Report of Independent Registered Public Accounting Firm

Audit Committee, Board of Directors and Stockholders

MGP Ingredients, Inc.

Atchison, Kansas

We have reviewed the accompanying condensed consolidated balance sheet of MGP Ingredients, Inc. as of December 31, 2006 and the related condensed consolidated statements of income for the three-month and six-month periods ended December 31, 2006 and 2005, and cash flows for the six-month periods ended December 31, 2006 and 2005. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of June 30, 2006 and the related consolidated statements of income, stockholders' equity and cash flows for the year then ended (not presented herein); and in our report dated August 22, 2006, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of June 30, 2006 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

MGP INGREDIENTS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Basis of Presentation.

The accompanying unaudited condensed consolidated financial statements reflect all adjustments that are, in the opinion of the Company's management, necessary to fairly present the financial position, results of operations and cash flows of the Company. Those adjustments consist only of normal recurring adjustments. The condensed consolidated balance sheet as of June 30, 2006 has been derived from the audited consolidated balance sheet of the Company as of that date. Certain information and note disclosures normally included in the Company's annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto in the Company's Form 10-K Annual Report for the fiscal year ended June 30, 2006 filed with the Securities and Exchange Commission. The results of operations for the period are not necessarily indicative of the results to be expected for the full year.

The Company's most recently completed fiscal year ended on June 30, 2006. On June 8, 2006 the Board of Directors amended the Company's Bylaws to effect a change in the fiscal year from a fiscal year ending June 30 to a 52/53 week fiscal year. The Company's 2007 fiscal year will end on July 1, 2007. As a result of this change, the first quarter of fiscal 2007 included one additional day than the first quarter of fiscal 2006 while the second quarter of fiscal 2007 includes one less day than the second quarter of fiscal 2006, the results of which are included in the accompanying condensed consolidated financial statements for the quarter and year to date ended December 31, 2006.

Note 2. Earnings Per Share.

Basic earnings per share data is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding for the period. Potentially dilutive instruments are stock options and unvested restricted stock awards. The following is a reconciliation from the weighted average shares used for the basic earnings per share computation to the shares used for the diluted earnings per share computation for each of the quarter and year-to-date periods ended December 31, 2006 and 2005.

	Quarter Ended December 31, 2006	December 31, 2005	Year to Date December 31, 2006	December 31, 2005
Weighted average shares:				
Basic Shares:	16,440,705	16,064,041	16,374,787	16,035,482
Additional weighted average shares attributable to:				
Stock options:	262,886	318,878	263,873	298,731
Unvested restricted stock awards:	261,948	283,118	263,924	267,429
Diluted Shares:	16,965,539	16,666,037	16,902,584	16,601,642

Note 3. Contingencies.

There are various legal proceedings involving the Company and its subsidiaries. Except as noted below, management considers that the aggregate liabilities, if any, arising from such actions would not have a material adverse effect on the consolidated financial position or operations of the Company.

The Company has been in negotiations with the Illinois Attorney General's Office and the Illinois Environmental Protection Agency (IEPA) to settle an enforcement proceeding related to emissions at the Pekin, Illinois location. The Company has reached a settlement with the IEPA. A Stipulation and Proposal for Settlement has been signed providing for a total payment by the Company of \$500,000, including a contribution to a state special project fund. The settlement proposal was submitted to the Illinois Pollution Control Board (the Board) for final judgment. The Board accepted and approved the settlement proposal on January 26, 2007. As of December 31, 2006, the Company has accrued \$500,000, which is included in other accrued liabilities, with respect to this matter.

9

Note 4. Operating Segments.

The Company is a fully integrated producer of ingredients and distillery products. Products included within the ingredients segment consist of starches, including commodity wheat starch and modified and specialty wheat and potato starches, proteins, including commodity wheat gluten, specialty wheat, soy and other proteins, and mill feeds. Distillery products consist of food grade alcohol, including beverage alcohol and industrial alcohol, fuel alcohol, commonly known as ethanol, and distiller's grain and carbon dioxide, which are by-products of the Company's distillery operations.

The operating profit for each segment is based on net sales less identifiable operating expenses. Interest expense, investment income and other general miscellaneous expenses have been excluded from segment operations and classified as Corporate. Receivables, inventories and equipment have been identified with the segments to which they relate. All other assets are considered as Corporate.

Corporate	38,003	35,370
Total	\$ 217,369	\$ 204,584

Note 5. Pension and Post Retirement Benefit Obligations.

The Company and its subsidiaries provide certain post-retirement health care and life benefits to all employees. The liability for such benefits is unfunded. The Company uses a May 31 measurement date for the plan

The components of the Net Periodic Benefit Cost for the quarter and year to date periods ended December 31, 2006 and 2005, respectively, are as follows:

(in thousands)	Quarter Ended December 31, 2006	December 31, 2005	Year to Date December 31, 2006	December 31, 2005
Service cost	\$ 61	\$ 74	\$ 122	\$ 148
Interest cost	115	74	230	148
Prior service cost	(9)	(9)	(18)	(18)
(Gain) loss	9		16	
Total post-retirement benefit cost	\$ 176	\$ 139	\$ 350	\$ 278

The Company previously disclosed in its financial statements for the year ended June 30, 2006, amounts expected to be paid to plan participants. There have been no revisions to these estimates and there have been no changes in the estimate of total employer contributions expected to be made for the fiscal year ended July 1, 2007.

