BLUE CHIP VALUE FUND INC Form N-30B-2 November 29, 2004

[LOGO] BLUE CHIP VALUE FUND

Quarterly Report

to Stockholders

September 30, 2004

INVESTMENT ADVISER'S COMMENTARY

Dear Fellow Stockholders:

The most notable feature of our portfolio and the stock market for the third quarter and the year-to-date period is the narrow trading range. The S&P 500 is up 1.5% year to date, and our portfolio is down 0.81% for the same period. This has been a period generally characterized by increased corporate earnings and dividends and interest rates have been stable. Stocks have been getting steadily cheaper based on earnings. We believe this is because investors are getting increasingly concerned about the business outlook for next year. There are a number of reasons for this, and in our opinion, the impact from the rising price of oil is a main focal point.

As we noted, the overall stock market has remained relatively flat this year, but particular sectors and/or industries have had big moves. The energy stocks in our portfolio were up 18% in the third quarter, and 39% for the nine months. Unfortunately, these gains were offset by negative performance primarily in healthcare and technology stocks. Not surprisingly, Transocean and Occidental Petroleum were our best performing stocks for the quarter and nine months. Likewise, Intel and Mylan Labs were among the worst.

Just before this letter was written, civil charges against several insurance companies alleging illegal activities were filed. We held one of these companies in our portfolio—American International Group. Subsequent to the quarter end, we sold the stock from the portfolio because we believe the company will be

under a cloud for an extended period of time. We have also sold the insurance broker, Willis Group Holdings, even though it has not been implicated in the alleged wrong doings.

Our outlook for the fourth quarter and 2005 takes us back to the subject of energy. We do believe that economic growth will be slower because of higher oil prices, but we believe growth will be positive in the fourth quarter and for all of 2005. We believe the stock market has discounted slower economic growth. We also expect to see a pull back in oil prices as production returns to normal in the Gulf of Mexico and production is increased in the Middle East. The long-term picture for oil prices is more difficult to predict. Oil consumption is growing rapidly in India and China where consumption is 0.7 barrels per person and 1.7 barrels per person per year, respectively, compared to the United States

3

where it is 28 barrels per person per year. Oil production will have to grow faster over the next few years to keep prices from rising further. Many energy experts predict this will be difficult to do, but historically we believe these experts have been too pessimistic.

As year-end approaches, we would like to bring you up to date on the projected tax status of your Blue Chip Value Fund dividends. First--a reminder--your dividends were predominantly a return of capital and therefore tax-free last year. Second, this year we believe the majority of the dividends will be taxed at the long-term capital gain rate, for most 15%; however, some portion may be taxed at your higher ordinary income tax rate. The actual determination of the tax treatment of the Fund's dividends can be made only at year-end. Shareholders will receive written notification regarding the components and tax treatment of all distributions in early 2005.

Sincerely,

/s/ Todger Anderson

Todger Anderson, CFA
President, Blue Chip Value Fund, Inc.
Chairman, Denver Investment Advisors LLC

The Investment Adviser's Commentary included in this report contains certain forward-looking statements about the factors that may affect the performance of the Fund in the future. These statements are based on Fund management's predictions and expectations concerning certain future events and their expected impact on the Fund, such as performance of the economy as a whole and of specific industry sectors, changes in the levels of interest rates, the impact of developing world events, and other factors that may influence the future performance of the Fund. Management believes these forward-looking statements to be reasonable, although they are inherently uncertain and difficult to predict. Actual events may cause adjustments in portfolio management strategies from those currently expected to be employed.

6

Average Annual Total Returns as of September 30, 2004						
Return					10-Year	-
Blue Chip Value Fund - NAV					10.24%	
Blue Chip Value Fund - Market Price	4.80%	16.46%	5.05%	4.10%		8.82%
S&P 500 Index	1.50%	13.86%	4.04%	(1.31%)	11.09%	10.54%

Past performance is no guarantee of future results. Share prices will fluctuate, so that a share may be worth more or less than its original cost when sold. Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Rights offerings, if any, are assumed for purposes of this calculation to be fully subscribed under the terms of the rights offering. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on the net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods.

Annual Distribution totals as indicated.(3)

8

Please Note: line graph points are as of the end of each calendar quarter.

Past performance is no guarantee of future results. Share prices will fluctuate, so that a share may be worth more or less than its original cost when sold.

