UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549

FORM 10-Q

(Mark one)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2010

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 1-6364

SOUTH JERSEY INDUSTRIES, INC.
(Exact name of registrant as specified in its charter)

New Jersey (State of incorporation) 22-1901645 (IRS employer identification no.)
1 South Jersey Plaza, Folsom, NJ 08037
(Address of principal executive offices, including zip code)

(609) 561-9000
(Registrant's telephone number, including area code)

Common Stock (\$1.25 par value per share) (Title of each class) New York Stock Exchange (Name of exchange on which registered)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of November 1, 2010 there were 29,872,825 shares of the registrant's common stock outstanding.

Table of Contents

Notes to Unaudited Condensed Consolidated Financial Statements

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

GENERAL - South Jersey Industries, Inc. (SJI or the Company) currently provides a variety of energy related products and services primarily through the following subsidiaries:

South Jersey Gas Company (SJG) is a regulated natural gas utility. SJG distributes natural gas in the seven southernmost counties of New Jersey.

South Jersey Resources Group, LLC (SJRG) markets wholesale natural gas storage, commodity and transportation in the mid-Atlantic, Appalachian and southern states.

Marina Energy, LLC (Marina) develops and operates on-site energy-related projects.

South Jersey Energy Company (SJE) acquires and markets natural gas and electricity to retail end users and provides total energy management services to commercial and industrial customers.

South Jersey Energy Service Plus, LLC (SJESP) installs residential and small commercial HVAC systems, provides plumbing services and services appliances via the sale of appliance service programs.

BASIS OF PRESENTATION — The condensed consolidated financial statements include the accounts of SJI, its wholly owned subsidiaries and subsidiaries in which we have a controlling interest. All significant intercompany accounts and transactions have been eliminated. In management's opinion, the condensed consolidated financial statements reflect all normal and recurring adjustments needed to fairly present SJI's financial position and operating results at the dates and for the periods presented. SJI's businesses are subject to seasonal fluctuations and, accordingly, this interim financial information should not be the basis for estimating the full year's operating results. As permitted by the rules and regulations of the Securities and Exchange Commission, the accompanying unaudited condensed consolidated financial statements contain certain condensed financial information and exclude certain footnote disclosures normally included in annual audited consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). These financial statements should be read in conjunction with SJI's 2009 Annual Report on Form 10-K for a more complete discussion of the Company's accounting policies and certain other information.

Marina and a joint venture partner formed AC Landfill Energy, LLC (ACLE) and WC Landfill Energy, LLC (WCLE) to develop and install methane-to-electric power generation systems at certain county-owned landfills. Prior to January 1, 2010, the Company accounted for these entities as consolidated subsidiaries. In June 2009, the FASB issued new accounting guidance on the consolidation of variable interest entities (VIEs) which was effective for fiscal years beginning after November 15, 2009. The new accounting guidance for VIEs considers if a company has a controlling financial interest in a VIE. A controlling financial interest will have both (a) the power to direct the activities of a VIE that most significantly impact the VIE's economic performance and (b) the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. Entities are required to consolidate a VIE when it is determined that they have a controlling financial interest in a VIE and therefore, are the primary beneficiary of that VIE.

Marina and the joint venture partner of ACLE and WCLE share the executive board seats and their voting rights equally and equally approve the annual budgets of both entities. Based on the shared control of operations, management concluded as of January 1, 2010 that the Company is no longer the primary beneficiary of ACLE and WCLE as defined by the new accounting guidance. As a result, ACLE and WCLE are no longer accounted for as

consolidated subsidiaries. As of September 30, 2010, ACLE and WCLE are included with other equity investments in Investment in Affiliates on the condensed consolidated balance sheet. The results of operations of ACLE and WCLE for the three and nine months ended September 30, 2010 are included in Equity in Loss of Affiliated Companies on the condensed consolidated statements of income. The adoption of this guidance modified our financial statement presentation, but did not have an impact on our financial statement results.

REVENUE BASED TAXES — SJI collects certain revenue-based energy taxes from customers. Such taxes include New Jersey State Sales Tax, Transitional Energy Facility Assessment (TEFA) and Public Utilities Assessment (PUA). State sales tax is recorded as a liability when billed to customers and is not included in revenue or operating expenses. TEFA and PUA are included in both utility revenue and cost of sales and totaled \$0.9 million and \$1.0 million for the three months ended September 30, 2010 and 2009, respectively, and \$5.7 million and \$6.3 million for the nine months ended September 30, 2010 and 2009, respectively.

Table of Contents

CAPITALIZED INTEREST — SJG capitalizes interest on construction at the rate of return on rate base utilized by the New Jersey Board of Public Utilities (BPU) to set rates in its last base rate proceeding. Marina capitalizes interest on construction projects in progress based on the actual cost of borrowed funds. SJG's amounts are included in Utility Plant and Marina's amounts are included in Nonutility Property and Equipment on the condensed consolidated balance sheets. Interest Charges are presented net of capitalized interest on the condensed consolidated statements of income. The amount of interest capitalized by SJI for the three and nine months ended September 30, 2010 and 2009 was not significant.

DERIVATIVE INSTRUMENTS —The Company uses a variety of derivative instruments to limit its exposure to market risk in accordance with strict corporate guidelines (See Note 12). These contracts, which have not been designated as hedging instruments under GAAP, are measured at fair value and recorded in Derivatives — Energy Related Assets or Derivatives — Energy Related Liabilities on the condensed consolidated balance sheets. The net unrealized pre-tax gains and losses for these energy related commodity contracts are included with realized gains and losses in Operating Revenues – Nonutility.

The Company has also entered into interest rate derivatives to hedge exposure to increasing interest rates and the impact of those rates on cash flows of variable-rate debt. These interest rate derivatives, some of which have been designated as hedging instruments under GAAP, are measured at fair value and recorded in Derivatives-Other on the condensed consolidated balance sheets. The fair value represents the amount SJI would have to pay the counterparty to terminate these contracts as of those dates.

The interest rate derivatives that have been designated as cash flow hedges have been determined to be highly effective. Therefore, the changes in fair value of the effective portion of these interest rate swaps along with the cumulative unamortized costs, net of taxes, have been recorded in Accumulated Other Comprehensive Loss. These unrealized gains and losses will be reclassified into earnings when the hedged forecasted cash flows of the related variable-rate debt occurs, or when it is probable that they will not occur. The ineffective portion of these swaps have been included in Interest Charges.

The unrealized gains and losses on the interest rate derivatives that have not been designated as cash flow hedges have also been included in Interest Charges. However, for selected interest rate derivatives at SJG, management believes that, subject to BPU approval, the market value upon termination can be recovered in rates and therefore these unrealized losses have been included in Other Regulatory Assets in the condensed consolidated balance sheets.

GAS EXPLORATION AND DEVELOPMENT - The Company capitalizes all costs associated with gas property acquisition, exploration and development activities under the full cost method of accounting. Capitalized costs include costs related to unproved properties, which are not amortized until proved reserves are found or it is determined that the unproved properties are impaired. All costs related to unproved properties are reviewed quarterly to determine if impairment has occurred. As of September 30, 2010 and December 31, 2009, \$3.5 million related to the acquisition of interests in proved and unproved properties in Pennsylvania is included with Nonutility Property and Equipment on the condensed consolidated balance sheets, respectively.

TREASURY STOCK – SJI uses the par value method of accounting for treasury stock. As of September 30, 2010 and December 31, 2009, SJI held 142,585 and 146,028 shares of treasury stock, respectively. These shares are related to deferred compensation arrangements where the amounts earned are held in the stock of SJI.

INCOME TAXES — Deferred income taxes are provided for all significant temporary differences between the book and taxable basis of assets and liabilities in accordance with FASB ASC Topic 740 - "Income Taxes". A valuation allowance is established when it is determined that it is more likely than not that a deferred tax asset will not be realized. Investment tax credits related to renewable energy facilities of the non-regulated entities are recognized on

the flow through method, which may result in variations in the customary relationship between income taxes and pre-tax income for interim periods.

NEW ACCOUNTING PRONOUNCEMENTS — Other than as described below, no new accounting pronouncement issued or effective during 2009 and 2010 had, or is expected to have, a material impact on the condensed consolidated financial statements.

In June 2009, the FASB issued new accounting guidance on the consolidation of variable interest entities (VIEs). Accordingly, companies needed to carefully reconsider previous conclusions, including (1) whether an entity is a VIE, (2) whether the company is the VIE's primary beneficiary, and (3) what type of financial statement disclosures are required. The new guidance was effective for fiscal years beginning after November 15, 2009. As a result of adopting this guidance, we have deconsolidated ACLE and WCLE as of January 1, 2010 due to the shared control between the Company and the joint venture partner as discussed under "Basis of Presentation" above. Beginning January 1, 2010, ACLE and WCLE are reported using the equity method of accounting. The adoption of this guidance modified our financial statement presentation, but did not have an impact on our financial statement results.

Table of Contents

HEALTH CARE LEGISLATION – In March of 2010, the President of the United States signed into law comprehensive health care reform legislation under the Patient Protection and Affordable Care Act (HR 3590) and the Health Care Education and Affordability Reconciliation Act (HR 4872) (the “Acts”). The Acts contain provisions which could impact our accounting for retiree medical benefits in future periods. However, the extent of that impact, if any, cannot be determined until regulations are promulgated under the Acts and additional interpretations of the Acts become available. Based on the analysis to date of the provision in the Acts in which the impacts are reasonably determinable, a re-measurement of our Other Postretirement Benefits liability is not required at this time. See Note 11 to the Financial Statements in Item 8 of SJI’s Form 10-K as of December 31, 2009 for additional information related to SJI’s pension and other postretirement benefits.

2. STOCK-BASED COMPENSATION PLAN:

Under the Amended and Restated 1997 Stock-Based Compensation Plan, no more than 2,000,000 shares in the aggregate may be issued to SJI’s officers (Officers), non-employee directors (Directors) and other key employees. The plan will terminate on January 26, 2015, unless terminated earlier by the Board of Directors. No options were granted or outstanding during the nine months ended September 30, 2010 and 2009. No stock appreciation rights have been issued under the plan. During the nine months ended September 30, 2010 and 2009, SJI granted 52,940 and 41,437 restricted shares to Officers and other key employees, respectively. These restricted shares vest over a three-year period and are subject to SJI achieving certain market-based performance targets as compared to a peer group average, which can cause the actual amount of shares that ultimately vest to range from between 0% to 150% of the original share units granted. During the nine months ended September 30, 2010 and 2009, SJI granted 16,700 and 9,559 restricted shares to Directors, respectively. Shares issued to Directors vest over a three-year service period but contain no performance conditions. As a result, 100% of the shares granted generally vest.

See Note 1 to the Consolidated Financial Statements in Item 8 of SJI’s Annual Report on Form 10-K as of December 31, 2009 for the related accounting policy.

The following table summarizes the nonvested restricted stock awards outstanding at September 30, 2010 and the assumptions used to estimate the fair value of the awards:

	Grant Date	Shares Outstanding	Fair Value Per Share	Expected Volatility	Risk-Free Interest Rate
Officers & Key Employees -	Jan. 2008	42,144	\$ 34.030	21.7%	2.90%
	Jan. 2009	37,748	\$ 39.350	28.6%	1.20%
	Jan. 2010	52,940	\$ 39.020	29.0%	1.65%
Directors -	Jan. 2008	7,704	\$ 36.355	—	—
	Jan. 2009	8,690	\$ 40.265	—	—
	Jan. 2010	16,700	\$ 37.825	—	—

Expected volatility is based on the actual daily volatility of SJI’s share price over the preceding three-year period as of the valuation date. The risk-free interest rate is based on the zero-coupon U.S. Treasury Bond, with a term equal to the

three-year term of the Officers' and other key employees' restricted shares. As notional dividend equivalents are credited to the holders, which are reinvested during the three-year service period, no reduction to the fair value of the award is required. As the Directors' restricted stock awards contain no performance conditions and dividends are paid or credited to the holder during the three-year service period, the fair value of these awards are equal to the market value of the shares on the date of grant.

