's revolving credit facility from 6.30% on September 30, 2001 to 4.37% on September 30, 2002. The outstanding balance of the revolving credit facility was \$161,250,000 on September 30, 2002.

**NET INCOME** - Consolidated net income for the three months ended September 30, 2002 was \$646,000 or 23.6% lower than the comparable period in 2001. Consolidated net income for the nine months ended September 30, 2002 was \$721,000 or 10.7% lower than the comparable period in 2001. The third quarter 2001 included an after-tax gain on the sale of Amana Colonies Telephone Company (ACTC) of \$598,000. The nine months ended September 30, 2001 included after-tax gains on the sale of ACTC and other assets of \$681,000. If SFAS No. 142 had taken effect in 2001 and excluding the gains in 2001, net income for the third quarter 2002 would have decreased \$419,000 or 16.7% compared to the third quarter 2001 and net income would have decreased \$1,155,000 or 16.2% for the first nine months of 2002 compared to the same period in 2001. The primary reasons for this decrease in net income for HickoryTech were the decrease in operating revenues for the Enterprise Solutions Sector for the first nine months of 2002, the increase in depreciation expense due to the building out of the CLEC infrastructure and the additional allowance for doubtful accounts recorded in 2002.

SECTOR RESULTS OF OPERATIONS

TELECOM The following table provides a breakdown of the Telecom Sector operating results.

**TELECOM**

<i>(Dollars in Thousands)</i>	For Three Months Ended		For Nine Months Ended

Wireless Customers	26,254	26,328		
Total Telecom Customers	152,728	137,927		

---

(a) Internet customer count reported for the quarter ended September 30, 2001 was 14,089. This count included 2,237 inactive accounts, which have been removed from the customer base.

Telecom Sector operating revenues before intersegment eliminations for the three months ended September 30, 2002 increased \$1,604,000 or 7.7% compared with the same period in 2001. Operating revenues before intersegment eliminations for the nine months ended September 30, 2002 increased \$1,484,000 or 2.3% compared with the same period in 2001. Amana Colonies Telephone Company (ACTC), which was sold on August 6, 2001, contributed \$143,000 and \$830,000 of revenues to this sector during the three months and nine months ended September 30, 2001, respectively. Local service rates were increased in HickoryTech's Iowa ILEC in May 2001 and in the Minnesota ILECs in December 2001, which contributed \$218,000 of incremental revenue in the third quarter of 2002 and \$724,000 of incremental revenue for the first nine months of 2002. Without the local service rate increases and excluding the revenues from ACTC, Telecom revenues would have increased \$1,529,000 or 7.4% for the third quarter of 2002 and \$1,590,000 or 2.5% for the first nine months of 2002 compared to the same periods in 2001.

ILEC local service revenue increased \$85,000 or 2.3% for the three months ended September 30, 2002 and \$580,000 or 5.4% for the nine months ended September 30, 2002 compared with the same periods in 2001. ACTC contributed \$47,000 and \$159,000 to local service revenue for the third quarter and for the first nine months of 2001, respectively. Without the local service rate increase and excluding the revenues from ACTC, local service revenue would have decreased \$86,000 or 2.4% for the three months ended September 30, 2002 and increased \$15,000 or 0.1% for the nine months ended September 30, 2002 compared with the same periods in 2001. The decrease in local service revenue for the third quarter was due to a 0.6% decline in ILEC access lines and credits given to Centrex customers based on trunk equivalency for the subscriber line charge, which was increased in January 2002. The trunk equivalency credits were offset by increased demand for local private lines and higher revenue from vertical services such as caller identification, call waiting and three-way calling in the first nine months of 2002.

ILEC network access revenue increased \$489,000 or 6.4% for the three months ended September 30, 2002 and \$587,000 or 2.5% for the nine months ended September 30, 2002 compared with the same periods in 2001. ACTC contributed \$88,000 and \$592,000 to network access revenue for the third quarter and for the first nine months of 2001, respectively. Excluding the revenue from ACTC, network access revenue would have increased \$577,000 or 7.7% for the three months ended September 30, 2002 and \$1,179,000 or 5.1% for the nine months ended September 30, 2002 compared with the same periods in 2001. The increase in network access revenue was driven by higher demand for dedicated lines and high-speed circuits. These increases in network access revenue were partially offset by a 3.8% decline in access minutes of use for the first nine months of 2002 compared to the same period in 2001. This decline in minutes of use is expected to continue in the future.

