Cautionary Statements Regarding Forward-Looking Statements

This document contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that relate to future events or our future financial performance. In some cases, readers can identify forward-looking statements by terminology such as may, will, should, expect, plan, anticipate, believe, estimate, predict, continue, the negative of such terms or other comparable terminology. These statements are only predictions. Actual events or results may differ materially.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Moreover, neither we nor any other person assumes responsibility for the accuracy and completeness of the forward-looking statements. Forward-looking statements are subject to known and unknown risks and uncertainties, which could cause actual results to differ materially from the results projected, expected or implied by the forward-looking statements. These risk factors include, without limitation, competition in our end markets; our significant amount of debt; changes or reductions in the United States defense budget; U.S. government contracts laws and regulations; changes in technology; the impact of unexpected costs; inability to obtain raw materials and components; and currency fluctuations. All written and oral forward-looking statements made in connection with this report that are attributable to us or persons acting on our behalf are expressly qualified in their entirety by the foregoing risk factors and other cautionary statements included herein and in our other filings with the Securities and Exchange Commission (SEC). We are under no duty to update any of the forward-looking statements after the date of this report to conform such statements to actual results or to changes in our expectations.

The information in this report is not a complete description of our business or the risks and uncertainties associated with an investment in our securities. You should carefully consider the various risks and uncertainties that impact our business and the other information in this report and in our other filings with the SEC before you decide to invest in our securities or to maintain or increase your investment.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(All tabular dollar amounts in thousands except share and per share amounts)

1. The Company and a Summary of its Significant Accounting Policies

The Company

Unless the context otherwise requires, *CPI International* means CPI International, Inc., and *CPI* means Communications & Power Industries, Inc. *CPI* is a direct subsidiary of CPI International. CPI International is a holding company with no operations of its own. The term *the Company* refers to CPI International and its subsidiaries on a consolidated basis.

The accompanying unaudited condensed consolidated financial statements represent the consolidated results and financial position of CPI International, which is controlled by affiliates of The Cypress Group (*Cypress*). CPI International, through its wholly owned subsidiary, *CPI*, develops, manufactures, and distributes microwave and power grid Vacuum Electron Devices (*VED*), microwave amplifiers, modulators and various other power supply equipment and devices. The Company has two reportable segments, *VED* and satcom equipment.

Basis of Presentation and Consolidation

The Company's fiscal year is the 52- or 53-week period that ends on the Friday nearest September 30. Fiscal year 2007 comprises the 52-week period ending September 28, 2007 and fiscal year 2006 comprised the 52-week period ended September 29, 2006. All period references are to the Company's fiscal periods unless otherwise indicated.

The accompanying unaudited condensed consolidated financial statements of the Company as of June 29, 2007 and for the three and nine months ended June 29, 2007 are unaudited and reflect all normal recurring adjustments which are, in the opinion of management, necessary for the fair statement of such financial statements. These unaudited condensed consolidated financial statements should be read in conjunction with the Company's consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended September 29, 2006. The condensed consolidated balance sheet as of September 29, 2006 has been derived from the audited financial statements at that date. The results of operations for the interim period ended June 29, 2007 are not necessarily indicative of results to be expected for the full year.

The accompanying unaudited condensed consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany balances, transactions, and stockholdings have been eliminated in consolidation.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of sales and costs and expenses during the reporting period. On an ongoing basis, the Company evaluates its estimates, including those related to provision for revenue recognition, market values for inventories reported at lower of cost or market, product warranty, and recoverability and valuation of recorded amounts of long-lived assets and identifiable intangible assets, including goodwill. The Company bases its estimates on various factors and information, which may include, but are not limited to, history and prior experience, experience of other enterprises in the same industry, new related events, current economic conditions and

information from third party professionals that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Revenue Recognition

Sales are recognized when persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed or determinable, and collectibility is reasonably assured. The Company's products are generally subject to warranties, and the Company provides for the estimated future costs of repair, replacement or customer accommodation in cost of sales.

The Company has commercial and U.S. Government fixed-price contracts that are accounted for under American Institute of Certified Public Accountants Statement of Position No. 81-1, Accounting for Performance of Construction-Type and Certain Production-Type Contracts. These contracts are generally longer than one year in duration and include a material amount of product development. The Company uses the percentage-of-completion method when reasonably dependable estimates of the extent of progress toward completion, contract revenues and contract costs can be made. The portion of revenue earned or the amount of gross profit earned for a period is determined by measuring the extent of progress toward completion using total cost incurred to date and estimated costs at contract completion.

Sales under cost-reimbursement contracts, which are primarily for research and development, are recorded as costs are incurred and include estimated earned fees in the proportion that costs incurred to date bear to total estimated costs. The fees under certain commercial and U.S. Government contracts may be increased or decreased in accordance with cost or performance incentive provisions that measure actual performance against established targets or other criteria. Such incentive fee awards or penalties are included in revenue at the time the amounts can be reasonably determined.

2. Supplemental Balance Sheet Information

Accounts Receivable: Accounts receivable are stated net of allowances for doubtful accounts of approximately \$0.1 million and \$0.5 million at June 29, 2007 and September 29, 2006, respectively.

Inventories: The following table provides details of inventories, net of reserves:

	June 29, 2007	September 29, 2006
Raw material and parts	\$ 38,475	\$ 35,160
Work in process	12,982	10,481
Finished goods	8,893	8,390
	\$ 60,350	\$ 54,031

Reserve for excess, slow moving and obsolete inventory: The following table summarizes the activity related to reserves for excess, slow moving and obsolete inventory:

	Nine Months Ended	
	June 29, 2007	June 30, 2006
Balance at beginning of period	\$ 8,822	\$ 8,655
Inventory provision, charged to cost of sales	803	898
Inventory write-offs	(710)	(259)
Balance at end of period	\$ 8,915	\$ 9,294

Reserve for loss contracts and cost in excess of market inventory: The following table summarizes the activity related to reserves for loss contracts and cost in excess of market inventory:

	Nine Months Ended	
	June 29, 2007	June 30, 2006
Balance at beginning of period	\$ 1,702	\$ 1,430
Provision for loss contracts and cost in excess of market inventory, charged to cost of sales	970	1,350
Credit to cost of sales upon revenue recognition	(1,202)	(1,145)
Balance at end of period	\$ 1,470	\$ 1,635

Intangible Assets: The following tables present the details of the Company's total acquisition-related intangible assets:

	June 29, 2007			September 29, 2006		
	Cost	Accumulated Amortization	Net	Cost	Accumulated Amortization	Net
VED Core Technology	\$ 30,700	\$ (2,120)	\$ 28,580	\$ 30,700	\$ (1,659)	\$ 29,041
VED Application Technology	19,800	(2,723)	17,077	19,800	(2,130)	17,670
X-ray Generator and Satcom						
Application Technology	8,000	(1,840)	6,160	8,000	(1,441)	6,559
Customer backlog	17,450	(17,450)		17,450	(17,450)	
Land lease	11,810	(865)	10,945	11,810	(706)	11,104
Tradename	5,800		5,800	5,800		5,800
Customer list and programs	5,700	(622)	5,078	5,700	(451)	5,249
Noncompete agreement	110	(61)	49	110	(44)	66
	\$ 99,370	\$ (25,681)	\$ 73,689	\$ 99,370	\$ (23,881)	\$ 75,489

The estimated future amortization expense of purchased intangibles as of June 29, 2007, excluding the Company's unamortized tradename, was as follows:

Fiscal Year	
2007 (remaining three months)	\$ 611
2008	2,442
2009	2,441
2010	2,420
2011	2,420
Thereafter	57,555
	\$ 67,889

3. Long-Term Debt

Long-term debt comprises the following:

	June 29, 2007	September 29, 2006
Term loan, expiring 2010	\$ 37,500	\$ 42,500
8% Senior subordinated notes, due 2012	125,000	125,000
Floating rate senior notes, due 2015, net of issue discount of \$678 and \$719	79,322	79,281
	241,822	246,781
Less: Current portion	1,000	1,714
Long-term portion	\$ 240,822	\$ 245,067

Senior Credit Facility and Term Loan of CPI: In fiscal year 2004, CPI entered into a \$130.0 million credit agreement, which was amended and restated on November 29, 2004, and further amended on February 16, 2005, April 13, 2005, and December 15, 2005 (the Senior Credit Facility). The Senior Credit Facility consists of a \$40.0 million revolving commitment, with a sub-facility of \$15.0 million for letters of credit and \$5.0 million for swingline loans (Revolver), which expires on January 23, 2010, and a \$90.0 million term loan (Term Loan), which expires on July 23, 2010. As of June 29, 2007, the Company had no outstanding borrowings under the Revolver and \$37.5 million outstanding under the Term Loan, after taking into account a \$5.0 million Term Loan repayment in December 2006 using available operating cash. The \$5.0 million Term Loan repayment included a \$1.7 million ECF (as defined below) payment, and an optional prepayment of \$3.3 million. Upon certain specified conditions, including compliance on a pro forma basis with the covenants in the Senior Credit Facility, CPI may seek commitments for a new class of term loans, not to exceed \$65.0 million. The Senior Credit Facility is guaranteed by CPI International and all of CPI's domestic subsidiaries and is secured by substantially all of their and CPI's assets.

Borrowings under the Revolver would bear interest at a rate equal to, at CPI's option, London Interbank Offered Rate (LIBOR) plus 2.75% per annum, or the Alternate Base Rate (ABR) plus 1.75% per annum. Available borrowings under the Revolver are reduced by any amounts secured through letters of credit; at June 29, 2007, the Company had letters of credit commitments for \$3.7 million. The Term Loan borrowings bear interest at a rate equal to, at CPI's option, LIBOR plus 2.25% per annum or the

Edgar Filing: CPI INTERNATIONAL, INC. - Form 10-Q

ABR plus 1.25% per annum, payable quarterly. The ABR is the greater of the (a) Prime Rate and (b) Federal Funds Rate plus 0.50%. In addition to customary fronting and administrative fees under the Senior Credit Facility, CPI pays letter of credit participation fees equal to the applicable Revolver LIBOR margin per annum on the average daily amount of the letter of credit exposure, and a commitment fee of 0.50% per annum on the average daily unused amount of revolving commitment. As of June 29, 2007 (1) the Term Loan borrowings consisted of one tranche of \$5.5 million and one tranche of \$32.0 million with interest payable on July 16, 2007 and July 25, 2007, each at 7.6% per annum, and (2) a Revolving commitment of \$3.7 million for letter of credit exposure, with letter of credit participation fees and fronting fees payable quarterly at a combined interest rate of 3.0% per annum.

CPI is required to make an annual prepayment within 90 days after the end of each fiscal year based on a calculation of Excess Cash Flow (ECF), as defined in the Senior Credit Facility, multiplied by a factor of 25%, 50% or 75% depending on the leverage ratio at the end of the fiscal year, less optional prepayments made during the fiscal year. The Company made an ECF payment of \$1.7 million for the fiscal year ended September 29, 2006 in December 2006 and there is no expected ECF payment due for fiscal year 2007, primarily because of the \$3.3 million optional prepayment that was made in December 2006.

CPI can make optional prepayments on the outstanding loans at any time without premium or penalty, except for customary breakage costs with respect to LIBOR loans. In March 2005, CPI made an optional prepayment of \$5.7 million; in May 2006, CPI made additional optional prepayments of \$47.5 million in the aggregate using proceeds from the initial public offering of CPI International's common stock; and in December 2006, CPI made an additional prepayment of \$3.3 million.

See Note 12 for information regarding the recent refinancing of the Senior Credit Facility.

8% Senior subordinated notes of CPI: In connection with a business combination on January 23, 2004, CPI issued \$125.0 million in aggregate principal amount of its 8% Senior Subordinated Notes (the 8% Notes). The 8% Notes have no sinking fund requirements.

The 8% Notes bear interest at the rate of 8.0% per year, payable on February 1 and August 1 of each year. The 8% Notes will mature on February 1, 2012. The 8% Notes are unsecured obligations, jointly and severally guaranteed by CPI International and each of CPI's domestic subsidiaries. The payment of all obligations relating to the 8% Notes are subordinated in right of payment to the prior payment in full in cash or cash equivalents of all senior debt (as defined in the indenture governing the 8% Notes) of CPI, including debt under the Senior Credit Facility. Each guarantee of the 8% Notes is and will be subordinated to guarantor senior debt (as defined in the indenture governing the 8% Notes) on the same basis as the 8% Notes are subordinated to CPI's senior debt.

Edgar Filing: CPI INTERNATIONAL, INC. - Form 10-Q

At any time or from time to time on or after February 1, 2008, CPI, at its option, may redeem the 8% Notes, in whole or in part, at the redemption prices (expressed as percentages of principal amount) set forth below, together with accrued and unpaid interest thereon, if any, to the redemption date, if redeemed during the 12-month period beginning on February 1 of the years indicated below:

Year	Optional Redemption Price	
2008	104	%
2009	102	%
2010 and thereafter	100	%

At any time on or prior to February 1, 2008, the 8% Notes may also be redeemed or purchased (by CPI or any other person) in whole but not in part, at CPI's option, upon the occurrence of a change of control (as defined in the indenture governing the 8% Notes) at a price equal to 100% of the principal amount of the 8% Notes, plus a make-whole premium (as defined in the indenture governing the 8% Notes) to the redemption price on February 1, 2008, and accrued and unpaid interest, if any, to the date of redemption or purchase. Upon a change of control, CPI may be required to purchase all or any part of the 8% Notes for a cash price equal to 101% of the principal amount, plus accrued and unpaid interest thereon, if any, to the date of purchase.