The following table summarizes the total compensation cost for the three and nine months ended September 30, 2010 and 2009 (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Officers & Key Employees	\$ 407	\$ 335	\$ 1,221	\$ 1,005
Directors	97	82	319	247
Total Cost	504	417	1,540	1,252
Capitalized	(50)	(43)	(151)	(128)
Net Expense	\$ 454	\$ 374	\$ 1,389	\$ 1,124

Table of Contents

As of September 30, 2010, there was \$2.9 million of total unrecognized compensation cost related to nonvested share-based compensation awards granted under the restricted stock plans. That cost is expected to be recognized over a weighted average period of 1.9 years.

The following table summarizes information regarding restricted stock award activity during the nine months ended September 30, 2010 excluding accrued dividend equivalents:

	Officers & Other Key Employees	Directors	Weighted Average Fair Value
Nonvested Shares Outstanding, January 1, 2010	80,281	16,394	\$ 36.874
Granted	52,940	16,700	\$ 38.733
Forfeited	(389)	—	\$ 39.350
Nonvested Shares Outstanding, September 30, 2010	132,832	33,094	\$ 37.649

During the nine months ended September 30, 2010 and 2009, SJI awarded 59,893 shares to its Officers and other key employees, which had vested at December 31, 2009, at a market value of \$2.3 million, and 57,976 shares, which had vested at December 31, 2008, at a market value of \$2.3 million, respectively. Also during the nine months ended September 30, 2010 and 2009, SJI awarded 16,700 and 9,559 shares to its Directors at a market value of \$0.6 million and \$0.4 million, respectively. The Company has a policy of issuing new shares to satisfy its obligations under these plans; therefore, there are no cash payment requirements resulting from the normal operation of this plan. However, a change in control could result in such shares becoming nonforfeitable or immediately payable in cash. At the discretion of the Officers, Directors and other key employees, the receipt of vested shares can be deferred until future periods. These deferred shares are included in Treasury Stock on the condensed consolidated balance sheets.

3. DISCONTINUED OPERATIONS:

Discontinued Operations consist of the environmental remediation activities related to the properties of South Jersey Fuel, Inc. (SJF) and the product liability litigation and environmental remediation activities related to the prior business of The Morie Company, Inc. (Morie). SJF is a subsidiary of Energy & Minerals, Inc. (EMI), an SJI subsidiary, which previously operated a fuel oil business. Morie is the former sand mining and processing subsidiary of EMI. EMI sold the common stock of Morie in 1996.

SJI conducts tests annually to estimate the environmental remediation costs for these properties.

Summarized operating results of the discontinued operations for the three and nine months ended September 30, were (in thousands, except per share amounts):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Gain (Loss) before Income Taxes:				
Sand Mining	\$ (89)	\$ (22)	\$ (63)	\$ (77)
Fuel Oil	(116)	(3)	(342)	(12)
Income Tax Benefits	72	9	142	31
Loss from Discontinued Operations — Net	\$ (133)	\$ (16)	\$ (263)	\$ (58)
Earnings Per Common Share from Discontinued Operations — Net:				

Basic and Diluted	\$	(0.004)	\$	(0.001)	\$	(0.009)	\$	(0.002)
-------------------	----	---------	----	---------	----	---------	----	---------

Table of Contents

4. COMMON STOCK:

The following shares were issued and outstanding at September 30:

	2010
Beginning Balance, January 1	29,796,232
New Issues During Period:	
Stock-Based Compensation Plan	76,593
Ending Balance, September 30	29,872,825

The par value (\$1.25 per share) of stock issued was recorded in Common Stock and the net excess over par value of approximately \$1.5 million was recorded in Premium on Common Stock.

EARNINGS PER COMMON SHARE — Basic EPS is based on the weighted-average number of common shares outstanding. The incremental shares required for inclusion in the denominator for the diluted EPS calculation were 127,064 for the three months ended September 30, 2010, and 105,056 and 103,196 shares for the nine months ended September 30, 2010 and 2009, respectively. For the three months ended September 30, 2009, incremental shares of 105,422 were not included in the denominator for the diluted EPS calculation because they would have an antidilutive effect on EPS. These shares relate to SJI's restricted stock as discussed in Note 2.

DIVIDENDS DECLARED – During the first six months of 2010 and 2009, SJI declared quarterly dividends to its common shareholders that were payable in April and July of each year. In June 2010, SJI also declared its normal quarterly dividend that is payable in October 2010. During 2009, SJI did not declare its October dividend until August. Consequently, Dividends Declared per Common Share on the condensed consolidated statements of income for the three months ended September 30, 2010 does not include the impact of the October dividend declaration.

DIVIDEND REINVESTMENT PLAN (DRP) — The Company offers a DRP which allows participating shareholders to purchase shares of SJI common stock by the automatic reinvestment of dividends or optional purchases. During 2010 and 2009, shares of SJI common stock offered by the DRP have been purchased in open market transactions.

5. FINANCIAL INSTRUMENTS:

RESTRICTED INVESTMENTS — In accordance with the terms of the Marina and certain SJG loan agreements, unused proceeds are required to be escrowed pending approved construction expenditures. As of September 30, 2010 and December 31, 2009, the escrowed proceeds, including interest earned, totaled \$1.3 million and \$1.4 million, respectively.

The Company maintains margin accounts with selected counterparties to support its risk management activities. The balances required to be held in these margin accounts increase as the net value of the outstanding energy related contracts with the respective counterparties decrease. As of September 30, 2010 and December 31, 2009, the balances in these accounts totaled \$25.7 million and \$3.8 million, respectively. The carrying amounts of the Restricted Investments approximate their fair values at September 30, 2010 and December 31, 2009.

LONG-TERM RECEIVABLES — SJG provides financing to customers for the purpose of attracting conversions to natural gas heating systems from competing fuel sources. The terms of these loans call for customers to make monthly payments over a period of up to five years with no interest. The carrying amounts of such loans were \$10.0 million and \$10.8 million as of September 30, 2010 and December 31, 2009, respectively. The current portion of these receivables is reflected in Accounts Receivable and the non-current portion is reflected in Contract Receivables on the condensed consolidated balance sheets. The carrying amounts noted above are net of unamortized discounts resulting

from imputed interest in the amount of approximately \$1.1 million and \$1.2 million as of September 30, 2010 and December 31, 2009, respectively. The annual amortization to interest is not material to the Company's condensed consolidated financial statements. The carrying amounts of these receivables approximate their fair value at September 30, 2010 and December 31, 2009.

LONG-TERM DEBT – In March 2010, SJG issued \$15.0 million aggregate principal amount of its Medium Term Notes in a private placement. These notes bear interest at 4.84%, are secured by a first mortgage lien on substantially all utility plant and are due in 2026. In June 2010, SJG issued an additional \$45.0 million aggregate principal amount of its Medium Term notes in a private placement. These notes bear interest at 4.93%, are secured by a first mortgage lien on substantially all utility plant and are also due in 2026. The estimated fair values of SJI's long-term debt, including current maturities, as of September 30, 2010 and December 31, 2009, were \$493.6 million and \$394.5 million, respectively. The carrying amounts of SJI's long-term debt, including current maturities, as of September 30, 2010 and December 31, 2009 were \$406.4 million and \$347.9 million, respectively. We based the estimates on interest rates available to SJI at the end of each period for debt with similar terms and maturities. The carrying amounts of SJI's other financial instruments approximate their fair values at September 30, 2010 and December 31, 2009. No other long-term debt was issued by SJI or its subsidiaries in the first nine months of 2010 or 2009.

Table of Contents

As discussed in Note 11, SJI has provided standby letters of credit through its revolving credit facility and uncommitted bank lines to support variable-rate demand bonds of \$61.4 million issued for Marina and \$25.0 million issued for SJG. These letters of credit expire in August 2011 and consequently, these bonds are included in the current portion of long-term debt as of September 30, 2010. As of December 31, 2009, the SJG bonds were included in the current portion of long-term debt because the outstanding letter of credit at that time expired in August 2010. These letters of credit are expected to be renewed before expiration.

Certain long-term debt agreements contain one financial covenant which potentially restricts SJG's ability to pay cash dividends and other distributions on its common stock. As of September 30, 2010, SJG was in compliance with this covenant.

CONCENTRATION OF CREDIT RISK - As of September 30, 2010, approximately 49.2% of the current and noncurrent Derivatives – Energy Related Assets or \$25.4 million are with a single retail counterparty. This counterparty has contracts with a large number of diverse customers which minimizes the concentration of this risk. A portion of these contracts may be assigned to SJI in the event of a default by the counterparty.

6. SEGMENTS OF BUSINESS:

SJI operates in several different reportable operating segments which reflect the financial information regularly evaluated by the chief operating decision maker. Gas Utility Operations (SJG) consists primarily of natural gas distribution to residential, commercial and industrial customers. Wholesale Gas Operations include SJRG's activities. SJE is involved in both retail gas and retail electric activities. Retail Gas and Other Operations include natural gas acquisition and transportation service business lines. Retail Electric Operations consist of electricity acquisition and transportation to commercial and industrial customers. On-Site Energy Production consists of Marina's thermal energy facility and other energy-related projects. Appliance Service Operations includes SJESP's servicing of appliances via the sale of appliance service programs as well as on a time and materials basis, and the installation of residential and small commercial HVAC systems. The accounting policies of the segments are the same as those described in the summary of significant accounting policies. Intersegment sales and transfers are treated as if the sales or transfers were to third parties at current market prices.

Information about SJI's operations in different reportable operating segments is presented below (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Operating Revenues:

7.

RATES AND REGULATORY ACTIONS:

SJG is subject to the rules and regulations of the BPU. Effective September 17, 2010, the BPU granted SJG a base rate increase of \$42.1 million, which was predicated in part upon an 8.21% rate of return on rate base that included a 10.3% return on common equity. The \$42.1 million includes \$16.6 million of revenue previously recovered through the Conservation Incentive Program (“CIP”) and \$6.8 million of revenues previously recovered through the Capital Investment Recovery Tracker (“CIRT”), resulting in incremental revenue of \$18.7 million. SJG was permitted to recover regulatory assets contained in its petition and is allowed to defer certain federally mandated pipeline integrity management program costs for recovery in its next base rate case. In addition, annual depreciation expense will be reduced by \$1.2 million as a result of the amortization of excess cost of removal recoveries. The BPU also authorized a Phase II of the rate proceeding to address the recovery of investment in CIRT projects not rolled into rate base in this case.

Also effective September 17, 2010, the BPU approved, on a provisional basis, the Company’s request to reduce its BGSS rates by 10.6% and its request to increase the CIP rates by 0.3%. The resulting net rate reduction will more than offset the increase in base rates resulting in a net revenue reduction of \$19.1 million to SJG customers. Residential customers will benefit from a 3.4% decrease to their natural gas bills during a typical winter month. In July, the Company filed its Energy Efficiency Tracker petition requesting a 0.4% increase. This matter is still pending.

Table of Contents

8. REGULATORY ASSETS & REGULATORY LIABILITIES:

There have been no significant changes to the nature of the Company's regulatory assets and liabilities since December 31, 2009 which are described in Note 10 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K as of December 31, 2009.

