Information Regarding Forward-Looking Statements

This report contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 that involve risks and uncertainties, many of which are beyond our control. Our actual results could differ materially and adversely from those anticipated in such forward-looking statements as a result of certain factors, including those set forth in this report. Important factors that may cause actual results to differ from any forward-looking statements include any forward-looking statements:

significant changes in consumer demand for our products, resulting in volatility of our operating results and financial condition;

our ability to effectively respond to changing market conditions;

whether as a result of market conditions, or our financial condition or otherwise, the possibility that we will not be able to raise sufficient additional capital needed to operate our business;

unexpected costs, lower than expected sales and revenues, and operating deficits;

our ability to obtain supply at favorable rates;

unexpected changes in our industry’s competitive forces including the manner and degree in which our competitors serve our target market;

our ability to attract or retain qualified senior management personnel; and

other specific risks that may be referred to in this report including those in Part I, Item 1A, “Risk Factors.”.

All statements, other than statements of historical facts, included in this report regarding our strategy, future operations, financial position, estimated revenue or losses, projected costs, prospects and plans and objectives of management are forward-looking statements. When used in this report, the words “will,” “may,” “believe,” “anticipate,” “intend,” “estimate,” “expect,” “project,” “plan” and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain such identifying words. All forward-looking statements speak only as of the date of this report. We undertake no obligation to update any forward-looking statements or other information contained herein. Stockholders and potential investors should not place undue reliance on these forward-looking statements. Although we believe that our plans, intentions and expectations reflected in or suggested by the forward-looking statements in this report are reasonable, we cannot assure stockholders and potential investors that these plans, intentions or expectations will be achieved. We disclose important factors that could cause our actual results to differ materially from our expectations under “Risk Factors” and elsewhere in this report. These cautionary statements qualify all forward-looking statements attributable to us or persons acting on our behalf.

Information regarding market and industry statistics contained in this report is included based on information available to us that we believe is accurate. It is generally based on academic and other publications that are not produced for purposes of securities reports or economic analysis. Forecasts and other forward-looking information obtained from these sources are subject to the same qualifications and the additional uncertainties accompanying any estimates of future market size, revenue and market acceptance of products and services. We have no obligation to update

forward-looking information to reflect actual results or changes in assumptions or other factors that could affect those statements. See “Risk Factors” for a more detailed discussion of risks and uncertainties that may have an impact on our future results.

If you are interested in HealthWarehouse.com, Inc. stock, we recommend that, at a minimum, you read the SEC Forms 10-K, 10-Q and 8-K each filed by HealthWarehouse.com, Inc. (the “Company”) with the SEC and available at <http://www.sec.gov>.

Table of Contents

PART I

Item 1: Business.

Overview

HealthWarehouse.com, Inc. (“HEWA” or the “Company”) is America’s Trusted Online Pharmacy, licensed in 50 states and the District of Columbia to focus on the out-of-pocket prescription drug market, a market which is expected to grow to \$80 billion in 2015. HealthWarehouse.com is currently 1 of less than 40 Verified Internet Pharmacy Practice Websites (“VIPPS”) accredited by the National Association of Boards of Pharmacy (“NABP”) and is the only VIPPS accredited pharmacy licensed in all 50 states that processes out-of-pocket prescriptions online. The Company markets a complete range of generic, brand name, and pet prescription medications as well as over-the-counter (“OTC”) medications and products.

Consumers who pay out of pocket for their prescriptions include those:

- With no insurance coverage;
- With high insurance deductibles or copays;
- With Medicare Part D plans with high deductibles;
- With Health Savings Accounts (HSA) or Flexible Savings Accounts (FSA);
- With insurance through the Affordable Care Act (ACA) with high deductibles;
- With drug exclusions and quantity restrictions placed by insurance companies.

Our objectives are to utilize our proprietary technology to make the pharmaceutical supply chain more efficient and to pass the savings on to the consumer. We are becoming known by consumers as a convenient, reliable, discount provider of over-the-counter products and prescription medications. We intend to continue to expand our product line as our business grows. Our customers include uninsured, under-insured, and insured consumers with high insurance co-payments who rely on our service for their daily prescription medications. With many brand name drug patents continuing to expire over the next several years and a general trend of rising insurance co-payments and deductibles due to the Affordable Care Act, our service is expanding to mainstream insured consumers of prescription medications, as the market continues to move away from brand name prescription drugs to generics. Once the patent on a branded drug has expired, we can typically sell its generic equivalent for less than the purchaser’s insurance co-payment. Accordingly, we are focused on the cash paying customers and do not accept consumer insurance payment.

Historical Background

In March 2007, Hwareh.com, Inc. (“Old HW”), a Delaware corporation formerly named HealthWarehouse.com, Inc., was incorporated to carry on the business of selling OTC products. In November 2007, we began to develop the proprietary software necessary for our business, and in February 2008, version 1.0 of the <http://www.healthwarehouse.com> website was successfully launched running on our own proprietary software.

In March 2008, as part of our expansion into prescription drugs, we completed construction of a full service licensed pharmacy within our warehouse in Loveland, Ohio. This pharmacy passed inspection by the Ohio State Pharmacy Board in April 2008.

Effective August 5, 2009, we changed our corporate name to HealthWarehouse.com, Inc., simultaneously with our name change, we changed the corporate name of our subsidiary to Hwareh.com, Inc. In connection with the name change, we also obtained a new ticker symbol for quotation, and our Common Stock currently trades on the OTCQB Market Tier under the symbol, "HEWA."

On February 14, 2011, Hocks Acquisition Corporation ("Hocks Acquisition"), a wholly-owned subsidiary we formed for the purpose of the acquisition, entered into an Asset Purchase Agreement (the "Asset Purchase Agreement") with Hocks Pharmacy of Hocks Pharmacy, Inc., an Ohio corporation ("Hocks Pharmacy"), to purchase, for \$200,000 in cash all of the inventory and fixed assets (the "Purchased Assets") owned by Hocks Pharmacy and used in the operation of its internet pharmacy business (the "Internet Business"). The Internet Business consists primarily of the internet sale of over-the-counter health and medical products and supplies. That same day, we acquired all of the intangible assets of the internet business, including domain names and customer accounts, in a reverse merger of Hocks Acquisition into Hocks.com Inc. ("Hocks.com"), a newly formed Ohio corporation and then wholly-owned subsidiary of Hocks Pharmacy. As a result, Hocks.com Inc. became our wholly-owned subsidiary.

Table of Contents

On June 15, 2011 the Company commenced a lease on a new facility in Florence, KY. On August 1, 2011, the Company transferred its operations to the new facility.

Our Business Model

Our business model seeks to improve both the efficiency and convenience by which consumers obtain prescription medications. To increase efficiency, we make efforts to source products from either the manufacturer or wholesaler level, eliminating unnecessary costs associated with distribution. In addition, we distribute medications to the consumer from a single warehouse, as opposed to retail locations, which we believe eliminates unnecessary costs such as real estate, rents, inventory, and personnel. By going directly to the consumer via the Internet, we reduce our marketing expense and increase convenience for consumers, especially those taking maintenance medications for conditions ranging from diabetes to high blood pressure.

Current Healthcare Distribution Model	Our Distribution Model
Manufacturer	Manufacturer
,	,
Wholesaler	,
,	,
Distributor	HealthWarehouse.com
,	,
Pharmacy	,
,	,
Consumer	Consumer

Our target is consumers who are paying out-of-pocket for their medications. Out-of-pocket consumers have increased significantly since insurance co-pays are rising and high deductible plans are becoming more prevalent due to the Affordable Care Act.

Our VIPPS Accredited Online Pharmacy

We operate a full-service online pharmacy within our warehouse in Florence, Kentucky, 15 miles south of Cincinnati, Ohio. The pharmacy includes two robotic machines, which can each count and package 1,200 prescriptions per day. Our pharmacy passed inspection by the Kentucky Board of Pharmacy, and we are presently licensed as a mail-order pharmacy for sales to all 50 states and the District of Columbia.

Our online pharmacy offers the following advantages:

Legitimacy. We have obtained state licenses and certifications to separate ourselves from the many uncertified “rogue” pharmacies which exist. We are the 19th pharmacy in the U.S. to receive Verified Internet Pharmacy Practice Sites accreditation, issued by the National Association of Board of Pharmacy. Google, Yahoo, and Bing now all require VIPPS as a requirement to advertise on their sites.

**Convenience.** Our online store is available to consumers 24 hours a day, 7 days a week through the Internet. We deliver medications with available free shipping to any location in the United States including Alaska and Hawaii. We offer 6-month and 12-month supplies of medications to reduce the need for refills. All of our products are also available for purchase by phone. We offer additional convenience to our customers through an easy-to-use website, robust search technology, and a variety of features such as auto-refill.

**Selection.** Due to our online structure, we are able to offer a significantly broader assortment of products, with greater depth in each product category, because we do not have the shelf display space limitations of brick-and-mortar drugstores.

**Information.** We provide a broad array of interactive tools and information on our website to help consumers make informed purchasing decisions. Our information services include detailed product information pages, product user manuals and brochures, links to manufacturer websites, detailed product descriptions which contain the manufacturer's phone number, and customer reviews. Our customer care representatives are available by phone or email to provide personal guidance and answer customers' questions.

## Table of Contents

**Privacy.** When shopping at a “brick-and-mortar” drugstore, many consumers may feel embarrassed or uncomfortable about buying items or asking questions that may reveal personally sensitive aspects of their health or lifestyle to pharmacists, store personnel, or other shoppers. Our customers avoid these problems by shopping from the privacy of their home or office.

**Value.** Our goal is to offer shoppers a broad assortment of generic drugs and health products with competitive pricing. We strive to improve our operating efficiencies and to leverage our fixed costs so that we can pass along the savings to our customers in the form of lower prices and exclusive deals. Since we source drugs direct from the manufacturer at the wholesale level and eliminate third party payors such as insurance companies, we believe that we have lower costs than traditional pharmacies which allows us to provide consumers with better values. We also strive to inform customers of additional cost-saving opportunities when they become available. For example, we show the generic equivalents of all brand name products and also offer 6 and 12 month supplies of our medications to consumers to reduce refills and provide better value.

**Customer Service.** Our focus has been on customer service and we endeavor to lead the industry in our policies and procedures. We currently offer a satisfaction guarantee with what we believe is an industry-leading 90-day return policy with no restocking fees, and available free standard shipping. We are prevented by law from accepting returns for any prescription medication. We have received numerous awards for customer service and satisfaction.

Our customer support representatives operate from our call center in Florence, Kentucky. Our customer support specialists are available 9 a.m. to 9 p.m. Eastern Time, Monday through Friday, and 9a.m. to 5p.m. Eastern Time on Saturday and Sunday, via e-mail, online chat, fax or telephone to handle customer inquiries and assist customers in finding desired products. Our online Help Center outlines store policies and provides answers to customers’ frequently asked questions.

We ship our products to all 50 states, the U.S. Territories, and APO/FPO military and embassy addresses. We process all orders from our distribution center in Florence, Kentucky, 15 miles south of Cincinnati, Ohio. We based our logistics operation there to maintain proximity to UPS, located 90 miles away in Louisville, Kentucky. Processing from this location allows us to reach up to 80% of the U.S. population by standard ground shipping in two days from shipment date. In order to try to maintain high customer satisfaction ratings and quality control over the process, we avoid drop shipping orders. Due to the relatively short lead time required to fill orders for our products, usually 24 to 48 hours, order backlog has not proven material to our business.

## Marketing and Sales

Our marketing strategy aims to build brand recognition, increase customer traffic to our online store, add new customers, build strong customer loyalty, maximize repeat purchases and develop incremental revenue opportunities. In addition, we focus on providing fast, transparent filling of prescriptions and increase word of mouth marketing to consumers. We focus on search engine marketing with Google as well as targeted areas within Google like Google Shopping, which require VIPPS to advertise. As the only VIPPS accredited pharmacy licensed in all 50 states and the District of Columbia that sells to consumers online, we believe this provides the company with a unique avenue to reach customers with limited competition. In addition, the Company focuses on targeted referral sites such as GoodRX and Nextag which direct consumers to low cost options for their prescription medications and other medical supplies. We continue to utilize social media, including Facebook and Twitter as a way to reach consumers and build a dialogue with them.

## Suppliers

There are a number of suppliers available for the pharmaceutical and non-pharmaceutical products that we sell. Our principal suppliers are Amerisource Bergen, Cardinal Health, Allison Medical, Inc and Indigo Distributors as well as many direct manufactures like Anda, Nipro, Parmed, and Camber. While we source our supplies from a limited number of suppliers, we do not believe that our business is dependent on any one supplier since the products that we sell are readily available from a number of alternative suppliers. Even if a significant supplier were to no longer be available to us, we believe that we could source replacement product through one or more alternative suppliers without having a significant effect on our business.

## Customers

We sell directly to individual consumers who purchase prescription medications and OTC products. We have seen a transition from uninsured consumers to more than 90% of our customers having insurance. Rising insurance co-pays and high deductible plans due to the Affordable Care Act, have created more consumers paying out-of-pocket. This market was estimated to be \$45 billion in 2011 is expected to grow to \$80 billion by the end of 2015.

## Table of Contents

### Competition

The market for prescription and OTC health products is intensely competitive and highly fragmented. However, there are fewer competitors focusing on the out-of-pocket prescription market. Our competitors in the segment include chain drugstores, mail order pharmacies, pharmacy benefits managers (PBMs), mass market retailers, warehouse clubs and supermarkets. Many of these potential competitors in the market are also established organizations with greater access to resources and capital than we have. In addition, we face competition from foreign online pharmacies that can often sell drugs to U.S. residents at a lower price because they do not comply with U.S. pharmacy regulations, are not subject to U.S. regulatory oversight, or both. We also compete with Internet portals and online service providers that feature shopping services and with other online or mail-order retailers that offer products similar or the same to those that we sell.

We believe that the principal competitive factors in our market includes brand awareness and preference, company credibility, product selection and availability, convenience, price, actual or perceived value, website features, functionality and performance, ease of purchasing, customer service, privacy, quality and quantity of information supporting purchase decisions (such as product information and reviews), and reliability and speed of order shipment.

### Intellectual Property and Technology

We filed for a trademark on the name “HealthWarehouse.com” on August 14, 2007 with the U.S. Patent and Trademark Office, which trademark was granted with a registration date of May 19, 2009. On February 14, 2011, we acquired the registered trademark “Hocks.com” in connection with our purchase of the online reseller business of Hocks Pharmacy Inc. We also rely on trade secret law and contractual restrictions to protect our intellectual property, and we do not intend to seek patent or copyright protection for our intellectual property at this time.

