3. New Accounting Pronouncements:

The following is a summary of new standards, interpretations and improvements to the International Financial Reporting Standards issued by the International Accounting Standards Board (IASB) that it is not effective as of June 30, 2016:

IFRS 9 Financial Instruments

The July 24, 2014, IASB completed its upgrade project about accounting for financial instruments with the publication of IFRS 9 Financial Instruments.

This standard includes new requirements based on new principles for the classification and measurement; it introduces a prospective model of expected credit losses on impairment accounting and changes in hedge accounting.

The classification determines how financial assets and liabilities are accounted in financial statements and, in particular, how they are measured. IFRS 9 introduces a new approach for the classification of financial assets, based in the business model of the entity for the management of financial assets and the characteristic of its contractual flows.

In terms of impairment standard establishes a single model that applies to all financial instruments, thus eliminating a source of complexity associated with previous accounting requirements, which require a timely recognition of expected credit losses.

IFRS 9 introduces changes to the requirements for accounting hedge, and also new alternatives of strategies to use. The amendments means a substantial overhaul of hedge accounting that aligns the accounting treatment with risk management activities, enabling entities to better reflect these activities in their financial statements. In addition, as a result of these changes, users of the financial statements will be provided with better information about risk management and the effect of hedge accounting on the financial statements.

IFRS 9 established that the fair value of credit risk of the entity shall be recognized in Other Comprehensive Income, allowing decrease any eventual volatility that would be generated in the income of the entity, because its recognition. IFRS 9 permits early application of this improvement, before any other requirement of IFRS 9.

Edgar Filing: BANK OF CHILE - Form 6-K

Mandatory adoption date is January 1, 2018. Early application is permitted.

Banco de Chile and its subsidiaries are assessing the possible impact of adoption of these changes on the consolidated financial statements. The Superintendency of Banks and Financial Institutions has not approved this rule. This event is required to its application.

IFRS 15 Revenue from Contracts with Customers

In May 2014 was issued IFRS 15, which it has like purpose established the principles that will apply an entity to present util information to users of financial statements about the nature, amount, opportunity and uncertainty of the income for ordinaries activities and cash flows that it is related to a contract with a client.

This new rule replace the following current rules and interpretations: IAS 18 Revenue, IAS 11 Construction contracts, IFRIC 13 Customer Loyalty Programmes, IFRIC 15 Agreements for the Construction of Real State, IFRIC 18 Transfers of Assets from Customers and SIC 31 Revenue: Barter Transactions involving.

The new model will apply to all contracts with customers, except those that are inside to the scope of the others IFRS, such as leases, insurance contracts and financial instruments.

On April 12, 2016, IASB issued amendments to IFRS 15, clarifying requirements and providing a temporary relief to companies that are implementing the new standard.

In short the amendments clarify how:

- a) Identify a performance obligation (the promise to transfer a good or service to a customer) in a contract;
- b) Determining whether a company is the principal (the provider of a good or service) or an agent (the organization responsible for the good or service provided); and
- c) Determine whether the product of a license must be recognized at a point in time or over time.

The date of application of this new standard starts in January 1, 2018, earlier application is permitted.

Banco de Chile and its subsidiaries are assessing the impact of the adoption of this rule.

IFRS 16 Leases

On January 2016 was issued IFRS 16, which has as purpose to stablish principles to recognize, measurement, presentation and disclosure of leases contracts, for both lessee and lessor.

This new rule is no different to the previous rule, IAS 17 Leases, related to the accounting treatment for the lessor. However, related to the lessee, the new rule requires recognize the assets and liabilities, so eliminate the differences between financial and operating lease.

The effective date of application is beginning January 1, 2019. It is permitted its early application but, only if it is applied IFRS 15 also.

