14. Stock Exchange Announcement dated 31 March 2014 entitled VODAFONE GROUP PLC TOTAL VOTING RIGHTS AND CAPITAL

15. Stock Exchange Announcement dated 31 March 2014 entitled NOTIFICATION OF TRANSACTIONS OF DIRECTORS, PERSONS DISCHARGING MANAGERIAL RESPONSIBILITY OR CONNECTED PERSONS

3 March 2014

\$29BN ANNUALPRODUCTIVITY INCREASE FROM GREATER ACCESS TO MOBILE BY WOMEN

- The *Vodafone Connected Women* report concludes that mobile technology could be used to lift 5.3m women out of illiteracy by 2020
- The Vodafone Foundation announces partnership with the Malala Fund to invest in new mobile-based literacy and education projects
- Mobile could reduce the number of domestic violence incidents against women in developed markets by a total of 80,000 between 2014 and 2020

The *Vodafone Connected Women* report, published today, has found that providing women with greater access to mobile phones and services could lead to a \$29 billion increase in annual global productivity from 2020 - equivalent to the 2012 GDP of Tanzania - as a result of greater female participation in the workforce and savings in public services.

Additionally, the report* - commissioned by Vodafone with research undertaken by Accenture and Oxford University's Saïd Business School - found that mobile-based literacy programmes could enable 5.3 million women to learn to read by 2020, mainly across the developing countries in which Vodafone operates. The report concluded that reducing female illiteracy in those countries would empower women to secure new work opportunities with a resultant increase in economic activity totalling \$3.4 billion per year from 2020.

Malala Fund collaboration

In light of the significant potential for mobile to transform female literacy levels in developing countries, the Vodafone Foundation has today announced the launch of a partnership with the philanthropic organisation established by Malala Yousafzai, ambassador for girls' education worldwide through the Malala Fund and author of *I am Malala: The Girl Who Stood Up for Education*. The Malala Fund was established in 2013 to support efforts to ensure girls in all countries and cultures are able to benefit from access to education. The Vodafone Foundation-Malala Fund partnership will explore ways of using mobile technology to tackle female illiteracy and expand female access to education.

Andrew Dunnett, Director, Vodafone Foundation, said: "Getting a mobile for the first time can change a woman's life forever, and - as the *Vodafone Connected Women* report demonstrates - preventing the gender gap from widening would yield a significant economic benefit. We look forward to working with the Malala Fund to give more women the knowledge and skills to take greater control of their lives and increase their participation in the workforce."

Mobile defence against domestic violence

Another key focus of the *Vodafone Connected Women* report is how mobile technology can be used to increase women's safety. The report found that mobile-based alert systems could reduce the number of domestic violence incidents against women by a total of 80,000 by 2020 if they were made more widely available by local police services. In addition to the broader positive social and cultural impact of reducing the number of domestic assaults against women, greater use of mobile technology in violence prevention would also generate an annual economic impact of \$800 million in 2020 through reduced healthcare, security and legal costs and enhanced productivity as women under threat remained fully able to participate in the workforce.

Andrew Dunnett added: Mobile alert systems also have a vital role to play in reducing the threat of domestic violence, and we would encourage all police services and agencies to make greater use of mobile technology to help keep vulnerable women safe.

VODAFONE FOUNDATION AND MALALA FUND PARTNERSHIP TO TACKLE FEMALE ILLITERACY AND EXPAND GIRLS ACCESS TO EDUCATION

The Vodafone Foundation has today announced the launch of a partnership with the Malala Fund - the philanthropic organisation established by **Malala Yousafzai**, ambassador for girls' education worldwide through the Malala Fund and author of *I am Malala: The Girl Who Stood Up for Education* - to promote mobile-based literacy and education projects around the world.

The Malala Fund was established in 2013 to support efforts to ensure girls in all countries and cultures are able to benefit from access to education. The Vodafone Foundation-Malala Fund partnership will explore ways of using mobile technology to tackle illiteracy among women and girls around the world and expand female access to education.

The Vodafone Foundation-Malala Fund collaboration comes in the light of the significant potential for mobile to transform female literacy levels in developing countries, with the *Connected Women* report*, also announced today, concluding that mobile technology could be used to lift 5.3m women out of illiteracy by 2020. The report was commissioned by Vodafone with research undertaken by Accenture and Oxford University's Saïd Business School.

The Vodafone Foundation's Mobile for Good programme combines Vodafone's charitable giving and technology to make a difference in the world. Globally, the Vodafone Foundation supports projects that are focused on delivering public benefit through the use of mobile technology across the areas of health, education and disaster relief.