We have implemented a broad array of services and systems for website management, product searching, customer interaction, transaction processing, and order fulfillment functions. These services and systems use a combination of our own proprietary technologies, open-source technologies and commercially-available, licensed technologies.

We focus our internal development efforts on creating and enhancing the specialized, proprietary software that is unique to our business. For example, our core merchandise catalog, as well as our customer interaction, order collection, fulfillment and back-end systems are proprietary to us. Our systems are designed to provide real-time connectivity to our distribution center systems for both pharmacy and OTC products. They include an inventory tracking system, a real-time order tracking system, an executive information system and an inventory replenishment system.

Our website at <http://www.healthwarehouse.com> is hosted on the Amazon EC2 platform (“EC2”) due to the platform’s perceived cost effectiveness and scalability. EC2 allows us to pay only for bandwidth used. In addition, due to Amazon’s lengthy experience at running servers capable of serving one of the largest commerce sites on the web, our site remains scalable on days where our traffic spikes.

Our website was developed using 100% open source code. We use a 100% open source platform which runs on Linux, Apache, MySQL and PHP (LAMP).

### Government Regulation

Federal and state laws and regulations govern many aspects of our business and are specific to pharmacies and the sale of OTC drugs. Our pharmacy passed inspection by the Kentucky Board of Pharmacy and we are presently licensed as a mail-order pharmacy for sales to 50 states and the District of Columbia. We ship our non-prescription products to all 50 states, the U.S. Territories, and APO/FPO military and embassy addresses.

We believe we are in substantial compliance with all existing legal and regulatory requirements material to the operation of our business. We have standard operating procedures and controls designed to assist in ensuring compliance with existing contractual requirements and state and federal law. We diligently monitor and audit our adherence to these procedures and controls, and we take prompt corrective and disciplinary action when appropriate. However, we cannot predict how courts or regulatory agencies may interpret existing laws or regulations or what additional federal or state legislation or regulatory initiatives may be enacted in the future regarding healthcare or the pharmacy industry, and the application of complex standards to the operation of our business creates areas of uncertainty.

## Table of Contents

In addition, although we presently do not accept insurance reimbursement nor do we participate in federal and state programs such as Medicare and Medicaid, this may change in the future. If in the future we do accept reimbursement from commercial or governmental payers, we would be subject to extensive government regulation including numerous state and federal laws and corresponding regulations directed at preventing fraud and abuse and regulating reimbursement.

Among the federal and state laws and regulations that currently affect or may reasonably affect in the future aspects of our business are the following:

### Regulation of Our Pharmacy Operations

The practice of pharmacy is generally regulated at the state level by state boards of pharmacy. Our pharmacy must be licensed in the state in which it is located. In some states, regulations require compliance with standards promulgated by the United States Pharmacopeia (USP). The USP creates standards in the packaging, storage and shipping of pharmaceuticals. Also, many of the states where we deliver pharmaceuticals, including controlled substances, have laws and regulations that require out-of-state mail-order pharmacies to register with that state's board of pharmacy or similar regulatory body. In addition, some states have proposed laws to regulate online pharmacies, and we may be subject to this legislation if it is passed. Furthermore, if our pharmacy dispenses durable medical equipment items, such as infusion pumps, that bear a federal legend requiring dispensing pursuant to a prescription, we would also be regulated by applicable state and federal durable medical equipment laws.

Federal agencies further regulate our pharmacy operations. Pharmacies must register with the Drug Enforcement Administration (DEA) and individual state controlled substance authorities in order to dispense controlled substances. We sell controlled substances and therefore require a DEA license and maintain a DEA license. In addition, the FDA inspects facilities in connection with procedures to effect recalls of prescription drugs. The Federal Trade Commission (FTC) also has requirements for mail-order sellers of goods. The U.S. Postal Service (USPS) has statutory authority to restrict the transmission of drugs and medicines through the mail to a degree that could have an adverse effect on our mail-order operations. The USPS historically has exercised this statutory authority only with respect to controlled substances. If the USPS restricts our ability to deliver drugs through the mail, alternative means of delivery are available to us. However, alternative means of delivery could be significantly more expensive. The Department of Transportation has regulatory authority to impose restrictions on drugs inserted in the stream of commerce. These regulations generally do not apply to the USPS and its operations.

Additionally, under the Omnibus Budget Reconciliation Act of 1990 and related state and local regulations, our pharmacists are required to offer counseling to our customers about medication, dosage, delivery systems, common side effects, adverse effects or interactions and therapeutic contraindications, proper storage, prescription refill and other information deemed significant by the pharmacists. We are also subject to requirements under the Controlled Substances Act and federal DEA regulations, as well as related state and local laws and regulations, relating to our pharmacy operations, including registration, security, recordkeeping and reporting requirements related to the purchase, storage and dispensing of controlled substances, prescription drugs and some OTC drugs.

“Compendial standards,” which can also be called “official compendium,” means the standards for drugs related to strength, purity, weight, quality, labeling and packing contained in the USP, official National Formulary, or any supplement to any of them. Under the Food, Drug and Cosmetic Act of 1938, a drug recognized by the Homeopathic Pharmacopeia of the United States must meet all compendial standards and labeling requirements contained therein, or it will be considered adulterated (for example, lacking appropriate strength, quality or purity; or containing

poisonous or unsanitary ingredients) or misbranded (for example, having a false or misleading label; or a label containing an inaccurate description of contents). If we add homeopathic remedies to our product offerings, we will be required to comply with the Food, Drug and Cosmetic Act. The distribution of adulterated or misbranded homeopathic remedies or other drugs is prohibited under the Food, Drug and Cosmetic Act, and violations could result in substantial fines and other monetary penalties, seizure of the misbranded or adulterated items, and/or criminal sanctions.

We also are required to comply with the Dietary Supplement Health and Education Act (DSHEA) when selling dietary supplements and vitamins. The DSHEA generally governs the production, sale and marketing (including labeling) of dietary supplements, and it requires reporting to the FDA of certain adverse events regarding dietary supplements.

We believe that our operations have the appropriate licenses required under the laws of the states in which they are located and that we conduct our pharmacy operations in accordance with the laws and regulations of these states.

#### Drug Importation

In the face of escalating costs for plan sponsors providing a prescription drug benefit for their employees, and uninsured individuals seeking to lower their drug costs, the issue of importing drugs from Canada or other foreign countries has received significant attention. Drug importation, sometimes called drug re-importation, occurs when prescription medicines from other countries are imported for personal use or commercial distribution. Individual importation activities are generally prohibited under U.S. law, and the FDA has issued warnings and safety alerts to a number of entities seeking to promote or facilitate systematic importation activities. However, there has been considerable legislative and political activity seeking to change the FDA requirements to enable drug importation, and we are evaluating appropriate actions if such legislation were to be enacted.

## Table of Contents

### Health Management Services Regulation

All states regulate the practice of medicine and require licensing under applicable state law. It is not our intent to practice medicine and we have tried to structure our website and our business to avoid violation of state licensing requirements. However, the application of this area of the law to Internet services such as ours is not well established and, accordingly, a state regulatory authority could at some time allege that some portion of our business violates these statutes. Any such allegation could harm our business. Further, any liability based on a determination that we engaged in the unlawful practice of medicine may be excluded from coverage under the terms of our general liability insurance policy.

### Consumer Protection Laws

Most states have consumer protection laws designed to ensure that information provided to consumers is adequate, fair and not misleading. We believe that our practices conform to the requirements of state consumer protection laws. However, we may be subject to further scrutiny under these laws as they are often interpreted broadly.

### Regulation Relating to Data Transmission and Confidentiality of Patient Identifiable Information

Dispensing of prescriptions and management of prescription drug benefits require the ability to utilize patient-specific information. Government regulation of the use of patient identifiable information has grown substantially over the past several years. At the federal level, Congress enacted the Health Insurance Portability and Accountability Act of 1996 (HIPAA), which extensively regulates the transmission, use and disclosure of health information by all participants in healthcare delivery, including physicians, hospitals, insurers and other payers. To the extent that our pharmacy operations engage in certain electronic transactions (including claims for reimbursement by third-party payers), we may be a covered entity which is directly subject to these requirements. Additionally, regulation of the use of patient-identifiable information is likely to increase. Congress is currently reviewing proposals that would alter HIPAA, which would create additional administrative burdens. Many states have passed or are considering laws addressing the use and disclosure of health information. These proposals vary widely, some relating to only certain types of information, others to only certain uses, and yet others to only certain types of entities. These laws and regulations have a significant impact on our operations, products and services, and compliance with them is a major operational requirement. Regulations and legislation that severely restrict or prohibit our use of patient identifiable information could materially adversely affect our business.

Sanctions for failing to comply with HIPAA standards include criminal and civil penalties. If we are found to have violated any state or federal statute or regulation with regard to the confidentiality, dissemination or use of patient medical information, we could be liable for significant damages, fines or penalties.

### Fraudulent Billing, Anti-Kickback, Stark, Civil Monetary Penalties and False Claims Laws and Regulations

Our operations may in the future participate in federal and state programs such as Medicare and Medicaid. If we do, we would be subject to extensive government regulation including numerous state and federal laws and corresponding regulations directed at preventing fraud and abuse and regulating reimbursement. The government's Medicare and Medicaid regulations are complex and sometimes subjective and therefore may require our management's interpretation. If we were to participate in federal and state programs such as Medicare and Medicaid, our compliance with Medicare and Medicaid regulations may be reviewed by federal or state agencies, including the Department of Health and Human Services' (HHS) Office of the Inspector General (OIG), the Centers for Medicare and Medicaid

Services (CMS), the Department of Justice (DOJ), and the FDA. To ensure compliance with Medicare, Medicaid and other regulations, government agencies conduct periodic audits to ensure compliance with various supplier standards and billing requirements. Similarly, regional health insurance carriers routinely conduct audits and request patient records and other documents to support claims submitted for payment.

Federal law prohibits the payment, offer, receipt or solicitation of any remuneration that is knowingly and willfully intended to induce the referral of Medicare, Medicaid or other federal healthcare program beneficiaries for the purchase, lease, ordering or recommendation of the purchase, lease or ordering of items or services reimbursable under federal healthcare programs. These laws are commonly referred to as anti-remuneration or anti-kickback laws. Several states also have similar laws, known as "all payer" statutes, which impose anti-kickback prohibitions on services covered by any third-party payer (whether or not a federal healthcare program). Anti-kickback laws vary between states, and courts have rarely interpreted them. If in the future we accept third-party reimbursement, we may be subject to these laws.

Courts, the OIG and some administrative tribunals have broadly interpreted the federal anti-kickback statute and regulations. Courts have ruled that a violation of the statute may occur even if only one of the purposes of a payment arrangement is to induce patient referrals or purchases. Should we enter the government payer sector, it is possible that our current practices in the commercial sector may not be appropriate in the government payer sector.

The Ethics in Patient Referrals Law (Stark Law) prohibits physicians from making a referral for certain Medicare-covered health items or services if they, or their family members, have a financial relationship with the entity receiving the referral. No bill may be submitted in connection with a prohibited referral. Violations are punishable by civil monetary penalties upon both the person making the referral and the provider rendering the service. Such persons or entities are also subject to exclusion from Medicare and Medicaid. Many states have adopted laws similar to the Stark Law, which restrict the ability of physicians to refer patients to entities with which they have a financial relationship.

## Table of Contents

The Federal False Claims Act prohibits the submission of a false claim or the making of a false record or statement in order to secure a reimbursement from a government-sponsored program. In recent years, the federal government has launched several initiatives aimed at uncovering practices that violate false claims or fraudulent billing laws. Civil monetary penalties may be assessed for many types of conduct, including conduct that is outlined in the statutes above and other federal statutes in this section. Under the Deficit Reduction Act of 2005 (DRA), states are encouraged to pass state false claims act laws similar to the federal statute.

Sanctions for fraudulent billing, kickback violations, Stark Law violations or violations of the False Claims Act include criminal and civil penalties. If we do accept third-party reimbursement and/or participate in federal payer programs in the future and are found to have violated any state or federal kickback, Stark Law or False Claims Act law, we could be liable for significant damages, fines or penalties and potentially be ineligible to participate in federal payer programs.

### Legislation and Regulation Affecting Drug Prices and Potentially Affecting the Market for Prescription Benefit Plans and Reimbursement for Durable Medical Equipment

Recently, the federal government has increased its focus on methods drug manufacturers employ to develop pricing information, which in turn is used in setting payments under the Medicare and Medicaid programs. One element common to many payment formulas, the use of “average wholesale price” (AWP) as a standard pricing unit throughout the industry, has been criticized as not accurately reflecting prices actually charged and paid at the wholesale or retail level. The DOJ is currently conducting, and the House Commerce Committee has conducted, an investigation into the use of AWP for federal program reimbursement, and whether the use of AWP has inflated drug expenditures by the Medicare and Medicaid programs. Federal and state proposals have sought to change the basis for calculating reimbursement of certain drugs by the Medicare and Medicaid programs.

The DRA revised the formula used by the federal government to set the Federal Upper Limit (FUL) for multiple source drugs by adopting 250 percent of the average manufacturer’s price (AMP) without regard to customary prompt pay discounts to wholesalers for the least costly therapeutic equivalent. On July 17, 2006, HHS published a Final Rule for the Medicaid Prescription Drug Program implementing the DRA in which AMP was defined to exclude discounts and rebates to pharmacy benefit managers and include sales to mail-order and specialty pharmacies in the AMP calculation by manufacturers.

These proposals and other legislative or regulatory adjustments that may be made to the program for reimbursement of drugs by Medicare and Medicaid, if implemented, could affect our ability to negotiate discounts with pharmaceutical manufacturers. They could also impact the reimbursement we may receive from government payers in the future should we choose to participate in such programs. In addition, they may affect our relationships with health plans. In some circumstances, they might also impact the reimbursement that we would receive from managed care organizations that contract with government health programs to provide prescription drug benefits or otherwise elect to rely on the revised pricing information. Furthermore, private payers may choose to follow the government’s example and adopt different drug pricing bases. This could affect our ability to negotiate with plans, manufacturers and pharmacies regarding discounts and rebates.

Relative to our durable medical equipment operations, The Medicare Prescription Drug, Improvement and Modernization Act of 2003 (DIMA), established a program for the competitive acquisition of certain covered items of durable medical equipment, prosthetics, orthotics and supplies (DMEPOS). Diabetes testing supplies, including test strips and lancets, which are commonly supplied via mail-order delivery, are subject to the competitive acquisition

program. Only qualified suppliers that meet defined participation standards specified in the final rule will be permitted to engage in the competitive acquisition program. In 2010, mail-order diabetes testing supplies may be subject to a national or regional program, which would require mail-order suppliers to bid on supplying certain DMEPOS items.

