BANCO DE CHILE AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As of December 31, 2014 and 2013

(Expressed in million of Chilean pesos)

1. Company Information:

Banco de Chile is authorized to operate as a commercial bank from September 17, 1996, and according to the Article 25 of the Law 19.396 is the legal continuer of the Banco de Chile, which in turn resulted from the merger between Banco Nacional of Chile, Banco Agrícola y Banco de Valparaíso. Banco de Chile was formed on October 28, 1893, granted in front of the Public Notary of Santiago Mr. Eduardo Reyes Lavalle, authorized by Supreme Decree of November 28, 1893.

Banco de Chile (Banco de Chile or the Bank) is a Corporation organized under the laws of the Republic of Chile, regulated by the Superintendency of Banks and Financial Institutions (SBIF or Superintendencia). Since 2001, - when the bank was first listed on the New York Stock Exchange (NYSE), in the course of its American Depositary Receipt (ADR) program, which is also registered at the London Stock Exchange Banco de Chile additionally follows the regulations published by the United States Securities and Exchange Commission (SEC).

Banco de Chile offers a broad range of banking services to its customers, ranging from individuals to large corporations. The services are managed in large corporate banking, middle and small corporate banking, personal banking services and retail. Additionally, the Bank offers international as well as treasury banking services. The Bank's subsidiaries provide other services including securities brokerage, mutual fund and investment management, insurance brokerage, financial advisory and securitization.

Banco de Chile's legal domicile is Paseo Ahumada 251, Santiago, Chile and its Web site is www.bancochile.cl.

The consolidated financial statements of the Bank for the year ended December 31, 2014 were authorized for issuance in accordance with the directors' resolution on January 29, 2015.

For convenience of reader, these financial statements and their accompanying notes have been translated from Spanish to English. Certain accounting practices applied by the Bank that conform to rules issued by the Chilean Superintendency of Banks (SBIF) may not conform to generally accepted accounting principles in the United States (US GAAP) or to International Financial Reporting Standards (IFRS).

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles:

(a) Basis of preparation:

Legal provisions

The General Banking Law in its Article No. 15 authorizes the Chilean Superintendency of Banks (SBIF) to issue generally applicable accounting standards for entities it supervises. The Corporations Law, in turn, requires generally accepted accounting principles to be followed.

Based on the aforementioned laws, banks should use the criteria provided by the Superintendency in accordance with the Compendium of Accounting Standards, and any matter not addressed therein, as long as it does not contradict its instructions, should adhere to generally accepted accounting principles in technical standards issued by the Chilean Association of Accountants, that coincide with International Accounting Standards and International Financial Reporting Standards agreed upon by the International Accounting Standards Board (IASB). Should there be discrepancies between these generally accepted accounting principles and the accounting criteria issued by the SBIF, these shall prevail.

(b) Basis of consolidation:

The financial statements of Banco de Chile as of December 31, 2014 and 2013 have been consolidated with its Chilean subsidiaries and foreign subsidiary using the global integration method (line-by-line). They include preparation of individual financial statements of the Bank and companies that participate in the consolidation, and it include adjustments and reclassifications necessary to homologue accounting policies and valuation criteria applied by the Bank. The Consolidated Financial Statements have been prepared using the same accounting policies for similar transactions and other events in equivalent circumstances.

Significant intercompany transactions and balances (assets, liabilities, equity, income, expenses and cash flows) originated in operations performed between the Bank and its subsidiaries and between subsidiaries have been eliminated in the consolidation process. The non-controlling interest corresponding to the participation percentage of third parties in subsidiaries, which the Bank does not own directly or indirectly, has been recognized and is shown separately in the consolidated shareholders' equity of Banco de Chile.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(b) Basis of consolidation, continued:

(i) Subsidiaries

Consolidated financial statements as of December 31, 2014 and 2013 incorporate financial statements of the Bank and its subsidiaries. According IFRS 10 Consolidated Financial Statements , control requires exposure or rights to variable returns and the ability to affect those returns through power over an investee. Specifically the Bank have power over the investee when has existing rights that give it the ability to direct the relevant activities of the investee.

When the Bank has less than a majority of the voting rights of an investee, but these voting rights are enough to have the ability to direct the relevant activities unilaterally, then conclude the Bank has control. The Bank considers all factors and relevant circumstances to evaluate if their voting rights are enough to obtain the control, which it includes:

- The amount of voting rights that the Bank has, related to the amount of voting rights of the others stakeholders.
- Potential voting rights maintained by the Bank, other holders of voting rights or other parties.
- Rights emanated from other contractual arrangements.
- Any additional circumstance that indicate that the Bank have or have not the ability to manage the relevant activities when that decisions need to be taken, including behavior patterns of vote in previous shareholders meetings.

(ii) Associates and Joint Ventures:

Associates

An associate is an entity over whose operating and financial management policy decisions the Bank has significant influence, without to have the control over the associate. Significant influence is generally presumed when the Bank holds between 20% and 50% of the voting rights.

Edgar Filing: BANK OF CHILE - Form 6-K

Other considered factors when determining whether the Bank has significant influence over another entity are the representation on the board of directors and the existence of material intercompany transactions. The existence of these factors could determine the existence of significant influence over an entity even though the Bank had participation less than 20% of the voting rights.

Investments in associates where exists significant influence, are accounted for using the equity method. In accordance with the equity method, the Bank's investments are initially recorded at cost, and subsequently increased or decreased to reflect the proportional participation of the Bank in the net income or loss of the associate and other movements recognized in its shareholders' equity. Goodwill arising from the acquisition of an associate is included in the net book value, net of any accumulated impairment loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(b) Basis of consolidation, continued:

(ii) Associates and Joint Ventures, continued:

Joint Ventures

Joint Ventures are joint arrangements whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement. Joint control exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

According IFRS 11, an entity shall be determining type of joint arrangement: Joint Operation or Joint Venture .

For investments defined like Joint Operation , their assets, liabilities, income and expenses are recognised by their participation in joint operation.

For investments defined like Joint Venture , they will be registered according equity method.

Investments that, for their characteristics, are defined like Joint Ventures are the following:

- Artikos S.A.
- Servipag Ltda.

(iii) Shares or rights in other companies

Edgar Filing: BANK OF CHILE - Form 6-K

These are entities in which the Bank does not have significant influence. They are presented at acquisition value (historical cost).

(iv) Special purpose entities

According to current regulation, the Bank must be analyzing continuously its consolidation area, considering that the principal criteria are the control that the Bank has in an entity and not its percentage of equity participation.

As of December 31, 2014 and 2013 the Bank does not control and has not created any SPEs.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(b) Basis of consolidation, continued:

(v) Fund management

The Bank and its subsidiaries manage and administer assets held in mutual funds and other investment products on behalf of investors, perceiving a paid according to the service provided and according to market conditions. Managed resources are owned by third parties and therefore not included in the Statement of Financial Position.

According to established in IFRS 10, for consolidation purposes is necessary to assess the role of the Bank and its subsidiaries with respect to the funds they manage, must determine whether that role is Agent or Principal. This assessment should consider the following:

- The scope of their authority to make decisions about the investee.
- The rights held by third parties.
- The remuneration to which he is entitled under remuneration arrangements.
- Exposure, decision maker, the variability of returns from other interests that keeps the investee.

The Bank and its subsidiaries manage on behalf and for the benefit of investors, acting in that relationship only as Agent. Under this category, and as provided in the aforementioned rule, do not control these funds when they exercise their authority to make decisions. Therefore, as of December 31, 2014 and 2013 act as agent, and therefore do not consolidate any fund.

(c) Non-controlling interest:

Non-controlling interest represents the share of losses, income and net assets that the Bank does not control, neither directly or indirectly. It is presented as a separate item in the Consolidated Statement of Comprehensive Income and the Consolidated Statement of Financial Position.

(d) Use of estimates and judgment:

The Consolidated Financial Statements include estimates made by the Senior Management of the Bank and of the consolidated entities to quantify certain of the assets, liabilities, income, expenses and commitments that are recorded in them. Basically, these estimates are made in function of the best information available, and refer to:

1. Goodwill valuation (Note No. 15);
2. Useful lives of property and equipment and intangible assets (Note No. 15 and No. 16);
3. Current taxes and deferred taxes (Note No.17);
4. Provisions (Note No. 24);
5. Contingencies and commitments (Note No. 26);
6. Provision for loan losses (Note No.11, Note No. 12 and Note No. 32);
7. Fair value of financial assets and liabilities (Note No. 39)

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(d) Use of estimates and judgment, continued:

During the year ended December 31, 2014, there have been no other significant changes, different to it indicated above.

Estimates and relevant assumptions are regularly reviewed by the Bank's Management to quantify certain assets, liabilities, income, expenses and commitments. The accounting estimations reviewed are recognised in the period in which the estimate is evaluated.

(e) Financial asset and liability valuation criteria:

Measurement is the process of determining the monetary amounts at which the elements of the financial statements are to be recognized and carried in the Statement of Financial Position and the Comprehensive Income. This involves selecting the particular basis or method of measurement.

In the Consolidated Financial Statements several measuring bases are used with different levels mixed among them. These bases or methods include the following:

(i) Initial recognition

The Bank and its subsidiaries recognize loans to customers, trading and investment securities, deposits, debt issued and subordinated liabilities and other assets o liabilities on the date of negotiation. Purchases and sales of financial assets performed on a regular basis are recognized as of the trade date on which the Bank committed to purchase or sell the asset.

(ii) Classification

Assets, liabilities and income accounts have been classified in conformity with standards issued by the Superintendency of Banks.

(iii) Derecognition

The Bank and its subsidiaries derecognize a financial asset (or where applicable part of a financial asset) from its Consolidated Statement of Financial Position when the contractual rights to the cash flows of the financial asset have expired or when the contractual rights to receive the cash flows of the financial asset are transferred during a transaction in which all ownership risks and rewards of the financial asset are transferred. Any portion of transferred financial assets that is created or retained by the Bank is recognized as a separate asset or liability.

When the Bank transfers a financial asset, it assesses to what extent it has retained the risks and rewards of ownership. In this case:

(a) If substantially all risks and rewards of ownership of the financial asset have been transferred, it is derecognized, and any rights or obligations created or retained upon transfer are recognized separately as assets or liabilities.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(e) Financial asset and liability valuation criteria, continued:

(iii) Derecognition, continued:

(b) If substantially all risks and rewards of ownership of the financial asset have been retained, the Bank continues to recognize it.

(c) If substantially all risks and rewards of ownership of the financial asset are neither transferred nor retained, the Bank will determine if it has retained control of the financial asset. In this case:

(i) If it has not retained control, the financial asset will be derecognized, and any rights or obligations created or retained upon transfer will be recognized separately as assets or liabilities.

(ii) If the entity has retained control, it will continue to recognize the financial asset in the Consolidated Financial Statement by an amount equal to its exposure to changes in value that can experience and recognize a financial liability associated to the transferred financial asset.

The Bank derecognizes a financial liability (or a portion thereof) from its Consolidated Statement of Financial Position if, and only if, it has extinguished or, in other words, when the obligation specified in the corresponding contract has been paid or settled or has expired.

(iv) Offsetting

Financial assets and liabilities are offset and the net amount is reported in the Statement of Financial Position if, and only if, the Bank has the legally enforceable right to set off the recognized amounts and there is an intention to settle on a net basis or to realize an asset and settle the liability simultaneously.

Income and expenses are shown net only if accounting standards allow such treatment, or in the case of gains and losses arising from a group of similar transactions such as the Bank's trading activities.

(v) Valuation at amortized cost

Amortized cost is the amount at which a financial asset or liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortization (calculated using the effective interest rate method) of any difference between that initial amount and the maturity amount and minus any reduction for impairment.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(e) Financial asset and liability valuation criteria, continued:

(vi) Fair value measurements

Fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The most objective and common fair value is the price that you would pay on an active, transparent and deep market (quoted price or market price).

When available, the Bank estimates the fair value of an instrument using quoted prices in an active market for that instrument. A market is considered active if quoted prices are readily and regularly available and represent actual and regularly occurring market transactions on an arm's length basis.

If a market for a financial instrument is not active, the Bank establishes fair value using a valuation technique. These valuation techniques include the use of recent market transactions between knowledgeable, willing parties in an arm's length transaction, if available, as well as references to the fair value of other instruments that are substantially the same, discounted cash flows and options pricing models.

The chosen valuation technique use the maximum observable market data, relies as little as possible on estimates performed by the Bank, incorporates factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Inputs into the valuation technique reasonably represent market expectations and include risk and return factors that are inherent in the financial instrument. Periodically, the Bank calibrates the valuation techniques and tests it for validity using prices from observable current market transaction in the same instrument or based on any available observable market data.

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price (i.e. the fair value of the consideration given or received) unless the fair value of that instrument is evidenced by comparison with other observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets.

Edgar Filing: BANK OF CHILE - Form 6-K

When transaction price provides the best evidence of fair value at initial recognition, the financial instrument is initially measured at the transaction price and any difference between this price and the value initially obtained from a valuation model is subsequently recognized in income.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(e) Financial asset and liability valuation criteria, continued:

(vi) Fair value measurements, continued:

The Bank has financial assets and liabilities that offset each other's market risks. In these cases, average market prices are used as a basis for establishing these values.

Fair value estimates obtained from models are adjusted for any other factors, such as liquidity risk or model uncertainties; to the extent that the Bank believes that a third-party market participant would take them into account in pricing a transaction.

The Bank's fair value disclosures are included in Note 39.

(f) Presentation and functional currency:

The items included in the financial statements of each of the entities of Banco de Chile and its subsidiaries are valued using the currency of the primary economic environment in which it operates (functional currency). The functional currency of Banco de Chile is the Chilean peso, which is also the currency used to present the entity's consolidated financial statements, that is the currency of the primary economic environment in which the Bank operates, as well as obeying to the currency that influences in the costs and income structure.

(g) Transactions in foreign currency:

Transactions in currencies other than the functional currency are considered to be in foreign currency and are initially recorded at the exchange rate of the functional currency on the transaction date. Monetary assets and liabilities denominated in foreign currencies are converted using the exchange rate of the functional currency as of the date of the Statement of Financial Position. All differences are recorded as a debit or credit to income.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(g) Transactions in foreign currency, continued:

As of December 31, 2014, the Bank applied the exchange rate of accounting representation according to the standards issued by the Superintendency of Banks, where assets expressed in dollars are shown to their equivalent value in Chilean pesos calculated using the following exchange rate of Ch\$606.09 to US\$1. As of December 31, 2013, the Bank used the observed exchange rate equivalent to Ch\$525.72 to US\$1.

The gain of MCh\$70,225 for net foreign exchange transactions, net (foreign exchange income of MCh\$71,457 in 2013) shown in the Consolidated Statement of Comprehensive Income, includes recognition of the effects of exchange rate variations on assets and liabilities in foreign currency or indexed to exchange rates, and the result of foreign exchange transactions conducted by the Bank and its subsidiaries.

(h) Segment reporting:

The Bank's operating segments are determined based on its different business units, considering the following factors:

(i) That it conducts business activities from which income is obtained and expenses are incurred (including income and expenses relating to transactions with other components of the same entity).

(ii) That its operating results are reviewed regularly by the entity's highest decision-making authority for operating decisions, to decide about resource allocation for the segment and evaluate its performance; and

(iii) That separate financial information is available.

(i) Cash and cash equivalents:

The Consolidated Statement of Cash Flows shows the changes in cash and cash equivalents derived from operating activities, investment activities and financing activities during the year. The indirect method has been used in the preparation of this statement.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(i) Cash and cash equivalents, continued:

For the preparation of Consolidated Financial Statements of Cash Flow it is considered the following concepts:

(i) Cash and cash equivalents correspond to Cash and Bank Deposits, plus (minus) the net balance of transactions in the course of collection that are shown in the Consolidated Statement of Financial Position, plus instruments held-for-trading and available-for-sale that are highly liquid and have an insignificant risk of change in value, maturing in less than three months from the date of acquisition, plus repurchase agreements that are in that situation. Also includes investments in fixed income mutual funds, according to instructions of the SBIF, that are presented under Trading Instruments in the Consolidated Statement of Financial Position.

(ii) Operating activities: corresponds to normal activities of the Bank, as well as other activities that cannot classify like investing or financing activities.

(iii) Investing activities: correspond to the acquisition, sale or disposition other forms, of long-term assets and other investments that not include in cash and cash equivalent.

(iv) Financing activities: corresponds to the activities that produce changes in the amount and composition of the equity and the liabilities that are not included in the operating or investing activities.

(j) Financial assets held-for-trading:

Financial assets held-for-trading consist of securities acquired with the intention of generating profits as a result of short-term prices fluctuation or as a result of brokerage activities, or are part of a portfolio on which a short-term profit-generating pattern exists.

Edgar Filing: BANK OF CHILE - Form 6-K

Financial assets held-for-trading are stated at their fair market value as of the Consolidated Statement of Financial Position date. Gains or losses from their fair market value adjustments, as well as gains or losses from trading activities, are included in Gains (losses) from trading and brokerage activities in the Consolidated Statement of Comprehensive Income. Accrued interest and revaluations are reported as Gains (losses) from trading and brokerage activities .