IAS 28 Investments in Associates and Joint Venture and IFRS 10 - Consolidated Financial Statements

Edgar Filing: BANK OF CHILE - Form 6-K

In September 2014, the IASB issued this amendment, which clarifies the scope of recognized gains and losses in a transaction involving an associate or joint venture, and this depends on whether the asset sold or contribution is a business. Therefore, IASB concluded that all of the profit or loss should be recognized against loss of control of a business. Likewise, gains or losses resulting from the sale or contribution of a subsidiary that is not a business (definition of IFRS 3) to an associate or joint venture should be recognized only to the extent of unrelated interests in the associate or joint venture.

On December 2015, the IASB agreed that the amendments should apply in the future, and its early application is permitted.

This amendment will not impact financial statements of Banco de Chile and its subsidiaries.

6. Segment Reporting, continued:

The financial information used to measure the performance of the Bank's business segments is not necessarily comparable with similar information from other financial institutions because it is based on internal reporting policies. The accounting policies used to prepare the Bank's operating segment information are similar as those described in Summary of Significant Accounting Principles. The Bank obtains the majority of its income from: interest, revaluations and fees, discounted the credit cost and expenses. Management is mainly based on these concepts in its evaluation of segment performance and decision-making regarding goals, allocation of resources for each unit individually. Although the results of the segments reconcile with those of the Bank at total level, it is not thus necessarily concerning the different concepts, since the management is measured and controls in individual form and applying the following criteria:

- The net interest margin of loans and deposits is obtained aggregating the net financial margins of each individual operation of credit and uptake made by the bank. For these purposes is considered the volume of each operation and its contribution margin, stemming from the difference between the effective customer rate and the related Bank's fund transfer price in terms of maturity and currency.
- The internal performance profitability system considers capital allocation in each segment in accordance to the Basel guidelines.
- Operating expenses are distributed at each area level. The Bank allocates all of its indirect operating costs to each business segment by utilizing a different cost driver in order to allocate such costs to the specific segment.

The Bank did not enter into transactions with a particular customer or third parties that exceed 10% or more of its total income during the six-month period ended June 30, 2016 and 2015.

Taxes are managed at a corporate level and are not allocated to business segments.

10. Derivative Instruments and Accounting Hedges, continued:

(b) Fair value Hedges:

The Bank uses cross-currency swaps and interest rate swaps to hedge its exposure to changes in the fair value of the hedged elements attributable to interest rates in financial instruments. The aforementioned hedge instruments change the effective cost of long-term issuances from a fixed interest rate to a floating rate, decreasing the duration and modifying the sensitivity to the shortest segments of the curve.

Below is a detail of the hedged elements and hedge instruments under fair value hedges as of June 30, 2016 and December 31, 2015:

| | June 2016 MCh\$ | December 2015 MCh\$ |
|-------------------------|--------------------------------|------------------------------------|
| Hedge element | | |

| Corporate bonds | 224,710 | 174,054 |
| Hedge instrument | | |
| Cross currency swap | 18,036 | 19,222 |
| Interest rate swap | 224,710 | 174,054 |

(c) Cash flow Hedges:

(c.1) The Bank uses cross currency swaps to hedge the risk from variability of cash flows attributable to changes in the interest rates and foreign exchange of obligations with foreign banks and bonds issued abroad in USA dollars, Hong Kong dollars, Peruvian Nuevo Sol, Swiss Franc, Japanese Yens and Euros. The cash flows of the cross currency swaps equal the cash flows of the hedged items, which modify uncertain cash flows to known cash flows derived from a fixed interest rate.

Additionally, these cross currency swap contracts used to hedge the risk from variability of the Unidad de Fomento (CLF) in assets flows denominated in CLF until a nominal amount equal to the portion notional of the hedging instrument CLF, whose readjustment daily impact the item interest revenue of the income financial statements.

12. Loans to Customers net, continued:

Changes in volume of the portfolio in default are caused by the adoption of new regulations issued by the SBIF.

Until December 31, 2015, the Bank included, in the portfolio in default with evaluation group, all operations whose clients meet any of the following conditions:

- Greater than or equal to 90 days default, in any of their credits.
- Overdraft current account not agreed, for more than 30 days (For individuals without commercial activity declared).
- Customer in judicial collection.
- In order to change the category of default, 6 months of good internal behavior was required (less than 30 days default).