#### Medicare Part D and Part B; State Prescription Drug Assistance Programs

The DIMA also offers far-reaching changes to the Medicare program. The DIMA established a new Medicare Part D outpatient prescription drug benefit for over 40 million Americans who are eligible for Medicare. Qualified beneficiaries, including senior citizens and disabled individuals, have had the opportunity to enroll in Medicare Part D since January 1, 2006.

In addition, many states have expanded state prescription drug assistance programs to increase access to drugs by those currently without coverage and/or supplement the Medicare Part D benefit of those with coverage to offer options for a seamless benefit. In accordance with applicable CMS requirements, to participate we may have to enter into agreements with a number of state prescription drug assistance programs and collaborate to coordinate benefits with Medicare Part D plans.

If we participate in these state and/or federal payer programs in the future, we will have to comply with the applicable conditions of participation for such plans, may be subject to competitive bidding requirements under such plans, and may be subject to adverse pricing limitations imposed by such plans (including the DRA limits described above).

Table of Contents

Industry Standards for Pharmacy Operations

The National Committee on Quality Assurance, the American Accreditation Health Care Commission (known as URAC), the Joint Commission on Accreditation of Healthcare Organizations and other quasi-regulatory and accrediting bodies have developed standards relating to services performed by pharmacies, including mail order, formulary, drug utilization management and specialty pharmacy. While the actions of these bodies do not have the force of law, pharmacy benefit managers and many clients for pharmacy benefit manager services seek certification from them, as do other third parties. These bodies may influence the federal government or states to adopt requirements or model acts that they promulgate. The federal government and some states incorporate accreditation standards of these bodies, as well as the standards of the National Association of Insurance Commissioners and the National Association of Boards of Pharmacy, a coalition of state pharmacy boards, into their drug utilization review regulation. Future initiatives of these bodies are uncertain and resulting standards or legislation could impose restrictions on us in a manner that could significantly impact our business.

The National Association of Boards of Pharmacy has also developed a program, the Verified Internet Pharmacy Practice Sites, as a model for self-regulation for online pharmacies. The Company has been certified by VIPPS since 2008.

Employees

As of March 15, 2015, we employed 23 full-time employees and 16 part-time employees. The Company at March 15, 2015, had 1 non-contractual laborer. None of our employees are subject to a collective bargaining agreement and we believe that relations with our employees are good. The Company, from time to time, also utilizes independent contractors to supplement its workforce.

Item 1A: Risk Factors

Risks Related to the Deficiencies in Our Internal Controls and Our Failure to File Timely Periodic Reports with the SEC.

We have identified material weaknesses in our internal control over financial reporting, and have concluded that our internal controls were not effective as of December 31, 2014 and 2013. We may be unable to remedy these deficiencies or develop, implement and maintain effective controls in future periods.

Based on the review conducted by our non-management directors and management's annual assessment of our internal controls, we concluded that, as of December 31, 2014, our internal controls over financial reporting were not effective. Management believes that the controls, policies and procedures implemented during the period have improved our internal controls over financial reporting, but based on our assessment, management has concluded that as of December 31, 2014, our disclosure controls were not effective. The specific material weaknesses identified by the directors and management are described more fully in Part II—Item 9A, "Controls and Procedures".

Even if we are able to fully implement a remediation plan in the future, we cannot assure you that we will be able to remedy these material weaknesses, that additional material weaknesses or other deficiencies in our internal controls will not arise in the future or that our internal controls will be adequate in all cases to prevent us from reporting inaccurate financial information. A failure in our internal controls could result in material misstatements in our reported financial information or misappropriation of our assets. Such failures or misstatements could result in

investors losing confidence in our reported financial information, which may adversely affect the market price of our Common Stock or restrict our ability to raise capital. In addition, we may be subject to investigations by or sanctions from the SEC or other governmental authorities and lawsuits from investors, all of which could adversely affect our results of operations.

#### Risks Relating to Our Business and Industry

We have a limited operating history, a history of generating significant losses, we have a substantial working capital deficiency and a stockholders' deficiency; and may not be able to sustain profitability. The report of our independent registered public accounting firm contains an explanatory paragraph that expresses substantial doubt about our ability to continue as a going concern.

Old HW, which now constitutes our principal business, was formed in March 2007 and has a limited operating history upon which you can evaluate our business and prospects. To date, we have not been profitable, and we may never achieve profitability on a full-year or consistent basis. We incurred net losses of \$1,783,279 and \$5,489,892 for the years ended December 31, 2014 and 2013, respectively. On February 13, 2013, we received a Notice of Redemption of our Series C Redeemable Preferred Stock aggregating \$1,000,000 which is classified as a current liability as the Company does not have the funds for repayment. The report of our independent registered public accounting firm with respect to our financial statements as of December 31, 2014 and for the year then ended contains an explanatory paragraph that expresses substantial doubt about the Company's ability to continue as a going concern. The report also states that, we have incurred significant operating losses and we need to raise additional funds in order to meet our obligations and sustain operations. Our plans in regard to these matters are described in footnote 2 to our consolidated financial statements as of December 31, 2014 and for the years ended December 31, 2014 and 2013 included herein this document. Our financial statements do not include any adjustments that might result from the outcome of this uncertainty. If our plans or assumptions change or prove to be inaccurate, we may continue to incur net losses in 2015, and possibly longer. As a result, investors may lose all or a part of their investment.

Table of Contents

We may experience significant fluctuations in our operating results and rate of growth.

Our evolving business model and the unpredictability of our industry make it difficult for us to forecast accurately the level or source of our revenues and our rate of growth. Our financial projections are based on assumptions and estimates that inherently are subject to significant business, economic, competitive, regulatory and operational uncertainties, contingencies and risks, many of which are beyond our control. Our projections assume the success of our business strategy. The success of this strategy is subject to uncertainties and contingencies beyond our control, and we cannot assure you that the strategy will be successful or that the anticipated benefits from the strategy will be realized in the manner or during the periods reflected in our projections or at all. These uncertainties may result in material changes in our financial condition and results of operations, which may differ materially from our projections.

Our revenues and operating results may vary significantly from quarter to quarter.

Our revenues and operating results may vary significantly from quarter to quarter due to a number of factors, including:

- our ability to retain and increase sales to existing customers, attract new customers, and satisfy our customers' demands;

- the frequency and size of customer orders and the quantity and mix of OTC and prescription products our customers purchase;

- changes in demand with respect to existing and new OTC and prescription products;

- changes in consumer acceptance and usage of the Internet, online services, and e-commerce;

- the price we charge for our OTC and prescription products and for shipping those products, or changes in our pricing policies or the pricing policies of our competitors;

- the extent to which we offer free shipping or other promotional discounts to our customers;

- our ability to acquire merchandise, manage inventory, and fulfill orders;

- technical difficulties, system downtime, or interruptions;

- timing and costs of upgrades and developments in our systems and infrastructure;

- timing and costs of marketing and other investments;

- disruptions in service by shipping carriers;

- the introduction by our competitors of new websites, products, or services;

- the extent of reimbursements available from third-party payers; and

changes in government regulation.

In addition, our operating expenses are largely based on anticipated revenue trends and a high percentage of our expenses are fixed in the short term. As a result, a delay in generating or recognizing revenue for any reason could result in substantial additional operating losses.

---

Table of Contents

We face significant competition from both traditional and online domestic pharmaceutical and medical product retailers.

The market segments in which we compete are rapidly evolving and intensely competitive, and we have many competitors in different industries, including both the retail and e-commerce services industries. These competitors include chain drugstores, mass market retailers, warehouse clubs, supermarkets, specialty retailers, major department stores, insurers and health care providers, mail-order pharmacies, Internet portals and online service providers that feature shopping services, and various online stores that offer products within one or more of our product categories. Many of our current and potential competitors have longer operating histories, larger customer bases, greater brand recognition, and significantly greater financial, marketing, and other resources than we have. They may be able to secure merchandise from vendors on more favorable terms, operate with a lower cost structure, adopt more aggressive pricing policies, or devote more resources to technology development and marketing than we do. In addition, other companies in the retail and e-commerce service industries may enter into business combinations or alliances that would strengthen their competitive positions and prevent them, their affiliated companies, or their strategic partners from entering into relationships with us. For example, our inability to enter into or maintain relationships with major insurance companies or managed care organizations could be a major competitive disadvantage to us.

We face competition from online pharmacies outside the United States.

Although it is currently illegal to re-import prescription drugs into the United States from any foreign country, we nonetheless face competition from online pharmacies outside the United States. A growing number of U.S. consumers seek to fill their prescriptions through Canadian and other foreign online pharmacies, and a number of state and local governments have set up websites directing their constituents to Canadian pharmacies. The FDA has taken only limited action to date, and may not take aggressive action in the future, against those who illegally re-import prescription drugs or support or facilitate illegal re-importation. In the U.S. Congress, legislation allowing for re-importation of prescription drugs by individuals for personal use has repeatedly been introduced. If such legislation were to be enacted, or if consumers increasingly use foreign-based online prescription drug websites instead of U.S.-based online pharmacies, such as ours, to fill their prescription needs, our business and operating results could be harmed.

We may be unable to increase the migration of consumers of health and pharmacy products from brick-and-mortar stores to our online solution, which would harm our revenues and prevent us from becoming profitable.

If we do not attract and retain higher volumes of customers to our Internet store at a reasonable cost, we will not be able to increase our revenues or achieve consistent profitability. Our success depends on our ability to continue to convert a large number of customers from traditional shopping methods to online shopping for health and pharmacy products. Specific factors that could prevent widespread customer acceptance of our online solution include:

shipping charges, which do not apply to purchases made at a “brick-and-mortar” store;

delivery time associated with Internet orders, as compared to the immediate receipt of products at a brick-and-mortar store;

lack of consumer awareness of our website;

additional steps and delays in verifying prescriptions and ensuring insurance coverage for prescription products;

non-participation in the networks of some insurance carriers;

regulatory restrictions or reform at the state and federal levels that could affect our ability to serve our customers;

the general acceptance or legalization of prescription drug re-importation;

customer concerns about the security of online transactions, identity theft, or the privacy of their personal information;

product damage from shipping or shipments of wrong or expired products from us or other vendors, resulting in a failure to establish, or loss of, customers' trust in buying drugstore items online;

Table of Contents

inability to serve the acute care needs of customers, including emergency prescription drugs and other urgently needed products;

delays in responses to customer inquiries;

difficulties or delays in returning or exchanging orders; and

activity that diminishes a user's online experience or subjects online shoppers to security risks, such as viruses, spam, spyware, phishing (spoofing e-mails directed at Internet users), "denial of service" attacks directed at Internet service providers and online businesses, and breaches of data security.

Changing competitive forces within the healthcare industry may adversely affect our ability to obtain and sustain a competitive advantage.

In recent years, pharmaceutical suppliers have been subject to increasing consolidation. As a result, a small number of very large companies control a significant share of the market. Accordingly, we depend on fewer suppliers for our products and therefore we may be less able to negotiate price terms with suppliers. Many healthcare organizations also have consolidated to create larger healthcare enterprises with greater market power. If this consolidation trend continues, it could reduce the size of our target market and give the resulting enterprises greater bargaining power, which may lead to erosion of the prices for our products and services. Additionally, erosion of our competitive advantage may result from increased competition in our target market through supply and distribution methods similar to our own by those companies with which we currently compete but who have a more established operating history. Furthermore, changes in the healthcare industry's or our pharmaceutical suppliers' pricing, selling, inventory, distribution or supply policies or practices could significantly reduce our revenues and net income.

If our marketing efforts are not effective at attracting and retaining customers at an acceptable cost, we will be unable to achieve profitability.

If we do not maintain our brand and continue to increase awareness of our Internet shopping presence, we may not build a critical mass of customers. Promoting and positioning our brand depends largely on the success of our marketing efforts and our ability to provide consistent, high quality customer experiences. We believe that, because we are a small company with low public brand awareness, achieving significant market awareness will require significant marketing expense. While our advertising efforts were scaled back during 2013 due to liquidity issues, we have historically incurred and expect to continue to incur in future years substantial expense in our marketing efforts both to attract and to retain customers. Our promotional activities may not be effective at building our brand awareness and customer base to the extent necessary to generate sufficient revenue to become consistently profitable. Search engine and other online marketing initiatives comprise a substantial part of our marketing efforts, and our success depends in part on our ability to manage costs associated with these initiatives, or to find other channels to acquire and retain customers cost-effectively. The demand for and cost of online advertising has been increasing and may continue to increase. An inability to acquire and retain customers at a reasonable cost would increase our operating costs and prevent us from achieving profitability.

Our profitability can be adversely affected by a decrease in the introduction of new brand name and generic prescription drugs.

Our sales and profit margins are materially affected by the introduction of new brand name and generic drugs. New brand name drugs can result in increased drug utilization and associated sales revenues, while the introduction of lower priced generic alternatives typically result in higher gross profit margins, due to the fact, the Company is able to purchase the generic drugs on a much more competitive cost basis. Accordingly, a decrease in the number of significant new brand name drugs or generics successfully introduced could adversely affect our results of operations.

Since our business is Internet-based, we are vulnerable to system interruption and damage, which would harm our operations and reputation.

Our ability to receive and fulfill orders promptly and accurately is critical to our success and largely depends on the efficient and uninterrupted operation of our computer and communications hardware and software systems. We experience periodic system interruptions that impair the performance of our transaction systems or make our website inaccessible to our customers. These systems interruptions delay us from efficiently accepting and fulfilling orders, sending out promotional e-mails and other customer communications in a timely manner, introducing new products and features on our website, promptly responding to customers, or providing services to third parties. Frequent or persistent interruptions in our services could cause current or potential customers to believe that our systems are unreliable, which could cause them to avoid our website, drive them to our competitors, and harm our reputation. To minimize future system interruptions, we need to continue to add software and hardware and to improve our systems and network infrastructure to accommodate increases in website traffic and sales volume, to replace aging hardware and software, and to make up for two years of underinvestment in technology. We may be unable to promptly and effectively upgrade and expand our systems and integrate additional functionality into our existing systems. Any unscheduled interruption in our services could result in fewer orders, additional operating expenses, or reduced customer satisfaction, any of which would harm our revenues and operating results and could delay or prevent our becoming consistently profitable. In addition, the timing and cost of upgrades to our systems and infrastructure may substantially affect our ability to achieve or maintain profitability.

Table of Contents

All of our fulfillment operations and inventory are located in our distribution facility, and any significant disruption of this center's operations would hurt our ability to make timely delivery of our products.

