COMMUNITY BANKERS TRUST CORPORATION

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Nature of Banking Activities and Significant Accounting Policies

Organization

Community Bankers Trust Corporation (the “Company”) is headquartered in Richmond, Virginia and is the holding company for Essex Bank (the “Bank”), a Virginia state bank with 25 full-service offices in Virginia and Maryland.

The Bank engages in a general commercial banking business and provides a wide range of financial services primarily to individuals, small businesses and larger commercial companies, including individual and commercial demand and time deposit accounts, commercial and industrial loans, consumer and small business loans, real estate and mortgage loans, investment services, on-line and mobile banking products, and cash management services.

Financial Statements

The consolidated statements presented include accounts of the Company and the Bank, its wholly-owned subsidiary. All material intercompany balances and transactions have been eliminated. The statements should be read in conjunction with the Company’s consolidated financial statements and the accompanying notes to consolidated financial statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2017. The accounting and reporting policies of the Company conform to U.S. generally accepted accounting principles (GAAP) and to the general practices within the banking industry. The interim financial statements have not been audited; however, in the opinion of management, all adjustments, consisting of normal accruals, were made that are necessary to present fairly the balance sheet of the Company as of September 30, 2018, the statements of income and comprehensive income for the three and nine months ended September 30, 2018, and the statements of changes in shareholders’ equity and cash flows for the nine months ended September 30, 2018. Results for the nine month period ended September 30, 2018 are not necessarily indicative of the results that may be expected for the year ending December 31, 2018.

The financial information contained within the statements is, to a significant extent, financial information that is based on measures of the financial effects of transactions and events that have already occurred. A variety of factors could affect the ultimate value that is obtained when either earning income, recognizing an expense, recovering an asset or relieving a liability. The Company uses historical loss factors as one factor in determining the inherent loss that may be present in its loan portfolio. Actual losses could differ significantly from the historical factors that the Company uses. In addition, GAAP itself may change from one previously acceptable method to another method. Although the economics of the Company's transactions would be the same, the timing of events that would impact its transactions could change.

In preparing these financial statements, the Company has evaluated subsequent events and transactions for potential recognition or disclosure through the date the financial statements were issued.

Certain reclassifications have been made to prior period balances to conform to the current year presentations. Such reclassifications had no impact on net income or shareholders' equity.

Recent Accounting Pronouncements

In August 2018 the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2018-13, *Fair Value Measurement (Topic 820): Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement*. The ASU removes, modifies, and adds to existing fair value measurement disclosure requirements.

The following public company disclosure requirements are removed:

- Transfers between Level 1 and Level 2 of the fair value hierarchy
- The policy for determining when transfers between any of the three levels have occurred
- The valuation processes used for Level 3 measurements

The following public company disclosure requirements are modified:

For certain investments that calculate the net asset value, timing of liquidation and redemption restrictions lapsing if the latter has been communicated to the reporting entity

A clarification that the Level 3 measurement uncertainty disclosure should communicate information about the uncertainty at the balance sheet date

The following public company disclosure requirements are new:

The changes in unrealized gains and losses for the period included in other comprehensive income for recurring Level 3 instruments held at the balance sheet date

The range and weighted average of significant unobservable inputs used for Level 3 measurements. For certain unobservable inputs, an option to disclose other quantitative information in place of the weighted average is available to the extent that it would be a more reasonable and rational method to reflect the distribution of unobservable inputs.

The ASU is effective for all entities in fiscal years beginning after December 15, 2019 and interim periods within those fiscal years. Early adoption is permitted. In addition, an entity may early adopt any of the removed or modified disclosures immediately and delay adoption of the new disclosures until the effective date. The Company does not expect the adoption of ASU 2018-13 to have a material impact on its consolidated financial statements.

Also in August 2018, the FASB issued ASU 2018-14, *Compensation—Retirement Benefits—Defined Benefit Plans—General (Topic 715-20): Disclosure Framework—Changes to the Disclosure Requirements for Defined Benefit Plan*. This ASU modifies the disclosure requirements for employers that sponsor defined benefit pension or other postretirement plans by eliminating the requirement to disclose the amounts in accumulated other comprehensive income expected to be recognized as components of net periodic benefit cost over the next fiscal year and adding a requirement to disclose an explanation of the reasons for significant gains and losses related to changes in the benefit obligation for the period. The ASU is effective for fiscal years ending after December 15, 2020. Early adoption is permitted. The Company does not expect the adoption of ASU 2018-14 to have a material impact on its consolidated financial statements.

In June 2018, the FASB issued ASU 2018-07, *Compensation- Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting*. The amendments expand the scope of Topic 718 to include share-based payments issued to nonemployees for goods or services, which were previously excluded. The amendments will align the accounting for share-based payments to nonemployees and employees more similarly. The amendments are effective for fiscal years beginning after December 15, 2018 and interim periods within those fiscal years. Early adoption is permitted. The Company does not expect the adoption of ASU 2018-07 to have a material impact on its consolidated financial statements.

Note 2. Securities

Amortized costs and fair values of securities available for sale and held to maturity at September 30, 2018 and December 31, 2017 were as follows (dollars in thousands):

Due after ten years	3,417	3,400	14,346	14,230
Total securities	\$43,559	\$ 43,195	\$203,857	\$ 200,603

Proceeds from sales of securities available for sale were \$8.4 million and \$9.1 million during the three months ended September 30, 2018 and 2017, respectively, and \$24.2 million and \$30.1 million for the nine months ended September 30, 2018 and 2017, respectively. Gains and losses on the sale of securities are determined using the specific identification method. Gross realized gains and losses on sales of securities available for sale during the three and nine months ended September 30, 2018 and 2017 were as follows (dollars in thousands):

	Three months ended September 30, 2018		September 30, 2017		Nine months ended September 30, 2018		September 30, 2017	
Gross realized gains	\$ 93	\$	114		\$ 161	\$	378	
Gross realized losses	(25)		(66)		(79)		(198)	
Net securities gains	\$ 68	\$	48		\$ 82	\$	180	

In estimating other than temporary impairment (OTTI) losses, management considers the length of time and the extent to which the fair value has been less than cost, the financial condition and short-term prospects for the issuer, and the intent and ability of management to hold its investment for a period of time to allow a recovery in fair value. There were no investments held that had OTTI losses for the three and nine months ended September 30, 2018 and 2017.

The fair value and gross unrealized losses for securities, segregated by the length of time that individual securities have been in a continuous gross unrealized loss position, at September 30, 2018 and December 31, 2017 were as follows (dollars in thousands):

	September 30, 2018					
	Less than 12 Months		12 Months or More		Total

The unrealized losses (impairments) in the investment portfolio at September 30, 2018 and December 31, 2017 are generally a result of market fluctuations of interest rates that occur daily. The unrealized losses are from 243 securities at September 30, 2018. Of those, 234 are investment grade, have U.S. government agency guarantees, or are backed by the full faith and credit of local municipalities throughout the United States. Five investment grade asset-backed securities comprised of student loan pools included in corporate obligations and four corporate bonds make up the remaining securities with unrealized losses at September 30, 2018. The Company considers the reason for impairment, length of impairment, and ability and intent to hold until the full value is recovered in determining if the impairment is temporary in nature. Based on this analysis, the Company has determined these impairments to be temporary in nature. The Company does not intend to sell, and it is more likely than not that the Company will not be required to sell, these securities until they recover in value or reach maturity.

Market prices are affected by conditions beyond the control of the Company. Investment decisions are made by the management group of the Company and reflect the overall liquidity and strategic asset/liability objectives of the Company. Management analyzes the securities portfolio frequently and manages the portfolio to provide an overall positive impact to the Company's income statement and balance sheet.

Securities with amortized costs of \$59.4 million and \$71.7 million at September 30, 2018 and December 31, 2017, respectively, were pledged to secure public deposits as required or permitted by law. Securities with amortized costs of \$7.0 million at each of September 30, 2018 and December 31, 2017 were pledged to secure lines of credit at the Federal Reserve discount window. At each of September 30, 2018 and December 31, 2017, there were no securities purchased from a single issuer, other than U.S. Treasury issue and other U.S. Government agencies that comprised more than 10% of the consolidated shareholders' equity.

Note 3. Loans and Related Allowance for Loan Losses

The Company's loans, net of deferred fees and costs, at September 30, 2018 and December 31, 2017 were comprised of the following (dollars in thousands):

	September 30, 2018		December 31, 2017		
	Amount	% of Loans	Amount	% of Loans	
Mortgage loans on real estate:					
Residential 1-4 family	\$ 216,203	22.46	% \$ 227,542	24.16	%
Commercial	358,490	37.25	366,331	38.89	
Construction and land development	135,021	14.03	107,814	11.44	
Second mortgages	7,179	0.75	8,410	0.89	
Multifamily	52,255	5.43	59,024	6.27	
Agriculture	8,066	0.84	7,483	0.79	

Edgar Filing: Community Bankers Trust Corp - Form 10-Q

Total real estate loans	777,214	80.76	776,604	82.44	
Commercial loans	170,310	17.70	159,024	16.88	
Consumer installment loans	13,135	1.36	5,169	0.55	
All other loans	1,766	0.18	1,221	0.13	
Total loans	\$962,425	100.00	% \$942,018	100.00	%

The Company held \$18.0 million in balances of loans guaranteed by the United States Department of Agriculture (USDA), which are included in various categories in the table above, at September 30, 2018 and December 31, 2017. As these loans are 100% guaranteed by the USDA, no loan loss allowance is required. These loan balances included a purchase premium of \$1.3 million and \$824,000 at September 30, 2018 and December 31, 2017, respectively. The purchase premium is amortized as an adjustment of the related loan yield on a straight line basis, which is substantially equivalent to the results obtained using the effective interest method.

At September 30, 2018 and December 31, 2017, the Company's allowance for loan losses was comprised of the following: (i) a specific valuation component calculated in accordance with FASB Accounting Standards Codification (ASC) 310, *Receivables*, (ii) a general valuation component calculated in accordance with FASB ASC 450, *Contingencies*, based on historical loan loss experience, current economic conditions and other qualitative risk factors, and (iii) an unallocated component to cover uncertainties that could affect management's estimate of probable losses. Management identified loans subject to impairment in accordance with ASC 310.

The following table summarizes information related to impaired loans as of September 30, 2018 (dollars in thousands):

(1)

Edgar Filing: Community Bankers Trust Corp - Form 10-Q

The amount of the investment in a loan, which is not net of a valuation allowance, but which does reflect any direct write-down of the investment.

- (2) The contractual amount due, which reflects paydowns applied in accordance with loan documents, but which does not reflect any direct write-downs or valuation allowances.