Regulatory Assets consisted of the following items (in thousands):

	September 30, 2010	December 31, 2009
Environmental Remediation Costs:		
Expended - Net	\$ 39,142	\$ 42,924
Liability for Future Expenditures	68,054	69,056
Income Taxes-Flowthrough Depreciation	1,018	1,752
Deferred Asset Retirement Obligation Costs	22,715	22,438
Deferred Gas Costs - Net	7,645	6,519
Deferred Pension and Other Postretirement Benefit Costs	70,049	71,192
Conservation Incentive Program Receivable	19,557	16,672
Societal Benefit Costs Receivable	3,090	1,872
Premium for Early Retirement of Debt	740	1,046
Other Regulatory Assets	13,467	6,991
Total Regulatory Assets	\$ 245,477	\$ 240,462

Regulatory Liabilities consisted of the following items (in thousands):

	September 30, 2010	December 31, 2009
Excess Plant Removal Costs	\$ 48,758	\$ 48,715
Other Regulatory Liabilities	2,255	1,478
Total Regulatory Liabilities	\$ 51,013	\$ 50,193

DEFERRED GAS COSTS – NET – Over/under collections of gas costs are monitored through SJG's Basic Gas Supply Service Clause (BGSS) mechanism. Net undercollected gas costs are classified as a regulatory asset and net overcollected gas costs are classified as a regulatory liability. Derivative contracts used to hedge natural gas purchases are also included in the BGSS, subject to BPU approval. The BGSS increased from a \$6.5 million regulatory asset at December 31, 2009 to a \$7.6 million regulatory asset at September 30, 2010 primarily due to a change of \$11.8 million in the fair value of energy related derivatives, partially offset by gas costs recovered from customers exceeding the actual cost of the commodity incurred during the first nine months of 2010 as a result of natural gas prices remaining at very low levels.

9. PENSION AND OTHER POSTRETIREMENT BENEFITS:

For the three and nine months ended September 30, 2010 and 2009, net periodic benefit cost related to the employee and officer pension and other postretirement benefit plans consisted of the following components (in thousands):

	Pension Benefits			
	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Service Cost	\$ 856	\$ 806	\$ 2,569	\$ 2,419
Interest Cost	2,299	2,174	6,898	6,521
Expected Return on Plan Assets	(2,100)	(1,888)	(6,301)	(5,665)
Amortizations:				
Prior Service Cost	70	70	210	209
Actuarial Loss	1,188	1,351	3,563	4,053
Net Periodic Benefit Cost	2,313	2,513	6,939	7,537
Capitalized Benefit Costs	(878)	(949)	(2,632)	(2,848)
Total Net Periodic Benefit Expense	\$ 1,435	\$ 1,564	\$ 4,307	\$ 4,689

Table of Contents

	Other Postretirement Benefits			
	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Service Cost	\$ 230	\$ 223	\$ 690	\$ 670
Interest Cost	816	802	2,450	2,406
Expected Return on Plan Assets	(484)	(388)	(1,453)	(1,164)
Amortizations:				
Prior Service Credits	(89)	(89)	(266)	(266)
Actuarial Loss	374	503	1,121	1,422
Net Periodic Benefit Cost	847	1,051	2,542	3,068
Capitalized Benefit Costs	(330)	(480)	(989)	(1,257)
Total Net Periodic Benefit Expense	\$ 517	\$ 571	\$ 1,553	\$ 1,811

Capitalized benefit costs reflected in the table above relate to SJG's construction program.

During May 2010 and 2009, SJI contributed \$8.0 million and \$10.4 million to its pension plans, respectively. No additional contributions are anticipated for the remainder of the year.

See Note 11 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K as of December 31, 2009, for additional information related to SJI's pension and other postretirement benefits.

10. UNUSED LINES OF CREDIT:

Credit facilities and available liquidity as of September 30, 2010 were as follows (in thousands):

Company	Total Facility	Usage	Available Liquidity	Expiration Date
---------	----------------	-------	---------------------	-----------------

SJG:

Revolving Credit Facility	\$ 100,000	\$ 88,500	\$ 11,500	August 2011
Line of Credit	40,000	—	40,000	August 2011
Uncommitted Bank Lines	40,000	16,800	23,200	Various
Total SJG	180,000	105,300	74,700	

SJI:

Revolving Credit Facility	\$ 200,000	\$ 179,125	\$ 20,875	August 2011 (A)
Uncommitted Bank Lines	70,000	35,600	34,400	Various
Total SJI	270,000	214,725	55,275	
Total	\$ 450,000	\$ 320,025	\$ 129,975	

(A) Includes letters of credit outstanding in the amount of \$95.8 million.

The SJG facilities are restricted as to use and availability specifically to SJG; however, if necessary the SJI facilities can also be used to support SJG's liquidity needs. All committed facilities contain one financial covenant regarding the ratio of total debt to total capitalization, measured on a quarterly basis. SJI and SJG were in compliance with this covenant as of September 30, 2010. Borrowings under these credit facilities are at market rates. The weighted average borrowing cost, which changes daily, was 0.79% and 0.70% at September 30, 2010 and 2009, respectively.

11. COMMITMENTS AND CONTINGENCIES:

GUARANTEES — The Company has recorded a liability of \$2.9 million which is included in Other Current Liabilities and Other Noncurrent Liabilities with a corresponding increase in Investment in Affiliates on the condensed consolidated balance sheets as of September 30, 2010 for the fair value of the following guarantees:

Table of Contents

In April 2007, SJI guaranteed certain obligations of LVE Energy Partners, LLC (LVE), an unconsolidated joint venture in which Marina has a 50% equity interest. LVE entered into a 25-year contract with a resort developer to design, build, own and operate a district energy system and central energy center for a planned resort in Las Vegas, Nevada. LVE began construction of the facility in 2007 and expected to provide full energy services in 2010 when the resort was originally scheduled to be completed. LVE suspended construction of the district energy system and central energy center in January 2009 after the resort developer's August 2008 announcement that it was delaying the completion of construction of the resort due to the difficult environment in the capital markets and weak economic conditions. The resort developer had indicated that it was considering different strategies to move its project forward, including opening its project in phases and obtaining a partner, but that it was unlikely construction would resume during 2009. In October 2010, the resort developer announced that they do not expect to resume construction on the project for three to five years. They stated that they remain committed to having a significant presence on the Las Vegas Strip as part of a long-term growth strategy and continue to view this site as a major strategic asset.

The district energy system and central energy center are being financed by LVE with debt that is non-recourse to SJI. The outstanding balance of LVE's bank debt is approximately \$218.1 million as of September 30, 2010. In September 2009, LVE reached an agreement with the banks that are financing the energy facilities to address defaults under the financing agreements. These LVE defaults were caused by the resort developer's construction delay and the termination of an energy services agreement by a hotel operator associated with the project. As a result of these defaults, the banks had previously stopped funding the project. The terms of the new agreement require SJI and its partner in this joint venture to guaranty the payment of future interest costs by LVE through, at the latest, December 2010. SJI and its partner in this joint venture have each provided the banks with a \$2.0 million irrevocable letter of credit from a bank to support this guaranty. The maximum amount of remaining LVE interest costs to be paid by SJI under this guaranty if payments are required, and SJI was the only guarantor, would be approximately \$1.9 million. In addition, SJI and its partner in this joint venture each committed to provide approximately \$8.9 million of additional capital as of September 2009 to cover costs related to the termination of the energy services agreement by a hotel operator and interest costs incurred since August 2008 when the resort developer suspended construction. Of this amount, \$6.7 million was in the form of an irrevocable letter of credit from a bank and the remaining \$2.2 million was provided in cash in 2009. These funds are in addition to the \$30.4 million capital contribution obligation discussed below. In turn, the banks waived all existing defaults under the financing agreements and were relieved of their commitment to provide additional funding. As a result of the construction delay, the district energy system and central energy center will not be completed by the fourth quarter of 2010 as originally expected and, consequently, the full amount of LVE's debt could become due and payable in December 2010. LVE is currently in discussions with the resort developer and the banks that are financing the energy facilities to address the issues raised by the delay. LVE intends to seek additional financing to complete the facility once construction of the resort resumes. The Energy Sales Agreement between LVE and the resort developer includes a payment obligation by the resort developer to pay certain fees to LVE beginning in the fourth quarter of 2010. A portion of this payment obligation is guaranteed by the parent of the resort developer. However, although the resort developer has acknowledged the obligation to pay certain annual fees beginning in the fourth quarter of 2010, the resort developer has indicated that they do not believe they are obligated to make a cash payment of these fees for approximately the next 12 months. LVE and the resort developer are currently working to address issues related to these payments. As of September 30, 2010, the Company had a net liability of approximately \$13.3 million included in Other Current Liabilities and Other Noncurrent Liabilities on the condensed consolidated balance sheets related to this project, in addition to unsecured Notes Receivable – Affiliate of approximately \$20.1 million due from LVE. As of September 30, 2010, SJI's capital at risk is limited to its equity contributions, contribution obligations and the unsecured notes receivable totaling approximately \$59.7 million. During the first nine months of 2010, SJI and its partner in this joint venture each provided support to LVE of approximately \$5.8 million to cover project related costs.

As a result of the construction delay, management has evaluated the investment in LVE and concluded that the fair value of this investment continues to be in excess of the carrying value as of September 30, 2010.

SJI issued a performance guaranty for up to \$180.0 million to the resort developer to ensure that certain construction milestones relating to the development of the thermal facility are met. As a result of achieving certain milestones, the guaranty was reduced to \$94.0 million as of September 30, 2010. Concurrently, SJI is the beneficiary of a surety bond purchased by the project's general contractor that provides security to SJI in the event of missed construction milestones. LVE has proposed a revised milestone schedule due to delays announced by the resort developer. In addition, SJI has guaranteed the obligations of LVE under certain insurance policies during the construction period. The maximum amount that SJI could be obligated for, in the event that LVE does not have sufficient resources to make deductible payments on future claims under these insurance policies, is approximately \$6.0 million. SJI has also guaranteed certain performance obligations of LVE under the operating agreements between LVE and the resort developer, up to \$20.0 million each year for the term of the agreement, commencing with the first year of operations. SJI and its partner in this joint venture have entered into reimbursement agreements that secure reimbursement for SJI of a proportionate share of any payments made by SJI on these guarantees.

Table of Contents

SJI has guaranteed certain obligations of BC Landfill Energy, LLC (BCLE) and WC Landfill Energy, LLC (WCLE), unconsolidated joint ventures in which Marina has a 50% equity interest. BCLE and WCLE have entered into agreements ranging from 15-20 years with the respective county governments to lease and operate facilities that will produce electricity from landfill methane gas. Although unlikely, the maximum amount that SJI could be obligated for, in the event that BCLE and WCLE do not meet minimum specified levels of operating performance and no mitigating action is taken, or are unable to meet certain financial obligations as they become due, is approximately \$4.2 million each year. SJI and its partner in these joint ventures have entered into reimbursement agreements that secure reimbursement for SJI of a proportionate share of any payments made by SJI on these guarantees. SJI holds variable interests in BCLE and WCLE but is not the primary beneficiary.

SJI has guaranteed the long-term debt obligations of AC Landfill Energy, LLC (ACLE), an unconsolidated joint venture in which Marina has a 50% equity interest. ACLE has entered into a long-term agreement with a county government to lease and operate a facility that will produce electricity from landfill methane gas. Although unlikely, the maximum amount that SJI could be obligated for, in the event that ACLE is unable to meet certain financial obligations as they become due, is approximately \$1.5 million. SJI and its partner in this joint venture have entered into a reimbursement agreement that secures reimbursement for SJI of a proportionate share of any payments made by SJI on this guarantee. SJI holds a variable interest in ACLE but is not the primary beneficiary.

As of September 30, 2010, SJI had issued approximately \$5.0 million of parental guarantees on behalf of an unconsolidated subsidiary. These guarantees generally expire within the next two years and were issued to enable our subsidiary to market retail natural gas.

CAPITAL CONTRIBUTION OBLIGATION - In December 2007, Marina and its joint venture partner agreed to each contribute approximately \$30.4 million of equity to LVE as part of its construction period financing. In September 2009, Marina and its joint venture partner agreed to each contribute an additional \$6.7 million of equity to LVE as discussed above. These equity contributions are expected to be made within the next twelve months, and are secured by irrevocable letters of credit from a bank.