We conduct all of our fulfillment operations from our distribution facility in Florence, Kentucky, which houses our entire product inventory. A natural disaster or other catastrophic event, such as an earthquake, fire, flood, severe storm, break-in, server or systems failure, terrorist attack, or other comparable event at this facility, would cause interruptions or delays in our business and loss of inventory and could render us unable to process or fulfill customer orders in a timely manner, or at all. Further, we have no formal disaster recovery plan, and our business interruption insurance may not adequately compensate us for losses that may occur. In the event that a significant part of this facility was destroyed or our operations were interrupted for any extended period of time, our business, financial condition, and operating results would be harmed.

Our operating results will be harmed if we are unable to manage and sustain our growth.

Our business is unproven on a large scale and actual operating margins may be less than expected. If we are unable to scale capacity efficiently, we may fail to achieve expected operating margins, which would have an adverse effect on our operating results.

If we are unable to obtain shipments of products from our vendors, our business and results of operations would be harmed.

We have significant vendors that are important to our sourcing of pharmaceutical and non-pharmaceutical products. We do not have long-term arrangements with most of our vendors to guarantee availability of merchandise, particular payment terms, or extension of credit limits. If our current vendors were to stop selling merchandise to us on acceptable terms, we may not be able to acquire merchandise from other vendors in a timely and efficient manner and on acceptable terms, or at all.

We have significant inventory risk.

We must maintain sufficient inventory levels to operate our business successfully and to meet our customers' expectations that we will have the products they order in stock. However, we must also guard against the risk of accumulating excess inventory. We are exposed to significant inventory risk as a result of rapid changes in product cycles, changes in consumer tastes, uncertainty of success of product launches, seasonality, manufacturer backorders, and other vendor-related problems. In order to be successful, we must accurately predict these trends and events, which we may be unable to do, and avoid over- or under-stocking products. In addition, demand for products can change significantly between the time product inventory is ordered and the time it is available for sale. When we begin selling a new product, it is particularly difficult to forecast product demand accurately. A failure to optimize inventory would increase our expenses if we have too much inventory, and would harm our margins by requiring us to make split shipments for backordered items or pay for expedited delivery from the manufacturer if we had insufficient inventory. In addition, we may be unable to obtain certain products for sale on our website as a result of general shortages (for example, in the case of some prescription drugs), manufacturer policies (for example, in the case of some contact lenses and prestige beauty items), manufacturer or distributor problems, or popular demand. Failure to have inventory in stock when a customer orders it could cause us to lose that order or that customer. The acquisition of some types of inventory, or inventory from some of our sources, may require significant lead time or prepayment, and this inventory may not be returnable. We carry a broad selection of products and significant inventory levels of a substantial number of products, and we may be unable to sell this inventory in sufficient quantities or during the

relevant selling seasons. The occurrence of one or more of these inventory risks may adversely affect our business and operating results.

If we make an error in filling or packaging the prescription drugs that we sell, we would be subject to liability and negative publicity.

Errors relating to prescriptions, dosage, and other aspects of the prescription medication could result in liability for us that our insurance may not cover. Because we distribute pharmaceutical products directly to the consumer, we are one of the most visible participants in the distribution chain and therefore have increased exposure to liability claims. Our pharmacists are required by law to offer counseling, without additional charge, to our customers about medication, dosage, delivery systems, common side effects, and other information deemed significant by the pharmacists. Our pharmacists may have a duty to warn customers regarding any potential adverse effects of a prescription drug if the warning could reduce or negate those effects. This counseling is in part accomplished through e-mails to our customers and inserts included with the prescription, which may increase the risk of miscommunication because the customer is not personally present to receive the counseling or advice or may not have provided us with all relevant information. Although we also post product information on our website, customers may not read this information. Providing information on pharmaceutical and other products creates the potential for claims to be made against us for negligence, personal injury, wrongful death, product liability, malpractice, invasion of privacy, or other legal theories based on our product or service offerings. Our general liability and business owners' liability insurance may not cover potential claims of this type or may not be adequate to protect us from all liabilities that may be imposed if any such claims were to be successful. In addition, errors by either us or our competitors may also produce significant adverse publicity either for us or for the online pharmacy industry in general, which could result in an immediate reduction in the amount of orders we receive and would harm our ability to conduct and sustain our business.

Security breaches would damage our reputation, expose us to liability and otherwise harm our business.

Our security measures may not prevent security breaches that could harm our business. To succeed, we must provide a secure transmission of confidential information over the Internet and protect the confidential customer and patient information we retain, such as credit card numbers and prescription records. A third party who compromises or breaches the physical and electronic security measures we use to protect transaction data and customer records could misappropriate proprietary information, cause interruptions in our operations, damage our computers or those of our customers, or otherwise harm our business. Any of these would harm our reputation and expose us to a risk of loss or litigation and possible liability. We may need to expend significant resources to protect against security breaches or to address problems caused by breaches.

## Table of Contents

The implementation of the Medicare Part D prescription drug benefit has and will likely continue to adversely affect drug pricing, which decreases our profitability.

In 2006, the Medicare Part D prescription drug benefit under the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (“DIMA”) became effective. The Medicare Part D prescription drug benefit has negatively affected, and is likely to continue to have a negative impact on, our business. Medicare Part D prescription drug coverage will likely increase the number of senior citizens with prescription drug coverage and reduce the number of customers who pay for their prescription drugs themselves. Customers who choose to obtain coverage under a Medicare Part D plan will likely purchase fewer drugs, or no longer purchase drugs, from us. Because we are not currently processing claims for Medicare Part D, we will be able to serve Medicare D customers only when those customers elect to purchase outside of their Medicare Part D plan and purchase their prescriptions out-of-pocket, such as when the particular medication is not covered by the customer’s Medicare plans or when the customer’s purchase is not covered because of a deductible, co-payment, or other exclusion. Moreover, the DIMA calls for significant changes to the formulas the Medicare program uses to calculate its payments for prescription drugs, as well as introduction of managed care elements and changes to the administration of the drug benefit program. When fully implemented, these changes could exert downward pressure on prescription drug prices and payments by the government, even as the number of people who use the Medicare benefits to pay for prescription drugs increases. All of these factors could adversely affect our drug prices and dispensing fees, and ultimately could reduce our profit margins.

Government regulation of our business is extensive, and our failure to comply fully with regulations could result in civil and criminal penalties for us.

Our business is subject to extensive federal, state and local regulations. For example:

entities engaging in the practice of pharmacy are subject to numerous federal and state regulatory requirements, including those relating to pharmacy licensing and registration, the dispensing of prescription drugs, pharmacy record keeping and reporting, and the confidentiality, security, storage, and release of patient records; and

the sale, advertisement, and promotion of, among other things, prescription, OTC and homeopathic medications, dietary supplements, medical devices, cosmetics, foods, and other consumer products that we sell are subject to regulation by the FDA, the FTC, the Consumer Product Safety Commission, and state regulatory authorities, as the case may be.

As we expand our product offerings and more non-pharmaceutical products become subject to FDA, FTC and other regulation, more of our products will likely be subject to regulation. In addition, regulatory requirements to which our business is subject may expand over time, and some of these requirements may have a disproportionately negative effect on Internet pharmacies. For example, the federal government and a majority of states now regulate the retail sale of OTC products containing pseudoephedrine that might be used as precursors in the manufacture of illegal drugs. As a result, we are currently unable to sell these products to customers residing in states that require retailers to obtain a physical form of identification or maintain a signature log. Some members of Congress have proposed additional regulation of Internet pharmacies in an effort to combat the illegal sale of prescription drugs over the Internet, and state legislatures could add or amend legislation related to the regulation of nonresident pharmacies. In addition to regulating the claims made for specific types of products, the FDA and the FTC may attempt to regulate the format and content of websites that offer products to consumers. The laws and regulations applicable to our business often require subjective interpretation, and we cannot be certain that our efforts to comply with these regulations will be

deemed sufficient by the appropriate regulatory agencies. Violations of any regulations could result in various civil and criminal penalties, including suspension or revocation of our licenses or registrations, seizure of our inventory, or monetary fines, any of which could harm our business, financial condition, or operating results. Compliance with new laws or regulations could increase our expenses or lead to delays as we adjust our website and operations.

Increasing concern about privacy, spam, and the use and security of customer information could restrict our marketing efforts and harm our business.

Internet retailers are also subject to increasing regulation and scrutiny relating to privacy, spam, and the use and security of personal user information. These regulations, along with increased governmental or private enforcement (for example, by Internet service providers), may increase the cost of growing our business. Current and proposed regulations and enforcement efforts may restrict our ability to collect and use demographic and personal information from users and send promotional e-mails, which could be costly or harm our marketing efforts. For example, if one or more Internet service providers were to block our promotional e-mails to customers, our ability to generate orders and revenue could be harmed. Further, any violation of privacy, anti-spam, or data protection laws or regulations may subject us to fines, penalties, and damages and may otherwise have a material adverse effect on our business, results of operations, and financial condition.

If people or property are harmed by the products we sell, product liability claims could damage our business and reputation.

Some of the products we sell may expose us to product liability claims relating to personal injury, death, or property damage caused by these products and may require us to take actions such as product recalls. Any such product liability claim or product recall may result in adverse publicity regarding us and the products we sell, which may harm our reputation. If we are found liable under product liability claims, we could be required to pay substantial monetary damages. Further, even if we successfully defend ourselves against this type of claim, we could be forced to spend a substantial amount of money in litigation expenses, our management could be required to spend valuable time in the defense against these claims, and our reputation could suffer, any of which could harm our business. Our current vendors do not, and future vendors may not, indemnify us against product liability. Further, our liability insurance may not be adequate to protect us from all liability that may be imposed as a result of these claims, and we cannot be certain that insurance will continue to be available to us on economically reasonable terms, or at all. Any imposition of product liability that is not covered by vendor indemnification or our insurance could harm our business, financial condition, and operating results. We do not have vendor indemnification clauses with our current vendors.

## Table of Contents

If we are required to collect sales and use taxes on the products we sell in additional jurisdictions, we may be subject to liability for past sales and our future sales may decrease.

In accordance with current industry practice, historically we have not collected sales and use taxes or other taxes with respect to shipments of goods into states other than Kentucky and Nevada. The operation of our distribution center, the operations of any future distribution centers and other aspects of our evolving business, however, may result in additional sales and use tax collection obligations. In addition, one or more other states may successfully assert that we should collect sales and use or other taxes on the sale of our products in that state. One or more states or the federal government may seek, either through unilateral action or through federal legislation, to impose sales or other tax collection obligations on out-of-jurisdiction companies that engage in electronic commerce as we do. Moreover, one or more states could begin to impose sales taxes on sales of prescription products, which are not generally taxed at this time, or impose sales taxes on sales of certain prescription products. The imposition of additional tax obligations on our business by state and local governments could create significant administrative burdens for us, decrease our future sales, and harm our cash flow and operating results.

We are dependent on key personnel and their loss would adversely affect our ability to conduct our business.

In order to execute our business plan, we must be able to keep our existing management and professionals and, when necessary, hire additional personnel who have the expertise we need. We cannot assure you that we will be able to this, and our failure to do so could have a material adverse effect on our business, results of operations and financial condition. We are particularly dependent on the services of Lalit Dhadphale, our Chief Executive Officer and President. We do not carry key-man life insurance for our benefit on Mr. Dhadphale or on any other employee of our company.

We are a public company and, as such, are subject to the reporting requirements of federal securities laws, which are expensive and may divert resources from other projects, thus impairing our ability to grow.

We are a public reporting company and, accordingly, are subject to the information and reporting requirements of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and other U.S. federal securities laws, including compliance with the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"). Compliance with these obligations requires significant time and resources from our management and increases our legal, insurance and financial compliance costs. It is also time consuming and costly for us to develop and implement the internal controls and reporting procedures required by Section 404 of the Sarbanes-Oxley Act. If we are unable to comply with the requirements of the Sarbanes-Oxley Act, it may preclude us from keeping our filings with the SEC current. Non-current reporting companies may be subject to various restrictions, such as the inability to be quoted on the OTCQB Market Tier.

### Risks Related to Our Common Stock

Our Common Stock may be considered a "penny stock" and may be difficult to sell.

The SEC has adopted regulations which generally define "penny stock" to be an equity security that has a market or exercise price of less than \$5.00 per share, subject to specific exemptions. The market price of our Common Stock has been below \$5.00 per share and therefore we are designated as a "penny stock" according to SEC rules. This designation requires any broker or dealer selling these securities to disclose certain information concerning the transaction, obtain a written agreement from the purchaser and determine that the purchaser is reasonably suitable to purchase the

securities. These rules restrict the ability of brokers or dealers to sell our Common Stock and may affect the ability of our stockholders to sell their shares. In addition, since our Common Stock is now quoted on the OTCQB Market tier, our stockholders may find it difficult to find few buyers to purchase the stock or a lack of market makers to support the stock price.

Our stock price may continue to be volatile and may decrease in response to various factors, which could adversely affect our business and cause our stockholders to suffer significant losses.

Our Common Stock is illiquid, and its price has been and may continue to be volatile in the indefinite future. During 2014, the high and low sale prices of our Common Stock were \$0.76 and \$0.05, respectively. On December 31, 2014, the closing price of our Common Stock was \$0.09. The price of our stock could fluctuate widely in response to various factors, many of which are beyond our control, including the following:

changes in our industry;

government regulations;

competitive pricing pressures;

Table of Contents

our ability to obtain working capital;

additions or departures of key personnel;

limited “public float” in the hands of a small number of persons, whose sales or lack of sales could result in positive or negative pricing pressure on the market price for our Common Stock;

sales of our Common Stock;

our ability to execute our business plan;

operating results that fall below expectations;

loss of any strategic relationship;

economic and other external factors; and

period-to-period fluctuations in our financial results.

In addition, the securities markets have from time to time experienced significant price and volume fluctuations that are unrelated to the operating performance of particular companies. These market fluctuations may also materially and adversely affect the market price of our Common Stock.

Our stock trading volume may not provide adequate liquidity for investors, and the price of our Common Stock may fluctuate significantly. This may make it difficult for you to resell our Common Stock when you want or at prices you find attractive.

Shares of our Common Stock are traded on the over-the-counter markets, including the OTCQB market tier of the OTC Markets Group Inc. The average daily trading volume in our Common Stock is generally less than that of larger companies whose stocks are listed on an exchange and can often be sporadic and very limited. Given the limited and sporadic trading of our Common Stock, holders of our Common Stock may be unable to make significant sales of the Common Stock in a brief period of time. In addition, our Common Stock may be subject to significant price swings even when a relatively small number of shares are traded. We cannot predict the volume or prices at which our Common Stock will trade in the future.

