CAUTIONARY STATEMENT ABOUT FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Exchange Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that relate to future events or our future financial performance. In addition, other statements we may make from time to time, such as press releases, oral statements made by our officials and other reports that we file with the Securities and Exchange Commission may also contain such forward-looking statements. Undue reliance should not be placed on these statements which involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements to be materially different from any future results, performances or achievements expressed or implied by the forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as may, will, should, expects, plans, anticipates, believes, estimates, predicts, potential, continue, or the negative of such terms or other comparable terminology.

These forward-looking statements include, but are not limited to:

- statements about our strategies, plans, objectives, goals, expectations and intentions;
- information relating to anticipated operating results, financial resources, changes in revenues, changes in profitability, interest expense, growth and expansion, anticipated income to be realized from our investments in unconsolidated entities;
- the impact of demographic trends and supply constraints on the demand for and supply of housing;
- housing market conditions in the geographic markets in which we operate;
- the number and types of homes and number of acres of land that we may develop and sell;
- the ability to deliver homes from backlog;
- the timing and outcomes of regulatory approval processes or administrative proceedings, which may result in delays in the land entitlement, development, construction, or the opening of new communities (including, but not limited to ongoing administrative proceedings related to our joint venture near Oxnard, California);
- the ability to secure materials and subcontractors;
- the ability to produce the liquidity and capital necessary to expand and take advantage of opportunities in the future;
- our ability to realize the value of our net operating loss carry forwards;
- our ability to continue relationships with current or future partners;
- the effectiveness and adequacy of our disclosure and internal controls;
- the impact of recent accounting pronouncements; and
- stock market valuations.

Any or all of the forward-looking statements included in this report and in any other reports or public statements made by us may turn out to be inaccurate. This can occur as a result of incorrect assumptions or as a consequence of known or unknown risks and uncertainties. These risks and uncertainties include the competitive environment in which we operate; local, regional and national economic conditions; the demand for homes; fluctuations in interest rates and the availability of mortgage financing; changes in home prices; the availability and cost of land for future growth; the availability of capital; uncertainties and fluctuations in capital and securities markets; changes in tax laws and their interpretation;

Edgar Filing: CALIFORNIA COASTAL COMMUNITIES INC - Form 10-Q

legal proceedings; the ability of customers to finance the purchase of homes or sell existing homes; the availability and cost of labor and materials; the amount of our debt and the impact of restrictive covenants in our loan agreements; adverse weather conditions; domestic and international political events; uncertainties created by terrorist attacks; the effects of governmental regulation, including regulations concerning development of land, the home building industry, sales and customer financing processes, and the environment; and other risks discussed in our filings with the Securities and Exchange Commission. Many factors mentioned in this report or in other reports or public statements made by us, such as government regulation and the competitive environment, will be important in determining our future performance. Consequently, actual results may differ materially from those that might be anticipated from our forward-looking statements. You should not place undue reliance on any of these forward-looking statements because they are based on current expectations or beliefs regarding future events or circumstances, which involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements to be materially different from any future results, performances or achievements expressed or implied by these forward-looking statements.

Edgar Filing: CALIFORNIA COASTAL COMMUNITIES INC - Form 10-Q

Although we believe that our strategies, plans, objectives, goals, expectations and intentions reflected in, or suggested by these forward-looking statements are reasonable given current information available to us, we can give no assurance that any of them will be achieved.

Forward-looking statements speak only as of the date they are made. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. However, any further disclosures made on related subjects in our subsequent reports on Forms 10-K, 10-Q and 8-K should be consulted.

These forward-looking statements should be considered in light of the information included in this report and our other filings with the Securities and Exchange Commission, including, without limitation, the Risk Factors set forth below, as well as the description of trends and other factors in Management's Discussion and Analysis of Financial Condition and Results of Operations, set forth in our Form 10-K for the year ended December 31, 2006. You should also read the following Management's Discussion and Analysis of Financial Condition and Results of Operations in conjunction with the unaudited consolidated financial statements and the related notes that appear elsewhere in this report.

We assume no, and hereby disclaim any, obligation to update any of the foregoing or any other forward-looking statements. We nonetheless reserve the right to make such updates from time to time by press release, periodic report or other method of public disclosure without the need for specific reference to this Form 10-Q or any other report filed by us. No such update shall be deemed to indicate that other statements not addressed by such update remain correct or create an obligation to provide any other updates.

CALIFORNIA COASTAL COMMUNITIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

Note 1 - Basis of Presentation

The accompanying financial statements have been prepared by California Coastal Communities, Inc. and its consolidated subsidiaries (the Company), without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. The Company believes that these unaudited consolidated financial statements reflect all material adjustments (consisting only of normal recurring adjustments) and disclosures necessary for the fair presentation of the results of operations and statements of financial position when read in conjunction with the Consolidated Financial Statements and Notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2006 and Form 10-Q for the quarterly period ended March 31, 2007. Intercompany accounts and transactions have been eliminated.

The results for interim periods are not necessarily indicative of the results to be expected for the full year. This report contains forward-looking statements. Readers are cautioned that any such forward-looking statements are not guarantees of future performance and involve risks and uncertainties that actual events or results may differ materially from those described herein as a result of various factors, including without limitation, the factors discussed generally in this report.

Note 2 - Significant Accounting Policies

Basis of Consolidation

Certain of the Company's wholly-owned subsidiaries are members in joint ventures involved in the development and sale of residential projects and residential loan production. The Company's consolidated financial statements include the Company's accounts and all of its majority-owned and controlled subsidiaries and joint ventures. The financial statements of joint ventures in which the Company has a controlling or majority economic interest (and thus are controlled by the Company) are consolidated with the Company's financial statements. Minority interest represents the equity interest of the Company's joint venture partner for one consolidated venture and is further described in Note 10 to the consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2006. The Company's investments in unconsolidated joint ventures are accounted for using the equity method when the Company does not have voting or economic control of the venture operations, as further discussed in Note 4 to the consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2006.

Real Estate

Real estate inventories primarily consist of homes under construction and lots under development and are carried at the lower of cost or fair value less costs to sell. The estimation process involved in the determination of fair value is inherently uncertain since it requires estimates as to future events and market conditions. Such estimation process assumes the Company's ability to complete development and dispose of its real estate properties in the ordinary course of business based on management's present plans and intentions. Economic, market, and environmental conditions may affect management's development and marketing plans. In addition, the implementation of such development and marketing plans could be affected by the availability of future financing for development and construction activities. Accordingly, the ultimate values of the Company's real estate properties depend upon future economic and market conditions, and the availability of financing.

The cost of sales of multi-unit projects is generally computed using the relative sales value method. Interest and other carrying costs are capitalized to real estate projects during their development and construction period.

Impairment of Long-Lived Assets

The Company assesses the impairment of real estate inventories and other long-lived assets in accordance with Statement of Financial Accounting Standards (SFAS) No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* , (SFAS 144) which requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. As provided by SFAS 144, impairment is evaluated by comparing an asset s carrying value to the undiscounted estimated cash flows expected from the asset s operations and eventual disposition. If the sum of the undiscounted estimated future cash flows is less than the carrying value of the asset, an impairment loss is recognized based on the fair value of the asset. If impairment occurs, the fair value of an asset for purposes of SFAS 144 is deemed to be the amount a willing buyer would pay a willing seller for such asset in a current transaction.

In accordance with SFAS 144, in developing estimated future cash flows for impairment testing, the Company has incorporated its own market assumptions including those regarding home prices, infrastructure and home-building costs and financing costs regarding real estate inventories. Additionally, as appropriate, the Company identifies alternative courses of action to recover the carrying value of its long-lived assets and evaluates all likely alternatives under a probability-weighted approach as described in SFAS 144.

During the first quarter of 2007, the Company recorded an impairment charge of \$4.0 million related to its real estate inventories for the remaining homes at its Woodhaven project in Beaumont, California. To date, the Company has not recorded impairment charges for its other projects primarily because most of its lot acquisitions were negotiated prior to 2005 (thus reflecting less expensive land prices and benefiting from home price appreciation during 2005 that exceeded the decline in home prices during 2006 and the first half of 2007). However, as required by SFAS 144, should market conditions further deteriorate in the future or other events occur that indicate the carrying amount of the Company s real estate inventories may not be recoverable, the Company will reevaluate the expected cash flows from each project to determine whether any additional impairment exists at any point in time.

Earnings Per Common Share

Earnings per common share is accounted for in accordance with SFAS No. 128, *Earnings Per Share* . Basic earnings per common share is computed using the weighted-average number of common shares outstanding for the period. Diluted earnings per common share is computed using the weighted-average number of common shares outstanding and the dilutive effect of potential common shares outstanding. For the three and six months ended June 30, 2006, the average market price of the Company s common stock exceeded the exercise price of approximately 700,000 outstanding stock options. Therefore, diluted earnings per share for the 2006 periods include the dilutive effect of the weighted average number of common shares from potential exercise of approximately 700,000 options.

The table below sets forth the reconciliation of the denominator of the earnings per share calculation (in millions):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2007	2006	2007	2006
Shares used in computing basic earnings per common share	10.9	10.2	10.9	10.2
Dilutive effect of stock options		.3		.3
Shares used in computing diluted earnings per common share	10.9	10.5	10.9	10.5

Recent Accounting Pronouncements

In July 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* , (FIN 48), which prescribes a recognition threshold and measurement process for recording in the financial statements uncertain tax positions taken or expected to be taken in a tax return. Additionally, FIN 48 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods and disclosure requirements for uncertain tax positions. The accounting provisions of FIN 48 are effective for reporting periods beginning after December 15, 2006. The Company adopted FIN 48 during the first quarter of 2007 and recorded a net reduction to deferred tax assets of \$3.3 million. This reduction was recorded as a \$3.1 million decrease in additional paid-in capital and a \$200,000 decrease in retained earnings as of January 1, 2007 as a cumulative effect of a change in accounting principle.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157), which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. SFAS 157 is effective for financial statements issued for fiscal periods beginning after November 15, 2007 (the Company s fiscal year beginning January 1, 2008), and interim periods within those fiscal years. The Company is currently evaluating the impact of adopting SFAS 157 on the consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159), which expands the standards under SFAS 157 and provides entities a one-time election to measure financial instruments and certain other items at fair value. SFAS 159 is effective for financial statements issued for fiscal periods beginning after November 15, 2007 (the Company's fiscal year beginning January 1, 2008). The Company is currently evaluating the impact of adopting SFAS 159 on its consolidated financial statements.

Note 3 Real Estate Inventories

Real estate inventories primarily consist of homes under construction and lots under development at Brightwater and seven additional communities in four Southern California counties. At June 30, 2007, real estate inventories aggregated 773 lots and homes, including 33 homes completed and unsold, and five homes completed and in escrow. Real estate inventories at June 30, 2007 included \$186.7 million recorded for the Brightwater community which is located on a 105-acre parcel on a mesa north of the Bolsa Chica wetlands (Upper Mesa). Brightwater is under development for 356 homes as discussed below. In addition, real estate inventories include approximately 51 acres nearby which have been offered for dedication to the County of Orange for inclusion in the Harriet M. Weider Linear Park in conjunction with the development of Brightwater, and 51 additional acres which are subject to a conservation easement. The carrying value of these two properties is zero. The Company capitalizes carrying costs including interest and property taxes, as well as direct construction costs, to real estate inventories during the development and construction period.