Andrew Dunnett, Director, Vodafone Foundation, said: "Getting a mobile for the first time can change a woman's life forever, and - as the *Vodafone Connected Women* report demonstrates - preventing the gender gap from widening would yield a significant economic benefit. We look forward to working with the Malala Fund to give more women the knowledge and skills to take greater control of their lives and increase their participation in the workforce."

Shiza Shahid, CEO of the Malala Fund, said: We are delighted to announce our partnership with Vodafone Foundation. We hope our work will help empower the most disenfranchised girls through education and mobile technology.

NETWORKING ON THE ROAD: VOLKSWAGEN AND AUDI BANK ON VODAFONE

- **Vodafone continues to develop a strong position in the automotive market**
- **Bringing connectivity to Volkswagen and Audi vehicles**

Vodafone today announced a new agreement with Volkswagen and Audi in Europe to provide automotive connectivity, starting with new Audi models from 2015.

An embedded SIM chip developed specifically for the automobile industry will feature in new vehicles, The Audi connect portfolio currently comprises in-car navigation, communications and infotainment services together with a WLAN Hotspot. In 2013, the Audi S3 was the company's first model to integrate a 4G-capable infotainment system enabling Vodafone customers to benefit from access to the Vodafone 4G network in their vehicles. The S3 with Audi connect will be on display on this year's Vodafone CeBIT stand.

Chief Executive of Vodafone Machine-to-Machine, Erik Brenneis, said: We are pleased to supply Machine-to-Machine (M2M) communications to Volkswagen Group. As a result of this agreement, we will strengthen further our position in the automotive sector one of the key markets for M2M communication. Our efficient mobile communications networks ensure that the networked car is becoming more and more widespread, including across European national borders.

The global SIM will be widely installed in vehicles in future and will use the Vodafone network and global M2M service platform to provide customers with high-speed Internet access on the road. The SIM chip was specifically developed to meet the stringent quality requirements of the automobile industry and functions reliably at temperatures from -40° to +85° Celsius. The activation and service processes were designed by Vodafone and based on Volkswagen Group's specific requirements.

The automotive industry already occupies a central position in the rapidly emerging M2M communications sector. One of the main driving forces is the planned EU-wide eCall emergency call system which automatically sends out a SOS in the event of a vehicle accident. In addition, an increasing number of people are interested in accessing online information services, music and videos through the electronic systems built into their vehicles: these communications and internet-based infotainment services also underpin a strong growth trend in the M2M communications sector.

With more than twenty years of experience, Vodafone is a world leader in the field of M2M communications. Operating on a worldwide basis, a team of 250 specialists looks after the needs of companies from all major branches of industry, from automotive, through the energy and the transport and logistics sectors. In the most recent M2M ranking published by analysts Analysys Mason, Vodafone claimed first place for the third year in succession.

VODAFONE AND ASTRAZENECA ANNOUNCE PARTNERSHIP FOR MHEALTH PATIENT SERVICES

Vodafone and AstraZeneca announced today a global partnership to use mobile health (mHealth) services to improve health outcomes for patients with cardiovascular conditions. The collaboration will create new mobile and internet-based services to support patients through their treatment journey, improving medication adherence and giving patients confidence to manage their condition more effectively.

Vodafone will provide the technology, infrastructure and expertise for these services, as well as the ability to capture data from a variety of sources to improve overall engagement between patients and their Health Care Professionals (HCPs).

HCPs will be able to give patients the option to use these mHealth services, as an integral part of the patient care process, empowering them to manage their conditions as part of their daily routine. Patients will have access to educational material - personalised for their needs - and will benefit from coaching and treatment support to help manage their medication and lifestyle changes, and track their treatment progress.

The project will be led by the Intelligent Pharmaceutical Group within AstraZeneca, part of Global Medicines Development, working in close collaboration with the in-country marketing teams. Services will be designed to work across geographies, with the ability to adapt to local variations in regulations and patient care. Astra Zeneca has selected Vodafone in light of Vodafone's experience in delivering - and ability to scale - mHealth services.

Vodafone Director for Machine to Machine, Erik Brenneis, said, "Bringing together the best in connectivity with the best in treatment and education will create powerful and compelling outcomes for patients. AstraZeneca is a global leader in the mHealth field and we are delighted to work with them to develop these innovative services."

Andy Jones VP Pharmaceutical Innovation at AstraZeneca commented, "It is really exciting to see the progress being made in this area. This work is an excellent example of collaboration between AstraZeneca and Vodafone. Together we believe we are delivering something that will bring real benefit to patients in this important therapeutic area."