COLLECTIVE BARGAINING AGREEMENTS — Unionized personnel represent approximately 54% of our workforce at September 30, 2010. The Company has collective bargaining agreements with two unions that represent these employees: the International Brotherhood of Electrical Workers (“IBEW”) Local 1293 and the International Association of Machinists and Aerospace Workers (“IAM”) Local 76. SJG and SJESP employees represented by the IBEW operate under a collective bargaining agreement that runs through February 2013. The remaining unionized employees represented by the IAM operate under a collective bargaining agreement that expires in August 2014.

STANDBY LETTERS OF CREDIT — As of September 30, 2010, SJI provided \$95.8 million of standby letters of credit through SJI’s revolving credit facility and uncommitted bank lines. Letters of credit in the amount of \$62.3 million support variable-rate demand bonds issued through the New Jersey Economic Development Authority (NJEDA) to finance Marina’s initial thermal plant project and \$8.7 million was posted to support SJI’s guaranty of LVE discussed above. The additional outstanding letters of credit total \$24.8 million, and were posted to enable SJE to market retail electricity and for various construction activities. The Company also provided two additional letters of credit under separate facilities outside of the revolving credit facility. Those letters of credit consist of a \$25.2 million letter of credit provided by SJG to support variable-rate demand bonds issued through the NJEDA to finance the expansion of SJG’s natural gas distribution system; and a \$30.7 million letter of credit provided by Marina to support a capital contribution obligation as discussed above. These letters of credit expire in August 2011 and January 2011, respectively.

ENVIRONMENTAL REMEDIATION COSTS — SJI incurred and recorded costs for environmental cleanup of 12 sites where SJG or its predecessors operated gas manufacturing plants. SJG stopped manufacturing gas in the 1950s. SJI

and some of its nonutility subsidiaries also accrued costs for environmental cleanup of sites where SJF previously operated a fuel oil business and Morie maintained equipment, fueling stations and storage. There have been no changes to the status of the Company's environmental remediation efforts since December 31, 2009 as described in Note 14 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K as of December 31, 2009.

12. **DERIVATIVE INSTRUMENTS:**

Certain SJI subsidiaries are involved in buying, selling, transporting and storing natural gas and buying and selling retail electricity for their own accounts as well as managing these activities for third parties. These subsidiaries are subject to market risk on expected future purchases and sales due to commodity price fluctuations. As of September 30, 2010, the Company had outstanding derivative contracts intended to limit the exposure to market risk on 25.8 MMdts of expected future purchases of natural gas, 21.6 MMdts of expected future sales of natural gas, 2.5 MMmwh of expected future purchases of electricity and 0.1 MMmwh of expected future sales of electricity. These derivative instruments include forward contracts, futures contracts, swap agreements and options contracts.

Table of Contents

The Company has also entered into interest rate derivatives to hedge exposure to increasing interest rates and the impact of those rates on cash flows of variable-rate debt. There have been no significant changes to the Company's active interest rate swaps since December 31, 2009 which are described in Note 1 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K as of December 31, 2009.

The fair values of all derivative instruments, as reflected in the condensed consolidated balance sheets as of September 30, 2010 and December 31, 2009, are as follows (in thousands):

Derivatives not designated as hedging instruments under GAAP	September 30, 2010		December 31, 2009	
	Assets	Liabilities	Assets	Liabilities
Energy related commodity contracts:				
Derivatives – Energy Related – Current	\$ 40,374	\$ 54,194	\$ 36,512	\$ 28,260
Derivatives – Energy Related – Non-Current	11,302	13,389	11,585	10,931
Interest rate contracts:				
Derivatives - Other	—	8,738	—	3,704
Total derivatives not designated as hedging instruments under GAAP	51,676	76,321	48,097	42,895
Derivatives designated as hedging instruments under GAAP				
Interest rate contracts:				
Derivatives - Other	—	3,315	—	2,119
Total derivatives designated as hedging instruments under GAAP	—	3,315	—	2,119
Total Derivatives	\$ 51,676	\$ 79,636	\$ 48,097	\$ 45,014

The effect of derivative instruments on the condensed consolidated statements of income for the three and nine months ended September 30, 2010, and 2009 are as follows (in thousands):

Derivatives in Cash Flow Hedging Relationships	Three months ended		Nine months ended	
	September 30, 2010	September 30, 2009	September 30, 2010	September 30, 2009
Interest Rate Contracts:				
(Losses) gains recognized in OCI on effective portion	\$ (391)	\$ (390)	\$ (705)	\$ 514
Losses reclassified from accumulated OCI into income (a)	\$ (237)	\$ (192)	\$ (705)	\$ (548)
Gains or (losses) recognized in income on ineffective portion (a)	—	—	—	—

(a) Included in Interest Charges

Derivatives Not Designated as Hedging Instruments under GAAP	Three months ended		Nine months ended	
	September 30, 2010	September 30, 2009	September 30, 2010	September 30, 2009

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-Q

Gains (losses) on energy related commodity contracts (a)	\$	(1,173)	\$	1,541	\$	(19,090)	\$	(12,019)
(Losses) gains on interest rate contracts (b)		(412)		(300)		(1,250)		855
Total	\$	(1,585)	\$	1,241	\$	(20,340)	\$	(11,164)

(a) Included in Operating Revenues - Non Utility

(b) Included in Interest Charges

Net realized losses associated with SJG's energy related financial commodity contracts of \$5.5 million and \$12.5 million for the three months ended September 30, 2010 and 2009, respectively, and \$17.8 million and \$45.2 million for the nine months ended September 30, 2010 and 2009, respectively, are not included in the above table. As of September 30, 2010 and December 31, 2009, SJG had \$21.0 million and \$9.2 million of unrealized losses on energy related financial commodity contracts, respectively, included in its BGSS related to open financial contracts, which are also not included in the above table. These contracts are part of SJG's regulated risk management activities that serve to mitigate BGSS costs passed on to its customers. As these transactions are entered into pursuant to, and recoverable through, regulatory riders, any changes in the value of SJG's energy related financial commodity contracts are deferred in Regulatory Assets or Liabilities and there is no impact to earnings.

Table of Contents

Certain of the Company's derivative instruments contain provisions that require immediate payment or demand immediate and ongoing collateralization on derivative instruments in net liability positions in the event of a material adverse change in the credit standing of the Company. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position on September 30, 2010, is \$37.7 million. If the credit-risk-related contingent features underlying these agreements were triggered on September 30, 2010, the Company would have been required to settle the instruments immediately or post collateral to its counterparties of approximately \$27.1 million after offsetting asset positions with the same counterparties under master netting arrangements.

13. FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES:

GAAP establishes a hierarchy that prioritizes fair value measurements based on the types of inputs used for the various valuation techniques. The levels of the hierarchy are described below:

Level 1: Observable inputs such as quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; these include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs that reflect the reporting entity's own assumptions.

Assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of financial assets and financial liabilities and their placement within the fair value hierarchy.

For financial assets and financial liabilities measured at fair value on a recurring basis, information about the fair value measurements for each major category as of September 30, 2010 is as follows (in thousands):

	Total	Level 1	Level 2	Level 3
Assets				
Available-for-Sale Securities (A)	\$ 6,297	\$ 6,297	\$ —	\$ —
Derivatives – Energy Related Assets (B)	51,676	32,068	17,512	2,096
	\$ 57,973	\$ 38,365	\$ 17,512	\$ 2,096
Liabilities				
Derivatives – Energy Related Liabilities (B)	\$ 67,583	\$ 30,892	\$ 14,355	\$ 22,336
Derivatives – Other (C)	12,053	—	12,053	—
	\$ 79,636	\$ 30,892	\$ 26,408	\$ 22,336

(A) Available-for-Sale Securities are valued using the quoted principal market close prices that are provided by the trustees of these securities.

(B) Derivatives – Energy Related Assets and Liabilities are traded in both exchange-based and non-exchange-based markets. Exchange-based contracts are valued using unadjusted quoted market sources in active markets and are categorized in Level 1 in the fair value hierarchy. Certain non-exchange-based contracts are valued using indicative price quotations available through brokers or over-the-counter, on-line exchanges and are categorized in Level 2. These price quotations reflect the average of the bid-ask mid-point prices and are obtained from sources that management believes provide the most liquid market. For non-exchange-based derivatives that trade in less liquid markets with limited pricing information, model inputs generally would include both observable and unobservable

inputs. In instances where observable data is unavailable, management considers the assumptions that market participants would use in valuing the asset or liability. This includes assumptions about market risks such as liquidity, volatility and contract duration. Such instruments are categorized in Level 3 as the model inputs generally are not observable. Management reviews and corroborates the price quotations to ensure the prices are observable which includes consideration of actual transaction volumes, market delivery points, bid-ask spreads and contract duration.

(C) Derivatives – Other are valued using quoted prices on commonly quoted intervals, which are interpolated for periods different than the quoted intervals, as inputs to a market valuation model. Market inputs can generally be verified and model selection does not involve significant management judgment.

Table of Contents

The changes in fair value measurements of Derivatives – Energy Related Assets and Liabilities for the three and nine months ended September 30, 2010, using significant unobservable inputs (Level 3), are as follows (in thousands):

	Three Months	Nine Months
Balance at beginning of period	\$ (11,395)	\$ (10,299)
Total gains and losses (realized/unrealized) included in earnings	(10,798)	(16,229)
Transfers in and/or out of Level 3, net	-	-
Settlements	1,953	6,288
Balance at September 30, 2010	\$ (20,240)	\$ (20,240)

Total losses for 2010 included in earnings that are attributable to the change in unrealized losses relating to those assets and liabilities still held as of September 30, 2010, is \$16.2 million. These losses are included in Operating Revenues-Nonutility on the condensed consolidated statements of income.

14. AVAILABLE-FOR-SALE SECURITIES:

The Company's portfolio of investments consists of five highly diversified funds which are not used for working capital purposes. These funds are in an unrealized loss position as of September 30, 2010. Due to the nature of the underlying securities, these funds as a whole are susceptible to changes in the economy and have been adversely affected by the economic slowdown, particularly during the fourth quarter of 2008 when certain investments became impaired. The Company has evaluated the near-term prospects of the overall funds in relation to the severity and duration of the impairment. Based on that evaluation, the Company recorded an insignificant impairment loss during the fourth quarter of 2008. The Company does not intend to sell the remaining funds, and it is more likely than not that it will not have to sell the remaining funds before recovery of its' cost basis. The Company does not consider these remaining investments to be other-than-temporarily impaired at September 30, 2010.

The following table shows the gross unrealized losses and fair value of the Company's Available-for-Sale Securities with unrealized losses that are not deemed to be other-than-temporarily impaired (in thousands), aggregated by length of time that the individual funds have been in a continuous unrealized loss position at September 30, 2010.

	Less than 12 Months		Greater Than 12 Months		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Marketable Equity Securities	\$ -	\$ -	\$ 3,086	\$ 482	\$ 3,086	\$ 482

As of September 30, 2010 and December 31, 2009, the total losses for securities with net losses included in Accumulated Other Comprehensive Loss was \$0.3 million. As of September 30, 2010 and December 31, 2009, securities with net gains included in Accumulated Other Comprehensive Loss was \$0.3 million and \$0.1 million, respectively.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements and Risk Factors — Certain statements contained in this Quarterly Report may qualify as “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical fact included in this Report should

be considered forward-looking statements made in good faith and are intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. Words such as “anticipate”, “believe”, “expect”, “estimate”, “forecast”, “goal”, “intend”, “objective”, “plan”, “project”, “seek”, “strategy” and similar expressions identify forward-looking statements. Such forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied in the statements. These risks and uncertainties include, but are not limited to, the following: general economic conditions on an international, national, state and local level; weather conditions in our marketing areas; changes in commodity costs; changes in the availability of natural gas; “non-routine” or “extraordinary” disruptions in our distribution system; regulatory, legislative and court decisions; competition; the availability and cost of capital; costs and effects of legal proceedings and environmental liabilities; the failure of customers, suppliers or business partners to fulfill their contractual obligations; and changes in business strategies.