The indenture governing the 8% Notes contains a number of covenants that, among other things, restrict, subject to certain exceptions, the ability of CPI and its restricted subsidiaries (as defined in the indenture governing the 8% Notes) to incur additional indebtedness, sell assets, consolidate or merge with or into other companies, pay dividends or repurchase or redeem capital stock or subordinated indebtedness, make certain investments, issue capital stock of their subsidiaries, incur liens and enter into certain types of transactions with their affiliates.

Events of default under the indenture governing the 8% Notes include: failure to make payments on the 8% Notes when due; failure to comply with covenants in the indenture governing the 8% Notes; a default under certain other indebtedness of CPI or any of its restricted subsidiaries that is caused by a failure to make payments on such indebtedness or that results in the acceleration of the maturity of such indebtedness; the existence of certain final judgments or orders against CPI or any of the restricted subsidiaries; and the occurrence of certain insolvency or bankruptcy events.

Floating rate senior notes of CPI International: On February 22, 2005, CPI International issued \$80.0 million in principal amount of its Floating Rate Senior Notes (the FR Notes). The FR Notes were issued at a 1% discount. The proceeds from the issuance of FR Notes were used to make a distribution to stockholders of CPI International of approximately \$75.8 million and to pay fees and expenses of approximately \$3.5 million associated with the issuance of FR Notes. The FR Notes have no sinking fund requirements.

The FR Notes require interest payments at an annual interest rate, reset at the beginning of each semi-annual period, equal to the then six-month LIBOR plus 5.75%, payable semiannually on February 1 and August 1 of each year. The interest rate on the semi-annual interest payment due August 1, 2007 is approximately 11.15% per annum. CPI International may, at its option, elect to pay interest through the issuance of additional FR Notes for any interest payment date on or before February 1, 2010. If CPI International elects to pay interest through the issuance of additional FR Notes, the annual interest rate on the FR Notes will increase by an additional 1% step-up, with the step-up increasing by an additional 1% for each interest payment made through the issuance of additional FR Notes (up to a maximum of 4%). The FR Notes will mature on February 1, 2015.

Edgar Filing: CPI INTERNATIONAL, INC. - Form 10-Q

The FR Notes are general unsecured obligations of CPI International. The FR Notes are not guaranteed by any of CPI International's subsidiaries but are structurally subordinated to all existing and future indebtedness and other liabilities of CPI International's subsidiaries. The FR Notes are senior in right of payment to CPI International's existing and future indebtedness that is expressly subordinated to the FR Notes.

Because CPI International is a holding company with no operations of its own, CPI International relies on distributions from CPI to satisfy its obligations under the FR Notes. The Senior Credit Facility and the indenture governing the 8% Notes restrict CPI's ability to make distributions to CPI International. The Senior Credit Facility prohibits CPI from making distributions to CPI International unless there is no default under the Senior Credit Facility and CPI International and CPI satisfy certain leverage ratios. The indenture governing the 8% Notes prohibits CPI from making distributions to CPI International unless, among other things, there is no default under the indenture and the amount of the proposed dividend plus all previous Restricted Payments (as defined in the indenture governing the 8% Notes) does not exceed a specified amount.

At any time or from time to time CPI International, at its option, may redeem the Notes in whole or in part at the redemption prices (expressed as percentages of principal amount) set forth below, together with accrued and unpaid interest thereon, if any, to the redemption date, if redeemed during the 12-month period beginning on February 1 of the years indicated below:

Year	Optional Redemption Price	
2007	103	%
2008	102	%
2009	101	%
2010 and thereafter	100	%

Upon a change of control, as defined in the indenture governing the FR Notes, CPI International may be required to purchase all or any part of the outstanding FR Notes for a cash price equal to 101% of the principal amount, plus accrued and unpaid interest thereon, if any, to the date of purchase.

The indenture governing the FR Notes contains certain covenants that, among other things, limit the ability of CPI International and its restricted subsidiaries (as defined in the indenture governing the FR Notes) to incur additional indebtedness, sell assets, consolidate or merge with or into other companies, pay dividends or repurchase or redeem capital stock or subordinated indebtedness, make certain investments, issue capital stock of their subsidiaries, incur liens and enter into certain types of transactions with their affiliates.

Events of default under the indenture governing the FR Notes include: failure to make payments on the FR Notes when due; failure to comply with covenants in the indenture governing the FR Notes; a default under certain other indebtedness of CPI International or any of its restricted subsidiaries that is caused by a failure to make payments on such indebtedness or that results in the acceleration of the maturity of such indebtedness; the existence of certain final judgments or orders against CPI International or any of the restricted subsidiaries; and the occurrence of certain insolvency or bankruptcy events.

See Note 4 for information on the interest rate swap agreement entered into by the Company to hedge the interest rate exposure associated with the FR Notes. See also Note 12 for information on the recent repurchase of a portion of the FR Notes and the issuance of a notice of redemption for a portion of the FR Notes.

Debt Maturities: As of June 29, 2007, maturities on long-term debt were as follows:

Fiscal Year	Term Loan	8% Senior Subordinated Notes	Floating Rate Senior Notes	Total
2007	\$	\$	\$	\$
2008				
2009				
2010	37,500			37,500
2011				
Thereafter		125,000	80,000	205,000
	\$ 37,500	\$ 125,000	\$ 80,000	\$ 242,500

The preceding table does not reflect recent refinancing and redemptions described in Note 12.

4. Derivative Financial Instruments

The Company uses forward exchange contracts to hedge the foreign currency exposure associated with forecasted manufacturing costs in Canada. As of June 29, 2007, CPI had outstanding forward contract commitments to purchase Canadian dollars for an aggregate U.S. notional amount of \$17.9 million; the last forward contract expires on December 17, 2007. At June 29, 2007 and September 29, 2006, the fair value of foreign currency forward contracts was an asset of \$1.0 million and \$0.1 million, respectively, and the unrealized gain, net of related tax expense, was \$0.8 million and \$8,000, respectively.

The Company's foreign currency forward contracts are designated as a cash flow hedge and are considered highly effective, as defined by Statement of Financial Accounting Standards (SFAS) No. 133, Accounting for Derivative Instruments and Hedging Activities. The unrealized gains and losses from foreign exchange forward contracts are included in accumulated other comprehensive income in the condensed consolidated balance sheets, and the Company anticipates recognizing the entire unrealized gain in operating earnings within the next twelve months. Changes in the fair value of foreign currency forward contracts due to changes in time value are excluded from the assessment of effectiveness, and are immediately recognized in general and administrative in the condensed consolidated statements of operations. The time value was not material for the three and nine months ended June 29, 2007 and June 30, 2006. If the transaction being hedged fails to occur, or if a portion of any derivative is ineffective, then the Company promptly recognizes the gain or loss on the associated financial instrument in the condensed consolidated statements of operations. No ineffective amounts were recognized due to anticipated transactions failing to occur in the three and nine months ended June 29, 2007 and June 30, 2006. Realized gains and losses from foreign currency forward contracts are recognized in cost of sales and general and administrative in the condensed consolidated statements of operations. Net income in the three and nine months ended June 29, 2007 includes a recognized loss from foreign currency forward contracts of \$0.2 million. Net income in the three and nine months ended June 30, 2006 includes a recognized gain from foreign currency forward contracts of \$0.3 million and \$1.3 million, respectively.

The Company also uses derivatives to hedge the interest rate exposure associated with the FR Notes. On April 15, 2005, the Company entered into an \$80.0 million interest rate swap contract (the Swap) to receive variable rate 6-month LIBOR interest and pay 4.15% fixed rate interest, which when combined with the 5.75% margin, results in a fixed rate of 9.9% on the FR Notes through January 31, 2008. The Swap interest payments are made semi-annually, beginning with the first payment on February 1, 2006. The Swap matures on January 31, 2008. In fiscal year 2005, the Company deposited \$1.0 million as collateral for the Swap; the amount of collateral fluctuates based on the fair value of the Swap. In fiscal year 2006, the Company received a \$0.5 million refund of the Swap collateral. The Swap collateral remaining is reported as prepaid and other current assets in the accompanying condensed consolidated balance sheets as of June 29, 2007, and as other long-term assets as of September 29, 2006. The unrealized gains and losses from the Swap are included in accumulated other comprehensive income in the condensed consolidated balance sheets. The interest rate swap gain or loss is included in the assessment of hedge effectiveness. During the three and nine months ended June 29, 2007, a gain of approximately \$0.1 million was recognized on the ineffective portion of the Swap due to an anticipated repurchase and redemption of an aggregate of \$58.0 million of the FR Notes. (See Note 12 for a description of those transactions.) The ineffective portion of the Swap associated with the remaining \$22.0 million of the FR Notes was not significant. At June 29, 2007 and September 29, 2006, the fair value of the Swap was an asset of \$0.5 million and \$1.1 million, respectively, and the unrealized gain, net of related tax expense, was \$0.3 million and \$0.7 million, respectively.

5. Commitments and Contingencies

Leases: At June 29, 2007, the Company was committed to minimum rentals under non-cancelable operating lease agreements, primarily for land and facility space, that expire on various dates through 2050. Rent expense is recognized on a straight line basis over the lease term.

A summary of future minimum lease payments as of June 29, 2007 was as follows:

Fiscal Year	Operating Leases
2007 (remaining three months)	\$ 379
2008	1,350
2009	1,139
2010	953
2011	349
Thereafter	3,449
Total future minimum lease payments	\$ 7,619

Product Warranty: The Company offers warranties on most of its products. The specific terms and conditions of the warranties offered by the company vary depending upon the product sold. The Company estimates the costs that may be incurred under its warranty plans and records a liability in the amount of such estimated costs at the time revenue is recognized. The Company periodically assesses the adequacy of its recorded warranty liabilities and adjusts the balance based on actual experience and changes in future expectations. The determination of product warranty reserves requires the Company to make estimates of product return rates and expected cost to repair or replace the products under warranty.

Changes in the Company's warranty reserve during the nine months ended June 29, 2007 and June 30, 2006 were as follows:

	Nine Months Ended	
	June 29, 2007	June 30, 2006
Beginning product warranty	\$ 5,958	\$ 6,359
Cost of warranty claims	(4,232)	(4,262)
Accruals for product warranty, charged to cost of sales	3,801	4,198
Ending product warranty	\$ 5,527	\$ 6,295

Guarantees: The Company has restricted cash of \$3.0 million and \$1.7 million as of June 29, 2007 and September 29, 2006, consisting primarily of bank guarantees from customer advance payments to the Company's international subsidiaries and collateral for a construction contract. The bank guarantees become unrestricted cash when performance under the sales or supply contract is complete.

Under the terms of the Swap, the Company must provide collateral to match any unfavorable mark-to-market exposure (fair value) on the Swap. The collateral required totals a certain minimum amount plus an amount equal to the unfavorable mark-to-market exposure on the Swap. Generally, the required collateral will rise as interest rates decline. The Company has posted \$0.5 million of collateral under the Swap, which is included in the condensed consolidated balance sheet in prepaid and other current assets as of June 29, 2007 and in other long-term assets as of September 29, 2006.

Indemnification: As permitted under Delaware law, the Company has agreements whereby the Company indemnifies its officers, directors and certain employees for certain events or occurrences while the employee, officer or director is, or was serving, at the Company's request in such capacity. The term of the indemnification period is for the officer's or director's lifetime. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited; however, the Company has Director and Officer insurance policies that limit its exposure and may enable it to recover a portion of any future amounts paid.

The Company has entered into other standard indemnification agreements in its ordinary course of business. Pursuant to these agreements, the Company agrees to indemnify, defend, hold harmless, and to reimburse the indemnified party for losses suffered or incurred by the indemnified party, generally the Company's business partners or customers, in connection with any patent, copyright or other intellectual property infringement claim by any third party with respect to its products. The term of these indemnification agreements is generally perpetual after execution of the agreement. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited. The Company has not incurred significant costs to defend lawsuits or settle claims related to these indemnification agreements. The Company believes the estimated fair value of these agreements is minimal. Accordingly, the Company has no liabilities recorded for these agreements as of June 29, 2007.

From time to time, the Company may be subject to claims that arise in the ordinary course of business. In the opinion of management, all such matters involve amounts that would not have a material adverse effect on the Company's consolidated financial position if unfavorably resolved.

6. Stock-based Compensation Plans

As of June 29, 2007, the Company had an aggregate of 1.5 million shares of its common stock available for future grant and approximately 3.2 million options that were outstanding under its various equity plans. Awards are subject to terms and conditions as determined by the Company's Board of Directors.

Stock Option Activity

The following table summarizes stock option activity under the Company's stock option plans:

	Number of Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Balance at September 29, 2006	3,163,057	\$ 4.51		
Granted	297,000	14.39		
Exercised	(237,681)	2.54		
Forfeited or cancelled	(36,547)	10.50		
Balance at June 29, 2007	3,185,829	\$ 5.51	6.81	\$ 45,610
Exercisable at June 29, 2007	2,283,970	\$ 3.02	6.24	\$ 38,402

The aggregate intrinsic value in the preceding table represents the total intrinsic value, based on the Company's closing stock price of \$19.83 as of June 29, 2007, which would have been received by the option holders had all option holders exercised their options as of that date. All exercisable options as of June 29, 2007 are in-the-money.

During the three and nine months ended June 29, 2007, cash received from option exercises was approximately \$0.1 million and \$0.6 million, respectively, and the total intrinsic value of options exercised was \$0.5 million and \$3.2 million, respectively. There were no options granted or exercised during the three and nine months ended June 30, 2006.

