**Notes to Schedule of Investments:**

\*

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, based on quotes obtained from a quotation reporting system, established market makers, or independent pricing services.

Portfolio securities and other financial instruments for which market quotations are not readily available or if a development/event occurs that may significantly impact the value of a security, are fair-valued, in good faith, pursuant to procedures established by the Board of Trustees or persons acting at their discretion pursuant to procedures established by the Board of Trustees, including certain fixed income securities which may be valued with reference to securities whose prices are more readily available. The Fund's investments, including over-the-counter options, are valued daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the last quoted mean price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales. Independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Exchange traded options, futures and options on futures are valued at the settlement price determined by the relevant exchange. Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days. Investments initially valued in currencies other than the U.S. dollar are converted to the U.S. dollar using exchange rates obtained from pricing services. As a result, the Net Asset Value ( NAV ) of the Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange ( NYSE ) is closed and the NAV may change on days when an investor is not able to purchase or sell shares.

The prices used by the Fund to value securities may differ from the value that would be realized if the securities were sold and these differences could be material. The Fund's NAV is normally determined daily as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the NYSE on each day the NYSE is open for business.

- (a) Private Placement Restricted as to resale and may not have a readily available market. Securities with an aggregate value of \$123,320,136, representing 11.34% of total investments.
- (b) Illiquid security.
- (c) 144A Security Security exempt from registration, under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, typically only to qualified institutional buyers. Unless otherwise indicated, these securities are not considered to be illiquid.
- (d) Security in default-issuer has filed for bankruptcy.
- (e) Fair-valued Securities with an aggregate value of \$4,793,425, representing 0.44% of total investments.
- (f) Perpetual maturity security. Maturity date shown is the first call date. Interest rate is fixed until the first call date and variable thereafter.
- (g) All or partial amount segregated as collateral for swaps.
- (h) Non-income producing.
- (i) All or partial amount segregated as collateral for reverse repurchase agreements.

Edgar Filing: PIMCO CORPORATE OPPORTUNITY FUND - Form N-Q

(1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities compromising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities compromising the referenced index.

(2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities compromising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities compromising the referenced index.

(3) Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements at period-end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

(4) The maximum potential amount the Fund could be required to make as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

(5) The quoted market prices and resulting values for credit default swap agreements serve as an indicator of the status at February 28, 2009 of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement been closed/sold at the period-end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms

of the agreement.

**Fair Value Measurements** The Fund has adopted FASB Statement of Financial Accounting Standards No. 157, Fair Value Measurements ( SFAS 157 ). This standard clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value and requires additional disclosures about the use of the fair value measurements. Under this standard, fair-value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e. the exit price ) in an orderly transaction between market participants. The three levels of the fair value hierarchy under SFAS 157 are described below:

- Level 1 quoted prices in active markets for identical investments that the Fund has the ability to access
- Level 2 valuations based on other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.), or quotes from inactive exchanges
- Level 3 valuations based on significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The valuation techniques used by the Fund to measure fair value during the three months ended February 28, 2009 maximized the use of observable inputs and minimized the use of unobservable inputs. The Fund utilized the following fair value techniques on Level 3 investments: multi-dimensional relational pricing model and option adjusted spread pricing.

The input or methodology used for valuing securities are not necessary an indicator for the risk associated with investing in these securities.

The following is a summary of the inputs used at February 28, 2009 in valuing the Fund's investments carried at value:

	Investment in Securities		Other Financial Instruments
	Assets	Liabilities	
Level 1 - Quoted Prices	\$11,604,250		\$ 4,358,877
Level 2 - Other Significant Observable Inputs	1,041,303,946		(50,667,766)
Level 3 - Significant Unobservable Inputs	34,211,737		(207,822)
<b>Total</b>	<b>\$1,087,119,933</b>		<b>\$ (46,516,711)</b>

A roll forward of fair value measurements using significant unobservable inputs (Level 3) at February 28, 2009, is as follows:

	Investments in Securities		Other Financial Instruments
	Assets	Liabilities	
Beginning balance, 11/30/08	\$34,150,517	\$(376,800)	\$(727,607)
Net purchases (sales) and settlements	(5,443,844)	36,794	(45,903)
Accrued discounts (premiums)	(53,522)		
Total realized gain (loss)	46,633	150,406	
Total change in unrealized gain (loss)	(2,807,274)	189,600	565,688
Transfers in and/or out of Level 3	8,319,227		
<b>Ending balance, 2/28/09</b>	<b>\$34,211,737</b>		<b>\$ (207,822)</b>

**Disclosures about Derivative Instruments and Hedging Activities**-Effective December 1, 2008, the Fund adopted FASB Statement of Financial Standards No. 161 Disclosures about Derivative Instruments and Hedging Activities ( SFAS 161 ). This standard is an amendment to

## Edgar Filing: PIMCO CORPORATE OPPORTUNITY FUND - Form N-Q

FASB Statement No. 133 ( FASB 133 ), which expands the disclosure requirements of FAS 133 regarding an entity's derivative instruments and hedging activities.

The following is a summary of the fair valuations of the Fund's derivative instruments categorized by risk exposure:

	<b>Derivatives Unrealized Appreciation/Depreciation at 2/28/2009</b>
Interest rate contracts	\$4,097,499
Foreign exchange contracts	(1,591,640)
Credit contracts	(48,072,459)