The Brightwater planned community will offer a broad mix of home choices, averaging 2,860 square feet and ranging in size from 1,710 square feet to 4,140 square feet. The plan also includes 37 acres of open space and conservation area. With 349 homes permitted on 68 acres of the Upper Mesa, the resulting low-density plan equates to approximately five homes per acre, consistent and compatible with the neighboring Huntington Beach communities. In addition, the Company owns land adjacent to the planned Brightwater development, on which it intends to process permits to build seven additional homes which will be included in the Brightwater community. The Company completed grading during October 2006, and is currently constructing infrastructure (sewer, water, storm drain, streets, utilities, etc.) Model home construction for The Trails and The Sands products was completed in July 2007. Construction of models for the remaining two products, The Cliffs and The Breakers, began during the first quarter of 2007 and is expected to be completed during the fourth quarter of 2007. The Company began selling homes in August 2007 and expects to begin delivering homes by the end of 2007. However, there can be no assurance in that regard, or as to the absence of further development or construction delay.

The estimation process involved in the determination of value is inherently uncertain since it requires estimates as to future events and market conditions. Such estimation process assumes the Company's ability to complete development and disposition of its real estate properties in the ordinary course of business based on management's present plans and intentions. Economic and market conditions may affect management's development and marketing plans. In addition, the implementation of such development and marketing plans could be affected by the availability of future financing for development and construction activities. Accordingly, the amount ultimately realized from such project may differ materially from current estimates and the project's carrying value.

Capitalized interest is allocated to real estate inventories when incurred and charged to cost of sales when the related property is delivered. Changes in capitalized interest follow (in millions):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2007	2006	2007	2006
Capitalized interest, beginning of period	\$ 13.7	\$ 6.1	\$ 10.2	\$ 6.1
Interest incurred and capitalized	4.3	1.1	8.4	2.2
Charged to cost of sales	(.2)	(.7)	(.8)	(1.8)
Capitalized interest, end of period	\$ 17.8	\$ 6.5	\$ 17.8	\$ 6.5

Note 4 Senior Secured Project Revolver

On September 15, 2006, the Company entered into a three-year, \$100 Million Senior Secured Revolving Credit Agreement with KeyBank National Association, as a lender and agent for several other lenders (the Revolving Loan). The Revolving Loan is secured by a first trust deed on the Brightwater project, and stock pledges of the Company's material subsidiaries. The Revolving Loan will fund the first \$100 million of development and construction costs for the project. At the end of the second year of the term of this facility and each subsequent quarter, the commitment amount will decrease by \$25 million until the commitment under the Revolving Loan is reduced to zero by the final maturity date, September 15, 2009. The Revolving Loan is also subject to earlier commitment reductions based on 40% of the \$600,000 release price on the first 50 units closed at the Brightwater project, and 40% of the \$1 million release price per unit thereafter.

Availability under the \$100 million Revolving Loan is subject to the applicable borrowing base limitations. The borrowing base limits lender advances to 50% of asset value. The borrowing base value is the appraised value of the Brightwater project, increased for costs incurred subsequent to the most recent lender appraisal and reduced by 72% of the sales value of homes sold. The initial borrowing base value of the Brightwater project was determined by an independent third-party appraisal of the project on an as-is basis as of July 6, 2006. Certain subsidiaries of the Company provided full unconditional guarantees. The Revolving Loan includes financial covenants which may limit the amount that may be borrowed. Outstanding advances bear interest at the Company's option at either (i) the Alternate Base rate (Prime) minus 25 basis points or (ii) LIBOR plus 200 basis points.

As of June 30, 2007 and December 31, 2006, \$38.7 million and \$18.3 million, respectively, was outstanding under the Revolving Loan. As of June 30, 2007, the undrawn availability was \$61.3 million, as limited by the borrowing base formulas. Interest on the facility is calculated on the average, outstanding daily balance and is paid monthly. Interest incurred on the Revolving Loan for the three and six months ended June 30, 2007 was \$700,000 and \$1.2 million, respectively, at a weighted-average interest rate of 7.32% for both periods, which reflects the Company's elected rate of LIBOR plus 2%.

Initial loan fees and closing costs of approximately \$800,000 incurred for the Revolving Loan on September 15, 2006 are deferred and included in other assets and amortized over the life of the loan. Amortization of these costs is included in the capitalization of interest allocated to real estate inventories when incurred, and charged to cost of sales when the related homes are delivered. As of June 30, 2007 and December 31, 2006, approximately \$600,000 and \$734,000, respectively, of deferred loan fees and closing costs related to the Revolving Loan are included in other assets.

Under the Revolving Loan, the Company is required to comply with a number of covenants, including a leverage covenant and a minimum consolidated tangible net worth covenant of \$100 million. The Company is in compliance with these covenants as of June 30, 2007.

Note 5 Senior Secured Term Loan

On September 15, 2006, the Company entered into a five-year, \$125 Million Senior Secured Term Loan Agreement with KeyBank National Association, as a lender and agent for several other lenders (the Term Loan), and on September 15, 2006, the Company borrowed the maximum loan amount of \$125 million. The proceeds were used to fund a special dividend of \$12.50 per share, totaling \$135.7 million, to common stockholders paid on September 28, 2006. At the end of the second, third and fourth years of the term of this agreement, the commitment amount will decrease by \$15 million, \$25 million, and \$35 million, respectively. Thereafter, for each subsequent quarter, the Term Loan commitment amount will decrease in four equal installments, until the commitment under the agreement is reduced to zero by the final maturity date, September 15, 2011. The Term Loan is also subject to mandatory repayments based on 60% of the \$600,000 release price on the first 50 units closed at the Brightwater project, and 60% of the \$1 million release price per unit thereafter.

Availability under the Term Loan is subject to the applicable borrowing base loan to value limitations. The loan to value limits total lender advances under the Term Loan and the Revolving Loan to 65% of asset value. This is based upon the appraised value of the Brightwater project, increased for costs incurred subsequent to the most recent lender appraisal and reduced by 72% of the sales value of homes sold. The Term Loan is secured by a second trust deed on the Brightwater project, and a general pledge and assignment of the Company's ownership interests in all material subsidiaries. All existing material subsidiaries of the Company have provided full unconditional guarantees. The Term Loan includes financial covenants which may limit the amount that may be outstanding. The outstanding balance bears interest at the Company's option at either (i) the prime interest rate plus 25 basis points, or (ii) LIBOR plus 275 basis points.

Edgar Filing: CALIFORNIA COASTAL COMMUNITIES INC - Form 10-Q

As of June 30, 2007 and December 31, 2006, \$125 million was outstanding under the Term Loan. Interest on the Term Loan is calculated on the average, outstanding daily balance and is paid monthly. Interest incurred on the Term Loan for the three and six months ended June 30, 2007 was \$2.6 million and \$5.2 million, respectively, at a weighted-average interest rate of 8.07% for both periods, which reflects the Company's elected rate of LIBOR plus 2.75%.

Initial loan fees and closing costs of \$2.3 million incurred for the Term Loan on September 15, 2006 are deferred and included in other assets and amortized over the life of the loan. Amortization of these costs is included in the capitalization of interest allocated to real estate inventories when incurred, and charged to cost of sales when the related homes are delivered. As of June 30, 2007 and December 31, 2006, approximately \$2.0 million and \$2.2 million, respectively, of deferred loan fees and closing costs related to the Term Loan are included in other assets.

Under the Term Loan, the Company is required to comply with a number of covenants, including covenants related to leverage, a minimum ratio of EBITDA to interest, and a minimum consolidated tangible net worth of \$100 million. The Company is in compliance with these covenants as of June 30, 2007.

Under the Term Loan agreement, the Company was required to enter into a swap agreement to hedge against risks associated with fluctuating interest rates related to \$62.5 million of floating rate debt. On September 15, 2006 the Company entered into an interest rate swap transaction to effectively fix the interest rate on \$62.5 million in floating rate debt at 8.015% per annum. The swap transaction terminates in September 2008. Since the Company does not use derivative financial instruments for trading purposes, the swap did not qualify for hedge accounting under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*. The fair value of the interest rate swap agreement represents the spread between the interest rate the Company paid and the interest rate the Company would receive over the remaining life of the agreement, however, this was insignificant at June 30, 2007. The change in fair value of the interest rate swap agreement during the three and six months ended June 30, 2007 was not material. The counterparties to the interest rate swap agreement are financial institutions.

Note 6 Other Project Debt

In conjunction with the acquisition of single-family residential lots, the Company's homebuilding subsidiary, Hearthside Homes, Inc. and its subsidiaries, enter into construction loan agreements with commercial banks. These loan facilities finance a portion of the land acquisition and the majority of the construction of infrastructure and homes. Each loan facility requires a guaranty of project completion and an environmental indemnity. The loans are secured by first trust deeds and bear an interest rate of prime plus three-fourths percent (9.0% at June 30, 2007), except for one loan facility for the Corona-Hellman project which bears interest at a rate of prime plus one-half percent (8.75% at June 30, 2007). Some of these loan facilities have a minimum interest rate ranging from 5.75% to 7.5%. During the three and six months ended June 30, 2007, Hearthside Homes, Inc. did not enter into any new loan facilities. The Company is in discussions with its lender to extend the Beaumont loan to November 17, 2007 with options to further extend to August 17, 2008. The following amounts were available and outstanding under these loan facilities as of June 30, 2007 and December 31, 2006 (\$ in millions):

	Amount of Facility	Number of Lots	Maturity Date	Outstanding at June 30, 2007	December 31, 2006
Rancho Santa Fe	\$ 10.4			\$	\$ 3.8
Corona-Chandler	14.8				.8
Corona-Chandler	1.9				1.9
Beaumont	20.7	86	8/17/07	12.3	10.7
Lancaster	17.7	71	10/1/07	3.8	2.2
Ontario	11.7	15	10/19/07	3.8	4.6
Corona-Hellman	54.5	151	1/7/09	27.3	20.9
				\$ 47.2	\$ 44.9

Note 7 - Other Liabilities

Other liabilities were comprised of the following (in millions):

	June 30, 2007	December 31, 2006
Accrued pensions and benefits	\$ 4.0	\$ 4.1
Home warranty reserves	2.4	2.4
Contingent indemnity and environmental obligations	1.4	1.4
Unamortized discount	(.4) (.4
	\$ 7.4	\$ 7.5

Contingent indemnity and environmental obligations partially reflect reserves before related discount (recorded pursuant to Fresh-Start Reporting) for contingent indemnity obligations for businesses disposed of by former affiliates and unrelated to the Company's current operations.

Home Warranty Reserve

The Company provides a home warranty reserve to reflect its contingent obligation for product liability. The Company generally records a provision as homes are delivered, based upon historical and industry experience, for the items listed in the homeowner warranty manual, which does not include items that are covered by manufacturers' warranties or items that are not installed by the Company's employees or contractors. The home warranty reserve activity is presented below (in millions):

	Three Months Ended		Six Months Ended	
	June 30, 2007	2006	June 30, 2007	2006
Balance at beginning of period	\$ 2.4	\$ 2.2	\$ 2.4	\$ 2.1
Provision	.1		.2	.2
Payments	(.1)	(.2) (.1
Balance at end of period	\$ 2.4	\$ 2.2	\$ 2.4	\$ 2.2

Note 8 - Income Taxes

The following is a summary of the tax provision (benefit):

	Three Months Ended		Six Months Ended	
	June 30, 2007	2006	June 30, 2007	2006
Current taxes	\$	\$.2	\$	\$.7
Deferred taxes	(.3) .6	(2.3) 1.5
Provision (benefit) for income taxes	\$ (.3) \$.8	\$ (2.3) \$ 2.2

The net deferred tax balance at June 30, 2007 and December 31, 2006 is primarily composed of federal net operating losses (NOLs). The Company has concluded that it is more likely than not that the Company will be able to generate sufficient taxable income to realize such assets. Therefore, the Company has no valuation allowance related to the potential utilization of its deferred tax assets due to uncertainties. Such uncertainties include the availability of real estate for development at economically viable prices, government approvals, results of litigation and economic factors affecting the Company's operations. The Company monitors these, as well as other positive and negative factors that may arise in the future, as it assesses the need for a valuation allowance against its deferred tax assets.