Restricted Stock Awards: There were 11,466 and 9,999 shares outstanding of nonvested restricted stock granted to directors as of June 29, 2007 and September 29, 2006, respectively. The restricted stock awards vest over periods of one to three years. A summary of the status of the Company's nonvested restricted stock awards as of June 29, 2007, and changes during the nine months then ended is presented below:

	Number of Shares	Weighted-Average Grant-Date Fair Value
Nonvested at September 29, 2006	9,999	\$ 18.00
Granted	7,022	17.09
Vested	(5,555)	18.00
Forfeited		
Nonvested at June 29, 2007	11,466	\$ 17.44

Edgar Filing: CPI INTERNATIONAL, INC. - Form 10-Q

Aggregate intrinsic value of the nonvested restricted stock awards at June 29, 2007 was \$0.2 million.

The Company settles stock option exercises and restricted stock awards with newly issued common shares.

Valuation and Expense Information under SFAS No. 123(R)

On October 1, 2005, the Company adopted SFAS No. 123 (revised 2004) or 123(R), Share-Based Payment, which requires the measurement and recognition of compensation expense for all share-based payment awards made to the Company's employees and directors including employee stock options, restricted stock awards and employee stock purchases related to the ESPP based on estimated fair values. The following table summarizes stock-based compensation expense for the three and nine months ended June 29, 2007 and June 30, 2006, which was allocated as follows:

	Three Months Ended		Nine Months Ended	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
Share-based compensation cost recognized in the income statement by caption:				
Cost of sales	\$ 75	\$	\$ 196	\$
Research and development	25	7	68	7
Selling and marketing	28	12	87	12
General and administrative	209	89	538	90
	\$ 337	\$ 108	\$ 889	\$ 109
Share-based compensation cost capitalized in inventory	\$ 78	\$ 27	\$ 206	\$ 27
Share-based compensation cost remaining in inventory at end of period	\$ 39	\$ 27	\$ 39	\$ 27
Share-based compensation expense by type of award:				
Stock options	\$ 277	\$ 89	\$ 712	\$ 90
Restricted stock	27	19	85	19
Stock purchase plan	33		92	
	\$ 337	\$ 108	\$ 889	\$ 109

The tax benefit realized from option exercises and restricted stock vesting totaled approximately \$0.1 million and \$1.1 million during the three and nine months ended June 29, 2007, respectively. There were no options exercised or restricted stock vested and hence no tax benefit realized during the three and nine months ended June 30, 2006.

The weighted-average estimated fair value of stock options and restricted stock granted during the three and nine months ended June 29, 2007 was \$10.71 and \$7.97 per share, respectively, using the Black-Scholes model with the following weighted-average assumptions:

Expected term (in years)	6.00 - 6.25
Expected volatility	49.33%
Risk-free rate	4.56% 4.71%
Dividend yield	0%

Since the Company's common stock has not been publicly traded for a sufficient time period, the expected volatility is based on expected volatilities of similar companies that have a longer history of being publicly traded. The expected term of options granted is based on the simplified method for plain vanilla options in accordance with Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) No. 107. The risk-free rates are based on the U.S. Treasury yield in effect at the time of the grant.

As stock-based compensation expense recognized in the condensed consolidated statement of operations for the three and nine months ended June 29, 2007 is based on awards ultimately expected to vest, it has been reduced for estimated forfeitures. SFAS No. 123(R) requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

As of June 29, 2007, there was approximately \$4.0 million of total unrecognized compensation costs related to nonvested stock options, which is expected to be recognized over a weighted-average vesting period of 2.3 years. As of June 29, 2007, there was \$0.2 million of total unrecognized compensation costs related to nonvested restricted stock awards, which is expected to be recognized over a weighted average vesting period of 1.5 years.

7. Income Taxes

The Company's effective tax rate was approximately 18.4% and 30.5% for the three and nine months ended June 29, 2007, respectively, as compared to 36.0% and 40.8% for the three and nine months ended June 30, 2006, respectively. The effective tax rate for the three and nine months ended June 29, 2007 includes a discrete tax benefit of \$1.8 million related to the filing of amended income tax returns for prior years to reflect a change in estimate with regard to reporting Canadian income earned in the U.S. The Company's estimated fiscal year 2007 effective income tax rate, excluding discrete tax items, is approximately 38%.

Income tax expense for the three months ended June 30, 2006 includes a discrete tax benefit of \$0.2 million for true-up adjustments to fiscal year 2005 tax expense related to changes in estimates made as a result of filing the 2005 income tax returns. Income tax expense for the nine months ended June 30, 2006 included \$0.3 million of charges attributable to the fourth quarter of fiscal year 2005, consisting of \$0.5 million to correct the overstatement of tax benefits recorded in the fourth quarter of fiscal year 2005 for stock-based compensation expense that is not deductible for income tax purposes in a foreign tax jurisdiction, offset by reversal of a \$0.2 million tax contingency reserve that was no longer required. Without the correction to the overstatement of tax benefits, the Company's effective tax rate for the nine months ended June 30, 2006 would have been approximately 39%.

8. Earnings Per Share

Basic earnings per share are computed using the weighted-average number of common shares outstanding during the period excluding outstanding nonvested restricted shares subject to repurchase. Diluted earnings per share are computed using the weighted-average number of common and dilutive potential common equivalent shares outstanding during the period. Potential common equivalent shares consist of common stock issuable upon exercise of stock options and nonvested restricted shares using the treasury stock method.

The following table is a reconciliation of the shares used to calculate basic and diluted earnings per share:

	Three Months Ended		Nine Months Ended	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
Weighted average shares outstanding - Basic	16,306,256	15,039,754	16,206,873	13,736,031
Effect of dilutive stock options and nonvested restricted stock awards	1,490,169	1,727,068	1,489,344	1,707,396
Weighted average shares outstanding - Diluted	17,796,425	16,766,822	17,696,217	15,443,427

The calculation of diluted net income per share excludes all anti-dilutive shares. For the three and nine months ended June 29, 2007, the number of anti-dilutive shares, as calculated based on the weighted average closing price of our common stock for the periods, was approximately 0.5 million shares. For the three and nine months ended June 30, 2006, the number of anti-dilutive shares, as calculated based on the weighted average closing price of our common stock for the periods, was approximately 0.3 million shares.

9. Segments, Geographic and Customer Information

The Company's reportable segments are VED and satcom equipment. The VED segment develops, manufactures and distributes high power/high frequency microwave and radio frequency signal components. The satcom equipment segment manufactures and supplies high power amplifiers and networks for satellite communication uplink and industrial applications. Segment information reported below is consistent with the manner in which it is reviewed and evaluated by the Company's chief operating decision maker (CODM), its chief executive officer, and is based on the nature of the Company's operations and products offered to customers.

20

Edgar Filing: CPI INTERNATIONAL, INC. - Form 10-Q

Summarized financial information concerning the Company's reportable segments is shown in the following tables:

	Three Months Ended		Nine Months Ended	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
Sales to external customers				
VED	\$ 70,651	\$ 73,050	\$ 209,842	\$ 205,843
Satcom equipment	16,667	14,711	49,643	51,226
	\$ 87,318	\$ 87,761	\$ 259,485	\$ 257,069
Intersegment product transfers				
VED	\$ 6,903	\$ 5,924	\$ 16,608	\$ 18,608
Satcom equipment	1		10	1
	\$ 6,904	\$ 5,924	\$ 16,618	\$ 18,609
EBITDA				
VED	\$ 19,231	\$ 19,001	\$ 54,747	\$ 52,462
Satcom equipment	1,842	(79)	4,460	4,773
Other	(3,739)	(3,657)	(8,478)	(13,402)
	\$ 17,334	\$ 15,265	\$ 50,729	\$ 43,833

Amounts not reported as VED or satcom equipment are reported as other. Other consists primarily of corporate operating expenses and certain other expenses that are managed by the corporate organization, such as business combination-related expenses, share-based compensation expense, and certain non-recurring or unusual expenses. The nine months ended June 30, 2006 included non-recurring expenses for a special bonus of \$3.25 million and expenses of \$3.8 million related to the relocation of the Company's Eimac operations from its former San Carlos, California facility to its nearby Palo Alto, California and Mountain View, California facilities. The special bonus was paid to employees and directors (other than directors who are employees or affiliates of Cypress) to reward them for the increase in Company value.

EBITDA represents earnings before provision for income taxes, net interest expense and depreciation and amortization. For the reasons listed below, the Company believes that GAAP-based financial information for leveraged businesses such as the Company's business should be supplemented by EBITDA so that investors better understand the Company's financial performance in connection with their analysis of the Company's business:

- EBITDA is a component of the measures used by the Company's board of directors and management team to evaluate the Company's operating performance;
- the Senior Credit Facility contains covenants that require the Company to maintain certain interest expense coverage and leverage ratios that contain EBITDA as a component, and the Company's management team uses EBITDA to monitor compliance with such covenants;
- EBITDA is a component of the measures used by the Company's management team to make day-to-day operating decisions;
- EBITDA facilitates comparisons between the Company's operating results and those of competitors with different capital structures and therefore is a component of the measures used by the Company's management to facilitate internal comparisons to competitors' results and the Company's industry in general; and

Edgar Filing: CPI INTERNATIONAL, INC. - Form 10-Q

- the payment of management bonuses is contingent upon, among other things, the satisfaction by the Company of certain targets that contain EBITDA as a component.

Other companies may define EBITDA differently and, as a result, the Company's measure of EBITDA may not be directly comparable to EBITDA of other companies. Although the Company uses EBITDA as a financial measure to assess the performance of its business, the use of EBITDA is limited because it does not include certain material costs, such as interest and taxes, necessary to operate the Company's business. When analyzing the Company's performance, EBITDA should be considered in addition to, and not as a substitute for, net income, cash flows from operating activities or other statements of operations or statements of cash flows data prepared in accordance with GAAP.

The following table reconciles net income to EBITDA:

	Three Months Ended		Nine Months Ended	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
Net income	\$ 8,131	\$ 4,468	\$ 19,726	\$ 11,028
Depreciation and amortization	2,225	2,335	6,607	6,786
Interest expense, net	5,143	5,945	15,757	18,409
Income tax expense	1,835	2,517	8,639	7,610
EBITDA	\$ 17,334	\$ 15,265	\$ 50,729	\$ 43,833

With the exception of goodwill, the Company does not identify or allocate assets by operating segment, nor does its CODM evaluate operating segments using discrete asset information.

Goodwill by reportable segment and geographic area was as follows:

	June 29, 2007	September 29, 2006
Reportable segments:		
VED	\$ 133,439	\$ 133,637
Satcom Equipment	13,831	13,852
	\$ 147,270	\$ 147,489
Geographic areas:		
United States	\$ 99,007	\$ 99,226
Canada	48,263	48,263
	\$ 147,270	\$ 147,489

The decrease in goodwill from September 29, 2006 to June 29, 2007 was due to an adjustment for tax benefits realized from the exercise of fully vested stock options that were acquired in a business combination.

Geographic sales by customer location were as follows for external customers:

	Three Months Ended		Nine Months Ended	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
United States	\$ 50,896	\$ 54,502	\$ 152,977	\$ 162,709
All foreign countries	36,422	33,259	106,508	94,360
Total sales	\$ 87,318	\$ 87,761	\$ 259,485	\$ 257,069

There were no individual foreign countries with sales greater than 10% of total sales for the periods presented.

Net property, plant and equipment by geographic area was as follows:

	June 29, 2007			September 29, 2006		
	Cost	Accumulated Depreciation and Amortization	Net Property, Plant and Equipment	Cost	Accumulated Depreciation and Amortization	Net Property, Plant and Equipment
United States	\$ 66,937	\$ (15,396)	\$ 51,541	\$ 64,527	\$ (11,221)	\$ 53,306
Canada	15,761	(1,977)	13,784	11,915	(1,440)	10,475
Other	178	(141)	37	177	(107)	70
Total	\$ 82,876	\$ (17,514)	\$ 65,362	\$ 76,619	\$ (12,768)	\$ 63,851

The U.S. Government is the only customer that accounted for 10% or more of the Company's consolidated sales in the three and nine months ended June 29, 2007 and June 30, 2006. Direct sales to the U.S. Government were \$14.6 million and \$43.6 million for the three and nine months ended June 29, 2007, respectively, and \$16.5 million and \$44.3 million for the three and nine months ended June 30, 2006, respectively. Accounts receivable from this customer represented 12% and 14% of consolidated accounts receivable as of June 29, 2007 and September 29, 2006, respectively.

10. Sale of San Carlos Assets

In February 2003, the Company entered into an agreement to sell the land and close its facilities located in San Carlos, California to consolidate the Company's Eimac operations into the Company's existing facility in nearby Palo Alto, California. In September 2006, the sale was completed. The aggregate sales proceeds were \$24.8 million, of which \$11.3 million was received in September 2006 and \$13.5 million was received as advance payments in fiscal year 2004. The Company had total selling costs of \$1.3 million related to the sale of the San Carlos property. The aggregate sales proceeds of \$24.8 million less the related selling costs of \$1.3 million, offset by the land and building's net book value of approximately \$23.5 million, resulted in no gain or loss on the sale.