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(k) Repurchase agreements and security lending and borrowing transactions:

The Bank engages in transactions with repurchase agreements as a form of investment. The securities purchased under these agreements are recognized on the Bank's Consolidated Statement of Financial Position under *Receivables from Repurchase Agreements and Security Lending*, which is valued in accordance with the agreed-upon interest rate, through of method of amortised cost. According to rules, the Bank not register as own portfolio the instruments bought within resale agreements.

The Bank also enters into security repurchase agreements as a form of financing. Investments that are sold subject to a repurchase obligation and serve as collateral for borrowings are reclassified as *Financial Assets held-for-trading* or *Available-for-sale Instruments*. The liability to repurchase the investment is classified as *Payables from Repurchase Agreements and Security Lending*, which is valued in accordance with the agreed-upon interest rate.

As of December 31, 2014 and 2013 it not exist operations corresponding to securities lending.

(l) Derivative instruments:

The Bank maintains contracts of Derivative financial instruments, for cover the exposition of risk of foreign currency and interest rate. These contracts are recorded in the Consolidated Statement of Financial Position at their cost (included transactions costs) and subsequently measured at fair value. Derivative instruments are reported as an asset when their fair value is positive and as a liability when negative under the item *Derivative Instruments*.

Changes in fair value of derivative contracts held for trading purpose are included under *Profit (loss) net of financial operations*, in the Consolidated Statement of Comprehensive Income.

In addition, the Bank includes in the valorization of derivatives the *Counterparty Valuation Adjustment (CVA)*, to reflect the counterparty risk in the determination of fair value. This valorization doesn't consider the Bank's own credit risk, known as *Debit Valuation Adjustment (DVA)* in conformity with standards issued by SBIF.

Certain embedded derivatives in other financial instruments are treated as separate derivatives when their risk and characteristics are not closely related to those of the main contract and if the contract in its entirety is not recorded at its fair value with its unrealized gains and losses included in income.

At the moment of subscription of a derivative contract must be designated by the Bank as a derivative instrument for trading or hedging purposes.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(l) Derivative instruments, continued:

If a derivative instrument is classified as a hedging instrument, it can be:

- (1) A hedge of the fair value of existing assets or liabilities or firm commitments, or
- (2) A hedge of cash flows related to existing assets or liabilities or forecasted transactions.

A hedge relationship for hedge accounting purposes must comply with all of the following conditions:

- (a) at its inception, the hedge relationship has been formally documented;
- (b) it is expected that the hedge will be highly effective;
- (c) the effectiveness of the hedge can be measured in a reasonable manner; and
- (d) the hedge is highly effective with respect to the hedged risk on an ongoing basis and throughout the entire hedge relationship.

The Bank presents and measures individual hedges (where there is a specific identification of hedged item and hedged instruments) by classification, according to the following criteria:

Fair value hedges: changes in the fair value of a hedged instruments derivative, designed like fair value hedges, are recognized in income under the line Net interest income and/or Foreign exchange transactions, net. Hedged item also is presented to fair value, related to the risk to be hedge. Gains or losses from hedged risk are recognized in income under the line Net interest income and adjust the book value of item hedged.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(l) Derivative instruments, continued:

Cash flow hedge: changes in the fair value of financial instruments derivative designated like cash flow hedge are recognised in Other Comprehensive Income, to the extent that hedge is effective and hedge is reclassified to income in the item Net interest income and/or Foreign exchange transactions, net, when hedged item affects the income of the Bank produced for the interest rate risk or foreign exchange risk, respectively. If the hedge is not effective, changes in fair value are recognised directly in income in the item Net financial operating income.

If the hedged instruments does not comply with criteria of hedge accounting of cash flow, it expires or is sold, it suspend or executed, this hedge must be discontinued prospectively. Accumulated gains or losses recognised previously in the equity are maintained there until projected transactions occur, in that moment will be registered in Consolidated Statement of Income (in te item Net interest income and/or Foreign exchange transactions, net, depend of the hedge), lesser than it foresees that the transaction will not execute, in this case it will be registered immediately in Consolidated Statement of Income (in te item Net interest income and/or Foreign exchange transactions, net, depend of the hedge).

(m) Loans to customers:

Loans to customers include originated and purchased non-derivative financial assets with fixed or determinable payments that are not quoted on an active market and which the Bank does not intend to sell immediately or in the short-term.

(i) Valuation method

Loans are initially measured at cost plus incremental transaction costs, and subsequently measured at amortized cost using the effective interest rate method, except when the Bank defined some loans as hedged items, which are measured at fair value, changes are recorded in the Consolidated Statement of Income, as described in letter (l) of this note.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(m) Loans to customers, continued:

(ii) Lease contracts

Accounts receivable for leasing contracts, included under the caption Loans to customers correspond to periodic rent installments of contracts which meet the definition to be classified as financial leases and are presented at their nominal value net of unearned interest as of each year-end.

(iii) Factoring transactions

Corresponds to invoices and other commercial instruments representative of credit, with or without recourse, received in factoring operations and which are registered to book value plus interest and adjustments until to maturity.

In those cases where the transfer of these instruments it was made without responsibility of the grantor, the Bank assumes the default risk.

(iv) Impairment of loans

The impaired portfolio includes loans of debtors for which there is evidence that they will not fulfill some of their obligations on the agreed upon payment conditions without the possibility of recovering what is owed, having to recur to the guarantees, through exercising judicial payment actions or agreeing upon other conditions.

The following are certain situations that constitute evidence that the debtors will not fulfill their obligations with the Bank in accordance with what has been agreed upon, and that their loans are impaired:

- Financial difficulties evident of the debtor or significant worsening of their credit quality.
- Notorious indicators that the debtor will go into bankruptcy or into a forced restructuring of debts or that effectively bankruptcy or a similar measure has been filed in relation to their payment obligations, including delaying or non-payment of obligations.
- Forced restructuring of a loan due to economic or legal factors related to the debtor, whether by decreasing the payment obligation or delaying the principal, interest or commissions.
- The obligations of the debtor are negotiated with a significant loss due to the vulnerability of the debtor's payment capacity.
- Adverse changes produced in the technological, market, economic or legal area in which the debtor operates, which potentially compromise the debtor's payment capacity.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(m) Loans to customers, continued:

(iv) Impairment of loans, continued:

In any case, when dealing with debtors subject to individual assessment, are considered in impaired portfolio all credits of debtors classified in some the Non-complying Loans categories, as well as in categories B3 and B4 of Substandard Portfolio. Also, being subject to assessment debtors group, the impaired portfolio includes all credits of the Non-complying loans.

The Bank incorporates the loans to impaired portfolio and keeps them in that portfolio, until it is not observed a normalization of the capacity or conduct of payment.

(v) Allowance for loan losses

Allowances are required to cover the risk of loan losses have been established in accordance with the instructions issued by the Superintendency of Banks. The loans are presented net of those allowances and, in the case of loans and in the case of contingent loans, they are shown in liabilities under Provisions .

In accordance with what is stipulated by the Superintendency of Banks, models or methods are used based on an individual and group analysis of debtors, to establish allowance for loan losses.

(v.i) Allowance for individual evaluations

An individual analysis of debtors is applied to individuals and companies that are of such significance with respect to size, complexity or level of exposure to the bank, that they must be analyzed in detail.

Likewise, the analysis of borrowers should focus on its ability to payment, to have sufficient and reliable information, and to analyze in regard to guarantees, terms, interest rates, currency and revaluation, etc.

For purposes of establish the allowances and before the assignment to one of three categories of loans portfolio: Normal, Substandard and Non-complying Loans, it must classify the debtors and their operations related to loans and contingent loans in the categories that apply.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****2. Summary of Significant Accounting Principles, continued:**

(m) Loans to customers, continued:

(v) Allowance for loan losses, continued:

(v.i) Allowance for individual evaluations, continued:

v.i.1 Normal Loans and Substandard Loans:

Normal loans correspond to borrowers who are up to date on their payment obligations and show no sign of deterioration in their credit quality. Loans classified in categories A1 through A6.

Substandard loans includes all borrowers with insufficient payment capacity or significant deterioration of payment capacity that may be reasonably expected not to comply with all principal and interest payments obligations set forth in the credit agreement.

This category also includes all loans that have been non-performing for more than 30 days. Loans classified in this category are B1 through B4.

As a result of individual analysis of the debtors, the banks must classify them in the following categories, assigning, subsequently, the percentage of probability of default and loss given default resulting in the corresponding percentage of expected loss:

Classification	Category	Probability of default (%)	Loss given default (%)	Expected loss (%)
Normal Loans	A1	0.04	90.0	0.03600
	A2	0.10	82.5	0.08250
	A3	0.25	87.5	0.21875
	A4	2.00	87.5	1.75000

Edgar Filing: BANK OF CHILE - Form 6-K

A5	4.75	90.0	4.27500
A6	10.00	90.0	9.00000

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(m) Loans to customers, continued:

(v) Allowance for loan losses, continued:

(v.i) Allowance for individual evaluations, continued:

v.i.1 Normal Loans and Substandard Loans, continued:

Allowances for Normal and Substandard Loans

To determine the amount of allowances to be constitute for normal and substandard portfolio, previously should be estimated the exposure to subject to the allowances, which will be applied to respective expected loss (expressed in decimals), which consist of probability of default (PD) and loss given default (LGD) established for the category in which the debtor and/or guarantor belong, as appropriate.

The exposure affects to allowances applicable to loans plus contingent loans minus the amounts to be recovered by way of the foreclosure of guarantees. Loans means the book value of credit of the respective debtor, while for contingent loans, the value resulting from to apply the indicated in No.3 of Chapter B-3 of Compilation of Standards of the Chilean Superintendency of Banks (RAN).

The banks must use the following equation:

$$\text{Provision} = (\text{ESA-GE}) \times (\text{PD debtor} / 100) \times (\text{LGD debtor} / 100) + \text{GE} \times (\text{PD guarantor} / 100) \times (\text{LGD guarantor} / 100)$$

Where:

ESA = Exposure subject to allowances
GE = Guaranteed exposure
EAP = (Loans + Contingent Loans) Financial Guarantees

However, independent of the results obtained from the equation above, the bank must be assigned a minimum provision level of 0.50% of the Normal Loans (including contingent loans).

v.i.2 Non-complying Loans

The non-complying loans corresponds to borrowers and its credits whose payment capacity is seriously at risk and who have a high likelihood of filing for bankruptcy or are renegotiating credit terms to avoid bankruptcy. This category comprises all loans and contingent loans outstanding from debtors that have at least one installment payment of interest or principal overdue for 90 days or more. This group is composed of debtors belonging to categories C1 through C6 of the classification level and all loans, inclusive contingent loans, which maintain the same debtors.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****2. Summary of Significant Accounting Principles, continued:**

(m) Loans to customers, continued:

(v) Allowance for loan losses, continued:

(v.i) Allowance for individual evaluations, continued:

v.i.2 Non-complying Loans, continued:

For purposes to establish the allowances on the non-complying loans, the Bank dispose the use of percentage of allowances to be applied on the amount of exposure, which corresponds to the amount of loans and contingent loans that maintain the same debtor. To apply that percentage, must be estimated a expected loss rate, less the amount of the exposure the recoveries by way of foreclosure of guarantees and, if there are available specific background, also must be deducting present value of recoveries obtainable exerting collection actions, net of expenses associated with them. This loss percentage must be categorized in one of the six levels defined by the range of expected actual losses by the Bank for all transactions of the same debtor.

These categories, their range of loss as estimated by the Bank and the percentages of allowance that definitive must be applied on the amount of exposures, are listed in the following table:

Type of Loan	Classification	Expected loss	Allowance (%)
Non-complying loans	C1	Up to 3%	2
	C2	More than 3% up to 20%	10
	C3	More than 20% up to 30%	25
	C4	More than 30% up to 50%	40
	C5	More than 50% up to 80%	65
	C6	More than 80%	90

For these loans, the expected loss must be calculated in the following manner:

Edgar Filing: BANK OF CHILE - Form 6-K

Expected loss $= (TE - R) / TE$

Allowance $= TE \times (AP/100)$

Where:

TE = total exposure

R = recoverable amount based on estimates of collateral value and collection efforts

AP = allowance percentage (based on the category in which the expected loss should be classified).

Table of Contents

2. Summary of Significant Accounting Principles, continued:

(m) Loans to customers, continued:

(v) Allowance for loan losses, continued:

(v.ii) Allowances for group evaluations

Group evaluations are relevant to address a large number of operations whose individual amounts are low or small companies. Such assessments, and the criteria for application, must be consistent with the transaction of give the credit.

Group evaluations requires the formation of groups of loans with similar characteristics in terms of type of debtors and conditions agreed, to establish technically based estimates by prudential criteria and following both the payment behavior of the group that concerned as recoveries of defaulted loans and consequently provide the necessary provisions to cover the risk of the portfolio.

Banks may use two alternative methods for determining provisions for retail loans that are evaluated as a group.

Under first method, it will be used the experience to explain the payment behavior of each homogeneous group of debtors and recoveries through collateral and of collection process, when it correspond, with objective of to estimate directly a percentage of expected losses that will be apply to the amount of the loans of respective group.

Under second method, the banks will segment to debtors in homogeneous groups, according described above, associating to each group a determined probability of default and a percentage of recovery based in a historic analysis. The amount of provisions to register it will be obtained multiplied the total loans of respective group by the percentages of estimated default and of loss given the default.

In both methods, estimated loss must be related with type of portfolio and terms of operations.

The Bank to determine its provisions has opted for using second method.

In the case of consumer loans are not considered collateral for purposes of estimating the expected loss.

Allowances are establish according with the results of the application of the methods used by the Bank, distinguishing between allowances over normal portfolio and over the non-complying loans, and those that protect the contingent credit risks associated with these portfolios.

The non-complying loans includes loans and contingent credits linked to debtors that have delay more than 90 days in the payment of interest or principal, including all their credits, even 100% of the amount of contingent credit, related to the same debtor has it .

2. Summary of Significant Accounting Principles, continued:

(m) Loans to customers, continued:

(vi) Charge-offs

Generally, the charge-offs are produced when the contractual rights on cash flows end. In case of loans, even if the above does not happen, it will proceed to charge-offs the respective asset balances.

The charge-off refers to derecognition of the assets in the Statement of Financial Position, related to the respective transaction and, therefore, the part that could not be past-due if a loan is payable in installments, or a lease.

The charge-off must be to make using credit risk provisions constituted, whatever the cause for which the charge-off was produced.

(vi.i) Charge-offs of loans to customers

Charge-off loans to customers, other than leasing operations, shall be made in accordance to the following circumstances occurs:

- a) The Bank, based on all available information, concludes that will not obtain any cash flow of the credit recorded as an asset.
- b) When the debt (without executive title , a collectability category pursuant to local law) meets 90 days since it was recorded as an asset.
- c) At the time the term set by the statute of limitations runs out and as result legal actions are precluded in order to request payment through executive trial or upon rejection or abandonment of title execution issued by judicial and non-recourse resolution.
- d) When past-due term of a transaction complies with the following:

Edgar Filing: BANK OF CHILE - Form 6-K

Type of Loan	Term
Consumer loans - secured and unsecured	6 months
Other transactions - unsecured	24 months
Commercial loans - secured	36 months
Residential mortgage loans	48 months

The term represents the time elapsed since the date on which payment of all or part of the obligation in default became due.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(m) Loans to customers, continued:

(vi) Charge-offs, continued

(vi.ii) Charge-offs of lease operations

Assets for leasing operations must be charge-offs against the following circumstances, whichever occurs first:

- a) The bank concludes that there is no possibility of the rent recoveries and the value of the property cannot be considered for purposes of recovery of the contract, either because the lessee have not the asset, for the property's conditions, for expenses that involve its recovery, transfer and maintenance, due to technological obsolescence or absence of a history of your location and current situation.
- b) When it complies the prescription term of actions to demand the payment through executory or upon rejection or abandonment of executory by court.
- c) When past-due term of a transaction complies with the following:

Type of Loan	Term
Consumer leases	6 months
Other non-real estate lease transactions	12 months
Real estate leases (commercial or residential)	36 months

The term represents the time elapsed since the date on which payment of all or part of the obligation in default became due.

(vii) Loan loss recoveries

Edgar Filing: BANK OF CHILE - Form 6-K

Cash recoveries on charge-off loans including loans that were reacquired from the Central Bank of Chile are recorded directly in income in the Consolidated Statement of Comprehensive Income, as a reduction of the Provisions for Loan Losses item.

In the event that there are recovery in assets, is recognized in income the revenues for the amount they are incorporated in the asset. The same criteria will be followed if the leased assets are recovered after the charge-off of a lease operation, to incorporate those to the asset.

(viii) Renegotiations of charge-off transactions

Any renegotiation of a charge-off loan it not recognize in income, while the operation continues to have deteriorated quality. Payments must be recognized as loan recoveries.

Therefore, renegotiated credit can be recorded as an asset only if it has not deteriorated quality; also recognizing revenue from activation must be recorded like recovery of loans.

The same criteria should apply in the case that was give credit to pay a charge-off loan.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(n) Financial assets held-to-maturity and available-for-sale:

Financial assets held-to-maturity includes only those securities for which the Bank has the ability and intention of keeping until maturity. The remaining investments are considered as financial assets available-for-sale.