Our officers, directors and 5% or greater stockholders have significant voting power.

Our executive officers, directors, and our 5% or greater stockholders beneficially own approximately 51.8% of our outstanding voting securities as of December 31, 2014. If these stockholders act together, they will be able to exert significant control over our management and affairs requiring stockholder approval, including approval of significant corporate transactions.

We could issue “blank check” preferred stock without stockholder approval with the effect of diluting then current stockholder interests and impairing their voting rights and provisions in our charter documents could discourage a takeover that stockholders may consider favorable.

Our Certificate of Incorporation authorizes the issuance of up to 1,000,000 shares of “blank check” preferred stock with designations, rights and preferences as may be determined from time to time by our board of directors. To date, we have designated 200,000 of these shares as Series A Convertible Preferred Stock, 625,000 of these shares as Series B Convertible Preferred Stock, and 10,000 of these shares as Series C Preferred Stock, leaving 165,000 shares of “blank check” preferred stock available for designation and issuance. Our board of directors is empowered, without stockholder approval, to issue a series of preferred stock with dividend, liquidation, conversion, voting or other rights which could dilute the interest of, or impair the voting power of, our Common Stockholders. The issuance of a series of preferred stock could be used as a method of discouraging, delaying or preventing a change in control. For example, it would be possible for our board of directors to issue preferred stock with voting or other rights or preferences that could impede the success of any attempt to change control of our company.

Table of Contents

We may engage in additional financing that could lead to dilution of existing stockholders.

To date, we have financed our activities through the proceeds from sales of our equity securities in private placement financings and the proceeds from the issuance of our promissory notes in private financings. Any future financings by us may result in substantial dilution of the holdings of existing stockholders and could have a negative impact on the market price of our Common Stock. Furthermore, we cannot assure you that such future financings will be possible.

We do not anticipate paying dividends in the foreseeable future; you should not buy our stock if you expect dividends.

We currently intend to retain our future earnings to support operations and to finance expansion and, therefore, we do not anticipate paying any cash dividends on our Common Stock in the foreseeable future.

Item 1B. Unresolved Staff Comments.

Not applicable.

Item 2. Properties.

Our corporate headquarters, which also houses our pharmacy and customer service operations as well as our inventory, is located at 7107 Industrial Road, Florence, Kentucky, 41042. We occupy 62,600 square feet of office, storage and warehouse space under a lease with a monthly rental rate range from \$9,224 to \$11,975; however, the Company recognizes rent on a straight line basis in the amount of \$9,821. The lease expires January 1, 2017.

The Company leased an apartment at a monthly lease rate of \$2,850. The lease expired on March 31, 2013.

On June 7, 2013 we signed a three year lease for \$1,000 per month at a 1,200 square foot location in Lawrenceburg, Indiana which will serve as an office, backup facility and closed door pharmacy. On July 8, 2013, the parties agreed to extend the lease for two additional years, such that the new termination date is now June 7, 2018. On January 14, 2014, the Company vacated the Lawrenceburg facility. The Company is currently in discussions with the landlord regarding termination of the lease related to the building. The present value of the remaining lease payments of \$46,604 was expensed during the year ended December 31, 2014, and is reflected as a component of accrued expenses and other liabilities on the consolidated balance sheet as of December 31, 2014.

Item 3. Legal Proceedings.

In the ordinary course of business, we may become subject to lawsuits and other claims and proceedings that might arise from litigation matters or regulatory audits. Such matters are subject to uncertainty and outcomes are often not predictable with assurance. Our management does not presently expect that any such matters will have a material adverse effect on the Company's consolidated financial condition or consolidated results of operations. We are not currently involved in any pending or threatened material litigation or other material legal proceedings nor have we been made aware of any penalties from regulatory audits, except as described below. See Note 10 of the Consolidated Financial Statements.

On February 9, 2012, two of our former stockholders, Rock Castle Holdings, LLC and Jason Smith (collectively "Plaintiffs"), filed suit against us in the Hamilton County, Ohio Court of Common Pleas, alleging that we had breached the terms of certain incentive options we granted to the Plaintiffs in connection with our now-terminated oral

consulting arrangements with the Plaintiffs, by among other things, refusing Plaintiffs' purported exercise of options to purchase 233,332 shares of our Common Stock at an exercise price of \$2.00 per share in December 2011. Plaintiffs requested that, among other things, the court require us to permit the exercise of the 233,332 options. Plaintiffs provided an expert report indicating damages of \$2.086 million. On December 1, 2014, the Company executed a settlement agreement with the Plaintiff for \$150,000 to be paid in unequal monthly installments through June 10, 2015.

Item 4. Mine Safety Disclosures.

Not applicable.

## PART II

## Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

## Market Information

Our shares of Common Stock are currently quoted on the OTCQB Market Tier under the symbol HEWA.

The following table sets forth the high ask and low bid prices for our Common Stock for the periods indicated as reported by the OTC Pink Limited Market Tier until about November 14, 2014 and by the OTCQB Market Tier thereafter.

	Year ended December 31, 2014		Year ended December 31, 2013	
	High	Low	High	Low
First	\$0.76	\$0.20	\$4.00	\$1.01
Second	\$0.26	\$0.10	\$1.88	\$0.69
Third	\$0.28	\$0.07	\$1.66	\$0.51
Fourth	\$0.22	\$0.05	\$0.95	\$0.13

On December 31, 2014, the closing price of our Common Stock, as reported by the OTCQB Market Tier, was \$0.09 per share.

These bid and ask prices represent prices quoted by broker-dealers on the OTC Market. The quotations reflect inter-dealer prices, without retail mark-up, mark-down or commissions, and may not represent actual transactions.

As of December 31, 2014, there were 37,570,383 shares of our Common Stock outstanding.

## Holders

As of March 15, 2015, there were approximately 211 holders of record of our Common Stock. However, we believe that there are significantly more beneficial holders of our Common Stock as many beneficial holders hold their stock in “street name.”

## Dividends

We have never declared cash dividends on our Common Stock, nor do we anticipate paying any dividends on our Common Stock in the future.

## Recent Sales of Unregistered Securities

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation.

The following discussion of results of operations and financial condition is based upon, and should be read in conjunction with, our consolidated financial statements and accompanying notes thereto, included elsewhere in this Annual Report. This discussion contains forward-looking statements. Actual results could differ materially from the results discussed in the forward looking statements. Reference is made to "Information Regarding Forward-Looking Statements" and Item 1A "Risk Factors" for a discussion of some of the uncertainties, risks and assumptions associated with these statements.

Overview

HealthWarehouse.com, Inc. ("HEWA" or the "Company") is America's Trusted Online Pharmacy, licensed in 50 states to focus on the out-of-pocket prescription drug market, a market which is expected to grow to \$80 billion in 2015. HealthWarehouse.com is currently 1 of less than 40 Verified Internet Pharmacy Practice Websites ("VIPPS") accredited by the National Association of Boards of Pharmacy ("NABP") and is the only VIPPS accredited pharmacy licensed in all 50 states and the District of Columbia that processes out-of-pocket prescriptions online. The Company markets a complete range of generic, brand name, and pet prescription medications as well as over-the-counter ("OTC") medications and products.

Consumers who pay out of pocket for their prescriptions include those:

- With no insurance coverage;
- With high insurance deductibles or copays;
- With Medicare Part D plans with high deductibles;
- With Health Savings Accounts (HSA) or Flexible Savings Accounts (FSA);
- With insurance through the Affordable Care Act (ACA) with high deductibles;
- With drug exclusions and quantity restrictions placed by insurance companies.

Our objectives are to utilize our proprietary technology to make the pharmaceutical supply chain more efficient and to pass the savings on to the consumer. We are becoming known by consumers as a convenient, reliable, discount provider of over-the-counter products and prescription medications. We intend to continue to expand our product line as our business grows.

Table of Contents

## Results of Operations

For The Year Ended December 31, 2014 Compared to The Year Ended December 31, 2013

	For year ended Ended December 31, 2014	% of Revenue		For year ended Ended December 31, 2013	% of Revenue	
Net sales	\$ 6,129,660	100.0 %	\$	10,233,112	100.0 %	
Cost of sales	2,492,382	40.7 %		5,111,737	50.0 %	
Gross profit	3,637,278	59.3 %		5,121,375	50.0 %	
Selling, general & administrative	5,370,727	87.6 %		7,554,954	73.7 %	
Loss from operations	(1,733,449)	(28.3 %)		(2,433,579)	(23.8 %)	
Other income	281,911	4.6 %		(2,792,900)	(27.3 %)	
Interest expense	(331,741)	(5.4 %)		(263,413)	(2.6 %)	
Net loss	\$ (1,783,279)	(29.1 %)	\$	(5,489,892)	(53.6 %)	

## Net Sales

	For year ended December 31, 2014	% Change	\$ Change	For year ended December 31, 2013
	\$ 6,129,660	(40.1 %)	\$ (4,103,452)	\$ 10,233,112

Net sales for the year ended December 31, 2014 declined to \$6,129,660 from \$10,233,112, a decrease of \$4,103,452, or 40.1% due to reduction in business-to-business sales and cash flow constraints. Cash flow constraints resulted in the inability to invest in advertising to grow the consumer prescription and over-the-counter business during the first nine months of the year and to have adequate inventory levels to support the sales volumes, particularly the over-the-counter business. This prompted negative customer reviews and cancelled orders that contributed to the decline in sales. With the liquidity provided by proceeds from the equity raise in August and October 2014, we were able to source and inventory products to fill incoming orders and improved order fill rate to less than three days from the receipt of the order. We also were able to initiate a new advertising campaign to drive new and repeat customers to our website. In addition, we continue to dedicate customer support personnel to proactively call customers after Rx orders are received to obtain the required copies of the prescriptions, in order to process the order and improve the Company's order conversion rate. Through these efforts, we experienced a 25% increase in new customers during the fourth quarter of the year compared to the prior quarter while maintaining the number of repeat customers.

## Cost of Sales and Gross Margin

	For year ended December 31, 2014	% Change	\$ Change	For year ended December 31, 2013
--	----------------------------------------	-------------	--------------	----------------------------------------

Cost of sales	\$	2,492,382	(51.2	%)	(2,619,355)	\$	5,111,737
Gross margin \$	\$	3,637,278	(29.0	%)	(1,484,097)	\$	5,121,375
Gross margin %		59.3	%	9.3	%		50.0

Cost of sales were \$2,492,382 for the year ended December 31, 2014 as compared to \$5,111,737 for the year ended December 31, 2013, a decrease of \$2,619,355 or 51.2%, primarily as a result of a reduction in order volume and improvement in our cost associated with improved vendor relations. Gross margin percentage increased year-over-year from 50.0% for the year ended December 31, 2013 to 59.3% for the year ended December 31, 2014, primarily due to the improved cost discussed above, the elimination of unprofitable business relations and reduction of business-to-business sales. Management will continue to focus its advertising and operational efforts on promoting and offering its higher margin product lines to consumers.

Table of Contents

## Selling, General and Administrative Expenses

	For year ended December 31, 2014	% Change	\$ Change	For year ended December 31, 2013
S,G&A	\$ 5,370,727	(28.9 %)	\$ (2,184,227)	\$ 7,554,954
% of sales	87.6 %			73.8 %

Selling, general and administrative expenses totaled \$5,370,727 for the year ended December 31, 2014 compared to \$7,554,954 for the year ended December 31, 2013, a decrease of \$2,184,227, or 28.9%. The year ended December 31, 2014 expense decreases included (a) a decrease in legal expense of \$789,757 (primarily due to lower proxy and litigation costs); (b) a reduction in salary and contract labor expense of \$642,104 (primarily due to a reduction in headcount, salaries and reliance on outside operations consultants); (c) a decrease in expense related to warrants issued of \$487,200; (d) a decrease in freight expense of \$263,446 (primarily due to the reduction in the order volume); and (e) a decrease in employee benefit expense of \$176,820 (primarily due to lower census and higher employee contributions). The decreases were partially offset by (a) an increase in stock based compensation expense of \$282,878; (b) and increase in expense of \$174,452 (primarily due to the settlement of outstanding litigation) and (c) and increase in advertising and marketing expense of \$88,571 (primarily related to advertising campaign initiated during the fourth quarter of 2014). We expect that our selling, general and administrative expenses, specifically legal and professional fees, will decrease over time as our outstanding litigation is resolved. While we continue to focus on controlling costs and improving efficiencies of our personnel, we plan to expand our advertising and marketing initiatives that started in 2014 to support future sales growth.

## Gain or Loss on Extinguishment

During the year ended December 31, 2014, we recorded a \$281,911 extinguishment gain which represents adjustments made to accounts payable balances for various reasons including the repayment at discounted amounts and settlement through insurance coverage. During the year ended December 31, 2013, we recorded a \$2,792,900 extinguishment loss which represents the incremental fair value of the equity securities issued as compared to the carrying value of the liabilities that were exchanged.

## Other Income and Expense

Interest expense increased from \$263,413 in the year ended December 31, 2013 to \$331,741 in the year ended December 31, 2014, an increase of \$68,328, or 26%, primarily due to an increase in amortization of debt discounts and higher notes payable balances during the year ended December 31, 2014.

## Adjusted EBITDAS

We believe Adjusted Earnings Before Interest, Taxes, Depreciation, Amortization and Stock-Based Compensation (“Adjusted EBITDAS”), a financial measure not included in accounting principles generally accepted in the United States of America (“U.S. GAAP”), is useful in evaluating our operating performance compared to that of other companies in our industry, as this metric generally eliminates the effects of certain items that may vary for different companies for reasons unrelated to overall operating performance. We believe that:

- Adjusted EBITDAS provides investors and other users of our financial information consistency and comparability with our past financial performance, facilitates period-to-period comparisons of operations and facilitates comparisons with other companies, many of which use similar non-U.S. GAAP financial measures to supplement their U.S. GAAP results; and
- Adjusted EBITDAS is useful because it excludes non-cash charges, such as depreciation and amortization, stock-based compensation and one-time charges, which the amount of such expense in any specific period may not directly correlate to the underlying performance of our business operations and these expenses can vary significantly between periods.

Table of Contents

We use Adjusted EBITDAS in conjunction with traditional U.S. GAAP measures as part of our overall assessment of our performance, to evaluate the effectiveness of our business strategies and to communicate with our lenders, stockholders and board of directors concerning our financial performance.