Total employer contributions for the quarter ended December 31, 2006 were \$195,000.

The Medicare Prescription Drug Improvement Modernization Act of 2003 (the Act) provides certain drug benefits under Medicare Part D, as well as a federal subsidy to sponsors of retiree health care benefit plans that provide benefits at least actuarially equivalent to Medicare Part D. The Company has been unable to conclude whether the benefits provided under the plan are actuarially equivalent to Medicare Part D. Accordingly, the net periodic post-retirement benefit costs above do not reflect any amount associated with the subsidiary.

Note 6. 4.90% Industrial Revenue Bond Obligation.

On December 28, 2006, the Company engaged in an industrial revenue bond transaction with the City of Atchison, Kansas pursuant to which the City (i) under a trust indenture, (the Indenture), issued \$7.0 million principal amount of its industrial revenue bonds (the Bonds) to the Company and used the proceeds thereof to acquire from the Company its newly constructed office building and technical center in Atchison, Kansas, (the Facilities) and (ii) leased the Facilities back to the Company under a capital lease (the Lease). The bonds mature on December 1, 2016 and bear interest, payable annually on December 1st of each year commencing December 1st, 2007 at the rate of 4.90% per annum. Basic rent under the lease is payable annually on December 1st in an amount sufficient to pay principal and interest on the bonds. The Indenture and Lease contains certain

provisions, covenants and restrictions customary for this type of transaction. In connection with the transaction, the Company agreed to pay the city an administrative fee of \$50,000 payable over 10 years.

In connection with the foregoing transaction, the Company also entered a Fifth Amendment to its Line of Credit Loan Agreement with Commerce Bank excluding the application of specified sections of the Line of Credit Loan Agreement to the transaction.

The purpose of the transaction was to facilitate certain property tax abatement opportunities available to the Company related to the newly constructed Facilities. The Company will be eligible to apply for 10 years property tax abatement on the facilities acquired with bond proceeds. These property tax abatements terminate upon maturity of the Bonds on December 1st, 2016. The issuance of the Bonds is integral to the tax abatement process. Financing for the Facilities has been provided internally from the Company's operating cash flow. Accordingly, upon consummation of the transaction and issuance of the Bonds, the Company acquired all bonds issued for \$7.0 million excluding transaction fees. As a result, the Company holds all of the outstanding Bonds. It is management's intention to hold these bonds to their maturity. Because the Company holds all outstanding bonds, management considers the debt *de-facto* cancelled and, accordingly, no amount for these Bonds is reflected as debt outstanding on the Balance Sheet as of December 31, 2006.

Note 7. Recently Issued Accounting Pronouncements.

In June 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income taxes (FIN 48). FIN 48, which is an interpretation of SFAS No. 109, Accounting for Income Taxes, provides guidance on the manner in which tax positions taken or to be taken on tax returns should be reflected in an entity's financial statements prior to their resolution with taxing authorities. The Company is required to adopt FIN 48 during the first quarter of fiscal 2008. The Company is currently evaluating the requirements of FIN 48 and has not yet determined the impact, if any; this interpretation may have on its consolidated financial statements.

In September 2006, the FASB released SFAS Statement No. 158 (SFAS 158), *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132(R)*. SFAS 158 requires the Company to recognize in its statement of financial position an asset for a defined benefit postretirement plan's overfunded status or a liability for a plan's underfunded status. This section of the standard is effective for the Company as of the end of its fiscal year on July 1, 2007. The statement also eliminates the option of using a measurement date prior to the Company's fiscal year-end effective June 28, 2009. SFAS 158 provides two methods for transition to a fiscal year-end measurement date, both of which are to be applied prospectively. Under the first approach, plan assets are measured on May 31, 2008 and then re-measured on June 30, 2008 (the first day of the fiscal year ended June 28, 2009). Under the second approach, a 13-month measurement will be determined on May 31, 2008 that will cover the period until the fiscal year-end measurement is required on June 28, 2009. The Company currently uses a measurement date prior to its fiscal year-end and is currently evaluating which measurement transition alternative it will use. SFAS 158 is not expected to have a material impact on the Company's results of operations, financial condition, liquidity or compliance with debt covenants.

Item 2. Management's Discussion and Analysis of FINANCIAL Condition and Results of Operations.

Forward-Looking Statements

This section contains forward-looking statements as well as historical information. All statements, other than statements of historical facts, included in this Quarterly Report on Form 10-Q regarding the prospects of our industry and our prospects, plans, financial position and business strategy may constitute forward-looking statements. In addition, forward-looking statements are usually identified by or are associated with such words as intend, plan, believe, estimate, expect, anticipate, hopeful, should, may, will, could and or the negatives of these words or variations of them or similar terminology. They reflect management's current beliefs and estimates of future economic circumstances, industry conditions, Company performance and financial results and are not guarantees of future performance. All such forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement. Important factors that could cause actual results to differ materially from our expectations include, among others: (i) the availability and cost of grain, (ii) fluctuations in gasoline prices, (iii) fluctuations in energy costs, (iv) competitive environment and related market conditions, (v) our ability to realize operating efficiencies, (vi) the effectiveness of our hedging programs, (vii) access to capital and (ix) actions of governments. For further information on these and other risks and uncertainties that may affect our business, see *Item 1A. Risk Factors* of our Annual Report on Form 10-K for the fiscal year ended June 30, 2006.