Financial assets held-to-maturity are recorded at their cost plus accrued interest and indexations less impairment provisions made when the carrying amount exceeds the estimated recoverable amount.

A financial asset classified as available-for-sale is initially recognized at its fair value plus transaction costs that are directly attributable to the acquisition of the financial asset, subsequently measured at their fair value based on market prices or valuation models. Unrealized gains or losses as a result of fair value adjustments are recorded in Other comprehensive income within Equity. When these investments are sold, the cumulative fair value adjustment existing within equity is recorded directly in income under Net financial operating income .

Interest and indexations of financial assets held-to-maturity and available-for-sale are included in the line item Interest revenue .

Investment securities, which are subject to hedge accounting, are adjusted according to the rules for hedge accounting as described in Note No. 2 (l).

As of December 31, 2014 and 2013, the Bank and its subsidiaries do not hold held to maturity instruments.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(o) Intangible assets:

Intangible assets are identified as non-monetary assets (separately identifiable from other assets) without physical substance which arise as a result of a legal transaction or are developed internally by the consolidated entities. They are assets whose cost can be estimated reliably and from which the consolidated entities have control and consider it probable that future economic benefits will be generated.

Intangible assets are recorded initially at acquisition cost and are subsequently measured at cost less any accumulated amortization or any accumulated impairment losses.

(i) Goodwill

Goodwill arises on the acquisition of subsidiaries and associates representing the excess of the fair value of the purchase consideration and cost directly attributable to the acquisition over the net fair value of the Bank's share of the identifiable assets acquired and the liabilities and contingent liabilities assumed on the date of the acquisition.

For the purpose of calculating goodwill, fair values of acquired assets, liabilities and contingent liabilities are determined by reference to market values or by discounting expected future cash flows to present value. This discounting is either performed using market rates or by using risk-free rates and risk-adjusted expected future cash flows.

Goodwill is presented at cost, less accumulated amortization in accordance with its remaining useful life.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(o) Intangible assets, continued:

(ii) Software or computer programs

Computer software purchased by the Bank and its subsidiaries is accounted for at cost less accumulated amortization and impairment losses.

The subsequent expense in software assets is capitalized only when it increases the future economic benefit for the specific asset. All other expenses are recorded as an expense as incurred.

Amortization is recorded in income using the straight-line amortization method based on the estimated useful life of the software, from the date on which it is available for use. The estimated useful life of software is a maximum of 6 years.

(p) Property and equipment:

Property and equipment includes the amount of land, real estate, furniture, computer equipment and other installations owned by the consolidated entities and which are for own use. These assets are stated at historical cost less depreciation and accumulated impairment. This cost includes expenses that have been directly attributed to the asset's acquisition.

Depreciation is recognized in income on a straight-line basis over the estimated useful lives of each part of an item of property and equipment.

Estimated useful lives for 2014 and 2013 are as follows:

Edgar Filing: BANK OF CHILE - Form 6-K

- Buildings	50 years
- Installations	10 years
- Equipment	5 years
- Supplies and accessories	5 years

Maintenance expenses relating to those assets held for own uses are recorded as expenses in the period in which they are incurred.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(q) Deferred taxes and income taxes:

The income tax provision of the Bank and its subsidiaries has been determined in conformity with current legal provisions.

The Bank and its subsidiaries recognize, when appropriate, deferred tax assets and liabilities for future estimates of tax effects attributable to temporary differences between the book and tax values of assets and liabilities. Deferred tax assets and liabilities are measured based on the tax rate expected to be applied, in accordance with current tax law, in the year that deferred tax assets are realized or liabilities are settled. The effects of future changes in tax legislation or tax rates are recognized in deferred taxes starting on the date of publication of the law approving such changes.

Deferred tax assets and liabilities are recorded at their book value as of the date the deferred taxes are measured. Deferred tax assets are recognized only when it is likely that future tax profits will be sufficient to recover deductions for temporary differences. Deferred taxes are classified in conformity with established by Superintendency of Banks.

(r) Assets received in lieu of payment:

Assets received or awarded in lieu of payment of loans and accounts receivable from customers are recorded, in the case of assets received in lieu of payment, at the price agreed by the parties, or otherwise, when the parties do not reach an agreement, at the amount at which the Bank is awarded those assets at a judicial auction.

Assets received in lieu of payment are classified under Other Assets and they are recorded at the lower of its carrying amount or net realizable value, less charge-off and presented net of a portfolio valuation allowance. The Superintendency of Banks requires regulatory charge-offs if the asset is not sold within a one year of foreclosure.

(s) Investment properties:

Edgar Filing: BANK OF CHILE - Form 6-K

Investments properties are real estate assets held to earn rental income or for capital appreciation or both, but are not held-for-sale in the ordinary course of business or used for administrative purposes. Investment properties are measured at cost, less accumulated depreciation and impairment and are presented under Other Assets .

(t) Debt issued:

Financial instruments issued by the Bank are classified in the Statement of Financial Position under Debt issued items, where the substance of the contractual arrangement results in the Bank having an obligation either to deliver cash or another financial asset to the holder or to satisfy the obligation other than by the exchange of a fixed amount of cash.

Debt issued is subsequently measured at amortized cost using the effective interest rate. Amortized cost is calculated by taking into account any discount or premium on the issue and costs that are an integral part of the effective interest rate.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(u) Provisions and contingent liabilities:

Provisions are liabilities involving uncertainty about their amount or maturity. They are recorded in the Statement of Financial Position when the following requirements are jointly met:

- i) a present obligation has arisen from a past event and,
- ii) as of the date of the financial statements it is probable that the Bank or its subsidiaries have to disburse resources to settle the obligation and the amount can be reliably measured.

A contingent asset or liability is any right or obligation arising from past events whose existence will be confirmed by one or more uncertain future events which are not within the control of the Bank.

The following are classified as contingent in the complementary information:

- i. Guarantors and pledges: Comprises guarantors, pledges and standby letters of credit. In addition it includes payment guarantees for purchases in factoring transactions.
- ii. Confirmed foreign letters of credit: Corresponds to letters of credit confirmed by the Bank.
- iii. Documentary letters of credit: Includes documentary letters of credit issued by the Bank which have not yet been negotiated.

Edgar Filing: BANK OF CHILE - Form 6-K

- iv. Documented guarantee: Guarantee with promissory notes.
- v. Interbank guarantee: Correspond to letters of guarantee issued as foreseen in Title II of Chapters 8-12 of the Updated Compilation of Standards.
- vi. Free disposal lines of credit: The unused amount of credit lines that allow customers to draw without prior approval by the Bank (for example, using credit cards or overdrafts in checking accounts).
- vii. Other credit commitments: Amounts not yet lent under committed loans, which must be disbursed at an agreed future date when events contractually agreed upon with the customer occur, such as in the case of lines of credit linked to the progress of a construction or similar projects.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****2. Summary of Significant Accounting Principles, continued:****(u) Provisions and contingent liabilities, continued:**

viii. Other contingent loans: Includes any other kind of commitment by the Bank which may exist and give rise to lending when certain future events occur. In general, this includes unusual transactions such as pledges made to secure the payment of loans among third parties or derivative contracts made by third parties that may result in a payment obligation and are not covered by deposits.

Exposure to credit risk on contingent loans:

In order to calculate provisions on contingent loans, as indicated in Chapter B-3 of the Compendium of Accounting Standards of the Superintendency of Banks, the amount of exposure that must be considered shall be equivalent to the percentage of the amounts of contingent loans indicated below:

Type of contingent loan	Exposure
a) Guarantors and pledges	100%
b) Confirmed foreign letters of credit	20%
c) Documentary letters of credit issued	20%
d) Guarantee deposits	50%
e) Interbank letters of guarantee	100%
f) Free disposal lines of credit	50%
g) Other loan commitments	
- College education loans Law No. 20,027	15%
- Others	100%
h) Other contingent loans	100%

Notwithstanding the above, when dealing with transactions performed with customers with overdue loans as indicated in Chapter B-1 of the Compendium of Accounting Standards of the SBIF: Impaired and/or Written-down Loans, that exposure shall be equivalent to 100% of its contingent loans.

Additional provisions:

Edgar Filing: BANK OF CHILE - Form 6-K

In accordance to Superintendency of Banks regulations, the Bank has recorded additional allowances for its individually evaluated loan portfolio, taking into consideration the expected impairment of this portfolio. The calculation of this allowance is performed based on the Bank's historical experience and considering possible future adverse macroeconomic conditions or circumstances that could affect a specific sector.

The provisions made in order to forestall the risk of macroeconomic fluctuations should anticipate situations reversal of expansionary economic cycles in the future, could translate into a worsening in the conditions of the economic environment and thus, function as a countercyclical mechanism accumulation of additional provisions when the scenario is favorable and release or assignment to specific provisions when environmental conditions deteriorate.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(u) Provisions and contingent liabilities, continued:

Additional provisions, continued:

According to the above, additional provisions must always correspond to general provisions on commercial, consumer or mortgage loans, or segments identified, and in no case may be used to offset weaknesses of the models used by the bank.

During the current year, the Bank recorded additional provisions with a charge to income of MCh\$22,499 (MCh\$10,000 in 2013). As of December 31, 2014 the additional provisions amounted Ch\$130,256 million (Ch\$107,757 million), which are presents in the item Provisions of the liability in the Consolidated Statement of Financial Position.

(v) Provision for minimum dividends:

According with the Compendium of Accounting Standards of the SBIF, the Bank records within liabilities the portion of net income for the year that should be distributed to comply with the Corporations Law or its dividend policy. For these purposes, the Bank establishes a provision in a complementary equity account within retained earnings.

Distributable net income is considered for the purpose of calculating a minimum dividends provision, which in accordance with the Bank's bylaws is defined as that which results from reducing or adding to net income the value of price-level restatement for the concept of restatement or adjustment of paid-in capital and reserves for the year.

(w) Employee benefits:

(i) Staff vacations:

The annual costs of vacations and staff benefits are recognized on an accrual basis.

(ii) Short-term benefits

The Bank has a yearly bonus plan for its employees based on their ability to meet objectives and their individual contribution to the company's results, consisting of a given number or portion of monthly salaries. It is provisioned for based on the estimated amount to be distributed.

(iii) Staff severance indemnities:

Banco de Chile has recorded a liability for long-term severance indemnities in accordance with employment contracts it has with certain employees. The liability, which is payable to specified retiring employees with 30 or 35 years of service, is recorded at the present value of the accrued benefits, which are calculated by applying a real discount rate to the benefit accrued as of year-end over the estimated average remaining service period.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(w) Employee benefits, continued:

(iii) Staff severance indemnities, continued:

Obligations for this defined benefits plan are valued according to the projected unit credit actuarial valuation method, using inputs such as staff turnover rates, expected salary growth in wages and probability that this benefit will be used, discounted at current long-term rates (4.38% as of December 31, 2014 and 5.19% as of December 31, 2013).

The discount rate used corresponds to the return on bonds of the Central Bank with maturity in 10 years (BCP).

Actuarial gains and losses are recognised in Other Comprehensive Income. There are no other additional costs that must be recognised by the Bank.

(x) Earnings per share:

Basic earnings per share is determined by dividing net income for the year attributable to the Bank by the average weighted number of shares in circulation during that year.

Diluted earnings per share is determined in a similar manner as basic earnings per share, but the average weighted number of shares in circulation is adjusted to account for the dilutive effect of stock options, warrants and convertible debt. As of December 31, 2014 and 2013, the Bank does not have any instruments or contracts that could cause dilutions. Therefore, no adjustments have been made.

(y) Interest revenue and expense:

Interest income and expenses are recognized in the income statement using the effective interest rate method. The effective interest rate is the rate which exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument (or a shorter period) where appropriate, to the carrying amount of the financial asset or financial liability. To calculate the effective interest rate, the Bank determines cash flows by taking into account all contractual conditions of the financial instrument, excluding future credit losses.

The effective interest rate calculation includes all fees and other amounts paid or received that form part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the purchase or issuance of a financial asset or liability.

For its impaired portfolio and high risk loans and accounts receivables from clients, the Bank has applied a conservative position of discontinuing accrual-basis recognition of interest revenue in the income statement; they are only recorded once received. In accordance with the above, suspension occurs in the following cases:

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(y) Interest revenue and expense, continued:

Loans with individual evaluation:

- Loans classified in categories C5 and C6: Accrual is suspended by the sole fact of being in the impaired portfolio.
- Loans classified in categories C3 and C4: Accrual is suspended due to having been three months in the impaired portfolio.

Group evaluation loans:

- Loans with less than 80% real guarantees: Accrual is suspended when payment of the loan or one of its installments has been overdue for six months.

Notwithstanding the above, in the case of loans subject to individual evaluation, recognition of income from accrual of interest and readjustments can be maintained for loans that are being paid normally and which correspond to obligations whose cash flows are independent, as can occur in the case of project financing.

The suspension of recognition of revenue on an accrual basis means that, while the credits are kept in the impaired portfolio, the related assets included in the Consolidated Statement of Financial Position will increase with no interest, or fees and adjustments in the Consolidated Statement of Comprehensive Income, and income will not be recognized for these items, unless they are actually received.

(z) Fees and commissions:

Edgar Filing: BANK OF CHILE - Form 6-K

Income and expenses from fees and commissions are recognized in income using different criteria based on the nature of the income or expense: The most significant criteria include:

- Fees earned from an single act are recognized once the act has taken place.
- Fees earned from transactions or services provided over a longer period of time are recognized over the life of the transactions or services.
- Loan commitment fees for loans that are likely to be drawn down and other credit-related fees are deferred (together with incremental costs) and recognized as an adjustment to the effective interest rate of the loan. When it is unlikely that a loan is drawn down, the fees are recognized over the commitment period on a straight-line basis.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(aa) Identifying and measuring impairment:

Financial assets, different to loans to customers

Financial assets are reviewed throughout each year, and especially at each reporting date, to determine whether there is objective evidence of impairment as a result of a loss event that occurred after the initial recognition of the asset and the loss event had an impact on the estimated future cash flows of the financial asset that can be reliably calculated.

An impairment loss for financial assets (different to loans to customers) recorded at amortized cost is calculated as the difference between the asset's carrying amount and the present value of the estimated future cash flows, discounted using the effective interest rate original.

An impairment loss for available-for-sale financial assets is calculated using its fair value, considering fair value changes already recognized in other comprehensive income.

In the case of equity investments classified as available-for-sale financial assets, objective evidence includes a significant or prolonged decline in the fair value of the investment below cost. In the case of debt securities classified as available-for-sale financial assets, the Bank assesses whether there exists objective evidence for impairment based on the same criteria as for loans.

If there is evidence of impairment, any amounts previously recognized in equity, in net gains (losses) not recognized in the income statement, is removed from equity and recognized in the income statement for the period, reported in net gains (losses) on financial assets available for sale. This amount is determined as the difference between the acquisition cost (net of any principal repayments and amortization) and current fair value of the asset less any impairment loss on that investment previously recognized in the income statement.

When the fair value of the available-for-sale debt security recovers to at least amortised cost, it is no longer considered impaired and subsequent changes in fair value are reported in equity.

Edgar Filing: BANK OF CHILE - Form 6-K

All impairment losses are recognized in the income statement. Any cumulative loss related to available-for-sale financial assets recognized previously in equity is transferred to the income statement.

An impairment loss can only be reversed if it can be related objectively to an event occurring after the impairment loss was recognized.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(aa) Identifying and measuring impairment, continued:

Financial assets, different to loans to customers, continued

The amount of the reversal is recognized in profit or loss up to the amount previously recognized as impairment.

An impairment loss is reversed if, in a subsequent period, the fair value of the debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss.

Non-financial assets

The carrying amounts of the non-financial assets of the Bank and its subsidiaries, excluding investment properties and deferred tax assets, are reviewed throughout the year and especially at each reporting date, to determine if any indication of impairment exists. If such indication exists, the recoverable amount of the asset is then estimated.

Impairment losses recognized in prior years are assessed at each reporting date in search of any indication that the loss has decreased or disappeared. An impairment loss is reversed if there has been a change in the estimations used to determine the recoverable amount. An impairment loss is reverted only to the extent that the book value of the asset does not exceed the carrying.

The Bank assesses at each reporting date and on an ongoing basis whether there is an indication that an asset may be impaired. If any indication exists, the Bank estimates the asset's recoverable amount. An asset's recoverable amount is the major value between fair value (less costs to sell) and its value in use. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, share prices and other available fair value indicators.

Impairment losses related to goodwill cannot be reversed in future periods.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(ab) Lease transactions:

(i) The Bank acting as lessor

Assets leased to customers under agreements which transfer substantially all the risks and rewards of ownership, with or without ultimate legal title, are classified as finance leases. When assets held are subject to a finance lease, the leased assets are derecognized and a receivable is recognized which is equal to the present value of the minimum lease payments, discounted at the interest rate implicit in the lease. Initial direct costs incurred in negotiating and arranging a finance lease are incorporated into the receivable through the discount rate applied to the lease. Finance lease income is recognized over the lease term based on a pattern reflecting a constant periodic rate of return on the net investment in the finance lease.