CLEC local service revenue increased \$202,000 or 32.7% for the three months ended September 30, 2002 and \$564,000 or 34.1% for the nine months ended September 30, 2002 compared with the same periods in 2001. CLEC access lines grew 23.3% from September 30, 2001 to September 30, 2002, which was the primary reason for the increase in local service revenue.

Other CLEC revenue increased \$728,000 or 140.3% for the three months ended September 30, 2002 and \$1,262,000 or 87.6% for the nine months ended September 30, 2002 compared with the same periods in 2001. Other revenue included network access and high-speed data revenues which generally grew along with the increase in access lines. Also included in other revenue was the revenue recorded from the CLEC's offering of digital TV service, which was rolled out in May 2001 and has grown to 728 customers as of September 30, 2002. This growth in digital TV resulted in increased revenues of \$35,000 and \$128,000 for the three and nine months ended September 30, 2002, respectively, as compared to the same periods in 2001. Another reason for the increase in other revenue in 2002 was the additional \$386,000 of revenue recognized as a result of services provided under terms of a multi-year contract awarded to HickoryTech effective July 1, 2002 to provide Internet access and video conferencing to schools and libraries in south central Minnesota served by the Project SOCRATES distance-learning network.

Long distance revenue increased \$95,000 or 10.2% for the three months ended September 30, 2002 and \$116,000 or 4.1% for the nine months ended September 30, 2002 compared with the same periods in 2001. This sector experienced a 46.3% increase in its long distance customer base from September 30, 2001 to September 30, 2002, with long distance revenues for the first nine months of 2002 only increasing 4.1% over the same period in 2001. This slower growth in long distance revenues is the result of the decreasing long distance revenue per customer that the entire industry is experiencing.

Internet revenue increased \$168,000 or 22.4% for the three months ended September 30, 2002 and \$392,000 or 17.4% for the nine months ended September 30, 2002 compared with the same periods in 2001. The increase in revenue was caused primarily by an increase in Internet customers of 17.6% from September 30, 2001 to September 30, 2002. The Internet customer count reported as of September 30, 2001 was 14,089. This customer count included 2,237 inactive accounts, which subsequently have been removed from the customer base. In addition to the increase in customers, Internet revenue increased due to a migration of Internet customers from low-price introductory rate plans to mid-range full-service Internet packages.

Wireless service revenue decreased \$217,000 or 8.0% for the three months ended September 30, 2002 and \$465,000 or 6.0% for the nine months ended September 30, 2002 compared with the same periods in 2001. Wireless customer counts declined 0.3% from September 30, 2001 to September 30, 2002, accounting for a portion of the decline in service revenue. The remainder of the decrease in service revenue was due to a decline in the average revenue per subscriber. HickoryTech began marketing new wireless service plans during the third quarter of 2002 which offered customers less expensive options, as well as options for unlimited airtime. The introduction of these new plans was the primary reason why the wireless customer base grew 1.7% since June 30, 2002, and has also resulted in less revenue per subscriber.

Wireless roaming revenue increased \$70,000 or 4.6% for the three months ended September 30, 2002 and decreased \$1,672,000 or 31.4% for the nine months ended September 30, 2002 compared with the same periods in 2001. Roaming minutes from other wireless carriers' customers travelling into HickoryTech's cellular service territory have eroded from historical levels, particularly due to technological changes among other wireless providers which re-route the roaming minutes from HickoryTech's wireless service towers to other providers. In addition, other PCS wireless carriers have continued to build-out PCS licenses to compete with HickoryTech in RSA 10. This decline in roaming minutes was experienced by HickoryTech during the third quarter 2001, and has persisted from that time. This trend of reduced roaming revenue is expected to continue. The wireless roaming revenue increase in the third quarter of 2002 compared to the third quarter of 2001 was a potentially temporary reversal of what has become a trend of decreasing roaming revenue, possibly caused by a seasonal peak of high roaming traffic in the wireless area served by HickoryTech.