Results of Operations

General

Reference is made to *Management's Discussion and Analysis of Financial Condition and Results of Operations - General*, incorporated by reference to Item 7 of our Annual Report on Form 10-K for the fiscal year ended June 30, 2006 for certain general information about our principal products and costs.

Critical Accounting Policies

Reference is made to *Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies*, incorporated by reference to Item 7 of our Annual Report on Form 10-K for the fiscal year ended June 30, 2006 for accounting policies which are considered by management to be critical to an understanding of the Company's financial statements.

Developments in the Ingredients Segment

A previously reported loss of sales to a major pet industry customer is the primary reason for the decline in our ingredient sales. Sales of specialty ingredients for food applications were also lower compared to the second quarter a year ago, due principally to lower unit sales of both specialty proteins and starches combined with a slight decline in specialty starch prices. Selling prices for specialty proteins averaged higher than a year ago.

Recently, we have taken steps to size the ingredients portion of our business, particularly in the food area, to more appropriately align with current production and sales requirements. These steps have included adjustments in the size of our workforce across multiple disciplines within our organization. We are also concentrating our production and marketing efforts on supplying our core base of loyal customers with a more select array of high quality, premium ingredients that address nutritional, sensory and convenience

issues and that can help build value while making more efficient use of our existing capacities. We continue to step up our research and development efforts and are revamping the responsibilities of our technical applications scientists, who in the future will perform a significantly more integral role as solutions providers to our customers. We are putting more focus on fewer core products, specifically Fibersym®, Arise®, Wheatex®, and FiberRite RW.

Developments in the Distillery Products Segment

During the second quarter of fiscal 2007, we implemented measures to strengthen alcohol production efficiencies. These measures improved our capacity and permitted higher throughput, which contributed to distillery profits in the quarter. The capacity improvements were part of a previously announced plan to incrementally expand our alcohol production capacity by approximately 15 percent. Complete phase-in of this plan is scheduled to occur by late this summer at a total projected investment of \$10 million.

Segment Results

The following is a summary of revenues and pre-tax profits/(loss) allocated to each reportable operating segment for the quarterly and year-to-date periods ended December 31, 2006 and 2005.

(in thousands)	Quarter Ended December 31, 2006	December 31, 2005	Year to Date December 31, 2006	December 31, 2005
Ingredients				
Net Sales	\$ 15,963	\$ 22,012	\$ 31,953	\$ 44,462
Pre-Tax Income (Loss)	(4,575)	(2,174)	(8,137)	(2,393)
Distillery products				
Net Sales	\$ 71,682	53,659	\$ 140,687	108,255
Pre-Tax Income (Loss)	15,978	3,856	31,220	10,805

GENERAL

Our total earnings in the second quarter of fiscal 2007 increased significantly compared to the second quarter of fiscal 2006 as the result of increased profitability in our distillery products segment, which more than offset a loss in our ingredients segment. Our profit performance in the ingredients segment was adversely affected by reduced sales of certain of our higher valued specialty ingredients for non-food applications, principally in the pet area along with higher raw material prices for wheat compared to the prior year's second quarter.

The increase in total sales revenue compared to the prior year's second quarter resulted from increased sales in the distillery products segment. Distillery products sales rose by approximately \$18 million, or 34 percent, above distillery products sales in the second quarter of fiscal 2006. Sales of ingredients, on the other hand, decreased by approximately \$6 million, or 27 percent, compared to a year ago.

The increase in distillery products sales resulted from higher unit sales and improved selling prices for both fuel grade and food grade alcohol over the comparable period in the prior year. However, the average selling price of fuel alcohol was lower in the current quarter than in the first quarter of fiscal 2007. Sales of distillers feed, the principal by-product of our alcohol production process, also increased compared to the prior year's second quarter due to an improvement in selling prices, which offset slightly lower unit sales. A significant percentage of our fuel grade alcohol sales are made pursuant to contracts

ranging from six to nine months duration. In line with this practice, at April 1, 2006 we had contracted a sizeable portion of our total current alcohol capacity to customers in the fuel alcohol area through the end of calendar 2006. These contracts were at prices similar to prices in the fourth quarter of fiscal 2006.

The decrease in ingredients sales principally resulted from lower sales of specialty ingredients for both food and non-food applications. Sales of commodity ingredients increased compared to the prior year's second quarter mainly due to higher sales of commodity wheat gluten, which more than offset lower sales of commodity starch.