11. Recently Released Accounting Pronouncements

In June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation (FIN) No. 48, Accounting for Income Tax Uncertainties. FIN No. 48 defines the threshold for recognizing the benefits of tax return positions in the financial statements as more-likely-than-not to be sustained by the taxing authority. The recently issued literature also provides guidance on the derecognition, measurement and classification of income tax uncertainties, along with any related interest and penalties. FIN No. 48 also includes guidance concerning accounting for income tax uncertainties in interim periods and increases the level of disclosures associated with any recorded income tax

uncertainties. FIN No. 48 is effective for fiscal years beginning after December 15, 2006. Any differences between the amounts recognized in the statements of financial position prior to the adoption of FIN No. 48 and the amounts reported after adoption will be accounted for as a cumulative-effect adjustment recorded to the beginning balance of retained earnings. The Company will be required to adopt FIN No. 48 in its fiscal year 2008 commencing September 29, 2007 and is currently in the process of determining the impact, if any, of adopting the provisions of this new standard on its financial position, results of operations and liquidity.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, which defines fair value, establishes a framework for measuring fair value under other accounting pronouncements that permit or require fair value measurements, changes the methods used to measure fair value and expands disclosures about fair value measurements. In particular, disclosures are required to provide information on: the extent to which fair value is used to measure assets and liabilities; the inputs used to develop measurements; and the effect of certain of the measurements on earnings (or changes in net assets). SFAS No. 157 is effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. Early adoption, as of the beginning of an entity's fiscal year, is also permitted, provided interim financial statements have not yet been issued. The Company will be required to adopt SFAS No. 157 in its fiscal year 2009 commencing October 4, 2008 and is currently evaluating the potential impact, if any, that the adoption of this new standard will have on its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R), which requires an employer to recognize the overfunded or underfunded status of a defined benefit plan as an asset or liability in its condensed consolidated balance sheet. Under SFAS No. 158, actuarial gains and losses and prior service costs or credits that have not yet been recognized through earnings as net periodic benefit cost will be recognized in other comprehensive income, net of tax, until they are amortized as a component of net periodic benefit cost. SFAS No. 158 is effective as of the end of the fiscal year ending after December 15, 2006 and shall not be applied retrospectively. The Company will be required to adopt SFAS No. 158 in the fourth quarter of fiscal year 2007 and is currently evaluating the impact, if any, that the adoption of this new standard will have on its consolidated financial statements.

In September 2006, the SEC issued SAB No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements. SAB No. 108 provides guidance on how prior year misstatements should be considered when quantifying misstatements in the current year financial statements. SAB No. 108 requires registrants to quantify misstatements using both a balance sheet and an income statement approach and evaluate whether either approach results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. SAB No. 108 does not change the guidance in SAB No. 99, Materiality, when evaluating the materiality of misstatements. SAB No. 108 is applicable for fiscal years ending after November 15, 2006. Upon initial application, SAB No. 108 permits a one-time cumulative effect adjustment to beginning retained earnings. The Company will adopt SAB No. 108 in the fourth quarter of fiscal year 2007 and is currently evaluating what effect adopting the new guidance will have on its consolidated results of operations and financial condition.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115. SFAS No. 159 permits companies to choose to measure many financial instruments and certain other items at fair value that are

not currently required to be measured at fair value. The objective of SFAS No. 159 is to provide opportunities to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply hedge accounting provisions. SFAS No. 159 also establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. The Company will be required to adopt SFAS No. 159 in its fiscal year 2009 commencing October 4, 2008 and is currently evaluating the impact, if any, that the adoption of this new standard will have on its consolidated financial statements.

12. Subsequent Events

Refinancing Transactions

Amended Credit Facility: On August 1, 2007, CPI entered into an Amended and Restated Credit Agreement (Credit Agreement), dated as of August 1, 2007 (Closing Date), which provides for an amended credit facility (Amended Credit Facility) in the aggregate principal amount of \$160 million, consisting of a \$100 million term loan facility (Term Loan) and a \$60 million revolving credit facility (Revolver), with a sub-facility of \$15 million for letters of credit and \$5 million for swing line loans. Upon certain specified conditions, including maintaining a senior secured leverage ratio of 3.75:1 or less on a pro forma basis, CPI may seek commitments for a new class of term loans, not to exceed \$125 million in the aggregate. The Amended Credit Facility is guaranteed by CPI International and all of the CPI's domestic subsidiaries and is secured by substantially all of the assets of CPI International, CPI and CPI's domestic subsidiaries.

Except as noted below, the Term Loan will mature on August 1, 2014 and the Revolver will mature on August 1, 2013. However, if, prior to August 1, 2011, CPI has not repaid or refinanced its \$125 million 8% Senior Subordinated Notes due 2012, both the Term Loan and the Revolver will mature on August 1, 2011.

Edgar Filing: CPI INTERNATIONAL, INC. - Form 10-Q

The Amended Credit Facility replaces CPI's existing \$130 million credit facility. On the Closing Date, CPI borrowed \$100 million under the Term Loan, the proceeds of which were principally used to satisfy outstanding term loan amounts of \$37.5 million under the existing Senior Credit Facility and to pay a dividend to CPI International to permit CPI International to repurchase and redeem \$58 million aggregate principal amount of its FR Notes as described below. Future borrowings under the Amended Credit Facility may be used for general corporate purposes.

Borrowings under the Amended Credit Facility will bear interest at a rate equal to, at CPI's option, LIBOR) or the ABR plus the applicable margin. The ABR is the greater of the (a) the Prime Rate and (b) the Federal Funds Rate plus 0.50%. For Term Loans, the applicable margin will be 2.00% for LIBOR borrowings and 1.00% for ABR borrowings. The applicable margins under the Revolver vary depending on CPI's leverage ratio, as defined in the Credit Agreement, and range from 1.25% to 2.00% for Eurodollar loans and from 0.25% to 1.00% for ABR borrowings.

In addition to customary fronting and administrative fees under the Amended Credit Facility, CPI will pay letter of credit participation fees equal to the applicable LIBOR margin per annum on the average daily amount of the letter of credit exposure, and a commitment fee on the average daily unused commitments under the Revolver. The commitment fee will vary depending on CPI's leverage ratio, as defined in the Credit Agreement, and will range from 0.25% to 0.50%.

25

The Amended Credit Facility requires that CPI repay \$250,000 of the Term Loan at the end of each fiscal quarter prior to the maturity date of the Term Loan, with the remainder due on the maturity date. CPI is required to prepay its outstanding loans under the Amended Credit Facility, subject to certain exceptions and limitations, with net cash proceeds received from certain events, including, without limitation (1) all such proceeds received from certain asset sales by CPI International, CPI or any of CPI's subsidiaries, (2) all such proceeds received from issuances of debt (other than certain specified permitted debt) or preferred stock by CPI International, CPI or any of CPI's subsidiaries, and (3) all such proceeds paid to CPI International, CPI or any of CPI's subsidiaries from casualty and condemnation events in excess of amounts applied to replace, restore or reinvest in any properties for which proceeds were paid within a specified period.

If CPI's leverage ratio, as defined in the Credit Agreement, exceeds 3.5:1 at the end of any fiscal year, CPI will also be required to make an annual prepayment within 90 days after the end of such fiscal year based on a calculation of excess cash flow, as defined in the Credit Agreement, less optional prepayments made during the fiscal year. CPI can make optional prepayments on the outstanding loans at any time without premium or penalty, except for customary breakage costs with respect to LIBOR loans.

The Amended Credit Facility contains a number of covenants that, among other things, restrict, subject to certain exceptions, the ability of CPI International, CPI and CPI's subsidiaries to: sell assets; engage in mergers and acquisitions; pay dividends and distributions or repurchase their capital stock; incur additional indebtedness or issue equity interests; make investments and loans; create liens or further negative pledges on assets; engage in certain transactions with affiliates; enter into sale and leaseback transactions; amend agreements or make prepayments relating to subordinated indebtedness; and amend or waive provisions of charter documents in a manner materially adverse to the lenders. CPI International, CPI and all of CPI's subsidiaries must comply with a maximum capital expenditure limitation and a maximum total secured leverage ratio, each calculated on a consolidated basis for the Company (including its subsidiaries).

FR Notes repurchase: On August 2, 2007, CPI International closed its tender offer of a portion of the FR Notes (which expired on August 1, 2007), with \$38,175,000 in aggregate principal amount of the FR Notes tendered and accepted for purchase. Tendering holders were paid on August 2, 2007 an aggregate of approximately \$39.4 million, representing \$1,032.50 per \$1,000.00 principal amount of the FR Notes tendered, plus accrued interest up to, but not including, the date of purchase.

FR Notes redemption: On August 6, 2007, the trustee for the FR Notes, upon instruction of CPI International, notified the holders of the FR Notes that \$19,825,000 aggregate principal amount of the FR Notes will be redeemed on September 5, 2007. The aggregate redemption price will be approximately \$20.4 million or \$1,030 per \$1,000 principal amount of the FR Notes, plus accrued and unpaid interest to, but not including, the date of redemption.

After giving effect to the purchase and redemption of the FR Notes described above, CPI International will have \$22.0 million aggregate principal amount of the FR Notes outstanding.

Malibu Research Acquisition

On August 10, 2007, the Company completed its acquisition of all outstanding common stock of the privately held Malibu Research Associates, Inc. for a purchase price of approximately \$22.0 million in cash and a potential earnout of up to \$15.0 million, which is primarily contingent upon the achievement of certain financial objectives over the three years following the acquisition. Malibu Research, headquartered in Camarillo, California, is a designer, manufacturer and integrator of advanced antenna systems for radar, radar simulators and telemetry systems, as well as for strategically vital data links used in ground, airborne, unmanned aerial vehicles (UAV) and shipboard systems.

13. Supplemental Guarantors Condensed Consolidating Financial Information (Unaudited)

On January 23, 2004, CPI issued \$125.0 million of 8% Notes that are guaranteed by CPI International and all of CPI's domestic subsidiaries. Separate financial statements of the guarantors are not presented because (i) the guarantors are wholly-owned and have fully and unconditionally guaranteed the 8% Notes on a joint and several basis and (ii) the Company's management has determined that such separate financial statements are not material to investors. Instead, presented below are the consolidating financial statements of: (a) the parent or CPI International, (b) the issuer, CPI, (c) the guarantor subsidiaries (all of the domestic subsidiaries), (d) the non-guarantor subsidiaries, (e) the consolidating elimination entries, and (f) the consolidated totals. The accompanying consolidating financial information should be read in connection with the condensed consolidated financial statements of CPI International.

Investments in subsidiaries are accounted for based on the equity method. The principal elimination entries eliminate investments in subsidiaries, intercompany balances, intercompany transactions and intercompany sales.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Our fiscal years are the 52- or 53-week periods that end on the Friday nearest September 30. Fiscal year 2007 comprises the 52-week period ending September 28, 2007 and fiscal year 2006 comprised the 52-week period ended September 29, 2006. The following discussion should be read in conjunction with the accompanying unaudited condensed consolidated financial statements, and the notes thereto, of CPI International, Inc.

Overview

CPI International, Inc., headquartered in Palo Alto, California, is the parent company of Communications & Power Industries, Inc., a leading provider of microwave, radio frequency, power and control solutions for critical defense, communications, medical, scientific and other applications. Communications & Power Industries, Inc. develops, manufactures and distributes products used to generate, amplify and transmit high-power/high-frequency microwave and radio frequency signals and/or provide power and control for various applications. End-use applications of these systems include the transmission of radar signals for navigation and location; transmission of deception signals for electronic countermeasures; transmission and amplification of voice, data and video signals for broadcasting, Internet and other types of communications; providing power and control for medical diagnostic imaging; and generating microwave energy for radiation therapy in the treatment of cancer and for various industrial and scientific applications.

Unless the context otherwise requires, CPI International means CPI International, Inc., and CPI means Communications & Power Industries, Inc. CPI is a direct subsidiary of CPI International. CPI International is a holding company with no operations of its own. The terms we, us, our and the Company refer to CPI International and its direct and indirect subsidiaries on a consolidated basis.

Malibu Research Acquisition

On August 10, 2007, we completed our acquisition of all outstanding common stock of the privately held Malibu Research Associates, Inc. for a purchase price of approximately \$22.0 million in cash and a potential earnout of up to \$15.0 million, which is primarily contingent upon the achievement of certain financial objectives over the three years following the acquisition. Malibu Research, headquartered in Camarillo, California, is a designer, manufacturer and integrator of advanced antenna systems for radar, radar simulators and telemetry systems, as well as for strategically vital data links used in ground, airborne, unmanned aerial vehicles (UAV) and shipboard systems.

Eimac Relocation

After relocating our Eimac operations (Eimac) from our former facility in San Carlos, California, we made organizational changes and consolidated Eimac into our Microwave Power Products division, located in Palo Alto, California, in June 2006. The Eimac integration was completed in January 2007. As part of this relocation and integration, Eimac experienced planned manufacturing disruptions stemming from the decommissioning of our production equipment in San Carlos and the required reconfiguration, installation and testing of that equipment prior to production readiness in Palo Alto. During fiscal year 2005, in anticipation of these planned disruptions, customers accelerated the placement of orders with Eimac. This order acceleration in fiscal year 2005, and the subsequent acceleration of product shipments, caused a reduction of customers' demand requirements from Eimac during fiscal year 2006, particularly in our medical, communications and industrial markets.

Eimac orders and sales for the nine months ended June 30, 2006 reflected the negative impact of the Eimac relocation and integration. In addition, during the nine months ended June 30, 2006, we incurred move-related expenses and Eimac experienced unfavorable overhead absorption and manufacturing variances due to the reduction in sales volume and relocation disruptions. By the first quarter of fiscal year 2007, orders and sales rates for Eimac had recovered to near their historical levels.

Orders

We sell our products into six end markets: radar, electronic warfare, medical, communications, industrial and scientific. We frequently refer to our radar and electronic warfare markets as our defense markets.

Our customer sales contracts are recorded as orders when we accept written customer purchase orders or contracts. Customer purchase orders with an undefined delivery schedule, or blanket purchase orders, are not reported as orders until the delivery date is determined. Our government sales contracts are not reported as orders until we have been notified that the contract has been funded. Total orders for a fiscal period represent the total dollar amount of customer orders recorded by us during the fiscal period, reduced by the dollar amount of any order cancellations or terminations during the fiscal period.