Operating expenses excluding depreciation and amortization increased \$1,223,000 or 11.0% for the three months ended September 30, 2002 and decreased \$46,000 or 0.1% for the nine months ended September 30, 2002 compared with the same periods in 2001. ACTC contributed \$138,000 and \$656,000 of operating expenses to this sector during the three months and nine months ended September 30, 2001, respectively. Excluding the operating expenses from ACTC, Telecom operating expenses would have increased \$1,361,000 or 12.4% for the third quarter of 2002 and \$610,000 or 1.8% for the first nine months of 2002 compared to the same periods in 2001. One reason for the increase in operating expenses was the \$551,000 and \$1,746,000 of additional bad debt expense recorded in the third quarter and first nine months of 2002, respectively, due in large part to bankruptcies of interexchange carriers in the telecommunications industry. In addition, this sector's operating expenses grew due to increased advertising and marketing of its competitive local service and the new wireless service plans, along with increased wireless phone expense due to a large number of gross customer additions during the quarter. Project SOCRATES also added to the increase in operating expenses as HickoryTech either uses its own facilities for the provision of this service or it pays other carriers when it utilizes their networks to provide this service. The increases in operating expenses noted above for the nine months ended September 30, 2002 were partially offset by improved efficiencies achieved in the design and operation of HickoryTech's network as it pertains to its CLEC and internet operations. In addition, management actions aimed at reducing operating costs, which began in the first quarter of 2001, and the combination of certain operating functions aided in reducing operating expenses for this sector through the first nine months of 2002. HickoryTech has also implemented specific cost reduction initiatives such as using its PCS network to reduce roaming expense for its wireless product, closely auditing the interconnection fees paid to other carriers for its CLEC product and reducing the plant installation and engineering costs of its Network Design and Operations Division.

Depreciation and amortization increased \$2,000 for the three months ended September 30, 2002 and \$180,000 or 1.8% for the nine months ended September 30, 2002 compared with the same periods in 2001. Depreciation expense increased \$660,000 or 21.7% for the three months ended September 30, 2002 and \$2,020,000 or 23.1% for the nine months ended September 30, 2002 compared with the same periods in 2001. The buildout of HickoryTech's CLEC and

fiber optic networks primarily account for the increase in depreciation expense. For the three months and nine months ended September 30, 2002 compared to the same periods in 2001, depreciation expense increased \$208,000 or 10.3% and \$686,000 or 11.6%, respectively, for the networks associated with its ILEC product and \$373,000 or 74.3% and \$1,271,000 or 109.8%, respectively, for the networks associated with its CLEC product. Amortization expense decreased \$658,000 or 88.4% for the three months ended September 30, 2002 and \$1,840,000 or 88.6% for the nine months ended September 30, 2002 compared with the same periods in 2001. If SFAS No. 142 had taken effect in 2001, amortization expense would have decreased \$63,000 and \$57,000 for the three months and nine months ended September 30, 2002, respectively, compared with the same periods in 2001.

Operating income increased \$379,000 or 6.2% for the three months ended September 30, 2002 and \$1,350,000 or 7.7% for the nine months ended September 30, 2002 compared with the same periods in 2001. Net income increased \$398,000 or 11.6% for the three months ended September 30, 2002 and \$1,091,000 or 10.8% for the nine months ended September 30, 2002 compared with the same periods in 2001. The increases in operating and net income resulted from the decrease in amortization expense and increases in revenues described above, partially offset by the increases in operating expenses described above. If SFAS No. 142 had taken effect in 2001, operating income for the quarter and nine months ended September 30, 2002 would have decreased \$216,000 or 3.2% and \$433,000 or 2.2%, respectively, compared with the same periods in 2001. If SFAS No. 142 had taken effect in 2001, net income for the quarter and nine months ended September 30, 2002 would have increased \$47,000 or 1.2% and \$39,000 or 0.4%, respectively, compared with the same periods in 2001.

EBITDA(1) increased \$381,000 or 3.9% for the three months ended September 30, 2002 and \$1,530,000 or 5.4% for the nine months ended September 30, 2002 compared with the same periods in 2001. The EBITDA(1) margin for this sector was 45.4% and 46.2% for the three months and nine months ended September 30, 2002, respectively, compared to 47.1% and 44.9% for the same periods in 2001. The increase in EBITDA and EBITDA margin was primarily due to the increase in revenues, partially offset by the increases in operating expenses.

**INFORMATION SOLUTIONS** The following table provides a breakdown of the Information Solutions Sector operating results.

#### INFORMATION SOLUTIONS

(Dollars in Thousands)	For Three Months Ended		For Nine Months Ended	
	9/30/02	9/30/01	9/30/02	9/30/01
Revenues Before Intersegment Eliminations				
Unaffiliated Customers	\$ 981	\$ 1,207	\$ 3,064	\$ 3,150
Intersegment	1,062	1,206	2,921	3,751
	2,043	2,413	5,985	6,901
Operating Expenses, excluding Depr. and Amort.	2,124	2,092	6,130	5,520
Depreciation and Amortization	519	396	1,548	596
Operating Income/(Loss)	\$ (600)	\$ (75)	\$ (1,693)	\$ 785
Net Income/(Loss)	\$ (421)	\$ (83)	\$ (1,143)	\$ 397
Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA)(1)	\$ (81)	\$ 321	\$ (145)	\$ 1,381
Capital Expenditures	\$ 658	\$ 99	\$ 1,866	\$ 1,168