Table of Contents

A discussion of these and other risks and uncertainties may be found in the Company's Annual Report on Form 10-K for the year ended December 31, 2009 and in other filings made by us with the Securities and Exchange Commission. These cautionary statements should not be construed by you to be exhaustive and they are made only as of the date of this Quarterly Report on Form 10-Q, or in any document incorporated by reference, at the date of such document. While SJI believes these forward-looking statements to be reasonable, there can be no assurance that they will approximate actual experience or that the expectations derived from them will be realized. Further, SJI undertakes no obligation to update or revise any of its forward-looking statements, whether as a result of new information, future events or otherwise.

Critical Accounting Policies — Estimates and Assumptions — Management must make estimates and assumptions that affect the amounts reported in the condensed consolidated financial statements and related disclosures. Actual results could differ from those estimates. Five types of transactions presented in our condensed consolidated financial statements require a significant amount of judgment and estimation. These relate to regulatory accounting, derivatives, environmental remediation costs, pension and other postretirement employee benefit costs, and revenue recognition. A discussion of these estimates and assumptions may be found in our Form 10-K for the year ended December 31, 2009.

New Accounting Pronouncements — See detailed discussions concerning New Accounting Pronouncements and their impact on SJI in Note 1 to the condensed consolidated financial statements.

Regulatory Actions —Other than the changes discussed in Note 7 to the condensed consolidated financial statements, there have been no significant regulatory actions since December 31, 2009. See detailed discussion concerning Regulatory Actions in Note 9 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K as of December 31, 2009.

Environmental Remediation —There have been no significant changes to the status of the Company's environmental remediation efforts since December 31, 2009. See detailed discussion concerning Environmental Remediation in Note 14 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K as of December 31, 2009.

RESULTS OF OPERATIONS:

SJI operates in several different reportable operating segments. Gas Utility Operations (SJG) consists primarily of natural gas distribution to residential, commercial and industrial customers. Wholesale Gas Operations include SJRG's activities. SJE is involved in both retail gas and retail electric activities. Retail Gas and Other Operations include natural gas acquisition and transportation service business lines. Retail Electric Operations consist of electricity acquisition and transportation to commercial and industrial customers. On-Site Energy Production consists of Marina's thermal energy facility and other energy-related projects. Appliance Service Operations includes SJESP's servicing of appliances via the sale of appliance service programs as well as on a time and materials basis, and the installation of residential and small commercial HVAC systems.

A significant portion of the volatility in operating results is due to the impact of the accounting methods associated with SJRG's storage activities. SJRG purchases and holds natural gas in storage to earn a profit margin from its ultimate sale in the future. SJRG uses derivatives to mitigate commodity price risk in order to substantially lock-in the profit margin that will ultimately be realized. However, gas stored in inventory is accounted for at the lower of average cost or market; the derivatives used to reduce the risk associated with a change in the value of the inventory are accounted for at fair value, with changes in fair value recorded in operating results in the period of change. As a result, earnings are subject to volatility as the market prices of derivatives change, even when the underlying hedged value of the inventory is unchanged. This volatility can be significant from period to period. Over time, gains or losses on the sale of gas in storage will generally be offset by losses or gains on the derivatives, resulting in the realization of the profit margin expected when the transactions were initiated.

Net Income attributable to SJI for the three months ended September 30, 2010 increased \$3.2 million, or 169.8% to \$1.3 million compared to the three months ended September 30, 2009 primarily as a result of the following:

- The income contribution from SJE for the three months ended September 30, 2010 decreased \$4.2 million to a net loss of \$4.7 million due primarily to the change in unrealized gains and losses on derivatives used to mitigate price risk on electric as discussed under Operating Revenues – Nonutility below.
- The income contribution from SJRG for the three months ended September 30, 2010 increased \$3.3 million to \$2.9 million due primarily to the change in unrealized gains and losses on derivatives used by SJRG to mitigate natural gas commodity price risk, as discussed above.
- The increase in the income tax benefit of \$3.6 million during the three months ended September 30, 2010 compared to the three months ended September 30, 2009 due to the impact of the investment tax credit available on renewable energy facilities at Marina.

Table of Contents

Net Income attributable to SJI for the nine months ended September 30, 2010 increased \$6.6 million, or 18.9% to \$41.3 million compared to the nine months ended September 30, 2009 primarily as a result of the following:

- The income contribution from SJE for the nine months ended September 30, 2010 increased \$3.6 million to a net loss of \$2.6 million due primarily to the change in unrealized gains and losses on derivatives used to mitigate price risk on electric as discussed under Operating Revenues – Nonutility below.
- The income contribution from SJRG for the nine months ended September 30, 2010 decreased \$1.3 million to \$9.5 million due primarily to the change in unrealized gains and losses on derivatives used by SJRG to mitigate natural gas commodity price risk, as discussed above.
- The decrease in the effective tax rate in the nine months ended September 30, 2010 compared to the nine months ended September 30, 2009 due to the impact of the investment tax credit available on renewable energy facilities at Marina, which results in a \$5.6 million decrease in income taxes.

These changes are also discussed in more detail below.

The following tables summarize the composition of selected SJG data for the three and nine months ended September 30 (in thousands, except for degree day data):

	Three Months Ended		Nine Months Ended	
	2010	2009	2010	2009

*Represents expenses for which there is a corresponding credit in operating revenues. Therefore, such recoveries have no impact on our financial results.

Table of Contents

Throughput - Total gas throughput increased 3.3 MMdts, or 17.9%, for the three months ended September 30, 2010, compared to the same period in 2009. Total gas throughput increased 6.1 MMdts, or 8.6%, for the nine months ended September 30, 2010, compared with the same period in 2009. The majority of the increase is attributable to higher capacity release, which increased by 1.8 MMdts and 3.7 MMdts during the three and nine months ended September 30, 2010, respectively, as reflected in the table above. Higher capacity release throughput was the result of increased capacity made available during 2010 when the weather was 8.3% warmer than 2009. In addition, cogeneration and electric generation sales and transportation throughput increased on a year-to-date basis. As the summer of 2010 was one of the hottest on record, higher electric consumption for air conditioning drove the demand for greater natural gas consumption by the region's electric utility. In the cogeneration market, a significant increase in transportation throughput was realized as a single customer increased its contract significantly to shift supply from its pipeline supplier to SJG.

Conservation Incentive Program (CIP) - Utility - The effects of the CIP on SJG's net income for the three and nine months ended September 30, 2010 and 2009 and the associated weather comparisons were as follows (\$'s in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Net Income Benefit:				
CIP – Weather Related	\$ -	\$ -	\$ 2.3	\$ (0.1)
CIP – Usage Related	0.4	(0.2)	6.8	6.3
Total Net Income Benefit	\$ 0.4	\$ (0.2)	\$ 9.1	\$ 6.2
Weather Compared to 20-Year Average	93.8% warmer	30.5% warmer	8.1% warmer	0.2% colder
Weather Compared to Prior Year	91.2% warmer	85.3% colder	8.3% warmer	10.2% colder

Operating Revenues - Utility - SJG's revenues increased \$0.9 million during the three months ended September 30, 2010 compared with the same period in the prior year. While firm sales revenue to residential and commercial markets decreased substantially during the third quarter of 2010 versus the third quarter of 2009, higher electric generation and Off-System Sales (OSS) more than offset this decrease. The residential and commercial sales revenue decrease was primarily the result of a lower Basic Gas Supply Service (BGSS) rate in effect during 2010 and lower sales volume as reflected in the "Throughput" table above. The BGSS rate had been reduced 21% in October 2009 to address lower natural gas costs experienced in 2009 and forecasted through 2010. While changes in gas costs and BGSS recoveries may fluctuate from period to period, SJG does not profit from the sale of the commodity. Therefore, corresponding fluctuations in Operating Revenue or Cost of Sales have no impact on Company profitability, as further discussed under "Margin." The impact of the BGSS on revenue was offset by a \$2.6 million increase in OSS during the third quarter of 2010 versus the third quarter of 2009, before eliminating intercompany transactions, as both sales volume and unit sales prices increased during the quarter. As reflected in the Margin table above, the impact of the higher OSS did not have a material impact on the earnings of the Company, as SJG is required to share 85% of the profits of such activity with the ratepayers. As discussed under "Throughput" above, electric generation sales also rose due to the extremely hot weather and contributed an additional \$3.2 million to revenue over the third quarter of 2009.

SJG's revenues decreased \$46.4 million during the nine months ended September 30, 2010 compared with the same period in the prior year. Firm revenues decreased \$43.8 million, or 13.1%, before eliminating intercompany transactions, primarily as a result of a lower BGSS rate in effect during 2010. As discussed above, such changes in gas costs and BGSS recoveries have no impact on Company profitability. There was also a \$3.1 million decrease in OSS, before eliminating intercompany transactions, during the first nine months of 2010 versus 2009. This decrease was

primarily related to a reduction in SJG's portfolio of assets available for such activities under the provisions of the CIP, as discussed under "Rates and Regulation" in Item 7 of SJG's Form 10-K for the year ended December 31, 2009. As reflected in the Margin table above, the impact of lower OSS did not have a material impact on the earnings of the Company, as SJG is required to share 85% of the profits of such activity with the ratepayers.

Operating Revenues — Nonutility - Combined revenues for SJI's nonutility businesses, net of intercompany transactions, increased by \$32.7 million and \$64.3 million, or 46.0% and 24.4%, in the three and nine months ended September 30, 2010, respectively, compared with the same periods in 2009.

SJE's revenues from retail gas, net of intercompany transactions, increased by \$3.6 million and \$3.4 million, or 17.7% and 4.2%, for the three and nine months ended September 30, 2010, respectively, compared with the same periods in 2009 due mainly to an increase in sales volumes due to commercial and large volume customer acquisitions and a 29.2% and 17.8% increase in the average monthly NYMEX settle price for the comparative periods. As of September 30, SJE was serving the following number of retail gas customers:

	2010	2009
Residential	7,649	9,184
Commercial & Large Volume	970	928

Table of Contents

Sales volumes for the comparative periods were as follows (in decatherms):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Residential	42,057	52,688	473,792	597,181
Commercial & Large Volume	3,986,300	3,548,570	12,920,992	11,338,360

SJE's revenues from retail electricity, net of intercompany transactions, increased \$9.0 million and \$64.5 million, or 27.3% and 101.9%, for the three and nine months ended September 30, 2010, respectively, compared with the same periods in 2009. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts due to price volatility of \$8.0 million and \$(3.2) million, revenues increased \$17.0 million and \$61.3 million, or 50.4% and 81.0% for the three and nine months ended September 30, 2010, respectively, compared with the same periods in 2009. A summary of SJE's revenues from retail electricity is as follows (in millions):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	2009	Change	2010	2009	Change
SJE Retail Electric Revenue	\$ 42.1	\$ 33.1	\$ 9.0	\$ 127.8	\$ 63.3	\$ 64.5
Add: Unrealized Losses (Subtract: Unrealized Gains)	8.9	0.9	8.0	9.3	12.5	(3.2)
SJE Retail Electric Revenue, Excluding Unrealized Losses (Gains)	\$ 51.0	\$ 34.0	\$ 17.0	\$ 137.1	\$ 75.8	\$ 61.3

This increase was mainly due to the impact of SJE being the successful bidder on a contract to supply retail electricity to over 400 school districts located throughout the state of New Jersey that began in late April 2009. SJE uses forward financial contracts to mitigate commodity price risk on fixed price electric contracts. In accordance with GAAP, the forward financial contracts are recorded at fair value, with changes in fair value recorded in earnings in the period of change. The related customer contracts are not considered derivatives and therefore are not recorded in earnings until the electric is delivered. As a result, earnings are subject to volatility as the market price of the forward financial contracts change, even when the underlying hedged value of the customer contract is unchanged. Over time, gains or losses on the sale of the fixed price electric under contract will be offset by losses or gains on the forward financial contracts, resulting in the realization of the profit margin expected when the transactions were initiated. Excluding the school bid, essentially all of SJE's retail electric customer contracts are market-priced.