Our orders by market for the nine months ended June 29, 2007 and June 30, 2006 are summarized as follows (dollars in millions):

	Nine Months Ended June 29, 2007		June 30, 2006		Increase (Decrease)	
	Amount	% of Orders	Amount	% of Orders	Amount	Percent
Radar	\$ 92.4	34 %	\$ 88.6	36 %	\$ 3.8	4 %
Electronic Warfare	17.0	6	18.4	7	(1.4)	(8)
Medical	53.9	20	46.9	19	7.0	15
Communications	81.7	31	71.7	29	10.0	14
Industrial	16.1	6	16.7	7	(0.6)	(4)
Scientific	8.3	3	3.9	2	4.4	113
Total	\$ 269.4	100 %	\$ 246.2	100 %	\$ 23.2	9 %

Explanations for the order increase or decrease by market for the nine months ended June 29, 2007 compared to the nine months ended June 30, 2006 are as follows:

- Radar and Electronic Warfare:** The majority of our sales in the radar and electronic warfare markets are for products for domestic and international defense and government end uses. Orders in these markets are characterized by many smaller orders in the \$0.5 million to \$3.0 million range by product or program, and the timing of these orders may vary from year to year. On a combined basis, orders for the radar and electronic warfare markets increased from an aggregate of \$107.0 million in the nine months ended June 30, 2006 to an aggregate of \$109.4 million in the nine months ended June 29, 2007. This approximate 2% overall increase in orders for these markets on a combined basis is consistent with our expectations of overall low single digit percentage average long-term annual growth in these markets taken on a combined basis.
- Medical:** The increase in medical orders from the nine months ended June 30, 2006 to the nine months ended June 29, 2007 resulted from continued increases in orders for our magnetic resonance imaging (MRI) products due to growth in the number of MRI systems

on which we have products; increases in orders for our x-ray generators due to growth in the overall x-ray generator market and our share of this market, as well as increases in orders for our x-ray generators for a Russian tender program, now in its second year of supporting the expansion of the Russian medical infrastructure.

- **Communications:** The increase in communications orders was primarily attributable to increases in orders to foreign customers for satellite communications amplifiers used for news gathering and mobile applications, broadcast applications and direct-to-home applications. These increases were partially offset by a decrease in orders for our newer types of satellite communications amplifiers for certain programs for North American direct-to-home broadcast and military satellite communications applications, due to the timing of orders for these programs.
- **Industrial:** Orders in the industrial market, one of our smallest markets, are cyclical. The decrease in industrial orders was primarily attributable to the timing of orders for products used in electromagnetic susceptibility test programs and other industrial applications.
- **Scientific:** Orders in the scientific market, our smallest market, are historically one-time projects and can fluctuate significantly from period to period. The increase in scientific orders was primarily the result of orders for products for the Spallation Neutron Source at Oakridge National Laboratory.

Incoming order levels fluctuate significantly on a quarterly or annual basis, and a particular quarter's or year's order rate may not be indicative of future order levels. In addition, our sales are highly dependent upon manufacturing scheduling and performance and, accordingly, it is not possible to accurately predict when orders will be recognized as sales.

Backlog

As of June 29, 2007, we had an order backlog of \$198.4 million compared to an order backlog of \$184.8 million as of June 30, 2006. Backlog represents the cumulative balance, at a given point in time, of recorded customer sales orders that have not yet been shipped or recognized as sales. Backlog is increased when an order is received, and backlog is decreased when we recognize sales. We believe backlog and orders information is helpful to investors because this information may be indicative of future sales results. Although backlog consists of firm orders for which goods and services are yet to be provided, customers can, and sometimes do, terminate or modify these orders. However, historically the amount of modifications and terminations has not been material compared to total contract volume.

Results of Operations

We derive our revenue primarily from the sale of microwave and radio frequency products, including high-power microwave amplifiers, satellite communications amplifiers, medical x-ray imaging subsystems, and other related products. Our products generally have selling prices ranging from \$2,000 to \$100,000, with certain limited products priced up to \$1,000,000.

Cost of goods sold generally includes costs for raw materials, manufacturing costs, including allocation of overhead and other indirect costs, charges for reserves for excess and obsolete inventory, warranty claims and losses on fixed price contracts. Operating expenses generally consist of research and development, selling and marketing and general and administrative expenses.

Edgar Filing: CPI INTERNATIONAL, INC. - Form 10-Q

Three Months Ended June 29, 2007 Compared to Three Months Ended June 30, 2006

The following table sets forth our historical results of operations for each of the periods indicated (dollars in millions):

	Three Months Ended June 29, 2007		%	June 30, 2006		%
	Amount	% of Sales		Amount	% of Sales	
Sales	\$ 87.3	100.0	%	\$ 87.8	100.0	%
Cost of sales	58.7	67.2		60.9	69.4	
Gross profit	28.7	32.9		26.9	30.6	
Operating costs and expenses:						
Research and development	2.2	2.5		2.5	2.8	
Selling and marketing	4.9	5.6		5.2	5.9	
General and administrative	5.8	6.6		5.4	6.2	
Amortization of acquisition- related intangibles	0.5	0.6		0.5	0.6	
Net loss on disposition of fixed assets		0.0		0.2	0.2	
Total operating costs and expenses	13.5	15.5		14.0	15.9	
Operating income	15.1	17.3		12.9	14.7	
Interest expense, net	5.1	5.8		5.9	6.7	
Income before taxes	10.0	11.5		7.0	8.0	
Income tax expense	1.8	2.1		2.5	2.8	
Net income	\$ 8.1	9.3	%	\$ 4.5	5.1	%
Other Data:						
EBITDA (a)	\$ 17.3	19.8	%	\$ 15.3	17.4	%

Note: Totals may not equal the sum of the component line items due to independent rounding. Percentages are calculated based on rounded dollar amounts presented.

(a) EBITDA represents earnings before provision for income taxes, net interest expense and depreciation and amortization. For the reasons listed below, we believe that GAAP-based financial information for leveraged businesses such as ours should be supplemented by EBITDA so that investors better understand our financial performance in connection with their analysis of our business:

- EBITDA is a component of the measures used by our board of directors and management team to evaluate our operating performance;
- our senior credit facilities contain covenants that require us to maintain certain interest expense coverage and leverage ratios that contain EBITDA as a component, and our management team uses EBITDA to monitor compliance with such covenants;
- EBITDA is a component of the measures used by our management team to make day-to-day operating decisions;
- EBITDA facilitates comparisons between our operating results and those of competitors with different capital structures and therefore is a component of the measures used by the management to facilitate internal comparisons to competitors' results and our industry in general; and
- the payment of management bonuses is contingent upon, among other things, the satisfaction by us of certain targets that contain EBITDA as a component.

Other companies may define EBITDA differently and, as a result, our measure of EBITDA may not be directly comparable to EBITDA of other companies. Although we use EBITDA as a financial measure to assess the performance of our business, the use of EBITDA is limited because it does not include certain material costs, such as interest and taxes, necessary to operate our business. When analyzing our performance, EBITDA should be considered in addition to, and not as a substitute for, net income, cash flows from operating activities or other statements of operations or statements of cash flows data prepared in accordance with GAAP.

For a reconciliation of Net Income to EBITDA, see Note 9 of the accompanying unaudited condensed consolidated financial statements.

Sales: Our sales by market for the three months ended June 29, 2007, and June 30, 2006, are summarized as follows (dollars in millions):

	Three Months Ended June 29, 2007			June 30, 2006		Increase (Decrease)	
	Amount	% of Sales		Amount	% of Sales	Amount	Percent
Radar	\$ 31.5	36 %	\$ 32.1	37 %	\$ (0.6)	(2)%	
Electronic Warfare	5.0	6	7.0	8	(2.0)	(29)	
Medical	18.0	21	15.6	18	2.4	15	
Communications	27.3	31	24.9	28	2.4	10	
Industrial	4.7	5	6.5	7	(1.8)	(28)	
Scientific	0.8	1	1.7	2	(0.9)	(53)	
Total	\$ 87.3	100 %	\$ 87.8	100 %	\$ (0.5)	(1)%	

Sales for the three months ended June 29, 2007 of \$87.3 million were \$0.5 million, or approximately 1%, less than sales of \$87.8 million for the three months ended June 30, 2006. Explanations for the sales increase or decrease by market are as follows:

- Radar and Electronic Warfare:** The majority of our sales in the radar and electronic warfare markets are for products for domestic and international defense and government end uses. The timing of orders receipts and subsequent shipments in these markets may vary from year to year. On a combined basis, sales for these two markets decreased approximately 7% in the three months ended June 29, 2007 as compared to the three months ended June 30, 2006, primarily due to shipments made in the three months ended June 30, 2006 for certain electronic warfare programs that were not expected to, and did not, repeat in the three months ended June 29, 2007, as well as the timing of orders and sales for certain radar programs. Management believes that, on a combined basis, these markets will experience low single digit percentage average long-term annual growth.
- Medical:** The 15% increase in sales of our medical imaging and radiation therapy products was primarily due to increased sales of our products used in x-ray imaging. In the three months ended June 29, 2007, sales of x-ray generators to United States and foreign customers increased \$2.1 million due to growth in our market share and an increase in shipments for a Russian tender program, now in its second year of supporting the expansion of the Russian medical infrastructure. Shipments of our products used in MRI also increased due to an increase in sales of replacement products, or spares, resulting from growth in the number of MRI systems on which we have products.
- Communications:** The increase in sales in the communications market was primarily the result of increased sales of both newer and traditional satellite communications products for foreign

broadcast network and direct-to-home applications, as well as increased sales of newer products for foreign news gathering and mobile applications and U.S. military communications applications. These increases were partially offset by a decrease in shipments of our newer satellite communications products for North American direct-to-home broadcast applications due to the timing of these programs.

- **Industrial:** Sales in the industrial market, one of our smallest markets, are cyclical. The decrease in industrial sales was primarily due to timing of orders and shipments of products used for electromagnetic susceptibility test programs and other industrial applications.
- **Scientific:** Sales in the scientific market, our smallest market, are historically one-time projects and can fluctuate significantly from period to period. The decrease in scientific sales was primarily the result of shipments we made to various laboratories in the three months ended June 30, 2006 that did not repeat in the three months ended June 29, 2007.

Gross Profit. Gross profit was \$28.7 million, or 32.9% of sales, for the three months ended June 29, 2007 as compared to \$26.9 million, or 30.6% of sales, in the three months ended June 30, 2006. The three months ended June 30, 2006 included non-recurring expenses of approximately \$1.8 million for move-related expenses, including unfavorable overhead absorption and manufacturing variances, for Eimac. The three months ended June 29, 2007, as compared to the three months ended June 30, 2006, were favorably impacted by the shipment of products with higher gross margins and were unfavorably impacted by approximately \$0.5 million due to increases in our Canadian dollar denominated manufacturing expenses due to the weakening of the U.S. dollar.

Research and Development. Research and development expenses were \$2.2 million, or 2.5% of sales, for the three months ended June 29, 2007, a \$0.3 million decrease from \$2.5 million, or 2.8% of sales, for the three months ended June 30, 2006. The decrease in research and development in fiscal year 2007 was due primarily to more development engineering costs being charged to customer-sponsored research and development, which is reported as cost of sales. Total spending on research and development, including customer-sponsored research and development, was \$3.9 million for the three months ended June 29, 2007 and \$3.7 million in the three months ended June 30, 2006.

Selling and Marketing. Selling and marketing expenses were \$4.9 million, or 5.6% of sales, for the three months ended June 29, 2007, a \$0.3 million decrease from the \$5.2 million, or 5.9% of sales, for the three months ended June 30, 2006. The reduction in selling and marketing expenses for the three months ended June 29, 2007 compared to the three months ended June 30, 2006 was primarily due to higher spending in three months ended June 30, 2006 for new product introductions.

General and Administrative. General and administrative expenses were \$5.8 million, or 6.6% of sales, for the three months ended June 29, 2007, a \$0.4 million increase from the \$5.4 million, or 6.2% of sales, for the three months ended June 30, 2006. The increase in general and administrative expenses in the three months ended June 29, 2007 was primarily due to increases in foreign currency translation losses, incremental expenses associated with meeting the compliance requirements of Section 404 of the Sarbanes-Oxley Act of 2002, and higher stock-based compensation expenses. The increase in foreign currency translation losses is primarily due to the weakening of the U.S. dollar and its corresponding impact to the translation of our net Canadian liability position.

Amortization of Acquisition-Related Intangibles. Amortization of acquisition-related intangibles consists of purchase accounting charges for technology and other intangible assets. Amortization of acquisition-related intangibles was \$0.5 million for both the three months ended June 29, 2007 and the three months ended June 30, 2006.

Interest Expense, net (Interest Expense). Interest Expense of \$5.1 million for the three months ended June 29, 2007 was \$0.8 million lower than interest expense of \$5.9 million for the three months ended June 30, 2006. The reduction in interest expense in the three months ended June 29, 2007 compared to the three months ended June 30, 2006 was primarily due to lower debt levels resulting from term loan prepayments of \$5.0 million in December 2006, and \$47.5 million in May 2006 using the proceeds from the initial public offering of our common stock.

Income Tax Expense. We recorded an income tax expense of \$1.8 million and \$2.5 million for the three months ended June 29, 2007 and June 30, 2006, respectively. Our effective tax rate was approximately 18.4% for the three months ended June 29, 2007 as compared to approximately 36.0% for the three months ended June 30, 2006. The effective tax rate for the three months ended June 29, 2007 includes a discrete tax benefit of \$1.8 million related to the filing of amended income tax returns for prior years to reflect a change in estimate with regard to reporting Canadian income earned in the U.S. Our estimated fiscal year 2007 effective income tax rate, excluding discrete tax items, is approximately 38%.