- (1) Reflects the cumulative total return of an investment made by a stockholder who purchased one share at inception (\$10.00 IPO) and then reinvested all annual distributions as indicated, and fully participated in primary subscriptions of rights offerings.
- (2) Reflects the actual market price of one share as it has traded on the NYSE.
- (3) Annual distribution totals represent actual amounts. Please note the distribution total for 2004 is for nine months ended September 30, 2004. The Fund currently pays 2.5% of its net asset value quarterly; however this policy may be changed at the discretion of the Fund's Board of Directors.

9

NEWS RELEASE

BLUE CHIP VALUE FUND DECLARES THIRD QUARTER DISTRIBUTION

DENVER, CO. (October 1, 2004) The Directors of Blue Chip Value Fund, Inc. have declared a distribution of \$0.13 per share. This distribution is payable October 29, 2004, to stockholders of record October 15, 2004, and will have an ex-dividend date of October 12, 2004. The Fund currently pays a quarterly distribution equal to 2.5% of its Net Asset Value, rounded to the nearest penny. These fixed distributions are not related to the amount of the Fund's net investment income or net realized capital gains or losses.

Of the total distribution, approximately \$0.0026 represents net investment income and the remaining undesignated portion is paid from capital surplus. If the Fund's total distributions required by the fixed quarterly payout policy for the year exceed the Fund's "current and accumulated earnings and profits," the excess will be treated as non-taxable return of capital, reducing the stockholder's adjusted cost basis. However, to the extent that current year net realized gains are offset by capital loss carryforwards, such excess distributions would be classified as taxable ordinary income rather than non-taxable return of capital. The actual determination of the source of the undesignated distributions can be made only at year-end. Shareholders will receive written notification regarding the components and tax treatment of all distributions for the calendar year in early 2005.

As of September 30, 2004, the Fund's N.A.V. was \$5.29 and the stock closed at \$6.15, a premium of 16.257%.

BLUE CHIP VALUE FUND, INC.

NOTES TO FINANCIAL STATEMENTS

September 30, 2004 (Unaudited)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Blue Chip Value Fund, Inc. (the "Fund") is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company.

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements.

Security Valuation - All securities of the Fund are valued as of the close of regular trading on the New York Stock Exchange ("NYSE"), currently 4:00 p.m. (Eastern Time), on each day that the NYSE is open. Listed securities are generally valued at the last sales price as of the close of regular trading on the NYSE. Securities traded on the National Association of Securities Dealers Automated Quotation ("NASDAQ") are generally valued at the NASDAQ Official Closing Price ("NOCP"). In the absence of sales and NOCP, such securities are valued at the mean of the bid and asked prices.

Securities having a remaining maturity of 60 days or less are valued at amortized cost which approximates market value.

When market quotations are not readily available or when events occur that make established valuation methods unreliable, securities of the Fund may be valued at fair value determined in good faith by or under the direction of the Board of Directors.

Investment Transactions - Investment transactions are accounted for on the date the investments are purchased or sold (trade date). Effective July 1, 2004, the Fund changed its accounting method for realized gains and losses from investment transactions and unrealized appreciation and depreciation of investment from a "first-in, first-out" basis to a "specific identification" basis. This change was for both financial statement and federal income tax purposes. Dividend income is recorded on the ex-dividend date. Interest income, which includes interest earned on money market funds, is accrued and recorded daily.

Federal Income Taxes - The Fund intends to comply with the requirements of the Internal Revenue Code that are applicable to regulated investment companies and to distribute all

20

of its taxable income to its stockholders. Therefore, no provision has been made for federal income taxes.

As of September 30, 2004, the Fund had available for federal income tax purposes unused capital loss carryforwards as follows:

	==========
Total	\$ 15,530,078
2011	45,245
2010	\$ 15,484,833
Expiring	

The Fund intends to elect to defer to its fiscal year ending December 31, 2004, approximately \$35,000 of losses recognized during the period November 1, 2003 to December 31, 2003, which will expire in 2012 if unutilized.

The tax character of the distributions paid was as follows:

	Nine Months Ended	Year Ended
	September 30,	December 31,
	2004	2003
Distributions paid from:		
Ordinary income	\$ 19,606	\$ 363 , 532
Long-term capital gain		
Return of capital		13,273,611
Undesignated	7,544,616	
Total	\$7,564,222	\$13,637,143
	========	

The tax character of the distribution paid as "undesignated" will be determined at the fiscal year ending December 31, 2004.