SJRG's revenues, net of intercompany transactions, increased \$17.4 million and decreased \$6.9 million, for the three and nine months ended September 30, 2010, respectively, compared with the same periods in 2009. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts of \$(5.0) million and \$10.6 million, respectively, due to price volatility, SJRG's revenues increased \$12.4 million and \$3.7 million for the three and nine months ended September 30, 2010, respectively. A summary of SJRG's revenue for the three and nine months ended September 30 is as follows (in millions):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	2009	Change	2010	2009	Change
SJRG Revenue	\$ 21.7	\$ 4.3	\$ 17.4	\$ 71.2	\$ 78.1	\$ (6.9)
	(7.4)	(2.4)	(5.0)	10.0	(0.6)	10.6

Add: Unrealized Losses
 (Subtract: Unrealized Gains)

SJRG Revenue, Excluding Unrealized Losses (Gains)	\$	14.3	\$	1.9	\$	12.4	\$	81.2	\$	77.5	\$	3.7
--	----	------	----	-----	----	------	----	------	----	------	----	-----

The increase in revenue was driven by an increase in storage volumes sold of 29.1% and 26.4% for the three and nine months ended September 30, 2010, respectively, compared to the same periods in 2009. As discussed in Note 1 to the Consolidated Financial Statements in Item 8 of SJI's Report on Form 10-K as of December 31, 2009, revenues and expenses related to the energy trading activities of SJRG are presented on a net basis in Operating Revenues – Nonutility.

Table of Contents

Revenues for Marina increased \$1.5 million and \$1.3 million, or 15.5% and 4.6%, for the three and nine months ended September 30, 2010, respectively compared with the same periods in the prior year. Revenues increased as a result of two new projects that came on line in the latter stages of 2009 and higher chilled water demand at The Borgata, driven by improved occupancy rates and significantly warmer temperatures in 2010 compared with 2009. The impact of these factors was offset by the deconsolidation of ACLE and WCLE as discussed in Note 1 to the condensed consolidated financial statements.

Revenues for SJESP increased \$1.1 million and \$1.2 million, or 28.6% and 9.1%, in the three and nine months ended September 30, 2010, respectively, compared with the same periods in 2009 due mainly to additional installation jobs fueled by the availability of state stimulus incentives which was partially offset by revenues from a large commercial installation job recorded in 2009.

Margin – Utility — SJG’s margin is defined as natural gas revenues less natural gas costs; volumetric and revenue based energy taxes; and regulatory rider expenses. SJG believes that margin provides a more meaningful basis for evaluating utility operations than revenues since natural gas costs, regulatory rider expenses and related energy taxes are passed through to customers, and therefore, they have no effect on margin. Natural gas costs are charged to operating expenses on the basis of therm sales at the prices approved by the New Jersey Board of Public Utilities through SJG’s BGSS tariff.

Total margin increased \$3.1 million, or 14.8%, for the three months ended September 30, 2010, compared with the same period in 2009 due to customer additions and profits earned through the Company’s Capital Investment Recovery Tracker (CIRT). The CIRT was approved by the BPU in April 2009 and allows the Company to accelerate certain capital spending and also earn a return of, and a return on, investment at the time the investment is made. The CIRT added \$2.5 million of pre-tax margin in the third quarter of 2010, compared with \$0.6 million in the same period of 2009.

Total margin increased \$8.2 million, or 6.8% for the nine months ended September 30, 2010 compared with the same period in 2009 primarily due to customer additions and profits earned through the Company’s CIRT, as noted above. The CIRT added \$7.1 million of pre-tax margin in the first nine months of 2010, compared with \$0.9 million in the same period last year. Partially offsetting these increases were lower margins from OSS and capacity release, primarily in the first quarter of 2010.

The CIP protected \$15.4 million of pre-tax margin in the nine months of 2010 that would have been lost due to lower customer usage, compared with \$10.5 million in the same period last year. Of these amounts, \$3.9 million and \$(0.2) million were related to weather variations and \$11.5 million and \$10.7 million were related to other customer usage variations in 2010 and 2009, respectively.

Gross Margin — Nonutility — Gross margin for the nonutility businesses is defined as revenue less all costs that are directly related to the production, selling and delivery of the company’s products and services. These costs primarily include natural gas and electric commodity costs as well as certain payroll and related benefits. On the statements of condensed consolidated income, revenue is reflected in Operating Revenues - Nonutility and the costs are reflected in Cost of Sales - Nonutility. As discussed in Note 1 to the Consolidated Financial Statements in Item 8 of SJI’s Annual Report on Form 10-K as of December 31, 2009, revenues and expenses related to the energy trading activities of SJRG are presented on a net basis in Operating Revenues - Nonutility.

For the three and nine months ended September 30, 2010, combined gross margins for the nonutility businesses, net of intercompany transactions, increased \$0.2 million and \$3.7 million to \$7.5 million and \$39.5 million, respectively, compared with the same periods in 2009. This increase is primarily due to the following:

Gross margin for SJRG increased \$6.0 million and decreased \$1.5 million for the three and nine months ended September 30, 2010, respectively, compared with the same periods of 2009. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts as discussed above, gross margin for SJRG increased \$1.1 million and \$9.5 million for the three and nine months ended September 30, 2010, respectively, due mainly to the timing of realized hedge gains and losses related to our storage assets. Storage assets allow SJRG to lock in the differential between purchasing natural gas at low current prices and selling equivalent quantities at higher future prices. Gross margin is generated via seasonal pricing differentials. While this margin will be attained over the transaction cycle, the timing of physical injections and withdraws and related hedge settlements can cause earnings fluctuations for accounting purposes due to the volatile nature of wholesale gas prices. During the injection season of 2009, NYMEX prices decreased significantly. Typical to our business cycle, we entered into financial hedges designed to protect our ultimate injection prices at a time when NYMEX prices were relatively high. These contracts settled in the injection months when the NYMEX had fallen considerably and thus produced significant realized hedge losses which were recorded into earnings. During this period we purchased less expensive physical gas that was injected into storage. During the injection season of 2010 the impact of realized hedge gains/losses recorded into earnings was not significant.

Table of Contents

Gross Margin for Marina increased \$0.4 million and decreased \$1.0 million for the three and nine months ended September 30, 2010, respectively, compared with the same periods of 2009. Gross margin as a percentage of Operating Revenues decreased 4.0 percentage points and 6.0 percentage points for the same periods due mainly to the deconsolidation of ACLE and WCLE as discussed in Note 1 to the condensed consolidated financial statements and an increase in low-margin electric sales to Borgata during the nine month period. As per our contract, the billing rates are designed to recover the underlying commodity costs over time. However during interim periods, certain components of the underlying commodity costs are not adjusted proportionately.

Gross margin from SJE's retail gas sales increased \$0.7 million and \$0.9 million for the three and nine months ended September 30, 2010, respectively, compared with the same periods in 2009 due mainly to incremental margins from new customers acquired in our Pennsylvania retail book which was partially offset by the impact of lower New Jersey customer counts (See Operating Revenues – Nonutility). Gross margin as a percentage of Operating Revenues increased 1.0 percentage points and 1.7 percentage points for the three and nine months ended September 30, 2010, respectively, compared with the same periods in 2009 as we were able to secure higher margins on most of our new customers.

Gross margin from SJE's retail electricity sales decreased \$7.6 million and increased \$4.7 million for the three and nine months ended September 30, 2010, respectively, compared with the same periods of 2009. Excluding the impact of the net change in unrealized gains and losses recorded on forward financial contracts as discussed above, gross margin increased \$0.5 million and \$1.6 million in the three and nine months ended September 30, 2010, respectively, compared with the same period in 2009. The increases were mainly due to the impact of the school bid as mentioned in Operating Revenues – Nonutility and the addition of several commercial and industrial customers. Excluding the impact of the unrealized gains and losses, gross margin as a percentage of Operating Revenues did not change significantly.

Gross margin for SJESP increased \$0.7 million and \$0.5 million for the three and nine months ended September 30, 2010 compared with the same periods in 2009. Gross margin as a percentage of Operating Revenues increased 3.6 percentage points for the three months ended September 30, 2010 compared with the same period in 2009 due to higher margins on additional installation jobs completed as mentioned in Operating Revenues – Nonutility. Gross margin as a percentage of Operating Revenues did not change significantly for the nine months ended September 30, 2010 compared with the same period in 2009.

Operations Expense — A summary of net changes in operations expense, for the three and nine months ended September 30, follows (in thousands):

	Three Months Ended September 30, 2010 vs. 2009	Nine Months Ended September 30, 2010 vs. 2009
Utility	\$ 1,232	\$ 2,157
Nonutility:		
Wholesale Gas	338	874
Retail Gas and Other	413	(5)
Retail Electricity	(56)	173
On-Site Energy Production	(502)	(980)
Appliance Service	420	800
Total Nonutility	613	862
Intercompany Eliminations and Other	88	(40)

Total Operations	\$	1,933	\$	2,979
------------------	----	-------	----	-------

Utility operations expense increased \$1.2 million and \$2.2 million for the three and nine months ended September 30, 2010, as compared with the same periods in 2009. The increase is primarily due to increases in governance, compliance and employee compensation costs.

Nonutility operations expense increased \$0.6 million and \$0.9 million for the three and nine months ended September 30, 2010, respectively, as compared with the same periods in 2009. The increase is primarily due to additional personnel, governance and compliance costs incurred to support continued growth. These increases were partially offset by the impact of the deconsolidation of ACLE and WCLE, as discussed in Note 1 to the condensed consolidated financial statements.

Other changes in operations expense during 2010 were not significant.

Table of Contents

Other Operating Expenses —Changes in other consolidated operating expenses which consist of Maintenance, Depreciation, and Energy and Other Taxes for the three and nine months ended September 30, 2010, respectively, compared with the same periods in 2009, were not significant.

Other Income Other income and expense increased \$0.4 million and \$1.5 million during the three and nine months ended September 30, 2010, respectively, compared with the same periods in 2009 primarily due to higher interest income charged for notes receivable advances to affiliates, partially offset by an agreement reached with the FERC to resolve an outstanding dispute as disclosed in the Company's Form 8-K filed on September 28, 2010.

Interest Charges – Interest charges increased by \$1.0 million and \$2.6 million for the three and nine months ended September 30, 2010, respectively, compared with the same periods in 2009, primarily due to higher average levels of short -term debt during 2010, and \$60 million in aggregate principal amount of long-term debt issued at SJG. The effect of higher average levels of short and long-term debt outstanding was partially offset by the impact of lower short-term interest rates during the first nine months of 2010 as compared to 2009.

Income Taxes –The income tax benefit increased by \$4.2 million for the three months ended September 30, 2010, and the income tax expense decreased by \$5.3 million for the nine months ended September 30, 2010, as compared to the same periods in the prior year. The effective tax rate decreased from 36.7% in the nine months ended September 30, 2009 to 26.3% in the nine months ended September 30, 2010. This decrease is primarily due to the impact of the investment tax credit available on renewable energy facilities at Marina.

Equity in Earnings of Affiliated Companies – Equity in earnings of affiliated companies decreased by \$0.6 million and \$2.2 million for the three and nine months ended September 30, 2010, respectively, as compared to the same periods in 2009. This decrease in equity in earnings of affiliated companies is primarily due to unrealized losses on interest rate swaps at LVE.

Discontinued Operations— The losses are primarily comprised of environmental remediation and product liability litigation associated with previously disposed of businesses.