Net Income. Net income was \$8.1 million, or 9.3% of sales, for the three months ended June 29, 2007 as compared to \$4.5 million, or 5.1% of sales, in the three months ended June 30, 2006. The increase in net income in the three months ended June 29, 2007 was due primarily to the absence of move-related expenses for Eimac, lower interest expense, and the income tax benefit from filing amended U.S. income tax returns for prior years.

EBITDA. EBITDA was \$17.3 million, or 19.8% of sales, for the three months ended June 29, 2007 as compared to \$15.3 million, or 17.4% of sales, for the three months ended June 30, 2006. The increase in EBITDA for the three months ended June 29, 2007 was primarily due to the absence in the fiscal year 2007 period of move-related expenses of \$2.3 million, including unfavorable overhead absorption and manufacturing variances, for the Eimac relocation, and a favorable mix of products with higher gross margins in the three months ended June 29, 2007; partially offset by EBITDA decreases in fiscal year 2007 from the weakening of the U.S. dollar and higher expenses for Sarbanes-Oxley compliance. The weakening of the U.S. dollar reduced EBITDA by a total of \$1.1 million due to increases in Canadian dollar denominated expenses and translation losses from our net Canadian liability position.

Edgar Filing: CPI INTERNATIONAL, INC. - Form 10-Q

Nine Months Ended June 29, 2007 Compared to Nine Months Ended June 30, 2006

The following table sets forth our historical results of operations for each of the periods indicated (dollars in millions):

	Nine Months Ended June 29, 2007		June 30, 2006	
	Amount	% of Sales	Amount	% of Sales
Sales	\$ 259.5	100.0	\$ 257.1	100.0
Cost of sales (a)	176.5	68.0	179.2	69.7
Gross profit	82.9	31.9	77.8	30.3
Operating costs and expenses:				
Research and development	6.5	2.5	6.4	2.5
Selling and marketing (a)	14.5	5.6	15.0	5.8
General and administrative (a)	16.1	6.2	17.4	6.8
Amortization of acquisition-related intangibles	1.6	0.6	1.6	0.6
Net loss on disposition of assets		0.0	0.4	0.2
Total operating costs and expenses	38.8	15.0	40.8	15.9
Operating income	44.1	17.0	37.0	14.4
Interest expense, net	15.8	6.1	18.4	7.2
Income before taxes	28.4	10.9	18.6	7.2
Income tax expense	8.6	3.3	7.6	3.0
Net income	\$ 19.7	7.6	\$ 11.0	4.3
Other Data:				
EBITDA (b)	\$ 50.7	19.5	\$ 43.8	17.0

(a) The nine months ended June 30, 2006 includes a special bonus expense (see **Special Bonus** below) of \$3.25 million, allocated as follows: \$0.3 million to cost of sales, \$0.2 million to selling and marketing and \$2.75 million to general and administrative.

(b) EBITDA represents earnings before provision for income taxes, net interest expense and depreciation and amortization. For the reasons listed below, we believe that GAAP-based financial information for leveraged businesses such as ours should be supplemented by EBITDA so that investors better understand our financial performance in connection with their analysis of our business:

- EBITDA is a component of the measures used by our board of directors and management team to evaluate our operating performance;
- our senior credit facilities contain covenants that require us to maintain certain interest expense coverage and leverage ratios that contain EBITDA as a component, and our management team uses EBITDA to monitor compliance with such covenants;
- EBITDA is a component of the measures used by our management team to make day-to-day operating decisions;
- EBITDA facilitates comparisons between our operating results and those of competitors with different capital structures and therefore is a component of the measures used by the management to facilitate internal comparisons to competitors' results and our industry in general; and
- the payment of management bonuses is contingent upon, among other things, the satisfaction by us of certain targets that contain EBITDA as a component.

Other companies may define EBITDA differently and, as a result, our measure of EBITDA may not be directly comparable to EBITDA of other companies. Although we use EBITDA as a financial measure to assess the performance of our business, the use of EBITDA is limited because it does not include certain material costs,

Edgar Filing: CPI INTERNATIONAL, INC. - Form 10-Q

such as interest and taxes, necessary to operate our business. When analyzing our performance, EBITDA should be considered in addition to, and not as a substitute for, net income, cash flows from operating activities or other statements of operations or statements of cash flows data prepared in accordance with GAAP.

For a reconciliation of Net Income to EBITDA, see Note 9 of the accompanying unaudited condensed consolidated financial statements.

Sales: Our sales by market for the nine months ended June 29, 2007 and June 30, 2006 are summarized as follows (dollars in millions):

	Nine Months Ended June 29, 2007		June 30, 2006		Increase (Decrease)	
	Amount	% of Orders	Amount	% of Orders	Amount	Percent
Radar	\$ 88.8	34 %	\$ 90.1	35 %	\$ (1.3)	(1)%
Electronic Warfare	17.9	7	20.0	8	(2.1)	(11)
Medical	52.1	20	42.8	17	9.3	22
Communications	80.5	31	83.6	33	(3.1)	(4)
Industrial	16.1	6	16.3	6	(0.2)	(1)
Scientific	4.1	2	4.3	1	(0.2)	(5)
Total	\$ 259.5	100 %	\$ 257.1	100 %	\$ 2.4	1 %

Sales for the nine months ended June 29, 2007 of \$259.5 million were \$2.4 million, or 1%, higher than sales of \$257.1 million for the nine months ended June 30, 2006. Explanations for the sales increase or decrease by market are as follows:

- Radar and Electronic Warfare:** The majority of our sales in the radar and electronic warfare markets are for products for domestic and international defense and government end uses. The timing of orders receipts and subsequent shipments in these markets may vary from year to year. On a combined basis, sales for these two markets decreased 3%, totaling an aggregate of \$110.1 million in the nine months ended June 30, 2006, as compared to an aggregate of \$106.7 million in the first nine months of fiscal year 2007. The slight decline in combined sales was due primarily to shipments made in the first nine months of fiscal year 2006 for certain electronic warfare programs that were not expected to, and did not, repeat in the first nine months of fiscal year 2007, as well as the timing of orders and sales for certain electronic warfare and radar programs. Management believes that, on a combined basis, these markets will experience low single digit percentage average long-term annual growth.
- Medical:** The 22% increase in sales of our medical imaging and radiation therapy products was primarily due to increased sales of our products used in x-ray imaging, in radiation therapy for the treatment of cancer and in MRI. In the nine months ended June 29, 2007, as compared to the nine months ended June 30, 2006, sales of replacement MRI products, or spares, increased due to growth in the number of MRI systems on which we have products. Sales of x-ray generators to U.S. and foreign customers increased \$5.8 million, including a \$1.9 million increase in sales of x-ray generators that are utilized in conjunction with equipment used for the treatment of cancer and a \$1.4 million increase in sales of x-ray generators for a Russian tender program, now in its second year of supporting the expansion of the Russian medical infrastructure.
- Communications:** The decrease in sales in the communications market was primarily the result of the timing of shipments for troposcatter communications programs. In fiscal year 2006, we enjoyed unusually strong sales of products for troposcatter communications programs, and our

shipments of products for these programs were \$1.8 million higher in the first nine months of fiscal year 2006 than in the first nine months of fiscal year 2007, as we currently have provided these programs with sufficient stock of our products. In addition, the first half of fiscal year 2006 contained higher sales of traditional satellite communications amplifiers for North American direct-to-home broadcast applications than the first half of fiscal year 2007, due to the cyclical nature of the direct-to-home broadcast market, and shipments of satellite communications amplifiers to an Indian government agency for a one-time application in the nine months ended June 30, 2006 did not recur in the nine months ended June 29, 2007. These decreases were partially offset by an increase in shipments of both traditional and newer satellite communications products to U.S. and foreign customers for various programs, including foreign satellite news gathering or mobile applications, broadcast network applications, direct-to-home broadcast applications and military satellite communications applications. These newer satellite communications products for the direct-to-home broadcast and military satellite communications applications were for the 30 gigahertz frequency band, or Ka-band, which is projected to be one of the major new satellite communications growth areas for both commercial and military applications.

- **Industrial:** Sales in the industrial market, one of our smallest markets, are cyclical. Industrial sales levels in the first nine months of fiscal year 2007 as compared to the first nine months of fiscal year 2006 were essentially unchanged.

- **Scientific:** Sales in the scientific market, our smallest market, are historically one-time projects and can fluctuate significantly from period to period. Scientific sales levels in the first nine months of fiscal year 2007 as compared to the first nine months of fiscal year 2006 were essentially unchanged.

Gross Profit. Gross profit was \$82.9 million, or 31.9% of sales, for the nine months ended June 29, 2007 as compared to \$77.8 million, or 30.3% of sales, in the nine months ended June 30, 2006. The nine months ended June 30, 2006 included non-recurring expenses of approximately \$5.6 million for move-related expenses, including unfavorable overhead absorption and manufacturing variances, from the Eimac relocation. The nine months ended June 29, 2007, as compared to the nine months ended June 30, 2006, were favorably impacted by the shipment of products with higher gross margins and were unfavorably impacted by approximately \$2.7 million due to increases in our Canadian dollar denominated manufacturing expenses resulting from the expiration of favorable foreign currency hedge contracts in March 2006 and the further weakening of the U.S. dollar.

Research and Development. Research and development expenses were \$6.5 million, or 2.5% of sales, for the nine months ended June 29, 2007, a \$0.1 million increase from \$6.4 million, or 2.5% of sales, for the nine months ended June 30, 2006. Total spending on research and development, including company-sponsored amounts charged to research and development, and customer-sponsored amounts, which is reported as cost of sales, increased to \$11.5 million, or 4.4% of sales in the nine months ended June 30, 2007 as compared to \$10.7 million, or 4.2% of sales, in the nine months ended June 30, 2006. The increase in research and development spending was primarily due to additional investment in the growth of medical diagnostic imaging products and vacuum electron devices (VED) products for radar, electronic warfare and certain of the satellite communication markets.

Selling and Marketing. Selling and marketing expenses were \$14.5 million, or 5.6% of sales, for the nine months ended June 29, 2007, a \$0.5 million decrease from the \$15.0 million, or 5.8% of sales, for the nine months ended June 30, 2006. The reduction in selling and marketing expenses for the first nine months of fiscal year 2007 compared to the first nine months of fiscal year 2006 was primarily due to higher spending in the first nine months of fiscal year 2006 for new product introductions. Selling and marketing expenses for the nine months ended June 30, 2006 included \$0.2 million of the special bonus discussed below.

General and Administrative. General and administrative expenses were \$16.1 million, or 6.2% of sales, for the nine months ended June 29, 2007, a \$1.3 million decrease from the \$17.4 million, or 6.8% of sales, for the nine months ended June 30, 2006. The nine months ended June 30, 2006 included \$2.75 million of the special bonus, discussed below, and Eimac relocation expenses of \$1.1 million. The nine months ended June 29, 2007 include approximately \$1.1 million for incremental expenses associated with meeting the compliance requirements of Section 404 of the Sarbanes-Oxley Act of 2002, \$0.4 million for additional expenses as a result of becoming a publicly traded company in April 2006, \$0.5 million for expenses associated with the evaluation of certain potential acquisition candidates, and \$0.4 million higher stock-based compensation expenses.

Special Bonus. On December 15, 2005, our board of directors approved the payment of \$3.25 million in special, one-time bonuses to our employees and directors (other than directors who are employees or affiliates of The Cypress Group) to reward them for the increase in company value. The special bonus was not paid pursuant to our management incentive plan, our 2006 Equity and Performance Incentive Plan or any of our other formal compensation plans. The bonus amount was not determined based on a formula, but was instead an amount determined by our board of directors to be reasonable compensation for the increase in company value. The special bonus was charged to the condensed consolidated statement of operations in the same lines as cash compensation paid to the same employees and directors, as follows: \$2.75 million to general and administrative, \$0.3 million to cost of sales, and \$0.2 million to selling and marketing.

Amortization of Acquisition-Related Intangibles. Amortization of acquisition-related intangibles consists of purchase accounting charges for technology and other intangible assets. Amortization of acquisition-related intangibles was \$1.6 million for both the nine months ended June 29, 2007 and the nine months ended June 30, 2006.

Interest Expense, net (Interest Expense). Interest expense of \$15.8 million for the nine months ended June 29, 2007 was \$2.6 million lower than interest expense of \$18.4 million for the nine months ended June 30, 2006. The reduction in interest expense for the nine months ended June 29, 2007 compared to the nine months ended June 30, 2006 was primarily due to the lower debt levels resulting from term loan prepayments of \$5.0 million in December 2006, and \$47.5 million in May 2006 using proceeds from the initial public offering of our common stock.

Income Tax Expense. We recorded an income tax expense of \$8.6 million and \$7.6 million for the nine months ended June 29, 2007 and June 30, 2006, respectively. Our effective tax rate was approximately 30.5% for the nine months ended June 29, 2007 as compared to approximately 40.8% for the nine months ended June 30, 2006. The effective tax rate for the nine months ended June 29, 2007 includes a discrete tax benefit of \$1.8 million that was recorded in the third quarter related to the filing of amended income tax returns for prior years to reflect a change in estimate with regard to reporting Canadian income earned in the U.S. Our estimated fiscal year 2007 effective income tax rate, excluding discrete tax items, is approximately 38%.