Troubled debt restructures still accruing interest are loans that management expects to ultimately collect all principal and interest due, but not under the terms of the original contract. A reconciliation of impaired loans to nonaccrual loans at September 30, 2018 and December 31, 2017, is set forth in the table below (dollars in thousands):

	September 30, 2018	December 31, 2017
Nonaccruals	\$ 8,894	\$ 9,026
Trouble debt restructure and still accruing	8,171	5,271
Total impaired	\$ 17,065	\$ 14,297

Interest income on nonaccrual loans, if recognized, is recorded using the cash basis method of accounting. There was an insignificant amount of cash basis income recognized during the three and nine months ended September 30, 2018 and 2017. For the three months ended September 30, 2018 and 2017, estimated interest income of \$167,000 and \$224,000, respectively, would have been recorded if all such loans had been accruing interest according to their original contractual terms. For the nine months ended September 30, 2018 and 2017, estimated interest income of \$471,000 and \$550,000, respectively, would have been recorded if all such loans had been accruing interest according to their original contractual terms.

Edgar Filing: Community Bankers Trust Corp - Form 10-Q

There were no loans greater than 90 days past due and still accruing interest at September 30, 2018 and December 31, 2017. The following tables present an age analysis of past due status of loans by category as of September 30, 2018 and December 31, 2017 (dollars in thousands):

Loans are monitored for credit quality on a recurring basis. These credit quality indicators are defined as follows:

Pass - A pass loan is not adversely classified, as it does not display any of the characteristics for adverse classification. This category includes purchased loans that are 100% guaranteed by U.S. Government agencies of \$18.0 million and \$18.0 million at September 30, 2018 and December 31, 2017, respectively.

Special Mention - A special mention loan has potential weaknesses that deserve management's close attention. If left uncorrected, such potential weaknesses may result in deterioration of the repayment prospects or collateral position at some future date. Special mention loans are not adversely classified and do not warrant adverse classification.

Substandard - A substandard loan is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans classified as substandard generally have a well defined weakness, or weaknesses, that jeopardize the liquidation of the debt. These loans are characterized by the distinct possibility of loss if the deficiencies are not corrected.

Doubtful - A doubtful loan has all the weaknesses inherent in a loan classified as substandard with the added characteristics that the weaknesses make collection or liquidation in full, highly questionable and improbable, on the basis of currently existing facts, conditions, and values. The possibility of loss is extremely high.

The following tables present the composition of loans by credit quality indicator at September 30, 2018 and December 31, 2017 (dollars in thousands):

	September 30, 2018

In accordance with FASB Accounting Standards Update (ASU) 2011-02, *Receivables (Topic 310): A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring*, the Company assesses all loan modifications to determine whether they are considered troubled debt restructurings (TDRs) under the guidance. The Company had 24 and 23 loans that met the definition of a TDR at September 30, 2018 and 2017, respectively.

During the three months ended September 30, 2018, the Company modified one commercial real estate loan that was considered to be a TDR. The Company restructured the terms for this loan, which had a pre- and post-modification balance of \$126,000. During the nine months ended September 30, 2018, the Company modified one multifamily loan and one commercial real estate loan that were considered to be TDRs, which had a total pre- and post-modification balance of \$2.6 million and \$126,000, respectively. The Company restructured the terms for both loans.

During the three months ended September 30, 2017, the Company modified two 1-4 family loans that were considered to be TDRs. The Company lowered the interest rate and extended the term for each of the 1-4 family loans, which had a pre- and post-modification balance of \$354,000. During the nine months ended September 30, 2017, the Company modified three 1-4 family loans and one agriculture loan that were considered to be TDRs. The Company extended the terms for two of the 1-4 family loans and lowered the interest rate for each of these loans, which had a pre- and post-modification balance of \$1.1 million. The Company extended the term for the agriculture loan, which had a pre- and post-modification balance of \$258,000.

A loan is considered to be in default if it is 90 days or more past due. There were no TDRs that had been restructured during the previous 12 months that resulted in default during either of the three and nine months ended September 30, 2018 and 2017.

In the determination of the allowance for loan losses, management considers TDRs and subsequent defaults in these restructures by reviewing for impairment in accordance with FASB ASC 310-10-35, *Receivables, Subsequent Measurement*.

At September 30, 2018, the Company had 1-4 family mortgages in the amount of \$112.3 million pledged to the Federal Home Loan Bank with a lendable collateral value of \$89.8 million.

Note 4. PCI Loans and Related Allowance for Loan Losses

On January 30, 2009, the Company entered into a Purchase and Assumption Agreement with the Federal Deposit Insurance Corporation (FDIC) to assume all of the deposits and certain other liabilities and acquire substantially all assets of Suburban Federal Savings Bank (SFSB). The Company is applying the provisions of FASB ASC 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality*, to all loans acquired in the SFSB transaction (the "PCI loans"). Of the total \$198.3 million in loans acquired, \$49.1 million met the criteria of FASB ASC 310-30. These loans, consisting mainly of construction loans, were deemed impaired at the acquisition date. The remaining \$149.1 million of loans acquired, comprised mainly of residential 1-4 family, were analogized to meet the criteria of FASB ASC 310-30. Analysis of this portfolio revealed that SFSB utilized weak underwriting and documentation standards, which led the Company to believe that significant losses were probable given the economic environment at the time.

As of September 30, 2018 and December 31, 2017, the outstanding contractual balance of the PCI loans was \$63.4 million and \$71.0 million, respectively. The carrying amount, by loan type, as of these dates is as follows (dollars in thousands):

	September 30, 2018		December 31, 2017		
	Amount	% of PCI Loans	Amount	% of PCI Loans	
Mortgage loans on real estate:					
Residential 1-4 family	\$ 35,053	89.55	% \$ 39,805	89.79	%
Commercial	759	1.94	547	1.23	
Construction and land development	1,350	3.45	1,588	3.58	

Edgar Filing: Community Bankers Trust Corp - Form 10-Q

Second mortgages	1,735	4.43	2,136	4.82
Multifamily	247	0.63	257	0.58
Total real estate loans	39,144	100.00	44,333	100.00
Total PCI loans	\$ 39,144	100.00 %	\$ 44,333	100.00 %

During the three and nine months ended September 30, 2018, the Company recorded charge-offs of \$63,000 on PCI loans in the residential 1-4 family loan category. There was no activity in the allowance for loan losses on PCI loans for the three and nine months ended September 30, 2017.

The following table presents information on the PCI loans collectively evaluated for impairment in the allowance for loan losses at September 30, 2018 and December 31, 2017 (dollars in thousands):

	September 30, 2018		December 31, 2017	
	Allowance for loan losses	Recorded investment in loans	Allowance for loan losses	Recorded investment in loans
Mortgage loans on real estate:				
Residential 1-4 family	\$ 137	\$ 35,053	\$ 200	\$ 39,805
Commercial	—	759	—	547
Construction and land development	—	1,350	—	1,588
Second mortgages	—	1,735	—	2,136
Multifamily	—	247	—	257
Total real estate loans	137	39,144	200	44,333
Total PCI loans	\$ 137	\$ 39,144	\$ 200	\$ 44,333

The change in the accretable yield balance for the nine months ended September 30, 2018 and the year ended December 31, 2017, is as follows (dollars in thousands):

Balance, January 1, 2017	\$48,355
Accretion	(5,729)
Reclassification from nonaccretable difference	1,500
Balance, December 31, 2017	\$44,126
Accretion	(3,935)
Reclassification to nonaccretable difference	(1,400)
Balance, September 30, 2018	\$38,791

The PCI loans were not classified as nonperforming assets as of September 30, 2018, as the loans are accounted for on a pooled basis, and interest income, through accretion of the difference between the carrying amount of the loans and the expected cash flows, is being recognized on all PCI loans.

Note 5. Other Real Estate Owned

The following table presents the balances of other real estate owned at September 30, 2018 and December 31, 2017 (dollars in thousands):

	September 30, 2018	December 31, 2017
Residential 1-4 family	\$ 665	\$ 486
Commercial	15	15
Construction and land development	1,052	2,290
Total other real estate owned	\$ 1,732	\$ 2,791

At September 30, 2018, the Company had \$507,000 in residential 1-4 family loans and PCI loans that were in the process of foreclosure.

Note 6. Deposits

The following table provides interest bearing deposit information, by type, at September 30, 2018 and December 31, 2017 (dollars in thousands):

Edgar Filing: Community Bankers Trust Corp - Form 10-Q

	September 30, 2018	December 31, 2017
NOW	\$ 147,026	\$ 157,037
MMDA	128,277	143,363
Savings	94,972	93,980
Time deposits less than or equal to \$250,000	491,044	437,810
Time deposits over \$250,000	113,715	110,546
Total interest bearing deposits	\$ 975,034	\$ 942,736

Note 7. Accumulated Other Comprehensive (Loss) Income

The following tables present activity net of tax in accumulated other comprehensive (loss) income (AOCI) for the three and nine months ended September 30, 2018 and 2017 (dollars in thousands):

	Three months ended September 30, 2018

Note 8. Fair Values of Assets and Liabilities

FASB ASC 820, *Fair Value Measurements and Disclosures*, defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. FASB ASC 820 requires that valuation techniques maximize the use of observable inputs and minimize the use of unobservable inputs and also establishes a fair value hierarchy that prioritizes the valuation inputs into three broad levels. The Company groups assets and liabilities at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

- Level 1—Valuation is based upon quoted prices for identical instruments traded in active markets.

- Level 2—Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

- Level 3—Valuation is determined using model-based techniques with significant assumptions not observable in the market. These unobservable assumptions reflect the Company's own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of third party pricing services, option pricing models, discounted cash flow models and similar techniques.

FASB ASC 825, *Financial Instruments*, allows an entity the irrevocable option to elect fair value for the initial and subsequent measurement for certain financial assets and liabilities on a contract-by-contract basis. The Company has not made any material FASB ASC 825 elections as of September 30, 2018.

Assets and Liabilities Recorded at Fair Value on a Recurring Basis

The Company utilizes fair value measurements to record adjustments to certain assets to determine fair value disclosures. Securities available for sale and the cash flow hedge are recorded at fair value on a recurring basis. The tables below present the recorded amount of assets and liabilities measured at fair value on a recurring basis (dollars in thousands):

	September 30, 2018			
	Total	Level 1	Level 2	Level 3
Investment securities available for sale

Total liabilities at fair value	\$-	\$ -	\$-	\$ -

Investment securities available for sale

Investment securities available for sale are recorded at fair value each reporting period. Fair value measurement is based upon quoted prices, if available (Level 1). Quoted prices are available within the same month as the settlement

date of the related security transaction. As a result, investment securities held at December 31, 2017 priced as Level 1 that were still held at September 30, 2018 were priced as Level 2 securities. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions (Level 2).

