☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2009

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 001-13777

GETTY REALTY CORP.
(Exact name of registrant as specified in its charter)

MARYLAND
(State or other jurisdiction of incorporation or organization)

11-3412575
(I.R.S. Employer Identification No.)

125 Jericho Turnpike, Suite 103
Jericho, New York 11753
(Address of principal executive offices)
(Zip Code)

(516) 478 - 5400
(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☒ No ☐

Edgar Filing: GETTY REALTY CORP /MD/ - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer or a non-accelerated filer. See the definitions of “larger accelerated filer”, “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer ☐ Accelerated Filer ☒ Non-Accelerated Filer ☐ Smaller Reporting Company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes ☐ No ☒

Registrant had outstanding 24,766,216 shares of Common Stock, par value \$.01 per share, as of May 1, 2009.

GETTY REALTY CORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. GENERAL

Basis of Presentation: The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP"). The consolidated financial statements include the accounts of Getty Realty Corp. and its wholly-owned subsidiaries (the "Company"). The Company is a real estate investment trust ("REIT") specializing in the ownership and leasing of retail motor fuel and convenience store properties and petroleum distribution terminals. The Company manages and evaluates its operations as a single segment. All significant intercompany accounts and transactions have been eliminated.

Use of Estimates, Judgments and Assumptions: The financial statements have been prepared in conformity with GAAP, which requires the Company's management to make its best estimates, judgments and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the period reported. While all available information has been considered, actual results could differ from those estimates, judgments and assumptions. Estimates, judgments and assumptions underlying the accompanying consolidated financial statements include, but are not limited to, deferred rent receivable, recoveries from state underground storage tank ("UST" or "USTs") funds, environmental remediation costs, real estate, depreciation and amortization, impairment of long-lived assets, litigation, accrued expenses, income taxes and the allocation of the purchase price of properties acquired to the assets acquired and liabilities assumed.

Discontinued Operations: The operating results and gains from certain dispositions of real estate sold in 2009 and 2008 are reclassified as discontinued operations. The operating results of such properties for the three months ended March 31, 2008 have been reclassified to discontinued operations to conform to the 2009 presentation. Discontinued operations for the quarters ended March 31, 2009 and 2008 are primarily comprised of gains or losses from property dispositions, respectively. The revenue from rental properties and expenses related to these properties are insignificant for the three months ended March 31, 2009 and 2008.

Unaudited, Interim Financial Statements: The consolidated financial statements are unaudited but, in the Company's opinion, reflect all adjustments (consisting of normal recurring accruals) necessary for a fair statement of the results for the periods presented. These statements should be read in conjunction with the consolidated financial statements and related notes, which appear in the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

New Accounting Pronouncements: In September 2006, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 157, "Fair Value Measurements" ("SFAS 157"). SFAS 157 provides guidance for using fair value to measure assets and liabilities. SFAS 157 generally applies whenever other standards require assets or liabilities to be measured at fair value. SFAS 157 was effective in fiscal years beginning after November 15, 2007. Staff Position ("FSP") No. 152, "Effective Date of FASB Statement No. 157", ("FSP 152") delayed the effective date of FASB No. 157 by one year for nonfinancial assets and liabilities that are recognized or disclosed at fair value on a nonrecurring basis to fiscal years beginning after November 15, 2008. The adoption of SFAS 157 in January 2008 and the adoption of the provisions of SFAS 157 for nonfinancial assets and liabilities that are recognized or disclosed at fair value on a nonrecurring basis in January 2009 did not have a material impact on the Company's financial position and results of operations.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), “Business Combinations” (“SFAS 141(R)”), which establishes principles and requirements for how the acquirer shall recognize and measure in its financial statements at fair value the identifiable assets acquired, liabilities assumed, any non-controlling interest in the acquiree and goodwill acquired in a business combination. SFAS 141(R) requires that acquisition costs, which could be material to the Company’s future financial results, will be expensed rather than included as part of the basis of the acquisition. The adoption of this standard by the Company in January 2009 did not result in a write-off of acquisition related transactions costs associated with transactions not yet consummated.

Earnings per Common Share: Due to the adoption of FSP EITF03-6-1 “Determining Whether Instruments Granted Payment Transactions Are Participating Securities” effective with the three months ended March 31, 2009 and retrospectively applied to the three months ended March 31, 2008, basic earnings per common share gives effect, utilizing the two-class method, to the potential dilution from the issuance of common shares in settlement of restricted stock units (“RSUs” or “RSU”) which provide for non-forfeitable dividend equivalents equal to the dividends declared per common share. Basic earnings per common share is computed by dividing earnings less dividend equivalents attributable to RSUs outstanding at the end of each quarterly period by the weighted-average number of common shares outstanding during the period. The adoption of FSP EITF03-6-1 did not have a material impact in the determination of earnings per common share for the quarters ended March 31, 2009 and 2008. Diluted earnings per common share also gives effect, utilizing the treasury stock method, to the potential dilution from the exercise of stock options. For the quarter ended March 31, 2009, the assumed exercise of stock options utilizing the treasury stock method would have been anti-dilutive and therefore was not assumed for purposes of computing diluted earnings per common share.

	Three months ended March 31,	
	2009	2008
Earnings from continuing operations	\$ 9,690	\$ 10,865
Less dividend equivalents attributable to restricted stock units outstanding	40	29
Earnings from continuing operations attributable to shareholders used for basic earnings per common share calculation	9,650	10,836
Discontinued operations	238	506
Net earnings attributable to shareholders used for basic earnings per common share calculation	\$ 9,888	\$ 11,342
Weighted-average number of common shares outstanding:		
Basic	24,766	24,765
Stock options	-	3
Diluted	24,766	24,768
Restricted stock units outstanding at the end of the period	86	63

2.LEASES

The Company leases or sublets its properties primarily to distributors and retailers engaged in the sale of gasoline and other motor fuel products, convenience store products and automotive repair services who are responsible for the payment of taxes, maintenance, repair, insurance and other operating expenses and for managing the actual operations conducted at these properties. In addition, approximately twenty of the Company's properties are directly leased by the Company to others for other use such as fast food restaurants, automobile sales and other retail purposes. The Company's properties are primarily located in the Northeast and Mid-Atlantic regions of the United States. The Company also owns or leases properties in Texas, North Carolina, Hawaii, California, Florida, Arkansas, Illinois, North Dakota and Ohio.

As of March 31, 2009, Getty Petroleum Marketing Inc. ("Marketing") leased from the Company, eight hundred sixty-one properties. Eight hundred fifty-one of the properties are leased to Marketing under a unitary master lease (the "Master Lease") and ten properties are leased under supplemental leases (collectively with the Master Lease, the "Marketing Leases"). The Master Lease has an initial term of fifteen years commencing December 9, 2000, and generally provides Marketing with options for three renewal terms of ten years each and a final renewal option of three years and ten months extending to 2049 (or such shorter initial or renewal term as the underlying lease may provide). The Marketing Leases include provisions for 2% annual rent escalations. The Master Lease is a unitary lease and, accordingly, Marketing's exercise of renewal options must be on an "all or nothing" basis. The supplemental leases have initial terms of varying expiration dates. As permitted under the terms of the Marketing Leases, Marketing generally, subject to any contrary terms under applicable third party leases, can use each property for any lawful purpose, or for no purpose whatsoever. (See note 3 for contingencies related to Marketing and the Marketing Leases for additional information).

3. COMMITMENTS AND CONTINGENCIES

In order to minimize the Company's exposure to credit risk associated with financial instruments, the Company places its temporary cash investments, if any, with high credit quality institutions. Temporary cash investments, if any, are currently held in an overnight bank time deposit with JPMorgan Chase Bank, N.A.

As of March 31, 2009, the Company leased eight hundred sixty-one of its one thousand fifty-seven properties on a long-term triple-net basis to Marketing under the Marketing Leases (see note 2 for additional information). Marketing operated substantially all of the Company's petroleum marketing businesses when it was spun-off to the Company's shareholders as a separate publicly held company in March 1997 (the "Spin-Off"). In December 2000, Marketing was acquired by a subsidiary of OAO LUKoil ("Lukoil"), one of the largest integrated Russian oil companies.

A substantial portion of the Company's revenues (75% for the three months ended March 31, 2009), are derived from the Marketing Leases. Accordingly, any factor that adversely affects Marketing, or the Company's relationship with Marketing, may have a material adverse effect on the Company's business, financial condition, revenues, operating expenses, results of operations, liquidity, ability to pay dividends and/or stock price. The Company's financial results depend largely on rental income from Marketing, and to a lesser extent on rental income from other tenants and; therefore, are materially dependent upon the ability of Marketing to meet its rental, environmental and other obligations under the Marketing Leases. Marketing's financial results depend largely on retail petroleum marketing margins from the sale of refined petroleum products at margins in excess of its fixed and variable expenses, performance of the petroleum marketing industry and rental income from its sub-tenants who operate their respective convenience stores, automotive repair services or other businesses at the Company's properties. The petroleum marketing industry has been and continues to be volatile and highly competitive. Marketing has made all required monthly rental payments under the Marketing Leases when due through May 2009, although there is no assurance that it will continue to do so.

For the year ended December 31, 2008, Marketing reported a significant loss, accelerating a trend of reporting progressively larger losses in recent years. Based on Marketing's significant losses for each of the three years ended December 2008, 2007 and 2006 and the cumulative impact of those losses on Marketing's financial position as of December 31, 2008, Marketing may not have the ability to generate cash flows from its business sufficient to meet its debt maturities and other obligations as they come due in the ordinary course through the term of the Marketing Leases unless Marketing shows significant improvement in its financial results and/or generates sufficient liquidity through the sale of assets or otherwise, or unless financial support continues to be provided by Lukoil, its parent company. The Company believes that Lukoil is providing credit support to Marketing and that it is probable that Lukoil will continue to provide financial support to Marketing enabling it to meet its obligations as they come due. Lukoil is not, however, a guarantor of the Marketing Leases and even though Marketing is a wholly-owned subsidiary of Lukoil and Lukoil has provided capital to Marketing in the past, there can be no assurance that Lukoil will provide any financial support or additional capital to Marketing in the future. It is reasonably possible that the Company's belief regarding the likelihood of Lukoil providing continuing financial support to Marketing will prove to be incorrect or will change as circumstances change.

From time to time the Company has had discussions with representatives of Marketing regarding potential modifications to the Marketing Leases and, in 2007, during the course of such discussions, Marketing proposed to (i) remove approximately 40% of the properties (the "Subject Properties") from the Marketing Leases and eliminate payment of rent to the Company and eliminate or reduce payment of operating expenses with respect to the Subject Properties, and (ii) reduce the aggregate amount of rent payable to the Company for the approximately 60% of the properties that would remain under the Marketing Leases (the "Remaining Properties"). Representatives of Marketing have also indicated to the Company that they are considering significant changes to Marketing's business model. In light of these developments and the continued deterioration in Marketing's annual financial performance through December 31, 2007, the Company previously decided to attempt to negotiate with Marketing for a modification of the Marketing Leases which removes the Subject Properties from the Marketing Leases. The Company has held discussions with Marketing from time to time since March 2008 in its attempt to negotiate a modification of the Marketing Leases to remove the Subject Properties. Although the Company continues to remove individual locations from the Master Lease as mutually beneficial opportunities arise, there has been no agreement between the Company and Marketing on any terms that would be the basis for a definitive Master Lease modification agreement. If Marketing ultimately determines that its business strategy is to exit all of the properties it leases from the Company or to divest a composition of properties different from the properties comprising the Subject Properties, such as the revised list of properties provided to the Company by Marketing in the second quarter of 2008 which includes approximately 45% of the properties Marketing leases from the Company, it is the Company's intention to cooperate with Marketing in accomplishing those objectives to the extent that the Company determines that it is prudent for it to do so. Any modification of the Marketing Leases that removes a significant number of properties from the Marketing Leases would likely significantly reduce the amount of rent the Company receives from Marketing and increase the Company's operating expenses. The Company cannot accurately predict if, or when, the Marketing Leases will be modified or what the terms of any agreement for modification of the Marketing Leases may be. The Company also cannot accurately predict what actions Marketing and Lukoil may take, and what the Company's recourse may be, whether the Marketing Leases are modified or not.

The Company intends either to re-let or sell any properties removed from the Marketing Leases and reinvest any realized sales proceeds in new properties. The Company intends to seek replacement tenants or buyers for properties removed from the Marketing Leases either individually, in groups of properties, or by seeking a single tenant for the entire portfolio of properties subject to the Marketing Leases. As permitted under the terms of the Marketing Leases, Marketing generally, subject to any contrary terms under applicable third party leases, can use each property for any lawful purpose, or for no purpose whatsoever. In those instances where the Company determines that the highest and best use for a property is no longer as a retail motor fuel outlet, the Company intends to seek an alternative tenant or buyer for such property as the opportunities arise. Although the Company is the fee or leasehold owner of the properties subject to the Marketing Leases and the owner of the Getty® brand and has prior experience with tenants who operate their convenience stores, automotive repair services or other businesses at its properties; in the event that properties are removed from the Marketing Leases, the Company cannot accurately predict if, when, or on what terms, such properties could be re-let or sold.