Assets leased to customers under agreements which do not transfer substantially all the risks and rewards of ownership are classified as operating leases.

The leased assets are included within Other Assets on the Group's balance sheet and depreciation is provided on the depreciable amount of these assets on a systematic basis over their estimated useful economic lives. Rental income is recognized on a straight-line basis over the period of the lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized as an expense on a straight-line basis over the lease term.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

2. Summary of Significant Accounting Principles, continued:

(ab) Lease transactions, continued:

(ii) The Bank acting as lessee

Assets held under finance leases are initially recognized on the balance sheet at an amount equal to the fair value of the leased property or, if lower, the present value of the minimum future payments guaranteed. As of December 31, 2014 and 2013, the Bank and its subsidiaries have not signed contracts of this nature.

Operating lease rentals payable are recognized as an expense on a straight-line basis over the lease term, which commences when the lessee controls the physical use of the property. Lease incentives are treated as a reduction of rental expense and are also recognized over the lease term on a straight-line basis. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

(ac) Fiduciary activities:

The Bank provides trust and other fiduciary services that result in the holding or investing of assets on behalf of the clients. Assets held in a fiduciary capacity are not reported in the financial statements, as they are not the assets of the Bank. Contingencies and commitments arising from this activity are disclosed in Note No. 26 (a).

(ad) Customer loyalty program:

The Bank maintains a customer loyalty programs as an incentive to its clients. The scheme grants its customers certain points depending on the value of credit card purchases they make. The so-collected points can be used to obtain services from a third party. In accordance with IFRIC 13 the costs which the Bank incurs providing this incentive are recognized at fair value when the corresponding revenue is recognized, considering the probabilities of being used by the customers to obtain the third party's service. The points collected cannot be used to obtain services directly from the Bank.

(ae) Reclassifications

There are no significant reclassifications at the end of period 2014.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

3. New Accounting Pronouncements:

3.1 Accounting rules issued by IASB:

The following is a summary of new standards, interpretations and improvements to the International Financial Reporting Standards issued by the International Accounting Standards Board (IASB) that it is not effective as of December 31, 2014:

IFRS 9 Financial Instruments

The July 24, 2014, IASB completed its upgrade project about accounting for financial instruments with the publication of IFRS 9 Financial Instruments.

This standard includes new requirements based on new principles for the classification and measurement; it introduces a prospective model of expected credit losses on impairment accounting and changes in hedge accounting.

Classification and measurement

The classification determines how financial assets and liabilities are accounted in financial statements and, in particular, how they are measured. IFRS 9 introduces a new approach for the classification of financial assets, based in the business model of the entity for the management of financial assets and the characteristic of its contractual flows. The new model also results in a single impairment model being applied to all financial instruments, removing a source of complexity associated with previous accounting requirements.

Impairment

The IASB has introduced a new impairment model that will require a timely recognition of expected credit losses.

Hedge Accounting

IFRS 9 introduces a new model for hedge accounting with enhanced disclosures about risk management activity. The new model represents a substantial overhaul of hedge accounting that aligns the accounting treatment with risk management activities, enabling entities to better reflect these activities in their financial statements. In addition, as a result of these changes, users of the financial statements will be provided with better information about risk management and the effect of hedge accounting on the financial statements

Entity's Own Credit Risk

IFRS 9 removes the volatility in profit or loss originated by changes in the credit risk of designated liabilities at fair value. This change means that the profit produced by the quality decline of own credit risk of the entity in this kind of obligations, are not recognized in profit or loss of the period, but in other comprehensive income. IFRS 9 permits early application of this improvement, before any other requirement of IFRS 9.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

3. New Accounting Pronouncements, continued:

3.1 Accounting rules issued by IASB, continued:

IFRS 9 Financial Instruments, continued:

Adoption date mandatory *January 1, 2018*. Early application is permitted.

Banco de Chile and its subsidiaries are assessing the possible impact of adoption of these changes on the consolidated financial statements. To date, this standard has not been approved by the Superintendency of Banks, event that is required for their application.

IFRS 11 Joint Arrangements

In May of 2014 the IASB modified IFRS 11, providing guides about the accounting of acquisitions of participations in joint operations, whose activity constitute a business. This standard requires the acquirer of a participation in a joint operation, whose activities constitutes a business, apply all the principles on accounting for business combinations of the IFRS 3.

The effective date is beginning on *January 1, 2016* and its early application is permitted.

Banco de Chile and its subsidiaries are assessing the impact of this rule in its consolidated financial statements.

IAS 16 Property, plant and equipment and IAS 38 Intangible assets

In May of 2014 the IASB modified IAS 16 and 38 with purpose of clarifies accepted method of depreciation and amortization.

The amendment of IAS 16 prohibits for property, plant and equipment, depreciation based on ordinary income.

The amendment of IAS 38 introduces the presumption of ordinary income are not an appropriate base for the amortization of intangible asset. This presumption only is refuted in two circumstances: (a) intangible asset is expressed like a unit of ordinary income; and (b) ordinary income and consumption of intangible asset are highly correlated.

The effective date is beginning on *January 1, 2016* its early application is permitted.

This modification does not impact the consolidated financial statements of Banco de Chile and its subsidiaries, because it is not used a focus of income as a basis of depreciation and amortization.

3. New Accounting Pronouncements, continued:

3.1 Accounting rules issued by IASB, continued:

IFRS 15 Revenue from Contracts with Customers

In May 2014 was issued IFRS 15. It applies to all contracts with customers except leases, financial instruments and insurance contracts. This project was jointly conducted with the Financial Accounting Standards Board (FASB) to eliminate differences in revenue recognition between IFRS and USGAAP. This new standard pretends to improve inconsistencies and weaknesses of IAS 18 and to provide a single revenue recognition model which will improve comparability over a range of industries, companies and geographical boundaries. It provides a new model of earnings recognition and more detailed requirements for contracts with multiple elements.

Application of the standard is mandatory for annual reporting periods starting from *January 1, 2017* onward, early application is permitted.

Banco de Chile and its subsidiaries are assessing the impact of this rule in its consolidated financial statements.

IAS 27 Consolidated and Separated Financial Statements

In August 2014, the IASB published the amendment that will allow entities to use the equity method to account for investments in subsidiaries, joint ventures and associates in their separate financial statements.

The effective date is beginning on *January 1, 2016* and its early application is permitted.

This amendment does not impact the consolidated financial statements of Banco de Chile and its subsidiaries.

IAS 28 Investments in Associates and Joint Venture and IFRS 10 - Consolidated Financial Statements

In September 2014, the IASB issued this amendment, which clarifies the scope of recognized gains and losses in a transaction involving an associate or joint venture, and this depends on whether the asset sold or contribution is a business. Therefore, IASB concluded that all of the profit or loss should be recognized against loss of control of a business. Likewise, gains or losses resulting from the sale or contribution of a subsidiary that is not a business (definition of IFRS 3) to an associate or joint venture should be recognized only to the extent of unrelated interests in the associate or joint venture.

The effective date is beginning on ***January 1, 2016*** and its early application is permitted.

This amendment does not impact the consolidated financial statements of Banco de Chile and its subsidiaries.

3. New Accounting Pronouncements, continued:

3.1 Accounting rules issued by IASB, continued:

Annual improvements IFRS

In September 2014, the IASB issued Annual improvements to IFRS: 2012 – 2014 Cycle, which include changes to the following standards.

- **IFRS 5 Non-current assets held for sale and discontinued operations.**

Add specific guidelines in cases in which an entity reclassify an asset from held for sale to held for distribution, or vice versa and cases in which asset held for distribution are accounting like discontinued operations. The effective date is beginning on January 1, 2016 and its early application is permitted.

Banco de Chile and subsidiaries don't register non-current asset held for sale and discontinued operations. Therefore, this modification does not impact the consolidated financial statements of Banco de Chile and its subsidiaries.

- **IFRS 7 Financial Instruments: Disclosures.**

Add guidelines to clarify if a service contract corresponds to a continuing involvement in an asset transfer with the purpose to determine the required disclosures. The effective date is beginning on January 1, 2016 and its early application is permitted.

This amendment does not impact the consolidated financial statements of Banco de Chile and its subsidiaries.

- **IAS 19 Employee Benefits. Discount rate: topic of the regional market.**

Clarifies that corporate bonds with high quality credit used in the estimation of the discount rate for post-employment benefits must be denominated in the same currency as the benefit paid. The effective date is beginning on January 1, 2016 and its early application is permitted.

This amendment does not impact the consolidated financial statements of Banco de Chile and its subsidiaries.

- **IAS 34 Interim Financial Reporting.**

Clarifies the meaning of disclose information in some other part of interim financial information and the need for a cross-reference. The effective date is beginning on January 1, 2016 and its early application is permitted

This amendment does not impact the consolidated financial statements of Banco de Chile and its subsidiaries.

3. New Accounting Pronouncements, continued:

3.1 Accounting rules issued by IASB, continued:

Annual improvements IFRS, continued:

- **IFRS 10 Consolidated Financial Statements, IFRS 12 Disclosure of Interest in Other Entities and IAS 28 Investments in Associates and Joint Venture.**

In December 2014, the IASB has modified IFRS 10, IFRS 12 and IAS 28 related with the application of the exceptions in the consolidation in investment entities.

The amendments clarify about the requirement for the accounting of investment entities. In addition, these amendments in certain circumstances reduce the cost in the application of these standards.

The effective date is mandatory on January 1, 2016 and its early application is permitted.

Banco de Chile and its subsidiaries are assessing the impact of this rule in its consolidated financial statements.

- **IAS 1 Presentation of Financial Statements**

In December, 2014, the IASB has published Disclosure Initiative (Amendments to IAS 1) . The amendments aim at clarifying IAS 1 to improve the presentation and disclosure of information in the financial reports.

Edgar Filing: BANK OF CHILE - Form 6-K

These amendments answer to requests about presentation and disclosure and have been designed with the finality to allow to the entities to apply their professional opinion to determine what information must be disclosed in the financial statements.

They are effective for annual periods beginning on or after 1 January 2016, with earlier application being permitted.

Banco de Chile and its subsidiaries are assessing the impact of this rule in its consolidated financial statements.

3.2 Accounting rules issued by SBIF:

i) On February 17, 2014 SBIF issued a Circular No. 3,565, which introduces changes to the instructions related to monthly information sent to the Superintendency. Changes have as objective inform in separate way the investment in entities controlled abroad and requires information of credit and its overdue maintained for the subsidiaries controlled. These changes are applied in present consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

3. New Accounting Pronouncements, continued:

3.2 Accounting rules issued by SBIF, continued:

ii) On December 30, 2014 the SBIF issue Circular No. 3,573 which established the changes to standards that regulates determination of Provision for loan losses, recorded in chapter B-1 of the compendium of accounting standards.

Regulatory aspects that are part of these changes:

- **Standard Method Provisions for Loan Mortgage:** It defined a standard method to establish provisions on mortgage loans for housing, which explicitly considers the delinquency and the ratio between the amount of outstanding principal of each loan and the value of the mortgage guarantee. This method provides a differentiated treatment for loans with state subsidies and state insurance auction. The effective date is beginning on January 1, 2016.

- **Substitution of Issuer Debtor in Factoring Operations:** instructions for calculating provisions on factoring transactions are modified; allowing, under certain conditions, be considered through the substitution mechanism of debtors, classification of debtor instead of the transferor of the invoice for purposes of provisioning.

- **The instructions on the portfolio defaulted loans subject to individual assessment are complemented,** including certain conditions must be complied to remove of such portfolio the credits of a debtor, in turn incorporated the same criteria for group loans. To remove a debtor from Default Portfolio, once overcome the circumstances that led to classify on this portfolio under these rules, the following conditions must be complied at least:

i) Any obligation of the debtor with the bank no longer served at the time and in the amount that correspond.

ii) Has not been granted new refinancing to pay its obligations.

iii) At least one of payments including amortization of capital.

iv) If the debtor hath some credit with installments in periods of less than six months, has already made more than one payment.

Edgar Filing: BANK OF CHILE - Form 6-K

v) If the debtor must pay monthly installments for one or more loans, have been paid at least six consecutive installments.

vi) The debtor does not appear with a direct debt not paid in the information of this Superintendency.

- In relation with the approval that should give the Board on the adequacy of provisions, states that it must refer to the consolidated financial statements, the bank considered individually, the Bank with the local subsidiaries and subsidiaries abroad, where appropriate.

Banco de Chile and its subsidiaries are assessing the impact of these rules in its consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

3. New Accounting Pronouncements, continued:

3.3 Rules issued by the Superintendency of Securities and Insurance (Superintendencia de Valores y Seguros (SVS))

On January 13, 2014 SVS issued a Circular No. 2,137, which regulates financial statements that insurance brokers (not individuals) must be sent to SVS. This rule establishes the presentation of financial statements under IFRS since January 1, 2015 and establishes accounting criteria related to income recognition for concept of commissions.

4. Changes in Accounting Policies and Disclosures:

On December 1, 2013, new rules are beginning in application. These are about return of premiums not accrued for the insurance contracts, according to established by law No. 20,667 of 9th. Of May of 2013 and Circular No. 2,114 issued by the SVS on July 26, 2013. The legal change requires returns of premiums collected in advance but not accrued, due to the early termination or extinction of an insurance contract. The premium to return it will be calculated in proportion of the remaining time.

During the period ended as of December 31, 2014, the Bank and its subsidiary Banchile Corredores de Seguros have established provisions for the concept of commission s refunds to the insurance companies for the policies (paid in advance) commercialized since December 1, 2013. This estimation is based in the history of the prepayments and disclaimers of its products portfolio that originate the commissions. Additionally, the legal exchange for the return of premiums collected in advance and unearned also had an impact on the income expense of commissions recognized directly in income. This means that it has begun to defer a portion of the commission earned jointly with future costs of sales.

These estimates correspond to changes in accounting estimates, whose effects are registered in income under item Income from fees and commissions . The effect of the change involves a lesser income in the period 2014 by an amount of Ch\$7,584 million.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

5. Relevant Events:

(a) On January 9, 2014 LQ Inversiones Financieras S.A. (LQIF) informed Banco de Chile that LQIF will carry out a process to offer for sale or transfer up to 6,900,000,000 shares of Banco de Chile (a secondary offering). In addition, LQIF has requested that Banco de Chile perform all the actions related to the execution of this kind of transaction in the local and international markets.

Furthermore, the letter indicates that, if consummated, this transaction will reduce LQIF's share of outstanding voting rights from 58.4% to 51%, so that the control status of LQIF with respect to Banco de Chile will not be altered.

With regard to the above, on this date the Board of Directors of Banco de Chile has agreed to LQIF's request and the conditions under which Banco de Chile will participate in the appropriate filings with foreign regulators, the entering into of contracts and other documents required by law and consistent with securities market practice in the United States of America and other international markets, and in the performing of such other steps and actions as are necessary for the consummation of this transaction in the local and international markets and that are related to the commercial and financial condition of Banco de Chile.

(b) On January 14, 2014, in relation to the relevant event dated January 9, 2014, it is informed that Banco de Chile has filed with the Securities and Exchange Commission of the United States of America (SEC), Supplemental Preliminary a prospectus which contains financial and business information of the Bank.

Also, it has been registered the agreed contract text called Underwriting Agreement that will be subscribed by LQ Inversiones Financieras S.A. (LQIF), as a seller of securities, Banco de Chile as issuer, and Citigroup Global Markets Inc., Merrill Lynch, Pierce, Fenner & Smith Incorporated, Deutsche Bank Securities Inc. and Banco BTG Pactual S.A. - Cayman Branch, as underwriters.

Additionally, LQIF and Banco de Chile have agreed the terms and general conditions under which the Bank will participate in this process.

(c) On January 29, 2014, LQ Inversiones Financieras S.A. informed as a relevant event that was placed of 6,700,000,000 shares of Banco de Chile, in the local market and the United States of America, by American Depositary Receipts Program, at a price of \$ 67 per share, declaring successful offer for sale. Additionally, it informed that the 6,700,000,000 shares of Banco de Chile offered for sale will be placed in stock exchange at price stated on January 29, 2014.

Edgar Filing: BANK OF CHILE - Form 6-K

(d) On January 29, 2014, Bank is informed that in relation to the secondary offering shares of Banco de Chile that is performing with LQ Inversiones Financieras S.A., in this date Banco de Chile as issuer, LQ Investments SA, as seller of the securities, and Citigroup Global Markets Inc., Merrill Lynch, Pierce, Fenner & Smith Incorporated, Deutsche Bank Securities Inc., and Banco BTG Pactual SA - Cayman Branch as underwriters, have been subscribed a contract called Underwriting Agreement, according to relevant event dated January 14, 2014.

Also, later than January 30, 2014, Banco de Chile will proceed to register in Securities and Exchange Commission of the United States of America (SEC), Final Prospectus Supplement, which contains financial and commercial information of the Bank.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

6. Segment Reporting:

For management purposes, the Bank has organized its operations and commercial strategies into four business segments, which are defined in accordance with the type of products and services offered to target customers. These business segments are currently defined as follows:

Retail: This segment focuses on individuals and small and medium-sized companies with annual sales up to UF 70,000, where the product offering focuses primarily on consumer loans, commercial loans, checking accounts, credit cards, credit lines and mortgage loans.