Income tax expense for the nine months ended June 30, 2006 included \$0.3 million of charges attributable to the fourth quarter of fiscal year 2005, consisting of \$0.5 million to correct the overstatement of tax benefits recorded in the fourth quarter of fiscal year 2005 for stock-based compensation expense that is not deductible for income tax purposes in a foreign tax jurisdiction, offset by reversal of a \$0.2 million tax contingency reserve that was no longer required. Without the correction to the overstatement of tax benefits, our effective tax rate for the nine months ended June 30, 2006 would have been approximately 39%.

Net Income. Net income was \$19.7 million, or 7.6% of sales, for the nine months ended June 29, 2007 as compared to \$11.0 million, or 4.3% of sales, in the nine months ended June 30, 2006. The increase in net income for the nine months ended June 29, 2007 was primarily due to the absence in fiscal year 2007 of non-recurring expenses for the Eimac relocation and the special bonus, and lower interest expense and a favorable mix of products with higher gross margins in fiscal year 2007; somewhat offset by increases in our Canadian dollar denominated expenses resulting from the expiration of favorable foreign currency hedge contracts in March 2006 and the further weakening of the U.S. dollar in fiscal year 2007. The nine months ended June 29, 2007 include incremental expenses associated with meeting the compliance requirements of Section 404 of the Sarbanes-Oxley Act of 2002, additional expenses as a result of becoming a publicly traded company in April 2006, \$0.5 million for expenses associated with the evaluation of certain potential acquisition candidates, and higher stock-based compensation expenses.

EBITDA. EBITDA was \$50.7 million, or 19.5% of sales, for the nine months ended June 29, 2007 as compared to \$43.8 million, or 17.0% of sales, in the nine months ended June 30, 2006. The increase in EBITDA for the first nine months of fiscal year 2007 was primarily due to the absence in the 2007 period of move-related expenses of \$6.8 million, including unfavorable overhead absorption and manufacturing variances for the Eimac relocation, the absence in fiscal year 2007 of non-recurring expenses for the special bonus of \$3.25 million, and higher sales and a favorable mix of products with higher gross margins in fiscal year 2007; partially offset by increases in our Canadian dollar denominated expenses of \$3.2 million resulting from the weakening of the U.S. dollar and expiration of favorable foreign currency hedge contracts in March 2006, higher stock-based compensation expenses in fiscal year 2007 of \$0.8 million, and higher acquisition-related, public company and Sarbanes-Oxley compliance expenses in fiscal year 2007.

Liquidity and Capital Resources

Overview

Our liquidity is affected by many factors, some of which are based on normal ongoing operations of our business and others that are related to uncertainties in the markets in which we compete and other global economic factors. We have historically financed, and intend to continue to finance, our capital and working capital requirements, including debt service and internal growth, through a combination of cash flows from our operations and borrowings under our senior credit facilities. Our primary uses of cash are cost of sales, operating expenses, debt service and capital expenditures.

Pro forma for our recent refinancing discussed below (including the redemption of a portion of CPI International's floating rate senior notes (the FR Notes) expected on September 5, 2007), we will have \$247.0 million in total principal amount of debt outstanding, compared to \$247.5 million as of September 29, 2006. As of June 29, 2007, we had cash and equivalents of \$39.4 million compared to \$30.2 million as of September 29, 2006. Cash balances in excess of operating requirements are invested daily in overnight U.S. Government securities and money market accounts.

Recent Refinancing Transactions

Amended Credit Facility: On August 1, 2007, CPI entered into an Amended and Restated Credit Agreement (Credit Agreement), dated as of August 1, 2007 (Closing Date), which provides for an amended credit facility (Amended Credit Facility) in the aggregate principal amount of \$160 million, consisting of a \$100 million term loan facility (Term Loan) and a \$60 million revolving credit facility,

with a sub-facility of \$15 million for letters of credit and \$5 million for swing line loans. Upon certain specified conditions, including maintaining a senior secured leverage ratio of 3.75:1 or less on a pro forma basis, CPI may seek commitments for a new class of term loans, not to exceed \$125 million in the aggregate. The Amended Credit Facility is guaranteed by CPI International and all of CPI's domestic subsidiaries and is secured by substantially all of the assets of CPI International, CPI and CPI's domestic subsidiaries. See Note 12 of the accompanying unaudited condensed consolidated financial statements for a summary of the terms and conditions of the Amended Credit Facility.

The Amended Credit Facility replaces CPI's existing \$130 million credit facility. On the Closing Date, CPI borrowed \$100 million under the Term Loan, the proceeds of which were principally used to satisfy outstanding term loan amounts under our existing senior credit facilities and to pay a dividend to CPI International to permit CPI International to repurchase and redeem \$58 million aggregate principal amount of its FR Notes as described below. Future borrowings under the Amended Credit Facility may be used for general corporate purposes.

FR Notes repurchase: On August 2, 2007, CPI International closed its tender offer for a portion of the FR Notes (which expired on August 1, 2007), with \$38,175,000 in aggregate principal amount of the FR Notes tendered and accepted for purchase. Tendering holders were paid an aggregate of approximately \$39.4 million, representing \$1,032.50 per \$1,000.00 principal amount of the FR Notes tendered, plus accrued interest up to, but not including, the date of purchase.

FR Notes redemption: On August 6, 2007, the trustee for the FR Notes, upon instruction of CPI International, notified the holders of the FR Notes that \$19,825,000 aggregate principal amount of the FR Notes will be redeemed on September 5, 2007. The aggregate redemption price will be approximately \$20.4 million or \$1,030 per \$1,000 principal amount of the FR Notes, plus accrued and unpaid interest to, but not including, the date of redemption.

We estimate that the Amended Credit Facility and the repurchase and redemption of a portion of the FR Notes as described above will result in annual interest savings of approximately \$2.0 million for the twelve months following the September 5, 2007 redemption of a portion of the FR Notes. In addition, we expect to incur approximately \$5.0 million in one-time, non-cash costs associated with the write-off of deferred debt issue costs and approximately \$2.0 million in redemption premiums and other expenses associated with the redemption and repurchase of an aggregate of \$58.0 million of the FR Notes.

Historical Operating, Investing and Financing Activities

Operating Activities.

Operating activities provided cash of \$19.3 million in the nine months ended June 29, 2007, which was attributable to net income of \$19.7 million and depreciation, amortization and other non-cash charges of \$8.8 million, partially offset by \$9.2 million for cash used for working capital. The primary uses of cash for working capital in the nine months ended June 29, 2007 were for increases in inventories of \$6.3 million due to anticipated higher sales volume for the upcoming two quarters, particularly for the

next three months, and accounts receivable of \$3.0 million due to the timing of customer shipments, and reduction in income taxes payable of \$3.9 million due primarily to income tax payments from the taxable gain on the sale of our San Carlos property in fiscal year 2006. The total amount of cash used for working capital was partially offset by increases in accounts payable and accrued expenses of \$4.3 million.

Operating activities provided cash of approximately \$1.9 million in the in the nine months ended June 30, 2006, which was attributable to net income of \$11.0 million, depreciation, amortization and other non-cash charges of \$7.7 million; partially offset by \$16.8 million for cash used for working capital. The principal uses of cash for working capital in the nine months ended June 30, 2006 were for increases in accounts receivable of \$8.9 million, inventories of \$3.6 million and decreases in advance payments from customers of \$6.8 million, partially offset by a \$4.2 million increase in income taxes payable.

Investing Activities.

Net cash used in investing activities was \$6.8 million for the nine months ended June 29, 2007 and \$8.6 million for the nine months ended June 30, 2006. The primary investing activity in each of these periods was for capital expenditures. For the nine months ended June 29, 2007, capital expenditures included \$3.7 million for a building expansion project for our Canadian manufacturing facility which was substantially completed in June 2007. Capital expenditures for the nine months ended June 30, 2006 included \$4.4 million for capital equipment, building and land lease improvements in Palo Alto, California related to the relocation of our Eimac division and \$1.2 million for a building expansion project at our Canadian facility.

Our continuing operations typically do not have large recurring capital expenditure requirements. Capital expenditures are generally made to replace existing assets, increase productivity, facilitate cost reductions or meet regulatory requirements. In fiscal year 2007, ongoing capital expenditures are expected to be approximately \$4.5 million, excluding costs incurred for our Canadian facility expansion.

Financing Activities.

Net cash used in financing activities was \$3.2 million for the nine months ended June 29, 2007, compared to net cash used in financing activities of \$7.2 million for the nine months ended June 30, 2006. Financing activities for the nine months ended June 29, 2007 consisted primarily of a \$5.0 million term loan repayment in December 2006 using available operating cash, partially offset by proceeds of \$1.1 million from the stock option exercises and shares purchases under our employee stock purchase plan, and \$0.7 million of excess tax benefits from stock option exercises. The \$5.0 million term loan repayment included a \$1.7 million required annual excess cash flow prepayment for fiscal year 2006 and an optional prepayment of \$3.3 million. No such required prepayment was made in the nine months ended June 30, 2006.

Financing activities for the nine months ended June 30, 2006 consisted of a \$37.5 million in net repayments on our term loan and a \$17.0 million special cash dividend to the holders of CPI International's common stock in December 2005, partially offset by \$47.3 million of net proceeds from our initial public offering of common stock (the IPO), after deduction of IPO expenses of \$5.6 million.

Commitments

Leases

We are committed to minimum rentals under non-cancelable operating lease agreements, primarily for land and facility space, that expire on various dates through 2050.

Debt Obligations

In addition to CPI's Amended Credit Facility described above under the caption *Recent Refinancing Transactions*, CPI has senior subordinated notes bearing interest at a rate of 8% per year, payable on February 1 and August 1 of each year. The 8% Notes will mature on February 1, 2012. The 8% Notes are unsecured obligations, jointly and severally guaranteed by CPI International and each of CPI's domestic subsidiaries. As of June 29, 2007, the outstanding principal balance of the 8% Notes was \$125.0 million.

After giving effect to the purchase and redemption of the FR Notes described above under the caption *Recent Refinancing Transactions*, CPI International will have outstanding \$22.0 million aggregate principal amount of the FR Notes issued at a 1% discount. The FR Notes require interest payments at an annual interest rate, reset at the beginning of each semi-annual period, equal to the then six-month LIBOR plus 5.75%, payable semiannually on February 1 and August 1 of each year. The interest rate on the semi-annual interest payment due August 1, 2007 is approximately 11.15% per annum. The FR Notes will mature on February 1, 2015. The FR Notes are general unsecured obligations of CPI International. The FR Notes are not guaranteed by any of CPI International's subsidiaries but are structurally subordinated to all existing and future indebtedness and other liabilities of CPI International's subsidiaries. The FR Notes are senior in right of payment to CPI International's existing and future indebtedness that is expressly subordinated to the FR Notes.

Interest Rate Swap

To hedge the interest rate exposure associated with the FR Notes, on April 15, 2005, we entered into an \$80.0 million interest rate swap contract (the *Swap*) to receive variable rate 6-month LIBOR interest and pay 4.15% fixed rate interest, which when combined with the 5.75% margin, results in a fixed rate of 9.9% on the FR Notes through January 31, 2008. The Swap interest payments are made semi-annually, beginning with the first payment on February 1, 2006. The Swap matures on January 31, 2008.

Guarantees

We have restricted cash of \$3.0 million and \$1.7 million as of June 29, 2007 and September 29, 2006, consisting primarily of bank guarantees from customer advance payments to our international subsidiaries and collateral for a construction contract. The bank guarantees become unrestricted cash when performance under the sales or supply contract is complete.

Under the terms of the Swap, we must provide collateral to match any unfavorable mark-to-market exposure (fair value) on the Swap. The collateral required totals a certain minimum amount plus an amount equal to the unfavorable mark-to-market exposure on the Swap. Generally, the required collateral will rise as interest rates decline. We posted \$0.5 million of collateral under the Swap, which is included in the condensed consolidated balance sheet in *prepaid and other current assets* as of June 29, 2007 and in *other long-term assets* as of September 29, 2006.

We believe that we have the financial resources to meet our business requirements for the next twelve months, including capital expenditures and working capital requirements, and to comply with the financial covenants in the documents governing our debt. Beyond the next twelve months, we expect our future cash flow from operations and the borrowing availability under our senior credit facilities, to remain sufficient to fund any ongoing investments in capital equipment and interest payments on our senior notes. There are no arrangements or other relationships with unconsolidated entities or other persons that are reasonably likely to materially affect liquidity or the availability of our requirements for capital.

Recently Released Accounting Pronouncements

In June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation (FIN) No. 48, Accounting for Income Tax Uncertainties. FIN No. 48 defines the threshold for recognizing the benefits of tax return positions in the financial statements as more-likely-than-not to be sustained by the taxing authority. The recently issued literature also provides guidance on the derecognition, measurement and classification of income tax uncertainties, along with any related interest and penalties. FIN No. 48 also includes guidance concerning accounting for income tax uncertainties in interim periods and increases the level of disclosures associated with any recorded income tax uncertainties. FIN No. 48 is effective for fiscal years beginning after December 15, 2006. Any differences between the amounts recognized in the statements of financial position prior to the adoption of FIN No. 48 and the amounts reported after adoption will be accounted for as a cumulative-effect adjustment recorded to the beginning balance of retained earnings. We will be required to adopt FIN No. 48 in our fiscal year 2008 commencing September 29, 2007 and are currently in the process of determining the impact, if any, of adopting the provisions of this new standard on our financial position, results of operations and liquidity.

In September 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements, which defines fair value, establishes a framework for measuring fair value under other accounting pronouncements that permit or require fair value measurements, changes the methods used to measure fair value and expands disclosures about fair value measurements. In particular, disclosures are required to provide information on: the extent to which fair value is used to measure assets and liabilities; the inputs used to develop measurements; and the effect of certain of the measurements on earnings (or changes in net assets). SFAS No. 157 is effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. Early adoption, as of the beginning of an entity's fiscal year, is also permitted, provided interim financial statements have not yet been issued. We will be required to adopt SFAS No. 157 in our fiscal year 2009 commencing October 4, 2008 and are currently evaluating the potential impact, if any, that the adoption of this new standard will have on our consolidated financial statements.