Based on the Company's decision to attempt to negotiate with Marketing for a modification of the Marketing Leases to remove the Subject Properties, made in part upon consideration of the continued deterioration in Marketing's annual financial performance through December 31, 2007, the Company previously decided, and continues to believe, that it cannot reasonably assume that it will collect all of the rent due to the Company related to the Subject Properties for the remainder of the current lease terms. Accordingly, in 2007, the Company recorded a non-cash reserve representing the full amount of the deferred rent receivable recorded related to the Subject Properties as of December 31, 2007.

As of March 31, 2009, the Company had a reserve of \$9,938,000 for the deferred rent receivable due from Marketing representing the full amount of the deferred rent receivable recorded related to the Subject Properties as of that date. The Company has not provided a deferred rent receivable reserve related to the Remaining Properties since, based on the Company's assessments and assumptions, the Company continues to believe that it is not probable that it will not collect the deferred rent receivable related to the Remaining Properties of \$22,651,000 as of March 31, 2009 and that Lukoil will not allow Marketing to fail to perform its rental, environmental and other obligations under the Marketing Leases. Beginning with the first quarter of 2008, the rental revenue for the Subject Properties was, and for future period is expected to be, effectively recognized when payment is due under the contractual payment terms. Although the Company had adjusted the estimated useful lives of certain long-lived assets for the Subject Properties, the Company believes that no impairment charge is necessary for the Subject Properties.

Marketing is directly responsible to pay for (i) remediation of environmental contamination it causes and compliance with various environmental laws and regulations as the operator of the Company's properties, and (ii) known and unknown environmental liabilities allocated to Marketing under the terms of the Master Lease and various other agreements between Marketing and the Company relating to Marketing's business and the properties subject to the Marketing Leases (collectively the "Marketing Environmental Liabilities"). The Company may ultimately be responsible to directly pay for Marketing Environmental Liabilities as the property owner if Marketing fails to pay them. Additionally, the Company will be required to accrue for Marketing Environmental Liabilities if the Company determines that it is probable that Marketing will not meet its obligations and the Company can reasonably estimate the amount of the Marketing Environmental Liabilities for which it will be directly responsible to pay, or if the Company's assumptions regarding the ultimate allocation methods and share of responsibility that it used to allocate environmental liabilities changes as a result of the factors discussed above, or otherwise. However, the Company continues to believe that it is not probable that Marketing will not pay for substantially all of the Marketing Environmental Liabilities since the Company believes that Lukoil will not allow Marketing to fail to perform its rental, environmental and other obligations under the Marketing Leases and, accordingly, the Company did not accrue for the Marketing Environmental Liabilities as of March 31, 2009 or December 31, 2008. Nonetheless, the Company has determined that the aggregate amount of the Marketing Environmental Liabilities (as estimated by the Company based on its assumptions and its analysis of information currently available to it) could be material to the Company if it was required to accrue for all of the Marketing Environmental Liabilities in the future since the Company believes that it is reasonably possible that as a result of such accrual, the Company may not be in compliance with the existing financial covenants in its Credit Agreement. Such non-compliance could result in an event of default which, if not cured or waived, could result in the acceleration of all of the Company's indebtedness under the Credit Agreement.

Should the Company's assessments, assumptions and beliefs prove to be incorrect, including, in particular, the Company's belief that Lukoil is providing credit support to Marketing and that it is probable that Lukoil will continue to provide financial support to Marketing, or if circumstances change, the conclusions reached by the Company may change relating to (i) whether some or all of the Subject or Remaining Properties are likely to be removed from the Marketing Leases, (ii) recoverability of the deferred rent receivable for some or all of the Subject or Remaining Properties, (iii) potential impairment of the Subject or Remaining Properties and, (iv) Marketing's ability to pay the Marketing Environmental Liabilities. The Company intends to regularly review its assumptions that affect the accounting for deferred rent receivable; long-lived assets; environmental litigation accruals; environmental remediation liabilities; and related recoveries from state underground storage tank funds, which may result in material adjustments to the amounts recorded for these assets and liabilities, and as a result of which, the Company may not be in compliance with the financial covenants in its Credit Agreement. Accordingly, the Company may be required to (i) reserve additional amounts of the deferred rent receivable related to the Remaining Properties, (ii) record an impairment charge related to the Subject or Remaining Properties, or (iii) accrue for Marketing Environmental Liabilities that the Company believes are allocable to Marketing under the Marketing Leases and various other agreements as a result of the potential or actual modification of the Marketing Leases or other factors.

The Company cannot provide any assurance that Marketing will continue to pay its debts or meet its rental, environmental or other obligations under the Marketing Leases prior or subsequent to any potential modification of the Marketing Leases. In the event that Marketing cannot or will not perform its rental, environmental or other obligations under the Marketing Leases; if the Marketing Leases are modified significantly or terminated; if the Company determines that it is probable that Marketing will not meet its rental, environmental or other obligations and the Company accrues for certain of such liabilities; if the Company is unable to promptly re-let or sell the properties upon recapture from the Marketing Leases; or, if the Company changes its assumptions that affect the accounting for rental revenue or Marketing Environmental Liabilities related to the Marketing Leases and various other agreements; the Company's business, financial condition, revenues, operating expenses, results of operations, liquidity, ability to pay dividends and/or stock price may be materially adversely affected.

The Company has also agreed to provide limited environmental indemnification to Marketing, capped at \$4,250,000 and expiring in 2010, for certain pre-existing conditions at six of the terminals which are owned by the Company and leased to Marketing. Under the agreement, Marketing is obligated to pay the first \$1,500,000 of costs and expenses incurred in connection with remediating any such pre-existing conditions, Marketing and the Company will share equally the next \$8,500,000 of those costs and expenses and Marketing is obligated to pay all additional costs and expenses over \$10,000,000. The Company has accrued \$300,000 as of March 31, 2009 and December 31, 2008 in connection with this indemnification agreement.

The Company is subject to various legal proceedings and claims which arise in the ordinary course of its business. In addition, the Company has retained responsibility for certain legal proceedings and claims relating to the petroleum marketing business that were identified at the time of the Spin-Off. As of March 31, 2009 and December 31, 2008, the Company had accrued \$2,011,000 and \$1,671,000, respectively, for certain of these matters which it believes were appropriate based on information then currently available. The Company has not accrued for approximately \$950,000 in costs allegedly incurred by the current property owner in connection with removal of USTs and soil remediation at a property that had been leased to and operated by Marketing. The Company believes Marketing is responsible for such costs under the terms of the Master Lease and tendered the matter for defense and indemnification from Marketing, but Marketing denied its liability for the claim and its responsibility to defend against and indemnify the Company for the claim. The Company filed a third party claim against Marketing for indemnification in this matter, which claim is currently being actively litigated. A trial on this claim was held before a judge during the first quarter of 2009. A decision has not yet been rendered by the court. It is possible that the Company's assumption that Marketing will ultimately be responsible for this claim may change, which may result in the Company providing an accrual for this and possibly other matters.

In September 2003, the Company was notified by the State of New Jersey Department of Environmental Protection (“NJDEP”) that the Company is one of approximately sixty-six potentially responsible parties for natural resource damages resulting from discharges of hazardous substances into the Lower Passaic River. The definitive list of potentially responsible parties and their actual responsibility for the alleged damages, the aggregate cost to remediate the Lower Passaic River, the amount of natural resource damages and the method of allocating such amounts among the potentially responsible parties have not been determined. In September 2004, the Company received a General Notice Letter from the United States Environmental Protection Agency (the “EPA”) (the “EPA Notice”), advising the Company that it may be a potentially responsible party for costs of remediating certain conditions resulting from discharges of hazardous substances into the Lower Passaic River. ChevronTexaco received the same EPA Notice regarding those same conditions. In a related action, in December 2005, the State of New Jersey brought suit against certain companies which the State alleges are responsible for pollution of the Passaic River from a former Diamond Alkali manufacturing plant. In February 2009, certain of these defendants filed third-party complaints against approximately 300 additional parties, including the Company, seeking contribution for a pro-rata share of response costs, cleanup and removal costs, and other damages. The Company believes that ChevronTexaco is contractually obligated to indemnify the Company, pursuant to an indemnification agreement, for most if not all of the conditions at the property identified by the NJDEP and the EPA. Accordingly, the ultimate legal and financial liability of the Company, if any, cannot be estimated with any certainty at this time.

From October 2003 through March 31, 2009, the Company was notified that the Company was made party to fifty-seven cases in Connecticut, Florida, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Vermont, Virginia and West Virginia brought by local water providers or governmental agencies. The Company has been dismissed from five of the cases initially filed against it and fifty-two remain outstanding. These cases allege various theories of liability due to contamination of groundwater with methyl tertiary butyl ether (“MTBE”) as the basis for claims seeking compensatory and punitive damages. Each case names as defendants approximately fifty petroleum refiners, manufacturers, distributors and retailers of MTBE, or gasoline containing MTBE. A significant number of the named defendants other than the Company have entered into settlements with certain plaintiffs, which affected approximately twenty-seven of the cases to which the Company is a party. The accuracy of the allegations as they relate to the Company, the Company’s defenses to such claims, the aggregate amount of possible damages and the method of allocating such amounts among the remaining defendants have not been determined. Accordingly, the ultimate legal and financial liability of the Company, if any, cannot be estimated with any certainty at this time.

The ultimate resolution of the matters related to the Lower Passaic River and the MTBE multi-district litigation discussed above could cause a material adverse effect on the Company’s business, financial condition, results of operations, liquidity, ability to pay dividends and/or stock price.

Prior to the Spin-Off, the Company was self-insured for workers’ compensation, general liability and vehicle liability up to predetermined amounts above which third-party insurance applies. As of March 31, 2009 and December 31, 2008, the Company’s Consolidated Balance Sheets included, in accounts payable and accrued expenses, \$315,000 and \$290,000, respectively, relating to self-insurance obligations. The Company estimates its loss reserves for claims, including claims incurred but not reported, by utilizing actuarial valuations provided annually by its insurance carriers. The Company is required to deposit funds for substantially all of these loss reserves with its insurance carriers, and may be entitled to refunds of amounts previously funded, as the claims are evaluated on an annual basis. The Company’s Consolidated Statements of Operations for the three months ended March 31, 2009 and 2008 include, in general and administrative expenses, a charge of \$25,000 and a credit of \$72,000, respectively, for self-insurance loss reserve adjustments. Since the Spin-Off, the Company has maintained insurance coverage subject to certain deductibles.

In order to qualify as a REIT, among other items, the Company must pay out substantially all of its “earnings and profits” (as defined in the Internal Revenue Code) in cash distributions to shareholders each year. Should the Internal Revenue Service successfully assert that the Company’s earnings and profits were greater than the amounts distributed, the Company may fail to qualify as a REIT; however, the Company may avoid losing its REIT status by paying a deficiency dividend to eliminate any remaining earnings and profits. The Company may have to borrow money or sell assets to pay such a deficiency dividend.

4. CREDIT AND INTEREST RATE SWAP

As of March 31, 2009, borrowings under the Credit Agreement, described below, were \$131,000,000, bearing interest at a weighted-average effective rate of 3.4% per annum. The weighted-average effective rate is based on \$86,000,000 of LIBOR rate borrowings floating at market rates plus a margin of 1.25% and \$45,000,000 of LIBOR rate borrowings effectively fixed at 5.44% by an interest rate Swap Agreement, described below, plus a margin of 1.25%. The Company is a party to a \$175,000,000 amended and restated senior unsecured revolving credit agreement (the “Credit Agreement”) with a group of domestic commercial banks led by JPMorgan Chase Bank, N.A. (the “Bank Syndicate”) which expires in March 2011. The Credit Agreement does not provide for scheduled reductions in the principal balance prior to its maturity. The Credit Agreement permits borrowings at an interest rate equal to the sum of a base rate plus a margin of 0.0% or 0.25% or a LIBOR rate plus a margin of 1.0%, 1.25% or 1.5%. The applicable margin is based on the Company’s leverage ratio at the end of the prior calendar quarter, as defined in the Credit Agreement, and is adjusted effective mid-quarter when the Company’s quarterly financial results are reported to the Bank Syndicate. Based on the Company’s leverage ratio as of March 31, 2009, the applicable margin is 0.0% for base rate borrowings and 1.25% for LIBOR rate borrowings.