Operating revenues from unaffiliated customers for the three months ended September 30, 2002 decreased \$226,000 or 18.7% compared with the same period in 2001. Operating revenues from unaffiliated customers for the nine months ended September 30, 2002 decreased \$86,000 or 2.7% compared with the same period in 2001. The decrease in operating revenues for the third quarter was due to the recognition of \$165,000 of revenue during the third quarter of 2001 related to one-time processing of certain billing information for a new customer. For the first nine months of 2002, this decrease in operating revenues was partially offset by the impact of new customer relationships for monthly batch processing services, as well as the implementation of the predecessor to SuiteSolution called WRITE2K by a new customer.

Operating expenses excluding depreciation and amortization increased \$32,000 or 1.5% for the three months ended September 30, 2002 and \$610,000 or 11.1% for the nine months ended September 30, 2002 compared with the same periods in 2001. This sector capitalized internal development costs associated with SuiteSolution during 2001. The capitalization of these costs ended during the third quarter of 2001 as the development of SuiteSolution had reached the point where the product was available for release to customers. As a result of development costs for SuiteSolution no longer being capitalized, operating expenses for this sector were higher in the first nine months of 2002 as development personnel were deployed on routine operating and implementation duties.

Depreciation and amortization increased \$123,000 or 31.1% for the three months ended September 30, 2002 and \$952,000 or 159.7% for the nine months ended September 30, 2002 compared with the same periods in 2001. Depreciation expense for the three months ended September 30, 2002 was \$112,000 higher than the three months ended September 30, 2001. Depreciation expense for the nine months ended September 30, 2002 was \$520,000 higher than the nine months ended September 30, 2001. The increase was due to depreciation expense recorded on capitalized leases for new computer equipment and depreciation expense recorded on other capital expenditures related to equipment acquired in support of the development and implementation of SuiteSolution. Amortization expense for the three months ended September 30, 2002 was \$10,000 higher than the three months ended September 30, 2001. Amortization expense for the nine months ended September 30, 2002 was \$431,000 higher than the nine months ended September 30, 2001. The increase was due to the amortization of capitalized SuiteSolution development costs, which began in the third quarter of 2001.

Operating income decreased \$525,000 or 700.0% for the three months ended September 30, 2002 and \$2,478,000 or 315.7% for the nine months ended September 30, 2002 as compared to the same periods in 2001. Net income decreased \$338,000 or 407.2% for the three months ended September 30, 2002 and \$1,540,000 or 387.9% for the nine months ended September 30, 2002 compared to the same periods in 2001. The decrease in operating income and net income was primarily attributable to the decrease in operating revenues and the increase in operating expenses, including depreciation and amortization.

EBITDA(1) decreased \$402,000 or 125.2% for the quarter ended September 30, 2002 and \$1,526,000 or 110.5% for the nine months ended September 30, 2002 compared with the same periods in 2001. The EBITDA(1) margin for this sector was (4.0%) for the quarter ended September 30, 2002 compared to 13.3% for the same quarter in 2001. The EBITDA(1) margin for this sector was (2.4%) for the nine months ended September 30, 2002 compared to 20.0% for the same period in 2001. The decrease in EBITDA and the EBITDA margin was primarily due to decreased operating revenues and increased operating expenses.

**ENTERPRISE SOLUTIONS** The following table provides a breakdown of the Enterprise Solutions Sector operating results.

**ENTERPRISE SOLUTIONS**

(Dollars in Thousands)	For Three Months Ended		For Nine Months Ended	
	9/30/02	9/30/01	9/30/02	9/30/01
Revenues Before Intersegment Eliminations				
Installation	\$ 3,352	\$ 3,339	\$ 6,008	\$ 8,745
Service	1,905	2,140	5,647	6,735
	5,257	5,479	11,655	15,480
Cost of Sales	3,688	3,866	7,905	10,503

# Edgar Filing: HICKORY TECH CORP - Form 10-Q

Operating Expenses, excluding Depr. and Amort.	1,222		1,272		3,718		3,871
Depreciation and Amortization	65		91		201		264
Operating Income/(Loss)	\$ 282	\$	250	\$	(169)	\$	842
Net Income/(Loss)	\$ 157	\$	137	\$	(129)	\$	466
Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA)(1)	\$ 347	\$	341	\$	32	\$	1,106
Capital Expenditures	\$	\$	107	\$	55	\$	197