The Company utilizes a third party vendor to provide fair value data for purposes of determining the fair value of its available for sale securities portfolio. The third party vendor uses a reputable pricing company for security market data. The third party vendor has controls in place for month-to-month market checks and zero pricing, and a Statement on Standards for Attestation Engagements No. 16 report is obtained from the third party vendor on an annual basis. The Company makes no adjustments to the pricing service data received for its securities available for sale.

Cash flow hedge

The fair values of interest rate swaps are determined using the market standard methodology of netting the discounted future fixed cash receipts (or payments) and the discounted expected variable cash payments (or receipts). The variable cash payments (or receipts) are based on an expectation of future interest rates (forward curves) derived from observable market interest rate curves.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

The Company is also required to measure and recognize certain other financial assets at fair value on a nonrecurring basis on the consolidated balance sheet. The following tables present assets measured at fair value on a nonrecurring basis as of September 30, 2018 and December 31, 2017 (dollars in thousands):

September 30, 2018				
	Total	Level 1	Level 2	Level 3
Impaired loans	\$8,825	\$ —	\$ —	\$8,825
Bank premises and equipment held for sale	1,252	—	700	552
Other real estate owned	1,732	—	—	1,732
Total assets at fair value	\$11,809	\$ —	\$ 700	\$11,109
Total liabilities at fair value	\$—	\$ —	\$ —	\$—

December 31, 2017				
	Total	Level 1	Level 2	Level 3
Impaired loans	\$7,915	\$ —	\$1,306	\$6,609
Other real estate owned	2,791	—	1,203	1,588
Total assets at fair value	\$10,706	\$ —	\$2,509	\$8,197
Total liabilities at fair value	\$—	\$ —	\$ —	\$—

Impaired loans

Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures the impairment in accordance with FASB ASC 310, *Receivables*. The fair value of impaired loans is estimated using one of several methods, including collateral value and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceeds the recorded investments in such loans. At September 30, 2018 and December 31, 2017, a majority of total impaired loans were evaluated based on the fair value of the collateral. The Company frequently obtains appraisals prepared by external professional appraisers for classified loans greater than \$250,000 when the most recent appraisal is greater than 18 months old and/or deemed to be invalid. The Company may also utilize internally prepared estimates that generally result from current market data and actual sales data related to the Company's collateral. When the fair value of the collateral is based on an observable market price or a current appraised value without further adjustment for unobservable inputs, the Company records the impaired loan within Level 2.

The Company may also identify collateral deterioration based on current market sales data, including price and absorption, as well as input from real estate sales professionals and developers, county or city tax assessments, market data and on-site inspections by Company personnel. When management determines that the fair value of the collateral is further impaired below the appraised value, due to such things as absorption rates and market conditions, and there is no observable market price, the Company records the impaired loan as nonrecurring Level 3. At September 30, 2018 and December 31, 2017, the Level 3 weighted average adjustments related to impaired loans were 19.0% and 38.0%, respectively. In instances where an appraisal received subsequent to an internally prepared estimate reflects a higher collateral value, management does not revise the carrying amount. Impaired loans can also be evaluated for impairment using the present value of expected future cash flows discounted at the loan's effective interest rate. The measurement of impaired loans using future cash flows discounted at the loan's effective interest rate rather than the market rate of interest is not a fair value measurement and is therefore excluded from fair value disclosure requirements. Reviews of classified loans are performed by management on a quarterly basis.

Bank premises and equipment held for sale

The fair value of bank premises and equipment held for sale was determined using the adjusted appraisal methodology described in the other real estate owned (OREO) asset section below.

Other real estate owned

OREO assets are adjusted to fair value less estimated disposal costs upon transfer of the related loans to OREO, establishing a new cost basis. Subsequent to the transfer, valuations are periodically performed by management and the assets are carried at the lower of carrying value or fair value less estimated disposal costs. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the foreclosed asset within Level 2. When an appraised value is not available or management determines that the fair value of the collateral is further impaired below the appraised value due to such things as absorption rates and market conditions, the Company records the foreclosed asset within Level 3 of the fair value hierarchy.

Fair Value of Financial Instruments

FASB ASC 825, *Financial Instruments*, requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring or nonrecurring basis. FASB ASC 825 excludes certain financial instruments and all nonfinancial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Company.

The following reflects the fair value of financial instruments, whether or not recognized on the consolidated balance sheet, at fair value measures by level of valuation assumptions used for those assets. These tables exclude financial instruments for which the carrying value approximates fair value (dollars in thousands):

	September 30, 2018				
	Carrying	Estimated Fair			
	Value	Value	Level 1	Level 2	Level 3
Financial assets:					
Securities held to maturity	\$43,559	\$ 43,195	\$ —	\$43,195	\$—
Loans, net of allowance	953,432	958,935	—	—	958,935
PCI loans, net of allowance	39,007	42,519	—	—	42,519
Financial liabilities:					
Interest bearing deposits	975,034	973,178	—	973,178	—
Borrowings	67,944	67,591	—	67,591	—

Edgar Filing: Community Bankers Trust Corp - Form 10-Q

December 31, 2017

	Carrying Value	Estimated Fair Value	Level 1	Level 2	Level 3
Financial assets:					
Securities held to maturity	\$46,146	\$ 46,888	\$ —	\$46,888	\$—
Loans, net of allowance	933,049	933,938	—	927,329	6,609
PCI loans, net of allowance	44,133	48,655	—	—	48,655
Financial liabilities:					
Interest bearing deposits	942,736	943,037	—	943,037	—
Borrowings	105,553	105,363	—	105,363	—

Note 9. Earnings Per Common Share

Basic earnings per common share (EPS) is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted EPS is computed using the weighted average number of common shares outstanding during the period, including the effect of all potentially dilutive common shares outstanding attributable to stock instruments. The following table presents basic and diluted EPS for the three and nine months ended September 30, 2018 and 2017 (dollars and shares in thousands, except per share data):

	Net Income (Numerator)	Weighted Average Common Shares (Denominator)	Per Common Share Amount
For the three months September 30, 2018			
Basic EPS	\$ 3,955	22,115	\$ 0.18
Effect of dilutive stock awards	—	512	(0.01)
Diluted EPS	\$ 3,955	22,627	\$ 0.17
For the three months ended September 30, 2017			
Basic EPS	\$ 2,416	22,041	\$ 0.11
Effect of dilutive stock awards	—	501	—
Diluted EPS	\$ 2,416	22,542	\$ 0.11
For the nine months ended September 30, 2018			
Basic EPS	\$ 10,331	22,095	\$ 0.47
Effect of dilutive stock awards	—	481	(0.01)
Diluted EPS	\$ 10,331	22,576	\$ 0.46
For the nine months ended September 30, 2017			
Basic EPS	\$ 7,843	22,000	\$ 0.36
Effect of dilutive stock awards	—	491	(0.01)
Diluted EPS	\$ 7,843	22,491	\$ 0.35

There were no antidilutive exclusions from the computation of diluted earnings per common share for the three and nine months ended September 30, 2018 and 2017, respectively.

Note 10. Employee Benefit Plan

Edgar Filing: Community Bankers Trust Corp - Form 10-Q

The Company adopted the Bank of Essex noncontributory, defined benefit pension plan for all full-time pre-merger Bank of Essex employees over 21 years of age. Benefits are generally based upon years of service and the employees' compensation. The Company funds pension costs in accordance with the funding provisions of the Employee Retirement Income Security Act.

The Company has frozen the plan benefits for all the defined benefit plan participants effective December 31, 2010.

The following table provides the components of net periodic benefit cost for the plan included in salaries and employee benefits in the consolidated statement of income for the three and nine months ended September 30, 2018 and 2017 (dollars in thousands):

	Three months ended		Nine months ended	
	September 30, 2018	September 30, 2017	September 30, 2018	September 30, 2017
Interest cost	\$ 39	\$ 39	\$ 117	\$ 117
Expected return on plan assets	(59)	(70)	(177)	(210)
Amortization of prior service cost	1	1	3	3
Recognized net loss due to settlement	—	—	—	—
Recognized net actuarial loss	15	12	45	36
Net periodic benefit income	\$ (4)	\$ (18)	\$ (12)	\$ (54)

Note 11. Cash Flow Hedge

On November 7, 2014, the Company entered into an interest rate swap with a total notional amount of \$30 million. The Company designated the swap as a cash flow hedge intended to protect against the variability in the expected future cash flows on the designated variable rate borrowings. The swap hedges the interest rate risk, wherein the Company will receive an interest rate based on the three month LIBOR from the counterparty and pays an interest rate of 1.69% to the same counterparty calculated on the notional amount for a term of five years. The Company intends to sequentially issue a series of three month fixed rate debt as part of a planned roll-over of short term debt for five years. The forecasted funding will be provided through one of the following wholesale funding sources: a new FHLB advance, a new repurchase agreement, or a pool of brokered CDs, based on whichever market offers the most advantageous pricing at the time that pricing is first initially determined for the effective date of the swap and each reset period thereafter. Each quarter when the Company rolls over the three month debt, it will decide at that time which funding source to use for that quarterly period.

The swap was entered into with a counterparty that met the Company's credit standards, and the agreement contains collateral provisions protecting the at-risk party. The Company believes that the credit risk inherent in the contract is not significant. The Company had \$0 and \$390,000 of cash pledged as collateral for the periods ended September 30, 2018 and December 31, 2017, respectively.

Amounts receivable or payable are recognized as accrued under the terms of the agreements. In accordance with FASB ASC 815, *Derivatives and Hedging*, the Company has designated the swap as a cash flow hedge, with the effective portions of the derivatives' unrealized gains or losses recorded as a component of other comprehensive income. The ineffective portions of the unrealized gains or losses, if any, would be recorded in other operating expense. The Company has assessed the effectiveness of each hedging relationship by comparing the changes in cash flows on the designated hedged item. The Company's cash flow hedge was deemed to be effective for the three and nine months ended September 30, 2018 and 2017. The fair value of the Company's cash flow hedge was an unrealized gain of \$353,000 and \$177,000 at September 30, 2018 and December 31, 2017, respectively, and was recorded in other assets. The gain was recorded as a component of other comprehensive (loss) income net of associated tax effects.

Note 12. Revenue Recognition

On January 1, 2018, the Company adopted FASB ASU No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*, and all subsequent ASUs that modified Topic 606. The implementation of the new standard did not have a material impact on the measurement or recognition of revenue; as such, a cumulative effect adjustment to opening retained earnings was not deemed necessary. Topic 606 does not apply to revenue associated with financial instruments, including revenue from loans and securities. In addition, certain noninterest income streams such as fees

associated with mortgage servicing rights, financial guarantees, derivatives, and certain credit card fees are also not in scope of the new guidance. Topic 606 is applicable to noninterest revenue streams such as deposit related fees, interchange fees, merchant income, and brokerage fees and commissions. However, the recognition of these revenue streams did not change significantly upon adoption of Topic 606. Substantially all of the Company's revenue is generated from contracts with customers. Noninterest revenue streams in-scope of Topic 606 are discussed below.