Subject to the terms of the Credit Agreement, the Company has the option to extend the term of the credit agreement for one additional year to March 2012 and/or, subject to approval by the Bank Syndicate, increase the amount of the credit facility available pursuant to the Credit Agreement by \$125,000,000 to \$300,000,000. The Company does not expect to exercise its option to increase the amount of the Credit Agreement at this time. In addition, based on the current lack of liquidity in the credit markets, the Company believes that it would need to renegotiate certain terms in the Credit Agreement in order to obtain approval from the Bank Syndicate to increase the amount of the credit facility at this time. No assurance can be given that such approval from the Bank Syndicate will be obtained on terms acceptable to the Company, if at all. The annual commitment fee on the unused Credit Agreement ranges from 0.10% to 0.20% based on the amount of borrowings. The Credit Agreement contains customary terms and conditions, including customary financial covenants such as leverage and coverage ratios and other customary covenants, including limitations on the Company’s ability to incur debt, pay dividends and maintenance of tangible net worth, and events of default, including change of control and failure to maintain REIT status. A material adverse effect on the Company’s business, assets, prospects or condition, financial or otherwise, would also result in an event of default. Any event of default, if not cured or waived, could result in the acceleration of all of the Company’s indebtedness under the Credit Agreement.

The Company is a party to a \$45,000,000 LIBOR based interest rate swap, effective through June 30, 2011 (the "Swap Agreement"). The Swap Agreement is intended to effectively fix, at 5.44%, the LIBOR component of the interest rate determined under the Credit Agreement. As a result of the Swap Agreement, as of March 31, 2009, \$45,000,000 of the Company's LIBOR based borrowings under the Credit Agreement bear interest at an effective rate of 6.69%.

The Company entered into the Swap Agreement with JPMorgan Chase Bank, N.A., designated and qualifying as a cash flow hedge, to reduce its exposure to the variability in future cash flows attributable to changes in the LIBOR rate. The Company's primary objective when undertaking the hedging transaction and derivative position was to reduce its variable interest rate risk by effectively fixing a portion of the interest rate for existing debt and anticipated refinancing transactions. The Company determined, as of the Swap Agreement's inception and as of March 31, 2009 and December 31, 2008, that the derivative used in the hedging transaction is highly effective in offsetting changes in cash flows associated with the hedged item and that no gain or loss was required to be recognized in earnings during three months ended March 31, 2009 or 2008 representing the hedge's ineffectiveness. At March 31, 2009 and December 31, 2008, the Company's Consolidated Balance Sheets include, in accounts payable and accrued expenses, an obligation for the fair value of the Swap Agreement of \$4,009,000 and \$4,296,000, respectively. For the three months ended March 31, 2009 and 2008, the Company has recorded, in accumulated other comprehensive loss in the Company's Consolidated Balance Sheets, a gain of \$287,000 and a loss of \$1,451,000, respectively, from the change in the fair value of the Swap Agreement related to the effective portion of the interest rate contract. The accumulated comprehensive loss of \$4,009,000 recorded as of March 31, 2009 will be recognized as an increase in interest expense as quarterly payments are made to the counter-party over the remaining term of the Swap Agreement since it is expected that the Credit Agreement will be refinanced with variable interest rate debt at its maturity.

The fair value of the Swap Agreement was \$4,009,000 and \$4,296,000 as of March 31, 2009 and December 31, 2008, respectively, determined using (i) a discounted cash flow analysis on the expected cash flows of the Swap Agreement, which is based on market data obtained from sources independent of the Company consisting of interest rates and yield curves that are observable at commonly quoted intervals and are defined by GAAP as "Level 2" inputs in the "Fair Value Hierarchy", and (ii) credit valuation adjustments, which are based on unobservable "Level 3" inputs. As of March 31, 2009 and December 31, 2008, accordingly, the Company classified its valuation of the Swap Agreement in its entirety within Level 2 of the Fair Value Hierarchy since the credit valuation adjustments are not significant to the overall valuation of the Swap Agreement.

5.

ENVIRONMENTAL EXPENSES

The Company is subject to numerous existing federal, state and local laws and regulations, including matters relating to the protection of the environment such as the remediation of known contamination and the retirement and decommissioning or removal of long-lived assets including buildings containing hazardous materials, USTs and other equipment. Environmental expenses are principally attributable to remediation costs which include installing, operating, maintaining and decommissioning remediation systems, monitoring contamination, and governmental agency reporting incurred in connection with contaminated properties. The Company seeks reimbursement from state UST remediation funds related to these environmental expenses where available.

The Company enters into leases and various other agreements which allocate responsibility for known and unknown environmental liabilities by establishing the percentage and method of allocating responsibility between the parties. In accordance with the leases with certain tenants, the Company has agreed to bring the leased properties with known environmental contamination to within applicable standards and to regulatory or contractual closure ("Closure") in an efficient and economical manner. Generally, upon achieving Closure at each individual property, the Company's environmental liability under the lease for that property will be satisfied and future remediation obligations will be the responsibility of the Company's tenant. Generally the liability for the retirement and decommissioning or removal of USTs and other equipment is the responsibility of the Company's tenants. The Company is contingently liable for these obligations in the event that the tenants do not satisfy their responsibilities. A liability has not been accrued for obligations that are the responsibility of the Company's tenants based on the tenants' history of paying such obligations and/or the Company's assessment of their financial ability to pay their share of such costs. However, there can be no assurance that the Company's assessments are correct or that the Company's tenants who have paid their obligations in the past will continue to do so.

Of the eight hundred sixty-one properties leased to Marketing as of March 31, 2009, the Company has agreed to pay all costs relating to, and to indemnify Marketing for, certain environmental liabilities and obligations at one hundred ninety-one retail properties that have not achieved Closure and are scheduled in the Master Lease. The Company will continue to seek reimbursement from state UST remediation funds related to these environmental expenditures where available.

It is possible that the Company's assumptions regarding the ultimate allocation method and share of responsibility that it used to allocate environmental liabilities may change, which may result in material adjustments to the amounts recorded for environmental litigation accruals, environmental remediation liabilities and related assets. The Company is required to accrue for environmental liabilities that the Company believes are allocable to others under various other agreements if the Company determines that it is probable that the counter-party will not meet its environmental obligations. The ultimate resolution of these matters could cause a material adverse effect on the Company's business, financial condition, results of operations, liquidity, ability to pay dividends and/or stock price. (See note 3 for contingencies related to Marketing and the Marketing Leases for additional information.)

The estimated future costs for known environmental remediation requirements are accrued when it is probable that a liability has been incurred and a reasonable estimate of fair value can be made. The environmental remediation liability is estimated based on the level and impact of contamination at each property. The accrued liability is the aggregate of the best estimate of the fair value of cost for each component of the liability. Recoveries of environmental costs from state UST remediation funds, with respect to both past and future environmental spending, are accrued at fair value as an offset to environmental expense, net of allowance for collection risk, based on estimated recovery rates developed from prior experience with the funds when such recoveries are considered probable.

Environmental exposures are difficult to assess and estimate for numerous reasons, including the extent of contamination, alternative treatment methods that may be applied, location of the property which subjects it to differing local laws and regulations and their interpretations, as well as the time it takes to remediate contamination. In developing the Company's liability for probable and reasonably estimable environmental remediation costs on a property by property basis, the Company considers among other things, enacted laws and regulations, assessments of contamination and surrounding geology, quality of information available, currently available technologies for treatment, alternative methods of remediation and prior experience. These accrual estimates are subject to significant change, and are adjusted as the remediation treatment progresses, as circumstances change and as these contingencies become more clearly defined and reasonably estimable. As of March 31, 2009, the Company had regulatory approval for remediation action plans in place for two hundred forty-five (94%) of the two hundred sixty-one properties for which it continues to retain environmental responsibility and the remaining sixteen properties (6%) remain in the assessment phase. In addition, the Company has nominal post-closure compliance obligations at twenty-two properties where it has received "no further action" letters.

Environmental remediation liabilities and related assets are measured at fair value based on their expected future cash flows which have been adjusted for inflation and discounted to present value. The net change in estimated remediation cost and accretion expense included in environmental expenses in the Company's consolidated statements of operations aggregated \$1,341,000, and \$180,000 for the three months ended March 31, 2009 and 2008, respectively, which amounts were net of changes in estimated recoveries from state UST remediation funds. In addition to net change in estimated remediation costs, environmental expenses also include project management fees, legal fees and provisions for environmental litigation loss reserves.

As of March 31, 2009 and December 31, 2008, and 2007, the Company had accrued \$18,603,000, \$17,660,000 and \$18,523,000, respectively, as management's best estimate of the fair value of reasonably estimable environmental remediation costs. As of March 31, 2009 and December 31, 2008 and 2007, the Company had also recorded \$4,462,000, \$4,223,000 and \$4,652,000, respectively, as management's best estimate for recoveries from state UST remediation funds, net of allowance, related to environmental obligations and liabilities. The net environmental liabilities of \$13,437,000, and \$13,871,000 as of December 31, 2008, and 2007, respectively, were subsequently accreted for the change in present value due to the passage of time and, accordingly, \$177,000, and \$166,000 of net accretion expense was recorded for the three months ended March 31, 2009 and 2008, respectively, substantially all of which is included in environmental expenses.

In view of the uncertainties associated with environmental expenditures, contingencies related to Marketing and the Marketing Leases and contingencies related to other parties, however, the Company believes it is possible that the fair value of future actual net expenditures could be substantially higher than amounts currently recorded by the Company. (See note 3 for contingencies related to Marketing and the Marketing Leases for additional information.) Adjustments to accrued liabilities for environmental remediation costs will be reflected in the Company's financial statements as they become probable and a reasonable estimate of fair value can be made. Future environmental expenses could cause a material adverse effect on our business, financial condition, results of operations, liquidity, ability to pay dividends and/or stock price.

6. SHAREHOLDERS' EQUITY

A summary of the changes in shareholders' equity for the three months ended March 31, 2009 is as follows (in thousands, except share amounts):

	COMMON STOCK		PAID-IN	DIVIDENDS PAID IN EXCESS OF EARNINGS	ACCUMULATED OTHER COMPREHENSIVE LOSS	TOTAL
	SHARES	AMOUNT	CAPITAL			
Balance, December 31, 2008	24,766,166	\$ 248	\$ 259,069	\$ (49,124)	\$ (4,296)	\$ 205,897
Net earnings				9,928		9,928
Dividends				(11,680)		(11,680)
Stock-based employee compensation expense	50		94			94
Net unrealized gain on interest rate swap					287	287
Balance, March 31, 2009	24,766,216	\$ 248	\$ 259,163	\$ (50,876)	\$ (4,009)	\$ 204,526

The Company is authorized to issue 20,000,000 shares of preferred stock, par value \$.01 per share, of which none were issued as of March 31, 2009 or December 31, 2008.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of financial condition and results of operations should be read in conjunction with the sections entitled "Part I, Item 1A. Risk Factors" and "Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," which appear in our Annual Report on Form 10-K for the year ended December 31, 2008, and "Part I, Item 1. Financial Statements" and "Part II, Item 1A. Risk Factors," which appear in this Quarterly Report on Form 10-Q.

GENERAL

Real Estate Investment Trust

We are a real estate investment trust ("REIT") specializing in the ownership and leasing of retail motor fuel and convenience store properties and petroleum distribution terminals. We elected to be treated as a REIT under the federal income tax laws beginning January 1, 2001. As a REIT, we are not subject to federal corporate income tax on the taxable income we distribute to our shareholders. In order to continue to qualify for taxation as a REIT, we are required, among other things, to distribute at least ninety percent of our taxable income to shareholders each year.

Retail Petroleum Marketing Business

We lease or sublet our properties primarily to distributors and retailers engaged in the sale of gasoline and other motor fuel products, convenience store products and automotive repair services. These tenants are responsible for the payment of taxes, maintenance, repair, insurance and other operating expenses and for managing the actual operations conducted at these properties. In addition, approximately twenty of our properties are directly leased by us to others for other uses such as fast food restaurants, automobile sales and other retail purposes. In those instances where we determine that the highest and best use for a property is no longer as a retail motor fuel outlet, we will seek an alternative tenant or buyer for such property as the opportunities arise. Our properties are primarily located in the Northeast and Mid-Atlantic regions of the United States. We also own or lease properties in Texas, North Carolina, Hawaii, California, Florida, Arkansas, Illinois, North Dakota and Ohio.

As of March 31, 2009, we leased eight hundred sixty-one of our one thousand fifty-seven properties on a long-term basis to Getty Petroleum Marketing Inc. ("Marketing"). Eight hundred fifty-one of the properties are leased to Marketing under a unitary master lease (the "Master Lease") with an initial term effective through December 2015 and ten of the properties are leased to Marketing under supplemental leases with initial terms of varying expiration dates (collectively with the Master Lease, the "Marketing Leases"). The Marketing Leases include provisions for 2% annual rent escalations. The Master Lease is a unitary lease and, accordingly, Marketing's exercise of renewal options must be on an "all or nothing" basis. As permitted under the terms of the Marketing Leases, Marketing generally, subject to any contrary terms under applicable third party leases, use each property for any lawful purpose, or for no purpose whatsoever.