LIQUIDITY AND CAPITAL RESOURCES:

Liquidity needs are driven by factors that include natural gas commodity prices; the impact of weather on customer bills; lags in fully collecting gas costs from customers under the Basic Gas Supply Service charge; working capital needs of our energy trading and marketing activities; the timing of construction and remediation expenditures and related permanent financings; the timing of equity contributions to unconsolidated affiliates; mandated tax payment dates; both discretionary and required repayments of long-term debt; and the amounts and timing of dividend payments.

Cash Flows from Operating Activities — Liquidity needs are first met with net cash provided by operating activities. Net cash provided by operating activities totaled \$120.8 million and \$121.6 million in the first nine months of 2010 and 2009, respectively. Net cash provided by operating activities varies from year-to-year primarily due to the impact of weather on customer demand and related gas purchases, customer usage factors related to conservation efforts and the price of the natural gas commodity, inventory utilization, and gas cost recoveries. Operating activities in the first nine months of 2010 produced slightly less net cash than the same period in 2009. Due to continued lower gas prices, inventory balances were virtually unchanged over the nine month period while higher customer collections resulted in lower customer receivable balances in 2010 as compared with 2009. In addition, payments associated with our gas trading activities decreased significantly compared to the prior year period as we purchased more gas in the spot market to take advantage of lower prices. These benefits were offset by higher tax payments during the third quarter of 2010 as compared with 2009.

Cash Flows from Investing Activities — SJI has a continuing need for cash resources and capital, primarily to invest in new and replacement facilities and equipment. Net cash outflows for capital expenditures, which are primarily construction projects, for the first nine months of 2010 and 2009 amounted to \$101.6 million and \$61.3 million, respectively. We estimate the net cash outflows for construction projects for fiscal years 2010, 2011 and 2012 to be approximately \$171.0 million, \$58.5 million and \$58.3 million, respectively. For capital expenditures, including those under SJG's CIRT, the Company will use short-term borrowings under lines of credit from commercial banks to finance capital expenditures as incurred. From time to time, the Company will refinance the short-term debt incurred to support capital expenditures with long-term debt.

In support of its risk management activities, the Company is required to maintain margin accounts with selected counterparties as collateral for its forward contracts, swap agreements, options contracts and futures contracts. These margin accounts are included in Restricted Investments or Margin Account Liability, depending upon the value of the related contracts (the change in the Margin Account Liability is reflected in cash flows from Operating Activities) on the condensed consolidated balance sheets. The required amount of restricted investments changes on a daily basis due to fluctuations in the market value of the related outstanding contracts and are difficult to predict. Margin posted by the Company increased by \$21.8 million in the first nine months of 2010, compared with a decrease of \$29.0 million in the same period of 2009.

Table of Contents

During the nine months ended September 30, 2010 and 2009, the Company provided advances to unconsolidated affiliates of \$61.8 million and \$11.6 million, respectively. The purpose of the advances was to develop several energy production facilities, to cover certain project related costs of LVE Energy Partners, LLC (See Commitments and Contingencies), and to provide working capital for the commodity marketing operation.

Cash Flows from Financing Activities — Short-term borrowings under lines of credit from commercial banks are used to supplement cash flows from operations, to support working capital needs and to finance capital expenditures as incurred. From time to time, short-term debt incurred to finance capital expenditures is refinanced with long-term debt.

Credit facilities and available liquidity as of September 30, 2010 were as follows (in thousands):

Company	Total Facility	Usage	Available Liquidity	Expiration Date
SJG:				
Revolving Credit Facility	\$ 100,000	\$ 88,500	\$ 11,500	August 2011
Line of Credit	40,000	—	40,000	August 2011
Uncommitted Bank Lines	40,000	16,800	23,200	Various
Total SJG	180,000	105,300	74,700	
SJI:				
Revolving Credit Facility	\$ 200,000	\$ 179,125	\$ 20,875	August 2011 (A)
Uncommitted Bank Lines	70,000	35,600	34,400	Various
Total SJI	270,000	214,725	55,275	
Total	\$ 450,000	\$ 320,025	\$ 129,975	

(A) Includes letters of credit outstanding in the amount of \$95.8 million.

The SJG facilities are restricted as to use and availability specifically to SJG; however, if necessary the SJI facilities can also be used to support SJG's liquidity needs. All committed facilities contain one financial covenant regarding the ratio of total debt to total capitalization, measured on a quarterly basis. SJI and SJG were in compliance with this covenant as of September 30, 2010. Borrowings under these credit facilities are at market rates. The weighted average borrowing cost, which changes daily, was 0.79% and 0.70% at September 30, 2010 and 2009, respectively. Based upon the existing credit facilities and a regular dialogue with our banks, we believe there will continue to be sufficient credit available to meet our business' future liquidity needs.

SJI supplements its operating cash flow and credit lines with both debt and equity capital. Over the years, SJG has used long-term debt, primarily in the form of First Mortgage Bonds and Medium Term Notes (MTN), secured by the same pool of utility assets, to finance its long-term borrowing needs. These needs are primarily capital expenditures for property, plant and equipment. In September 2009, SJG received approval from the New Jersey Board of Public Utilities to issue up to \$150.0 million of MTNs through September 2011. In March and June 2010, SJG issued \$15.0 million and \$45.0 million aggregate principal amounts, respectively, of its MTNs under private placements. In

Edgar Filing: SOUTH JERSEY INDUSTRIES INC - Form 10-Q

September 2010, SJG entered in an arrangement to issue Medium Term Notes under a private placement in an aggregate principal amount of \$55.0 million. SJG expects to issue this debt by the end of the fourth quarter of 2010. No other long-term debt was issued during the nine months ended September 30, 2010 and 2009.

SJI's capital structure was as follows:

	As of September 30, 2010	As of December 31, 2009
Equity	46.9%	50.0%
Long-Term Debt (including current portion)	34.2	32.0
Short-Term Debt	18.9	18.0
Total	100.0%	100.0%

Table of Contents

SJI has paid dividends on its common stock for 58 consecutive years and has increased that dividend each year for the last ten years. The Company currently looks to grow that dividend by at least 6% to 7% per year and has a targeted payout ratio of between 50% and 60%. In setting the dividend rate, the Board of Directors of SJI considers future earnings expectations, payout ratio, and dividend yield relative to those at peer companies, as well as returns available on other income-oriented investments. However, there can be no assurance that the Company will be able to continue to increase the dividend, meet the targeted payout ratio or pay a dividend at all in the future.

COMMITMENTS AND CONTINGENCIES:

SJI has a continuing need for cash resources and capital, primarily to invest in new and replacement facilities and equipment, working capital, and for environmental remediation costs. Cash outflows for capital expenditures for the first nine months of 2010 amounted to \$101.6 million. Management estimates net cash outflows for construction projects for 2010, 2011 and 2012, to be approximately \$171.0 million, \$58.5 million and \$58.3 million, respectively. Costs for remediation projects, net of insurance reimbursements, for the first nine months of 2010 amounted to net cash outflows of \$2.1 million. Total cash outflows for remediation projects are expected to be \$6.9 million, \$19.7 million and \$13.5 million for 2010, 2011 and 2012, respectively. As discussed in Notes 9 and 14 to the Consolidated Financial Statements in Item 8 of SJI's 10-K as of December 31, 2009, certain environmental costs are subject to recovery from insurance carriers and ratepayers.

As of September 30, 2010, SJI provided \$95.8 million of standby letters of credit through SJI's revolving credit facility and uncommitted bank lines. Letters of credit in the amount of \$62.3 million support variable-rate demand bonds issued through the New Jersey Economic Development Authority (NJEDA) to finance Marina's initial thermal plant project and \$8.7 million was posted to support SJI's guaranty of LVE discussed below. The additional outstanding letters of credit total \$24.8 million, and were posted to enable SJE to market retail electricity and for various construction activities. The Company also provided two additional letters of credit under separate facilities outside of the revolving credit facility. Those letters of credit consist of a \$25.2 million letter of credit provided by SJG to support variable-rate demand bonds issued through the NJEDA to finance the expansion of SJG's natural gas distribution system; and a \$30.7 million letter of credit provided by Marina to support a capital contribution obligation as discussed below. These letters of credit expire in August 2011 and January 2011, respectively.

There were no significant changes to the Company's contractual obligations described in Note 14 to the Consolidated Financial Statements in Item 8 of SJI's Annual Report on Form 10-K as of December 31, 2009, except for commodity supply purchase obligations which increased by approximately \$166.3 million in total since December 31, 2009, due to the origination of new contracts during the nine months ended September 2010, and for the principal and interest obligations related to the \$60.0 million of long-term debt issued during 2010, along with \$36.3 million in construction related obligations.

Off-Balance Sheet Arrangements— An off-balance sheet arrangement is any contractual arrangement involving an unconsolidated entity under which the company has either made guarantees, or has certain other interests or obligations.

The Company has recorded a liability of \$2.9 million which is included in Other Current Liabilities and Other Noncurrent Liabilities with a corresponding increase in Investment in Affiliates on the condensed consolidated balance sheets as of September 30, 2010 for the fair value of the following guarantees:

In April 2007, SJI guaranteed certain obligations of LVE Energy Partners, LLC (LVE), an unconsolidated joint venture in which Marina has a 50% equity interest. LVE entered into a 25-year contract with a resort developer to design, build, own and operate a district energy system and central energy center for a planned resort in Las Vegas, Nevada. LVE began construction of the facility in 2007 and expected to provide full energy services in 2010 when

the resort was originally scheduled to be completed. LVE suspended construction of the district energy system and central energy center in January 2009 after the resort developer's August 2008 announcement that it was delaying the completion of construction of the resort due to the difficult environment in the capital markets and weak economic conditions. The resort developer had indicated that it was considering different strategies to move its project forward, including opening its project in phases and obtaining a partner, but that it was unlikely construction would resume during 2009. In October 2010, the resort developer announced that they do not expect to resume construction on the project for three to five years. They stated that they remain committed to having a significant presence on the Las Vegas Strip as part of a long-term growth strategy and continue to view this site as a major strategic asset.

Table of Contents

The district energy system and central energy center are being financed by LVE with debt that is non-recourse to SJI. The outstanding balance of LVE's bank debt is approximately \$218.1 million as of September 30, 2010. In September 2009, LVE reached an agreement with the banks that are financing the energy facilities to address defaults under the financing agreements. These LVE defaults were caused by the resort developer's construction delay and the termination of an energy services agreement by a hotel operator associated with the project. As a result of these defaults, the banks had previously stopped funding the project. The terms of the new agreement require SJI and its partner in this joint venture to guaranty the payment of future interest costs by LVE through, at the latest, December 2010. SJI and its partner in this joint venture have each provided the banks with a \$2.0 million irrevocable letter of credit from a bank to support this guaranty. The maximum amount of remaining LVE interest costs to be paid by SJI under this guaranty if payments are required, and SJI was the only guarantor, would be approximately \$1.9 million. In addition, SJI and its partner in this joint venture each committed to provide approximately \$8.9 million of additional capital as of September 2009 to cover costs related to the termination of the energy services agreement by a hotel operator and interest costs incurred since August 2008 when the resort developer suspended construction. Of this amount, \$6.7 million was in the form of an irrevocable letter of credit from a bank and the remaining \$2.2 million was provided in cash in 2009. These funds are in addition to the \$30.4 million capital contribution obligation discussed below. In turn, the banks waived all existing defaults under the financing agreements and were relieved of their commitment to provide additional funding. As a result of the construction delay, the district energy system and central energy center will not be completed by the fourth quarter of 2010 as originally expected and, consequently, the full amount of LVE's debt could become due and payable in December 2010. LVE is currently in discussions with the resort developer and the banks that are financing the energy facilities to address the issues raised by the delay. LVE intends to seek additional financing to complete the facility once construction of the resort resumes. The Energy Sales Agreement between LVE and the resort developer includes a payment obligation by the resort developer to pay certain fees to LVE beginning in the fourth quarter of 2010. A portion of this payment obligation is guaranteed by the parent of the resort developer. However, although the resort developer has acknowledged the obligation to pay certain annual fees beginning in the fourth quarter of 2010, the resort developer has indicated that they do not believe they are obligated to make a cash payment of these fees for approximately the next 12 months. LVE and the resort developer are currently working to address issues related to these payments. As of September 30, 2010, the Company had a net liability of approximately \$13.3 million included in Other Current Liabilities and Other Noncurrent Liabilities on the condensed consolidated balance sheets related to this project, in addition to unsecured Notes Receivable – Affiliate of approximately \$20.1 million due from LVE. As of September 30, 2010, SJI's capital at risk is limited to its equity contributions, contribution obligations and the unsecured notes receivable totaling approximately \$59.7 million. During the first nine months of 2010, SJI and its partner in this joint venture each provided support to LVE of approximately \$5.8 million to cover project related costs.