The decline in sales of specialty ingredients for non-food applications resulted primarily from decreased sales of our MGPI Chewtex line of protein- and starch-based resins, which are produced for use in the manufacture of pet chews and related treats. Sales of ingredients for use in personal care products also decreased compared to the prior year's second quarter. The decline in sales of specialty ingredients for food applications was principally due to lower unit sales of our specialty starches and specialty proteins. However, while the average selling price for specialty starches was just slightly lower than during the second quarter of fiscal 2006, the average selling price for specialty proteins experienced an increase. The increase in sales of commodity gluten was due to higher unit sales and improved prices. The reduction in commodity starch sales revenue was due to lower unit sales, as the average selling price was higher than a year ago.

INGREDIENTS

Total ingredient sales in the second quarter of fiscal 2007 decreased by approximately \$6 million, or approximately 27 percent, compared to the prior year's second quarter. This principally was due to a \$3.3 million, or 58 percent, reduction in sales of specialty ingredients for non-food food applications, and a \$3.0 million, or approximately 24 percent, decline in sales of specialty ingredients for food applications. Sales of commodity ingredients rose by approximately \$170,000, or 6 percent. This was due to a \$243,000, or 12 percent, increase in sales of commodity gluten, which was partially offset by a \$73,000, or 7 percent decline in sales of commodity starch. Sales of mill feed and other mill products increased by \$88,000, or 15 percent. The decrease in sales of specialty ingredients for non-food applications principally occurred in sales of our Chewtex® protein- and starch-based resins for use in pet industry products due to loss of sales to a major customer. The decrease in sales of specialty ingredients for food applications compared to the prior year's second quarter mainly occurred as a result of lower unit sales of our Fibersym® and Pregel lines of specialty starches and Arise® wheat protein isolates. Sales of our Wheatex® textured wheat proteins increased compared to a year ago due to improved pricing, which offset lower unit sales.

DISTILLERY PRODUCTS

Total sales of our distillery products in the second quarter of fiscal 2007 rose by approximately \$18 million, or 34 percent, compared to the second quarter of fiscal 2006. This improvement was due to a \$9.5 million, or 32 percent, increase in sales of fuel grade alcohol and a \$7.8 million, or 45 percent, increase in sales of food grade alcohol. In the food grade area, sales of alcohol for industrial applications rose by \$6.9 million, or 55 percent, and sales of food grade alcohol for beverage applications rose by approximately \$1 million, or 19 percent, in each case due to a combination of higher prices and increased unit sales. The increased sales of fuel grade alcohol also resulted from higher average selling prices and higher unit sales. Distillers feed sales increased by approximately \$690,000, or nearly 10 percent, as a result of higher selling prices.

SALES

Net sales in the second quarter of fiscal 2007 increased by \$11.9 million, or 16 percent, above net sales in the second quarter of fiscal 2006. This improvement was due to increased distillery products sales. Ingredients sales decreased compared to the prior year. The increase in distillery products sales resulted from higher unit sales and prices for food grade alcohol for industrial and beverage applications combined with increased unit sales and prices for fuel grade alcohol and higher prices for distillers grain. The decrease in ingredients sales principally resulted from reduced unit sales of specialty ingredients for food and non-food applications together with lower unit sales of commodity starches.

For the first six months of fiscal 2007, net sales increased by \$19.9 million, or 13 percent, above net sales for the first six months of fiscal 2006. This improvement was due to increased distillery products sales in both the first and second quarters of fiscal 2006. Sales of ingredients decreased in both the first and second quarters compared to the same periods the prior year. The increase in distillery products sales resulted from higher unit sales and prices for fuel grade alcohol, food grade alcohol and distillers feed. The decline in ingredients sales was due to reduced sales of specialty ingredients for both food and non-food applications, together with a slight decline in sales of commodity ingredients. Lower sales of specialty ingredients for food applications was mainly attributable to decreased unit sales of both specialty starches and proteins, which offset higher specialty protein selling prices. Selling prices for specialty starches were slightly lower than prices experienced during the first six months of fiscal 2006. The reduction in sales of commodity ingredients was mainly due to lower unit sales of commodity gluten and starches. However, selling prices for both commodity gluten and starches averaged higher in the first six months of fiscal 2007 compared to the first six months of the prior fiscal year.

COST OF SALES

The cost of sales in the second quarter of fiscal 2007 rose by approximately \$1.4 million, or nearly 2 percent, over cost of sales in the second quarter of fiscal 2006. This increase was mainly due to higher grain costs and higher costs of supplies used in our manufacturing processes, largely offset by a decrease in energy costs related to lower natural gas prices. Additionally, the increase was a function of higher depreciation expense resulting from a higher depreciable asset base due to certain assets being placed in service in the prior fiscal year. The higher costs of manufacturing-related grain and supplies were primarily due to increased prices. Wheat prices were approximately 27 percent higher than those experienced in the second quarter of fiscal 2006. Wheat costs were not hedged in either the second quarter of fiscal 2007 or 2006. The per-bushel cost of corn, adjusted for the impact of our hedging practices, averaged nearly 25 percent higher compared to a year ago. For the second quarter of fiscal 2007, the cost of natural gas, adjusted for the impact of our hedging practices, decreased approximately 30 percent compared to the same period the prior year.