Marketing's financial results depend largely on retail petroleum marketing margins from the sale of refined petroleum products at margins in excess of its fixed and variable expenses, performance of the petroleum marketing industry and rental income from sub-tenants who operate their respective convenience stores, automotive repair service or other businesses at our properties. The petroleum marketing industry has been and continues to be volatile and highly competitive. (For information regarding factors that could adversely affect us relating to Marketing, or our other lessees, see "Item 1A. Risk Factors" which appears in our Annual Report on Form 10-K for the year ended December 31, 2008 and "Part II, Item 1A. Risk Factors" in this Quarterly Report on Form 10-Q.)

Developments Related to Marketing and the Marketing Leases

Marketing operated substantially all of our petroleum marketing businesses when it was spun-off to our shareholders as a separate publicly held company in March 1997 (the "Spin-Off"). In December 2000, Marketing was acquired by a subsidiary of OAO Lukoil ("Lukoil"), one of the largest integrated Russian oil companies.

A substantial portion of our revenues (75% for the three months ended March 31, 2009) are derived from the Marketing Leases. Accordingly, any factor that adversely affects Marketing, or our relationship with Marketing, may have a material adverse effect on our business, financial condition, revenues, operating expenses, results of operations, liquidity, ability to pay dividends and/or stock price. Our financial results depend largely on rental income from Marketing, and to a lesser extent on rental income from other tenants and; therefore, are materially dependent upon the ability of Marketing to meet its rental, environmental and other obligations under the Marketing Leases. Marketing has made all required monthly rental payments under the Marketing Leases when due through May 2009, although there is no assurance that it will continue to do so.

For the year ended December 31, 2008, Marketing reported a significant loss, accelerating a trend of reporting progressively larger losses in recent years. Based on Marketing's significant losses for each of the three years ended December 2008, 2007 and 2006 and the cumulative impact of those losses on Marketing's financial position as of December 31, 2008, Marketing may not have the ability to generate cash flows from its business sufficient to meet its debt maturities and other obligations as they come due in the ordinary course through the term of the Marketing Leases unless it shows significant improvement in its financial results and/or generates sufficient liquidity through the sale of assets or otherwise, or unless financial support continues to be provided by Lukoil, its parent company. We believe that Lukoil is providing credit support to Marketing and that it is probable that Lukoil will continue to provide financial support to Marketing enabling it to meet its obligations as they come due. Our belief regarding the likelihood of Lukoil providing continuing financial support to Marketing is based on a number of factors, including our understanding that Lukoil currently guarantees substantially all of Marketing's borrowing facilities. We believe that Marketing would not be able to maintain, renew, extend or expand any such borrowing facilities absent Lukoil guarantees. Lukoil is not, however, a guarantor of the Marketing Leases and even though Marketing is a wholly-owned subsidiary of Lukoil and Lukoil has provided capital to Marketing in the past, there can be no assurance that Lukoil will provide any financial support or additional capital to Marketing in the future. It is reasonably possible that our beliefs regarding the likelihood of Lukoil providing continuing financial support to Marketing will prove to be incorrect or will change as circumstances change.

From time to time we have had discussions with representatives of Marketing regarding potential modifications to the Marketing Leases and, in 2007, during the course of such discussions, Marketing proposed to (i) remove approximately 40% of the properties (the "Subject Properties") from the Marketing Leases and eliminate payment of rent to us and eliminate or reduce payment of operating expenses with respect to the Subject Properties, and (ii) reduce the aggregate amount of rent payable to us for the approximately 60% of the properties that would remain under the Marketing Leases (the "Remaining Properties"). Representatives of Marketing have also indicated to us that they are considering significant changes to Marketing's business model. In light of these developments and the continued deterioration in Marketing's annual financial performance through December 31, 2007, we previously decided to attempt to negotiate with Marketing for a modification of the Marketing Leases which removes the Subject Properties from the Marketing Leases. We have held discussions with Marketing from time to time since March 2008 in our attempt to negotiate a modification of the Marketing Leases to remove the Subject Properties. Although we continue to remove individual locations from the Master Lease as mutually beneficial opportunities arise, there has been no agreement between us and Marketing on any terms that would be the basis for a definitive Master Lease modification agreement. If Marketing ultimately determines that its business strategy is to exit all of the properties it leases from us or to divest a composition of properties different from the properties comprising the Subject Properties, such as the revised list of properties provided to us by Marketing in the second quarter of 2008 which includes approximately 45% of the properties Marketing leases from us, it is our intention to cooperate with Marketing in accomplishing those objectives to the extent that we determine that it is prudent for us to do so. Any modification of the Marketing Leases that removes a significant number of properties from the Marketing Leases would likely significantly reduce the amount of rent we receive from Marketing and increase our operating expenses. We cannot accurately predict if, or when, the Marketing Leases will be modified or what the terms of any agreement for modification of the Marketing Leases may be. We also cannot accurately predict what actions Marketing and Lukoil may take, and what our recourse may be, whether the Marketing Leases are modified or not.

We intend either to re-let or sell any properties removed from the Marketing Leases and reinvest any realized sales proceeds in new properties. We intend to seek replacement tenants or buyers for properties removed from the Marketing Leases either individually, in groups of properties, or by seeking a single tenant for the entire portfolio of properties subject to the Marketing Leases. As permitted under the terms of the Marketing Leases, Marketing generally, subject to any contrary terms under applicable third party leases, can use each property for any lawful purpose, or for no purpose whatsoever. We believe that as of March 31, 2009, Marketing had vacancies and/or removed the gasoline tanks and related equipment at what may be as much as 10% or more of the properties subject to the Marketing Leases. In those instances where we determine that the highest and best use for a property is no longer as a retail motor fuel outlet, we intend to seek an alternative tenant or buyer for such property as the opportunities arise. Although we are the fee or leasehold owner of the properties subject to the Marketing Leases and the owner of the Getty® brand and have prior experience with tenants who operate their gas stations, convenience stores, automotive repair services or other businesses at our properties; in the event that the properties are removed from the Marketing Leases, we cannot accurately predict if, when, or on what terms, such properties could be re-let or sold.

Based on our decision to attempt to negotiate with Marketing for a modification of the Marketing Leases to remove the Subject Properties, made in part upon consideration of the continued deterioration in Marketing's annual financial performance through December 31, 2007, we previously decided, and we continue to believe, that we cannot reasonably assume that we will collect all of the rent due to us related to the Subject Properties for the remainder of the current lease terms. Accordingly, in 2007, we recorded a non-cash reserve representing the full amount of the deferred rent receivable recorded related to the Subject Properties as of December 31, 2007.

In accordance with accounting principles generally accepted in the United States of America ("GAAP"), the aggregate minimum rent due over the current terms of the Marketing Leases, substantially all of which are scheduled to expire in December 2015, is recognized on a straight-line (or an average) basis rather than when payment contractually is due. We record the cumulative difference between lease revenue recognized under this straight line accounting method and the lease revenue recognized when payment is due under the contractual payment terms as deferred rent receivable on our Consolidated Balance Sheets. We provide reserves for a portion of the recorded deferred rent receivable if circumstances indicate that a property may be disposed of before the end of the current lease term or if it is not reasonable to assume that a tenant will make all of its contractual lease payments during the current lease term. Our assessments and assumptions regarding the recoverability of the deferred rent receivable related to the properties subject to the Marketing Leases are reviewed on a quarterly basis and such assessments and assumptions are subject to change.

As of March 31, 2009 we had a reserve of \$9.9 million for the deferred rent receivable due from Marketing representing the full amount of the deferred rent receivable recorded related to the Subject Properties as of that date. We have not provided a deferred rent receivable reserve related to the Remaining Properties since, based on our assessments and assumptions, we continue to believe that it is not probable that we will not collect the deferred rent receivable related to the Remaining Properties of \$22.7 million as of March 31, 2009 and that Lukoil will not allow Marketing to fail to perform its rental, environmental and other obligations under the Marketing Leases. Beginning with the first quarter of 2008, the rental revenue for the Subject Properties was, and for future periods, is expected to be, effectively recognized when payment is due under the contractual payment terms. Although we have adjusted the estimated useful lives of certain long-lived assets for the Subject Properties, we believe that no impairment charge is necessary for the Subject Properties.

Marketing is directly responsible to pay for (i) remediation of environmental contamination it causes and compliance with various environmental laws and regulations as the operator of our properties, and (ii) known and unknown environmental liabilities allocated to Marketing under the terms of the Master Lease and various other agreements between Marketing and us relating to Marketing's business and the properties subject to the Marketing Leases (collectively the "Marketing Environmental Liabilities"). We may ultimately be responsible to directly pay for Marketing Environmental Liabilities as the property owner if Marketing fails to pay them. Additionally, we will be required to accrue for Marketing Environmental Liabilities if we determine that it is probable that Marketing will not meet its obligations and we can reasonably estimate the amount of the Marketing Environmental Liabilities for which we will be directly responsible to pay, or if our assumptions regarding the ultimate allocation methods and share of responsibility that we used to allocate environmental liabilities changes as a result of the factors discussed above, or otherwise. However, we continue to believe that it is not probable that Marketing will not pay for substantially all of the Marketing Environmental Liabilities since we believe that Lukoil will not allow Marketing to fail to perform its rental, environmental and other obligations under the Marketing Leases and, accordingly, we did not accrue for the Marketing Environmental Liabilities as of March 31, 2009 or December 31, 2008. Nonetheless, we have determined that the aggregate amount of the Marketing Environmental Liabilities (as estimated by us based on our assumptions and our analysis of information currently available to us) could be material to us if we were required to accrue for all of the Marketing Environmental Liabilities in the future since we believe that it is reasonably possible that as a result of such accrual, we may not be in compliance with the existing financial covenants in our Credit Agreement. Such non-compliance could result in an event of default which, if not cured or waived, could result in the acceleration of all of our indebtedness under the Credit Agreement.

Should our assessments, assumptions and beliefs prove to be incorrect, including, in particular, our belief that Lukoil is providing credit support to Marketing and that it is probable that Lukoil will continue to provide financial support to Marketing, or if circumstances change, the conclusions we reached may change relating to (i) whether some or all of the Subject or Remaining Properties are likely to be removed from the Marketing Leases, (ii) recoverability of the deferred rent receivable for some or all of the Subject or Remaining Properties, (iii) potential impairment of the Subject or Remaining Properties, and (iv) Marketing's ability to pay the Marketing Environmental Liabilities. We intend to regularly review our assumptions that affect the accounting for deferred rent receivable; long-lived assets; environmental litigation accruals; environmental remediation liabilities; and related recoveries from state underground storage tank funds, which may result in material adjustments to the amounts recorded for these assets and liabilities, and as a result of which, we may not be in compliance with the financial covenants in our Credit Agreement. Accordingly, we may be required to (i) reserve additional amounts of the deferred rent receivable related to the Remaining Properties, (ii) record an impairment charge related to the Subject or Remaining Properties, or (iii) accrue for Marketing Environmental Liabilities as a result of the potential or actual modification of the Marketing Leases or other factors.

We cannot provide any assurance that Marketing will continue to pay its debts or meet its rental, environmental or other obligations under the Marketing Leases prior or subsequent to any potential modification of the Marketing Leases. In the event that Marketing cannot or will not perform its rental, environmental or other obligations under the Marketing Leases; if the Marketing Leases are modified significantly or terminated; if we determine that it is probable that Marketing will not meet its rental, environmental or other obligations and we accrue for certain of such liabilities; if we are unable to promptly re-let or sell the properties upon recapture from the Marketing Leases; or, if we change our assumptions that affect the accounting for rental revenue or Marketing Environmental Liabilities related to the Marketing Leases and various other agreements; our business, financial condition, revenues, operating expenses, results of operations, liquidity, ability to pay dividends and/or stock price may be materially adversely affected.

Unresolved Staff Comment

One comment remains unresolved as part of a periodic review commenced in 2004 by the Division of Corporation Finance of the SEC of our Annual Report on Form 10-K for the year ended December 31, 2003 pertaining to the SEC's position that we must include the financial statements and summarized financial data of Marketing in our periodic filings, which Marketing contends is prohibited by the terms of the Master Lease. In June 2005, the SEC indicated that, unless we file Marketing's financial statements and summarized financial data with our periodic reports (i) it will not consider our Annual Reports on Forms 10-K for the years beginning with 2000 to be compliant, (ii) it will not consider us to be current in our reporting requirements, (iii) it will not be in a position to declare effective any registration statements we may file for public offerings of our securities, and (iv) we should consider how the SEC's conclusion impacts our ability to make offers and sales of our securities under existing registration statements and if we have a liability for such offers and sales made pursuant to registration statements that did not contain the financial statements of Marketing.