Operating revenues decreased \$222,000 or 4.1% for the three months ended September 30, 2002 and \$3,825,000 or 24.7% for the nine months ended September 30, 2002 compared with the same periods in 2001. Sales volumes in the 2002 are down in this sector compared to 2001. Installation revenue was 0.4% higher for the three months ended September 30, 2002 and 31.3% lower for the nine months ended September 30, 2002 compared with the same periods in 2001. The decrease in installation revenue for the first nine months of 2002 was primarily a result of a decrease in sales and installations of PBX and small business systems of 38.8%. Service revenue was 11.0% lower for the three months ended September 30, 2002 and 16.2% lower for the nine months ended September 30, 2002 compared with the same periods in 2001. This sector has encountered across the board reductions in demand in all of its major products and services. The reduction occurred in early 2002, and is believed to be associated with the economy's effect on customers of this sector, and due to the changing of technology (i.e. voice vs. data protocol) in the communications products which this sector provides. These factors appear to be affecting the industry and not merely this sector in any unique way. It is unknown when customer demand for these products and services may return to historical levels. This sector did experience an increase in its installation revenues during the third quarter of 2002 due to revenues related to a significant voice over Internet Protocol network HickoryTech is installing in the corporate offices of a large specialty retailer. This contract represents what is expected to be the largest single-campus telecommunication deployment in the United States this year and added significant revenues to Enterprise Solutions in the third quarter of 2002. As of September 30, 2002, this contract was estimated to be approximately 65% completed.

Cost of sales decreased \$178,000 or 4.6% for the three months ended September 30, 2002 and \$2,598,000 or 24.7% for the nine months ended September 30, 2002 compared with the same periods in 2001. Gross profit margin for this sector for the three months and nine months ended September 30, 2002 was 29.8% and 32.2%, respectively, as compared to 29.4% and 32.2% for the same periods in 2001. The decrease in cost of sales was in line with the decrease in operating revenues in this sector.

Operating expenses excluding depreciation and amortization decreased \$50,000 or 3.9% for the three months ended September 30, 2002 and \$153,000 or 4.0% for the nine months ended September 30, 2002 compared with the same periods in 2001. This sector reduced its operating expenses through proactive management steps, such as workforce reductions.

Depreciation and amortization decreased \$26,000 or 28.6% for the three months ended September 30, 2002 and \$63,000 or 23.9% for the nine months ended September 30, 2002 compared with the same periods in 2001. Depreciation expense decreased \$4,000 for the three months ended September 30, 2002 and increased \$6,000 for the nine months ended September 30, 2002 compared with the same periods in 2001. Due to the implementation of SFAS No. 142, there was no amortization expense for the first nine months of 2002. If SFAS No. 142 had taken effect in 2001, then no amortization expense would have been recorded in 2001.

Operating income increased \$32,000 or 12.8% for the three months ended September 30, 2002 compared to the three months ended September 30, 2001. Operating income decreased \$1,011,000 to a loss of \$169,000 for the nine months ended September 30, 2002 compared to income of \$842,000 for the nine months ended September 30, 2001. Net income increased \$20,000 or 14.6% for the three months ended September 30, 2002 and decreased \$595,000 or 127.7% for the nine months ended September 30, 2002 compared with the same periods in 2001. The increase in operating and net income in the third quarter resulted from the decrease in operating expenses and depreciation and amortization described above. The decrease in operating and net income in the first nine months of 2002 as compared to the first nine months of 2001 resulted primarily from the decrease in operating revenues described above. If SFAS No.142 had taken effect in 2001, operating income would have increased \$10,000 for the three months ended September 30, 2002 and decreased \$1,080,000 for the nine months ended September 30, 2002 compared with the same periods in 2001. If SFAS No. 142 had taken effect in 2001, net income would have increased \$7,000 for the three months ended September 30, 2002 and decreased \$636,000 for the nine months ended September 30, 2002 compared with the same period in 2001. The decrease in operating income and net income for the first nine months of 2002 was attributable to the decrease in sales volumes.

EBITDA(1) increased \$6,000 or 1.8% for the three months ended September 30, 2002 and decreased \$1,074,000 or 97.1% for the nine months ended September 30, 2002 compared with the same periods in 2001. The EBITDA(1) margin for this sector was 6.6% for the quarter ended September 30, 2002 compared to 6.2% for the same quarter in 2001. The EBITDA(1) margin for this sector was 0.3% for the nine months ended September 30, 2002 compared to 7.1% for the nine months ended September 30, 2001. The decline in EBITDA and the EBITDA margin was primarily due to the decrease in operating revenues.