Due to new regulations (Circular No. 3,584 dated June 22, 2015) which amended the definition of portfolio in default evaluated in groups, from this year the Bank, under this concept, includes customers who meet the following:

The default portfolio includes all investments and 100% of the amount of contingent loans, from debtors that at the end of the month have a default of more than 90 days on interest payment or any credit capital. It will also include debtors granted with a credit to overrule an operation that had more than 60 days late on its payment, as also to those debtors who have undergone forced or partial restructuring debt forgiveness.

Once the circumstances that led to a debtor fall into the default portfolio classification, based on current standard, are amended, at least the following conditions must be met:

- No obligation of the debtor with the bank should have more than 30 calendar days overdue.
- No new refinancing has been given to pay its obligations.

- At least one of the payments includes capital amortization.
- If the debtor had some credit with partial payment within less than six months, it has already made two payments.
- If the debtor must pay monthly fees for one or more credits, four consecutive installments have been paid.
- The debtor does not appear to have unpaid direct debts in the information issued by SBIF, except for insignificant amounts.

The variation in impaired portfolio between periods June 2016 and December 2015, is due to the change in definition of the non-complying portfolio established in Circular No. 3,584. The above is because the concepts of non-complying loans and impaired loans are equivalent for loans evaluated as a group.

13. Investment Securities, continued:

Instruments issued by the Chilean Government and Central Bank include instruments with repurchase agreements sold to clients and financial institutions; totaling Ch\$3,054 million as of December 31, 2015 (no instruments sold as of June 30, 2016). The repurchase agreements have an average maturity of 6 days as of December 31, 2015.

In instruments issued abroad are included mainly bank bonds and shares and equity investments instruments.

As of June 30, 2016, the portfolio of financial assets available-for-sale includes a net unrealized gain of Ch\$2,682 million, net of tax (net unrealized gain of Ch\$39,836 million as of December 31, 2015), recorded in other comprehensive income within equity.

During 2016 and 2015, there is no evidence of impairment of financial assets available-for-sale.

Realized gains and losses are calculated as the proceeds from sales less the cost (specific identification method) of the investments identified as available-for-sale. In addition, any unrealized gain or loss previously recognized in equity for these investments is reversed and recorded in the Consolidated Statements of Comprehensive Income.

Gross profits and losses realized on the sale of available-for-sale investments as of June 30, 2016 and 2015 are shown in Note 30 Net Financial Operating Income .

Gross profits and losses realized and unrealized on the sale of available-for-sale investments for the six-month period ended as of June 30, 2016 and 2015 are as follows:

| Total | 472,196 | 484,498 |

(*) These correspond to property and equipment to be given under a finance lease.

(**) Assets received in lieu of payment are assets received as payment of customers' past-due debts. The assets acquired must at no time exceed, in the aggregate, 20% of the Bank's effective equity. These assets represent 0.0139% (0.0227% as of December 31, 2015) of the Bank's effective equity.

The assets awarded at judicial sale are assets that have been acquired as payment of debts previously owed towards the Bank. The assets awarded at judicial sales are not subject to the aforementioned requirement. These properties are non-current assets available-for-sale. For most assets, the sale is expected to be completed within one year from the date on which the asset was received or acquired. If the asset in question is not sold within the year, it must be written off.

The provision for assets received in lieu of payment is recorded as indicated in the Compendium of Accounting Standards, which indicate to recognize a provision for the difference between the initial value plus any additions and its realizable value when the former is greater.

(***) This item mainly includes simultaneous operations carried out by the subsidiary Banchile Corredores de Bolsa S.A.

(b) Lawsuits and legal proceedings:

(b.1) Legal contingencies within the ordinary course of business:

At the date of issuance of these consolidated financial statements, there are actions filed against the Bank and its subsidiaries related with the ordinary course operations. As of June 30, 2016 the Bank has established provisions for this concept in the amount of Ch\$21,680 million (Ch\$14,877 million as of December 31, 2015), recorded within Provisions in the Interim Condensed Consolidated Statement of Financial Position.

