Item 2.05 Costs Associated with Exit or Disposal Activities.

On January 15, 2009, the Company committed to a restructuring plan that will result in the reduction of approximately 43% of the Company's workforce. In connection with the restructuring plan, the Company will focus on its product candidates, MB07811 for the treatment of hyperlipidemia and MB07803 for the treatment of type 2 diabetes, as well as on advancing its glucagon antagonist program. Employees directly affected by the restructuring plan have received notification and will be provided with severance payments, continued benefits for a specified period of time and outplacement assistance. The Company expects to complete the restructuring plan by the end of the second quarter of 2009.

The Company anticipates incurring restructuring charges of approximately \$1.4 million, primarily associated with personnel-related termination costs. The majority of these costs will be recognized during the first quarter of 2009.

The severance-related charge that the Company expects to incur in connection with the restructuring is subject to a number of assumptions, and actual results may materially differ. The Company may also incur other material charges not currently contemplated due to events that may occur as a result of, or associated with, the restructuring plan.

The press release announcing the restructuring plan is attached hereto as Exhibit 99.1 and incorporated herein by reference.