## **LIQUIDITY AND CAPITAL RESOURCES**

**CAPITAL STRUCTURE** The total long-term capital structure (long-term obligations plus shareholders' equity) for HickoryTech was \$244,360,000 at September 30, 2002, reflecting 34.2% equity and 65.8% debt. This compares to a capital structure of \$250,424,000 at December 31, 2001, reflecting 32.3% equity and 67.7% debt. Management believes adequate internal and external resources are available to finance ongoing operating requirements, including capital expenditures, business development, debt service and the payment of dividends for at least the next twelve months.

**CASH FLOWS** Cash provided by operations was \$22,825,000 for the nine-month period ended September 30, 2002 compared to \$15,586,000 for the nine-month period ended September 30, 2001. Cash flows from operations for the nine months ended September 30, 2002 and 2001 were primarily attributable to net income plus non-cash expenses for depreciation and amortization and a decrease in receivables. The increase in cash flows from operations in the first nine months of 2002 relative to the same period in 2001 was primarily due to a \$1,365,000 reduction in receivables and a \$2,218,000 provision for losses on accounts receivable during 2002 related primarily to bankruptcies of interexchange carriers, along with a \$1,038,000 increase in billings and costs on contracts during the first three quarters of 2001.

Cash flows used in investing activities were \$11,879,000 for the nine months ended September 30, 2002 compared to \$33,791,000 for the same period in 2001. Capital expenditures were \$12,222,000 during the first nine months of 2002 as compared to \$26,646,000 for the same period in 2001. Capital expenditures were incurred primarily to construct additional network facilities to provide CLEC services and continued buildout of the PCS network in the Telecom Sector. The level of capital expenditures in 2002 is lower than 2001 as part of HickoryTech's planned control of liquidity and debt reduction. Also included in cash flows used in investing activities for the nine months ended September 30, 2001 were additions to capitalized software development costs for the Information Solutions Sector's SuiteSolution billing product of \$2,695,000. Cash flows used in investing activities for the nine months ended September 30, 2001 also included cash paid for the acquisition of PCS licenses in southern Minnesota for \$11,399,000 and cash proceeds related to the sale of ACTC and other assets for \$6,949,000.

Cash flows used in financing activities were \$12,565,000 for the nine-month period ended September 30, 2002 compared to cash flows provided by financing activities of \$17,920,000 for the nine-month period ended September 30, 2001. Included in cash flows from financing activities are debt borrowings, debt repayments, and dividend payments. During the first nine months of 2002, HickoryTech made payments and had additional borrowings on its revolving credit facility of \$10,950,000 and \$2,200,000, respectively. During the first nine months of 2001, HickoryTech borrowed \$29,500,000 under its revolving credit facility to cover cash requirements, primarily for capital expenditures and the PCS acquisition, while it made payments of \$7,250,000 on its revolving credit facility. Dividend payments for the first nine months of 2002 were \$4,438,000 compared to \$4,584,000 for the same period in 2001.

WORKING CAPITAL Working capital was \$7,944,000 as of September 30, 2002, compared to working capital of \$13,737,000 as of December 31, 2001. The decrease is primarily due to the decreases in cash, accounts receivable and income taxes receivable. The ratio of current assets to current liabilities was 1.5:1.0 as of September 30, 2002 and 2.0:1.0 as of December 31, 2001.

LONG-TERM OBLIGATIONS - HickoryTech's long-term obligations as of September 30, 2002 were \$160,880,000, excluding current maturities of \$1,434,000. As of September 30, 2002, HickoryTech had a \$183,250,000 credit facility with a syndicate of banks. The credit facility is comprised of a \$125,000,000 revolving credit component

and a \$58,250,000 term loan component. The available line of credit on the \$125,000,000 revolving credit component decreases in increments beginning in March 2004 with a final maturity date in September 2008. The term loan component requires equal quarterly principal payments of \$250,000 during the period March 2001 to December 2008, \$23,000,000 of principal payments per quarter for the first two quarters in 2009 and \$6,000,000 in the third quarter 2009. The weighted average interest rate associated with this credit facility varies with LIBOR and certain other rates and was 4.37% at September 30, 2002. HickoryTech has implemented fixed interest terms on various portions of the overall debt outstanding for varying terms. The longest fixed interest term, on \$40,000,000 of the debt, is fixed until June 2003. As of September 30, 2002, HickoryTech had drawn \$161,250,000 on this credit facility and had \$22,000,000 of available credit. In April 2002, HickoryTech reduced its revolving credit facility by \$40,000,000 to its current level as of September 30, 2002. Management believes the remaining available credit is sufficient to cover future cash requirements.