The federal NOLs available as of June 30, 2007 were approximately \$134 million. The amount of federal NOLs which expire if not utilized is zero for 2007 and \$3 million, \$11 million, \$49 million, \$42 million, and \$29 million for 2008, 2009, 2010, 2011 and thereafter, respectively.

The Internal Revenue Code (the Code) generally limits the availability of NOLs if an ownership change occurs within any three-year period under Section 382. If the Company were to experience an ownership change of more than 50%, the use of all remaining NOLs would generally be subject to an annual limitation equal to the value of the Company's equity before the ownership change, multiplied by the long-term tax-exempt rate (4.32% as of July 2007) plus (ii) recognized built-in-gains, defined as those gains recognized within five years of the ownership change subject to an overall limitation of the net unrealized built-in gains existing as of the ownership change date. The Company believes it has net unrealized built-in gains sufficient to allow utilization of the entire net operating loss, assuming that the Company is able to recognize these gains within the five-year time limitation. The Company estimates that after giving effect to various transactions by stockholders who hold a 5% or greater interest in the Company, it has experienced a three-year cumulative ownership shift of approximately 38% as of July 23, 2007, as computed in accordance with Section 382.

On September 18, 2006, the Company's Board of Directors suspended enforcement of the Company's charter documents that restrict stockholders from acquiring more than 5% of the outstanding shares of Common Stock. The Board determined that such restrictions were not currently required to preserve the tax benefits of the Company's \$134 million of NOLs. While the Company remains subject to Code section 382, which limits the availability of NOLs in the event of an ownership change, the Company would have five years from the date of any such ownership change to recognize its built in gains and utilize its NOLs. With the commencement of construction at Brightwater in 2006, and the related built-in-gain of the project, the Company believes it will fully utilize its NOLs within the next five years if an ownership change does occur; however, the Board may reinstitute the 5% ownership limitation if required by currently unanticipated events.

Pursuant to SFAS 123(R), the Company has elected to recognize stock option deductions on the tax law ordering method, which maximizes the realization of the stock option deductions in the current year. While the Company realized the majority of its 2006 stock option deductions, approximately \$400,000 of unrealized tax benefits related to stock option deductions are not reflected in the consolidated financial statements. Upon realization of the tax benefits, the Company will increase its additional paid-in capital.

Uncertain Tax Positions

The Company adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48), on January 1, 2007. As a result of the implementation of FIN 48, during the first quarter of 2007, the Company recorded a \$5.1 million decrease in deferred tax assets for unrecognized tax benefits, which was offset by an increase in deferred tax assets of \$1.8 million for assets re-evaluated as recognizable. The net change in deferred tax assets of \$3.3 million resulted in a decrease to the January 1, 2007 retained earnings balance of \$200,000 and a decrease to the additional paid in capital balance of \$3.1 million related to fresh-start accounting pursuant to a 1997 pre-packaged bankruptcy. There have been no changes to this amount during the three and six month periods ended June 30, 2007. Of the Company's unrecognized tax benefits of \$5.1 million at June 30, 2007, \$200,000 would decrease the Company's effective tax rate if recognized. The Company does not believe that its unrecognized tax benefits will significantly fluctuate or change within twelve months of the reporting date.

The Company recognizes interest expense and penalties related to uncertain tax positions as general and administrative expenses. As of June 30, 2007, the Company has not recorded any interest or penalties related to unrecognized tax benefits.

The tax years 2003-2006 remain open to Federal and California examination, which are the Company's primary tax jurisdictions. The Company has utilized NOLs generated between 1990 and 1994 to offset taxable income in those years and expects to utilize NOLs generated between 1994 and 1997 and in 1999 and 2006 in future years.

Note 9 - Commitments and Contingencies

Real Estate Matters

The Company is subject to the usual obligations associated with entering into contracts for the purchase of land and improved home sites. The purchase of properties under these contracts is generally contingent upon satisfaction of certain requirements by the sellers, including obtaining applicable property entitlements. The Company also utilizes option contracts with third-party land sellers and financial entities as a method of acquiring land in staged takedowns and minimizing the use of funds from other corporate financing sources. These option contracts also help to manage the financial and market risk associated with land holdings. Option contracts generally require the payment of a non-

refundable cash deposit of 5% to 15% of the purchase price for the right to acquire lots over a specified period of time (usually one to two years) at predetermined prices. The Company has the right at its discretion to terminate its obligations under these land purchase and option agreements by forfeiting the cash deposit with no further financial responsibility. As of June 30, 2007 and December 31, 2006, the Company has one consolidated \$25,000 land option deposit.

The Company has outstanding performance and surety bonds, for the benefit of city and county jurisdictions, related principally to its obligations for site improvements at various projects at June 30, 2007. The Company does not believe that draws upon these bonds, if any, will have a material effect on the Company's financial position, results of operations or cash flows.

Oxnard Land Development Joint Venture

In February 2003, the Company entered into two option contracts to acquire land adjacent to the City of Oxnard in Ventura County, California aggregating approximately 168 acres. The Company is developing a land plan for the area, which also includes an additional 149 acres owned by other landowners, with the intention of entitling the property for residential development and annexing it into Oxnard. During October 2003, the Company entered into a limited liability company joint venture agreement with a major financial partner to pursue the Oxnard development opportunity. The Company assigned the land purchase option contracts to the Oxnard limited liability company (Oxnard LLC). Hearthside Homes, Inc., the Company's homebuilding subsidiary, is the managing member of the Oxnard LLC.

The Oxnard LLC is funded by both of its members. Hearthside Homes, Inc. made an initial contribution of \$500,000. The non-managing member also made an initial contribution of \$500,000 to the joint venture and, as of December 31, 2005, had made an aggregate of \$4 million of first tier additional contributions. In June 2007, the members agreed to provide up to an additional \$5.7 million, to be contributed equally by the members, to complete the business plan. As of June 30, 2007, the members have contributed an aggregate of \$2.7 million of additional capital. During the three and six months ended June 30, 2007, the members each contributed approximately \$224,000 and \$347,000, respectively, to the Oxnard LLC.

The Company's total investment in the Oxnard LLC as of June 30, 2007 is \$2.4 million. The Company expects to make additional aggregate capital contributions of approximately \$76,000 to the Oxnard LLC during the remaining six months of 2007, bringing the Company's total expected investment to \$2.5 million. During the first half of 2008, the Company expects to make additional aggregate capital contributions of approximately \$1.2 million.

In addition to the land purchase options for the project property, the Oxnard LLC held a land purchase option which controlled property which was expected to provide fill dirt for the project property. On April 16, 2007, the Oxnard LLC sold the non-project land purchase option for \$1.8 million since the venture has contracted for an alternate source for the fill dirt. The Oxnard LLC received net proceeds of approximately \$700,000 in cash and a \$1.0 million note receivable for this transaction. The note receivable was collected on July 19, 2007. After paying the balance of commissions and closing costs of \$100,000, Oxnard LLC plans to utilize the proceeds to fund ongoing entitlement and development costs.

While the Company exerts a large degree of influence over the venture, the Company's partner does have various substantive participating rights such as approval rights with regard to the majority of business decisions, including approval of project budgets.

Legal Proceedings

There are various lawsuits and claims pending against the Company and certain subsidiaries. In the opinion of the Company's management, ultimate liability, if any, will not have a material adverse effect on the Company's financial condition or results of operations.

Golden State Water

On December 14, 2006 Golden State Water Company (Golden State) filed a complaint in Orange County Superior Court (the Court) against the City of Huntington Beach (the City) and two of the Company's subsidiaries claiming alleged breaches of contract.

Following the Court's denial of Golden State's motion for a preliminary injunction and the Court's ruling on Defendants' demurrer motion, the Company's subsidiaries and the City settled this litigation during the second quarter of 2007, pursuant to which the Company's subsidiaries paid an immaterial amount to Golden State. The Company's subsidiaries and the City did not admit fault or liability with respect to Golden State's claims, but agreed to settle the matter to avoid the continued cost and uncertainty of litigation.

California Department of Toxic Substances Control

On October 13, 2006, the California Department of Toxic Substances Control (DTSC) filed a civil complaint against the Company's Hearthsides Residential Corp. subsidiary (HRC) in the Federal District Court for the Southern Division of the Central District of California. The DTSC's complaint requests that HRC pay for approximately \$1.0 million of costs incurred by the DTSC, together with interest on that amount, primarily in connection with the oversight and remediation of PCB contamination found on residential properties adjacent to a 43-acre site where HRC completed the removal of PCB contaminated soil during September 2005. HRC's remediation process was approved by the DTSC in December 2005 when it issued a final acceptance of the remediation work. The complaint also seeks an order for HRC to pay any future costs which may be incurred in connection with further remediation, together with court costs and attorney's fees. This litigation is currently scheduled for a trial date in the fourth quarter of 2008.

Since May 2004, HRC has received invoices from DTSC seeking reimbursement for these costs; however, HRC contends, based upon advice of counsel, that it is not responsible for such costs because neither HRC nor any affiliate ever developed or built the neighboring residential properties, neither HRC nor any affiliate generated the contamination, and the contamination did not emanate from the 43-acre site that HRC remediated. Furthermore, HRC has also disputed such charges due to the fact that DTSC improperly submitted its bill. The Company's subsidiary intends to vigorously defend itself in this matter. Therefore, the Company has not accrued for any of DTSC's approximately \$1.0 million of claims related to these residential properties.

See Note 7 for a discussion of other contingencies.

Corporate Indemnification Matters

The Company and its former affiliates have, through a variety of transactions effected since 1986, disposed of several assets and businesses, many of which are unrelated to the Company's current operations. By operation of law or contractual indemnity provisions, the Company may have retained liabilities relating to certain of these assets and businesses. There is generally no maximum obligation or amount of indemnity provided for such liabilities. A portion of such liabilities is supported by insurance or by indemnities from certain of the Company's previously affiliated companies. The Company believes its consolidated balance sheet reflects adequate reserves for these matters.

Note 10 - Stock Plan

1993 Stock Option/Stock Issuance Plan

The 1993 Stock Option/Stock Issuance Plan (1993 Plan) was approved at the 1994 Annual Meeting of Stockholders, reserving 7.5 million shares each of Series A Preferred Stock and Class A Common Stock for issuance to officers, key employees and consultants of the Company and its subsidiaries and the non-employee members of the Board of Directors (the Board). On April 28, 1997, in connection with the Recapitalization, a new class of Common Stock replaced the Series A Preferred Stock and Class A Common Stock, and the Compensation Committee of the Board authorized the grant of stock options for 759,984 shares, equivalent at that time to 6% of the Company's fully diluted equity, for certain directors and officers. At the May 2004 and June 2006 stockholder meetings, the stockholders of the Company authorized an additional 150,000 and 250,000 stock options, respectively, for the 1993 Plan, resulting in total authorized grants of 1,159,984.