We believe that the SEC's position is based on their interpretation of certain provisions of their internal Financial Reporting Manual (formerly known as their Accounting Disclosure Rules and Practices Training Material), Staff Accounting Bulletin No. 71 and Rule 3-13 of Regulation S-X. We do not believe that any of this guidance is clearly applicable to our particular circumstances and we believe that, even if it were, we should be entitled to certain relief from compliance with such requirements. Marketing generally subleases our properties to independent, individual service station/convenience store operators (subtenants). Consequently, we believe that we, as the owner of these properties and the Getty® brand, could re-let these properties, except for those properties that are vacant, to the existing subtenants who operate their convenience stores, automotive repair services or other businesses at our properties, or to other new or replacement tenants, at market rents although we cannot accurately predict if, when, or on what terms, such properties would be re-let or sold. The SEC did not accept our positions regarding the inclusion of Marketing's financial statements in our filings. We have had no communication with the SEC since 2005 regarding the unresolved comment. We cannot accurately predict the consequences if we are ultimately unable to resolve this outstanding comment.

Supplemental Non-GAAP Measures

We manage our business to enhance the value of our real estate portfolio and, as a REIT, place particular emphasis on minimizing risk and generating cash sufficient to make required distributions to shareholders of at least ninety percent of our taxable income each year. In addition to measurements defined by accounting principles generally accepted in the United States of America ("GAAP"), our management also focuses on funds from operations available to common shareholders ("FFO") and adjusted funds from operations available to common shareholders ("AFFO") to measure our performance. FFO is generally considered to be an appropriate supplemental non-GAAP measure of the performance of REITs. FFO is defined by the National Association of Real Estate Investment Trusts as net earnings before depreciation and amortization of real estate assets, gains or losses on dispositions of real estate, (including such non-FFO items reported in discontinued operations), extraordinary items and cumulative effect of accounting change. Other REITs may use definitions of FFO and/or AFFO that are different than ours and; accordingly, may not be comparable.

We believe that FFO is helpful to investors in measuring our performance because FFO excludes various items included in GAAP net earnings that do not relate to, or are not indicative of, our fundamental operating performance such as gains or losses from property dispositions and depreciation and amortization of real estate assets. In our case, however, GAAP net earnings and FFO include the significant impact of deferred rental revenue (straight-line rental revenue) and the net amortization of above-market and below-market leases on our recognition of revenues from rental properties, as offset by the impact of related collection reserves. Deferred rental revenue results primarily from fixed rental increases scheduled under certain leases with our tenants. In accordance with GAAP, the aggregate minimum rent due over the current term of these leases are recognized on a straight-line (or an average) basis rather than when payment is contractually due. The present value of the difference between the fair market rent and the contractual rent for in-place leases at the time properties are acquired is amortized into revenue from rental properties over the remaining lives of the in-place leases. GAAP net earnings and FFO may also include income tax benefits recognized due to the elimination of, or a net reduction in, amounts accrued for uncertain tax positions related to being taxed as a C-corp., rather than as a REIT, prior to 2001. As a result, management pays particular attention to AFFO, a supplemental non-GAAP performance measure that we define as FFO less straight-line rental revenue, net amortization of above-market and below-market leases and income tax benefit. In management's view, AFFO provides a more accurate depiction than FFO of the impact of scheduled rent increases under these leases, rental revenue from acquired in-place leases and our election to be treated as a REIT under the federal income tax laws beginning in 2001. Neither FFO nor AFFO represent cash generated from operating activities calculated in accordance with GAAP and therefore these measures should not be considered an alternative for GAAP net earnings or as a measure of liquidity.

A reconciliation of net earnings to FFO and AFFO for the three months ended March 31, 2009 and 2008 is as follows (in thousands, except per share amounts):

	Three months ended March 31,	
	2009	2008
Net earnings	\$ 9,928	\$ 11,371
Depreciation and amortization of real estate assets	2,593	2,813
Gains from dispositions of real estate	(269)	(547)
Funds from operations	12,252	13,637
Deferred rental revenue (straight-line rent)	188	(439)
Net amortization of above-market and below-market leases	(190)	(201)
Adjusted funds from operations	\$ 12,250	\$ 12,997
Diluted per share amounts:		
Earnings per share	\$ 0.40	\$ 0.46
Funds from operations per share	\$ 0.49	\$ 0.55
Adjusted funds from operations per share	\$ 0.49	\$ 0.52
Diluted-weighted average shares outstanding	24,766	24,768

RESULTS OF OPERATIONS

Three months ended March 31, 2009 compared to the three months ended March 31, 2008

Revenues from rental properties were \$19.9 million for the three months ended March 31, 2009, as compared to \$20.2 million for the three months ended March 31, 2008. We received approximately \$15.2 million for each of the three month periods ended March 31, 2009 and 2008 from properties leased to Marketing under the Marketing Leases. We also received rent of \$4.7 million for the three months ended March 31, 2009 and \$4.5 million for the three months ended March 31, 2008 from other tenants. The increase in rent received was primarily due to rent escalations offset by the effect of dispositions of real estate and lease expirations. In addition to rent received, revenues from rental properties include adjustments recorded for deferred rental revenue due to the recognition of rental income on a straight-line basis and net amortization of above-market and below-market leases. Adjustments for deferred rental revenue result in effectively recognizing the aggregate minimum rent due over the current lease term on a straight-line (or an average) basis, rather than when payment is contractually due, under leases with our tenants which provide for scheduled fixed rent increases. Net adjustments for deferred rental revenue effectively reduced by \$0.2 million the rental income recognized based on rent received for the three months ended March 31, 2009, as compared to net adjustments which effectively increased by \$0.4 million the rental income recognized based on rent received for the three months ended March 31, 2008. Revenues from rental properties for each of the three months ended March 31, 2009 and 2008 include \$0.2 million of additional rental income recognized due to net amortization of above-market and below-market leases. The present value of the difference between the fair market rent and the contractual rent for in-place leases at the time properties are acquired is amortized into revenue from rental properties over the remaining lives of the in-place leases.

Rental property expenses, which are primarily comprised of rent expense and real estate and other state and local taxes, were \$2.2 million for the three months ended March 31, 2009, as compared to \$2.4 million for the three months ended March 31, 2008. The reduction in rental property expenses was principally due to the reduction in the number of leased locations compared to the prior year period.

Environmental expenses, net of estimated recoveries from state underground storage tank ("UST" or "USTs") funds increased by \$1.7 million for the three months ended March 31, 2009 to \$2.5 million, as compared to \$0.8 million recorded for the three months ended March 31, 2008 due to increases in net change in estimated remediation costs, legal fees and litigation loss reserves of \$1.1 million, \$0.3 million and \$0.3 million, respectively. In addition to net change in estimated remediation costs of \$1.3 million (which includes \$0.2 million of accretion expense), environmental expenses for the quarter ended March 31, 2009 also include legal fees of \$0.7 million, principally for trial related costs incurred for several active litigation matters; adjustments to provisions for environmental litigation loss reserves of \$0.3 million, principally related to a tentative settlement agreement for one litigation matter; and project management fees of \$0.2 million. Change in net estimated environmental costs increased by \$1.1 million for the three months ended March 31, 2009 as compared to the atypically low \$0.2 million recorded in the prior year period as a result of more stringent interpretations of existing standards by New York State regulators for certain properties currently being remediated.

General and administrative expenses were \$1.8 million for the three months ended March 31, 2009 as compared to \$1.6 million recorded for the three months ended March 31, 2008. The increase in general and administrative expense was due to higher employee related and insurance expenses.

Depreciation and amortization expense was \$2.6 million for the three months ended March 31, 2009, as compared to \$2.8 million for the three months ended March 31, 2008. The decrease in depreciation and amortization expense was a result of assets becoming fully depreciated.

As a result, total operating expenses increased by approximately \$1.5 million for the three months ended March 31, 2009, as compared to the three months ended March 31, 2008.

Interest expense was \$1.2 million for the three months ended March 31, 2009, as compared to \$2.0 million for the three months ended March 31, 2008. The decrease was principally due to reduction in interest rates on our floating rate borrowings.

Gains on dispositions of real estate, included in other income and discontinued operations, decreased by an aggregate of \$0.2 million for the three months ended March 31, 2009, as compared to the three months ended March 31, 2008.

As a result, net earnings decreased by \$1.5 million to \$9.9 million for the three months ended March 31, 2009, as compared to the \$11.4 million for the three months ended March 31, 2008. Earnings from continuing operations decreased by \$1.2 million to \$9.7 million for the three months ended March 31, 2009, as compared to \$10.9 million for the three months ended March 31, 2008. Earnings from continuing operations excludes the operating results and \$0.2 million of net gain from the disposition of one property sold in 2009, which applicable results have been included in earnings from discontinued operations for the three months ended March 31, 2009 and 2008.

For the three months ended March 31, 2009, FFO decreased by \$1.3 million to \$12.3 million, as compared to \$13.6 million for prior year period, and AFFO decreased by \$0.7 million to \$12.3 million, as compared to \$13.0 million for prior year period. The decrease in FFO for the three months ended March 31, 2009 was primarily due to the changes in net earnings but excludes the \$0.2 million decrease in depreciation and amortization expense and the \$0.2 million decrease in gains on dispositions of real estate. The decrease in AFFO for the three months ended March 31, 2009 also excludes a \$0.6 million decrease in deferred rental revenue and a marginal decrease in net amortization of above-market and below-market leases (which are included in net earnings and FFO but are excluded from AFFO).

Diluted earnings per share decreased by \$0.06 per share to \$0.40 per share for the three months ended March 31, 2009, as compared to \$0.46 per share for the three months ended March 31, 2008. Diluted FFO per share decreased by \$0.06 per share for the three months ended March 31, 2009 to \$0.49 per share, as compared to \$0.55 per share for the three months ended March 31, 2008. Diluted AFFO per share decreased by \$0.03 per share for the three months ended March 31, 2009 to \$0.49 per share, as compared to \$0.52 per share for the three months ended March 31, 2008.

LIQUIDITY AND CAPITAL RESOURCES

Our principal sources of liquidity are the cash flows from our business, funds available under a revolving credit agreement that expires in 2011 and available cash and cash equivalents. Management believes that our operating cash needs for the next twelve months can be met by cash flows from operations, borrowings under our credit agreement and available cash and cash equivalents. There is no assurance, however, that our liquidity will not be adversely affected by developments related to Marketing and the Marketing Leases discussed in “General - Developments Related to Marketing and the Marketing Leases” above.

The current disruption in the credit markets, and the resulting impact on the availability of funding generally, may limit our access to one or more funding sources. In addition, we expect that the costs associated with any additional borrowings we may undertake may be adversely impacted, as compared to such costs prior to the disruption of the credit markets. The United States credit markets are currently experiencing an unprecedented contraction. As a result of the tightening credit markets, we may not be able to obtain additional financing on favorable terms, or at all. If one or more of the financial institutions that supports our credit agreement fails, we may not be able to find a replacement, which would negatively impact our ability to borrow under our credit agreement. In addition, if the current pressures on credit continue or worsen, we may not be able to refinance our outstanding debt when due, which could have a material adverse effect on us.

We are party to a \$175.0 million amended and restated senior unsecured revolving credit agreement (the “Credit Agreement”) with a group of domestic commercial banks led by JPMorgan Chase Bank, N.A. (the “Bank Syndicate”) which expires in March 2011. The Credit Agreement does not provide for scheduled reductions in the principal balance prior to its maturity. The Credit Agreement permits borrowings at an interest rate equal to the sum of a base rate plus a margin of 0.0% or 0.25% or a LIBOR rate plus a margin of 1.0%, 1.25% or 1.5%. The applicable margin is based on our leverage ratio at the end of the prior calendar quarter, as defined in the Credit Agreement, and is adjusted effective mid-quarter when our quarterly financial results are reported to the Bank Syndicate. Based on our leverage ratio as of March 31, 2009, the applicable margin is 0.0% for base rate borrowings and 1.25% for LIBOR rate borrowings.

Subject to the terms of the Credit Agreement, we have the option to extend the term of the Credit Agreement for one additional year to March 2012 and/or, subject to approval by the Bank Syndicate, increase the amount of the credit facility available pursuant to the Credit Agreement by \$125,000,000 to \$300,000,000. We do not expect to exercise our option to increase the amount of the Credit Agreement at this time. In addition, based on the current lack of liquidity in the credit markets, we believe that we would need to renegotiate certain terms in the Credit Agreement in order to obtain approval from the Bank Syndicate to increase the amount of the credit facility at this time. No assurance can be given that such approval from the Bank Syndicate will be obtained on terms acceptable to us, if at all. The annual commitment fee on the unused Credit Agreement ranges from 0.10% to 0.20% based on the average amount of borrowings outstanding. The Credit Agreement contains customary terms and conditions, including customary financial covenants such as leverage and coverage ratios and other customary covenants, including limitations on our ability to incur debt and pay dividends and maintenance of tangible net worth, and events of default, including change of control and failure to maintain REIT status. A material adverse effect on our business, assets, prospects or condition, financial or otherwise, would also result in an event of default. Any event of default, if not cured or waived, could result in the acceleration of all of our indebtedness under our Credit Agreement.