HickoryTech's Information Solutions Sector leases certain computer equipment under capital lease arrangements. During the first three quarters of 2002, this sector recorded additions to property, plant and equipment of \$492,000 related to these capital lease arrangements.

The following table sets forth HickoryTech's contractual obligations, along with the cash payments due each period (long-term debt and capital lease payments do not include associated interest):

(Dollars in Thousands)	Total	Payments Due by Year			
		Remainder of 2002	2003 to 2005	2006 to 2007	2008 and after
Contractual Obligations					
Long-term Debt	\$ 161,250	\$ 250	\$ 18,500	\$ 61,375	\$ 81,125
Capital Lease Obligations	1,064	87	977		
Operating Leases	2,995	267	1,749	298	681
Total Contractual Cash Obligations	\$ 165,309	\$ 604	\$ 21,226	\$ 61,673	\$ 81,806

The total commitment to HickoryTech on its revolving credit facility expires as follows:

(Dollars in Thousands)	Total	Amount of Commitment Expiration per Year			
		Remainder of 2002	2003 to 2005	2006 to 2007	2008 and after
Revolving Credit Component	\$ 125,000	\$	\$ 37,500	\$ 59,375	\$ 28,125

**OTHER** - HickoryTech operates with original equity capital, retained earnings and recent additions to indebtedness in the form of bank term and revolving lines of credit. HickoryTech believes its current level of debt to total capital is acceptable for ongoing operations.

HickoryTech primarily uses variable interest rate financial instruments as of September 30, 2002. HickoryTech continually monitors the interest rates on its bank loans and has implemented fixed interest terms on various portions of the overall debt outstanding for varying terms. A lower level of interest expense is likely to occur because of a trend of reducing levels of debt and potentially lower weighted average interest rates.

## Edgar Filing: HICKORY TECH CORP - Form 10-Q

In November 2002, Hickory Tech began repurchasing its stock in over-the-counter trading under a previously announced repurchase plan. HickoryTech plans to fund the repurchase of its stock from cash flows from operations.

### **CRITICAL ACCOUNTING POLICIES**

This Form 10-Q is based upon HickoryTech's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America and, where applicable, conform to the accounting principles as prescribed by federal and state telephone utility regulatory authorities. A description of the critical accounting policies adhered to by HickoryTech is contained in the Management's Discussion and Analysis of Financial Condition and Results of Operations in HickoryTech's Annual Report on Form 10-K for the year ended December 31, 2001.

**RECENT ACCOUNTING DEVELOPMENTS**

HickoryTech adopted the provisions of SFAS No. 142, Goodwill and Other Intangible Assets, effective January 1, 2002. SFAS No. 142 required that goodwill and intangible assets with indefinite useful lives no longer be amortized, but instead tested for impairment at least annually. Accordingly, at January 1, 2002, HickoryTech ceased amortizing its goodwill (net carrying value as of September 30, 2002 of \$25,086,000) and FCC licenses (net carrying value as of September 30, 2002 of \$75,635,000). HickoryTech tested these intangible assets for impairment at January 1, 2002 pursuant to the method prescribed by SFAS No. 142 and determined that these assets' carrying values were not impaired.

The following table adjusts previously reported net income to exclude amortization expense recognized from goodwill and FCC licenses as if SFAS No. 142 had taken effect in 2001:

<i>(Dollars in Thousands, except Per Share Amounts and shown Net of IncomeTax)</i>	<b>For Three Months Ended</b>		<b>For Nine Months Ended</b>	
	<b>9/30/02</b>	<b>9/30/01</b>	<b>9/30/02</b>	<b>9/30/01</b>
Reported Net Income	\$ 2,094	\$ 2,740	\$ 5,986	\$ 6,707
Goodwill Amortization		113		339
FCC License Amortization		258		779
Adjusted Net Income	\$ 2,094	\$ 3,111	\$ 5,986	\$ 7,825
Basic and Diluted Earnings Per Share:				
Reported Net Income	\$ 0.15	\$ 0.20	\$ 0.43	\$ 0.48
Goodwill Amortization		0.01		0.03
FCC License Amortization		0.02		0.06
Adjusted Net Income	\$ 0.15	\$ 0.23	\$ 0.43	\$ 0.57

Upon adoption at January 1, 2002, SFAS No. 142 also required HickoryTech to reassess the useful lives over which its other intangible assets are amortized. These useful lives were not changed as a result of this reassessment and, accordingly, these assets continue to be amortized over periods ranging from two to eight years.