Service charges on deposit accounts

The Company earns fees from its deposit customers for transaction-based, account maintenance, and overdraft services. Transaction-based fees, which include services such as stop payment charges, statement rendering, and ACH fees, are recognized at the time the transaction is executed as that is the point in time the Company fulfills the customer's request. Account maintenance fees, which relate primarily to monthly maintenance, are earned over the course of a month, representing the period over which the Company satisfies the performance obligation. Overdraft fees are recognized at the point in time that the overdraft occurs. Service charges on deposits are withdrawn from the customer's account balance.

Interchange and ATM fees

The Company earns interchange and ATM fees from debit/credit cardholder transactions conducted through the Visa and ATM payment networks. Interchange fees from cardholder transactions represent a percentage of the underlying transaction value and are recognized daily, concurrently with the transaction processing services provided to the cardholder. Because the Company acts as an agent and does not control the services rendered to the customers, related costs are netted against the fee income. These costs were included in other operating expenses prior to the adoption of Topic 606.

Brokerage fees and commissions

Brokerage fees and commissions consist of other recurring revenue streams such as commissions from sales of mutual funds and other investments to customers by a third-party service provider and investment advisor fees. The Company receives commissions from the third-party service provider on a monthly basis based upon customer activity for the month. The investment advisor fees are charged to the customer's account in advance on the first month of the quarter, and the revenue is recognized over the following three-month period.

The following table presents noninterest income, segregated by revenue streams in-scope and out-of-scope of Topic 606, for the three and nine months ended September 30, 2018 and 2017 (dollars in thousands):

	Three months ended September 30, 2018		September 30, 2017		Nine months ended September 30, 2018		September 30, 2017	
Noninterest income								
In-scope of Topic 606:								
Service charges on deposit accounts	\$ 411	\$	376		\$ 1,192	\$	1,130	
Interchange and ATM fees	215		183		626		535	
Brokerage fees and commissions	76		68		272		208	
Noninterest income (in-scope of Topic 606)	702		627		2,090		1,873	
Noninterest income (out-of-scope of Topic 606)	509		371		1,289		1,155	
Total noninterest income	\$ 1,211	\$	998		\$ 3,379	\$	3,028	

Note 13. Bank Premises and Equipment Held for Sale

The Company closed its Prince Street branch located in Tappahannock, Virginia as of the close of business June 29, 2018. From a historical perspective, when the Company opened its Dillard branch, also in Tappahannock, the Company's intention was to consolidate the Prince Street branch into the newer Dillard branch, which was built as a larger and modern banking facility. The Company is now following through with its intention.

The Prince Street branch building is being marketed for sale. The book value of \$552,000 reflects the lower of cost or fair market value at September 30, 2018 and has been classified as held for sale on the consolidated balance sheet.

Also included in bank premises and equipment held for sale is a piece of land the Company was holding as a possible future branch site. The Company has decided not to pursue that location and is marketing the property. The book value of \$700,000 reflects the lower of cost or fair market value at September 30, 2018.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of the financial condition at September 30, 2018 and results of operations of Community Bankers Trust Corporation (the "Company") for the three and nine months ended September 30, 2018 should be read in conjunction with the Company's consolidated financial statements and the accompanying notes to consolidated financial statements included in this report and in the Company's Annual Report on Form 10-K for the year ended December 31, 2017.

OVERVIEW

Community Bankers Trust Corporation (the "Company") is headquartered in Richmond, Virginia and is the holding company for Essex Bank (the "Bank"), a Virginia state bank with 25 full-service offices in Virginia and Maryland.

The Bank engages in a general commercial banking business and provides a wide range of financial services primarily to individuals, small businesses and larger commercial companies, including individual and commercial demand and time deposit accounts, commercial and industrial loans, consumer and small business loans, real estate and mortgage loans, investment services, on-line and mobile banking products, and cash management services.

The Company generates a significant amount of its income from the net interest income earned by the Bank. Net interest income is the difference between interest income and interest expense. Interest income depends on the amount of interest earning assets outstanding during the period and the interest rates earned thereon. The Company's cost of funds is a function of the average amount of interest bearing deposits and borrowed money outstanding during the period and the interest rates paid thereon. The mix and product type for both loans and deposits can have a significant effect on the net interest income of the Bank. For the past several years, the Bank's focus has been on maximizing that mix through branch growth and targeted product types, with lenders and other employees directly involved with customer relationships. Additionally, the quality of the interest earning assets further influences the amount of interest income lost on nonaccrual loans and the amount of additions to the allowance for loan losses.

The Bank also earns noninterest income from service charges on deposit accounts and other fee or commission-based services and products, such as insurance, mortgage loans, annuities, and other wealth management products. Other sources of noninterest income can include gains or losses on securities transactions and income from bank owned life insurance (BOLI) policies. The Company's income is offset by noninterest expense, which consists of salaries and employee benefits, occupancy and equipment costs, data processing expenses, professional fees, transactions involving bank-owned property, and other operational expenses. The provision for loan losses and income taxes may materially affect net income.

CAUTION ABOUT FORWARD-LOOKING STATEMENTS

The Company makes certain forward-looking statements in this report that are subject to risks and uncertainties. These forward-looking statements include statements regarding our profitability, liquidity, allowance for loan losses, interest rate sensitivity, market risk, future strategy, and financial and other goals. These forward-looking statements are generally identified by phrases such as "the Company expects," "the Company believes" or words of similar import.

These forward-looking statements are subject to significant uncertainties because they are based upon or are affected by factors, including, without limitation, the effects of and changes in the following:

- the quality or composition of the Company's loan or investment portfolios, including collateral values and the repayment abilities of borrowers and issuers;

- assumptions that underlie the Company's allowance for loan losses;
- general economic and market conditions, either nationally or in the Company's market areas;
- the interest rate environment;
- competitive pressures among banks and financial institutions or from companies outside the banking industry;
- real estate values;
- the demand for deposit, loan, and investment products and other financial services;
- the demand, development and acceptance of new products and services;
- the performance of vendors or other parties with which the Company does business;
- time and costs associated with de novo branching, acquisitions, dispositions and similar transactions;
- the realization of gains and expense savings from acquisitions, dispositions and similar transactions;

- assumptions and estimates that underlie the accounting for purchased credit impaired loans;
- consumer profiles and spending and savings habits;
- levels of fraud in the banking industry;
- the level of attempted cyber attacks in the banking industry;
- the securities and credit markets;
- costs associated with the integration of banking and other internal operations;
- the soundness of other financial institutions with which the Company does business;
- inflation;
- technology; and
- legislative and regulatory requirements.

These factors and additional risks and uncertainties are described in the Company's Annual Report on Form 10-K for the year ended December 31, 2017 and other reports filed from time to time by the Company with the Securities and Exchange Commission.

Although the Company believes that its expectations with respect to the forward-looking statements are based upon reliable assumptions within the bounds of its knowledge of its business and operations, there can be no assurance that actual results, performance or achievements of the Company will not differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements.

CRITICAL ACCOUNTING POLICIES

The Company's financial statements are prepared in accordance with accounting principles generally accepted in the United States (GAAP). The financial information contained within the statements is, to a significant extent, financial information that is based on measures of the financial effects of transactions and events that have already occurred. A variety of factors could affect the ultimate value that is obtained when either earning income, recognizing an expense, recovering an asset or relieving a liability. For example, the Company uses historical loss factors as one factor in determining the inherent loss that may be present in its loan portfolio. Actual losses could differ significantly from the historical factors that the Company uses. In addition, GAAP itself may change from one previously acceptable method to another method. Although the economics of the Company's transactions would be the same, the timing of events that would impact its transactions could change.

The following is a summary of the Company's critical accounting policies that are highly dependent on estimates, assumptions and judgments.

Allowance for Loan Losses on Loans

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance is an amount that management believes is appropriate to absorb estimated losses relating to specifically identified loans, as well as probable credit losses inherent in the balance of the loan portfolio, based on an evaluation of the collectability of existing loans and prior loss experience. This evaluation also takes into consideration such factors as changes in the nature and volume of the loan portfolio, overall portfolio quality, review of specific problem loans, and current economic conditions that may affect the borrower's ability to pay. This evaluation does not include the effects of expected losses on specific loans or groups of loans that are related to future events or expected changes in economic conditions. The evaluation also considers the following risk characteristics of each loan portfolio:

Residential 1-4 family mortgage loans include HELOCs and single family investment properties secured by first liens. The carry risks associated with owner-occupied and investment properties are the continued credit-worthiness of the borrower, changes in the value of the collateral, successful property maintenance and collection of rents due from tenants. The Company manages these risks by using specific underwriting policies and procedures and by avoiding concentrations in geographic regions.

Commercial real estate loans, including owner occupied and non-owner occupied mortgages, carry risks associated with the successful operations of the principal business operated on the property securing the loan or the successful operation of the real estate project securing the loan. General market conditions and economic activity may impact the performance of these loans. In addition to using specific underwriting policies and procedures for these types of loans, the Company manages risk by avoiding concentrations to any one business or industry, and by diversifying the lending to various lines of businesses, such as retail, office, office warehouse, industrial and hotel.

Construction and land development loans are generally made to commercial and residential builders/developers for specific construction projects, as well as to consumer borrowers. These carry more risk than real estate term loans due to the dynamics of construction projects, changes in interest rates, the long-term financing market and state and local government regulations. The Company manages risk by using specific underwriting policies and procedures for these types of loans and by avoiding concentrations to any one business or industry and by diversifying lending to various lines of businesses, in various geographic regions and in various sales or rental price points.

Second mortgages on residential 1-4 family loans carry risk associated with the continued credit-worthiness of the borrower, changes in value of the collateral and a higher risk of loss in the event the collateral is liquidated due to the inferior lien position. The Company manages risk by using specific underwriting policies and procedures.

Multifamily loans carry risks associated with the successful operation of the property, general real estate market conditions and economic activity. In addition to using specific underwriting policies and procedures, the Company manages risk by avoiding concentrations to geographic regions and by diversifying the lending to various unit mixes, tenant profiles and rental rates.

Agriculture loans carry risks associated with the successful operation of the business, changes in value of non-real estate collateral that may depreciate over time and inventory that may be affected by weather, biological, price, labor, regulatory and economic factors. The Company manages risks by using specific underwriting policies and procedures, as well as avoiding concentrations to individual borrowers and by diversifying lending to various agricultural lines of business (i.e., crops, cattle, dairy, etc.).