We are party to a \$45.0 million LIBOR based interest rate swap agreement with JPMorgan Chase Bank, N.A. as the counterparty (the "Swap Agreement"), effective through June 30, 2011. The Swap Agreement is intended to hedge our current exposure to market interest rate risk by effectively fixing, at 5.44%, the LIBOR component of the interest rate determined under our existing Credit Agreement or future exposure to variable interest rate risk due to borrowing arrangements that may be entered into prior to the expiration of the Swap Agreement. As a result of the Swap Agreement, as of March 31, 2009, \$45.0 million of our LIBOR based borrowings under the Credit Agreement bear interest at an effective rate of 6.69%.

Total borrowings outstanding under the Credit Agreement at March 31, 2009 were \$131.0 million, bearing interest at a weighted-average effective rate of 3.4% per annum. The weighted-average effective rate is based on \$86.0 million of LIBOR rate borrowings floating at market rates plus a margin of 1.25% and \$45.0 million of LIBOR rate borrowings effectively fixed at 5.44% by the Swap Agreement plus a margin of 1.25%. We had \$44.0 million available under the terms of the Credit Agreement as of March 31, 2009.

Since we generally lease our properties on a triple-net basis, we do not incur significant capital expenditures other than those related to acquisitions. As part of our overall business strategy, we regularly review opportunities to acquire additional properties and we expect to continue to pursue acquisitions that we believe will benefit our financial performance. Capital expenditures, including acquisitions, for the three months ended March 31, 2009 and 2008 amounted to \$2.0 million, and \$3.1 million, respectively. To the extent that our current sources of liquidity are not sufficient to fund capital expenditures and acquisitions we will require other sources of capital, which may or may not be available on favorable terms or at all. We may be unable to pursue public debt or equity offerings until we resolve with the SEC the outstanding comment regarding disclosure of Marketing's financial information. We cannot accurately predict how periods of illiquidity in the credit markets, such as current market conditions, will impact our access to capital.

We elected to be treated as a REIT under the federal income tax laws with the year beginning January 1, 2001. As a REIT, we are required, among other things, to distribute at least ninety percent of our taxable income to shareholders each year. Payment of dividends is subject to market conditions, our financial condition and other factors, and therefore cannot be assured. In particular, our Credit Agreement prohibits the payment of dividends during certain events of default. Dividends paid to our shareholders aggregated \$11.7 million and \$11.5 million for the three months ended March 31 2009 and 2008, respectively, and were paid on a quarterly basis during each of those years. We presently intend to pay common stock dividends of \$0.47 per share each quarter (\$1.88 per share, or \$46.7 million, on an annual basis including dividend equivalents paid on outstanding restricted stock units), and commenced doing so with the quarterly dividend declared in May 2008. Due to the developments related to Marketing and the Marketing Leases discussed in "General - Developments Related to Marketing and the Marketing Leases" above, there is no assurance that we will be able to continue to pay dividends at the rate of \$0.47 per share per quarter, if at all.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our accompanying unaudited interim consolidated financial statements include the accounts of Getty Realty Corp. and our wholly-owned subsidiaries. The preparation of financial statements in accordance with GAAP requires management to make estimates, judgments and assumptions that affect the amounts reported in its financial statements. Although we have made our best estimates, judgments and assumptions regarding future uncertainties relating to the information included in our financial statements, giving due consideration to the accounting policies selected and materiality, actual results could differ from these estimates, judgments and assumptions and such differences could be material.

Estimates, judgments and assumptions underlying the accompanying consolidated financial statements include, but are not limited to, deferred rent receivable, recoveries from state underground storage tank funds, environmental remediation costs, real estate, depreciation and amortization, impairment of long-lived assets, litigation, accrued expenses, income taxes, allocation of the purchase price of properties acquired to the assets acquired and liabilities assumed and exposure to paying an earnings and profits deficiency dividend. The information included in our financial statements that is based on estimates, judgments and assumptions is subject to significant change and is adjusted as circumstances change and as the uncertainties become more clearly defined. Our accounting policies are described in note 1 to the consolidated financial statements that appear in our Annual Report on Form 10-K for the year ended December 31, 2008. We believe that the more critical of our accounting policies relate to revenue recognition and deferred rent receivable and related reserves, impairment of long-lived assets, income taxes, environmental costs and recoveries from state underground storage tank funds and litigation, each of which is discussed in “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our Annual Report on Form 10-K for the year ended December 31, 2008.

New Accounting Pronouncements — In September 2006, the Financial Accounting Standards Board (“FASB”) issued Statement of Financial Accounting Standards (“SFAS”) No. 157, “Fair Value Measurements” (“SFAS 157”). SFAS 157 provides guidance for using fair value to measure assets and liabilities. SFAS 157 generally applies whenever other standards require assets or liabilities to be measured at fair value. SFAS 157 is effective in fiscal years beginning after November 15, 2007. FASB Staff Position (“FSP”) No. 152, “Effective Date of FASB Statement No. 157”, (“FSP 152”) delayed the effective date of FASB No. 157 by one year for nonfinancial assets and liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis to fiscal years beginning after November 15, 2008. The adoption of SFAS 157 in January 2008 and the adoption of the provisions of SFAS 157 for nonfinancial assets and liabilities that are recognized or disclosed at fair value on a nonrecurring basis in January 2009 did not have a material impact on our financial position and results of operations. We do not believe that the adoption of the provisions of SFAS 157 for nonfinancial assets and liabilities that are recognized or disclosed at fair value on a nonrecurring basis will have a material impact on our financial position and results of operations.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), "Business Combinations" ("SFAS 141(R)"), which establishes principles and requirements for how the acquirer shall recognize and measure in its financial statements at fair value the identifiable assets acquired, liabilities assumed, any noncontrolling interest in the acquiree and goodwill acquired in a business combination. SFAS 141(R) requires that acquisition costs, which could be material to our future financial results, will be expensed rather than included as part of the basis of the acquisition. The adoption of this standard by us on January 1, 2009 did not result in a write-off of acquisition related transactions costs associated with transactions not yet consummated.

ENVIRONMENTAL MATTERS

General

We are subject to numerous existing federal, state and local laws and regulations, including matters relating to the protection of the environment such as the remediation of known contamination and the retirement and decommissioning or removal of long-lived assets including buildings containing hazardous materials, USTs and other equipment. Our tenants are directly responsible for compliance with various environmental laws and regulations as the operators of our properties. Environmental expenses are principally attributable to remediation costs which include installing, operating, maintaining and decommissioning remediation systems, monitoring contamination, and governmental agency reporting incurred in connection with contaminated properties. We seek reimbursement from state UST remediation funds related to these environmental expenses where available.

We enter into leases and various other agreements which allocate responsibility for known and unknown environmental liabilities by establishing the percentage and method of allocating responsibility between the parties. In accordance with the leases with certain of our tenants, we have agreed to bring the leased properties with known environmental contamination to within applicable standards and to regulatory or contractual closure ("Closure") in an efficient and economical manner. Generally, upon achieving Closure at an individual property, our environmental liability under the lease for that property will be satisfied and future remediation obligations will be the responsibility of our tenant. As of March 31, 2009, we have regulatory approval for remediation action plans in place for two hundred forty-five (94%) of the two hundred sixty-one properties for which we continue to retain remediation responsibility and the remaining sixteen properties (6%) were in the assessment phase. In addition, we have nominal post-closure compliance obligations at twenty-two properties where we have received "no further action" letters.

Our tenants are directly responsible to pay for (i) remediation of environmental contamination they cause and compliance with various environmental laws and regulations as the operators of our properties, and (ii) environmental liabilities allocated to our tenants under the terms of our leases and various other agreements between our tenants and us. Generally, the liability for the retirement and decommissioning or removal of USTs and other equipment is the responsibility of our tenants. We are contingently liable for these obligations in the event that our tenants do not satisfy their responsibilities. A liability has not been accrued for obligations that are the responsibility of our tenants based on our tenants' past histories of paying such obligations and/or our assessment of their respective financial abilities to pay their share of such costs. However, there can be no assurance that our assessments are correct or that our tenants who have paid their obligations in the past will continue to do so.

It is possible that our assumptions regarding the ultimate allocation methods and share of responsibility that we used to allocate environmental liabilities may change, which may result in adjustments to the amounts recorded for environmental litigation accruals, environmental remediation liabilities and related assets. We will be required to accrue for environmental liabilities that we believe are allocable to others under various other agreements if we determine that it is probable that the counter-party will not meet its environmental obligations. We may ultimately be responsible to directly pay for environmental liabilities as the property owner if the counter-party fails to pay them. The ultimate resolution of these matters could have a material adverse effect on our business, financial condition, results of operations, liquidity, ability to pay dividends and/or stock price. (See “— General — Developments related to Marketing and the Marketing Leases” above for additional information.)

We have not accrued for approximately \$1.0 million in costs allegedly incurred by the current property owner in connection with removal of USTs and soil remediation at a property that was leased to and operated by Marketing. We believe that Marketing is responsible for such costs under the terms of the Master Lease and tendered the matter for defense and indemnification from Marketing, but Marketing denied its liability for the claim and its responsibility to defend against, and indemnify us for, the claim. We filed third party claims against Marketing for indemnification in this matter, which claims are currently being actively litigated. A trial on this claim was held before a judge during the first quarter of 2009. A decision has not yet been rendered by the court. It is reasonably possible that our assumption that Marketing will be ultimately responsible for the claim may change, which may result in our providing an accrual for this and possibly other matters.

We have also agreed to provide limited environmental indemnification to Marketing, capped at \$4.25 million and expiring in 2010, for certain pre-existing conditions at six of the terminals we own and lease to Marketing. Under the indemnification agreement, Marketing is obligated to pay the first \$1.5 million of costs and expenses incurred in connection with remediating any such pre-existing conditions, Marketing will share equally with us the next \$8.5 million of those costs and expenses and Marketing is obligated to pay all additional costs and expenses over \$10.0 million. We have accrued \$0.3 million as of March 31, 2009 and December 31, 2008 in connection with this indemnification agreement. Under the Master Lease, we continue to have additional ongoing environmental remediation obligations for one hundred ninety-one scheduled sites.

As the operator of our properties under the Marketing Leases, Marketing is directly responsible to pay for the remediation of environmental contamination it causes and to comply with various environmental laws and regulations. In addition, the Marketing Leases and various other agreements between Marketing and us allocate responsibility for known and unknown environmental liabilities between Marketing and us relating to the properties subject to the Marketing Leases. Based on various factors, including our assessments and assumptions at this time that Lukoil would not allow Marketing to fail to perform its obligations under the Marketing Leases, we believe that Marketing will continue to pay for substantially all environmental contamination and remediation costs allocated to it under the Marketing Leases. It is possible that our assumptions regarding the ultimate allocation methods and share of responsibility that we used to allocate environmental liabilities may change as a result of the factors discussed above, or otherwise, which may result in adjustments to the amounts recorded for environmental litigation accruals, environmental remediation liabilities and related assets. We may ultimately be responsible to directly pay for environmental liabilities as the property owner if Marketing fails to pay them. We are required to accrue for environmental liabilities that we believe are allocable to Marketing under the Marketing Leases and various other agreements if we determine that it is probable that Marketing will not pay its environmental obligations and we can reasonably estimate the amount of the Marketing Environmental Liabilities for which we will be directly responsible to pay.

Based on our assessment of Marketing's financial condition and our assumption that Lukoil would not allow Marketing to fail to perform its obligations under the Marketing Leases and certain other factors, including but not limited to those described above, we believe at this time that it is not probable that Marketing will not pay the environmental liabilities allocable to it under the Marketing Leases and various other agreements and, therefore, have not accrued for such environmental liabilities. Our assessments and assumptions that affect the recording of environmental liabilities related to the properties subject to the Marketing Leases are reviewed on a quarterly basis and such assessments and assumptions are subject to change.

We have determined that the aggregate amount of the environmental liabilities attributable to Marketing related to our properties (as estimated by us based on our assumptions and our analysis of information currently available to us) (the "Marketing Environmental Liabilities") could be material to us if we were required to accrue for all of the Marketing Environmental Liabilities in the future since we believe that it is reasonably possible that as a result of such accrual, we may not be in compliance with the existing financial covenants in our Credit Agreement. Such non-compliance could result in an event of default which, if not cured or waived, could result in the acceleration of all of our indebtedness under the Credit Agreement. (See "— General — Developments related to Marketing and the Marketing Leases" above for additional information.)

The estimated future costs for known environmental remediation requirements are accrued when it is probable that a liability has been incurred and a reasonable estimate of fair value can be made. Environmental liabilities and related recoveries are measured based on their expected future cash flows which have been adjusted for inflation and discounted to present value. The environmental remediation liability is estimated based on the level and impact of contamination at each property and other factors described herein. The accrued liability is the aggregate of the best estimate for the fair value of cost for each component of the liability. Recoveries of environmental costs from state UST remediation funds, with respect to both past and future environmental spending, are accrued at fair value as an offset to environmental expense, net of allowance for collection risk, based on estimated recovery rates developed from our experience with the funds when such recoveries are considered probable.

Environmental exposures are difficult to assess and estimate for numerous reasons, including the extent of contamination, alternative treatment methods that may be applied, location of the property which subjects it to differing local laws and regulations and their interpretations, as well as the time it takes to remediate contamination. In developing our liability for probable and reasonably estimable environmental remediation costs on a property by property basis, we consider among other things, enacted laws and regulations, assessments of contamination and surrounding geology, quality of information available, currently available technologies for treatment, alternative methods of remediation and prior experience. These accrual estimates are subject to significant change, and are adjusted as the remediation treatment progresses, as circumstances change and as these contingencies become more clearly defined and reasonably estimable.

As of March 31, 2009, we had accrued \$14.1 million as management's best estimate of the net fair value of reasonably estimable environmental remediation costs which is comprised of \$18.6 million of estimated environmental obligations and liabilities offset by \$4.5 million of estimated recoveries from state UST remediation funds, net of allowance. Environmental expenditures, net of recoveries from UST funds, were \$0.6 million and \$0.7 million, respectively, for the three months ended March 31, 2009 and 2008. For the three months ended March 31, 2009 and 2008, the net change in estimated remediation cost and accretion expense included in environmental expenses in our consolidated statements of operations amounted to \$1.3 million and \$0.2 million, respectively, which amounts were net of probable recoveries from state UST remediation funds.

Environmental liabilities and related assets are currently measured at fair value based on their expected future cash flows which have been adjusted for inflation and discounted to present value. We also use probability weighted alternative cash flow forecasts to determine fair value. We assumed a 50% probability factor that the actual environmental expenses will exceed engineering estimates for an amount assumed to equal one year of net expenses aggregating \$5.5 million. Accordingly, the environmental accrual as of March 31, 2009 was increased by \$2.1 million, net of assumed recoveries and before inflation and present value discount adjustments. The resulting net environmental accrual as of March 31, 2009 was then further increased by \$0.9 million for the assumed impact of inflation using a inflation rate of 2.75%. Assuming a credit-adjusted risk-free discount rate of 7.0%, we then reduced the net environmental accrual, as previously adjusted, by a \$2.0 million discount to present value. Had we assumed an inflation rate that was 0.5% higher and a discount rate that was 0.5% lower, net environmental liabilities as of March 31, 2009 would have increased by \$0.2 million and \$0.1 million, respectively, for an aggregate increase in the net environmental accrual of \$0.3 million. However, the aggregate net change in environmental estimates expense recorded during the three months ended March 31, 2009 would not have changed significantly if these changes in the assumptions were made effective December 31, 2008.

In view of the uncertainties associated with environmental expenditures, contingencies concerning the developments related to Marketing and the Marketing Leases and contingencies related to other parties, however, we believe it is possible that the fair value of future actual net expenditures could be substantially higher than these estimates. (See "— General — Developments related to Marketing and the Marketing Leases" above for additional information.) Adjustments to accrued liabilities for environmental remediation costs will be reflected in our financial statements as they become probable and a reasonable estimate of fair value can be made. Future environmental costs could cause a material adverse effect on our business, financial condition, results of operations, liquidity, ability to pay dividends and/or stock price.

We cannot predict what environmental legislation or regulations may be enacted in the future or how existing laws or regulations will be administered or interpreted with respect to products or activities to which they have not previously been applied. We cannot predict if state UST fund programs will be administered and funded in the future in a manner that is consistent with past practices and if future environmental spending will continue to be eligible for reimbursement at historical recovery rates under these programs. Compliance with more stringent laws or regulations, as well as more vigorous enforcement policies of the regulatory agencies or stricter interpretation of existing laws, which may develop in the future, could have an adverse effect on our financial position, or that of our tenants, and could require substantial additional expenditures for future remediation.

Environmental litigation

We are subject to various legal proceedings and claims which arise in the ordinary course of our business. In addition, we have retained responsibility for certain legal proceedings and claims relating to the petroleum marketing business that were identified at the time of the Spin-Off. As of March 31, 2009 and December 31, 2008, we had accrued \$2.0 million and \$1.7 million, respectively, for certain of these matters which we believe were appropriate based on information then currently available. It is possible that our assumptions regarding the ultimate allocation method and share of responsibility that we used to allocate environmental liabilities may change, which may result in our providing an accrual, or adjustments to the amounts recorded, for environmental litigation accruals. Matters related to the Lower Passaic River and the MTBE multi-district litigation, in particular, for which accruals have not been provided could cause a material adverse effect on our business, financial condition, results of operations, liquidity, ability to pay dividends and/or stock price. (For additional information with respect to pending environmental lawsuits and claims, including those matters specifically referenced above, see “Item 3. Legal Proceedings” which appears in our Annual Report on Form 10-K for the year ended December 31, 2008 and “Part II, Item 1. Legal Proceedings” which appears in this form 10-Q.)

Forward Looking Statements

Certain statements in this Quarterly Report on Form 10-Q may constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. When we use the words “believes,” “expects,” “plans,” “projects,” “estimates,” “predicts” and similar expressions, we intend to identify forward-looking statements. Examples of forward-looking statements include statements regarding the developments related to Marketing and the Marketing Leases included in “Developments Related to Marketing and the Marketing Leases” and elsewhere in this Form 10-Q; the impact of any modification or termination of the Marketing Leases on our business and ability to pay dividends or our stock price; our belief that Lukoil is providing credit support and will continue to provide financial support to Marketing in the future and Lukoil will not allow Marketing to fail to perform its rental, environmental and other obligations under the Marketing Leases; our belief that it is not probable that Marketing will not pay for substantially all of the Marketing Environmental Liabilities; our decision to attempt to negotiate with Marketing for a modification of the Marketing Leases which removes the Subject Properties or other properties from the Marketing Leases; our ability to predict if, or when, the Marketing Leases will be modified or terminated, the terms of any such modification or termination or what actions Marketing and Lukoil will take and what our recourse will be whether the Marketing Leases are modified or terminated or not; our belief that it is not probable that we will not collect the deferred rent receivable related to the Remaining Properties; our belief that no impairment charge is necessary for the Subject Properties; the adequacy of our current and anticipated cash flows from operations, borrowings under our credit agreement and available cash and cash equivalents; our ability to relet properties at market rents (either as motor fuel outlets or for other commercial uses) or sell properties; our expectations regarding future acquisitions; our ability to maintain our REIT status; the probable outcome of litigation or regulatory actions; our expected recoveries from UST funds; our exposure to environmental remediation costs; our estimates regarding remediation costs; our expectations as to the long-term effect of environmental liabilities on our business, financial condition, results of operations, liquidity, ability to pay dividends and stock price; our exposure to interest rate fluctuations and the manner in which we expect to manage this exposure; the expected reduction in interest-rate risk resulting from our Swap Agreement

and our expectation that we will not settle the Swap Agreement prior to its maturity; the expectation that the Credit Agreement will be refinanced with variable interest-rate debt at its maturity; our expectations regarding corporate level federal income taxes; the indemnification obligations of the Company and others; our assessment of the likelihood of future competition; assumptions regarding the future applicability of accounting estimates, assumptions and policies; our intention to pay future dividends and the amounts thereof; and our beliefs about the reasonableness of our accounting estimates, judgments and assumptions.

These forward-looking statements are based on our current beliefs and assumptions and information currently available to us and involve known and unknown risks (including the risks described herein, those described in “Developments Related to Marketing and the Marketing Leases” herein, and other risks that we describe from time to time in our filings with the SEC), uncertainties and other factors which may cause our actual results, performance and achievements to be materially different from any future results, performance or achievements, expressed or implied by these forward-looking statements. These factors include, but are not limited to: risks associated with owning and leasing real estate generally; dependence on Marketing as a tenant and on rentals from companies engaged in the petroleum marketing and convenience store businesses; adverse developments in general business, economic or political conditions; our unresolved SEC comment; competition for properties and tenants; risk of performance of our tenants of their lease obligations, tenant non-renewal and our ability to relet or sell vacant properties; the effects of taxation and other regulations; potential litigation exposure; costs of completing environmental remediation and of compliance with environmental regulations; exposure to counterparty risk; the risk of loss of our management team; the impact of our electing to be treated as a REIT under the federal income tax laws, including subsequent failure to qualify as a REIT; risks associated with owning real estate primarily concentrated in the Northeast and Mid-Atlantic regions of the United States; risks associated with potential future acquisitions; losses not covered by insurance; future dependence on external sources of capital; the risk that our business operations may not generate sufficient cash for distributions or debt service; our potential inability to pay dividends; and terrorist attacks and other acts of violence and war.

As a result of these and other factors, we may experience material fluctuations in future operating results on a quarterly or annual basis, which could materially and adversely affect our business, financial condition, operating results and stock price. An investment in our stock involves various risks, including those mentioned above and elsewhere in this report and those that are detailed from time to time in our other filings with the SEC.

You should not place undue reliance on forward-looking statements, which reflect our view only as of the date hereof. We undertake no obligation to publicly release revisions to these forward-looking statements that reflect future events or circumstances or reflect the occurrence of unanticipated events.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Prior to April 2006, when we entered into the Swap Agreement with JPMorgan Chase, N.A. (the “Swap Agreement”), we had not used derivative financial or commodity instruments for trading, speculative or any other purpose, and had not entered into any instruments to hedge our exposure to interest rate risk. We do not have any foreign operations, and are therefore not exposed to foreign currency exchange rate.

We are exposed to interest rate risk, primarily as a result of our \$175.0 million Credit Agreement. Our Credit Agreement, which expires in March 2011, permits borrowings at an interest rate equal to the sum of a base rate plus a margin of 0.0% or 0.25% or a LIBOR rate plus a margin of 1.0%, 1.25% or 1.5%. The applicable margin is based on our leverage ratio at the end of the prior calendar quarter, as defined in the Credit Agreement, and is adjusted effective mid-quarter when our quarterly financial results are reported to the Bank Syndicate. Based on our leverage ratio as of March 31, 2009, the applicable margin is 0.0% for base rate borrowings and 1.25% for LIBOR rate borrowings.

Total borrowings outstanding under the Credit Agreement at March 31, 2009 were \$131.0 million, bearing interest at a weighted-average rate of 2.0% per annum, or a weighted-average effective rate of 3.4% including the impact of the Swap Agreement discussed below. The weighted-average effective rate is based on \$86.0 million of LIBOR rate borrowings floating at market rates plus a margin of 1.25% and \$45.0 million of LIBOR rate borrowings effectively fixed at 5.44% by the Swap Agreement plus a margin of 1.25%. We use borrowings under the Credit Agreement to finance acquisitions and for general corporate purposes.

We manage our exposure to interest rate risk by minimizing, to the extent feasible, our overall borrowing and monitoring available financing alternatives. Our interest rate risk as of March 31, 2009 has not increased significantly, as compared to December 31, 2008. We entered into a \$45.0 million LIBOR based interest rate Swap Agreement, effective through June 30, 2011, to manage a portion of our interest rate risk. The Swap Agreement is intended to hedge \$45.0 million of our current exposure to variable interest rate risk by effectively fixing, at 5.44%, the LIBOR component of the interest rate determined under our existing Credit Agreement or future exposure to variable interest rate risk due to borrowing arrangements that may be entered into prior to the expiration of the Swap Agreement. As a result of the Swap Agreement, as of March 31, 2009, \$45.0 million of our LIBOR based borrowings under the Credit Agreement bear interest at an effective rate of 6.69%. As a result, we are, and will be, exposed to interest rate risk to the extent that our borrowings exceed the \$45.0 million notional amount of the Swap Agreement. As of March 31, 2009, our borrowings exceeded the notional amount of the Swap Agreement by \$86.0 million. We do not foresee any significant changes in how we manage our interest rate risk in the near future.