HickoryTech also adopted the provisions of SFAS No. 144, Accounting for Impairment or Disposal of Long-Lived Assets. SFAS No. 144 requires that long-lived assets that are to be disposed of by sale be measured at the lower of book value or fair value less cost to sell and also sets forth requirements for recognizing and measuring impairment losses on certain long-lived assets to be held or used. The adoption of SFAS No. 144 had no impact on HickoryTech's financial position or its results of operations.

In June 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 143, Accounting for Asset Retirement Obligations, which addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets that result from the acquisition, construction, development or normal use of the asset. SFAS No. 143 is effective January 1, 2003. HickoryTech is currently evaluating the provisions of SFAS No. 143 and does not expect that adoption will have a material impact on its financial position or its results of operations.

## Edgar Filing: HICKORY TECH CORP - Form 10-Q

In April 2002, the FASB issued SFAS No. 145, Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections. SFAS No. 145 rescinds FASB Statement No. 4, Reporting Gains and Losses from Extinguishment of Debt, and an amendment of that Statement, FASB Statement No. 64, Extinguishments of Debt Made to Satisfy Sinking-Fund Requirements. SFAS No. 145 also rescinds FASB Statement No. 44, Accounting for Intangible Assets of Motor Carriers, and amends FASB Statement No. 13, Accounting for Leases. In June 2000, HickoryTech recorded an extraordinary loss of \$233,000, net of income tax benefit of \$158,000, as a result of an extinguishment of debt. Under SFAS No. 145, this extraordinary loss on debt extinguishment will be reclassified to operating expenses when HickoryTech adopts SFAS No. 145 in the first quarter of 2003.

In June 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit of Disposal Activities, which replaces Emerging Issues Task Force (EITF) Issue No. 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring). SFAS No. 146 requires companies to recognize costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. SFAS No. 146 is effective for, and HickoryTech will apply this new standard on, exit or disposal activities that are initiated after December 31, 2002.

### ITEM 3. QUANTATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

HickoryTech does not have operations subject to risks of foreign currency fluctuations, nor does HickoryTech use derivative financial instruments in its operations or investment portfolio. HickoryTech's earnings are affected by changes in interest rates as a portion of its long-term debt has variable interest rates based on LIBOR. If interest rates for the portion of HickoryTech's long-term debt based on variable rates had averaged 10% more for the entire quarter and nine months ended September 30, 2002, HickoryTech's interest expense would have increased \$183,000 for the three months ended September 30, 2002 and \$597,000 for the nine months ended September 30, 2002. In case of a change of such magnitude, management would likely act to mitigate its exposure to the change by converting a portion of its variable-rate debt to fixed-rate debt in even more aggressive timetables than it has already.

### ITEM 4. CONTROLS AND PROCEDURES

During the 90-day period prior to the date of this report, HickoryTech evaluated the effectiveness of the design and operation of the company's disclosure controls and procedures. This evaluation was conducted under the supervision and with the participation of HickoryTech's Chief Executive Officer and Chief Financial Officer. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective, in all material respects, to ensure that information required to be disclosed in the reports HickoryTech files and submits under the Exchange Act is recorded, processed, summarized and reported as and when required.

There have been no significant changes in HickoryTech's internal controls or in other factors which could significantly affect internal controls subsequent to the date of the evaluation. There were no significant deficiencies or material weaknesses identified in the evaluation and, therefore, no corrective actions were taken.

---

(1) EBITDA represents operating income plus depreciation and amortization expense. EBITDA margin represents EBITDA divided by total operating revenues before eliminations. EBITDA, which is not a measure of financial performance or liquidity under generally accepted accounting principles, is provided because such information is used by certain investors when analyzing the financial position and performance of HickoryTech and because EBITDA is a measure which HickoryTech uses to manage and monitor its own business plan. Because of the variety of methods used by companies and analysts to calculate EBITDA, and the fact that EBITDA calculations may not accurately measure a company's ability to meet debt service requirements, caution should be used in relying on any EBITDA presentation. HickoryTech sees value in disclosing its calculation of EBITDA for the financial community and in displaying the change in EBITDA. HickoryTech believes an increasing EBITDA depicts increased ability to attract financing and increased valuation of HickoryTech's business.

**CERTIFICATIONS**

I, John E. Duffy, certify that:

1. I have reviewed this quarterly report on Form 10-Q of HickoryTech;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
  - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
  - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
  - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):

a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