The cost of sales for the first six months of fiscal 2007 increased by approximately \$6.6 million, or nearly 5 percent, compared to the first six months of fiscal 2006 as a result of the same factors cited above in relation to the second quarter of fiscal 2007. For the first six months of fiscal 2007, the per-bushel cost of wheat, adjusted for the impact of our hedging practices, averaged nearly 31 percent higher compared to a year ago. The per-bushel cost of corn, adjusted for the impact of our hedging practices, averaged nearly 15 percent higher compared to a year ago. The cost of natural gas, adjusted for the impact of our hedging practices, decreased approximately 22 percent compared to the same period the prior year.

In connection with the purchase of raw materials, principally corn and wheat, for anticipated operating requirements, we enter into commodity contracts to hedge the risk of future grain price increases. During the second quarter of fiscal 2007, we hedged approximately 35 percent of corn processed compared with approximately 42 percent of corn processed in the second quarter of fiscal 2006. No wheat was hedged in

either the second quarter of fiscal 2007 or 2006. During the first six months of fiscal 2007, we hedged approximately 41 percent of corn processed compared with approximately 39 percent of corn processed in the first six months of fiscal 2006. Of the wheat that we processed, 6 percent was hedged in the first six months of fiscal 2007 compared with 0 percent hedged in the first six months of fiscal 2006.

Raw material costs in the second quarter of fiscal 2007 included a net hedging gain of approximately \$2.0 million compared to a net hedging loss of \$714,000 in the second quarter of fiscal 2006.

In the first six months of fiscal 2007, raw material costs included a net hedging loss of approximately \$26,000 compared to a net hedging loss of approximately \$1,348,000 in the first six months of fiscal 2006. During the first six months of fiscal 2007, we experienced no losses on ethanol futures, compared to loss of \$24,000 on ethanol futures during the first six months of the prior fiscal year.

These hedge transactions are highly effective. Accordingly, nearly all related losses were entirely offset by reduced raw materials costs.

SELLING, GENERAL AND ADMINISTRATIVE EXPENSES

Selling, general and administrative expenses in the second quarter of fiscal 2007 increased by approximately \$70,000, or approximately 1 percent, compared to selling, general and administrative expenses in the second quarter of fiscal 2006. This increase was mainly due to costs related to the implementation of our Enterprise Resource Planning system, increased research and development expenditures and increases in other salaries and compensation.

Selling, general and administrative expenses in the first six months of fiscal 2007 decreased by approximately \$800,000 compared to the same period in fiscal 2006. Increased costs related to the implementation of our Enterprise Resource Planning system, increased research and development expenditures and increases in other salaries and compensation were offset by reduced salary and management incentive costs. Additionally, during the year-to-date period ended December 31, 2005, the Company accrued costs related to the unvested portion of its stock option incentive plan of approximately \$320,000. During the year-to-date period ended December 31, 2006, these costs were minimal as all outstanding stock options have vested

OTHER INCOME

Other income decreased approximately \$321,000 and \$77,000 in the quarter and year-to-date periods ended December 31, 2006, respectively, compared to the same periods of fiscal 2006. These decreases were principally attributable to changes in interest capitalized as well as the effect of certain other non-recurring, non-operating revenue items. It is our practice to credit other income for interest incurred that is capitalized.

INTEREST EXPENSE

Interest expense in the quarter and year-to-date period ended December 31, 2006 decreased compared to the same prior year periods. These decreases were primarily due to the impact of a make-whole premium paid in the first quarter of fiscal 2006 related to the refinancing of our notes with the Principal Mutual Life Insurance Company. Additionally, we maintained lower balances on our outstanding debt during the quarter and year-to-date period ended December 31, 2006.

TAXES AND INFLATION

For the quarter ended December 31, 2006, our income tax provision was \$4.5 million for an effective rate of 39.8 percent compared to a provision of \$418,000 for the quarter ended December 31, 2005 for an effective rate of 33.8 percent. For the year-to-date period ended December 31, 2006, our income tax provision was \$8.4 million for an effective rate of 37.7 percent compared to a provision of \$2.9 million for the year-to-date period ended December 31, 2005 for an effective rate of 38.8 percent.

During the quarter ended December 31, 2006, management reassessed and revised the methodology for deriving applicable deferred tax rates related to valuing deferred tax assets and liabilities. As a result, we recorded a one-time \$450,000 adjustment to deferred tax expense to reflect the impact of this assessment. Excluding this one-time adjustment, our effective rate was 35.9 percent and 35.7 percent for the quarter and year-to-date periods ended December 31, 2006.

As of December 31, 2006, we had approximately \$1.1 million in unused Kansas State Income Tax Credits (tax credits) related to capital investments we have made at our Atchison, Kansas facility. These tax credits are available for use through June 30, 2015 and are contingent upon meeting certain criteria related to job training as well as wages paid relative to industry standards. Additionally, application of these tax credits is contingent upon having sufficient taxable income in the state of Kansas. It is our policy to take advantage of tax benefits whenever they are available. We recognize these tax credits within our tax provision as these criteria are substantially satisfied.

NET INCOME

As the result of the foregoing factors, we experienced net income of \$6,835,000 in the second quarter of fiscal 2007 compared to net income of \$818,000 in the second quarter of fiscal 2006. Our net income for the first six months of fiscal 2007 was \$13,811,000 compared to net income of \$4,549,000 for the first six months of fiscal 2006.