AstraZeneca operates in over 100 countries and its innovative medicines are used by millions of patients worldwide. For more information please visit: www.astrazeneca.com

22 March 2014

30TH ANNIVERSARY OF THE VODAFONE NAME

The Vodafone name was first revealed to the world 30 years ago today. Racal Electronics Plc announced the name of its *new portable and mobile public telecommunications service* at a media conference in London on 22 March 1984 and promised *to provide a truly portable and mobile nationwide public telephone network unavailable today.*

The 1984 media release also stated that *initially, the new service is likely to find wide use among people constantly on the move such as business executives, sales representatives, journalists, doctors and veterinary surgeons. Strong demand is expected from nationwide fleet operators typically those involved in construction, distribution, service, motoring and the public utilities.*

The Vodafone name was inspired by the words *voice*, *data* and *phone* and was conceived of by one of the company's original directors and the advertising agency Saatchi & Saatchi. Saatchi & Saatchi's proposal to spell *phone* as *fone* caused the name to be initially rejected by the then CEO Sir Gerry Whent but he relented in the end, reputedly saying *in for a penny, in for a pound you can have your flipping f as well.* He later came to regard the name as a masterstroke.

Today, Vodafone is the UK's most valuable brand and the 16th most valuable brand in the world (Source: 2014 Brand Finance Global 500).

The original media release from 22 March 1984 is viewable on the Vodafone website:

VODAFONE M-PESA COMES TO EUROPE FOR THE FIRST TIME

Leading mobile money service launches in Romania

Vodafone M-Pesa - the mobile money transfer and payment service that has transformed the lives of millions of people in emerging markets - has come to Europe for the first time.

M-Pesa, which launches in Romania today, will offer simple, safe and secure mobile money transfer and payment services to approximately seven million Romanians who transact mainly in cash. The service also offers banked customers the convenience of being able to access and transfer money via the mobile phone.

M-Pesa is based on simple text messaging technology and operates over any of Vodafone Romania's mobile network connections, including 4G services which launched in 2012. Romanian M-Pesa customers will be able to transfer as little as one new Romanian leu (0.22 euro cents) up to 30,000 lei (€ 6,715) per day.

Vodafone Director of Mobile Money Michael Joseph said: "The majority of people in Romania have at least one mobile device, but more than one third of the population do not have access to conventional banking. Vodafone M-Pesa is already used regularly by nearly 17 million customers and we look forward to bringing the significant benefits of the service to the people of Romania."

From today, Vodafone M-Pesa can be activated at any one of around 300 Vodafone Romania stores and participating retail outlets as well as through authorised agents, and will be accessible to approximately six million people in both rural and urban areas. It will be extended to other parts of the country, comprising a total of 2,000 retail and distribution points of presence by the end of 2014.

M-Pesa also will allow Vodafone Romania's customers to top up pre-pay airtime on a mobile device, pay utility bills, make a deposit and withdraw cash from participating agents, and purchase goods such as flowers, a newspaper and a coffee.

- ends -

Note to Editors

Developed by Vodafone, M-Pesa had approximately 16.8 million active customers as at 31 December 2013 and approximately 186,000 authorised agents worldwide. Vodafone M-Pesa customers make in excess of 900 million worth of person-to-person transactions per month.

Many other businesses are using the service to allow their customers to pay them easily and safely. Additionally in Kenya, Safaricom and Vodafone launched a savings and loans product in November 2012, called M-Shwari, in partnership with the Commercial Bank of Africa.

The addition of Romania continues the expansion of M-Pesa globally, following the launches in Egypt, India, Lesotho and Mozambique, over the past 12 months.

VODAFONE GROUP PLC
TOTAL VOTING RIGHTS AND CAPITAL

In conformity with Disclosure and Transparency Rule 5.6.1R, Vodafone Group Plc (Vodafone) hereby notifies the market of the following:

Vodafone s issued share capital consists of 28,811,923,128 ordinary shares of U.S.\$0.20/21 each with voting rights, of which 2,371,962,907 ordinary shares are held in Treasury.

Therefore, the total number of voting rights in Vodafone is 26,439,960,221. This figure may be used by shareholders as the denominator for the calculations by which they will determine if they are required to notify their interest in, or a change to their interest in, Vodafone under the FCA s Disclosure and Transparency Rules.

This announcement does not constitute, or form part of, an offer or any solicitation of an offer for securities in any jurisdiction.