Among these actions, there is the following:

- Collective action filed by the National Consumer Service (Servicio Nacional del Consumidor) in accordance with Law No. 19,496. This action seeks to challenge some clauses of the Person Products Unified Agreement (Contrato Unificado de Productos de Personas) regarding fees on credit lines for overdraft and validity of the tacit consent to changes in fees, charges and other conditions in consumer contracts.
- Collective action filed by the National Corporation of Consumers and Users of Chile (Corporación Nacional de Consumidores y Usuarios de Chile) that challenge some clauses of the Person Products Unified Agreement (Contrato Unificado de Productos de Personas) regarding fees on credit lines for overdraft and validity of the tacit consent to changes in fees, charges and other conditions in consumer contracts, along with the outsourcing of certain services related to our clients' current account data.
- Collective action filed by the National Organization of Consumers and Users of Chile (Organización de Consumidores y Usuarios de Chile) that requests the Court to declare abusive and void certain provisions of the Person Products Unified Agreement regarding the use of self-service channels (internet, ATMs, telephone banking) and Credit Cards. Such provisions refer to the user's duty to act with diligence and care with respect to passwords as

well as the responsibility they have in case of disclosure to third parties, and the use by such third parties of them.

The following table presents estimated date of completion of the respective litigation:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

39. Fair Value of Financial Assets and Liabilities:

Banco de Chile and its subsidiaries have defined a corporate framework for the Fair Value measurement and control to accomplish the Fair Value.

One of the most important definitions in this framework is the Product Control Unit (PCU), hereinafter PCU, function. This area is independent from both the principal management and the business unit, and reports to the CFO of Banco de Chile. This area is responsible for the independent verification of Profit and Losses, and Fair Value measurement and control for all Treasury transactions; Trading, Funding and gapping and Investments deals.

To accomplish the measurements and controls, Banco de Chile and its subsidiaries, take into account at least the following aspects:

(i) Industry standards of fair value measurements

In the fair value calculation process, standard methodologies are used; closing prices, discounted cash flows and option models. In the options case, Black-Scholes model is used. The input parameters are rates, prices and volatility levels for each term and market factor that trade in the local and international markets.

(ii) Quoted prices in active markets

The fair value for instruments with quoted prices in active markets is determined using daily quotes from electronic systems information such as Bloomberg, Bolsa de Comercio de Santiago, LVA and Risk America terminals. This quote represents the price at which instruments are frequently bought and sold in financial markets.

(iii) Valuation techniques

If there is no market quotes in active markets for the financial instrument, valuation techniques will be used to determine the fair value.

Due to the fact that fair value models require a set of market parameters as inputs, it is part of the fair value process to maximize the utilization based on observable quoted prices or derived from similar instruments in active markets. Nevertheless there are some cases for which neither quoted prices nor derived prices are available; in these cases external data from specialized providers, price for similar transactions and historical information it is used for validate the parameters that will be used as inputs.

Table of Contents

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

39. Fair Value of Financial Assets and Liabilities, continued:

(iv) Fair value adjustments

Part of the fair value process consists of adjustment, to take into account bid/offer spreads. This adjustment is calculated and analyzed by the PCU and Risk Market areas.

The bid/offer spread adjustment reflects the expected impact on fair value due to close long or short positions in a specific market factor and term, valued at midpoint. For example, long positions in an asset will be impacted in order to reflect the fact that when selling the position it will be quoted at bid instead at midpoint. For the bid/offer spread adjustment, market quotes or indicative prices for each position, instrument, currency and term are used, Bid, mid and offer market quotes are considered.

(v) Fair value control

To ensure that the market input parameters that Banco de Chile is using for fair value calculations represent the state of the market and the best estimate of fair value, the PCU unit runs on a daily basis an independent verification of prices and rates. This process aims to set a preventive control on the official market parameters provided by the respective business area. A comparative control based on Mark-to-Market differences, using one set of inputs prepared by the business area and one set prepared by the PCU, is conducted before fair value calculations. The output of this process is a set of differences in fair value by currency, product and portfolio. These differences are compared with specific ranges by grouping level; currency, product and portfolio.