LIQUIDITY AND CAPITAL RESOURCES

The following table is presented as a measure of our liquidity and financial condition: (Dollars in thousands)

	December 31, 2006	June 30, 2006
Cash and cash equivalents	\$ 10,479	\$ 14,495
Working capital	56,205	44,469
Amounts available under lines of credit	20,000	20,000
Notes payable and long-term debt	14,373	16,151
Stockholders' equity	146,874	134,912

Cash Flow information

Summary cash flow information follows for the year-to-date periods ended December 31, 2006 and 2005, respectively: (Dollars in thousands)

	Year-to-Date December 31, 2006	December 31, 2005
Cash flows provided by (used for):		
Operating activities	\$ 10,095	\$ 5,747
Investing activities	(9,194)	(11,213)
Financing activities	(4,917)	(1,147)
Increase (decrease) in cash and cash equivalents	(4,016)	(6,613)
Cash and cash equivalents at beginning of year	14,495	10,384
Cash and cash equivalents at end of year	\$ 10,479	\$ 3,771

During the year-to-date period ended December 31, 2006, our consolidated cash decreased \$4,016,000 compared to a decrease of \$6,613,000 during the year-to-date period ended December 31, 2005. This net improvement in cash flow was a result of improved operating cash flows and reduced capital expenditures. These factors, which led to an overall improvement in cash flow versus the same period in fiscal 2006, were partially offset by increased financing cash outflow primarily related to the purchase of treasury stock and a higher dividend payment. The principal sources of cash are operating cash flow, proceeds from stock plans and the issuance of long-term debt. Principal uses of cash are capital expenditures, payment of debt and the payment of dividends.

Operating Cash Flows. Summary operating cash flow information for the year-to-date periods ended December 31, 2006 and 2005, respectively, is as follows: (Dollars in thousands):

	Year-to-Date Ended December 31, 2006	December 31, 2005
Net income	\$ 13,811	\$ 4,549
Depreciation	6,993	6,011
Gain on sale of assets	(3)	(14)
Deferred income taxes	1,974	(299)
Changes in working capital items:		
Segregated cash and investments	(855)	
Accounts receivable	(3,664)	(4,565)
Inventories	(4,937)	(5,781)
Accounts payable and accrued expenses	2,295	4,535
Deferred revenue	(765)	(788)
Income taxes payable	(2,596)	3,190
Other	(2,158)	(1,091)
Net cash provided by operating activities	\$ 10,095	\$ 5,747

Cash flow from operations for the year-to-date period ended December 31, 2006 increased \$4,348,000 to \$10,095,000 from \$5,747,000 for the year-to-date period ended December 31, 2005. This improvement in operating cash flow was primarily attributable to the increase in net income of \$9,262,000 and increases in deferred income taxes. These factors, which served to increase operating cash flow, were partially

offset by cash outflows for segregated cash and investments related to our hedge trading accounts as well as increases in inventory and reductions to income taxes payable. The increase in inventory resulted primarily from higher prices for grain. Additionally, operating cash flow was impacted by the timing of cash receipts and disbursements resulting in increases in accounts receivable, increases in accounts payable and accrued expenses as well as the pre-payment of certain expenses in the year-to-date period ended December 31, 2006.

Investing Cash Flows. Net investing cash outflow was \$9,194,000 for the year-to-date period ended December 31, 2006 compared to \$11,213,000 for the year-to-date period ended December 31, 2005. During the year-to-date period ended December 31, 2006, we made \$9,281,000 in capital expenditures, including expenditures relating to distillery expansion at our Atchison plant, the acquisition of feed dryers at our Pekin plant; injection molding and packaging equipment at the Kansas City facility, equipment to improve the efficiency of our alcohol production facilities at Pekin as well as construction costs related to our new corporate headquarters and tech center in Atchison. The effect of these capital expenditures was partially offset by the sale of certain equipment and vehicles of \$87,000.

Financing Cash Flows. Net Financing cash outflow for the year-to-date period ended December 31, 2006, was \$4,917,000 compared to \$1,147,000 for the year-to-date period ended December 31, 2005. During the year-to-date period ended December 31, 2006, we used cash flows from operations to make principal payments on debt of \$1,778,000. No other debt activity occurred during this period. During the year-to-date period ended December 31, 2005, we borrowed \$7,000,000 from General Electric Capital Corporation (GECC) and used those proceeds to pay the unsecured notes payable to The Principal Mutual Life Insurance Company of \$6,816,000. We used cash flows from operations to make principal payments on debt of \$3,681,000. Additionally, we drew \$4,000,000 on our line of credit for operating purposes. As a result, net cash inflows related to debt transactions in the year-to-date period ended December 31, 2005 were \$503,000.

During the year-to-date period ended December 31, 2006, we used cash flows from operations of \$1,938,000 to purchase 80,500 shares of our common stock at an average price of approximately \$24.09 per share in connection with elections by employees to surrender shares to pay withholding taxes on 230,000 shares of restricted stock that had vested and had been awarded to the participants of the Company's long-term incentive plan. We also used cash flows from operations to pay dividends of \$3,343,000.