Adjusted EBITDAS should not be considered as a substitute for other measures of financial performance reported in accordance with U.S. GAAP. There are limitations to using non-U.S. GAAP financial measures, including that other companies may calculate these measures differently than we do. We compensate for the inherent limitations associated with using Adjusted EBITDAS through disclosure of these limitations, presentation of our financial statements in accordance with U.S. GAAP and reconciliation of Adjusted EBITDAS to the most directly comparable U.S. GAAP measure, specifically net loss.

The following provides a reconciliation of net loss to Adjusted EBITDAS:

	For year ended December 31,	
	2014	2013
	(unaudited)	
Net loss	\$ (1,783,279 )	\$ (5,489,892)
Non-GAAP adjustments:		
Gain on extinguishment of payables	(281,911 )	-
Loss on extinguishment of debt	-	2,792,900
Interest expense	331,741	263,413
Depreciation and amortization	172,167	158,029
Warrants issued to 2012 investors	-	487,200
Imputed value of contributed services	116,666	350,000
Stock-based compensation	841,164	558,286
Change in fair value of collateral securing employee advances	6,858	9,857
Adjusted EBITDAS	\$ (596,594 )	\$ (870,207 )

**Off-Balance Sheet Arrangements**

We have not entered into any transactions with unconsolidated entities in which we have financial guarantees, subordinated retained interests, derivative instruments or other contingent arrangements that expose us to material continuing risks, contingent liabilities or any other obligations under a variable interest in an unconsolidated entity that provides us with financing, liquidity, market risk or credit risk support.

**Impact of Inflation**

We believe that inflation has not had a material impact on our results of operations for the year ended December 31, 2014 and 2013. We cannot assure you that future inflation will not have an adverse impact on our operating results and financial condition.

**Liquidity and Capital Resources**

Since inception, we have financed operations primarily through debt and equity financings and advances from stockholders. As of December 31, 2014 we had a working capital deficiency of \$4,237,165 and an accumulated deficit of \$30,212,865. During the years ended December 31, 2014 and 2013, we incurred net losses of \$1,783,279 and \$5,489,892 and used cash in operating activities of \$875,769 and \$1,024,781, respectively. These conditions raise substantial doubt about our ability to continue as a going concern.

Subsequent to December 31, 2014, the Company continues to incur net losses and use cash in operating activities. The funds from the Company's recent private placement offering completed during 2014 have improved the Company's current cash position and working capital constraints; however, the funds are not sufficient to satisfy its current obligations.

Table of Contents

On February 13, 2013, we received a Notice of Redemption related to our Series C Redeemable Preferred Stock aggregating \$1,000,000. As a result of receiving the Notice of Redemption, we must now apply all of our assets to redemption of the Series C Preferred Stock and to no other corporate purpose, except to the extent prohibited by Delaware law governing distributions to stockholders (we are not permitted to utilize toward the redemption those assets required to pay our debts as they come due and those assets required to continue as a going concern).

We recognize that we will need to raise additional capital in order to fund operations, meet our payment obligations, including the redemption of the Series C Redeemable Preferred Stock, and execute our business plan. There is no assurance that additional financing will be available when needed or that management will be able to obtain financing on terms acceptable to us and whether we will become profitable and generate positive operating cash flow. If we are unable to raise sufficient additional funds, we will have to develop and implement a plan to further extend payables, extend note repayments, extend the preferred stock redemption and reduce overhead until sufficient additional capital is raised to support further operations. There can be no assurance that such a plan will be successful. If we are unable to obtain financing on a timely basis, we could be forced to sell our assets, discontinue our operations and/or seek reorganization under the U.S. bankruptcy code.

Accordingly, the accompanying consolidated financial statements have been prepared in conformity with U.S. GAAP, which contemplate our continuation as a going concern and the realization of assets and the satisfaction of liabilities in the normal course of business. The carrying amounts of assets and liabilities presented in the consolidated financial statements do not necessarily represent realizable or settlement values. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

As of December 31, 2014 and 2013, the Company had cash on hand of \$506,019 and \$67,744, respectively. Our cash flow from operating, investing and financing activities during these periods were as follows:

For the year ended December 31, 2014, cash flows included net cash used in operating activities of \$875,769. This amount included a decrease in operating cash related to a net loss of \$1,783,279, partially offset by aggregate non-cash adjustments of \$1,102,575, plus aggregate cash used by changes in operating assets and liabilities of \$195,065 (primarily a result of a reduction in accounts payable). For the year ended December 31, 2013, cash flows included net cash used in operating activities of \$1,024,781. This amount included a decrease in operating cash related to a net loss of \$5,489,892, partially offset by aggregate non-cash adjustments of \$4,578,472, plus aggregate cash used by changes in operating assets and liabilities of \$113,363 (primarily a result of accrued expenses).

For the year ended December 31, 2014, net cash used in investing activities was \$312,668 due to a \$195,088 reserve required by the credit card processor (restricted cash) and capitalized web development costs of \$114,616 and capital expenditures of \$2,964. For the year ended December 31, 2013, net cash provided by investing activities was \$751,579 due to releasing \$850,002 of cash provided by investors from escrow (restricted cash) partially offset by \$98,423 of capitalized web development costs.

For the year ended December 31, 2014, net cash provided by financing activities was \$1,626,712. Cash was provided by \$1,537,755 of proceeds from a private placement offering and \$150,000 of proceeds from the issuance of notes payable, partially offset by repayments of notes payable of \$5,000 and payments on equipment leases of \$56,043. For the year ended December 31, 2013, net cash provided by financing activities was \$340,946. Cash was provided by \$2,651,973 of proceeds from a private placement offering (which excludes \$850,002 of cash received during 2012 but closed on during the year ended December 31, 2013) and \$756,000 of proceeds from the issuance of notes payable, partially offset by repayments of notes payable of \$2,017,905, repayments of convertible notes payable of \$1,000,000

and payments on equipment leases of \$49,122.

#### Critical Accounting Policies and Estimates

##### Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Our significant estimates include reserves related to accounts receivable and inventory, the recoverability and useful lives of long-lived assets, the valuation allowance related to deferred tax assets, the valuation of equity instruments and debt discounts, and the valuation of acquired assets.

- 25 -

---

## Table of Contents

### Inventory

Inventories consist of finished goods and are valued at the lower of cost or market with cost determined using the first-in, first-out method and with market defined as the lower of replacement cost or realizable value. As part of the valuation process, inventory reserves are established to state excess and slow-moving inventory at their estimated net realizable value.

### Revenue Recognition

Revenues for the sales of products are recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed and determinable and collectability is reasonably assured. The Company defers revenue when cash has been received from the customer but delivery has not yet occurred. Such amounts are reflected as deferred revenues in the accompanying consolidated financial statements.

### Net Loss Per Share of Common Stock

Basic net loss per share is computed by dividing net loss attributable to Common Stockholders by the weighted average number of common shares outstanding during the period. Diluted net loss per share reflects the potential dilution that could occur if securities or other instruments to issue Common Stock were exercised or converted into Common Stock. Potentially dilutive securities are excluded from the computation of diluted net loss per share if their inclusion would be anti-dilutive.

### Stock-Based Compensation

Stock-based compensation expense for all stock-based payment awards is based on the estimated fair value of the award. For employees and directors, the award is measured on the grant date. For non-employees, the award is measured on the grant date and is then remeasured at each vesting date and financial reporting date. We recognize the estimated fair value of the award as compensation cost over the requisite service period of the award, which is generally the option vesting term. The Company generally issues new shares of Common Stock to satisfy option and warrant exercises.

### Recently Issued Accounting Pronouncements

In August 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2014-15, “Presentation of Financial Statements – Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity’s Ability to Continue as a Going Concern” (“ASU 2014-15”). ASU 2014-15 requires management to evaluate whether there is substantial doubt about an entity’s ability to continue as a going concern for each annual and interim reporting period. If substantial doubt exists, additional disclosure is required. This new standard will be effective for the Company for annual and interim periods beginning after December 15, 2016. Early adoption is permitted. Adoption of this pronouncement is not expected to have a material impact on its consolidated financial statements.

The FASB has issued ASU No. 2014-12, Compensation - Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period. This ASU requires that a performance target that affects vesting, and that could be achieved after the requisite service period, be treated as a performance condition. As such, the performance target should not be

reflected in estimating the grant date fair value of the award. This update further clarifies that compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered.. The amendments in this ASU are effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. Earlier adoption is permitted. The Company has not yet determined the effect of the adoption of this standard and its impact on the Company's consolidated financial position and results of operations.

The FASB has issued ASU No. 2014-09, Revenue from Contracts with Customers. This ASU supercedes the revenue recognition requirements in Accounting Standards Codification 605 - Revenue Recognition and most industry-specific guidance throughout the Codification. The standard requires that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. This ASU is effective on January 1, 2017 and should be applied retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying the ASU recognized at the date of initial application. The Company has not yet determined the effect of the adoption of this standard and its impact on the Company's consolidated financial position and results of operations.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls And Procedures.

Evaluation of Disclosure Controls and Procedures

Our management, (Chief Executive Officer and Principal Financial Officer), evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15 under the Securities Exchange Act of 1934 (the “Exchange Act”)) as of the end of the period covered by this Annual Report on Form 10-K. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Our disclosure controls and procedures are designed to provide reasonable, not absolute, assurance that the objectives of our disclosure control system are met. Because of inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues, if any, within a company have been detected. Our Chief Executive Officer and Principal Financial Officer have concluded, based on their evaluation as of the end of the period covered by this report, that our disclosure controls and procedures were not effective.

Management’s Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined In Exchange Act Rule 13a-15(f). The term “internal control over financial reporting” is defined as a process designed by, or under the supervision of, the registrant’s principal executive and principal financial officers, or persons performing similar functions, and effected by the registrant’s board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the registrant;

provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the registrant are being made only in accordance with authorizations of management and directors of the registrant; and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the registrant's assets that could have a material effect on the financial statements.

Our internal control system is designed to provide reasonable assurance to our management and board of directors regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. In addition, because of changes in conditions, the effectiveness of internal control may vary over time.

Table of Contents

As of December 31, 2014, management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the criteria in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992) (COSO) and identified material weaknesses. Consequently, they concluded our internal controls were not effective. A “material weakness” is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of our annual or interim financial statement will not be presented or detected by our employees.

The Company has previously reported certain material weaknesses listed below:

Develop appropriate accounting policies and procedures, including the review and supervision, for all necessary areas and effectively communicate our existing policies to our employees.

Retain adequately trained technical accounting and external reporting personnel to support standalone external financial reporting under OTCQB or SEC requirements.

Effective controls over disbursements to ensure that disbursements are properly authorized and recorded.

Maintain a fully integrated financial consolidation and reporting system throughout the year to reduce or eliminate extensive manual analysis, reconciliation and adjustments and produce timely financial statements for external reporting purpose.

Segregate employees’ duties in connection with the review and approval of certain transactions, reconciliations and other processes in day-to-day operations.

Policies and procedures to ensure that senior management and the Board of Directors would receive timely information about related party transactions.

During the year ended December 31, 2014, management has implemented policies, procedures and controls to address the above weaknesses. Management believes that the controls implemented during the period are sufficient to address the above weaknesses, however, they have concluded that such controls have not been in place for a sufficient period of time in order to conclude that the identified material weaknesses described above have been fully remediated.

As of December 31, 2014, the material weakness that remains is the lack of accounting personnel with sufficient experience with United States generally accepted accounting principles to address the accounting for complex transactions due to the lack of a full-time Chief Financial Officer. Therefore, based on this evaluation, management has concluded that as of December 31, 2014, our disclosure controls were not effective. We believe that to fully remediate this weakness, the Company will need to retain a full time Chief Financial Officer. The directors plan to pursue the employment of a permanent Chief Financial Officer as the Company’s operations and liquidity position improve during fiscal year 2015.

Additional measures may be necessary, and the measures we expect to take to improve our internal controls may not be sufficient to address the issues identified, to ensure that our internal controls are effective or to ensure that such material weakness or other material weaknesses would not result in a material misstatement of our annual or interim financial statements. In addition, other material weaknesses or significant deficiencies may be identified in the future. If we are unable to correct deficiencies in internal controls in a timely manner, our ability to record, process,

summarize and report financial information accurately and within the time periods specified in the rules and forms of the SEC will be adversely affected. This failure could negatively affect the market price and trading liquidity of our Common Stock, cause investors to lose confidence in our reported financial information, subject us to civil and criminal investigations and penalties, and generally materially and adversely impact our business and financial condition.

The Company is a non-accelerated filer and is not subject to Section 404(b) of the Sarbanes Oxley Act. Accordingly, this Annual Report does not contain an attestation report of our independent registered public accounting firm regarding internal control over financial reporting, since the rules for smaller reporting companies provide for this exemption.

#### Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during the quarter ended December 31, 2014, that have materially affected or are reasonably likely to materially affect our internal control over financial reporting, except as disclosed above.

#### Item 9B. Other Information.

None.

Table of Contents

## PART III

## Item 10. Directors, Executive Officers and Corporate Governance.

## Executive Officers and Directors

The names, ages and positions of our executive officers and directors as of March 1, 2015 are as follows:

Name	Age	Position
Lalit Dhadphale	43	President, Chief Executive Officer and Director
Youssef Bennani	48	Director
Joseph Savarino	45	Director
Ambassador Ned L. Siegel	63	Director

The principal occupations for the past five years (and, in some instances, for prior years) of each of our executive officers and directors are as follows:

Lalit Dhadphale co-founded HealthWarehouse.com in August 2007 and launched the company's prescription drug business in 2008. He has been President and CEO of the Company since its inception and has served as Chairman of the Board of Directors since May 2009. Earlier in his career, Lalit co-founded Zengine, Inc. serving as Vice President of Product Development, Chief International Officer and later as Chief Operating Officer of Zengine, Inc. from founding in 1999 through its sale in 2002. Under his day-to-day leadership, Zengine grew from start-up to \$30+ million in annualized sales, achieving profitability in its second quarter as a public company in the first quarter of 2001. Prior to co-founding Zengine, Mr. Dhadphale was a co-founder of Excite Japan, where he was involved with product development, internationalization and localization of web sites and Internet products. He produced the launch of both Excite Japan and Netscape Netcenter Japan. Prior thereto, Mr. Dhadphale was International Business Development Manager for CNET, securing relationships throughout Asia and the Pacific Rim. Mr. Dhadphale received his BA degree from the University of Michigan, Ann Arbor in Japanese Language & Literature and Asian Studies.

Mr. Dhadphale brings his executive experience in product development, web site design and internet products.