Wholesale: This segment focused on corporate clients and large companies, whose annual revenue exceed UF 70,000, where the product offering focuses primarily on commercial loans, checking accounts and liquidity management services, debt instruments, foreign trade, derivative contracts and leases.

Treasury and money market operations:

This segment includes revenue associated with managing the Bank's balance sheet (currencies, maturities and interest rates) and liquidity, including financial instrument and currency trading on behalf of the Bank itself.

Transactions on behalf of customers carried out by the Treasury are reflected in the respective aforementioned segments. These products are highly transaction-focused and include foreign exchange transactions, derivatives and financial instruments in general.

Subsidiaries: Corresponds to companies and corporations controlled by the Bank, where income is obtained individually by the respective subsidiary. The companies that comprise this segment are:

Entity

- Banchile Administradora General de Fondos S.A.
- Banchile Asesoría Financiera S.A.
- Banchile Corredores de Seguros Ltda.
- Banchile Corredores de Bolsa S.A.
- Banchile Securitizadora S.A.

Edgar Filing: BANK OF CHILE - Form 6-K

- Banchile Trade Services Limited (See note No. 5 letter (h))
- Socofin S.A.
- Promarket S.A.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

6. Segment Reporting, continued:

The financial information used to measure the performance of the Bank's business segments is not necessarily comparable with similar information from other financial institutions because it is based on internal reporting policies. The accounting policies used to prepare the Bank's operating segment information are similar as those described in Note No. 2 Summary of Significant Accounting Principles. The Bank obtains the majority of its income from: interest, revaluations and fees, discounted the credit cost and expenses. Management is mainly based on these concepts in its evaluation of segment performance and decision-making regarding goals, allocation of resources for each unit individually. Although the results of the segments reconcile with those of the Bank at total level, it is not thus necessarily concerning the different concepts, since the management is measured and controls in individual form and additionally applies the following criteria:

- The net interest margin of loans and deposits is measured on an individual transaction and individual client basis, stemming from the difference between the effective customer rate and the related Bank's fund transfer price in terms of maturity, re-pricing and currency.
- The internal performance profitability system considers capital allocation in each segment in accordance to the Basel guidelines.
- Operating expenses are distributed at each area level. The Bank allocates all of its indirect operating costs to each business segment by utilizing a different cost driver in order to allocate such costs to the specific segment.

The Bank did not enter into transactions with a particular customer or third party that exceed 10% of its total income in 2014 and 2013.

Taxes are managed at a corporate level and are not allocated to business segments.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****6. Segment Reporting, continued:**

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****10. Derivative Instruments and Accounting Hedges, continued:****(b) Fair value Hedges:**

The Bank uses cross-currency swaps and interest rate swaps to hedge its exposure to changes in the fair value of the hedged elements attributable to interest rates. The aforementioned hedge instruments change the effective cost of long-term issuances from a fixed interest rate to a floating interest rate, decreasing the duration and modifying the sensitivity to the shortest segments of the curve.

Below is a detail of nominal values of the hedged elements and hedge instruments under fair value hedges as of December 31, 2014 and 2013:

	2014	2013
	MCh\$	MCh\$
Hedged element		
Commercial loans	48,611	128,934
Corporate bonds	146,585	164,526
Hedge instrument		
Cross currency swap	48,611	128,934
Interest rate swap	146,585	164,526

(c) Cash flow Hedges:

(c.1) The Bank uses cross currency swaps to hedge the risk from variability of cash flows attributable to changes in the interest rates of bonds and foreign exchange of bonds issued abroad in Mexican pesos, Hong Kong dollars, Peruvian nuevo sol, Swiss franc, Japanese yen to fix rate and foreign banks obligations. The cash flows of the cross currency swaps equal the cash flows of the hedged items, which modify uncertain cash flows to known cash flows derived from a fixed interest rate.

Additionally, these cross currency swap contracts used to hedge the risk from variability of the Unidad de Fomento (CLF) in assets flows denominated in CLF until a nominal amount equal to the portion notional of the hedging instrument CLF, whose readjustment daily impact the item interest revenue of the financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

10. Derivative Instruments and Accounting Hedges, continued:

(c) Cash flow Hedges, continued:

Respect to assets hedged, these are revalued monthly according to the variation of the UF, which is equivalent to realize monthly reinvestment of the assets until maturity of the relationship hedging.

(c.3) The accumulated amount of unrealized gain was a credit to equity for an amount of Ch\$29,756 million (charge to equity for Ch\$18,069 million in 2013) generated from hedging instruments, which has been recorded in equity. The net effect of deferred tax was a credit to equity for Ch\$23,507 millions in 2014 (charge to equity for Ch\$14,455 millions in 2013)

The accumulated balance for this concept net of deferred tax as of December 31, 2014 corresponds to a credit of equity amounted Ch\$10,086 million (charge to equity amounted Ch\$13,421 million in 2013)

(c.4) The net effect in income of derivatives cash flow hedges was a charge in income for an amount of Ch\$9,659 million in 2014 (credit to income for Ch\$51,795 million in 2013).

(c.5) As of December 31, 2014 and 2013, it not exist inefficiency in cash flow hedge, because both, hedge item and hedge instruments are mirror one of other, it means that all variation of value attributable to rate and revaluation components are netted almost totally.

(c.6) As of December 31, 2014 and 2013, the Bank has not hedges of net investments in foreign business

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

13. Investment Securities, continued:

Instruments issued by the Chilean Government and Central Bank include instruments with agreements to repurchase sold to clients and financial institutions, for December 31, 2014 this amount was \$25,673 million (\$16,840 million in 2013). Repurchase agreements had a average maturity of 4 days in December 2014 (3 days in December 2013).

Under classification of Other instruments issued in Chile are included securities sold under repurchase agreements to customers and financial institutions for an amount of MCh\$14 million (MCh\$109 million in 2013). Repurchase agreements had a average maturity of 5 days in December 2014 (3 days in December 2013).

In instruments issued abroad are include mainly banks bonds and shares.

As of December 31, 2014, the portfolio of financial assets available-for-sale includes a net unrealized loss of MCh\$33,962 (MCh\$29,372 in 2013), recorded in other comprehensive income within equity.

As of December 31, 2014 and 2013 there is not impairment of financial assets available-for-sale.

Realized profits and losses are calculated as the proceeds from sales less the cost (specific identification method) of the investments identified as for sale. In addition, any unrealized profit or loss previously recorded in equity for these investments is reversed when recorded in the income statements.

Profits and losses realized on the sale of available-for-sale investments as of December 31, 2014 and 2013 are shown in Note No. 30 Net Financial Operating Income .

Gross profits and losses realized and unrealized on the sale of available for sale investments for the years-ended December 31, 2014 and 2013 are as follows:

Edgar Filing: BANK OF CHILE - Form 6-K

	2014 MCh\$	2013 MCh\$

-
- (1) Income from investments valorized at cost, corresponds to income recognized on cash basis (dividends).
- (*) On June 21, 2013 it was created, with other banks of the Chilean financial system, the subsidiary banking support called Servicios de Infraestructura de Mercado OTC S.A. (IMERC-OTC S.A.), where its objective will be to operate a centralized register of derivatives operations (register, confirmation, storage, consolidation and conciliation services). This new subsidiary was created with a capital of Ch\$12,957,463,890 divided in 10,000 shares, without nominal value, of which Banco de Chile subscribed and paid 1,111 shares, equivalent to MCh\$1,440 million paid upon constitution of society. It was subscribed and paid 9,674 shares at the date of these financial statements.
- (**) On June 3, 2014 Transbank S.A. increased its capital by an amount of Ch\$26,335,343,467 through the capitalization of revalorizations and income by Ch\$1,135,328,683 and an issuance of fully paid-in shares by Ch\$25,200,014,784. Banco de Chile realized the subscription and payment of 33,629,690 ordinary shares by an amount of Ch\$6,591,419,240 (this amount doesn't include payment of adjustments by Ch\$16,873,451). Participation of Banco de Chile in Transbank S.A. was not modified by this capital increase.

				Over 3 months and up to 12 months MCh\$	Over 1 year and up to 3 years MCh\$			
Lease Agreements	28,876	2,320	4,633	19,833	37,497	26,517	48,815	139,615

As these lease agreements are operating, under IAS 17 the leased assets are not presented in the Bank's statement of financial position.

The Bank has entered into commercial leases of real estate. These leases have an average life of 10 years. There are no restrictions placed upon the lessee by entering into the lease.

(d) As of December 31, 2014 and 2013, the Bank does not have any finance lease agreements as lessee and, therefore, there are no property and equipment balances to be reported from such transactions as of December 31, 2014 and 2013.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****17. Current and Deferred Taxes:****(a) Current Taxes:**

As of each year end, the Bank and its subsidiaries have established a First Category Income Tax Provision determined in accordance with current tax laws. This provision is presented net of recoverable taxes, amounts as of December 31, 2014 and 2013 are detailed as follows:

	2014 MCh\$	2013 MCh\$
Income taxes	106,550	85,336
Sole first category tax		23
Tax on non-deductible expenses (35%)	1,802	1,885
Less:		
Monthly prepaid taxes (PPM)	(83,050)	(73,694)
Credit for training expenses	(1,818)	(1,714)
Real estate contributions (taxation)	(1,597)	(1,106)
Other	(2,857)	(3,599)
Total current taxes	19,030	7,131
Tax rate	21%	20%

	2014 MCh\$	2013 MCh\$
Current tax assets	3,468	3,202
Current tax liabilities	(22,498)	(10,333)
Total current taxes	(19,030)	(7,131)

(b) Income Tax:

The Bank's tax expense recorded for the years ended December 31, 2014 and 2013 is detailed as follows:

2014 MCh\$	2013 MCh\$
-----------------------	-----------------------

Edgar Filing: BANK OF CHILE - Form 6-K

Income tax expense:

Tax from previous periods	13,596	(432)
Subtotal	113,898	88,282
Credit (charge) for deferred taxes:		
Origin and reversal of temporary differences	(33,642)	(12,381)
Effect of changes in tax rate	(27,277)	
Subtotal	(60,919)	(12,381)
Non deductible expenses (Art. 21 Ley de la Renta)	1,802	1,885
Other	4,746	2,150
Net charge to income for income taxes	59,527	79,936

[Table of Contents](#)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

17. Current and Deferred Taxes, continued:

(c) Reconciliation of effective tax rate:

The following is reconciliation between income tax rate and effective rate applied to determine the Bank's income tax expense as of December 31, 2014 and 2013:

	2014		2013	
	Tax rate %	MCh\$	Tax rate %	MCh\$
Income tax calculated on net income before tax	21.00	136,628	20.00	118,708
Additions or deductions	(4.82)	(31,374)	(4.83)	(28,649)
Tax restatement	(5.12)	(33,299)	(2.02)	(12,004)
Non-deductible expenses	0.28	1,802	0.32	1,885
Tax from previous year	2.09	13,596	(0.07)	(432)
Effect of changes in tax rate	(4.19)	(27,277)		
Others	(0.08)	(549)	0.07	428
Effective rate and income tax expense	9.16	59,527	13.47	79,936

The effective rate for income tax for 2014 is 9.16% (13.47% in 2013).

On September 29, 2014, was issued Law 20,780 and published in the Diario Oficial amending Taxation System of Income and introduces various adjustments in the tax system. In the third paragraph of Article 14 of the new Law of Income Tax, indicates that companies that do not exercise the option of regime change that by default corresponds to the semi-integrated, must modify transiently first category tax rate according to the following intervals:

Year	Rate
2014	21.0%
2015	22.5%
2016	24.0%
2017	25.5%
2018	27.0%

The effect in income by deferred taxes produced by the change of tax rate was a credit in income for an amount of Ch\$27,277 million.

Total	355,057	318,029

(*) These correspond to property and equipment to be given under a finance lease.

Edgar Filing: BANK OF CHILE - Form 6-K

(**) Assets received in lieu of payment are assets received as payment of customers' past-due debts. The assets acquired must at no time exceed, in the aggregate, 20% of the Bank's effective equity. These assets represent 0.0287% (0.0124% in 2013) of the Bank's effective equity.

The assets awarded at judicial sale are assets that have been acquired as payment of debts previously owed towards the Bank. The assets awarded at judicial sales are not subject to the aforementioned requirement. These properties are assets available for sale. For most assets, the sale is expected to be completed within one year from the date on which the asset was received or acquired. If the asset in question is not sold within the year, it must be written off.

The provision for assets received in lieu of payment is recorded as indicated in the Compendium of Accounting Standards, Chapter B-5 No. 3, which indicate to recognize a provision for the difference between the initial value plus any additions and its realizable value when the former is greater.

(***) This item mainly includes simultaneous operations carried out by the subsidiary Banchile Corredores de Bolsa S.A.

Above information only includes the most significant balances.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****26. Contingencies and Commitments, continued:****(b) Lawsuits and legal proceedings:****(b.1) Legal contingencies within the ordinary course of business:**

At the date of issuance of these consolidated financial statements, there are actions filed against the Bank and its subsidiaries related with the ordinary course operations. Among these is considered a collective action filed by the National Consumer Service in accordance with Law No. 19,496. This action seeks to challenge some clauses of the Unified Contract Products People regarding rates credit lines overdraft and validity of the tacit consent to changes in rates, charges and other conditions in consumer contracts. Also considered a collective action filed by the Organization of Consumers and Users of Chile, in which requests are declared unfair, and therefore null, the clauses of the Unified Contract Products People on use of services channels self attention (internet, ATMs, telephone banking) and credit cards, as the user's obligation to maintain due diligence and care of the secret keys and the responsibility they have in case of disclosure to third parties and use that they make of those keys. Among other considerations, the applicant considers that offenses of mail fraud (Phishing and Pharming), by which a third party appropriates the secret keys in the hands of users and appropriates funds, therefore affect banks and not to the customers.

In the ordinary course of business, the Bank and its subsidiaries act as defendant or co-defendant in various litigation matters. Although there can be no assurances, the Bank's management believes, based on information currently available, that the ultimate resolution of these legal proceedings are not likely to have a material adverse effect on its results of operations, financial position, or liquidity. As of December 31, 2014, the Bank has established provisions for this concept in the amount of MCh\$8,073 (MCh\$339 in 2013), recorded within Provisions in the statement of financial position. The following table presents estimated date of completion of the respective litigation:

	2015 MCh\$	2016 MCh\$	As of December 31, 2014		2019 MCh\$	Total MCh\$
			2017 MCh\$	2018 MCh\$		
Legal contingencies	7,395	433	95	150		8,073

(b.2) Contingencies for significant lawsuits:

As of December 31, 2014 and 2013, it does not exist any significant demands in courts that they affect or could affect the current consolidated financial statements.

Total	35,861		75,474	

In compliance to stablish by the Superintendence of Securities and Insurance in letter f) of Circular 1,894 of September 24, 2008, the entity has constituted guarantees, by management portfolio, in benefit of investor. Such guarantee corresponds to a bank guarantee for UF 100,000, with maturity on January 9, 2015.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****26. Contingencies and Commitments, continued:**

(c) Guarantees granted, continued:

ii. In subsidiary Banchile Corredores de Bolsa S.A.:

For the purposes of ensuring correct and complete compliance with all of its obligations as broker-dealer entity, in conformity with the provisions of article 30 and subsequent articles of Law 18,045 on Securities Markets, the subsidiary established a guarantee in an insurance policy for UF 20,000, insured by Mapfre Seguros Generales S.A., that matures April 22, 2016, whereby the Securities Exchange of the Santiago Stock Exchange was appointed as the subsidiary's creditor representative.

Guarantees:	2014 MCh\$	2013 MCh\$
Shares to secure short-sale transactions in:		
Securities Exchange of the Santiago Stock Exchange	17,158	16,946
Securities Exchange of the Electronic Stock Exchange of Chile	8,748	10,644
Fixed income securities to ensure system CCLV, Bolsa de Comercio de Santiago, Bolsa de Valores	2,996	2,995
Fixed income securities to ensure stock loan, Bolsa Eléctronica de Chile, Bolsa de Valores		68
Total	28,902	30,653

According to the provisions of internal stock market regulations, and for the purpose of securing the broker's correct performance, the company established a pledge on its share of the Santiago Stock Exchange in favor of that institution, as recorded in Public Deed on September 13, 1990, signed before Santiago public notary Mr. Raúl Perry Pefaur, and on its share in the Electronic Stock Exchange of Chile in favor of that institution, as recorded in a contract entered into by both parties on May 16, 1990.

Banchile Corredores de Bolsa S.A. keeps an insurance policy current with AIG Chile Compañía de Seguros Generales S.A. that expires January 2, 2015, and that covers employee fidelity, physical losses, falsification or

adulteration, and currency fraud with a coverage amount equivalent to US\$ 10,000,000.

Edgar Filing: BANK OF CHILE - Form 6-K

According to disposition of Chilean Central Bank, it was constituted a bank guarantee corresponding to UF 10,500, with purposes to comply with the contract SOMA (Contract for Service System Open Market Operations) of Chilean Central Bank. This bank guarantee is revaluated in UF to fixed term, not endorsable with maturity of July 17, 2015.