These factors were partially offset by proceeds from stock plans related to the exercise of outstanding stock options and tax benefits related to the restricted stock awards of \$2,142,000.

We did not purchase any shares of our common stock as part of any publicly announced plans or programs during the year-to-date period ended December 31, 2006. As of December 31, 2006, the Board has authorized the purchase of approximately 1,626,000 additional shares of our common stock.

CONTRACTUAL OBLIGATIONS.

As of December 31, 2006, the amount of long-term debt was \$14,373,000 compared to \$16,151,000 at June 30, 2006.

FINANCIAL COVENANTS

In connection with our loan and capital lease agreements, we are required to comply with certain covenants, a summary of which are as follows:

- We must maintain a current ratio (current assets to current liabilities) of 1.5 to 1.
- We must maintain minimum consolidated tangible net worth (stockholders' equity less intangible assets) equal to the greater of (i) \$86 million or (ii) the sum of \$86 million plus 50 percent of consolidated net income since September 30, 2001.
- We must maintain a ratio of debt to tangible net worth of not more than 2.5 to 1.
- We may not permit consolidated funded debt (generally, asset acquisition related debt plus capitalized lease obligations) to exceed 60 percent of total capitalization.
- We must maintain at the end of each fiscal quarter a fixed charge ratio (generally, the ratio of (x) the sum of (a) net income [adjusted to exclude gains or losses from the sale or other disposition of capital assets and other matters] plus (b) provision for taxes plus (c) fixed charges, to (y) fixed charges) for the period of the four consecutive fiscal quarters ended as of the measurement date of 1.5 to 1.

LINES OF CREDIT

Our line of credit for \$20 million, available for general corporate purposes, was amended on July 1, 2006 so that it now extends to July 1, 2007. As of December 31, 2006, we had no outstanding borrowings under the line.

WORKING CAPITAL

Our working capital increased \$11,736,000 from June 30, 2006 to December 31, 2006. This increase was primarily the result of increased accounts receivable, inventories, and prepaid expenses as well as decreased accrued expenses, income taxes payable and deferred revenue. These factors, which led to an increase in working capital, were partially offset by reduced cash balances (including segregated cash held with our hedge trading broker), and increased accounts payable.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company produces its products from wheat, corn and milo and, as such, is sensitive to changes in commodity prices. Grain futures and/or options are used as a hedge to protect against fluctuations in the market. The information regarding inventories and futures contracts at June 30, 2006, as presented in the annual report, is not significantly different from December 31, 2006.

ITEM 4. CONTROLS AND PROCEDURES.

(a) Evaluation of disclosure controls and procedures.

Our Chief Executive Officer, President and Chief Financial Officer, after evaluating the design and effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) or 15d-15(e)) as of the end of the period covered by this report (the Evaluation Date), have concluded that as of the Evaluation Date, for the reasons noted in (b) (2) below the Company's disclosure controls and procedures were not adequately designed and operating effectively to ensure that material information relating to the Company would be made known to them by others within the Company, particularly during the period in which this Form 10-Q Quarterly Report was being prepared. The Company has taken the action noted in paragraph (b)(2) below to correct this deficiency.

(b) Changes in Internal Controls.

(1) In our Annual Report on Form 10K dated June 30, 2006, we disclosed two material weaknesses in internal control over financial reporting, one of which resulted in the accumulation of several significant deficiencies. In connection with the evaluation required by paragraph (d) of Securities Exchange Act Rule 13a-15 or 15d-15 that occurred during our second fiscal quarter, we have identified the following changes in internal that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. We have implemented these changes to address the material weaknesses identified in our Annual Report. However, because these control activities have not been in place for a sufficient period of time to permit adequate testing, we are unable to state at this time that the previously noted weaknesses have been remedied.

- We are no longer using the CMMS System to process purchasing, receiving, maintenance materials and chemicals/packaging transactions at our Atchison facility. We have implemented a fully integrated ERP system that has eliminated the need to operate such offline systems. Further, ERP system security has been established to prevent the initiation, authorization, recording, processing and recording of transactions by employees with incompatible duties. Based upon our initial testing, it appears that incompatible duties have been adequately segregated through the use of system access controls. Management will continue to monitor system access controls to ensure adequate segregation of duties within the system.

- We have implemented written procedures involving cycle counting and full physical inventories of maintenance materials at our Pekin, Illinois and Atchison, Kansas locations. Internal control testing has not been performed as of the date of this report, as control activities have not been in place for the prescribed period of time necessary for testing.

In regard to the period end accrual process, we have implemented internal controls over the mandatory reconciliation of all balance sheet accounts to determine the adequacy of accruals. Management will continue to ensure that these accounts are reconciled on a quarterly basis. In regard to tax accruals, we have retained Deloitte Touche, LLP to assist with all tax preparation and advisory services for the Company. Services will include quarterly evaluation of deferred taxes and federal/state income tax accruals.