Youssef Bennani became a member of our Board of Directors on November 11, 2009. Through January 30, 2012, Mr. Bennani was a Senior Managing Director in Kaufman Bros., L.P.'s Investment Banking department which he joined in 1995. His responsibilities ranged from public and private financing transactions to general financial advisory for mergers and acquisition, restructuring, acquisition financing and recapitalization. Prior to joining Kaufman Bros., L.P., Mr. Bennani was an investment banker at Barington Capital, L.P., where his primary industry focus was technology. Mr. Bennani received his MBA in international finance from New York University's Stern School of Business. He also received his Masters in computer science as well as a BS in mathematics and physics from the University of Pierre and Marie Curie in Paris.

In addition to the international and investment banking experiences, Mr. Bennani brings a depth of knowledge of finance that permits him to qualify as the "financial expert" on the Board.

Joseph Savarino became a member of our Board on December 22, 2010. Since June 2010, Mr. Savarino has been a co-founder and Director of Carpeturn.com, Inc. which provides flooring materials and services to the multi-family housing industry, where customers have online and mobile access to schedule installations, manage budgets and track apartment histories. Mr. Savarino was engaged in select Internet and e-commerce consulting projects from 2002 through June 2010, and has prior experience in management, sales, business development and market research. Mr. Savarino was President and Chief Executive Officer of Zengine, Inc., from 1998 until its sale in 2002. Zengine was a public company that provided sell-side e-commerce software and services to customers in the United States and Japan.

As a co-founder and Director of Zengine, Inc. and Carpeturn.com, Inc., Mr. Savarino provides the Board with entrepreneurial background and e-commerce experience.

## Table of Contents

Ambassador Ned L. Siegel became a member of our Board of Directors on June 14, 2013. Ambassador Siegel has been the President of the Siegel Group, Inc. since September 1997. Ambassador Siegel has been a Managing Member of the Siegel Consulting Group, LLC since November 2009. He was the Ambassador of the United States of America to the Commonwealth of The Bahamas from October 26, 2007 to January 2009. He also served as an Ambassador of the US to the Bahamas, representative of the US in the United Nations, where he served in New York from September 2006 to January 2007, under Ambassador John R. Bolton as a Senior Advisor to the U.S. Mission to the 61st Session of the United Nations General Assembly. During his fifteen- month tenure as Ambassador, he served as Chief of Mission responsible for all operations of Embassy Nassau. Ambassador Siegel served as the Chairman of The Siegel Group Inc. since January 2009. He served as Vice Chairman of Alternative Fuels Americas, Inc. since January 18, 2011 and served as its Director. He has been a Director of PositiveID Corporation since February 2, 2011. He served as a member of the OPIC Board of Directors until September 2007. From January 2003 to October 2007, Ambassador Siegel was a Member of the Board of Directors of the Overseas Private Investment Corporation. From 2003 to 2007, he served as a Member of the Board of Directors of the Caswell-Massey Company, Ltd. In 2003, he was honored by President George W. Bush. In May 2009, he was presented with the United States Coast Guard Meritorious Public Service Award. Ambassador Siegel received Bachelor of Arts from University of Connecticut in 1973 and a Juris Doctorate from Dickinson School of Law in 1976.

Ambassador Siegel brings to the board extensive experience and contacts with government agencies.

All directors hold office until the next annual meeting of stockholders and the election and qualification of their successors. Officers are appointed annually by the board of directors and serve at the discretion of the board.

Currently, the Company's Chief Executive Officer also holds the position of Chairman of the Board of Directors and Principal Financial Officer. In the future, however, the Board may reconsider whether its Chief Executive Officer should also serve as Board Chairman.

### Committees of the Board of Directors

#### Audit Committee

Our Audit Committee consists of Youssef Bennani (Chair), Joe Savarino and Ambassador Siegel. The functions of the Audit Committee include the retention of our independent registered public accounting firm, reviewing and approving the planned scope, proposed fee arrangement and results of the Company's annual audit, reviewing the adequacy of the Company's accounting and financial controls and reviewing the independence of the Company's independent registered public accounting firm. Our Board has determined that the member of the Audit Committee meets the independence requirements of the SEC. Our Board has also determined that Youssef Bennani qualifies as an "audit committee financial expert," as defined in SEC rules. Mr. Bennani, on behalf of the Audit Committee, meets with the Company's independent auditors on a formal basis at least quarterly, in addition to a number of informal meetings throughout the year.

#### Compensation Committee

Our Compensation Committee of the Board of Directors consists of Joe Savarino (Chair), Youssef Bennani and Ambassador Siegel. The function of the Compensation Committee is to recommend to the full Board of Directors the compensation to be offered to our executive officers and the compensation to be offered to our directors. The Compensation Committee also administers our 2009 Incentive Compensation Plan, and recommends and approves

grants of stock options and restricted stock under that plan.

#### Code of Ethics

We have adopted a Code of Ethics that applies to all of our employees, including our principal executive officer, principal financial officer, and principal accounting officer or controller. A copy of the Company's Code of Ethics will be provided free of charge, upon written request to 7107 Industrial Road, Florence, KY, 41042, and our telephone number is (513) 618-0913.

#### Indebtedness of Directors and Executive Officers

None of our executive officers or directors, or their respective associates or affiliates, is indebted to us.

#### Legal Proceedings

See Item 3 for disclosure of material proceedings to which any of directors, executive officers, affiliates or stockholders is a party adverse to us.

Table of Contents

## Family Relationships

There are no family relationships among our executive officers and directors.

## Compliance with Section 16(a) of the Exchange Act

All filings made in compliance.

## Stockholder Recommendations of Board Nominees

In nominating candidates for election as a director, the Board will consider candidates recommended by stockholders who satisfy the notice, information and consent provisions set forth in our Amended and Restated Bylaws. Stockholders who wish to recommend a candidate may do so by writing to the Board of Directors in care of the Corporate Secretary, at HealthWarehouse.com, 7107 Industrial Road, Florence, Kentucky 41042. The Board will use will use the same evaluation process for director nominees recommended by stockholders as it uses for other director nominees. A copy of our Amended and Restated Bylaws may be obtained by any stockholder upon request to our Corporate Secretary or through the SEC's website at [www.sec.gov](http://www.sec.gov).

## Item 11. Executive Compensation.

The following table sets forth summary compensation information for 2014 and 2013 for our Chief Executive Officer during the years shown. No other executive officer had total compensation of \$100,000 or more in 2014. Except as provided below, none of our named executive officers received any other compensation required to be disclosed by law or in excess of 10% of their total annual compensation.

## Summary Compensation Table

Name and Principal Position	Year	Salary (\$)	Bonus (\$)	Option Awards (\$)(1)	All Other Compensation (\$)	Total (\$)
Lalit Dhadphale (2) President, Chief Executive and Financial Officer	2014	100,000	0	35,825	0	135,825
	2013	0	0	0	0	0

(1)The amounts in the "Option Awards" column reflect the dollar aggregate grant date fair value computed in accordance with ASC Topic 718. The assumptions we used to calculate these amounts are discussed in the notes to our consolidated financial statements included in this report on Form 10-K.

(2)Mr. Dhadphale ceased receiving a salary beginning January 1, 2013 in order to conserve the Company's resources to support its development activities. The Company recognized salary expense of \$116,666 and \$350,000 during the years ended December 31, 2014 and 2013, respectively, which was treated as contributed capital. Effective May 1, 2014, Mr. Dhadphale began to receive an annual salary of \$150,000.

## Narrative Disclosure to the Summary Compensation Table

The goal of our executive compensation program is to attract and retain qualified individuals and motivate those individuals to perform at the highest of professional levels and to contribute to our growth and success. Due to our limited resources, we currently have only one named executive officer: Lalit Dhadphale, our President, Chief Executive Officer and Chairman of the Board of Directors. He has agreed to below market compensation and elected not to receive a salary beginning January 1, 2013 through April 30, 2014 in order to conserve the Company's resources to support its development activities. Mr. Dhadphale began to receive a salary effective May 1, 2014.

Consistent with the size and nature of our Company, our executive compensation program is simple, consisting of a base salary and long-term equity awards in the form of stock options.

Table of Contents

**Base Salary:** The Compensation Committee or the Board reviews the base salaries of our named executive officers at least annually. The annual base salary of our named executive officer is reflected in the Summary Compensation Table. Due to our resource restrictions, our existing executive officer's base salary is below market and he elected not to receive his base salary from January 1, 2013 through April 30, 2014.

**Long-Term Incentive Awards:** The Board has a policy to issue long-term equity awards in the form of stock options. Our long-term equity awards align the interests of our named executive officers with those of our stockholders, thereby creating an incentive to build stockholder value and acting as a retention tool.

On August 31, 2011, we awarded Mr. Dhadphale a five year incentive stock option to purchase 250,000 shares of Common Stock at \$3.80 per share. These options vest on the date Mr. Dhadphale personally, by means of a pledge of Common Stock, secures a pending economic development loan to the Company from the Commonwealth of Kentucky. As of the filing date of this report, the Company does not intend to pursue the aforementioned financing. Accordingly, it is not probable that this option will vest and no compensation expense has been recorded.

#### Outstanding Equity Awards at Fiscal Year End

The following table summarizes equity awards outstanding at December 31, 2014, for each of the executive officers named in the Summary Compensation Table above:

Name	Number of Securities Underlying Unexercised Options (#) Exercisable	Number of Securities Underlying Unexercised Options (#) Unexercisable	Option Exercise Price (\$)	Option Expiration Date
Lalit Dhadphale Chief Executive and Financial Officer and President	250,000	--	3.03	10/14/15
	--	250,000(1)	3.80	8/31/16
	--	250,000(2)	0.18	8/27/2019

(1) Options vest on the effective date Mr. Dhadphale personally provides certain credit support for a pending economic development loan to the Company from the Commonwealth of Kentucky.

(2) Options vest on the one year anniversary of the grant date of August 27, 2014.

#### Employment Agreements

None of our employees are subject to employment agreements with us. We intend to enter into an employment agreement with Lalit Dhadphale, our President and Chief Executive Officer, when our financial condition improves.

#### Severance and Change in Control Arrangements

We do not have any agreements or arrangements providing for payments to any of our officers and directors in the event of a change in control or termination.

## Director Compensation

We compensate non-management directors primarily through stock option or restricted stock grants under our stock option plans. Based on guidelines stipulated in a study completed by Compensation Strategies, Inc. in October 2013 which analyzed and determined standards for director compensation of companies similar in size, we grant non-management directors options to purchase 100,000 shares upon their initial election to the board, and options to purchase 135,000 shares on an annual basis for serving on the board. Directors are expected to timely and fully participate in all regular and special board meetings, and all meetings of committees on which they may serve.

Table of Contents

The table below summarizes the compensation we paid to non-management directors for the fiscal year ended December 31, 2014:

Name	2014 DIRECTOR COMPENSATION		Total (\$)
	Option Awards (\$ (3))	All Other Compensation (\$)	
Joseph Savarino (1)	49,282	-	49,282
Youssef Bennani (1)	49,282	-	49,282
Ned Siegel (1,2)	167,908	-	167,908

- (1) In connection with the directors annual service on our Board, (i) on August 27, 2014 we granted options to each director to purchase 115,000 shares of our Common Stock at an exercise price of \$.16 per share, and with a term of ten years. The options vest 100% on November 30, 2014 and (ii) on October 23, 2014 we granted options to purchase 200,000 shares of our Common Stock at an exercise price of \$.12 per share, and with a term of ten years. The options immediately vested on the grant date.
- (2) As recognition for Mr. Siegel's efforts with the equity raise, the Board awarded him options to purchase 742,857 shares of Common Stock at an exercise price of \$0.12 per share, with a term of ten years. The options immediately vested on the grant date.
- (3) The amounts in the "Option Awards" column reflect the dollar aggregate grant date fair value computed in accordance with ASC Topic 718.

#### Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

##### Equity Compensation Plan Information

The 2009 Incentive Compensation Plan (the "2009 Plan") was approved on May 15, 2009 and June 4, 2009, and the increase in the total number of shares of Common Stock issuable pursuant to the 2009 Plan to 2,881,425 shares was approved on October 4, 2010 and September 20, 2011, by the Board of Directors and the Stockholders, respectively.

The 2009 Plan imposes individual limitations on the amount of certain awards. Under these limitations, during any fiscal year of our Company, the number of options, stock appreciation rights, shares of restricted stock, shares of deferred stock, performance shares and other stock based-awards granted to any one participant under the 2009 Plan may not exceed 250,000 shares, subject to adjustment in certain circumstances. The maximum amount that may be paid out as performance units in any 12- month performance period is \$2,000,000, and the maximum amount that may be paid out as performance units in any performance period greater than 12 months is \$4,000,000. The maximum term of each option or stock appreciation right, the times at which each option or stock appreciation right will be exercisable, and provisions requiring forfeiture of unexercised options or stock appreciation rights at or following termination of employment generally are fixed by the Board, except that no option or stock appreciation right may have a term exceeding ten years. The exercise price per share subject to an option and the grant price of a stock appreciation rights are determined by the Board, but in the case of an incentive stock option (ISO) must not be less than the fair market value of a share of Common Stock on the date of grant. As of December 31, 2013, stock options to purchase up to 2,543,150 shares of Common Stock have been awarded under the 2009 Plan, with exercise prices

ranging from \$0.30 to \$6.99 per share, of which 1,235,650 are exercisable. All of these options have a five or ten year term.

Following the approval of the Board of Directors and stockholders of record as of August 25, 2014, the Company adopted the 2014 Equity Incentive Plan (the “2014 Plan”) which made a total of 6,000,000 shares of common stock authorized and available for issuance pursuant to awards granted under the 2014 Plan.

The 2014 Equity Plan limit imposes individual limitations on the amount of certain awards. Under these limitations during any fiscal year of the Company, the number of options, stock appreciation rights, shares of restricted stock, shares of deferred stock, performance shares and other stock based-awards granted to any one participant under the 2014 Plan may not exceed 1,500,000 shares, subject to adjustment in certain circumstances. The maximum number of shares that may be awarded that are not subject to performance targets is an aggregate of 1,200,000 shares. The maximum term of each option or stock appreciation right, the times at which each option or stock appreciation right will be exercisable, and provisions requiring forfeiture of unexercised options or stock appreciation rights at or following termination of employment generally are fixed by the board of directors or committee of the Company’s board of directors designated to administer the 2014 Plan (the “Committee”), except that no option or stock appreciation right may have a term exceeding ten years. The exercise price per share subject to an option and the grant price of a stock appreciation rights are determined by the Committee, but in the case of an incentive stock option (ISO) must not be less than the fair market value of a share of Common Stock on the date of grant.

Table of Contents

## Securities Authorized for Issuance Under Equity Compensation Plans

The following table provides information as of December 31, 2014, with respect to the shares of Common Stock that may be issued under our existing equity compensation plan.