It was constituted a bank guarantee No. 356114-4 corresponds to UF 210,000, in benefits of investors with contracts of portfolio management. This bank guarantee is revaluated in UF to fixed term, not endorsable with maturity of January 9, 2015.

It was constituted a cash guarantee for an amount of US\$122,494.32, whose purpose is to comply obligations with Pershing, by operations made through this broker.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****26. Contingencies and Commitments, continued:**

(c) Guarantees granted, continued:

iii. In subsidiary Banchile Corredores de Seguros Ltda.

According to established in article No. 58, letter D of D.F.L. 251, as of December 31, 2014, the entity maintains two insurance policies that protect it in the face of possible damages that it could affect it, due to infractions of the law, regulations and complementary rules that regulate insurance brokers, and specially when the non-compliance is from acts, mistakes or omissions of the brokers, its represents, agent or dependent that participate in the intermediation.

The policies contracted are the following:

Matter insured	Amount Insured (UF)
Responsibility for errors and omissions policy	60,000
Civil responsibility policy	500

(d) Provisions for contingencies loans:

Established provisions for credit risk from contingencies operations are the followings:

	2014	2013
	MCh\$	MCh\$
Credit lines	34,715	31,664
Bank guarantees	15,372	13,915
Guarantees and surety bonds	3,009	3,135
Letters of credit	639	563
Other commitments	342	
Total	54,077	49,277

Edgar Filing: BANK OF CHILE - Form 6-K

(e) In the Eleventh Civil Court of Santiago, Banchile Corredores de Bolsa S.A. presented a reclamation against the Resolución Exenta No. 270 of October 30, 2014 of the Superintendency of Securities and Insurance (SVS), whereby mentioned Superintendency sanctioned to pay a fine to Banchile Corredores de Bolsa S.A. (Banchile Corredores) by an amount of UF 50,000 for the alleged infringement Article 53 second paragraph of Law 18,045 (Ley de Mercado de Valores), for certain specific transactions related to Sociedad Química y Minera de Chile S.A.'s shares (SQM-A). For which Banchile appropriated 25% of the amount of the fine. Pursuant to complaint seeks to rescind the fine.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

27. Equity, continued:

(b) Distributable income:

For purposes of Law No. 19,396 (in particular Articles 24, 25 and 28 of such law) and the Central Bank Contract, Banco de Chile's distributable net income will be determined by subtracting or adding to net income the correction of the value of the paid-in capital and reserves according to the variation of the Consumer Price Index between November of the fiscal year prior to the one in which the calculation is made and November of the fiscal year in which the calculation is made. The difference between net income and distributable net income shall be registered in a reserve account since the first day of the fiscal year following the date when the calculation is made. This reserve account cannot be distributed or capitalized. Provisional article four shall be in force until the obligation of Law No. 19,396 owed by Sociedad Matriz del Banco de Chile S.A., directly or through its subsidiary SAOS S.A., has been fully paid. The amount distributable income for the period 2013 was by Ch\$463,698 million (Ch\$463,688 million in 2013).

The above described agreement was subject to the consideration of the Council of the Central Bank of Chile, and such entity approved, in ordinary meeting that took place on December 3, 2009, determined to resolve in favor regarding the proposal.

As stated, the retention of earnings for the year 2014 made in March 2014 amounted to Ch\$49,913 million (Ch\$36,193 millions of income for the year 2012 retained in March 2013).

(c) Approval and payment of dividends:

At the Ordinary Shareholders' Meeting held on March 27, 2014, the Bank's shareholders agreed the distribution and payment of the dividend No. 202 amounting to Ch\$3.48356970828 per common share of Banco de Chile, with charge to net income for the year ended December 31, 2013. The amount of dividend paid of the period 2014 was Ch\$368,120 million.

At the Ordinary Shareholders' Meeting held on March 21, 2013, the Bank's shareholders agreed to distribute and pay dividend No. 201 amounting to Ch\$3.41625263165 per common share of Banco de Chile, with charge to net income for the year ended December 31, 2012. The amount of dividend paid of the period 2013 was Ch\$343,455 million.

(d) Provision for minimum dividends:

The Board of Directors established a minimum dividend distribution policy, where the Bank has to record a provision of 70% of net income. Accordingly, the Bank recorded a liability under the line item Provisions for an amount of MCh\$324,588 (MCh\$324,582 in 2013) against Retained earnings .

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****27. Equity, continued:**

(e) Earnings per share:

(i) Basic earnings per share:

Basic earnings per share are determined by dividing the net income attributable to the Bank shareholders in a period by the weighted average number of shares outstanding during the period.

(ii) Diluted earnings per share:

Diluted earnings per share are determined in the same way as Basic Earnings, but the weighted average number of outstanding shares is adjusted to take into account the potential diluting effect of stock options, warrants, and convertible debt.

The basic and diluted earnings per share as of December 31, 2014 and 2013 are shown in the following table, also shows the income and share data used in the calculation of EPS:

	2014	2013
Basic earnings per share:		
Net profits attributable to ordinary equity holders of the bank (in millions)	591,080	513,602
Weighted average number of ordinary shares	94,655,367,544	94,471,771,834
Dividend per shares (in Chilean pesos) (*)	6.24	5.44
Diluted earnings per share:		
Net profits attributable to ordinary equity holders of the bank (in millions)	591,080	513,602
Weighted average number of ordinary shares	94,655,367,544	94,471,771,834
Assumed conversion of convertible debt		
Adjusted number of shares	94,655,367,544	94,471,771,834
Diluted earnings per share (in Chilean pesos) (*)	6.24	5.44

(*) This calculation considers the effect of the share issue offspring.

As of December 31, 2014 and 2013, the Bank did not have any instruments that could lead to a dilution of its ordinary shares.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

27. Equity, continued:

(f) Other comprehensive income:

This category includes the following items:

The cumulative translation adjustment is generated from the Bank's translation of its investments in foreign companies, as it records the effects of foreign currency translation for these items in equity. During period of 2014 it was made a credit to equity for an amount of Ch\$80 million (credit to equity for Ch\$71 millions in 2013).

The fair market value adjustment for available-for-sale instruments is generated by fluctuations in the fair value of that portfolio, with a charge or credit to equity, net of deferred taxes. During the period of 2014 it was made a net credit to equity for an amount of Ch\$4,590 million (net credit to equity for Ch\$11,377 millions in 2013).

Cash flow hedge adjustment it consists in the portion of income of hedge instruments registered in equity produced in a cash flow hedge. During the period of 2014 it was made a credit to equity for an amount of Ch\$23,507 million (charge to equity for Ch\$14,455 millions for the period 2013).

38. Related Party Transactions:

The related parties of companies and their subsidiaries include entities of the company's corporate group; corporations which are the company's parent company, associated companies, subsidiaries, associates; directors, managers, administrators, main executives or receivers of the company on their own behalf or in representation of persons other than the company, and their respective spouses or family members up to the second degree of consanguinity or affinity, as well as any entity directly or indirectly controlled through any of them, the partnerships or companies in which the aforementioned persons are owners, directly or through other individuals or corporations, of 10% or more of their capital or directors, managers, administrators or main executives; any person that on their own or with others with whom they have a joint action agreement can designate at least one member of the company's management or controls 10% or more of the capital or of the voting capital, if dealing with a public corporation; those that establish the company's bylaws, or with a sound basis identify the directors' committee; and those who have held the position of director, manager, administrator, main executive or receiver within the last eighteen months.

Corporations Art, 147, states that a public corporation can only enter into transactions with related parties when the objective is to contribute to the company's interests, when terms of price, terms and conditions are commensurate to those prevailing in the market at the time of their approval and comply with the requirements and procedures stated in the same standard.

Moreover, article 84 of the General Banking Law establishes limits for loans granted to related parties and prohibits the granting of loans to the Bank's directors, managers and general representatives.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

39. Fair Value of Financial Assets and Liabilities:

Banco de Chile and its subsidiaries have defined a corporate framework for the Fair Value measurement and control to accomplish the Fair Value process according to local regulations, market standards and best practices in the industry. This framework is contained into the Banco de Chile's Fair Value Policy.

One of the most important definitions in this framework is the Product Control Unit, hereinafter PCU, function. This area is independent from both the principal management and the business unit, and reports to the CFO of Banco de Chile. This area is responsible for the independent verification of Profit and Losses, and Fair Value measurement and control for all Treasury transactions; Trading, Funding and gapping and Investments deals.

To accomplish the measurements and controls, Banco de Chile and its subsidiaries, take into account at least the following aspects:

- (i) Industry standards of fair value measurements.

In the fair value calculation process, is used standard methodologies; closing prices, discounted cash flows and option models, Black-Scholes model, in the options case. The input parameters are rates, prices and volatility levels for each term and market factor are trade in the local and international markets.

- (ii) Quoted prices in active markets.

The fair value for instruments with quoted prices in active markets is determined using daily quotes from electronic systems information as Bloomberg, Bolsa de Comercio de Santiago, LVA and Risk America terminals. This quote represents the price at which the instrument is frequently buy and sell in financial markets.

- (iii) Valuation techniques

Edgar Filing: BANK OF CHILE - Form 6-K

If there is not market quotes in active markets for the financial instrument, valuation techniques will be used to determine the fair value.

Due to the fact that fair value models requires a set of market parameters as inputs, it is part of the fair value process to maximize the utilization based in observable quoted prices or derived from similar instruments in active markets. Nevertheless there are some cases for which neither quoted prices nor derived prices are available; in these cases external data from specialized providers, price for similar transactions and historical information it is used for validate the parameters that will be used as inputs.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

39. Fair Value of Financial Assets and Liabilities, continued:

(iv) Fair value adjustments.

Part of the fair value process consist in adjustment, Market Value Adjustments or MVA for short, to take into account two different market facts; bid/offer spreads and market factors liquidity. These adjustments are calculated and analyzed by the PCU and Risk Market areas.

The bid/offer spread adjustment reflects the expected impact on fair value due to close long or short positions in a specific market factor and term, valuated at midpoint. For example, long positions in an asset will be impacted in order to reflect the fact that in selling that position will be quoted at bid instead at midpoint. For the bid/offer spread adjustment, market quotes or indicative prices for each position, instrument, currency and term are used. Bid, mid and offer market quotes are considered.

The liquidity adjustment considers the relative size to the market of each position in the portfolio. This adjustment is intended to reflect the relative size of Banco de Chile and the deepness of the markets. For this adjustment, the size of each position, recent transaction in active markets and recently observed liquidity are taking into account.

(v) Fair value control

To ensure that the market input parameters that Banco de Chile is using for fair value calculations represent the state of the market and the best estimate of fair value, the PCU unit runs on a daily basis an independent verification of prices and rates. This process aims to set a preventive control on the official market parameters provided by the respective business area. A comparative control based on Mark-to-Market differences, using one set of inputs prepared by the business area and one set prepared by the PCU, is conducted before fair value calculations. The output of this process is a set of differences in fair value by currency, product and portfolio. These differences are compared with specific ranges by grouping level; currency, product and portfolio.

In the event when significant differences were detected, these differences are scaled according to the amount of materiality for each grouping level, from a single report to the trader until a report to the Board, These ranges of materiality control are approved by the Assets and Liabilities Committee (ALCO).

Edgar Filing: BANK OF CHILE - Form 6-K

Complementary and in parallel, the PCU generates daily reports of P&L and risk market exposure. These two kind of reports allows adequate control and consistency of the parameters used in the valuation, looking backwards revision.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

39. Fair Value of Financial Assets and Liabilities, continued:

(vi) Judgmental analysis and information to Senior Management

In particular no cases where there is no market quotations for the instrument, similar transaction prices or indicative parameters, a reasoned analysis and specific controls should be made to estimate the fair value of the operation or transaction. Within the Banco de Chile's framework for fair value, described in the Fair Value Policy approved by the Board of Banco de Chile, the approval level required for operate this kind of instruments, there is no market information or cannot be inferred from prices or rates, is established.

(a) Fair value hierarchy

Banco de Chile and subsidiaries, taken into account the preceding statements, classify all the financial instruments among the following levels:

Level 1: Observable, quoted price in active markets for the same instrument or specific type of transaction to be evaluated.

In this level are considered the following instruments: currency futures, Chilean Central Bank and Treasury securities, mutual funds investments and equity.

For the Chilean Central Bank and Treasury securities, all instruments that belong to one of the following benchmark groups will be considered as Level 1: Pesos-02, Pesos-05, Pesos-07, Pesos-10, UF-02, UF-05, UF-07, UF-10, UF-20, UF-30. A benchmark group is composed by a number of instruments that have similar duration and share the same quoted price within the group. This condition allows for a greater depth of the market, assuring daily observable quotes.

For each and every one of these instruments exist daily observable market valuation parameters; internal rates of return and closing prices, respectively, therefore no assumptions are needed to calculate the fair value. For currency futures as well as mutual funds and equity, closing prices times the number of instruments is used for fair value calculations. For Chilean Central Bank and Treasury securities the internal rate of return is used to discount every cash flow and obtain the fair value of each instrument, in the case of mutual funds and equity, is used the current price multiplied by the quantity of instruments to calculate the fair value.

The preceding described methodology corresponds to the one utilized for the Bolsa de Comercio de Santiago (Santiago's main Exchange) and is recognized as the standard in the market.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

39. Fair Value of Financial Assets and Liabilities, continued:

(a) Fair value hierarchy, continued

Level 2: Valuation techniques whose inputs are other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly or indirectly. For instruments in this level the valuations is done based on inference from observable market parameters; quoted prices for similar instruments in active markets. In this level are included the following inputs:

- a) Quoted prices for similar assets or liabilities in active markets.
- b) Quoted prices for identical or similar assets or liabilities in markets that are not active.
- c) Inputs other than quoted prices those are observable for the asset or liability.
- d) Inputs those are derived principally from or corroborated by observable market data.

This level is composed mostly by derivatives, currency and rate derivatives, bank's debt securities, debt Chilean and foreign companies, made in Chile and abroad, mortgage claims, money market instruments and less liquid Chilean Central Bank and Treasury securities.

For derivatives the fair value process depend upon his value is impacted by volatility as a relevant market factor; if is the case, Black-Scholes-Merton type of formula it is used. For the rest of the derivatives, swaps and forwards, net present value through discounted cash flows is used. For securities classified as level 2, the obtained internal rate of return is used to discount every cash flow and obtain the fair value of each instrument, for each currency.

In the event that there is no observable price for an instrument in a specific term, the price will be inferred from the interpolation between periods that do have observable quoted price in active markets. These models incorporate various market variables, including foreign exchange rates and interest rate curves.

(a) Fair value hierarchy, continued

Valorization Techniques and Inputs:

Type of Financial Instrument	Valuation Method	Description: Inputs and Sources
Local Bank and Corporate Bonds	Discounted cash flows model	<p>Prices are provided by third party price providers that are widely used in the Chilean market.</p> <p>Model is based on a Base Yield (Central Bank Bonds) and issuer spread.</p> <p>The model is based on daily prices and risk/maturity similarities between Instruments.</p>
Offshore Bank and Corporate Bonds	Discounted cash flows model	<p>Prices are provided by third party price providers that are widely used in the Chilean market.</p> <p>Model is based on daily prices.</p>
Local Central Bank and Treasury Bonds	Discounted cash flows model	<p>Prices are provided by third party price providers that are widely used in the Chilean market.</p> <p>Model is based on daily prices.</p>
Mortgage Notes	Discounted cash flows model	<p>Prices are provided by third party price providers that are widely used in the Chilean market.</p> <p>Model is based on a Base Yield (Central Bank Bonds) and issuer spread.</p>

Time Deposits	Discounted cash flows model	The model takes into consideration daily prices and risk/maturity similarities between instruments.
		Prices are provided by third party price providers that are widely used in the Chilean market.
Cross Currency Swaps, Interest Rate Swaps, FX Forwards, Inflation Forwards	Discounted cash flows model	Model is based on daily prices and considers risk/maturity similarities between instruments.
		Zero Coupon rates are calculated by using the bootstrapping method over swap rates.
		Offshore rates and spreads are obtained from third party price providers that are widely used in the Chilean market.
		Forward Points, Inflation forecast and local swap rates are provided by market brokers that are widely used in the Chilean market.
FX Options	Black-Scholes Option Pricing Model	Prices for volatility surface estimates are obtained from market brokers that are widely used in the Chilean market.

It should be noted that to consider that an input is corroborated by the market, it must meet minimum standards to ensure the robustness of information (backtesting). Until March 2014 this type of input was considered Level 3 This change involved the reclassification criteria in December 2013 at MCh\$ 254,573 Level 3 to Level 2.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****39. Fair Value of Financial Assets and Liabilities, continued:****(a) Fair value hierarchy, continued**

Level 3: These are financial instruments whose fair value is determined using unobservable inputs. An adjustment to an input that is significant to the entire measurement can result in a fair value measurement classified within Level 3 of the fair value hierarchy if the adjustment using significant unobservable data entry.

Instruments classified as level 3 correspond to Corporate Debt issued mainly Chilean and foreign companies, issued both in Chile and abroad.