In the event that significant differences are detected, these differences are measured and scaled according to the amount of materiality for each grouping level, ranging from a single report to the trader to a report presented to the Board. These ranges of materiality control are approved by the Assets and Liabilities Committee (ALCO).

Complementary and in parallel, the PCU generates daily reports of P&L and risk market exposure. These two kinds of reports allows for adequate control and consistency in the parameters used in valuations and backwards looking revisions.

39. Fair Value of Financial Assets and Liabilities, continued:

(vi) Judgmental analysis and information to Senior Management

In particular, in cases where there are no market quotations for the instrument, similar transaction prices, nor indicative parameters, a reasoned analysis and specific controls should be made to estimate the fair value of the operation or transaction. Within the Banco de Chile's framework for fair value, described in the Fair Value Policy approved by the Board of Banco de Chile, the approval level required to operate this kinds of instruments, there is no market information or cannot be inferred from prices or rates, is established.

(a) Fair value hierarchy:

Banco de Chile and subsidiaries, classify all the financial instruments among the following levels:

Level 1: Observable, quoted price in an active markets for the same instrument or specific type of transaction to be evaluated (return internal rates, quote value, price).

In this level, the following instruments are considered: currency futures, Chilean Central Bank and Treasury securities, mutual fund investments and equity.

For the Chilean Central Bank and Treasury securities, all instruments that belong to one of the following benchmark groups will be considered as Level 1: Pesos-02, Pesos-05, Pesos-07, Pesos-10, UF-02, UF-05, UF-07, UF-10, UF-20, UF-30. A benchmark group is composed by a number of instruments that have similar duration and share the same quoted price within the group. This condition allows for a greater depth of market, assuring daily observable quotes.

For currency futures as well as mutual funds and equity, to determine fair value, the multiplication of closing prices by the number of instruments is used. For Chilean Central Bank and Treasury securities the internal rate of return is used to discount every cash flow and obtain the fair value of each instrument. For mutual funds and equity, the current price multiplied by the quantity of instruments is used to calculate the fair value.

The preceding described methodology corresponds to the one utilized for the Bolsa de Comercio de Santiago (Santiago's main Exchange) and is recognized as the standard in the market.

39. Fair Value of Financial Assets and Liabilities, continued:

Level 2: Valuation techniques whose inputs are those other than quoted prices included within Level 1 and that are observable for assets or liabilities, either directly or indirectly. For instruments in this level, the valuation is performed based on an inference from observable market parameters; such quoted prices for similar instruments in active markets. In this level the following inputs are included:

- a) Quoted prices for similar assets or liabilities in active markets.
- b) Quoted prices for identical or similar assets or liabilities in markets that are not active.
- c) Inputs other than quoted prices that are observable for the asset or liability.
- d) Inputs that are derived principally from or corroborated by observable market data.

This level is composed mostly of currency and rate derivatives, bank's debt securities, debt of Chilean and foreign companies, mortgage claims, money market instruments and less liquid Chilean Central Bank and Treasury securities.

For derivatives the fair value process depends upon whether this value is impacted by volatility as a relevant market factor; if that is the case, the Black-Scholes-Merton type of formula is used. For the rest of the derivatives, namely swaps and forwards, net present value through discounted cash flows is used. For securities classified as level 2, the obtained internal rate of return is used to discount every cash flow and obtain the fair value of each instrument, for each currency.

In the event that there is no observable price for an instrument in a specific term, the price will be inferred from the interpolation between periods that have observable quoted price in active markets. These models incorporate various market variables, including foreign exchange rates and interest rate curves.

Level 3: These are financial instruments whose fair value is determined using unobservable inputs. An adjustment to an input that is significant to the entire measurement can result in a fair value measurement classified within Level 3 of the fair value hierarchy if the adjustment is using significant unobservable data entry.

Instruments classified as level 3 correspond to Corporate Debt issued mainly by Chilean and foreign companies, issued both in Chile and abroad.