As a result of the construction delay, management has evaluated the investment in LVE and concluded that the fair value of this investment continues to be in excess of the carrying value as of September 30, 2010.

SJI issued a performance guaranty for up to \$180.0 million to the resort developer to ensure that certain construction milestones relating to the development of the thermal facility are met. As a result of achieving certain milestones, the guaranty was reduced to \$94.0 million as of September 30, 2010. Concurrently, SJI is the beneficiary of a surety bond purchased by the project's general contractor that provides security to SJI in the event of missed construction milestones. LVE has proposed a revised milestone schedule due to delays announced by the resort developer. In addition, SJI has guaranteed the obligations of LVE under certain insurance policies during the construction period. The maximum amount that SJI could be obligated for, in the event that LVE does not have sufficient resources to make deductible payments on future claims under these insurance policies, is approximately \$6.0 million. SJI has also guaranteed certain performance obligations of LVE under the operating agreements between LVE and the resort developer, up to \$20.0 million each year for the term of the agreement, commencing with the first year of operations. SJI and its partner in this joint venture have entered into reimbursement agreements that secure reimbursement for SJI of a proportionate share of any payments made by SJI on these guarantees.

SJI has guaranteed certain obligations of BC Landfill Energy, LLC (BCLE), and WC Landfill Energy, LLC (WCLE), unconsolidated joint venture's in which Marina has a 50% equity interest. BCLE and WCLE have entered into agreements with the respective county governments to lease and operate facilities that will produce electricity from landfill methane gas. Although unlikely, the maximum amount that SJI could be obligated for, in the event that BCLE and WCLE do not meet minimum specified levels of operating performance and no mitigating action is taken, or are unable to meet certain financial obligations as they become due, is approximately \$4.2 million each year. SJI and its partner in these joint ventures have entered into reimbursement agreements that secure reimbursement for SJI of a proportionate share of any payments made by SJI on these guarantees. SJI holds variable interests in BCLE and WCLE but is not the primary beneficiary.

SJI has guaranteed the long-term debt obligations of AC Landfill Energy, LLC (ACLE), an unconsolidated joint venture in which Marina has a 50% equity interest. ACLE has entered into a long-term agreement with a county government to lease and operate a facility that will produce electricity from landfill methane gas. Although unlikely, the maximum amount that SJI could be obligated for, in the event that ACLE is unable to meet certain financial obligations as they become due, is approximately \$1.5 million. SJI and its partner in this joint venture have entered into a reimbursement agreement that secures reimbursement for SJI of a proportionate share of any payments made by SJI on this guarantee. SJI holds a variable interest in ACLE but is not the primary beneficiary.

Table of Contents

As of September 30, 2010, SJI had issued approximately \$5.0 million of parental guarantees on behalf of an unconsolidated subsidiary. These guarantees generally expire within the next two years and were issued to enable our subsidiary to market retail natural gas.

Capital Contribution Obligation - In December 2007, Marina and its joint venture partner agreed to each contribute approximately \$30.4 million of equity to LVE as part of its construction period financing. In September 2009, Marina and its joint venture partner agreed to each contribute an additional \$6.7 million of equity to LVE as discussed above. These equity contributions are expected to be made within the next twelve months, and are secured by irrevocable letters of credit from a bank.

Pending Litigation — SJI is subject to claims arising in the ordinary course of business and other legal proceedings. We accrue liabilities related to claims when we can determine the amount or range of amounts of probable settlement costs. SJI has been named in, among other actions, certain product liability claims related to our former sand mining subsidiary. Management does not currently anticipate the disposition of any known claims to have a material adverse effect on SJI's financial position, results of operations or liquidity.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Commodity Market Risks — Certain regulated and nonregulated SJI subsidiaries are involved in buying, selling, transporting and storing natural gas and buying and selling retail electricity for their own accounts as well as managing these activities for other third parties. These subsidiaries are subject to market risk due to price fluctuations. To hedge against this risk, we enter into a variety of physical and financial transactions including forward contracts, swaps, futures and options agreements. To manage these transactions, SJI has a well-defined risk management policy approved by our Board of Directors that includes volumetric and monetary limits. Management reviews reports detailing activity daily. Generally, the derivative activities described above are entered into for risk management purposes.

SJG and SJE transact commodities on a physical basis and typically do not enter into financial derivative positions directly. SJRG manages risk in the natural gas markets for these entities as well as for its own portfolio by entering into the types of transactions noted above. As part of its gas purchasing strategy, SJG uses financial contracts through SJRG to hedge against forward price risk. These contracts are recoverable through SJG's BGSS, subject to BPU approval. It is management's policy, to the extent practical, within predetermined risk management policy guidelines, to have limited unmatched positions on a deal or portfolio basis while conducting these activities. As a result of holding open positions to a minimal level, the economic impact of changes in value of a particular transaction is substantially offset by an opposite change in the related hedge transaction.

SJI has entered into certain contracts to buy, sell, and transport natural gas and to buy and sell retail electricity. For those derivatives not designated as hedges, we recorded the net unrealized pre-tax loss of \$1.2 million and a pre-tax gain of \$1.5 million in earnings during the three months ended September 30, 2010 and 2009, respectively, and the net unrealized pre-tax loss of \$19.1 million and \$12.0 million during the nine months ended September 30, 2010 and 2009, respectively, which are included with realized gains and losses in Operating Revenues — Nonutility. The fair value and maturity of these energy-trading contracts determined under the mark-to-market method as of September 30, 2010 is as follows (in thousands):

Assets

Source of Fair Value	Maturity < 1 Year	Maturity 1 -3 Years	Maturity Beyond 3 Years	Total
Prices actively quoted	\$26,678	\$5,386	\$4	\$32,068

NYMEX (New York Mercantile Exchange) is the primary national commodities exchange on which natural gas is traded. Basis represents the price of a NYMEX natural gas futures contract adjusted for the difference in price for delivering the gas at another location. Contracted volumes of our NYMEX contracts are 4.0 million decatherms (dts) with a weighted-average settlement price of \$5.59 per dt. Contracted volumes of our basis contracts are 14.6 million dts with a weighted average settlement price of \$0.58 per dt. Contracted volumes of electric are 2.4 million mwh with a weighted average settlement price of \$58.33 per mwh.

Table of Contents

A reconciliation of SJI's estimated net fair value of energy-related derivatives follows (in thousands):

Net Derivatives — Energy Related Assets, January 1, 2010	\$ 8,906
Contracts Settled During Nine Months Ended September 30, 2010, Net	(23,162)
Other Changes in Fair Value from Continuing and New Contracts, Net	(1,651)
 Net Derivatives — Energy Related Liabilities September 30, 2010	 \$ (15,907)

Interest Rate Risk — Our exposure to interest-rate risk relates primarily to short-term, variable-rate borrowings. Short-term, variable-rate debt outstanding at September 30, 2010 was \$224.2 million and averaged \$179.6 million during the first nine months of 2010. A hypothetical 100 basis point (1%) increase in interest rates on our average variable-rate debt outstanding would result in a \$1.1 million increase in our annual interest expense, net of tax. The 100 basis point increase was chosen for illustrative purposes, as it provides a simple basis for calculating the impact of interest rate changes under a variety of interest rate scenarios. Over the past five years, the change in basis points (b.p.) of our average monthly interest rates from the beginning to end of each year was as follows: 2009 - 29 b.p. decrease; 2008 -397 b.p. decrease; 2007 — 45 b.p. increase; 2006 —67 b.p. increase; and 2005 —194 b.p. decrease. For September 2010, our average interest rate on variable-rate debt was 0.80%.

We issue long-term debt either at fixed rates or use interest rate derivatives to limit our exposure to changes in interest rates on variable-rate, long-term debt. As of September 30, 2010, the interest costs on all but \$7.1 million of our long-term debt was either at a fixed-rate or hedged via an interest rate derivative. Consequently, interest expense on existing long-term debt is not significantly impacted by changes in market interest rates. However, during the first quarter of 2009, as a result of unusual market conditions, the interest rate derivatives on Marina's variable rate demand bonds were no longer highly effective in mitigating the risks resulting from changes in interest rates. Consequently, the Company discontinued hedge accounting on these interest rate derivatives. All of these interest rate derivatives remain in place and are expected to substantially offset future changes in interest rates on the respective securities.

As of September 30, 2010, SJI's active interest rate swaps were as follows:

Amount	Fixed Interest Rate	Start Date	Maturity	Type	Obligor
\$ 3,900,000	4.795%	12/01/2004	12/01/2014	Taxable	Marina
\$ 8,000,000	4.775%	11/12/2004	11/12/2014	Taxable	Marina
\$ 20,000,000	4.080%	11/19/2001	12/01/2011	Tax-exempt	Marina
\$ 14,500,000	3.905%	03/17/2006	01/15/2026	Tax-exempt	Marina
\$ 500,000	3.905%	03/17/2006	01/15/2026	Tax-exempt	Marina
\$ 330,000	3.905%	03/17/2006	01/15/2026	Tax-exempt	Marina
\$ 7,100,000	4.895%	02/01/2006	02/01/2016	Taxable	Marina
\$ 12,500,000	3.430%	12/01/2006	02/01/2036	Tax-exempt	SJG
\$ 12,500,000	3.430%	12/01/2006	02/01/2036	Tax-exempt	SJG

Concentration of Credit Risk - As of September 30, 2010, approximately 49.2% of the current and noncurrent Derivatives – Energy Related Assets or \$25.4 million are with a single retail counterparty. This counterparty has contracts with a large number of diverse customers which minimizes the concentration of this risk. A portion of these contracts may be assignable to SJI in the event of a default by the counterparty.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of its chief executive officer and chief financial officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of September 30, 2010. Based on that evaluation, the Company's chief executive officer and chief financial officer concluded that the disclosure controls and procedures employed at the Company are effective.

Changes in Internal Control Over Financial Reporting

There has not been any change in the Company's internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, during the fiscal quarter ended September 30, 2010 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings

Information required by this Item is incorporated by reference to Part I, Item 2, Pending Litigation, beginning on page 34.

Item 1A. Risk Factors

There have been no material changes to our risk factors from those disclosed in Part I, Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

The following table presents information about purchases by SJI of its own common stock during the three months ended September 30, 2010:

Period		Total Number of Shares Purchased ¹	Average Price Paid Per Share ¹	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ²	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs ²
July	2010	21,161	\$ 43.73	—	—
August	2010	3,359	\$ 46.47	—	—
September	2010	—	—	—	—
Total		24,520		—	—

1 The total number of shares purchased and the average price paid per share represent shares purchased in open market transactions under the South Jersey Industries Dividend Reinvestment Plan (the "DRP") by the administrator of the DRP.

2 On September 22, 2008, SJI publicly announced a share repurchase program under which the Company can purchase up to 5% of its currently outstanding common stock over the next four years. As of September 30, 2010, no shares have been purchased under this program.