During the second quarter of this year, we have adopted the approach of considering Level 2 financial instruments whose input (originating from external suppliers) are corroborated by the market. It should be noted that to consider that an input is corroborated by the market, it must meet minimum standards to ensure the robustness of information (Back Testing). Until March 2014 this type of input was considered Level 3.

This change of position reclassifications involved the following information relating to the December 31, 2013

Total	182,717	(3,759)	81,093	(1,193)

With the purpose to determine the sensitivity of the financial investments to changes in significant factors market, the Bank has made alternative calculations at fair value, changing those key parameters for the valuation and which are not directly observables in screens, In the case of financial assets presented above table, which corresponds to bank bonds and corporate bonds, considering that these instruments do not have current prices or observables, was used as inputs prices, prices based on broker quotes or runs. Prices are generally calculated as a base rate plus a spread. For local bonds, this was determined by applying only a 10% impact on the price, while for offshore bonds this was determined by applying only a 10% impact on the spread because the base rate is hedged with instruments on interest rate swaps so-called hedge accounting. The impact of 10% is considered a reasonable move considering the market performance of these instruments and comparing it against the adjustment bid/offer that is provided for by these instruments.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****39. Fair Value of Financial Assets and Liabilities, continued:****(e) Other assets and liabilities:**

The following table summarizes the fair values of the Bank's main financial assets and liabilities that are not recorded at fair value in the Statement of Financial Position. The values shown in this note do not attempt to estimate the value of the Bank's income-generating assets, nor forecast their future behavior. The estimated fair value is as follows:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

39. Fair Value of Financial Assets and Liabilities, continued:

(e) Other assets and liabilities, continued:

Other financial assets and liabilities not measured at fair value, but for which a fair value is estimated even when not managed based on this value, include assets and liabilities such as loans, deposits and other time deposits, debt issued and other financial assets and liabilities with different maturities and characteristics. The fair values of these assets and liabilities are calculated using the model of discounted cash flow (DCF) and the use of various sources of data such as yield curves, credit risk spreads, etc. Additionally, because some of these assets and liabilities are not traded in the market, it requires analysis and periodic reviews to determine the suitability of inputs and fair values determined.

The following table shows the fair value of financial assets and liabilities not measured at fair value, as of December 31, 2014 and 2013:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

39, Fair Value of Financial Assets and Liabilities, continued:

(f) Levels of other assets and liabilities, continued:

The Bank determines the fair value of these assets and liabilities according to the following:

• Short-term assets and liabilities: For assets and liabilities maturing short-term (less than three months) it is assumed that the book values approximate their fair value. This assumption is applied to the following assets and liabilities:

- | | |
|--|--|
| • Cash and due from banks | • Current accounts and other demand deposits |
| • Transactions in the course of collection (asset) | • Transactions in the course of payments (liability) |
| • Cash collateral on securities borrowed and reverse repurchase agreements (asset) | • Cash collateral on securities lent and repurchase agreements (liability) |
| • Loans and advance to banks | • Other financial obligations |

(g) Offsetting of financial assets and liabilities:

The Bank trades financial derivatives with foreign counterparties using ISDA Master Agreement (International Swaps and Derivatives Association, Inc.), under legal jurisdiction of the City of New York USA or London United Kingdom. Legal framework in these jurisdictions, along with documentation mentioned, it allows to Banco de Chile the right to anticipate the maturity of the transaction and then, offset the net value of those transactions in case of default of counterparty. The Bank has negotiated with these counterparties an additional annex (CSA Credit Support Annex), including other credit mitigating, such as margins about a certain threshold, early termination (optional or mandatory), coupon adjustment transaction over a certain threshold amount, etc.

Below are detail contracts susceptible to offset:

Fair Value	Negative Fair Value of contracts with right to offset	Positive Fair Value of contracts with right to offset	Financial Collateral	Net Fair Value

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

41. Risk Management:

(1) Introduction:

The Bank's risk management is based on specialization, knowledge of the business and the experience of its teams, with professionals specifically dedicated to each different type of risks. Our policy is to maintain an integrated, forward looking approach to risk management, taking into account the current and forecasted economic environment and the risk/return ratio of all products for both the Bank and its subsidiaries.

Our credit policies and processes acknowledge the particularities of each market and segment, thus affording specialized treatment to each one of them. The integrated information prepared for risk analysis is key to developing our strategic plan, this objectives include: determining the desired risk level for each business line; aligning all strategies with the established risk level; communicating desired risk levels to Bank's commercial areas; developing models, processes and tools for evaluating, measuring and controlling risk throughout the different business lines and areas; informing the board of directors about risks and their evolution; proposing action plans to address important deviations in risk indicators and enforcing compliance of applicable standards and regulations.

(a) Risk Management Structure

Credit, Market and Operational Risk Management lies at the all levels of the Organization, with a structure that recognizes the relevance of the different risk areas that exist. Current levels are:

(i) Board of Directors

The Board is responsible for the establishment and monitoring of the Bank's risk management structure. Due to the above, it is permanently informed regarding the evolution of the different risk areas, participating through its Finance and Financial Risk Committees, Credit Committees, Portfolio Risk Committees, Operational Risk Committee and Senior Operational Risk Committee, which check the status of credit and market risks. In addition, it actively participates in each of them, informed of the status of the portfolio and participating in the strategic definitions that impact the quality of the portfolio.

Edgar Filing: BANK OF CHILE - Form 6-K

Risk management policies are established in order to identify and analyze the risks faced by the Bank, to set adequate limits and controls and monitor risks and compliance with limits. The policies and risk management systems are regularly reviewed in order for them to reflect changes in market conditions and the Bank's activities. It, through its standards and management procedures intends to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

41. Risk Management, continued:

(1) Introduction, continued:

(a) Risk Management Structure, continued

(ii) Finance, International and Financial Risk Committee

This committee meets monthly to review developments and the current status of financial positions and market, price and liquidity risk. It reviews estimated results from financial positions in order to measure the risk/return ratio of the Bank's Treasury business, as well as the evolution of and forecasts regarding use of capital. The knowledge of the current state of the market risks allow to forecast potential future loss, with an important confidence level, in the case of adverse transactions in the main market variables or illiquidity (exchange rate, interest rates and options volatility) or a tight liquidity (either liquidity of trading in financial instruments as funding liquidity).

Additionally, the Committee reviews the estimated financial results that generate these positions separately, in order to measure the risk-return businesses involved in handling financial positions of the Treasury, the evolution of the use of capital, and the estimated credit risk and market that the Bank will face in the future. The Committee also discussed the international financial exposure and liabilities major credit exposures generated by derivatives transactions.

Committee is responsible for the design of policies and procedures related to the establishment of limits and alerts financial positions, as well as measurement, control and reporting of the same. Subsequently, policies and procedures are subject to approval by the Bank Board.

The Finance, International and Financial Risk Committee comprises the Chairman, four Directors, the General Manager, the Manager of Corporate Risk Division, the Manager of the Corporate and Investment Banking Division, the Manager of Financial Control Division, the Manager of Treasury Division and the Manager of Financial Risk Area.

The Committee meets in regular session once a month and may be cited extraordinary request of the President, two Directors or the General Manager.

(iii) Credit Committees

The corporate governance structure of the Bank provides various credit committees responsible for credit decisions related to the different business segments and the type of risk involved.

Each credit committee is responsible for defining the terms and conditions of acceptance of counterparty risks considered in the evaluation, and are comprised of members with sufficient powers for decision-making. The Corporate Risk Division participates in an independently and autonomic form from commercial areas.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

41. Risk Management, continued:

(1) Introduction, continued:

(c) Measurement Methodology

In terms of Credit Risk, provision levels and portfolio expenses are the basic measurements used to determine the credit quality of our portfolio.

Risk monitoring and control are performed primarily based on established limits. These limits reflect the Bank's business and market strategy as well as the risk level it is willing to accept, with added emphasis on selected industry sectors.

The Bank's Chief Executive Officer, on a daily basis, and the Finance, International and Market Risk Committee, on a monthly basis, receive a report detailing the evolution of the Bank's price and liquidity risk, based on both internal and regulator-imposed metrics.

Each year, the Board of Directors is presented with the results of a sufficiency test for allowances for loan loss. This test shows whether the Bank's existing level of allowances for loan loss, both for the individual and group portfolios, is sufficient, based on historic losses or impairment experienced by the portfolio. The Board of Directors must issue a formal opinion on its sufficiency.

(2) Credit Risk:

Credit risk is the risk that we will incur a loss because a customer or counterparty do not comply with their contractual obligations, mainly its origin is in account receivable and financial investments, and derivative instruments.

This risk is managed using a global, unified and forward-looking strategy, which recognizes the current and projected economic environment of the markets and segments in which our different businesses are developing and grants appropriate credit treatment to each such market or segment by using risk limits that we are willing to accept from counterparties.

Managing credit risk is, therefore, inherent to our business and must be incorporated into each segment in which we do business: In this way, we may achieve an optimum balance between assumed risks and attained returns and properly allocate capital to each business line while complying with regulations and criteria defined by the Board of Directors, in order to ensure that the Bank has an appropriate capital base for potential losses that may arise from its credit exposure.

Counterparty limits are established by analyzing financial information, risk ratings, the nature of the exposure, documentation, guarantees, market conditions and the pertinent industry sector, among other factors. The process of monitoring credit quality also includes identifying in advance any possible changes in counterparty's payment capacity, which enables us to evaluate the potential loss from these risks and take corrective actions.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

41. Risk Management, continued:

(2) Credit Risk, continued:

(a) Approval Process:

Examination and approval of Bank loans operating under a differentiated approach, because there are different nature of the segments, which it characterizes by different basics in its variables of explanation of its financial structure and repayment ability. The general concepts involved in each approval process are:

- Politics and procedures
- Specialization and experience level of participant of the process
- Types and depth of technological platforms required
- Type of model/indicators predictives for each segments (Scoring or Rating)

According to the mentioned above, there are three types of approval models:

Automated Model: This model is used to evaluate credit applications massive segments of individuals without a commercial business, Commercial Banking and Credichile. The fundamental pillars in this model of admission are the following dimensions:

- Minimum credit profile (scoring)
- Borrowing Limits (exposure)
- Target Market

The credit profile is evaluated using statistics models of Credit Scoring , which are different for Commercial Area and Credichile, and also are segmented and specifics for different types of clients. The predictive ability of the models is fundamental to do successful risk management during different economics cycles, which force to be permanently reviewed actual market conditions.

Borrowing limits set the maximum exposure that the Bank is willing to take with each customer in different products, taking into consideration the debt they have with other financial institutions. These parameters are defined according to risk profile and by segment or income level of each client. The correct determination of the borrowing capacity of each type of customers is very important especially in more restrictive economic cycles, which are characterized by higher unemployment or reduced income from customers.

Definition of target market is an elemental dimension to guide the commercial efforts and business strategies. Offer of products more efficient allow to maximize the individual exposition and expected returns.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

41. Risk Management, continued:

(2) Credit Risk, continued

(a) Approval Process, continued

Parametric Model: The SME segment is a segment that has developed assessment schemes and ad hoc admission to their characteristics. This segment has defined a parametric model that is responsible for mass segment features a segment as well as case by case analysis. This model considers the evaluation of customers based on three pillars:

- Payment behavior both, internal and external.
- Financial reporting analysis.
- Evaluation of the client's business.

This process yields a parametric evaluation category that summarizes the credit quality of the customer through a rating, which is linked directly to the powers of credit required for each operation.

Casuality of cases occur in which lower level of information available and/or economic sector, do not have a rating, in such cases being managed directly by the Risk area, which makes the credit assessment criteria applying their expert. Note that internal audits are performed on an ongoing basis to ensure the quality of the information used in the preparation of Rating.

Additionally, the Corporate Risk Division supports business significantly through the process of pre-approval of loans to customers, for optimize the relation risk-return of these segments, Thus, both the retail market and in the small and medium enterprises has specialized units that generate credit offers, according to predefined strategies for the different group of clients, according to statistic models which it is calibrating based in evolution of macroeconomics variables and behavior that group of clients have in the time. These offers of credits and operations approval are supported by the constitution of collateral.

Case to case model: This type of analysis applies to wholesale market, corporations and real-state. Consist in individual assessment expert, which provides the level of risk, terms, transaction amount and complexity and perspective of the business, among other variables. This approval process is also supported by a rating model which gives a more uniform assessment and determines the level of credit.

In this sense there are a process and consolidated team with high level of experience and expertise in approving appropriations for the various segments and sectors in which the Bank participates, with a perspective of medium and long term respect different industries and clients. Additionally, to make more effective the admission process, improving quality of assessment and optimizing times of responses to clients, the process of data collection, analysis and discussion of the proposed credit are supported by the areas of credit risk.

It also has specialized areas in some segments which by their nature require expert knowledge (finance real estate, construction, agricultural, and others with advice ad hoc when they are very specific), which also support from the gestation of operations, counting with tools designed especially depending on the particular characteristics of business and their respective risks.

41. Risk Management, continued:

(2) Credit Risk, continued

(a) Approval Process, continued:

Case to case model, continued:

It should also be noted, that although it has areas dedicated to monitoring, into the admission areas, they develop permanently monitoring activities that allow monitoring jointly the develop of operations from the inception to the recovery to ensure that portfolio risks are appropriately recognized.

(b) Control and Follow up

(b.i) Corporations

In the enterprise market, management and monitoring are performed by a set of systematic processes, based on parametric indicators for small and medium companies and setting particular controls for large companies, for verifying the normal development in their business in time. As an example, are the following:

- Delinquencies management, supported by the information of predictive indicators of risk level, with follow up and action plans in the case of more important clients, also manage of different strategies of early collection.
- Structured controls of clients with credit covenants.
- Systematic follow up of variables of credit behavior and financial figures of the corporations.

Edgar Filing: BANK OF CHILE - Form 6-K

- Control of particular conditions and restrictions of credits.
- Management portfolio classification, which determines risk and required rate of provision, according to general rules established by the Superintendency of Banks and Financial Institutions, and specific criteria set out in the Bank, allowing correct application over special clients.
- Management portfolio in special follow up, through a periodic committee and permanent monitoring, allowing establish action plans for entities that presents risk alerts.
- Quick revision of the portfolio, determining clients potentially affected by the impact generated by a change in some relevant macroeconomical variables in aspecific sector or activity.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

41. Risk Management, continued:

(2) Credit Risk, continued:

(b) Control and Follow up, continued:

(b.ii) Individuals

In individual markets, control and follow up focus in the permanent monitoring of principal indicator of aggregate portfolio and by litter analysis; this is revision of evolution portfolio in a determinate date, Principal index are:

- Follow up of the expected loss of portfolio through of general model of provision and back-test of loss for portfolio that have maturity required.
- Litter analysis of new clients and respective decomposition of loss rate by products, campaigns champion/challenger, segments, etc.
- Delinquencies general of portfolio with special follow up of products, segments, income brackets, branches, zones, campaigns, etc., oriented to early detection of risk sources higher than expected in the portfolio, to regularization of cases and to integral management of politics of credits and campaigns of pre-approval.
- Rate of approval and rejection for request presented in first instance and through appeal, with details of information by different explicative attributes.
- Follow up of mortgage portfolio according to variables of politics, tranches (loan to value), terms, relation dividend/income clients, segments, income brackets, etc.

Additionally are defined Strategies of Risk Segmentation for processes of collection, which are compatibles with a appropriate structure, protocol and intensity to maximize the recovery in different phases of delinquency of clients.

(c) Derivative Instruments:

The value of derivative financial instruments is always reflected in the Bank's balance sheet. The risks derived from these instruments, determined using SBIF models, are controlled against lines of credit of the counterparty at the inception of each transaction.

(d) Portfolio Concentration:

Maximum credit risk exposure per counterparty without considering collateral or other credit enhancements as of December 31, 2014 and 2013 does not exceed 10% of the Bank's effective equity.

(2) Credit Risk, continued:

(e) Collaterals and Other Credit Enhancements

The amount and type of collateral required depends on the counterparty's credit risk assessment.

The Bank has guidelines regarding the acceptability of types of collateral and valuation parameters.

The main types of collateral obtained are:

- For commercial loans: Residential and non-residential real estate, liens and inventory.
- For retail loans: Mortgages on residential property.

The Bank also obtains collateral from parent companies for loans granted to their subsidiaries.

Management makes sure its collateral is acceptable according to both external standards and internal policies guidelines and parameters. The Bank has approximately 200,623 collateral assets, the majority of which consist of real estate.

The Bank also uses mitigating tactics for credit risk on derivative transactions, To date, the following mitigating tactics are used:

- Accelerating transactions and net payment using market values at the date of default of one of the parties.

- Option for both parties to terminate early any transactions with a counterparty at a given date, using market values as of the respective date.
- Margins established with time deposits by customers that close FX forwards with subsidiary Banchile Corredores de Bolsa S.A.

(f) Credit Quality by Asset Class

The Bank determines the credit quality of financial assets using internal credit ratings. The rating process is linked to the Bank's approval and monitoring processes and is carried out in accordance with risk categories established by current standards. Credit quality is continuously updated based on any favorable or unfavorable developments to customers or their environments, considering aspects such as commercial and payment behavior as well as financial information.