With the purpose to determine the sensitivity of the financial investments to changes in significant market factors, the Bank has made alternative calculations at fair value, changing those key parameters for the valuation and which are not directly observable in screens. In the case of financial assets presented table above, which corresponds to bank bonds and corporate bonds, input prices, prices based on broker quotes or runs were used, considering that these instruments do not have current prices or observable. Prices are generally calculated as a base rate plus a spread. For local bonds, this was determined by applying only a 10% impact on the price, while for offshore bonds this was determined by applying only a 10% impact on the spread because the base rate is hedged with instruments on interest rate swaps so-called hedge accounting. The impact of 10% is considered a reasonable move considering the market performance of these instruments and comparing it against the adjustment bid/offer that is provided for by these instruments.

(e) Other assets and liabilities, continued:

Other financial instruments not measured at fair value in our statement of financial position, but for which the fair value is disclosed, are not managed on a fair value basis. These instruments include assets and liabilities such as loans and deposits to customers, bank borrowings, debt issued, and other financial assets and obligations with diverse maturities and features. Fair values of these assets/liabilities are estimated by applying the traditional Discounted Cash Flows model and using diverse valuation inputs such as yield curves, credit risk spreads, etc. Also, since some of these assets/liabilities are not traded in the market, judgmental analysis is required in determining the adequacy of the inputs and fair values.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, *continued*

39. **Fair Value of Financial Assets and Liabilities, continued:**

(f) Levels of other assets and liabilities, continued:

The Bank determines the fair value of these assets and liabilities according to the following:

- **Short-Term Financial Assets/Liabilities:** For assets and liabilities with no specific maturity (on demand) or terms of less than three months we use the carrying or book values as proxies of their fair value, since their tenors are not believed to significantly affect their valuation. As a result, these assets/liabilities are categorized in Level 1. This assumption is applied to the following assets/liabilities:

- Cash and due from banks
- Transactions in the course of collection
- Cash collateral on securities borrowed and reverse repurchase agreements
- Loans and advance to banks
- Current accounts and other demand deposits
- Transactions in the course of payments
- Cash collateral on securities lent and repurchase agreements
- Other financial obligations

- **Loans to Customers:** Fair value is determined by using the DCF model and internally generated discount rates, based on internal transfer rates derived from our internal transfer price policy. After we calculate the present value, we deduct the related loan loss allowances in order to incorporate the credit risk associated with each contract or loan. As we use internally generated parameters for valuation purposes, we categorize these instruments in Level 3.

- **Letters of Credit and Bonds:** In order to determine the present value of contractual cash flows, we apply the DCF model by using market interest rates that are available in the market, either for the instruments under valuation or instruments with similar features that fit valuation needs in terms of currency, maturities and liquidity. Market interest rates are obtained from third party price providers widely used by the market. As a result of the valuation technique and the quality of inputs (observable) used for valuation, we categorize these financial liabilities in Level 2.

- Saving Accounts, Time Deposits, Borrowings from Financial Institutions and Subordinated Bonds: The DCF model is used to obtain the present value of committed cash flows by applying a bucket approach and average adjusted discount rates that are derived from both market rates for instruments with similar features and our internal transfer price policy. As we use internally generated parameters and/or apply significant judgmental analysis for valuation purposes, we categorize these financial assets/liabilities in Level 3.

(g) Offsetting of financial assets and liabilities:

The Bank trades financial derivatives with foreign counterparties using ISDA Master Agreement (International Swaps and Derivatives Association, Inc.), under legal jurisdiction of the City of New York USA or London United Kingdom. Legal framework in these jurisdictions, along with documentation mentioned, it allows to Banco de Chile the right to anticipate the maturity of the transaction and then, offset the net value of those transactions in case of default of counterparty. The Bank has negotiated with these counterparties an additional annex (CSA Credit Support Annex), including other credit mitigating, such as margins about a certain threshold, early termination (optional or mandatory), coupon adjustment transaction over a certain threshold amount, etc.

Below are detail contracts susceptible to offset:
