I. Operating Results and Financial Conditions

2008 First Quarter in Review

Looking back at the global economy in the first quarter of 2008, an economic slowdown among developed countries has clearly taken hold as a result of increasing worldwide financial insecurity triggered by the subprime loan crisis in the United States along with the impact of the escalating price of crude oil and other resources. The U.S. economy remained stagnant during the period due to slack consumer spending, in addition to a drop in housing investment. In Europe, in addition to sluggish consumer spending due to the high rate of inflation, indications pointed to dwindling capital investment amid an increasing sense that the economy was gradually losing momentum. Within Asia, while the negative impact on exports accompanying the U.S. economic slowdown was reason for concern, the Chinese economy maintained a high rate of growth while other economies in the region also enjoyed generally favorable conditions and economic expansion. In Japan, export growth was limited due to the impact of the U.S. economy and the rapid appreciation of the yen against the U.S. dollar, while consumer spending remained at a low level, losing strength amid uncertainty over the future.

As for the markets in which the Canon Group operates, within the digital camera segment, demand for digital single-lens reflex (SLR) cameras and digital compact cameras sustained healthy growth during the term despite intensifying price competition. Within the office imaging product market, demand for network digital multifunction devices (MFDs) remained solid amid the shift toward color models and advanced functionality. As for computer peripherals, including printers, demand for laser beam printers continued to display growth for color models. For inkjet printers, demand continued to shift from single-function to multifunction models as competition within the market remained fierce, mainly with regard to pricing. In the optical equipment segment, while demand for steppers, utilized in the production of semiconductors, dropped, the market for aligners, used to produce liquid crystal display (LCD) panels, expanded moderately thanks to signs of a recovery in capital spending by LCD panel manufacturers. While the average value of the yen for the quarter was ¥104.78 to the U.S. dollar, a year-on-year appreciation of about 12%, it remained relatively unchanged from last year's average against the euro at ¥157.59.

Amid these conditions, sales volumes of digital cameras, color network MFDs and other products showed robust growth, recording increases in overall sales on a local-currency basis in all overseas regions. The effect, however, of the sharp appreciation of the yen against the U.S. dollar negatively affected Canon's consolidated net sales for the first quarter, resulting in a drop of 3.1% year on year to ¥1,007.5 billion (U.S.\$10,075 million). Despite the continued launch of new products and ongoing cost-reduction efforts, the gross profit ratio for the quarter was 49.6%, a year-on-year decline of 1.7 points due to such factors as the appreciation of the yen against the U.S. dollar, an increase in depreciation costs due to the change in the accounting method used to calculate depreciation of fixed assets which was introduced in April 2007, and escalating resource and materials costs. As such, first-quarter gross profit declined by 6.3% to ¥499.9 billion (U.S.\$4,999 million) from the year-ago period. While first-quarter R&D expenditures grew by 9.1% compared with the same period for the previous year, increases in other expenses were restrained, resulting in a slight rise in operating expenses of just 0.8% year on year. Consequently, operating profit in the first quarter totaled ¥170.8 billion (U.S.\$1,708 million), a year-on-year decrease of 17.6%. Other income (deductions) fell by ¥4.6 billion (U.S.\$46 million) year on year mainly due to a decrease in interest income and drop in earnings on investments in equity method affiliates. As a result, while income before income taxes and minority interests totaled ¥166.6 billion (U.S.\$1,666 million), a year-on-year decline of 19.8%, and first-quarter net income also recorded a decrease of 18.7% compared with last year to ¥106.6 billion (U.S.\$1,066 million), the net income ratio remained at a double-digit level, recording a rate of 10.6%.

Basic net income per share for the quarter was ¥84.57 (U.S.\$0.85), a year-on-year decline of ¥14.71 (U.S.\$0.15).

Results by Product Segment

Reviewing the consolidated results for the quarter by business sector, within the business machine segment, while demand for color network digital MFDs continued to expand, fueled by strong sales of the competitively priced iR C2880 series, sales declined 5.9% due to the deterioration of the economic environment, which led to a slowdown in sales overall in the U.S. market. In the field of computer peripherals, despite a steady year-on-year increase in sales on a local-currency basis for laser beam printers, the significant impact of the yen's appreciation against the U.S. dollar resulted in a decline in sales of 3.0% year on year. With regard to inkjet printers, however, despite an intensely competitive market, Canon's diverse product range, from home-use multifunction models such as the PIXMA MP610 to business-use MFDs equipped with a facsimile function, achieved expanded sales which, in addition to favorable sales growth for consumables, contributed to 6.1% growth. As a result, sales of computer peripherals overall for the quarter were approximately the same as for the previous year. Sales of business information products decreased by 7.4% year on year due to a drop in personal computer sales within the Japanese domestic market. Collectively, sales of business machines overall during the term totaled ¥691.8 billion (U.S.\$6,918 million), dropping 3.3% from the year-ago period. Operating profit for the segment totaled ¥163.2 billion (U.S.\$1,632 million), a year-on-year decrease of 7.6%, also as a result of such factors as the lower gross profit due to the drop in sales.