The Bank also conducts reviews of companies in certain industry sectors that are affected by macroeconomic or sector-specific variables. Such reviews allow the Bank to timely establish any necessary allowance loan losses that are sufficient to cover losses for potentially uncollectable loans.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

41. Risk Management, continued:

(2) Credit Risk, continued:

(f) Credit Quality by Asset Class, continued:

The value of collateral maintained by the Bank for loans individually classified as impaired as of December 31, 2014 and 2013 is MCh\$16,445 and MCh\$91,105 respectively.

The value of collateral maintained by the Bank for loans over-due but non-impaired as of December 31, 2014 and 2013 is MCh\$271,899 and MCh\$249,058 respectively.

(g) Assets Received in Lieu of Payment

The Bank has received assets in lieu of payment totaling MCh\$3,948 and MCh\$3,012 as of December 31, 2014 and 2013, respectively, the majority of which are properties. All of these assets are managed for sale.

(h) Renegotiated Assets

The impaired loans are considered to be renegotiated when the corresponding financial commitments are restructured and the Bank assesses the probability of recovery as sufficiently high.

The following table details the book value of loans with renegotiated terms per financial asset class:

Edgar Filing: BANK OF CHILE - Form 6-K

	2014 MCh\$	2013 MCh\$
Financial Assets		
Loans and advances to banks		
Central Bank of Chile		
Domestic banks		
Foreign banks		
Subtotal		
Loans to customers, net		
Commercial loans	190,692	163,827
Residential mortgage loans	19,585	21,411
Consumer loans	324,622	311,363
Subtotal	534,899	496,601
Total renegotiated financial assets	534,899	496,601

The Bank evaluates allowances loan losses in two segments: individually assessed allowances loan losses and group assessed allowances loan losses, which are described in more detail in Note No. 2(m).

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

41. Risk Management, continued:

(3) Market Risk

Market Risk is referred as to the potential loss the Bank may incur due to the scarcity of liquidity or due to an adverse change of market factors levels (such as FX rates, equity prices, interest rates, options volatility, etc).

(a) Liquidity Risk:

Liquidity Risk Measurement and Limits

The Bank measure and control the Trading Liquidity risk for trading portfolios by establishing: DV01 limits to certain specific tenors for each yield curve, limits to spot positions for FX or Equity portfolios and vega limits to FX options portfolios. Trading Liquidity for debt instruments that are part of the Accrual Book is not limited explicitly, taking into account that in this case the positions are expected to be held until medium term or even until maturity.

Funding Liquidity is controlled and limited using the regulatory C08 Index report.

The SBIF sets the following limits for the C08 index:

Foreign Currency balance sheet:	1-30 days C08 index < 1x TIER 1 Capital
All Currencies balance sheet:	1-30 days C08 index < 1x TIER 1 Capital
All Currencies balance sheet:	1-90 days C08 index < 2x TIER 1 Capital

Edgar Filing: BANK OF CHILE - Form 6-K

The SBIF authorized Banco de Chile to utilize the C08 Adjusted Index report, which includes, in addition to the regular report, behavioral maturity assumptions for some specific balance sheet items, such as roll-over or evergreen pattern for some portion of the loan portfolio; some portion of the demand deposits are considered core and therefore no withdrawal is reported, etc.

As of December 31, 2011, the 1-30 days Adjusted C08 Index for the foreign currency balance sheet items was slightly lower than 0.072, The 1-30 days Adjusted C08 Index for all currencies balance sheet items on that date is reported as 0.267; the value of the same index for the period 1 to 90 days is 0.452.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

41. Risk Management, continued:

(3) Market Risk, continued:

(a) Liquidity Risk, continued:

Banco de Chile has established internal liquidity metrics, in addition to those required by the regulatory entities, with the objective of covering other dimensions of liquidity risk, such as large funds providers diversification; maturity concentration triggers; etc. These and other financial ratios are monthly monitored in order to early detect structural changes of the balance sheet profile. Additionally, the bank is closely monitoring market triggers, such as interest rates levels, intervention of the markets made by the Central Bank, the 5-year Chile CDS spread, etc. These allow the bank to early prevent systemic crisis due to market conditions.

(b) Price Risk:

Price Risk Measurement and Limits

The Price Risk measurement and management processes are implemented utilizing various internal metrics and reports. These are built for the Trading portfolio and separately for the Bank book (also referred as to the Accrual book). In addition to this, and just on supplementary basis, the bank submits regulatory reports to the corresponding regulatory entities.

The regulatory risk measurement for the Trading portfolio (SBIF C41 report) is made by using standardized methodologies provided by the regulatory entities (Central Bank of Chile and SBIF), which are adopted from BIS 1993 standardized methodologies for the risk measurement of such portfolios. The referred methodologies estimate the potential loss that the Bank may incur considering standardized fluctuations of the market factors (FX rates, interest rates, etc.) relevant market factors that may adversely impact the value of interest rate positions, FX spot positions and vega positions generated by either FX or interest rate options portfolios. The interest rate shifts are provided by the regulatory entity; in addition, very conservative correlation and tenors factors are included in order to include non-parallel yield curve shifts reflecting steepening/flattening behaviors. The impact due to FX open positions is obtained by using huge fluctuations (8% for liquid FX rates and 30% for the illiquid ones), The SBIF does not establish a separate limit for this particular risk but a global one that includes this risk (also called Market Risk Equivalent or ERM) and the Risk Weighted Assets (also called RAAP assets). The sum of ERM and the 10% of the RAAP assets cannot exceed the 100% of the bank's Tier2 Capital, In the future, the Operational Risk will be included to the above sum.

Additionally, the Bank has established internal limits for the Trading Book, In fact, there are limits for the FX net open positions (FX delta), for the interest rate sensitivities generated by the derivatives and debt securities portfolios (DV01 or also referred as to rho) and for the FX volatility sensitivity (vega). Limits are established on an aggregate basis but also for some specific repricing tenor points, The use of these limits are monitored, controlled and reported on a daily basis by independent parties to the senior management of the Bank, The internal governance framework also establishes that these limits are approved by the board and must be reviewed at least annually.

The Bank utilizes the parametric VaR (Value-at-Risk or VaR) as the risk measurement tool for the trading portfolio exposures, The model includes 99% confidence level; overnight volatility of market factors fluctuations and correlations between them are obtained from historical closing rates observed the most recent one-year period. This VaR number is escalated by 22 days (a calendar month) for reporting purposes.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****41. Risk Management, continued:****(3) Market Risk, continued:****(b) Price Risk, continued:**

The regulatory risk measurement for the Bank Book (SBIF C40 report) due to interest rate fluctuations is made by using standardized methodologies provided by the regulatory entities (Central Bank of Chile and SBIF). The report includes models for reporting interest rate gaps and standardized adverse interest rate fluctuations. In addition to this, the regulatory entity has requested from banks to establish internal limits for this regulatory risk measurement. Limits must be established separately for short term and long term portfolios. The short term risk limit must be expressed as a percentage of the NIM and the long term risk limit as a percentage of the Tier-2 Capital. The bank is currently using 25% for both limits. The use of these limits during 2014 is illustrated below:

	Banking Risk Book	Banking Risk Book
	Short term	Long Term
Maximum Use	9.3%	18.5%
Average Use	7.3%	17.4%
Minimum Use	6.1%	16.6%

Additionally, the Bank during utilizes build-in models for measuring, limiting, controlling and reporting interest rate exposures (IRE) and interest rate risks (also called Earnings at Risk or EaR) for the Accrual Book. The Accrual book includes all balance sheet items (even some items that are excluded by the regulators in the analysis of the Bank Book, such as Capital and Fixed Assets, for example). The internal models consider a more comprehensive and detailed analysis of interest rates fluctuations, exchange rates and inflation than the SBIF C40 report required by regulators.

In addition to the above, the Market Risk Policy of Banco de Chile enforces to perform daily stress tests for trading portfolios and on a monthly basis for accrual portfolios. The output of the stress testing process is compared to corresponding trigger levels: in the case triggers are breached, the senior management is notified in order to implement further actions, if necessary. Moreover, intra-month actual P&L for trading activities is compared to some trigger levels: escalation to senior levels is also done when breaches occur.

(b) Price Risk, continued:

Price Risk Sensitivity Analysis

The Bank has focused on stress tests as the main measurement tool for analyzing price risk sensitivity. The analysis is implemented for the Trading Book and the Bank Book separately. After the financial crisis started during 2008 and based on the various studies and analyses made on this specific matter, the Bank adopted this tool, for sensitivity analysis, when it notices that it is more reliable than normal distribution instruments such as VaR for trading portfolios or EaR for accrual portfolios, since:

- (a) The financial crisis shows fluctuations that are materially higher than those used in the VaR with 99% of confidence level.
- (b) The financial crisis shows also that correlations between these fluctuations that are materially different to those used in the VaR, since crisis precisely indicate severe disconnections between the behavior of market factors respect to the patterns normally observed.
- (c) Trading liquidity dramatically decreased in emerging markets during the financial crisis (in the case of Chile too) and therefore, the escalation of the daily VaR is a very gross approximation of the expected loss.

Stress tests are produced observing historical events and collecting market factors data.

The former allow the Bank to gauge actual distress events in terms of magnitude but mainly focused on detecting unusual fluctuations.

The latter gives the Bank the technical background for implementing statistical analysis, An updated database is maintained including historical data of foreign exchange rates, debt instruments yields to maturity, derivatives swap yields, foreign exchange volatilities, etc, that enable the Bank to maintain up-to-date records of historical volatility of market factors fluctuations and correlations between these ones.

Given the above, the stress tests may be implemented modeling directional fluctuations but also knowing the magnitude of the modeled fluctuations relative to statistical data and also how frequent the fluctuation modeled occurred in the past.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

41. Risk Management, continued:

(3) Market Risk, continued:

(b) Price Risk, continued:

In order to comply with IFRS 7.40, we include the following exercise illustrating an estimation of the impact of feasible but reasonable fluctuations of interest rates, swaps yield, foreign exchange rates and foreign exchange volatilities embedded in the Trading and Accrual portfolios. Given that the Bank's portfolio includes positions denominated in nominal and real interest rates, these fluctuations must be aligned with realistic inflation changes forecast. The exercise is implemented in a very simplistic way: trading portfolios impacts are estimated by multiplying DV01s by expected interest rates shifts; accrual portfolios impacts are computed by multiplying cumulative gaps by forward interest rates modeled fluctuations. It is relevant to note, this methodology includes the limitation that the interest rates convexity is not properly captured when material fluctuations are modeled; additionally, neither convexity nor prepayments behaviors are captured for the accrual portfolio analysis. In any case, given the magnitude of the shifts, the methodology may be accurate enough for the purposes and scope of the analysis.

The following table illustrates the fluctuations modeled and used in the stress testing process, Bonds yields, derivatives yields, FX rates, FX CLP/USD volatility and inflation fluctuations are shown for each tenor point. Equity prices fluctuations are not included given that the positions held in the stockbrokerage house (Banchile Corredores de Bolsa SA) are negligible. In fact, equity positions are typically very small given that this legal vehicle is mostly focused on customer driven transactions (brokerage service or equity swaps transactions closed with customers).

The directions of these fluctuations were chosen between four scenarios (two positive economic scenarios and two negative economic scenarios) in order to generate the worst impact within the four above mentioned:

Market Factor Fluctuations: adverse scenario

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****41. Risk Management, continued:****(3) Market Risk, continued:****(b) Price Risk, continued:**

The impact on Trading Book as of 31 December 2014 is the following:

**POTENTIAL P&L IMPACT
TRADING BOOK**

	MCh\$
CLP Interest Rate	(2,748)
Derivatives	(1,291)
Securities	(1,456)
CLF Interest Rate	(1,052)
Derivatives	(320)
Securities	(733)
USD, EUR, JPY Offshore Interest Rate	812
USD, EUR, JPY On/Off Spread	(1,067)
Total Interest Rate	(4,055)
Total FX	(700)
Total FX OPTION Vega	(97)
Potential P&L Impact: Interest Rate + FX + Vega	(4,852)
Banco de Chile Tier1 Capital	2,535,154

The scenario modeled would generate losses in the Trading Book up to Ch\$ 4,852 MM or USD 8 MM. In any case, these fluctuations would not result in material losses compared to the Tier 1 Capital.

The impact of such fluctuations in the Accrual portfolio, which is not necessarily a gain/loss but greater/lower net revenue from funds generation, is illustrated below:

Edgar Filing: BANK OF CHILE - Form 6-K

POTENTIAL MARGINAL NRFF(*) ACCRUAL BOOK

(next 12 months)

	MCh\$
Higher / (Lower NRFF)	(118,438)
Impact due to Inter-Banking yield curve (Swap yield) shock	(97,647)
Impact due to spreads shock	(20,791)

(*) Net revenue from funds

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued****41. Risk Management, continued:****(3) Market Risk, continued:****(b) Price Risk, continued:**

The adverse impact in the Accrual book would be the result of two events: a severe drop in the local inflation and the increase of our funding spread. The lower net revenues from funds in the following 12 months would reach approximately a quarter of projected revenues for the year 2015.

The following table illustrates the changes in fair value of Available-for-Sale securities as the result of stress test modeled above. These changes are recorded in Other Comprehensive Income, a component of shareholder's Equity, and not current earnings:

**AVAILABLE FOR SALE PORTFOLIO IMPACT
ADVERSE SCENARIO**

Instrument	DV01(+1 bps) (USD)	Impact due to interest rate change (USD)	Impact due to interest rate change (MCh\$)
CLP	(220,434)	(9.52)	(5,770)
CLF	(435,314)	(48.76)	(29,556)
USD	(103,699)	(9.28)	(5,622)
Total		(67.56)	(40,948)

(4) Capital Requirements and Capital Management:

The main objectives of the Capital Management process are to ensure the compliance with regulatory requirements, to keep a strong credit rating and healthy capital ratios. Within 2013, the Bank has complied with all these tasks.

As a part of the Capital Management Policy, it has been established capital sufficiency triggers in order to prevent capital ratios usage close to the limits. The triggers are established at levels much lower than the limits and the usage is monitored monthly. Within 2013, there were no triggers breaches.

The capital amount is managed according to the risk environment, the economic performance of Chile and the main economies and the business cycle. For implementing this, the board may change the dividend policy or authorize equity issuance or stocks repurchase programs.

41. Risk Management, continued:

(4) Capital Requirements and Capital Management, continued:

Regulatory Capital

According to the Chilean Bank Law, banks must comply with a minimum Basel I Tier 2 Capital ratio of 8%. Therefore, the bank must maintain a minimum Tier 2 Capital that cannot be lower than 8% of the sum of 12,5 times the ERM (market risk computed for trading portfolios, see 41 (3) (b) above) and RAAP assets. Additionally, the Bank must comply with a minimum capital to total assets ratio: the law establish that banks must maintain a minimum Tier 1 Capital that cannot be lower than the 3% of total assets. The authorities have requested Banco de Chile, due to the merge with the operation of Citibank, N.A. in Chile that maintains the first percentage as a minimum of 10%.

Tier 1 and Tier 2 Capital are computed according the international standards; assets are risk weighted, for reporting purposes, according to SBIF instructions which are adopted from BIS guidelines. For derivatives, the risk weighting process is applied over the loan equivalent of each derivative transaction. The loan equivalent is sum of the current value of the transaction, if positive, and the maximum exposure the Bank may face in the future, along the life of the transaction, considering the increase in value of it due to market factor fluctuations including some confidence level. The loan equivalent is expressed as a percentage of the notional amount of the transaction, being these percentages much larger for FX transactions than for interest rate swaps or for longer tenors than for shorter ones.

42. Subsequent Events:

(a) On January 26, 2015 the Board of Banchile Administradora General de Fondos S.A. accepted the resignation of the Director of the society Mr. Jorge Tagle Ovalle.

Also agreed to appoint new Director of the company, from January 26, 2015 until the next Annual Meeting to Mr. Eduardo Ebensperguer Orrego.

(b) On January 29, 2014, in the Ordinary Meeting No. BCH 2811, the Board of Directors of Banco de Chile resolved to call an Ordinary Shareholders Meeting to be held on March 26th, 2014, with the objective of proposing, among other matters, the distribution of the Dividend number 203 of \$3.42915880220 per each of the 94,655,367,544 Banco de Chile shares, which will be payable at the expense of the distributable net income obtained during the fiscal year ending on December 31st, 2014, corresponding to the 70% of such income.

Likewise, the Board of Directors resolved to call an Extraordinary Shareholders Meeting to be held on the same date in order to propose, among other matters, the capitalization of the 30% of the distributable net income of the Bank obtained during the fiscal year ending on December 31st, 2014, through the issuance of fully paid-in shares, of no par value, with a value \$65.31 per Banco de Chile share, which will be distributed among the shareholders in the proportion of 0.02250251855 shares for each Banco de Chile share and to adopt the necessary agreements subject to the exercise of the options established in article 31 of Law 19,396.

In Management's opinion, there are no other significant subsequent events that affect or could affect the consolidated financial statements of the Bank and its subsidiaries between December 31, 2014 and the date of issuance of these consolidated financial statements,

Héctor Hernández G,
General Accounting Manager

Arturo Tagle Q,
Chief Executive Officer