As of September 30, 2004 the components of distributable $% \left(1\right) =1$ earnings on a tax basis was as follows:

Undistributed net investment income	\$ 69,382
Accumulated net realized loss	(5,244,168)
Net unrealized appreciation	8,329,462
Total	\$ 3,154,676
	=========

The difference between book basis and tax basis is attributable to the tax deferral of losses on wash sales.

Distributions to Stockholders - Distributions to stockholders are recorded on the $\operatorname{ex-dividend}$ date.

The Fund currently maintains a "managed distribution policy" which distributes at least 2.5% of its net asset value quarterly to its stockholders. These fixed distributions are not related to the amount of the Fund's net investment income

or net realized capital gains or losses and will be classified to

2.1

conform to the tax reporting requirements of the Internal Revenue Code. If the Fund's total distributions required by the fixed quarterly payout policy for the year exceed the Fund's "current and accumulated earnings and profits," the excess will be treated as non-taxable return of capital, reducing the stockholder's adjusted basis in his or her shares. Although capital loss carryforwards may offset any current year net realized capital gains, such amounts do not reduce the Fund's "current earnings and profits." Therefore, to the extent that current year net realized capital gains are offset by capital loss carryforwards, such excess distributions would be classified as taxable ordinary income rather than non-taxable return of capital. In this situation, the Fund's Board of Directors would consider that factor, among others, in determining whether to retain, alter or eliminate the "managed distribution policy." The Fund's distribution policy may be changed at the discretion of the Fund's Board of Directors. At this time, the Board of Directors has no plans to change the current policy.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and disclosures made in the accompanying notes to the financial statements. Actual results could differ from those estimates.

2. UNREALIZED APPRECIATION AND DEPRECIATION OF INVESTMENTS (TAX BASIS)

As of September 30, 2004: Gross appreciation (excess of value over tax cost) Gross depreciation (excess of tax cost over value)	\$ 16,382,750 (8,053,288)
Net unrealized appreciation	\$ 8,329,462
Cost of investments for income tax purposes	\$142,245,703

3. INVESTMENT ADVISORY AND ADMINISTRATION SERVICES

The Fund has an Investment Advisory Agreement with Denver Investment Advisors LLC ("DenverIA"), whereby a management fee is paid to DenverIA based on an annual rate of 0.65% of the Fund's average weekly net assets up to \$100,000,000 and 0.50% of the Fund's average weekly net assets in excess of \$100,000,000. The management fee is paid monthly based on the average of the net assets of the Fund computed as of the last business day the New York

22

Stock Exchange is open each week. Certain officers and a director of the Fund are also officers of DenverIA.

ALPS Mutual Funds Services, Inc. ("ALPS") and DenverIA serve as the Fund's co-administrators. The Administrative Agreement includes the Fund's administrative and fund accounting services. For the period January 1, 2004 to September 28, 2004, the administrative services fee was based on an annual rate for ALPS and DenverIA, respectively, of 0.08% and 0.01% of the Funds average

daily net assets up to \$75,000,000, 0.04%, and 0.005% of the Funds average daily net assets between \$75,000,000 and \$125,000,000, and 0.02% and 0.005% of the Funds average daily net assets in excess of \$125,000,000. Effective September 29, 2004, the administrative fee for ALPS changed to 0.0835% of the Fund's average daily net assets up to \$75,000,000. The administrative services fee at the remaining breakpoints remained the same. The administrative service fee is paid monthly.

4. LOAN OUTSTANDING

On November 12, 2003 an agreement with Custodial Trust Company of Bear Stearns was reached, in which the Fund may borrow from the Custodial Trust Company an aggregate amount of up to the lesser of \$15,000,000 or the maximum amount the Fund is permitted to borrow under the Investment Company Act of 1940. The borrowings under the Custodial Trust Company loan are secured by pledging a portion of the Fund's portfolio securities as collateral. The initial value of the portfolio securities pledged must equal twice the amount of the loan outstanding. As of September 30, 2004, the Fund had a loan payable in the amount of \$6,825,000 with a current daily annualized interest rate of 2.8325%, which represents 30-day LIBOR plus 1.00%. The amount of the loan represented 4.53% of the Fund's total assets as of September 30, 2004.

5. SUBSEQUENT EVENTS

The Fund declared a distribution of \$0.13 per share on October 1, 2004. The distribution was payable on October 29, 2004. Of the total distribution, approximately \$0.0026 represents net investment income and the remaining portion is currently undesignated until the actual determination of the source can be made at year-end.

In an attempt to achieve more favorable tax treatment of the Fund's distributions for its shareholders, the Fund realized approximately \$18 million in additional capital gain subsequent to guarter end.