Edgar Filing: CALIFORNIA COASTAL COMMUNITIES INC - Form 10-Q

The Company did not grant any options during the three and six months ended June 30, 2007. During the comparable periods of 2006, the Company granted 2,500 and 5,000 options, respectively, with a fair value of \$22,000 and \$46,000, respectively. The grants vest 50% after one year and 100% after two years, and the options have a term of 10 years. Pursuant to SFAS 123 and SFAS 123(R), the Company recorded \$32,000 and \$70,000 of compensation expense during the three and six months ended June 30, 2007, respectively, which is reflected in additional paid-in capital. During the comparable periods of 2006, the Company recorded \$18,000 and \$34,000 of compensation expense. A summary of the status of the Company's 1993 Plan for the six months ended June 30, 2007 follows:

	Number of Options	Weighted-Average Exercise Price	Weighted-Average Remaining Life
Outstanding, January 1	17,500	\$ 21.58	
Granted		\$	
Exercised		\$	
Outstanding, June 30	17,500	\$ 21.58	8.60 years
Fully vested and exercisable at June 30	12,500	\$ 22.53	8.35 years
Available for future grants at June 30	361,733		

As of June 30, 2007, there were 17,500 options outstanding with a weighted-average exercise price of \$21.58 (ranging from \$13.35 to \$25.99) and a weighted-average remaining life of 8.60 years. All outstanding unvested stock options are expected to vest. The aggregate intrinsic value of all outstanding, fully-vested and exercisable stock options at June 30, 2007 was insignificant.

The Company adopted SFAS 123(R) in the first quarter of 2006 using the modified prospective method. Similar to SFAS 123, which the Company adopted in 2003, SFAS 123(R) requires the cost of all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on their fair values measured at the grant date, or the date of later modification, over the requisite service period. For tax purposes, the Company expects to be entitled to a tax deduction, subject to certain limitations, based on the fair value of certain equity awards when stock options are exercised. SFAS 123(R) requires that compensation cost be recognized in the financial statements based on the fair value measured at the grant date, or the date of later modification, over the requisite service period. The cumulative compensation cost recognized for equity awards pursuant to SFAS 123(R) and amounts that ultimately will be deductible for tax purposes are temporary differences as prescribed by SFAS 109, *Accounting for Income Taxes*. The tax effect of compensation deductions for tax purposes in excess of compensation cost recognized in the financial statements, if any, will be recorded as an increase to additional paid-in capital when realized. A deferred tax asset recorded for compensation cost recognized in the financial statements that exceeds the amount that is ultimately realized on the tax return, if any, will be charged to income tax expense when the restrictions lapse or stock options are exercised or expire unless the Company has an available additional paid-in capital pool (APIC Pool), as defined pursuant to SFAS 123(R). The Company is required to assess whether there is an available APIC Pool when the stock options are exercised or expire.

SFAS 123(R) also amends SFAS 95, *Statement of Cash Flows*, to require companies to change the classification in the statement of cash flows of any tax benefits realized upon the exercise of stock options or issuance of nonvested share unit awards in excess of that which is associated with the expense recognized for financial reporting purposes. These amounts are required to be reported as a financing cash inflow rather than as a reduction of income taxes paid in operating cash flows.

In addition, SFAS 123(R) requires a calculation to establish the beginning pool of excess tax benefits, or the additional paid-in capital pool (APIC pool), available to absorb any tax deficiencies recognized after the adoption of SFAS 123(R). The Company has elected the alternative transition method, which includes a simplified calculation method, set forth in FASB Staff Position No. FAS 123(R)-3, *Transition Election Related to Accounting for the Tax Effects of Share-Based Payment Awards* to calculate its beginning APIC pool.

The Company estimates the fair value of its stock options using the Black-Scholes option pricing model (the Option Model). The Option Model requires the use of subjective and complex assumptions, including the option's expected term and the estimated future price volatility of the underlying stock, which determine the fair value of the share-based awards. The Company's estimate of expected term in 2006 was determined based on the weighted-average period of time that options granted are expected to be outstanding considering current vesting schedules and the historical exercise patterns of the existing option plan. The expected volatility assumption used in the Option Model is based on historical volatility of the Company's stock in accordance with guidance provided in SFAS 123(R) and SAB 107. The risk-free interest rate used in the Option Model is based on the yield of U.S. Treasuries with a maturity closest to the expected term of the Company's stock options.

The weighted-average assumptions used for stock option grants during the six months ended June 30 follows:

	2007	2006	
Risk-free interest rate	n/a	4.8	%
Expected life (in years)	n/a	4	
Expected volatility	n/a	20.0	%
Expected dividends	None	None	

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview of California Coastal Communities, Inc.

We are a residential land development and homebuilding company with properties owned or controlled in five Southern California counties (Los Angeles, Orange, Riverside, San Bernardino and Ventura). Our principal activities include:

- obtaining zoning and other entitlements for land we own or control through purchase options or joint ventures;
- improving the land for residential development; and
- designing, constructing and selling single-family homes in Southern California.

Once our residential land is entitled, we may build homes, sell unimproved land to other developers or homebuilders, sell improved land to homebuilders, or participate in joint ventures with other developers, investors or homebuilders to finance and construct infrastructure and homes. The majority of our homes are designed to appeal to move-up homebuyers and are generally offered for sale in advance of their construction. During the next 12 months, we will focus our primary efforts to:

- complete infrastructure and model home construction for The Cliffs and The Breakers neighborhoods, and begin delivering homes for The Trails and The Sands neighborhoods at our 356-home Brightwater project located on the Bolsa Chica mesa in Orange County, California;
- complete the entitlement process for a 168-acre joint venture project near Oxnard, California currently being planned for 554 single-family detached homes and 347 attached homes (townhomes, condominiums and apartments); and
- maximize deliveries and revenues of our other homebuilding operations throughout Southern California.

However, we may also consider other strategic opportunities; and there can be no assurance that we will accomplish, in whole or in part, all or any of these strategic goals.

Our total revenues for the three months ended June 30, 2007 and 2006 were \$4.2 million and \$18.8 million, respectively, and \$16.4 million and \$46.7 million for the six months ended June 30, 2007 and 2006, respectively. For the three months ended June 30, 2007 and 2006, we delivered nine and 28 homes, respectively, and for the six months ended June 30, 2007 and 2006, we delivered 24 and 77 homes, respectively. Our total assets as of June 30, 2007 and December 31, 2006 were \$349.0 million and \$332.3 million, respectively. Our homebuilding subsidiary, Hearthside Homes, Inc., has delivered over 2,000 homes to families throughout Southern California since its formation in 1994.

Prior to obtaining the Coastal Development Permit for our Brightwater project in December 2005, we historically maintained a minimal amount of leverage. In September 2006, we obtained \$225 million of debt financing as described in Notes 4 and 5 to the consolidated financial statements in this Form 10-Q, which provided \$125 million to fund the \$12.50 special dividend to our stockholders on September 28, 2006 that is described in Note 13 to the consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2006. As of June 30, 2007, we had \$210.9 million of debt against \$116.8 million of book equity and a \$184.0 million equity market capitalization.

We were formed in 1988 and our executive offices are located at 6 Executive Circle, Suite 250, Irvine, California 92614. Our website address is <http://www.californiacoastalcommunities.com> and our telephone number is (949) 250-7700. We make available through our website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to these reports filed or furnished pursuant to Section 13(d) or 15(d) of the Exchange Act as soon as reasonably practicable after they are filed with, or furnished to, the SEC. Copies of our Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to these reports are available free of charge upon request. In addition, at our website we post current versions of our code of ethics, audit committee charter and nominating committee charter.

Outlook

Our homebuilding outlook varies significantly between the high-end coastal location of our Brightwater project in Huntington Beach and our inland projects. Conditions in the Inland Empire and Lancaster markets continue to be very challenging. We expect these conditions to continue through 2008 or 2009 and we do not expect to generate sufficient gross operating profits during the third quarter of 2007 to cover our selling, general and administrative expenses prior to the expected commencement of deliveries at our Brightwater project in the fourth quarter of 2007.

However, based on input from realtors, appraisers and fellow homebuilders, as well as reports in the press, it appears that high-end coastal markets are continuing to report steady sales and prices. In addition, we are optimistic about our Brightwater project due to the number of pre-qualification applications we have received to date and the initial 12 sales reservations for The Trails and The Sands neighborhoods (discussed below under "Our Current and Future Homesites - Brightwater at Bolsa Chica"). We believe this project creates a unique future opportunity for us given Brightwater's superior location, the extremely limited supply of new homes on the coast of Southern California and the absence of significant competition from other homebuilders in the Huntington Beach market.

The housing market downturn that began in 2006 continued into the first half of 2007 and is expected to continue through 2008 or 2009. The sustained softness in the housing market was compounded by recent difficulties in the subprime lending industry and the resulting tightening of credit available to some homebuyers. During the second quarter of 2007, net new orders decreased to 11 homes compared with 16 homes during the comparable period of 2006. Cancellations as a percentage of new orders were 35% during the second quarter of 2007, compared with approximately 32% for the first quarter of 2007, 41% for the fourth quarter of 2006, and 24% for the second quarter of 2006. At the same time, backlog as of June 30, 2007 decreased to 17 homes compared with 49 homes as of June 30, 2006 due to fewer homes in backlog at March 31, 2007 and reduced sales activity during the first half of 2007.

This sales slowdown reflects an overall softening of demand for new homes, as well as an oversupply of homes available for sale. We attribute the reduction in demand to reduced affordability of new homes due to rapid price increases between 2002 and 2005 and declines in consumer confidence related to concerns on the part of prospective home buyers about the future direction of home prices, and their ability to obtain financing and sell existing homes. In addition, speculators and investors are no longer helping to fuel demand. We try to avoid selling homes to speculators and start few homes without having a signed agreement of sale. As of June 30, 2007 we had standing inventory of 33 homes compared with 46 homes as of December 31, 2006 and nine homes as of June 30, 2006.

We have also been impacted by an overall increase in the supply of homes available for sale in our markets as certain large homebuilders continue to build product in excess of current demand and as speculators attempt to sell the homes they previously purchased. At the same time, many of the large national homebuilders operating in our markets are aggressively attempting to reduce their inventories by offering incentives and/or lowering prices, leading to lower gross margins on home sales.

As the housing market downturn continues to unfold, we continue to adjust and reevaluate our operating strategy to improve our margins and liquidity. Our operating strategy includes:

- continuing to assess our owned land position to identify those assets that should be reduced or repositioned;
- adjusting our cost structure to today's market conditions by rebidding subcontracts and materials in line with reduced demand;
- offering more incentives and selective price reductions to achieve acceptable levels of sales volume and cash flow; and
- monitoring construction starts to better align with sales activity.

Despite the housing market slowdown, we continue to remain cautiously optimistic about the future growth of our business given the potential of our Brightwater project. The long-term outlook for homebuilding in Southern California remains strong due to the continuing regulation-induced constraints on lot supplies. We have traditionally employed a conservative approach to managing our real estate inventories and believe we are well-positioned, with Brightwater representing 64% of our real estate assets, to withstand the effects of the continuing market downturn. We do not presently expect that current weaknesses in the homebuilding market will significantly impact our Brightwater project given the site's superior coastal location, the extremely limited supply of new homes on the coast of Southern California and the absence of significant competition from other homebuilders in the Huntington Beach market. However, there can be no assurance regarding the duration of the current downturn in the Southern California residential real estate market.

In particular, the following events may exert recessionary pressures on the Southern California economy and may have further negative impacts on the Southern California housing market: (i) the recent difficulties in the subprime lending industry and more stringent lending standards which may negatively impact the ability of certain homebuyers to obtain financing, (ii) increases in foreclosures due to interest rate adjustments on variable rate or teaser rate mortgages and other factors, (iii) the significant increases in home prices between 2002 and 2005 and the related decline in the affordability of new homes in Southern California, (iv) the decline in consumer confidence with respect to the housing market, (v) the state of the national economy, increases in interest rates by the Federal Reserve Board between mid-2004 and 2006 and the possibility of a recession in the future, and (vi) the continued threat of inflation and potential for further increases in interest rates by the Federal Reserve Board.

Our Current and Future Homesites

We currently have on-going Southern California homebuilding projects in:

- Orange County in the Huntington Beach area;
- Riverside County near the cities of Corona and North Corona, and in the City of Beaumont;
- San Bernardino County in the City of Ontario; and
- Northern Los Angeles County in the City of Lancaster.

Edgar Filing: CALIFORNIA COASTAL COMMUNITIES INC - Form 10-Q

We started selling homes at our Brightwater development project in Orange County during August 2007 and plan to process permits for seven homes on adjacent parcels in the City of Huntington Beach, which would bring the total unit count up to 356. The following chart describes our current projects, their location and our lot inventories as of June 30, 2007:

Project	Location	6/30/07 Lot Inventory
<u>Orange County:</u>		
The Trails at Brightwater	Huntington Beach	62
The Sands at Brightwater	Huntington Beach	78
The Cliffs at Brightwater	Huntington Beach	107
The Breakers at Brightwater	Huntington Beach	109
	<i>Subtotal Orange County</i>	356
<u>Inland Empire:</u>		
Chandler Ranch	North Corona	18
Alisal at Ontario	Ontario	15
Woodhaven	Beaumont	86
Hearthside Lane	Corona	151
	<i>Subtotal Inland Empire</i>	270
<u>Lancaster:</u>		
Alisal at Lancaster	Lancaster	3
Lancaster II	Lancaster	73
Quartz Hill	Lancaster	71
	<i>Subtotal Lancaster</i>	147
	<i>Total All Projects</i>	773

These homebuilding projects are currently expected to generate cash flows and gross operating margins through mid-2010. Up to approximately 554 additional single-family lots could be available for homebuilding operations if we obtain entitlements for our Oxnard project; however, the exact number of homes will depend on the final outcome of the entitlement process.

Brightwater at Bolsa Chica

The 110-acre Bolsa Chica upper mesa is the largest property in our portfolio, representing approximately 64% of our real estate assets as of June 30, 2007. The Bolsa Chica upper mesa is one of the last large undeveloped coastal properties in Southern California, and is located in Orange County, approximately 35 miles south of downtown Los Angeles. Bolsa Chica is bordered on the north and east by residential development in the City of Huntington Beach and Huntington Harbor, to the south by open space and the 1,200-acre Bolsa Chica wetlands, and to the west by 120 acres of publicly-owned conservation land and open space on the lower bench of the Bolsa Chica mesa, Pacific Coast Highway, Bolsa Chica State Beach, and the Pacific Ocean. Our holdings on the Bolsa Chica mesa include 68 acres of developable land on the upper mesa currently under development for a residential community known as Brightwater, 37 acres of open space and conservation area in the planned community, and five acres in the City of Huntington Beach which are currently zoned agricultural. We are analyzing development alternatives for this 5-acre parcel and expect to submit a proposed site plan to the City of Huntington Beach during 2007.

We also own approximately 104 non-developable acres on, or adjacent to, the Huntington Mesa. Approximately 51 acres of land on the Huntington Mesa have been offered for dedication to the County of Orange for inclusion in the Harriet M. Weider Linear Park in conjunction with the development of Brightwater and an additional 51 acres are subject to a conservation easement.

The Brightwater residential community will offer a broad mix of home choices averaging 2,860 square feet and ranging in size from 1,710 square feet to 4,140 square feet. Homes at The Trails and The Sands are currently offered at prices ranging from \$1.0 to \$1.3 million and the larger homes at The Cliffs and The Breakers are currently expected to be offered for sale beginning in the fourth quarter of 2007 at prices in excess of \$2 million. With 356 homes on 68

Edgar Filing: CALIFORNIA COASTAL COMMUNITIES INC - Form 10-Q

acres of the upper mesa, the resulting low-density plan equates to approximately five homes per acre, consistent and compatible with the neighboring Huntington Beach communities. To date, over 2,700 people have registered on our website requesting information about purchasing a home at Brightwater. We completed construction of eight model homes for The Trails and The Sands products, which range from 1,710 to 2,160 square feet, in July 2007 and will hold a grand opening on August 11, 2007.

As of August 5, 2007, we have accepted sales reservations and deposits from 12 buyers who had previously submitted prequalification applications to join our priority list for homes at The Trails and The Sands at sales prices ranging from \$1.0 to \$1.3 million, for homes ranging from 1,710 to 2,160 square feet. The average home size was 1,900 square feet and the average sales price was \$1,160,000 or \$610 per square foot. We anticipate first deliveries at The Trails and The Sands in the fourth quarter of 2007 which should generate significant gross operating profits. We also currently expect to:

- complete construction of nine additional model homes for The Cliffs and The Breakers, which will range from 2,720 to 4,140 square feet, during the Fall of 2007,
- start selling production homes from the nine additional model homes for The Cliffs and The Breakers products during the Fall of 2007, and
- begin delivering homes for The Trails and The Sands by the end of 2007.

However, there can be no assurance in that regard, or as to the absence of further delays.

We used the following facts and assumptions in estimating the value that we expect to receive from the Brightwater development project:

- The Brightwater coastal development permit provides for 349 homes aggregating approximately 995,000 square feet.
- We own land adjacent to Brightwater in the City of Huntington Beach, for which we intend to process permits to build seven additional homes which would be included in the Brightwater community.
- We completed construction of model homes for The Trails and The Sands products at Brightwater during July 2007. As of August 5, 2007 we have accepted sales reservations and deposits from 12 buyers who had previously submitted prequalification applications to join our priority list for homes at The Trails and The Sands at sales prices ranging from \$1.0 to \$1.3 million, for homes ranging from 1,710 to 2,160 square feet. The average home size was 1,900 square feet and the average sales price was \$1,160,000 or \$610 per square foot.
- There are 62 homes at Brightwater which will have unobstructed views of the Pacific Ocean and/or the Bolsa Chica wetlands, including 35 homes at The Breakers, 25 homes at The Cliffs and two homes at The Sands.
- Build-out of production homes is expected to take approximately three years.
- We are currently planning to: (i) hold a public grand opening for The Trails and The Sands communities on August 11, 2007, (ii) hold a second grand opening for The Cliffs and The Breakers communities in the fourth quarter of 2007, and (iii) begin delivering homes at The Trails and The Sands projects by the end of 2007.
- We currently expect to deliver the majority of the Brightwater homes in 2008 and 2009.
- The finished lot component of home prices ranges from 60% to 65%.
- Costs to improve the lots from their raw condition to finished lots, including County permits, City annexation fees and school fees, approximate \$190,000 per lot.

- The direct costs (excluding indirect costs such as supervision, overhead, sales and marketing, warranty, insurance, etc.) of building homes at Brightwater are currently expected to range from approximately \$125 to \$150 per square foot.
- Indirect costs are expected to approximate 5 to 6% of sales revenues.

23

- Brightwater is currently expected to generate gross margins that are approximately two to three times our 2006 homebuilding margins of 14% due to our low carrying value in Brightwater.

The estimation process involved in the determination of value is inherently uncertain because it requires estimates as to future events and market conditions. This estimation process assumes our ability to complete development and disposition of our real estate inventories in the ordinary course of business based on management's present plans and intentions. Economic, market, and environmental conditions may affect our development and marketing plans. The development of Brightwater depends upon various factors. Accordingly, the amount ultimately realized from the Brightwater project may differ materially from our current estimates and the project's carrying value.

Oxnard Land Development - Unconsolidated Joint Venture

In February 2003, we entered into two option contracts to acquire land adjacent to the City of Oxnard in Ventura County, California aggregating approximately 168 acres. We are developing a land plan for the area, which also includes an additional 149 acres owned by other landowners, with the intention of entitling the property for residential development and annexing it into Oxnard. During October 2003, we entered into a joint venture agreement with a major financial partner to pursue the Oxnard development opportunity. We assigned the land purchase option contracts to the Oxnard joint venture. Hearthside Homes, Inc., our homebuilding subsidiary, is the manager of the Oxnard joint venture.

We currently expect the residential development plan to include approximately 760 single-family detached lots and approximately 630 attached residential units (townhomes, condominiums and apartments); however, these numbers are subject to change during the course of the entitlement process. Approximately 554 of the single-family lots and approximately 347 of the attached units would be developed on the 168 acres of optioned land that we currently expect the Oxnard joint venture to purchase. The single-family detached product is currently expected to range from approximately 1,700 square feet to 3,000 square feet and the attached units are currently expected to range from approximately 1,450 square feet to 1,575 square feet. A market study in June 2007 estimated average home prices for the project of approximately \$601,000, or an average of \$288 per square foot.

The option contracts give the Oxnard joint venture two years, plus up to three and one half additional years through the exercise of extensions, to complete entitlement activities before purchasing the land. The Oxnard joint venture has the right to terminate these option agreements by forfeiting the cash deposits. The Oxnard joint venture is striving to obtain approval of its plan from the Oxnard City Council in the fourth quarter of 2007 and approval of annexation into the City of Oxnard from the Local Agency Formation Commission in the first quarter of 2008; however, delays could be encountered. If the Oxnard joint venture completes the entitlement process in the time frame set forth above, and decides to build homes (rather than sell lots), most of the homes would be delivered between 2010 and 2012, based on current expectations and assumptions. The Oxnard joint venture has exercised six six-month extensions, extending the current closing date for the option contracts to February 2008, and there is one remaining six-month extension through August 2008.

The Oxnard joint venture is funded by both of its members. Hearthside Homes, Inc. made an initial contribution of \$500,000. The non-managing member also made an initial contribution of \$500,000 to the joint venture and, as of December 31, 2005, had made an aggregate of \$4 million of first tier additional contributions. In June 2007, the members agreed to provide up to an additional \$5.7 million, to be contributed equally by the members, to complete the business plan. As of June 30, 2007, the members have contributed an aggregate of \$2.7 million of additional capital. During the three and six months ended June 30, 2007, the members each contributed approximately \$224,000 and \$347,000, respectively, to the joint venture.

Our total investment in the venture as of June 30, 2007 is \$2.4 million. We expect to make additional aggregate capital contributions of approximately \$76,000 to the joint venture during the remaining six months of 2007, bringing our total expected investment in the venture to \$2.5 million. During the first half of 2008, we expect to make additional aggregate capital contributions of approximately \$1.2 million.