## Equity Compensation Plan Information

Plan category	Number of shares of Common Stock to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	3,944,557 (1)	\$1.27	4,690,615 (2)
Equity compensation plans not approved by security holders (3)	9,339,044	\$0.45	-0-
Total	13,283,601	\$0.69	4,690,615

(1) Consists of (i) options to purchase 2,601,700 shares of our Common Stock granted under our 2009 Incentive Compensation Plan (the “2009 Plan”), with exercise prices ranging from \$0.16 to \$6.99 per share and (ii) options to purchase 1,342,857 shares of our Common Stock granted under our 2014 Equity Incentive Plan (the “2014 Plan”), with exercise prices \$0.12 per share.

(2) Remaining shares available as of December 31, 2014 for future issuance including (i) 33,472 under our 2009 Plan (including 181,425 shares that remained available on May 15, 2009 under our 2006 Plan and that are now available for issuance under our 2009 Plan) and (ii) 4,657,143 under our 2014 Plan.

(3) Consists of warrants issued (1) to investors to purchase 7,522,844 shares of our Common Stock with exercise prices ranging from \$.25 to \$4.95 per share; (2) to consultants to purchase 1,291,200 shares of Common Stock with exercise prices ranging from \$0.15 to \$4.95 per share; and (3) to lenders to purchase 525,000 shares of our Common Stock with exercise prices of \$0.35. All outstanding warrants were issued for an initial term of five years.

Table of Contents

## Security Ownership of Certain Beneficial Owners and Management

The following table sets forth certain information regarding the ownership of our Common Stock as of December 31, 2014 by: (a) each current director; (b) each executive officer; (c) all of our current executive officers and directors as a group; and (d) all those known by us to be beneficial owners of more than five percent of our Common Stock.

Name (1)	Number of Shares Beneficially Owned (2)	Percentage of Shares Beneficially Owned (3)
5% or Greater Stockholders:		
Dr. Bruce Bedrick (4)	5,850,000	14.8%
Cormeg Holdings, LTD (5)	4,434,902	11.4%
Wayne Corona (6)	2,770,676	7.4%
Lloyd I. Miller III (7)	2,276,134	6.8%
Osgar Holdings, LTD (8)	2,500,000	6.5%

Ned L. Siegel (12)	1,423,066	*
Youssef Bennani (13)	630,000	*
Joseph Savarino (14)	495,000	*
All executive officers and directors as a group - (4 persons)	5,962,052	15.7%

\* Less than 1.0%

(1) The address of each officer and director is c/o HealthWarehouse.com, Inc., 7107 Industrial Road, Florence, Kentucky 41042.

(2) This table is based upon information supplied by officers, directors and principal stockholders and Schedules 13D and 13G filed with the SEC. Unless otherwise indicated, includes shares owned by a spouse, minor children and relatives sharing the same home, as well as the entities owned or controlled by the named person. Also

includes shares if the named person has the right to acquire those shares within 90 days after December 31, 2014, by the exercise of any warrant, stock option, convertible note or other right. Unless otherwise indicated in the footnotes to this table and subject to community property laws where applicable, we believe that each of the stockholders named in this table has sole voting and investment power with respect to the shares indicated as beneficially owned.

- (3) Applicable percentages are based on 37,570,383 shares of Common Stock outstanding on December 31, 2014, adjusted as required by rules promulgated by the SEC. Does not include 451,879 shares of Series B Preferred Stock outstanding on December 31, 2014, which shares are convertible into 5,146,902 shares of Common Stock, based on a conversion factor of 11.39. The shares of Common Stock and shares underlying convertible preferred stock, and stock options or warrants are deemed outstanding for purposes of computing the percentage of the person holding such convertible preferred stock, convertible notes, and/or stock options or warrants but are not deemed outstanding for the purpose of computing the percentage of any other person.
- (4) Consists of (i) 3,900,000 shares and (ii) warrants to purchase 1,950,000 shares owned by Dr. Bedrick. The information in this Note 4 is based in part on information contained in the Schedule 13G filed with the SEC by Dr. Bruce Bedrick on September 18, 2014. Dr. Bedrick's address is 5375 Monterey Circle #32, Delray Beach, FL 33484

Table of Contents

- (5) Consists of 3,101,568 shares and warrants to purchase 1,333,334 shares. The securities are owned by Cormag Holdings, Ltd., a Canadian corporation. Mark Douglas Scott is the President, sole stockholder and director of Cormag and has sole voting and dispositive power with respect to the shares owned by Cormag. The owners address is 104 Falcon Ridge Drive, Winnipeg, Manitoba, Canada R3Y1X6. Mr. Scott is a Canadian citizen. The information in this Note 8 is based in part on information contained in the Schedule 13G/A Amendment No. 1 filed with the SEC by Cormag Holdings and Mr. Scott on January 27, 2015.
- (6) Consists of (i) 2,737,644 shares of Common Stock owned by Wayne Corona and (ii) 33,032 shares of commons stock owned by MKW Partners, LLC (“MKW”). Mr. Corona is the Managing Member of MKW and has sole voting and dispositive power with respect to the shares owned by MKW. The information contained in this Note 6 is based in part on the information contained in Schedule 13G Amendment No. 1 filed with the SEC by Mr. Corona on July 29, 2013.
- (7) Consists of (i) 413,030 shares of Common Stock and (ii) 203,082 shares of Series B Preferred Stock convertible into 2,313,104 shares of Common Stock, based on a conversion factor approximately 11.39. The securities described above are owned by Milfam I L.P., a Georgia limited partnership (“Milfam L.P.”) Milfam LLC, an Ohio limited liability company (“Milfam LLC”) is the general partner of Milfam L.P. Mr. Miller is the manager of Milfam LLC. As the manager of Milfam LLC, Mr. Miller has sole dispositive and voting power with respect to the securities owned by Milfam L.P. Mr. Miller’s address is 222 Lakeview Avenue, Suite 160-365, West Palm Beach, FL 33401. The information in this Note 7 is based in part on information contained in the Schedule 13D/A Amendment No. 12 filed with the SEC by Lloyd I. Miller, III on November 3, 2014.
- (8) Consists of 1,666,667 shares and warrants to purchase 833,333 shares. The securities are owned by Osgar Holdings Ltd., a Canadian corporation. Hong Penner is the President, sole stockholder and director of Osgar and has sole voting and dispositive power with respect to the shares owned by Osgar. The owners address is 400 St. Mary Avenue, 9th Floor, Winnipeg, Manitoba, Canada R3C4K5. Ms. Penner is a Canadian citizen. The information in this Note 8 is based in part on information contained in the Schedule 13G filed with the SEC by Osgar Holdings and Ms. Penner on January 27, 2015.
- (9) 203,082 shares of Series B Preferred Stock convertible into 2,313,104 shares of Common Stock, based on a conversion factor of approximately 11.39. The securities described above are owned by HWH Lending, LLC, a Delaware limited liability company (“HWH”). Ms. Singer is the sole trustee of The Singer Children’s Management Trust (the “Trust”). The Trust is the sole member of HWH. As the trustee of the Trust, Ms. Singer has sole dispositive and voting power with respect to the securities owned by HWH. Ms. Singer’s address is 212 Vaccaro Drive, Cresskill, NJ 07626. The information in this Note 9 is based in part on information contained in the Schedule 13G/A Amendment No. 1 filed with the SEC by Karen Singer on February 9, 2015.

- (10) Consists of (i) 1,935,708 shares, (ii) 19,604 shares of Series B Preferred Stock which is convertible into 223,290 shares, based on a conversion factor of approximately 11.39, and (iii) warrants to purchase 42,846 shares. Ms. Marra has sole dispositive and voting power with respect to 1,751,136 shares, and shared dispositive and voting power with Ralph Marra with respect to 4,029 shares. Ralph Marra has sole dispositive and voting power with respect to 446,680 shares, and shared dispositive and voting power with Janice Marra with respect to 4,029 shares. Excludes 90,000 shares held in Trust for Janice and Ralph Marra's minor children. The business address for Ms. And Mr. Marra is 5 Post Road, Rumson, NJ 07760. The information contained in this Note 10 is based in part on the information contained in Schedule 13G/A Amendment No. 1 filed with the SEC by Ms. And Mr. Marra on February 14, 2014.
- (11) Includes stock options to purchase 250,000 shares of Common Stock. Does not include stock options to purchase 500,000 shares of Common Stock that are not currently exercisable within 90 days of December 31, 2014.
- (12) Includes stock options to purchase 1,226,190 shares of Common Stock. Does not include stock options to purchase 66,667 shares of Common Stock that are not exercisable within 90 days of December 31, 2014.
- (13) Includes stock options to purchase 630,000 shares of Common Stock.
- (14) Includes stock options to purchase 495,000 shares of Common Stock.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

Related Party Transactions

Effective September 4, 2014, the Company entered into a Consulting Agreement with Dr. Bruce Bedrick, a major shareholder, to provide consulting services related to business development and marketing activities for the Company and other duties as agreed to by management. The Company is required to pay a monthly fee of \$10,000 plus expense reimbursement. Subsequent to the effective date, the Dr. Bedrick agreed to defer the payment of the monthly fee for a period of four months beginning with the November 4, 2014 payment. The deferred fees will be payable on the earlier of the termination date and the second anniversary of the effective date. The Consulting Agreement has an initial term of one year and can be automatically renewed for a one year period unless terminated by either party. The Agreement may be terminated by the Company by providing a sixty day notice prior to the first anniversary of the effective date. During the year ended December 31, 2014, the Company incurred expense of and paid \$21,110.

## Table of Contents

Between June 2009 and April 2012, an employee who is the son of the managing member of a limited liability company that beneficially owns approximately 12% of the Company's Common Stock received advances from the Company in various forms. As of December 31, 2012, the balance of these advances totaled \$391,469 including interest, and the outstanding balance of these advances was \$156,469. The Company also provided fulfillment services at no charge to a business partly owned by a member of his household. The Company's Board of Directors determined that not all of these advances were approved in accordance with the Company's policy on related party transactions, documented appropriately or recorded correctly in the Company's accounting system. As a result, the Company was not able to monitor the outstanding amount of these advances on a continuous basis. In April 2012, this employee voluntarily resigned from the Company. Principal repayments towards the outstanding advances aggregating \$235,000 have been made through December 31, 2013. The individual agreed to repay the remaining balance with interest based on prime rate on the first business day of the calendar quarter. Previously included in accounts receivable, the amount has been reclassified under Stockholders' Deficiency as the Company has determined to exercise its rights through a pledge agreement for 42,860 shares as collateral. At December 31, 2014 and 2013, the Company estimated the value of the collateral at \$2,143 and \$9,001, respectively.

The Company intends to adopt a more robust formal written policy on related party transactions as part of the Board's plan to remediate the weaknesses in our internal controls and improve the quality of our policies and procedures. Although formal procedures for the review, approval or ratification of transactions with related persons have not been adopted, the Company adheres to a general policy that such transactions should only be entered into if they are on terms that, on the whole, are no more favorable, or no less favorable, than those available from unaffiliated third parties and their approval is in accordance with applicable law. The Company's Audit Committee will review and discuss with management potential transactions with related parties. Related party transactions requiring Audit Committee approval include transactions that are significant in size and transactions that involve terms or aspects that differ from those which would be entered into between independent parties.

In connection with an application submitted for the creation and support to the Company from the state of Kentucky in 2011, Lalit Dhadphale and Cape Bear Partners LLC received 250,000 options and 250,000 warrants, respectively. The vesting and exercise of the options and warrants are not probable as the Company is no longer pursuing this support from Kentucky.

Although we have not adopted formal procedures for the review, approval or ratification of transactions with related persons, we adhere to a general policy that such transactions should only be entered into if they are on terms that, on the whole, are no more favorable, or no less favorable, than those available from unaffiliated third parties and their approval is in accordance with applicable law. Such transactions require the approval of our board of directors.

### Director Independence

Our board of directors has determined that Youssef Bennani, Joseph Savarino and Ned Siegel are "independent" within the meaning of Rule 5605(a)(2) of the National Association of Securities Dealers' Marketplace Rules of the Nasdaq Stock Market (the "NASDAQ Rules"), and that they are also "independent" for purposes of Rule 10A-3 of the Exchange Act. Lalit Dhadphal is not "independent" within the meaning of Rule 5605(a)(2) of the NASDAQ Rules.

In making each of these independence determinations, our board of directors considered and broadly assessed, from the standpoint of materiality and independence, all of the information provided by each director in response to detailed inquiries concerning the director's independence and any direct or indirect business, family, employment, transactional

or other relationship or affiliation of such director with our company.

Item 14. Principal Accounting Fees and Services.

The following table presents fees billed or expected to be billed for professional services rendered by the Company's principal accountant. Marcum LLP, for the audit of the Company's annual consolidated financial statements for the years ended December 31, 2014, and 2013, and fees billed for other services rendered by our principal accountants during those periods.

	Year Ended December 31, 2014	Year Ended December 31, 2013
Audit Fees (1)	\$ 110,000	\$ 134,082
Audit Related Fees (2)	-	-
Tax Fees (3)	-	-
All Other Fees (4)	-	-

(1) Audit fees were principally for audit work performed on our annual financial statements and review of our interim financial statements.

(2) There were no "audit-related services" during the period.

(3) There were no "tax services" during the period.

(4) There were no "other services" during the period.

During the years ended December 31, 2014 and 2013, the Audit Committee met to review and approve the filing of Forms 10-K and 10-Q. All audit and non-audit services were pre-approved by the Board of Directors.

Table of Contents

## Pre-Approval Policies and Procedures

To help ensure the independence of our independent registered public accounting firm, all audit and permitted non-audit services, including the fees and terms thereof, to be performed by our independent registered public accounting firm must be approved in advance by the Audit Committee, as a Committee or the Committee may delegate to one or more of its members the authority to grant the required approvals.

Report of Independent Registered Public Accounting Firm

To the Audit Committee of the Board of Directors and Stockholders of  
Healthwarehouse.com, Inc.

We have audited the accompanying consolidated balance sheets of Healthwarehouse.com, Inc. and Subsidiaries (the “Company”) as of December 31, 2014 and 2013, and the related consolidated statements of operations, changes in stockholders’ deficiency and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Healthwarehouse.com, Inc. and Subsidiaries as of December 31, 2014 and 2013, and the consolidated results of their operations and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As more fully described in Note 2, the Company has incurred significant losses and needs to raise additional funds to meet its obligations and sustain its operations. These conditions raise substantial doubt about the Company’s ability to continue as a going concern. Management’s plans in regard to these matters are also described in Note 2. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.