(2) In the course of engaging the audit of employee benefit plans, management determined that certain employee benefit plans for the Atchison and Pekin plants that had previously been classified and reported as defined contribution plans did in fact contain aspects of defined benefit plans as well. Based upon an actuarial study of the defined benefit segment of the employee benefit plans, management performed an evaluation of the impact of this misclassification on the Company's Consolidated Financial Statements for the Year ended June 30, 2006 and determined the amount to be immaterial. Nonetheless, we regard this as a significant deficiency which we will address in future periods by establishing procedures to identify and evaluate existing contractual obligations (including but not limited to collective bargaining agreements) and the related impact of any changes in those contracts on financial reporting to allow management to evaluate the propriety of the accounting treatment for such contracts. These will include periodic and/or period end review of our significant contracts by our financial reporting and other accounting staff as well as other management and, if appropriate, legal counsel.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

Reference is made to *Item 3. Legal Proceedings* in the Company's Annual Report on Form 10-K for the year ended June 30, 2006 and to Part II, Item 1. *Legal Proceedings* in the Company's Quarterly Report on Form 10-Q for the quarter ended October 1, 2006 for information regarding certain legal proceedings to which the Company or its Illinois subsidiary are subject.

One matter referred to in our annual report on Form 10-K and quarterly report on Form 10-Q was an administrative proceeding brought in 1997 by the Illinois Attorney General on behalf of the Illinois Environmental Protection Agency relating to our subsidiary's Pekin facility. We have reached a settlement with the State. A Stipulation and Proposal for Settlement has been signed by all parties which provides for a total payment of the Company of \$500,000, including a contribution to a state special project fund. The Stipulation has been filed with the Illinois Pollution Control Board and was approved by the Board on January 26, 2007. The Stipulation requires us to make the payment by February 26, 2007 and to complete specified compliance activities relating to the construction of a Swiss Combi system which will replace two existing feed dryers. The compliance activities and related timetable are included among those previously agreed to and already commenced pursuant to a previously announced consent decree with the United States Environmental Protection Agency.

Another matter referred to in our annual report on Form 10-K and quarterly report on Form 10-Q was *MGP Ingredients, Inc. v. Mars, Incorporated et. al.*, Civil Action No 06-2318, U.S. District Court, District of Kansas. On September 25, the defendants filed an answer denying the Company's substantive claims and a partial motion to dismiss the Company's tortious interference and misappropriation of trade secrets claims for failure to state a claim upon which relief can be granted. Defendants also pled various other affirmative defenses, including waiver, estoppel, unclean hands, non-infringement and invalidity of patent claims. On December 7, 2006, the court denied Mars' partial motion to dismiss the Company's tortious interference and misappropriation of trade secrets claims.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS. [TO BE COMPLETED]

The following table shows repurchase information regarding purchases by the Company of shares of its stock during the quarter ended December 31, 2006.

Period	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or Unit)	Total Number of shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) (that May Yet Be Purchased Under the Plans or Programs)
October 2-October 31, 2006	0		0	
November 1-November 30, 2006	0		0	
December 1-December 31 2006	0		0	1,613,716 (a)

(a) On various dates, the Board of directors authorized the purchase of an aggregate of 6,000,000 shares of Common Stock of which 4,386,284 shares had been purchased as of December 31, 2006. This program was first announced on June 5, 1997. During the three months ended December 31, 2006, no shares were purchased under the program. The program has no expiration date.

ITEM 5. OTHER INFORMATION

Reference is made to Item 1. Legal Proceedings, in which we refer to a Stipulation and Proposal for Settlement resolving certain environmental proceedings to which our subsidiary, MGP Ingredients, Inc. of Illinois, has been a party. The Stipulation is between our subsidiary, the State of Illinois and the Illinois Environmental Protection Agency. It was approved by the Illinois Pollution Control Board on January 26, 2007, at which time it became binding.

ITEM 6. EXHIBITS

- | | |
|-----|--|
| 3.1 | Amended and Restated Articles of Incorporation (incorporated by reference to Exhibit 3.1 of the Company's Quarterly Report on Form 10-Q for the quarter ended September 30, 2004.) |
| 3.2 | Bylaws of the Company (Incorporated by reference to Exhibit 3(b) of the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2006 (File Number 0-17196)) |

Edgar Filing: MGP INGREDIENTS INC - Form 10-Q

- *4.1 Fifth Amendment to Line of Credit Loan Agreement dated as of December 28, 2007
- *4.2 Trust Indenture Dated as of December 28, 2006 relating to \$7,000,000 Taxable Industrial Revenue Bonds Series 2006 (MGP Ingredients Project)
- *4.3 Lease dated as of December 28, 2006 between the City of Atchison, as Issuer and MGP Ingredients, Inc., as tenant relating to \$7,000,000 Taxable Industrial Revenue Bonds Series 2006 (MGP Ingredients Project (filed herewith as exhibit 10.6))
- *10.1 Form of Indemnification Agreement between the Company and Directors and Executive Officers
- *10.2 Guidelines for Issuance of Fiscal 2007 Restricted Share Awards
- *10.3 Agreement with Ladd M. Seaberg as to Award of Restricted Shares Granted under the Stock Incentive Plan of 2004 with respect to Fiscal 2007 (Similar agreements have been made with the following named executive officers as to the number of shares indicated following their respective names: Timothy W. Newkirk 9,200 shares; Randy M. Schrick 9,300 shares; Brian T. Cahill 8,900 shares; Sukh Bassi, Ph.D. 9,400 shares)