In addition to the land purchase options for the project property, the Oxnard joint venture held a land purchase option which controlled property which was expected to provide fill dirt for the project property. On April 16, 2007, the Oxnard joint venture sold the non-project land purchase option for \$1.8 million since the venture has contracted for an alternate source for the fill dirt. The Oxnard joint venture received net proceeds of approximately \$700,000 in cash and a \$1.0 million note receivable for this transaction. The note receivable was collected on July 19, 2007. After paying the balance of commissions and closing costs of \$100,000, Oxnard LLC plans to utilize the proceeds to fund ongoing entitlement and development costs.

Edgar Filing: CALIFORNIA COASTAL COMMUNITIES INC - Form 10-Q

After payment of a 10% preferred return on invested capital to us and our partner, the first \$8 million of profits are allocated 75% to our partner and 25% to us, and profits over \$8 million and losses over \$5 million are generally allocated on a 50/50 basis in accordance with the operating agreement. The first \$5 million of losses are generally allocated 80% to our partner and 20% to us.

While we exert a large degree of influence over the joint venture, our partner does have various substantive participating rights such as approval rights with regard to the majority of business decisions, including approval of project budgets.

Homebuilding

We delivered nine homes during the second quarter of 2007, compared with 24 deliveries during the comparable period of 2006. We acquired no single-family residential lots during 2006 or the first half of 2007. After several years of dramatic home price appreciation in Southern California, we saw price depreciation during 2006 in the Inland Empire (Corona, Ontario and Beaumont) and Lancaster markets. This trend continued in the first half of 2007 and we expect it to continue in these markets throughout the year. Therefore, we have further reduced sales prices and offered incentives for a number of our homes which are not yet in escrow in response to our competition and to reflect current market pricing. The price reductions are expected to result in significantly reduced gross profits for the Inland Empire and Lancaster markets.

Deliveries of homes at our Brightwater project in coastal Huntington Beach are expected to commence in the fourth quarter of 2007.

Our homebuilding projects are described below:

	Location	Land Acquisition	Commenced Construction	Commenced Sales	Deliveries

				<i>Total Deliveries</i>	9	28	24	77

(a) Planned

Huntington Beach. We completed construction of the first eight model homes for The Trails and The Sands products which range from 1,710 to 2,160 square feet during July 2007. We accepted sales reservations and deposits for 12 homes at sales prices ranging from \$1.0 million to \$1.3 million in a pre-opening release on August 4, 2007 to buyers who had previously submitted prequalification applications to join our priority list for homes at The Trails and The Sands. The average home size was 1,900 square feet and the average sales price was \$1,160,000 or \$610 per square foot. We expect to begin delivering The Trails and The Sands homes at the end of 2007.

Corona. We acquired 83 lots in North Corona in May 2004. Following construction of infrastructure, during April 2005, we began construction of homes averaging 3,160 square feet. We opened for sales during the third quarter of 2005 and delivered 58 homes during 2006 at an average price of \$600,000. During the first half of 2007, we delivered seven homes at an average price of \$559,000. We delivered two additional homes at an average price of \$615,000 during July 2007. As of July 30, 2007, four homes are in escrow at an average price of \$598,000 and eight additional homes are completed and have been released for sale.

During April 2005, we acquired 151 additional lots in Corona. Following construction of infrastructure, construction of five model homes averaging 3,600 square feet on lots of approximately 7,200 square feet began during the fourth quarter of 2006. These models were completed during April 2007, and we released the first six production phase homes for sale at the April 21, 2007 grand opening and the balance of the first phase in June 2007. As of July 30, 2007, eight homes are in escrow at an average price of \$592,000 and four additional homes have been released for sale.

Ontario. During April 2005, we acquired 26 lots in the City of Ontario in Riverside County, California. This small community of homes, averaging 3,380 square feet, is an infill site situated very close to the projects we completed in the City of Chino in 2005. Construction of the first phase of 13 homes began during the fourth quarter of 2005, and we opened for sales during March 2006. We delivered nine homes during 2006 at an average price of \$675,000, and two homes during the first half of 2007 at an average price of \$673,000. As of July 30, 2007, three homes are in escrow at a price of \$683,000 and five additional homes are completed or under construction and have been released for sale.

Beaumont. We acquired 102 lots in the City of Beaumont during the third quarter of 2005. Following construction of infrastructure, construction of homes averaging 2,500 square feet began during the first quarter of 2006, and sales commenced during March 2006. We delivered 15 homes during 2006 at an average price of \$387,000. During the second quarter of 2007 we delivered one additional home at a price of \$396,000. As of July 30, 2007, two homes are in escrow at an average price of \$375,000 and 18 additional homes are completed or under construction and have been released for sale.

During the first quarter of 2007, we recorded an impairment charge of \$4.0 million related to our real estate inventories for the remaining homes at our Beaumont project. The impairment charge reflected our expectations about selling prices and gross margins for the project. As required by SFAS 144, should market conditions further deteriorate, we will reevaluate the expected cash flows from this project to determine whether any additional impairment exists.

Lancaster. We acquired 104 lots in the City of Lancaster in northern Los Angeles County during May 2004. We began construction of model homes averaging approximately 2,850 square feet during the third quarter of 2004 and opened for home sales in January 2005. During 2005, we delivered 55 homes at an average price of \$406,000. We delivered 41 homes during 2006 at an average price of \$448,000, and we delivered five homes during the first half of 2007 at an average price of \$420,000. As of July 30, 2007 two homes are in escrow at an average price of \$371,000 and the final home is under construction and has been released for sale.

In April 2005, we acquired an additional 73 unentitled lots in Lancaster. The entitlement process is near completion; however, we have determined that the construction start for the 73-unit project, which has no recorded loan, will be deferred until sales activity in the market has improved.

In December 2005, we acquired 77 additional lots in an area known as Quartz Hill in the City of Lancaster. The homes in this community are on 10,000 square foot lots and will average 3,640 square feet. Construction of models began in May 2006 and we opened for sales during July 2006. During 2006, we delivered three homes at an average price of \$537,000. We delivered three homes during the first half of 2007 at an average price of \$494,000. As of July 30, 2007 four homes are in escrow at an average price of \$497,000 and 10 additional homes are completed or under construction and have been released for sale.

Critical Accounting Policies

In the preparation of the consolidated financial statements, we applied accounting principles generally accepted in the United States of America. The application of generally accepted accounting principles may require management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying results. Listed below are those policies and estimates that we believe are critical and require the use of complex judgment in their application. In particular, our critical accounting policies and estimates include the evaluation of the impairment of long-lived assets and the evaluation of the probability of being able to realize the future benefits indicated by our significant federal tax net operating losses, as discussed further in Notes 2 and 8 to the consolidated financial statements.

Basis of Consolidation

Certain of our wholly-owned subsidiaries are members in joint ventures involved in the development and sale of residential projects and residential loan production. Our consolidated financial statements include our accounts and all of our majority-owned and controlled subsidiaries and joint ventures. The financial statements of joint ventures in which we have a controlling or majority economic interest (and thus are controlled by us) are consolidated with our financial statements. Minority interest represents the equity interest of our joint venture partner for one consolidated venture and is further described in Note 10 to the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2006. Our investments in unconsolidated joint ventures are accounted for using the equity method when we do not have voting or economic control of the venture operations, as further discussed in Note 4 to the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2006.

Impairment of Long-Lived Assets

We assess the impairment of real estate inventories and other long-lived assets in accordance with Statement of Financial Accounting Standards (SFAS) No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, (SFAS 144) which requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. As provided by SFAS 144, impairment is evaluated by comparing an asset's carrying value to the undiscounted estimated cash flows expected from the asset's operations and eventual disposition. If the sum of the undiscounted estimated future cash flows is less than the carrying value of the asset, an impairment loss is recognized based on the fair value of the asset. If impairment occurs, the fair value of an asset for purposes of SFAS 144 is deemed to be the amount a willing buyer would pay a willing seller for such asset in a current transaction.

In accordance with SFAS 144, in developing estimated future cash flows for impairment testing, we incorporated our own market assumptions including those regarding home prices, infrastructure and home-building costs and financing costs regarding real estate inventories. Additionally, as appropriate, we identify alternative courses of action to recover the carrying value of our long-lived assets and evaluate all likely alternatives under a probability-weighted approach as described in SFAS 144.

During the first quarter of 2007, we recorded an impairment charge of \$4.0 million related to our real estate inventories for the remaining homes at our Woodhaven project in the City of Beaumont. To date, we have not recorded impairment charges for our other projects primarily because most of our lot acquisitions were negotiated prior to 2005 (thus reflecting less expensive land prices and benefiting from home price appreciation during 2005 that exceeded the decline in home prices during 2006 and the first quarter of 2007). However, as required by SFAS 144, should market conditions further deteriorate in the future or other events occur that indicate the carrying amount of our real estate inventories may not be recoverable, we will reevaluate our expected cash flows from each project to determine whether any additional impairment exists at any point in time.

Income Taxes

We account for income taxes on the liability method. Deferred income taxes are determined based on the difference between the financial statement and tax bases of assets and liabilities. The liability method requires an evaluation of the probability of being able to realize the future benefits indicated by deferred tax assets, such as tax net operating losses. A valuation allowance related to the deferred tax asset is recorded when it is more likely than not that some portion or all of the deferred tax asset will not be realized. Given the significance of our historical federal tax net operating losses, as discussed in Note 8 to the consolidated financial statements, the application of our policy in evaluating the expected future benefit of net operating losses is critical. In applying those policies, estimates and judgments affect the amounts at which certain assets and liabilities are recorded. We apply our accounting policies on a consistent basis. As circumstances change, they are considered in our estimates and judgments, and future changes in circumstances could result in changes in amounts at which assets and liabilities are recorded.

We remain subject to the general rules of Section 382 of the Internal Revenue Code, which limit the availability of net operating losses if an ownership change occurs. If we were to experience another ownership change, the amount of net operating losses available would generally be limited to an annual amount equal to (i) the value of our equity immediately before the ownership change, multiplied by the long-term tax-exempt rate (4.32% as of July 2007) plus (ii) recognized built-in-gains, defined as those gains recognized within five years of the ownership change subject to an overall limitation of the net unrealized built-in gains existing as of the ownership change date. We believe we have net unrealized built-in gains sufficient to allow utilization of the entire net operating loss, assuming that we are able to recognize these gains within the five-year time limitation. We estimate that as of July 23, 2007, we have experienced a three-year cumulative ownership shift of approximately 38%, as computed in accordance with Section 382.

Homebuilding Revenues and Cost of Sales

Our homebuilding operation generates revenues from the sale of homes to homebuyers. The majority of these homes are designed to appeal to move-up homebuyers and the homes are generally offered for sale in advance of their construction. Sales contracts are usually subject to certain contingencies such as the buyer's ability to qualify for financing. Revenue from the sale of homes is recognized at closing when title passes to the buyer, and the earnings process is complete. As a result, our revenue recognition process does not involve significant judgments or estimates. However, we do rely on certain projections and estimates to determine the related construction costs and resulting gross margins associated with revenues recognized. The cost of sales is recorded based upon total estimated costs within a subdivision and allocated using the relative sales value method. Our construction costs are comprised of direct and allocated costs, including estimated costs for future warranties and indemnities. Our estimates are based on historical results, adjusted for current factors.