In September 2006, the FASB issued SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans an amendment of FASB Statements No. 87, 88, 106, and 132(R), which requires an employer to recognize the overfunded or underfunded status of a defined benefit plan as an asset or liability in its condensed consolidated balance sheet. Under SFAS No. 158, actuarial gains and losses and prior service costs or credits that have not yet been recognized through earnings as net periodic benefit cost will be recognized in other comprehensive income, net of tax, until they are amortized as a component of net periodic benefit cost. SFAS No. 158 is effective as of the end of the fiscal year ending after December 15, 2006 and shall not be applied retrospectively. We will be required to adopt SFAS No. 158 in the fourth quarter of fiscal year 2007 and are currently evaluating the impact, if any, that the adoption of this new standard will have on our consolidated financial statements.

In September 2006, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin (SAB) No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements. SAB No. 108 provides guidance on how prior year misstatements should be considered when quantifying misstatements in the current year financial statements. SAB No. 108 requires registrants to quantify misstatements using both a balance sheet and an income statement approach and evaluate whether either approach results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. SAB No. 108 does not change the guidance in SAB No. 99, Materiality, when evaluating the materiality of misstatements. SAB No. 108 is applicable for fiscal years ending after November 15, 2006. Upon initial application, SAB No. 108 permits a one-time cumulative effect adjustment to beginning retained earnings. We will adopt SAB No. 108 in the fourth quarter of fiscal year 2007 and are currently evaluating what effect adopting the new guidance will have on our consolidated results of operations and financial condition.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities - Including an amendment of FASB Statement No. 115. SFAS No. 159 permits companies to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. The objective of SFAS No. 159 is to provide opportunities to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply hedge accounting provisions. SFAS No. 159 also establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. We will be required to adopt SFAS No. 159 in our fiscal year 2009 commencing October 4, 2008 and are currently evaluating the impact, if any, that the adoption of this new standard will have on our consolidated financial statements.

Critical Accounting Policies and Estimates

Our consolidated financial statements are based on the selection and application of significant accounting policies. The preparation of these financial statements and application of these policies require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. However, we are not currently aware of any reasonably likely events or circumstances that would result in materially different results from current estimates.

We believe the following critical accounting policies are the most significant to the presentation of our financial statements and require the most subjective and complex judgments. These matters, and the judgments and uncertainties affecting them, are also essential to understanding our reported and future operating results.

Revenue recognition

We generally recognize revenue upon shipment of product, following receipt of written purchase orders, when the price is fixed or determinable, title has transferred and collectibility is reasonably assured. Approximately 1% of our sales for our fiscal years 2004 through 2006 are based on the percentage of completion method of accounting where the sales value is determined on the basis of costs incurred and estimates of costs at completion, which require management estimates of future costs. Changes in estimated costs at completion over time could have a material impact on our operating results.

Inventory reserves

We assess the valuation of inventory and periodically write down the value for estimated excess and obsolete inventory based upon actual usage and estimates about future demand. The excess balance determined by this analysis becomes the basis for our excess inventory charge. Management personnel play a key role in our excess inventory review process by providing updated sales forecasts, managing product rollovers and working with manufacturing to maximize recovery of excess inventory. If our estimates regarding demand are inaccurate or changes in technology affect demand for certain products in an unforeseen manner, we may incur losses or gains in excess of our established markdown reserve that could be material.

Management also reviews the carrying value of inventory for lower of cost or market on an individual product or contract basis. A loss reserve is charged to cost of sales if the estimated product cost or the contract cost at completion is in excess of net realizable value (selling price less estimated cost of disposal). If the actual contract cost at completion is different than originally estimated, then a loss or gain provision adjustment would be recorded that could have a material impact on our operating results.

Product warranty

Our products are generally warranted for a variety of periods, typically one to three years or a predetermined product usage life. A provision for estimated future costs of repair, replacement or customer accommodations is reflected in the consolidated financial statements included in this report. We assess the adequacy of our preexisting warranty liabilities and adjust the balance based on actual experience and changes in future expectations. The determination of product warranty reserves requires us to make estimates of product return rates and expected cost to repair or replace the products under warranty. If actual repair and replacement costs differ significantly from our estimates, then adjustments to recognize additional cost of sales may be required.

Recoverability of long-lived assets

We account for goodwill and other intangible assets in accordance with SFAS No. 142, Goodwill and Other Intangible Assets. SFAS No. 142 requires that goodwill and identifiable intangible assets with indefinite useful lives be tested for impairment at least annually. SFAS No. 142 also requires that intangible assets with estimable useful lives be amortized over their respective estimated useful lives and reviewed for impairment in accordance with SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. We amortize identifiable intangible assets on a straight-line basis over their useful lives of up to 50 years.

We assess the recoverability of the carrying value of goodwill and other intangible assets with indefinite useful lives at least annually or whenever events or changes in circumstances indicate that the carrying amount of the asset may not be fully recoverable. Recoverability of goodwill is measured at the reporting unit level (our five divisions) based on a two-step approach. First, the carrying amount of the reporting unit is compared to the fair value as estimated by the future net discounted cash flows expected to be generated by the reporting unit. To the extent that the carrying value of the reporting unit exceeds the fair value of the reporting unit, a second step is performed, wherein the reporting unit's assets and liabilities are valued. The implied fair value of goodwill is calculated as the fair value of the reporting unit in excess of the fair value of all non-goodwill assets and liabilities allocated to the reporting unit. To the extent the reporting unit's carrying value of goodwill exceeds its implied fair value, impairment exists and must be recognized. This process requires the use of discounted cash flow models that utilize estimates of future revenue and expenses as well as the selection of appropriate discount rates. There is inherent uncertainty in these estimates, and changes in these factors over time could result in an impairment charge.

At June 29, 2007 and September 29, 2006, the net carrying amount of goodwill and other intangible assets was \$221.0 million and \$223.0 million, respectively. As of June 29, 2007, no significant changes in the underlying business assumptions or circumstances that drive the impairment analysis led us to believe that goodwill might have been impaired. We will continue to evaluate the need for impairment if changes in circumstances or available information indicate that impairment may have occurred, and at least annually in the fourth quarter.

At June 29, 2007 and September 29, 2006, the net carrying amount of property, plant and equipment was \$65.0 million and \$64.0 million, respectively. We assess the recoverability of property, plant and equipment to be held and used by a comparison of the carrying amount of an asset or group of assets to the future net undiscounted cash flows expected to be generated by the asset or group of assets. If such assets are considered impaired, then the impairment recognized is measured as the amount by which the carrying amount of the assets exceeds the fair value of the assets. This process requires the use of cash flow models that utilize estimates of future revenue and expenses. There is inherent uncertainty in these estimates, and changes in these factors over time could result in an impairment charge.

A prolonged general economic downturn and, specifically, a prolonged downturn in the defense, communications or medical markets, or technological changes, as well as other market factors could intensify competitive pricing pressure, create an imbalance of industry supply and demand, or otherwise diminish volumes or profits. Such events, combined with changes in interest rates, could adversely affect our estimates of future net cash flows to be generated by our long-lived assets. Consequently, it is possible that our future operating results could be materially and adversely affected by additional impairment charges related to the recoverability of our long-lived assets.

Accounting for stock-based compensation

At the beginning of fiscal year 2006, we adopted SFAS No. 123 (revised 2004) or 123(R), Share-Based Payment, and SAB No. 107, Share-Based Payment, for our existing stock option plans under the prospective method. Under the prospective method, only new awards (or awards modified, repurchased, or cancelled after the effective date) are accounted for under the provisions of SFAS No. 123R. Previously, we applied the intrinsic-value method of accounting prescribed by Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations. Under the intrinsic-value method, compensation expense was recorded only if the market price of the stock exceeded the stock option exercise price at the measurement date. We will continue to account for stock option awards outstanding at September 30, 2005 using the intrinsic-value method of measuring equity share options unless such options are modified.

The fair value of each option award is estimated on the date of grant using the Black-Scholes model. The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable and requires the input of subjective assumptions, including the expected stock price volatility and estimated option life.

In accordance with SFAS No. 123R, prior to becoming a public entity in April 2006, we used the minimum value method to determine a calculated value, rather than a fair value, of share awards. Under the minimum value method, stock price volatility was assumed to be zero. The estimated fair value (or calculated value, as applicable) of our stock-based awards, less expected forfeitures, is amortized over the awards vesting period on a straight-line basis for awards granted after the adoption of SFAS No. 123R and on a graded vesting basis for awards granted prior to the adoption of SFAS No. 123R. Since our

common stock has not been publicly traded for a sufficient time period, the expected volatility is based on expected volatilities of similar companies that have a longer history of being publicly traded. The expected life of options granted is based on the simplified method for plain vanilla options in accordance with SEC SAB No. 107. The risk-free rates are based on the U.S. Treasury yield in effect at the time of the grant. For the three and nine months ended June 29, 2007, we recognized \$0.3 million and \$0.9 million in stock-based compensation expense, respectively. For the three and nine months ended June 30, 2006, we recognized \$0.1 million in stock-based compensation expense.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We do not use market risk sensitive instruments for trading or speculative purposes.

Interest rate risk: Our exposure to market risk for changes in interest rates relates primarily to our long-term debt.

Pro forma for our recent refinancing, described under the caption *Recent Refinancing Transactions* set forth under Liquidity and Capital Resources above, and following the redemption of a portion of CPI International's floating rate senior notes (*FR Notes*) expected on September 5, 2007, we will have fixed rate senior notes of \$125.0 million due in 2012, bearing interest at 8% per year and variable rate debt that comprises \$22.0 million FR Notes due in 2015 and a \$100.0 million term loan under our newly amended credit facility due in 2014. Our variable rate debt is subject to changes in the prime rate and the LIBOR rate.

In order to manage interest costs and risk, we entered into an interest rate swap agreement (*Swap*) during fiscal year 2005 with a financial institution on a total notional amount of \$80 million whereby we receive variable rate 6-month LIBOR interest and pay 4.15% fixed rate interest, which when combined with the 5.75% margin, results in a fixed rate of 9.9% on the floating rate notes through January 31, 2008. The total fixed interest rate of 9.9% at June 29, 2007, resulted in interest expense savings relative to variable rates of approximately \$0.2 million and \$0.8 million for the three and nine months ended June 29, 2007. Under the provisions of SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended, this arrangement was initially designated and qualified as an effective cash flow hedge of interest rate risk related to the \$80 million FR Notes which permitted recording the fair value of the Swap and corresponding unrealized gain or loss to accumulated other comprehensive income in the consolidated balance sheets.

In accordance with SFAS No. 133, the portion of the Swap associated with the anticipated retirement of FR Notes as of June 29, 2007 became ineffective and no longer qualifies for special hedge accounting treatment. Therefore, for the three and nine months ended June 29, 2007, we reported approximately \$0.1 million reduction to interest expense in our consolidated statements of operations for the ineffective portion of the Swap. As of June 29, 2007, the fair value of the Swap included in accumulated other comprehensive income in the consolidated balance sheets was \$0.5 million.

Foreign currency exchange risk: Although the majority of our revenue and expense activities are transacted in U.S. dollars, we do transact business in foreign countries. Our primary foreign currency cash flows are in Canada and several European countries. In an effort to reduce our foreign currency exposure to Canadian dollar denominated expenses, we enter into Canadian dollar forward contracts to hedge the Canadian dollar denominated costs for our manufacturing operation in Canada. Our Canadian dollar forward contracts are designated as a cash flow hedge and are considered highly effective, as defined by SFAS No. 133. The unrealized gains and losses from foreign exchange forward contracts are included in accumulated other comprehensive income in the consolidated balance sheets. If the

transaction being hedged fails to occur, or if a portion of any derivative is ineffective, then we promptly recognize the gain or loss on the associated financial instrument in the consolidated statements of operations. No ineffective amounts were recognized due to anticipated transactions failing to occur in the three and nine months ended June 29, 2007 and June 30, 2006.

As of June 29, 2007, we had entered into Canadian dollar forward contracts for approximately \$20.2 million (Canadian dollars), or 83% of estimated Canadian dollar denominated expenses through December 2007, at an average rate of approximately \$0.88 U.S. dollar to Canadian dollar. We estimate the impact of a one cent change in the U.S. dollar to Canadian dollar exchange rate (without giving effect to our Canadian dollar forward contracts) to be approximately \$0.5 million annually to operating income or approximately 1.9 cents to basic earnings per share and 1.7 cents to diluted earnings per share.

Net income in the three and nine months ended June 29, 2007 includes a recognized loss from foreign currency forward contracts of \$0.2 million. Net income in the three and nine months ended June 30, 2006 includes a recognized gain from foreign currency forward contracts of \$0.3 million and \$1.3 million, respectively. At June 29, 2007 and September 29, 2006, the fair value of the unrealized gain, net of tax, on Canadian dollar forward contracts was \$0.8 million and \$8,000, respectively.

Item 4. Controls and Procedures

Management, including our principal executive officer and principal financial officer, has evaluated, as of the end of the period covered by this report, the effectiveness of the design and operation of our disclosure controls and procedures with respect to the information generated for use in this report. Based upon, and as of the date of that evaluation, the principal executive officer and principal financial officer concluded that the disclosure controls and procedures were effective to provide reasonable assurances that information required to be disclosed in the reports filed or submitted under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

There have been no changes in our internal control over financial reporting that occurred during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