Commercial loans carry risks associated with the successful operation of the business, changes in value of non-real estate collateral that may depreciate over time, accounts receivable whose collectability may change and inventory values that may be subject to various risks including obsolescence. General market conditions and economic activity may also impact the performance of these loans. In addition to using specific underwriting policies and procedures for these types of loans, the Company manages risk by diversifying the lending to various industries and avoids geographic concentrations.

Consumer installment loans carry risks associated with the continued credit-worthiness of the borrower and the value of rapidly depreciating assets or lack thereof. These types of loans are more likely than real estate loans to be quickly and adversely affected by job loss, divorce, illness or personal bankruptcy. The Company manages risk by using specific underwriting policies and procedures for these types of loans.

All other loans generally support the obligations of state and political subdivisions in the U.S. and are not a material source of business for the Company. The loans carry risks associated with the continued credit-worthiness of the obligations and economic activity. The Company manages risk by using specific underwriting policies and procedures for these types of loans.

While management uses the best information available to make its evaluation, future adjustments to the allowance may be necessary if there are significant changes in economic conditions. In addition, regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses, and may require the Company to make additions to the allowance based on their judgment about information available to them at the time of their examinations.

The allowance consists of specific, general and unallocated components. For loans that are also classified as impaired, an allowance is established when the collateral value (or discounted cash flows or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers non-classified loans and is based on historical loss experience adjusted for qualitative factors. The unallocated component covers uncertainties that could affect management's estimate of probable losses.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured by either the present value of the expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Large groups of smaller balance homogeneous loans are evaluated for impairment as a pool. Accordingly, the Company does not separately analyze these individual loans for impairment disclosures.

Accounting for Certain Loans Acquired in a Transfer

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 310, *Receivables*, requires acquired loans to be recorded at fair value and prohibits carrying over valuation allowances in the initial accounting for acquired impaired loans. Loans carried at fair value, mortgage loans held for sale, and loans to borrowers in good standing under revolving credit arrangements are excluded from the scope of FASB ASC 310, which limits the yield that may be accreted to the excess of the undiscounted expected cash flows over the investor's initial investment in the loan. The excess of the contractual cash flows over expected cash flows may not be recognized as an adjustment of yield. Subsequent increases in cash flows to be collected are recognized prospectively through an adjustment of the loan's yield over its remaining life. Decreases in expected cash flows are recognized as impairments through the allowance for loan losses.

The Company's acquired loans from the Suburban Federal Savings Bank (SFSB) transaction (the "PCI loans"), subject to FASB ASC Topic 805, *Business Combinations*, were recorded at fair value and no separate valuation allowance was recorded at the date of acquisition. FASB ASC 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality*, applies to loans acquired in a transfer with evidence of deterioration of credit quality for which it is probable, at acquisition, that the investor will be unable to collect all contractually required payments receivable. The Company

is applying the provisions of FASB ASC 310-30 to all loans acquired in the SFSB transaction. The Company has grouped loans together based on common risk characteristics including product type, delinquency status and loan documentation requirements among others.

The PCI loans are subject to the credit review standards described above for loans. If and when credit deterioration occurs subsequent to the date that the loans were acquired, a provision for loan loss for PCI loans will be charged to earnings for the full amount.

The Company has made an estimate of the total cash flows it expects to collect from each pool of loans, which includes undiscounted expected principal and interest. The excess of that amount over the fair value of the pool is referred to as accretable yield. Accretable yield is recognized as interest income on a constant yield basis over the life of the pool. The Company also determines each pool's contractual principal and contractual interest payments. The excess of that amount over the total cash flows that it expects to collect from the pool is referred to as nonaccretable difference, and is not recorded. Judgmental prepayment assumptions are applied to both contractually required payments and cash flows expected to be collected at acquisition. Over the life of the loan or pool, the Company continues to estimate cash flows expected to be collected. Subsequent decreases in cash flows expected to be collected over the life of the pool are recognized as an impairment in the current period through the allowance for loan losses. Subsequent increases in expected or actual cash flows are first used to reverse any existing valuation allowance for that loan or pool. Any remaining increase in cash flows expected to be collected is recognized as an adjustment to the accretable yield with the amount of periodic accretion adjusted over the remaining life of the pool.

Other Real Estate Owned

Real estate acquired through, or in lieu of, loan foreclosure is held for sale and is initially recorded at the fair value at the date of foreclosure net of estimated disposal costs, establishing a new cost basis. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of the carrying amount or the fair value less costs to sell. Revenues and expenses from operations and changes in the valuation allowance are included in other operating expenses. Costs to bring a property to salable condition are capitalized up to the fair value of the property while costs to maintain a property in salable condition are expensed as incurred.

Income Taxes

Deferred income tax assets and liabilities are determined using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the temporary differences between the book and tax bases of the various balance sheet assets and liabilities and gives current recognition to changes in tax rates and laws.

Positions taken in the Company's tax returns may be subject to challenge by the taxing authorities upon examination. Uncertain tax positions are initially recognized in the consolidated financial statements when it is more likely than not that the position will be sustained upon examination by the tax authorities. Such tax positions are both initially and subsequently measured as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon settlement with the tax authority, assuming full knowledge of the position and all relevant facts. The Company provides for interest and, in some cases, penalties on tax positions that may be challenged by the taxing authorities. Interest expense is recognized beginning in the first period that such interest would begin accruing. Penalties are recognized in the period that the Company claims the position in the tax return. Interest and penalties on income tax uncertainties are classified within income tax expense in the consolidated statement of income. The Company had no such interest or penalties during the three and nine months ended September 30, 2018 and 2017. Under FASB ASC 740, *Income Taxes*, a valuation allowance is provided when it is more likely than not that some portion of the deferred tax asset will not be realized. In management's opinion, based on a three year taxable income projection, tax strategies that would result in potential securities gains and the effects of off-setting deferred tax liabilities, it is more likely than not that the deferred tax assets are realizable; therefore, no allowance is required.

The Company and the Bank are subject to U.S. federal income tax as well as Virginia and Maryland state income tax. All years from 2014 through 2017 are open to examination by the respective tax authorities.

RESULTS OF OPERATIONS

Overview

Net income of \$4.0 million for the third quarter of 2018 was an increase of \$1.5 million, or 63.7%, over net income of \$2.4 million for the third quarter of 2017. Pre-tax net income increased \$1.6 million, or 46.9%, in the third quarter of 2018. Interest and dividend income increased by \$1.8 million in the third quarter of 2018 compared with the same period in 2017, driven by interest and fees on loans, which increased \$1.8 million. Noninterest income increased by \$213,000 year-over-year, and noninterest expenses declined by \$248,000. Offsetting these increases was an increase in income tax expense, which was \$26,000 greater, year-over-year, based on the increase in pre-tax income but lessened by the reduction in the corporate tax rate, from 34% to 21%.

Net income was \$10.3 million for the first nine months of 2018 compared with \$7.8 million for the same period in 2017. This is an increase of \$2.5 million, or 31.7%. Increases were in interest and dividend income, which increased by \$4.2 million, or 10.6%, and in noninterest income, which increased by \$351,000, or 11.6%. Also positively affecting earnings were a reduction of \$150,000 in the provision for loan losses and a decrease of \$389,000 in income tax expense when comparing the two periods. Offsetting these increases to net income were an increase of \$1.9 million in interest expense and an increase of \$629,000 in noninterest expense. By comparing pre-tax income for the two periods, most of the effect of the Tax Cuts and Jobs Act of 2017 is eliminated. This comparison reflects that income before income taxes increased by \$2.1 million, or 19.9%, for the first nine months of 2018 compared with the same period in 2017.

Net Interest Income

The Company's operating results depend primarily on its net interest income, which is the difference between interest income on interest-earning assets, including securities and loans, and interest expense incurred on interest bearing liabilities, including deposits and other borrowed funds. Net interest income is affected by changes in the amount and mix of interest earning assets and interest bearing liabilities, referred to as a "volume change." It is also affected by changes in yields earned on interest earning assets and rates paid on interest bearing deposits and other borrowed funds, referred to as a "rate change."

Net interest income increased \$954,000, or 8.7%, from the third quarter of 2017 to the third quarter of 2018. Net interest income was \$12.0 million in the third quarter of 2018 compared with \$11.0 million for the same period in 2017. Interest and dividend income increased \$1.8 million, or 13.1%, over this time period. The increase in interest and dividend income was generated by an increase of \$70.3 million, or 5.8%, in the level of earning assets. The yield on earning assets increased from 4.51% in the third quarter of 2017 to 4.76% in the third quarter of 2018. The average balance of loans, excluding PCI loans, increased \$96.3 million, or 11.1%, from \$869.5 million in the third quarter of 2017 to \$965.8 million in the third quarter of 2018. Interest income on securities increased \$119,000 and was \$1.9 million in the third quarter of 2018, compared to \$1.8 million in the third quarter of 2017. On a tax-equivalent basis, the yield on investment securities was 3.21% in the third quarter of 2018, based on a 21% tax rate, and 3.10% in the third quarter of 2017, based on a 34% tax rate. Interest on deposits in other banks increased by \$29,000 in the third quarter of 2018 over the same period in 2017 primarily due to an increase in the return on those balances from 1.40% in 2017 to 2.45% in 2018.

Interest on PCI loans was \$1.3 million in the third quarter of 2018 compared with \$1.4 million in the third quarter of 2017. The average balance of the PCI portfolio declined \$7.7 million during the year-over-year comparison period.

Interest expense increased \$801,000, or 33.9%, when comparing the third quarter of 2017 and the third quarter of 2018. Interest expense on deposits increased \$646,000, or 31.5%, as the average balance of interest bearing deposits increased \$33.5 million, or 3.6%. The increase in deposit cost was driven by an increase in the average balance of demand – interest bearing accounts, which increased a combined \$4.2 million year-over-year. Likewise, the cost of these balances increased \$13,000, from 0.40% to 0.42%, over the same time frame. Higher cost time deposit average balances increased over the comparison period by \$25.7 million, and expense on this category increased by \$631,000, resulting in an increase in cost from 1.19% to 1.56%. The average balance of FHLB and other borrowings increased \$13.1 million year-over-year, and there was an increase in the rate paid, from 1.57% in the third quarter of 2017 to 1.98% in the third quarter of 2018. This resulted in an increase in the expense of this wholesale funding source of \$144,000, to \$452,000 in the third quarter of 2018. The average balance of FHLB and other borrowings was \$90.8 million in the third quarter of 2018. Overall, the Company's cost of interest bearing liabilities increased 26 basis points, from 0.92% in the third quarter of 2017 to 1.18% in the third quarter of 2018.

Edgar Filing: Community Bankers Trust Corp - Form 10-Q

The tax-equivalent net interest margin increased three basis points, from 3.74% in the third quarter of 2017 to 3.77% in the third quarter of 2018. The interest spread decreased from 3.59% to 3.58% over the same time period. Net interest margin increased despite the decrease in interest spread because growth in the average balance of earning assets of \$70.3 million was partially funded by growth in the average balance of noninterest bearing deposits of \$18.9 million.

For the first nine months of 2018 compared with the same period in 2017, net interest income increased \$2.2 million, or 6.8%, and was \$35.1 million. The yield on earning assets was 4.67% for the first nine months of 2018 compared with 4.55% for the first nine months of 2017. Interest and fees on loans of \$34.1 million in the first three quarters of 2018 was an increase of \$4.4 million compared with \$29.7 million for the same period in 2017. Interest and fees on PCI loans declined \$418,000 over this same time frame. Securities income increased \$88,000 for the first nine months of 2018 compared with the same period in 2017. Interest on deposits in other banks increased \$60,000 for the first three quarters of 2018 over the same period in 2017 primarily due to an increase in the return on those balances from 1.22% to 2.08%. On a tax-equivalent basis, income on securities decreased \$402,000, primarily the result of less benefit on bank qualified municipal securities from the enactment of the Tax Cut and Jobs Act in December 2017. The tax-equivalent yield on the portfolio was 3.10% for the first three quarters of 2018, based on a 21% tax rate, and 3.14% for the same period in 2017, based on a 34% tax rate.

Interest expense of \$8.6 million represented an increase of \$1.9 million in the first nine months of 2018 compared with the same period in 2017. Average interest bearing liabilities increased \$50.9 million, or 5.0%, as loan growth was fueled by an increase of \$42.0 million, or 16.6%, in the average balance of demand - interest bearing accounts. This has allowed more expensive time deposit balances to decrease, on average, by \$11.4 million, or 2.0%, resulting in a \$33.1 million increase in the average balance of total deposits.

The tax equivalent net interest margin declined from 3.80% for the first nine months of 2017 to 3.76% for the first nine months of 2018. While the yield on earning assets increased by 12 basis points over this time frame, the competition for funding has pushed the cost of interest bearing liabilities up, from 0.89% to 1.09%. Likewise, the net interest spread declined and was 3.58% for the first nine months of 2018 versus 3.66% for the first nine months of 2017.

The following tables set forth, for each category of interest-earning assets and interest bearing liabilities, the average amounts outstanding, the interest earned or paid on such amounts, and the average rate earned or paid for the three and nine months ended September 30, 2018 and 2017. The tables also set forth the average rate paid on total interest bearing liabilities, and the net interest margin on average total interest earning assets for the same periods. Except as indicated in the footnotes, no tax equivalent adjustments were made and all average balances are daily average balances. Any nonaccruing loans have been included in the tables, as loans carrying a zero yield.

Provision for Loan Losses

Management actively monitors the Company's asset quality and provides specific loss provisions when necessary. Provisions for loan losses are charged to income to bring the total allowance for loan losses to a level deemed appropriate by management of the Company based on such factors as historical credit loss experience, industry diversification of the commercial loan portfolio, the amount of nonperforming loans and related collateral, the volume growth and composition of the loan portfolio, current economic conditions that may affect the borrower's ability to pay and the value of collateral, the evaluation of the loan portfolio through the internal loan review function and other relevant factors. See *Allowance for Loan Losses on Loans* in the Critical Accounting Policies section above for further discussion.

Loans are charged-off against the allowance for loan losses when appropriate. Although management believes it uses the best information available to make determinations with respect to the provision for loan losses, future adjustments may be necessary if economic conditions differ from the assumptions used in making the initial determinations.

Management also actively monitors its PCI loan portfolio for impairment and necessary loan loss provisions. Provisions for these loans may be necessary due to a change in expected cash flows or an increase in expected losses within a pool of loans.

There was no provision for loan losses on the loan portfolio, excluding PCI loans, during either of the three and nine months ended September 30, 2018 and 2017. The absence of a provision through the first nine months of 2018 was the direct result of nominal charge-offs and stable asset quality. There was no provision for loan losses on the PCI loan portfolio during either of the three and nine months ended September 30, 2018 and 2017. Additional discussion of loan quality is presented below.

The loan portfolio, excluding PCI loans, had net charge-offs of \$96,000 in the third quarter of 2018, compared with net charge-offs of \$972,000 in the third quarter of 2017. Total charge-offs were \$190,000 for the third quarter of 2018 compared with \$1.1 million in the third quarter of 2017. Recoveries of previously charged-off loans were \$94,000 for the third quarter of 2018 compared with \$89,000 in the third quarter of 2017.

There were net recoveries of \$24,000 for the nine months ended September 30, 2018 for loans, excluding PCI loans, compared with net charge-offs of \$976,000 for the nine months ended September 30, 2017. Total charge-offs were \$394,000 for the nine months ended September 30, 2018 compared with \$1.4 million for the nine months ended September 30, 2017. Recoveries of previously charged-off loans were \$418,000 for the nine months ended September 30, 2018 compared with \$380,000 for the nine months ended September 30, 2017.

Noninterest Income

Noninterest income increased \$213,000, or 21.3%, and was \$1.2 million in the third quarter of 2018 compared with \$998,000 in the third quarter of 2017. Service charges and fees exhibited the largest increase, \$68,000, in the third quarter of 2018 compared with the same period in 2017 and were \$626,000. Gain on sale of loans was \$65,000 in the third quarter of 2018 compared with \$0 in the third quarter of 2017. Mortgage loan income increased \$38,000 year-over-year, from \$59,000 in the third quarter of 2017 to \$97,000 in the same period in 2018. Other noninterest income, once again as a result of improved brokerage commission and investment dividend income, increased \$26,000 year-over-year.

Noninterest income was \$3.4 million for the first nine months of 2018, an increase of \$351,000, or 11.6%, compared with \$3.0 million for the first nine months of 2017. Service charges and fees increased \$153,000 for the first nine months of 2018 compared with the same period in 2017 and were \$1.8 million. Mortgage loan income of \$288,000 for the first nine months of 2018 was an increase of \$125,000 from \$163,000 for the same period in 2017. Gain on sale of loans was \$118,000 for the first nine months of 2018 versus \$0 for the same period in 2017. Other noninterest income, driven by higher brokerage commission and investment dividend income, reflected an increase of \$74,000 for the first nine months of 2018 over the same period in 2017. Partially offsetting these increases was a decline of \$98,000 in gain on securities transactions, net, which were \$82,000 for the first nine months of 2018.

Noninterest Expense

Noninterest expenses decreased \$248,000, or 2.9%, when comparing the third quarter of 2018 to the same period in 2017. Other operating expenses decreased \$265,000, or 16.1%. Bank franchise tax declined by \$121,000 over the comparison period due to refunds received on amended returns during the third quarter of 2018, as did telephone and internet line expense, which decreased by \$114,000 as a result of bringing line monitoring management in-house during the second quarter of 2018, and credit expense, which decreased by \$67,000. Occupancy expense decreased by \$77,000 year-over-year and amortization of intangibles decreased \$62,000 year-over-year. Offsetting these decreases to noninterest expenses were increases of \$78,000 in salaries and employee benefits, \$61,000 in equipment expenses and \$26,000 in other real estate expenses, net.

Noninterest expenses were \$25.8 million for the first nine months of 2018, as compared with \$25.2 million for the same period in 2017. This is an increase of \$629,000, or 2.5%. Salaries and employee benefits increased \$1.5 million for the first nine months of 2018 compared with the same period in 2017. Within this increase, \$668,000 was related to group hospital and medical insurance increases and \$576,000 was related to increases in total salaries. Also impacting noninterest expenses for the first nine months of 2018 compared with the same period in 2017 were increases of \$175,000 in equipment expenses and \$32,000 in occupancy expenses reflecting the opening of three new branches during 2017. Other real estate expenses, net, also increased \$60,000 during the same period. These increases were offset by a decline of \$878,000 in amortization of intangibles, which became fully amortized in 2017, and a decline of \$273,000 in other operating expenses. Significant decreases in 2018 in other operating expenses were declines of \$160,000 in telephone and internet line expense due to the in-house change noted above, \$135,000 in credit expense, \$97,000 in stationery, printing and supplies and \$79,000 in bank franchise tax. Other expenses included in other operating expenses increased \$140,000 for the first nine months of 2018 compared with the same period in 2017 as did outside vendor fees, which increased by \$92,000.

Income Taxes

Income tax expense was \$945,000 for the three months ended September 30, 2018, compared with income tax expense of \$919,000 for the third quarter of 2017. For the nine months ended September 30, 2018, income tax expense was \$2.3 million compared with \$2.7 million for the first nine months of 2017. The effective tax rate for the third quarter of 2018 was 19.3% versus 27.6% in the third quarter of 2017. For the first nine months of 2018, the effective tax rate was 18.2% and, for the same period in 2017, it was 25.5%. The decrease in the Company's effective tax rate resulted principally from the decrease in its applicable federal corporate income tax rate from 34% to 21% as a result of the Tax Cuts and Jobs Act enacted in December 2017.

FINANCIAL CONDITION

General

Total assets increased \$14.2 million, or 1.1%, to \$1.350 billion at September 30, 2018 when compared with December 31, 2017. Total loans, excluding PCI loans, were \$962.4 million at September 30, 2018, increasing \$20.4 million, or 2.2%, from year end 2017. Total PCI loans were \$39.1 million at September 30, 2018 versus \$44.3 million at year end 2017.

During the first nine months of 2018, loans grew by \$20.4 million, or 2.2%. Construction and land development loans grew by \$27.2 million, or 25.2%, commercial loans grew by \$11.3 million, or 7.1%, and consumer installment loans

grew by \$8.0 million. Offsetting these increases were declining balances in residential 1 – 4 family mortgages, which declined by \$11.3 million, or 5.0%, commercial mortgage loans, which declined by \$7.8 million, or 2.1%, and multifamily loans, which decreased \$6.8 million, or 11.5%. In March 2018, the Company purchased an in-market, high quality consumer auto loan pool totaling \$9.0 million. The addition of these loans brought an increase in diversification to the portfolio.

The Company's securities portfolio, excluding restricted equity securities of \$7.9 million, declined \$6.8 million since year end 2017 to total \$244.2 million at September 30, 2018. Net gains of \$68,000 were realized during the third quarter of 2018 through sales and call activity. For the first nine months of 2018, there were net gains of \$82,000 realized through sales and call activity. The Company actively manages the portfolio to improve its liquidity and maximize the return within the desired risk profile.

The Company is required to account for the effect of market changes in the value of securities available-for-sale (AFS) under FASB ASC 320, *Investments – Debt and Equity Securities*. The market value of the AFS portfolio was \$200.6 million at September 30, 2018 and \$204.8 million at December 31, 2017. At September 30, 2018, the Company had a net unrealized loss on the AFS portfolio of \$3.3 million compared with a net unrealized gain of \$1.2 million at December 31, 2017. Municipal securities comprised 57.7% of the total AFS portfolio at September 30, 2018. These securities exhibit more price volatility in a changing interest rate environment because of their longer weighted average life, as compared to other categories contained within the rest of the portfolio.

The Company had cash and cash equivalents of \$24.3 million and \$22.0 million at September 30, 2018 and December 31, 2017, respectively. There were federal funds sold of \$240,000 at September 30, 2018. There were federal funds purchased of \$10.0 million at September 30, 2018 and \$4.8 million at December 31, 2017. Interest bearing bank balances were \$11.2 million at September 30, 2018 compared with \$7.3 million at December 31, 2017.

Interest bearing deposits at September 30, 2018 were \$975.0 million, an increase of \$32.3 million from December 31, 2017. Time deposits less than or equal to \$250,000 have shown the largest dollar volume growth during 2018 with \$53.2 million in additional balances and totaling \$491.0 million at quarter end. Time deposits over \$250,000 grew by \$3.2 million and were \$113.7 million at September 30, 2018. NOW accounts decreased by \$10.0 million and were \$147.0 million at September 30, 2018. The overall increase has allowed the Company to decrease balances with brokered time deposits by \$12.0 million over the last year, and those balances were only \$2.5 million at September 30, 2018.

FHLB advances were \$63.8 million at September 30, 2018, compared with \$101.4 million at December 31, 2017.

Shareholders' equity was \$131.8 million at September 30, 2018 and \$124.0 million at December 31, 2017. Shareholder's equity to assets was 9.8% at September 30, 2018 and 9.3% at December 31, 2017.

Asset Quality – excluding PCI loans

The allowance for loan losses represents management's estimate of the amount appropriate to provide for probable losses inherent in the loan portfolio.

Loan quality is continually monitored, and the Company's management has established an allowance for loan losses that it believes is appropriate for the risks inherent in the loan portfolio. Among other factors, management considers the Company's historical loss experience, the size and composition of the loan portfolio, the value and appropriateness of collateral and guarantors, nonperforming loans and current and anticipated economic conditions. There are additional risks of future loan losses, which cannot be precisely quantified nor attributed to particular loans or classes of loans. Because those risks include general economic trends, as well as conditions affecting individual borrowers, the allowance for loan losses is an estimate. The allowance is also subject to regulatory examinations and determination as to appropriateness, which may take into account such factors as the methodology used to calculate the allowance and size of the allowance in comparison to peer companies identified by regulatory agencies. See *Allowance for Loan Losses on Loans* in the Critical Accounting Policies section above for further discussion.

The Company maintains a list of loans that have potential weaknesses and thus may need special attention. This loan list is used to monitor such loans and is used in the determination of the appropriateness of the allowance for loan losses. Nonperforming assets totaled \$10.6 million at September 30, 2018 and net charge-offs were \$96,000 for the three months ended September 30, 2018 and net recoveries were \$24,000 for the nine months ended September 30, 2018. This compares with nonperforming assets of \$11.8 million at and net charge-offs of \$1.1 million for the year ended December 31, 2017.

Nonperforming loans were \$8.9 million at September 30, 2018, a \$132,000 decrease from \$9.0 million at December 31, 2017. The \$132,000 decrease in nonperforming loans since December 31, 2017 was the net result of \$3.1 million in additions to nonperforming loans and \$3.2 million in reductions. The increase related mainly to two residential 1-4 family construction relationships comprised of four loans totaling \$1.5 million, one commercial real estate relationship loan of \$964,000, and one commercial relationship loan of \$285,000. With respect to the reductions in nonperforming loans, \$1.3 million were payments to existing credits, \$266,000 were charge-offs, \$1.3 million were paid off, and \$360,000 returned to accruing status.

The allowance for loan losses, excluding PCI, equaled 101.11% of nonaccrual loans at September 30, 2018 compared with 99.37% at December 31, 2017. The ratio of nonperforming assets to loans and OREO decreased 15 basis points. The ratio was 1.10% at September 30, 2018 versus 1.25% at December 31, 2017.

In accordance with GAAP, an individual loan is impaired when, based on current information and events, it is probable that a creditor will be unable to collect all amounts due in accordance with contractual terms of the loan agreement. The Company considers all troubled debt restructures and nonaccrual loans to be impaired loans. In addition, the Company reviews all substandard and doubtful loans that are not on nonaccrual status, as well as loans with other risk characteristics, pursuant to and specifically for compliance with the accounting definition of impairment as described above. These impaired loans have been determined through analysis, appraisals, or other methods used by management.

See Note 3 to the Company's financial statements for information related to the allowance for loan losses. At September 30, 2018 and December 31, 2017, total impaired loans, excluding PCI loans, equaled \$17.1 million and \$14.3 million, respectively.

The following table sets forth selected asset quality data, excluding PCI loans, and ratios for the dates indicated (dollars in thousands):

	September 30, 2018	December 31, 2017
Nonaccrual loans	\$ 8,894	\$ 9,026
Loans past due 90 days and accruing interest	—	—
Total nonperforming loans	8,894	9,026
OREO	1,732	2,791
Total nonperforming assets	\$ 10,626	\$ 11,817
Accruing troubled debt restructure loans	\$ 8,171	\$ 5,271
Balances		
Specific reserve on impaired loans	1,476	959
General reserve related to unimpaired loans	7,517	8,010
Total allowance for loan losses	8,993	8,969
Average loans during the year, net of unearned income	956,109	870,258
Impaired loans	17,065	14,297
Non-impaired loans	945,360	927,721
Total loans, net of unearned income	962,425	942,018
Ratios		
Allowance for loan losses to loans	0.93	% 0.95
Allowance for loan losses to nonaccrual loans	101.11	99.37
General reserve to non-impaired loans	0.80	0.86
Nonaccrual loans to loans	0.92	0.96
Nonperforming assets to loans and OREO	1.10	1.25
Net (recoveries) charge-offs to average loans	(0.00	) 0.12

The Company grants troubled debt restructures (TDR) and other various loan workouts whereby an existing loan may be restructured into multiple new loans. At September 30, 2018, the Company had 24 loans that met the definition of a TDR, which are loans that for reasons related to the debtor's financial difficulties have been restructured on terms and conditions that would otherwise not be offered or granted. Six of these loans totaling \$3.3 million were restructured using multiple new loans. The aggregated outstanding principal of all TDR loans at September 30, 2018 was \$9.4 million, of which \$1.2 million were classified as nonaccrual.

The primary benefit of the restructured multiple loan workout strategy is to maximize the potential return by restructuring the loan into a “good loan” (the A loan) and a “bad loan” (the B loan). The impact on interest is positive because the Company is collecting interest on the A loan rather than potentially not collecting interest on the entire original loan structure. The A loan is underwritten pursuant to the Company’s standard requirements and graded accordingly. The B loan is classified as either “doubtful” or “loss”. An impairment analysis is performed on the B loan and, based on its results, all or a portion of the B loan is charged-off or a specific loan loss reserve is established.

The Company does not modify its nonaccrual policies in this arrangement, and the A loan and the B loan stand on their own terms. At inception, this structure meets the definition of a TDR. If the loan is on nonaccrual at the time of restructure, the A loan is held on nonaccrual until six consecutive payments have been received, at which time it may be put back on an accrual status. The B loan is placed on nonaccrual. Under the terms of each loan, the borrower's payment is contractually due.

A further breakout of nonaccrual loans, excluding PCI loans, at September 30, 2018 and December 31, 2017 is below (dollars in thousands):

	September 30, 2018	December 31, 2017
Mortgage loans on real estate:		
Residential 1-4 family	\$ 1,530	\$ 1,962
Commercial	2,243	1,498
Construction and land development	4,610	4,277
Agriculture	—	68
Total real estate loans	8,383	7,805
Commercial loans	506	1,214
Consumer installment loans	5	7
Total loans	\$ 8,894	\$ 9,026

At September 30, 2018, the Company had seven construction and land development credit relationships in nonaccrual status. The borrowers for all of these relationships are residential land developers. All of the relationships are secured by the real estate to be developed and are in the Company's central Virginia market. The total amount of the credit exposure outstanding at September 30, 2018 was \$4.6 million. These loans have either been charged-down or sufficiently reserved against to equal the current expected realizable value.

The total amount of the allowance for loan losses attributed to all seven relationships was \$507,000 at September 30, 2018, or 11.0% of the total credit exposure outstanding. The Company establishes its reserves as described above in *Allowance for Loan Losses on Loans* in the Critical Accounting Policies section. In conjunction with the impairment analysis the Company performs as part of its allowance methodology, the Company ordered appraisals for all loans with balances in excess of \$250,000 unless there existed an appraisal that was not older than 18 months and/or deemed to be invalid. The Company uses a ratio analysis for balances less than \$250,000. The Company maintains detailed analysis and other information for its allowance methodology, both for internal purposes and for review by its regulators.

Asset Quality – PCI loans

Loans accounted for under FASB ASC 310-30 are generally considered accruing and performing loans as the loans accrete interest income over the estimated life of the loan. Accordingly, acquired impaired loans that are contractually past due are still considered to be accruing and performing loans.

The Company makes an estimate of the total cash flows that it expects to collect from a pool of PCI loans, which include undiscounted expected principal and interest. Over the life of the loan or pool, the Company continues to estimate cash flows expected to be collected. Subsequent decreases in cash flows expected to be collected over the life of the pool are recognized as impairment in the current period through the allowance for loan losses. Subsequent increases in expected cash flows are first used to reverse any existing valuation allowance for that loan or pool. Any remaining increase in cash flows expected to be collected is recognized as an adjustment to the yield over the remaining life of the pool. The Company charged \$63,000 to the allowance for loan losses during the third quarter of 2018 related to a post-acquisition advance on an acquired line of credit which is not reflected in the expected cash flow estimate.

Capital Requirements

The determination of capital adequacy depends upon a number of factors, such as asset quality, liquidity, earnings, growth trends and economic conditions. The Company seeks to maintain a strong capital base exceeding regulatory minimums for well capitalized institutions to support its growth and expansion plans, provide stability to current operations and promote public confidence in the Company.

Effective September 2018, the Federal Reserve raised the total consolidated asset limit in the Small Bank Holding Company Policy Statement from \$1 billion to \$3 billion, thereby eliminating the Company's consolidated capital reporting requirements. Therefore, the Company only reports capital information at the Bank level.

Under the final rule on Enhanced Regulatory Capital Standards, commonly referred to as Basel III which became effective January 1, 2015, the federal banking regulators have defined four tests for assessing the capital strength and adequacy of banks, based on four definitions of capital. "Common equity tier 1 capital" is defined as common equity, retained earnings, and accumulated other comprehensive income (AOCI), less certain intangibles. "Tier 1 capital" is defined as common equity tier 1 capital plus qualifying perpetual preferred stock, tier 1 minority interests, and grandfathered trust preferred securities. "Tier 2 capital" is defined as specific subordinated debt, some hybrid capital instruments and other qualifying preferred stock, non-tier 1 minority interests and a limited amount of the loan loss allowance. "Total capital" is defined as tier 1 capital plus tier 2 capital. Four risk-based capital ratios are computed using the above capital definitions, total assets and risk-weighted assets, and the ratios are measured against regulatory minimums to ascertain adequacy. All assets and off-balance sheet risk items are grouped into categories according to degree of risk and assigned a risk-weighting and the resulting total is risk-weighted assets. "Common equity tier 1 capital ratio" is common equity tier 1 capital divided by risk-weighted assets. "Tier 1 risk-based capital ratio" is tier 1 capital divided by risk-weighted assets. "Total risk-based capital ratio" is total capital divided by risk-weighted assets. The leverage ratio is tier 1 capital divided by total average assets.

The Bank's ratio of total risk-based capital was 13.4% at September 30, 2018 compared with 12.5% at December 31, 2017. The tier 1 risk-based capital ratio was 12.6% at September 30, 2018 and 11.7% at December 31, 2017. The Bank's tier 1 leverage ratio was 10.0% at September 30, 2018 and 9.6% at December 31, 2017. All capital ratios exceed regulatory minimums to be considered well capitalized. BASEL III introduced the common equity tier 1 capital ratio, which was 12.6% at September 30, 2018 and 11.7% at December 31, 2017.

Under Basel III, a capital conservation buffer of 2.5% above the minimum risk-based capital thresholds was established. Dividend and executive compensation restrictions begin if the Bank does not maintain the full amount of the buffer. The capital conservation buffer will be phased in between January 1, 2016 and January 1, 2019. At September 30, 2018, the Bank had a capital conservation buffer of 5.5%, well above the 2018 required buffer of 1.875%.

Liquidity

Liquidity represents the Company's ability to meet present and future financial obligations through either the sale or maturity of existing assets or the acquisition of additional funds through liability management. Liquid assets include cash, interest bearing deposits with banks, federal funds sold and certain investment securities. As a result of the Company's management of liquid assets and the ability to generate liquidity through liability funding, management believes that the Company maintains overall liquidity sufficient to satisfy its depositors' requirements and meet its customers' credit needs.

The Company's results of operations are significantly affected by its ability to manage effectively the interest rate sensitivity and maturity of its interest earning assets and interest bearing liabilities. A summary of the Company's liquid assets at September 30, 2018 and December 31, 2017 was as follows (dollars in thousands):

	September 30, 2018	December 31, 2017		
Cash and due from banks	\$ 12,918	\$ 14,642		
Interest bearing bank deposits	11,177	7,316		
Federal funds sold	240	—		
Available for sale securities, at fair value, unpledged	167,317	168,221		
Total liquid assets	\$ 191,652	\$ 190,179		
Deposits and other liabilities	\$ 1,218,617	\$ 1,212,187		
Ratio of liquid assets to deposits and other liabilities	15.73	% 15.69	%	%

The Company maintains unsecured lines of credit of varying amounts with correspondent banks to facilitate short-term liquidity needs. During the second quarter of 2018, the Company obtained an additional line of credit of \$20 million. The Company has a total of \$55 million in this type of facility in the aggregate.

Off-Balance Sheet Arrangements and Contractual Obligations

A summary of the contract amount of the Company's exposure to off-balance sheet and balance sheet risk as of September 30, 2018 and December 31, 2017, is as follows (dollars in thousands):

	September 30, 2018	December 31, 2017
Commitments with off-balance sheet risk:		
Commitments to extend credit	\$ 183,902	\$ 163,686
Standby letters of credit	5,235	6,532
Total commitments with off-balance sheet risks	\$ 189,137	\$ 170,218

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the counterparty. Collateral held varies but may include accounts receivable, inventory, property and equipment, and income-producing commercial properties.

Unfunded commitments under lines of credit are commitments for possible future extensions of credit to existing customers. Those lines of credit may be drawn upon only to the total extent to which the Company is committed.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing, and similar transactions. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to clients. The Company holds certificates of deposit, deposit accounts, and real estate as collateral supporting those commitments for which collateral is deemed necessary.

On November 7, 2014, the Company entered into an interest rate swap with a total notional amount of \$30 million. The Company designated the swap as a cash flow hedge intended to protect against the variability in the expected future cash flows on the designated variable rate borrowings. The swap hedges the interest rate risk, wherein the Company will receive an interest rate based on the three month LIBOR from the counterparty and pays an interest rate of 1.69% to the same counterparty calculated on the notional amount for a term of five years. The Company intends to sequentially issue a series of three month fixed rate debt as part of a planned roll-over of short term debt for five years. The forecasted funding will be provided through one of the following wholesale funding sources: a new FHLB advance, a new repurchase agreement, or a pool of brokered CDs, based on whichever market offers the most advantageous pricing at the time that pricing is first initially determined for the effective date of the swap and each reset period thereafter. Each quarter when the Company rolls over the three month debt, it will decide at that time which funding source to use for that quarterly period.

The fair value of the Company's cash flow hedge was an unrealized gain of \$353,000 and \$177,000 at September 30, 2018 and December 31, 2017, respectively, which was recorded in other assets. The Company's cash flow hedge is deemed to be effective. Therefore, the gain was recorded as a component of other comprehensive (loss) income recorded in the Company's Consolidated Statements of Comprehensive Income.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

Market risk is the risk of loss in a financial instrument arising from adverse changes in market rates or prices such as interest rates, foreign currency exchange rates, commodity prices and equity prices. The Company's primary market risk exposure is interest rate risk. The ongoing monitoring and management of interest rate risk is an important component of the Company's asset/liability management process, which is governed by policies established by its Board of Directors that are reviewed and approved annually. The Board of Directors delegates responsibility for carrying out asset/liability management policies to the Asset/Liability Committee (ALCO) of the Bank. In this capacity, ALCO develops guidelines and strategies that govern the Company's asset/liability management related activities, based upon estimated market risk sensitivity, policy limits and overall market interest rate levels and trends.

Interest rate risk represents the sensitivity of earnings to changes in market interest rates. As interest rates change, the interest income and expense streams associated with the Company's financial instruments also change, affecting net interest income, the primary component of the Company's earnings. ALCO uses the results of a detailed and dynamic simulation model to quantify the estimated exposure of net interest income to sustained interest rate changes. While ALCO routinely monitors simulated net interest income sensitivity over various periods, it also employs additional tools to monitor potential longer-term interest rate risk.

The simulation model captures the impact of changing interest rates on the interest income received and interest expense paid on all assets and liabilities reflected on the Company's balance sheet. The simulation model is prepared and results are analyzed at least quarterly. This sensitivity analysis is compared to ALCO policy limits, which specify a maximum tolerance level for net interest income exposure over a one-year horizon, assuming no balance sheet growth, given a 400 basis point upward shift and a 400 basis point downward shift in interest rates. The downward shift of 300 or 400 basis points is included in the analysis, although less meaningful in the current rate environment, because all results are monitored regardless of likelihood. A parallel shift in rates over a 12-month period is assumed.

The following table represents the change to net interest income given interest rate shocks up and down 100, 200, 300 and 400 basis points at September 30, 2018 (dollars in thousands):

September 30, 2018

Edgar Filing: Community Bankers Trust Corp - Form 10-Q

	%	\$
Change in Yield curve		
+400 bp	5.5	2,508
+300 bp	4.4	1,997
+200 bp	3.2	1,442
+100 bp	1.7	790
most likely	—	—
-100 bp	(1.6)	(710)
-200 bp	(3.8)	(1,731)
-300 bp	(6.5)	(2,948)
-400 bp	(6.7)	(3,053)

At September 30, 2018, the Company's interest rate risk model indicated that, in a rising rate environment of 400 basis points over a 12 month period, net interest income could increase by 5.5%. For the same time period, the interest rate risk model indicated that in a declining rate environment of 400 basis points, net interest income could decrease by 6.7%. While these percentages are subjective based upon assumptions used within the model, management believes the balance sheet is appropriately balanced with acceptable risk to changes in interest rates.

The preceding sensitivity analysis does not represent a forecast and should not be relied upon as being indicative of expected operating results. These hypothetical estimates are based upon numerous assumptions, including the nature and timing of interest rate levels such as yield curve shape, prepayments on loans and securities, deposit decay rates, pricing decisions on loans and deposits, reinvestment or replacement of asset and liability cash flows. While assumptions are developed based upon current economic and local market conditions, the Company cannot make any assurances about the predictive nature of these assumptions, including how customer preferences or competitor influences might change.

Also, as market conditions vary from those assumed in the sensitivity analysis, actual results will also differ due to factors such as prepayment and refinancing levels likely deviating from those assumed, the varying impact of interest rate change, caps or floors on adjustable rate assets, the potential effect of changing debt service levels on customers with adjustable rate loans, depositor early withdrawals and product preference changes, and other internal and external variables. Furthermore, the sensitivity analysis does not reflect actions that ALCO might take in response to, or in anticipation of, changes in interest rates.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this Form 10-Q, the Company's management, with the participation of the Company's chief executive officer and chief financial officer (the "Certifying Officers"), conducted evaluations of the Company's disclosure controls and procedures. As defined under Section 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the term "disclosure controls and procedures" means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the rules and forms of the Securities and Exchange Commission. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including the Certifying Officers, to allow timely decisions regarding required disclosures.

Based on this evaluation, the Certifying Officers have concluded that the Company's disclosure controls and procedures were effective to ensure that material information is recorded, processed, summarized and reported by management of the Company on a timely basis in order to comply with the Company's disclosure obligations under the Exchange Act and the rules and regulations promulgated under it.

Internal Control over Financial Reporting

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting is a process designed under the supervision of the Certifying Officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external purposes in accordance with U.S. generally accepted accounting principles. There were no changes in the Company's internal control over financial reporting identified in connection with the evaluation of it that occurred during the Company's last fiscal quarter that materially

affected, or are reasonably likely to materially affect, internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. *Legal Proceedings*

There are no material pending legal proceedings, other than ordinary routine litigation incidental to the Company's business, to which the Company, including its subsidiaries, is a party or of which the property of the Company is subject.

Item 1A. Risk Factors

As of the date of this report, there were no material changes to the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2017.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable

Item 5. Other Information

None.

Item 6. Exhibits