Litigation Reserves

We and certain of our subsidiaries have been named as defendants in various cases arising in the normal course of business and regarding assets and businesses disposed of by us or our former affiliates. See Note 9 in our consolidated financial statements included in this Quarterly Report. We have reserved for costs expected to be incurred with respect to these cases based upon information provided by our legal counsel. There can be no assurance that total litigation costs actually incurred will not exceed the amount of such reserve.

Recent Accounting Pronouncements

See discussion regarding recent accounting pronouncements in Note 2 to the consolidated financial statements.

Results of Operations

The following tables set forth key operating and financial data for our homebuilding operations for the three and six months ended June 30, 2007 and 2006.

**Backlog as of June 30,
Homes in Backlog**

			Value (\$ in millions)			Average Selling Price (\$ in thousands)

Edgar Filing: CALIFORNIA COASTAL COMMUNITIES INC - Form 10-Q

Three Months Ended June 30, 2007 Compared with the Three Months Ended June 30, 2006

We reported revenues of \$4.2 million and gross operating profit of \$300,000 for the second quarter of 2007, compared with \$18.8 million in revenues and gross operating profit of \$3.2 million for the second quarter of 2006. Revenues in the current period reflect deliveries of nine homes, including four homes at the Chandler Ranch project in North Corona, three homes at our Alisal project in Lancaster, and one each at our Las Colinas project in Quartz Hill and our Woodhaven project in Beaumont. The comparable period of the prior year reflects deliveries of 28 homes, including 16 homes at the Alisal project in Lancaster and six homes each at the Chandler Ranch project and the Rancho Santa Fe project. The 30.5% decrease in the average selling price (see table above) primarily reflects the completion of our higher-end Rancho Santa Fe project in the first quarter of 2007, as well as sales price reductions that were necessary to be competitive in today's challenging housing market. We generated \$2.9 million less in gross operating profit from home sales during the second quarter of 2007 compared with 2006 as a result of delivering 19 fewer homes and reduced margins due to the continuing real estate slowdown which has resulted in lower selling prices. The current quarter's homebuilding gross margin of 7.1% is lower than the comparable 2006 period gross margin of 17.0% and fourth quarter 2006 margin of 9.5% primarily due to sales price reductions and the use of incentives in order to move standing inventory and be competitive in today's market.

The \$400,000 increase in income from unconsolidated joint ventures during the second quarter of 2007 reflects the sale of a non-project land purchase option by the Oxnard joint venture in April 2007 (see Note 9 of Notes to Financial Statements).

The \$200,000 decrease in other expense (income), net during the second quarter of 2007 compared with the second quarter of 2006 primarily reflects a \$100,000 reduction in interest income on short-term investments and a \$100,000 increase in real estate holding costs.

Six Months Ended June 30, 2007 Compared with the Six Months Ended June 30, 2006

We reported revenues of \$16.4 million and gross operating loss of \$2.9 million for the six months ended June 30, 2007, compared with \$46.7 million in revenues and gross operating profit of \$7.9 million for the comparable period of 2006. Revenues in the first half of 2007 reflect deliveries of 24 homes, including seven homes at our Chandler Ranch project in North Corona, six homes at our completed Rancho Santa Fe project, five homes at our Alisal project in Lancaster, three homes at our Las Colinas project in Quartz Hill, two homes at our Alisal project in Ontario and one home at our Woodhaven project in Beaumont. The comparable period of the prior year reflects deliveries of 77 homes, including 44 at our Chandler Ranch project, 26 homes at our Alisal project in Lancaster, six homes at our completed Rancho Santa Fe project and one home at our Jasper Ranch project.

Gross operating loss for the first half of 2007 includes an impairment charge of \$4.0 million related to the remaining homes at our Beaumont project. This impairment charge reflects our expectations about selling prices and gross margins for the project. As required by SFAS 144, should market conditions further deteriorate in the future or other events occur that indicate the carrying amount of our real estate inventories may not be recoverable, we will reevaluate our expected cash flows from each project to determine whether any additional impairment exists at any point in time.

We generated \$6.8 million less in gross operating profit from home sales during the six months ended June 30, 2007 compared with the comparable period of 2006 as a result of delivering 53 fewer homes and reduced margins due to the continuing real estate slowdown which has resulted in lower selling prices. The homebuilding gross margin for the first six months of 2007 of 6.7% is lower than the comparable 2006 period gross margin of 16.9% and fourth quarter 2006 margin of 9.5% primarily due to sales price reductions and the use of incentives in order to move standing inventory and be competitive in today's market.

The \$400,000 increase in income from unconsolidated joint ventures during the first half of 2007 reflects the sale of a non-project land purchase option by the Oxnard joint venture in April 2007 (see Note 9 of Notes to Financial Statements).

The \$600,000 increase in other expense (income), net during the first six months of 2007 compared with the comparable period of 2006 primarily reflects a \$300,000 reduction in interest income on short-term investments, a \$200,000 increase in warranty costs for a completed unconsolidated project, and a \$100,000 increase in legal expense related to the Golden State Water litigation described in Note 9 of Notes to Financial Statements.

Payments Under Contractual Obligations

We have entered into certain contractual obligations to make future payments for items such as loans, project debt, and lease agreements. A summary of the payments due under specified contractual obligations, aggregated by category of contractual obligation, for specified time periods is presented below as of June 30, 2007 (in millions):

	Total	Payments due by period			More than 5 years
		Less than 1 year	1-3 years	4-5 years	
Revolving loan (a)	\$ 47.2	\$ 5.6	\$ 41.6	\$	\$
Term loan (a)	137.9	9.3	78.6	50.0	
Other project debt (a)	54.4	25.6	28.8		
Operating leases	1.5	.3	.7	.5	
Total	\$ 241.0	\$ 40.8	\$ 149.7	\$ 50.5	\$

(a) Amounts include estimated interest expense which is calculated based on forecasted debt balances and the applicable interest rate at June 30, 2007.

Our purchase contracts which are made in the normal course of our homebuilding business for land acquisition and construction subcontracts are generally cancelable at will. Other contractual obligations including our tax liabilities (including unrecognized tax benefits recorded pursuant to FIN 48), accrued benefit liability for a frozen retirement plan and other accrued pensions, home warranty reserves and contingent indemnity and environmental obligations are estimated based on various factors. Payments are not due as of a given date, but rather are dependent upon the incurrence of professional services, the lives of annuitants and other factors. The estimation process involved in the determination of carrying values of these obligations is inherently uncertain since it requires estimates as to future events and contingencies. We have provided additional disclosure in Item 1. Legal Proceedings and in Note 9 to our consolidated financial statements in this Quarterly Report.

Liquidity and Capital Resources

Year-over-year changes in the principal components of our liquidity and capital resources are as follows (in millions, except percentages):

	Six Months Ended	
	June 30, 2007	2006
Cash and cash equivalents	\$ 5.9	\$ 2.7
Short-term investments		15.1
Cash used in operating activities	(28.5)	(9.3)
Cash provided by investing activities	1.1	13.6
Cash provided by (used in) financing activities	22.7	(9.3)

The principal assets in our portfolio are residential land which must be held over an extended period of time in order to be developed to a condition that, in management's opinion, will ultimately maximize our return. Consequently, we require significant capital to finance our real estate development and homebuilding operations. Historically, sources of capital have included loan facilities secured by specific projects, asset sales and available internal funds. Our unrestricted cash and cash equivalents as of June 30, 2007 aggregated \$5.9 million. During the first half of 2007, we primarily utilized internally generated cash to fund new construction at our homebuilding projects other than Brightwater in order to reduce the negative arbitrage between interest costs on project debt compared with interest income earned on short-term investments.

On September 15, 2006 we obtained the \$100 million Senior Secured Project Revolver (the *Revolving Loan*) as a construction facility to finance infrastructure and homebuilding activities at Brightwater as further described in Note 4 to the consolidated financial statements. This loan is funding the first \$100 million of development and construction costs for the Brightwater project. Availability under the \$100 million Revolving Loan is subject to the applicable borrowing base limitations and includes financial covenants which may limit the amount that may be borrowed. The initial borrowing base value of the Brightwater project was determined by an independent third-party appraisal of the project on an *as-is* basis, which was \$302 million as of July 6, 2006. This appraisal reflects substantial value in excess of the book value of \$142 million as of June 30, 2006. Outstanding advances bear interest at our option at either (i) the Alternate Base rate (*Prime*) minus 25 basis points or (ii) LIBOR plus 200 basis points.

We have substantial borrowing capacity available to us. As of June 30, 2007, based on construction in place, the immediately available borrowing capacity on our Revolving Loan and other project debt construction loan facilities is approximately \$2.6 million and \$9.0 million, respectively. The additional facility availability for future construction costs is \$58.7 million for Brightwater and approximately \$35.5 million for other projects. We repaid \$6.6 million of loans on the Rancho Santa Fe and Chandler projects in full during the first quarter of 2007. During April and July 2007, we extended the maturity dates for the \$29.4 million of loans on the Ontario and Lancaster projects, respectively, to October 2007.

We are utilizing internally generated cash and joint venture contributions to fund the Oxnard land development project. We currently expect to make aggregate additional capital contributions of approximately \$76,000 to the Oxnard joint venture during the remaining six months of 2007, bringing our total expected investment in the venture to \$2.5 million (see Note 9 to the consolidated financial statements). During the first half of 2008, we expect to make additional aggregate capital contributions of approximately \$1.2 million.

We believe that our cash and cash equivalents, future real estate sales proceeds, and funds available under our current credit agreements will be sufficient to meet anticipated operating and capital investment requirements and project development costs for homebuilding projects, the Oxnard land development project, and general and administrative expenses, for at least the next 12 months.

We are subject to the usual obligations associated with entering into contracts for the purchase of land and improved homesites. The purchase of properties under these contracts is generally contingent upon satisfaction of certain requirements by the sellers, including obtaining applicable property entitlements. We also utilize option contracts with third-party land sellers and financial entities as a method of acquiring land in staged takedowns and minimizing the use of funds from other corporate financing sources. These option contracts also help to manage the financial and market risk associated with land holdings. Purchase and option contracts generally require the payment of a non-refundable cash deposit of 5% to 15% of the purchase price for the right to acquire lots over a specified period of time (usually one to two years) at predetermined prices. We have the right at our discretion to terminate our obligations under these land purchase and option agreements by forfeiting the cash deposit with no further financial responsibility. As of June 30, 2007, we have one consolidated land option deposit for \$25,000 which is non-refundable. In addition, our unconsolidated Oxnard joint venture has land deposits of \$2.0 million.

We may enter into land development and homebuilding joint ventures from time to time as a means of expanding our market opportunities, establishing strategic alliances, managing our risk profile and leveraging our capital base. These joint ventures may obtain secured acquisition, development and construction financing, which minimize the use of funds from other corporate financing sources.

June 30, 2007 Compared with December 31, 2006

Cash used in homebuilding operations of \$28.5 million for the first half of 2007 primarily reflects investments in real estate inventories and construction costs of \$43.4 million offset by real estate sales proceeds of \$15.7 million from deliveries of 24 homes. The primary sources of cash during the first six months of 2007 were \$20.4 million of borrowings from our Senior Secured Project Revolver (*Revolving*) and \$2.3 million of borrowings of other project debt in excess of repayments. These items, as well as other activity presented in the Statements of Cash Flows, resulted in a \$4.7 million decrease in cash and cash equivalents.

The \$900,000 decrease in restricted cash reflects the release of collateral for costs related to the construction of project infrastructure for two homebuilding projects in the Inland Empire and Lancaster.