Within the digital camera segment, the compact and lightweight EOS DIGITAL REBEL XTi and the advanced-amateur model EOS 40D contributed to strong sales while also boosting sales of interchangeable lenses. Sales of digital compact cameras also achieved steady growth as the market expanded in emerging markets such as Asia and Russia. As a result, year-on-year sales volume for digital cameras rose by 18%, however, due to the appreciation of the yen against the dollar, overall camera sales for the first quarter decreased by 1.6% from the year-ago period to ¥219.0 billion (U.S.\$2,190 million). Operating profit for the camera segment decreased by 24.5% year on year to ¥45.7 billion (U.S.\$457 million) due to the decline of the gross profit ratio, negatively affected by the rapid appreciation of the yen along with intensifying price competition amid growing inventories of competitors within the camera market.

In the optical and other products segment, while sales of aligners, used to produce LCD panels, gained momentum owing to a recovery in demand by LCD panel manufacturers, sales of steppers, used in the production of semiconductors, remained stagnant throughout the period due to market shrinkage. As a result, sales for the segment totaled ¥96.7 billion (U.S.\$967 million), a year-on-year decrease of 5.1%, while operating profit for the segment fell by 70.4% year on year to ¥5.3 billion (U.S.\$53 million).

Cash Flow

In the first quarter of 2008, Canon generated cash flow from operating activities of ¥107.5 billion (U.S.\$1,075 million), a decrease of ¥45.3 billion (U.S.\$453 million) compared with last year, reflecting both the decreases in sales and net income, and increased payment of corporate taxes. Cash flow from investing activities totaled ¥189.5 billion (U.S.\$1,895 million), increasing by ¥65.3 billion (U.S.\$653 million) year-on-year, due to such factors as active facility investment to reinforce production capabilities and the payment of ¥43.2 billion (U.S.\$432 million) to acquire shares of Hitachi Displays, Ltd. toward the launch of Canon's display business. As a result, free cash flow totaled negative ¥82.0 billion (U.S.\$820 million), deteriorating by ¥110.6 billion (U.S.\$1,106 million) from positive ¥28.6 billion (U.S.\$286 million) for the year-ago period.

Cash flow from financing activities recorded an outlay of ¥84.9 billion (U.S.\$849 million), mainly resulting from the dividend payout of ¥75.7 billion (U.S.\$757 million) in accordance with basic policy regarding profit distribution. Consequently, cash and cash equivalents decreased by ¥236.8 billion (U.S.\$2,368 million) to ¥707.7 billion (U.S.\$7,077 million) from the previous year, including the negative effect of currency translation of ¥69.9 billion (U.S.\$699 million) in total, which stemmed from the appreciation of the yen against the U.S. dollar and euro.

Outlook

As for the outlook for the global economy in the second quarter and thereafter, uncertainty over the future continues to rise as the risk of an economic slowdown looms in the face of the financial credit crunch triggered by the subprime loan crisis along with escalating prices of crude oil and other natural resources. Amid this environment, while economic growth will likely continue to slow in developed countries for the time being, from the latter half of this year, these economies are expected to be on a path toward recovery as the effects of financial policies and economic stimulus measures in the U.S. and other countries begin to materialize. As for emerging-market economies such as Asia and Russia, although fallout from the lackluster performance of developed countries will have an impact, these regions are expected to continue enjoying high rates of growth.

In the businesses in which the Canon Group is involved, the market for digital SLR and digital compact cameras is projected to continue achieving healthy expansion. Demand for color network digital MFDs and color laser beam printers is also expected to remain solid amid continued price competition and shifting market demand toward lower-priced models. While the market for steppers will likely shrink over the near term, the market for aligners is expected to stage a healthy recovery owing to large-scale facility investment by LCD panel manufacturers.

As for currency exchange rates from the second quarter onward, on which Canon's performance outlook for the full year is based, while uncertainty over future interest rate policies and political developments with regard to major countries is likely to continue, Canon anticipates exchange rates of ¥100 to the U.S. dollar and ¥157 to the euro, representing year-on-year appreciation of approximately 15% against the U.S. dollar, and about 4% against the euro. Upon taking into consideration first-quarter business results as well as the expected business climate based on these foreign exchange rates, the company now anticipates consolidated net sales of ¥4,570.0 billion (U.S.\$45,700 million), operating profit of ¥770.0 billion (U.S.\$7,700 million), income before income taxes and minority interests of ¥785.0 billion (U.S.\$7,850 million), and net income of ¥500.0 billion (U.S.\$5,000 million), representing slight downward revisions for each item.