We entered into the \$45.0 million notional five year interest rate Swap Agreement, designated and qualifying as a cash flow hedge to reduce our exposure to the variability in future cash flows attributable to changes in the LIBOR rate. Our primary objective when undertaking hedging transactions and derivative positions is to reduce our variable interest rate risk by effectively fixing a portion of the interest rate for existing debt and anticipated refinancing transactions. This in turn, reduces the risks that the variability of cash flows imposes on variable rate debt. Our strategy protects us against future increases in interest rates. Although the Swap Agreement is intended to lessen the impact of rising interest rates, it also exposes us to the risk that the other party to the agreement will not perform, the agreement will be unenforceable and the underlying transactions will fail to qualify as a highly-effective cash flow hedge for accounting purposes. Further, there can be no assurance that the use of an interest rate swap will always be to our benefit. While the use of an interest rate swap agreement is intended to lessen the adverse impact of rising interest rates, it also conversely limits the positive impact that could be realized from falling interest rates with respect to the portion of our variable rate debt covered by the interest rate swap agreement.

In the event that we were to settle the Swap Agreement prior to its maturity, if the corresponding LIBOR swap rate for the remaining term of the Swap Agreement is below the 5.44% fixed strike rate at the time we settle the Swap Agreement, we would be required to make a payment to the Swap Agreement counter-party; if the corresponding LIBOR swap rate is above the fixed strike rate at the time we settle the Swap Agreement, we would receive a payment from the Swap Agreement counter-party. The amount that we would either pay or receive would equal the present value of the basis point differential between the fixed strike rate and the corresponding LIBOR swap rate at the time we settle the Swap Agreement.

Based on our average outstanding borrowings under the Credit Agreement projected at \$133.8 million for 2009, an increase in market interest rates of 0.5% for 2009 for the remainder of 2009 would decrease our 2009 net income and cash flows by \$0.3 million. This amount was determined by calculating the effect of a hypothetical interest rate change on our Credit Agreement borrowings that is not covered by our \$45.0 million interest rate Swap Agreement and assumes that the \$133.8 million average outstanding borrowings during the first quarter of 2009 is indicative of our future average borrowings for 2009 before considering additional borrowings required for future acquisitions. The calculation also assumes that there are no other changes in our financial structure or the terms of our borrowings. Our exposure to fluctuations in interest rates will increase or decrease in the future with increases or decreases in the outstanding amount under our Credit Agreement.

In order to minimize our exposure to credit risk associated with financial instruments, we place our temporary cash investments with high-credit-quality institutions. Temporary cash investments, if any, are currently held in an overnight bank time deposit with JPMorgan Chase Bank, N.A.

Item 4. Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's reports filed or furnished pursuant to the Exchange Act, of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As required by the Exchange Act Rule 13a-15(b), the Company has carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and the Company's Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the quarter covered by this report. Based on the foregoing, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective at the reasonable assurance level as of March 31, 2009.

There have been no changes in the Company's internal control over financial reporting during the latest fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Please refer to “Item 3. Legal Proceedings” of our Annual Report on Form 10-K for the year ended December 31, 2008, and note 3 to our consolidated financial statements in such Form 10-K and to note 3 to our accompanying unaudited consolidated financial statements which appear in this Quarterly Report on Form 10-Q, for additional information.

Item 1A. Risk Factors

Because our revenues are primarily dependent on the performance of Getty Petroleum Marketing Inc., our primary tenant, in the event that Marketing cannot or will not perform its rental, environmental and other obligations under the Marketing Leases, or if the Marketing Leases are modified significantly or terminated, or if it becomes probable that Marketing will not pay its environmental obligations, or if we change our assumptions for rental revenue or environmental liabilities related to the Marketing Leases, our business, financial condition, revenues, operating expenses, results of operations, liquidity, ability to pay dividends and/or stock price could be materially adversely affected. No assurance can be given that Marketing will have the ability to pay its debts or meet its rental, environmental or other obligations under the Marketing Leases.

Marketing operated substantially all of our petroleum marketing businesses when it was spun-off to our shareholders as a separate publicly held company in March 1997 (the “Spin-Off”). In December 2000, Marketing was acquired by a subsidiary of OAO LUKoil (“Lukoil”), one of the largest integrated Russian oil companies. A substantial portion of our revenues (75% for the three months ended March 31, 2009) are derived from the Marketing Leases. Accordingly, any factor that adversely affects Marketing, or our relationship with Marketing, may have a material adverse effect on our business, financial condition, revenues, operating expenses, results of operations, liquidity, ability to pay dividends and/or stock price. Our financial results depend largely on rental income from Marketing and; therefore, are materially dependent upon the ability of Marketing to meet its rental, environmental and other obligations under the Marketing Leases. Marketing has made all required monthly rental payments under the Marketing Leases when due through May 2009, although there is no assurance that it will continue to do so.

For the year ended December 31, 2008, Marketing reported a significant loss, accelerating a trend of reporting progressively larger losses in recent years. Based on Marketing’s significant losses for each of the three years ended December 2008, 2007 and 2006 and the cumulative impact of those losses on Marketing’s financial position as of December 31, 2008, Marketing may not have the ability to generate cash flows from its business sufficient to meet its debt maturities and other obligations as they come due in the ordinary course through the term of the Marketing Leases unless it shows significant improvement in its financial results and/or generates sufficient liquidity through the sale of assets or otherwise, or unless financial support continues to be provided by Lukoil, its parent company. We understand that Lukoil currently guarantees substantially all of Marketing’s borrowing facilities. We believe that Marketing would not be able to maintain, renew, extend or expand any such borrowing facilities absent Lukoil guarantees. Lukoil is not, however, a guarantor of the Marketing Leases and there can be no assurance that Lukoil will provide any financial support or additional capital to Marketing in the future. It is reasonably possible that our beliefs regarding the likelihood of Lukoil providing continuing financial support to Marketing will prove to be incorrect or will change as circumstances change.

From time to time we have had discussions with representatives of Marketing regarding potential modifications to the Marketing Leases and, in 2007, during the course of such discussions, Marketing proposed to (i) remove approximately 40% of the properties (the "Subject Properties") from the Marketing Leases and eliminate payment of rent to us and eliminate or reduce payment of operating expenses with respect to the Subject Properties, and (ii) reduce the aggregate amount of rent payable to us for the approximately 60% of the properties that would remain under the Marketing Leases (the "Remaining Properties"). Representatives of Marketing have also indicated to us that they are considering significant changes to Marketing's business model. In light of these developments and the continued deterioration in Marketing's annual financial performance through December 31, 2007, we previously decided to attempt to negotiate with Marketing for a modification of the Marketing Leases which removes the Subject Properties from the Marketing Leases. We have held discussions with Marketing from time to time since March 2008 in our attempt to negotiate a modification of the Marketing Leases to remove the Subject Properties. Although we continue to remove individual locations from the Master Lease as mutually beneficial opportunities arise, there has been no agreement between us and Marketing on any terms that would be the basis for a definitive Master Lease modification agreement. If Marketing ultimately determines that its business strategy is to exit all of the properties it leases from us or to divest a composition of properties different from the properties comprising the Subject Properties, such as the revised list of properties provided to us by Marketing in the second quarter of 2008 which includes approximately 45% of the properties Marketing leases from us, it is our intention to cooperate with Marketing in accomplishing those objectives to the extent that we determine that it is prudent for us to do so. Any modification of the Marketing Leases that removes a significant number of properties from the Marketing Leases would likely significantly reduce the amount of rent we receive from Marketing and increase our operating expenses. We cannot accurately predict if, or when, the Marketing Leases will be modified or what the terms of any agreement for modification of the Marketing Leases may be. We also cannot accurately predict what actions Marketing and Lukoil may take, and what our recourse may be, whether the Marketing Leases are modified or not.

We intend either to re-let or sell any properties removed from the Marketing Leases and reinvest any realized sales proceeds in new properties. We intend to seek replacement tenants or buyers for properties removed from the Marketing Leases either individually, in groups of properties, or by seeking a single tenant for the entire portfolio of properties subject to the Marketing Leases. As permitted under the terms of the Marketing Leases, Marketing generally, subject to any contrary terms under applicable third party leases, can use each property for any lawful purpose, or for no purpose whatsoever. We believe that as of March 31, 2009, Marketing had vacancies and/or removed the gasoline tanks and related equipment at what may be as much as 10% or more of the properties subject to the Marketing Leases. In the event that the properties are removed from the Marketing Leases, we cannot accurately predict if, when, or on what terms, such properties could be re-let or sold. Additionally, with respect to properties that are vacant and/or have had gasoline tanks and related equipment removed, it may be more difficult or costly to relet or sell such properties as a gas station or a convenience store because of capital costs and possible zoning or permitting rights that are needed and may have lapsed during the period since gasoline was last sold at the property.

Marketing is directly responsible to pay for (i) remediation of environmental contamination it causes and compliance with various environmental laws and regulations as the operator of our properties, and (ii) known and unknown environmental liabilities allocated to Marketing under the terms of the Master Lease and various other agreements between Marketing and us relating to Marketing's business and the properties subject to the Marketing Leases (collectively the "Marketing Environmental Liabilities"). We may ultimately be responsible to directly pay for Marketing Environmental Liabilities as the property owner if Marketing fails to pay them. Additionally, we will be required to accrue for Marketing Environmental Liabilities if we determine that it is probable that Marketing will not meet its obligations and we can reasonably estimate the amount of the Marketing Environmental Liabilities for which we will be directly responsible to pay, or if our assumptions regarding the ultimate allocation methods and share of responsibility that we used to allocate environmental liabilities changes as a result of the factors discussed above, or otherwise. However, we continue to believe that it is not probable that Marketing will not pay for substantially all of the Marketing Environmental Liabilities since we believe that Lukoil will not allow Marketing to fail to perform its rental, environmental and other obligations under the Marketing Leases and, accordingly, we did not accrue for the Marketing Environmental Liabilities as of March 31, 2009 or December 31, 2008. Nonetheless, we have determined that the aggregate amount of the Marketing Environmental Liabilities (as estimated by us based on our assumptions and our analysis of information currently available to us) could be material to us if we were required to accrue for all of the Marketing Environmental Liabilities in the future since we believe that it is reasonably possible that as a result of such accrual, we may not be in compliance with the existing financial covenants in our Credit Agreement. Such non-compliance could result in an event of default which, if not cured or waived, could result in the acceleration of all of our indebtedness under the Credit Agreement.

Should our assessments, assumptions and beliefs prove to be incorrect, including, in particular, our belief that Lukoil is providing credit support to Marketing and that it is probable that Lukoil will continue to provide financial support to Marketing, or if circumstances change, the conclusions we reached may change relating to (i) whether some or all of the Subject or Remaining Properties are likely to be removed from the Marketing Leases, (ii) recoverability of the deferred rent receivable for some or all of the Subject or Remaining Properties, (iii) potential impairment of the Subject or Remaining Properties, and (iv) Marketing's ability to pay the Marketing Environmental Liabilities. We intend to regularly review our assumptions that affect the accounting for deferred rent receivable; long-lived assets; environmental litigation accruals; environmental remediation liabilities; and related recoveries from state underground storage tank funds, which may result in material adjustments to the amounts recorded for these assets and liabilities, and as a result of which, we may not be in compliance with the financial covenants in our Credit Agreement. Accordingly, we may be required to (i) reserve additional amounts of the deferred rent receivable related to the Remaining Properties, (ii) record an impairment charge related to the Subject or Remaining Properties, or (iii) accrue for Marketing Environmental Liabilities as a result of the potential or actual modification of the Marketing Leases or other factors.

We cannot provide any assurance that Marketing will continue to pay its debts or meet its rental, environmental or other obligations under the Marketing Leases prior or subsequent to any potential modification of the Marketing Leases. In the event that Marketing cannot or will not perform its rental, environmental or other obligations under the Marketing Leases; if the Marketing Leases are modified significantly or terminated; if we determine that it is probable that Marketing will not meet its rental, environmental or other obligations and we accrue for certain of such liabilities; if we are unable to promptly re-let or sell the properties upon recapture from the Marketing Leases; or, if we change our assumptions that affect the accounting for rental revenue or Marketing Environmental Liabilities related to the Marketing Leases and various other agreements; our business, financial condition, revenues, operating expenses, results of operations, liquidity, ability to pay dividends and/or stock price may be materially adversely affected.

Item 5. Other Information

None.

Item 6. Exhibits

Exhibit No.	Description of Exhibit
31(i).1	Rule 13a-14(a) Certification of Chief Financial Officer
31(i).2	Rule 13a-14(a) Certification of Chief Executive Officer
32.1	Certification of Chief Executive Officer pursuant to 18 U.S.C. § 1350 (a)
32.2	Certifications of Chief Financial Officer pursuant to 18 U.S.C. § 1350 (a)

(a) These certifications are being furnished solely to accompany the Report pursuant to 18 U.S.C. § 1350, and are not being filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, and are not to be incorporated by reference into any filing of the Company, whether made before or after the date hereof, regardless of any general incorporation language in such filing.