The \$1.0 million decrease in deferred tax assets primarily reflects the \$3.3 million adjustment recorded upon the adoption of FIN 48 discussed in Note 8 of Notes to Consolidated Financial Statements, partially offset by a \$2.3 million tax benefit for additional net operating losses generated during the first half of 2007.

The \$1.0 million decrease in other assets primarily reflects the receipt of \$1.1 million related to cancelled and replaced project insurance policies.

Off Balance Sheet Financing

In the ordinary course of business, we enter into land option contracts in order to procure land for the construction of homes. The use of such option agreements allows us to reduce the risks associated with land ownership and development; reduce our financial commitments, including interest and other carrying costs; and minimize land inventories. Under such land option contracts, we will fund a specified option deposit or earnest money deposit in consideration for the right to purchase land in the future, usually at a predetermined price. Our liability is generally limited to forfeiture of the nonrefundable deposits, letters of credit and other nonrefundable amounts incurred. As of June 30, 2007, we have one consolidated land option deposit of \$25,000 and no third party guarantees.

We also acquire land and conduct residential construction activities through participation in joint ventures in which we hold less than a controlling interest. Through joint ventures, we reduce and share our risk and also reduce the amount invested in land, while increasing our access to potential future home sites. The use of joint ventures also, in some instances, enables us to acquire land which we might not otherwise obtain or access on as favorable terms, without the participation of a strategic partner. While we view the use of unconsolidated joint ventures as beneficial to our homebuilding activities, we do not view them as essential to those activities.

Our investment in unconsolidated joint ventures totaled \$2.4 million and \$1.7 million at June 30, 2007 and December 31, 2006, respectively. These joint ventures had total assets of \$9.1 million and \$9.5 million as of June 30, 2007 and December 31, 2006, respectively, which included land deposits of \$2.0 million and \$2.5 million, respectively. In certain instances, we may provide varying levels of guarantees on debt of unconsolidated joint ventures. As of June 30, 2007, we provide no guarantees on debt of unconsolidated joint ventures.

Under the requirements of FASB Interpretation No. 46(R), *Consolidation of Variable Interest Entities* (FIN 46(R)), certain of our land option contracts may create a variable interest for us, with the land seller being identified as a VIE. In compliance with FIN 46(R), we analyze our land option contracts and other contractual arrangements and consider whether we should consolidate the fair value of certain VIEs from which we are purchasing land under option contracts. As of June 30, 2007, we had no deposits with VIEs.

ITEM 3 - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We utilize variable rate debt financing for acquisition, development and construction of homes. The interest rates on our debt approximate the current rates available for secured real estate financing with similar terms and maturities, and as a result, their carrying amounts approximate fair value. While changes in interest rates generally do not impact the fair market value of the debt instrument, they do affect our earnings and cash flows. Holding our variable rate debt balance of \$148.4 million constant as of June 30, 2007, each one point percentage increase in interest rates would result in an increase in variable rate interest incurred for the next 12 months of approximately \$1.5 million.

We are exposed to market risks related to fluctuations in interest rates on our outstanding variable rate debt. Other than an interest rate swap used to manage our exposure to changes in interest rates on \$62.5 million of our variable rate-based Term Loan, we did not utilize swaps, forward or option contracts on interest rates, or other types of derivative financial instruments as of or during the quarter ended June 30, 2007. We do not enter into or hold derivatives for trading or speculative purposes.

Under the Term Loan agreement, we were required to enter into a swap agreement to hedge against risks associated with fluctuating interest rates related to \$62.5 million of floating rate debt. On September 15, 2006 we entered into an interest rate swap transaction to effectively fix the interest rate on \$62.5 million in floating rate debt at 8.015% per annum for two years. The swap transaction terminates in September 2008. Since we do not use derivative financial instruments for trading purposes, the swap did not qualify for hedge accounting under SFAS No. 133. The fair value of the interest rate swap agreement represents the spread between the interest rate we paid and the interest rate we would receive over the remaining life of the agreement; however, this was not considered material at June 30, 2007. The change in fair value of the interest rate swap agreement during the quarter ended June 30, 2007 was not material to us. The counterparties to the interest rate swap agreement are financial institutions.

You should be aware that many of the statements contained in this section are forward looking and should be read in conjunction with our disclosures under the heading Cautionary Statement About Forward-Looking Statements.

ITEM 4 - EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

Our chief executive officer and chief financial officer, with the assistance of management, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report (the Evaluation Date). Based on that evaluation, our chief executive officer and chief financial officer concluded that, as of the Evaluation Date, our disclosure controls and procedures were effective to ensure that information required to be disclosed in our reports under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

However, no matter how well a control system is conceived and operated, it can provide only reasonable, not absolute, assurance that the objectives of the control system are met. In addition, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to costs. Therefore, no cost-effective control system and no evaluation of controls can provide absolute assurance that all control issues and instances of misstatements due to error or fraud, if any, within our company have been detected.

Changes in Internal Controls

There have been no changes in our internal control over financial reporting during the three months ended June 30, 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1 - LEGAL PROCEEDINGS

See Notes 7 and 9 to the consolidated financial statements above, and Item 1 - Business - Corporate Indemnification Matters and Item 3 - Legal Proceedings in our Annual Report on Form 10-K for the year ended December 31, 2006.

ITEM 1A - RISK FACTORS THAT MAY AFFECT RESULTS OF OPERATIONS AND FINANCIAL CONDITION

Set forth below is a discussion of the material changes in our risk factors as previously disclosed in Item 1A of Part I of our Annual Report on Form 10-K for the fiscal year ended December 31, 2006; however, the risks and uncertainties described in the Form 10-K are not the only ones facing us. Other events that we do not currently anticipate or that we currently deem immaterial also may affect our results of operations and financial condition.

The information presented below updates, and should be read in conjunction with, the risk factors and other information disclosed in our December 31, 2006 Form 10-K.

As previously disclosed in a risk factor contained in our December 31, 2006 Form 10-K, in recent periods we reported declines in the volume of homes sold, which reflect continued deteriorating market conditions in the homebuilding industry and such deterioration is expected to continue in the future. These trends became more pronounced during the first half of 2007, and we experienced a significant decline in sales orders in all of the principal areas in which we are currently selling homes. We attribute these developments to, among other things, a decline in homebuyer demand due to lower consumer confidence in the consumer real estate market, recent problems in the subprime mortgage market, decreases in the affordability of homes in the Inland Empire and Lancaster markets, increased inventory of new and used homes for sale, and pricing pressures resulting from the imbalance between supply and demand in the Inland Empire and Lancaster markets. These developments have had and may continue to have a material adverse effect on our results of operations. During the quarter ended March 31, 2007, we recorded \$4.0 million of impairments to real estate inventories at our home project in Beaumont, California due to challenging market conditions. If market conditions do not improve in future periods, we may decide not to pursue development and construction in additional areas, and the value of existing land holdings may continue to decline, which could lead to further write-offs for land impairments.

An earthquake or other natural disaster, terrorist act or nuclear accident could adversely affect our business.

Our Brightwater project, which recently commenced sales and represents 64% of our real estate assets as of June 30, 2007, is located in a high risk geographical area for earthquakes. In addition, all of our other real estate assets are in California and could be directly or indirectly impacted by the event of an earthquake. Our real estate assets are also located in areas that are subject to the risks of wildfires, floods and other natural

Edgar Filing: CALIFORNIA COASTAL COMMUNITIES INC - Form 10-Q

disasters; and they are also in proximity to urban and coastal areas which have, in recent years, been high risk geographical areas for terrorism and threats of terrorism. Finally, our real estate assets are located within 40 miles of the San Onofre nuclear power facility. Future earthquakes or other natural disasters, acts of terrorism or nuclear accidents could result in the destruction or loss of our real estate assets or adversely impact the demand for our homes and could, thereafter, materially impact the availability or cost of any insurance we might obtain to protect against these events. Any earthquake or other natural disaster, terrorist attack, or nuclear accident, whether or not insured, could have a material adverse effect on our financial performance, the market value of our common stock and our ability to pay dividends.

Quarterly results may fluctuate and may not be indicative of future quarterly performance.

Our quarterly operating results could fluctuate; therefore, you should not rely on past quarterly results to be indicative of our performance in future quarters. Factors that could cause quarterly operating results to fluctuate include, among others, the risk factors in this Report on Form 10-Q and those set forth in our December 31, 2006 Form 10-K.

The following risk factor was provided in our Report on Form 10-Q for the quarter ended March 31, 2007 and was added to Item 1A of the December 31, 2006 Form 10-K:

If any taxing authorities are successful in asserting tax positions that are contrary to our positions, our income tax provision and other tax reserves may be insufficient.

In order to determine our provision for income taxes and for our reserves for federal, state, local and other taxes we must use significant judgment and there may be matters for which the ultimate tax outcome is uncertain. Therefore, no assurance can be given that the final tax authority review will not be materially different than that which is reflected in our income tax provision and other tax reserves. Any adverse differences could have a material adverse effect on our income tax provision or benefits, or other tax reserves, in the period in which such determination is made and, consequently, on our net income for such period. To provide for potential tax exposures, we maintain reserves for tax contingencies based on reasonable estimates of our potential exposure with respect to the tax liabilities that may result from such audits. However, if the reserves are insufficient upon completion of any audit process, there could be an adverse impact on our financial position and results of operations.

ITEM 4 - SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Our Annual Meeting of stockholders was held on May 15, 2007. A quorum of common stock was present in person or by proxy. The following proposals were approved by the requisite vote of our stockholders entitled to vote, as follows:

Proposal No. 1: *The Director Proposal.* The director proposal recommended election of four directors to a one-year term. Set forth below is a table of how the votes were cast for each nominee, which constituted the affirmative votes for all nominees, by the holders of at least 81.9% of the outstanding common stock represented in person or by proxy at the Annual Meeting.

Name	Votes Cast For Nominee	Votes Withheld
Geoffrey W. Arens	9,429,152	789,291
Phillip R. Burnaman II	9,429,215	789,228
Raymond J. Pacini	9,429,365	789,078
Thomas W. Sabin, Jr.	9,358,108	860,335

Proposal No. 2: *The Auditor Proposal.* The holders of common stock cast 10,072,984 votes for and 65,742 votes against the proposal to ratify the appointment of Deloitte & Touche, LLP as our independent registered public accounting firm for the fiscal year ending December 31, 2007. Such votes constituted the affirmative vote for the Auditor Proposal by the holders of approximately 98.6% of the outstanding common stock represented in person or by proxy at the Annual Meeting. There were 79,717 abstentions and no broker non-votes by the holders of shares of common stock with respect to the Auditor Proposal.

ITEM 6 - EXHIBITS

- 31.1 Section 302 Certificate of Raymond J. Pacini, Chief Executive Officer of California Coastal Communities, Inc.
- 31.2 Section 302 Certificate of Sandra G. Sciutto, Chief Financial Officer of California Coastal Communities, Inc.
- 32.1 Section 906 Certificate of Raymond J. Pacini, Chief Executive Officer and Sandra G. Sciutto, Chief Financial Officer of California Coastal Communities, Inc.*

* These certifications are being furnished solely to accompany this report pursuant to 18 U.S.C. Section 1350, and are not being filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, and are not to be incorporated by reference into any filing of the Company, whether made before or after the date hereof, regardless of any general incorporation language in such filing.

SIGNATURE

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
