(Zip Code)

Common Stock \$.01 Par Value

(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer as defined in Rule 405 of the Securities Act. Yes o No x

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Exchange Act. Yes o No x

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No o

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12-b-2 of the Exchange Act. (Check one):

Large accelerated filer o Non-accelerated filer o Accelerated filer o Smaller reporting company x

Indicate by a check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No x

The aggregate market value of the registrant's common stock held by non-affiliates as of June 30, 2008 was \$3,963,710. The Company's common stock is traded on the OTC Electronic Bulletin Board. There were 7,849,462 shares of common stock \$.01 par value outstanding as of March 6, 2009.

Documents incorporated by reference: None

PART I

ITEM 1. BUSINESS

In addition to historical information, the following discussion of the Company's business contains forward-looking statements. These forward-looking statements involve risks, uncertainties and assumptions. The actual results may differ materially from those anticipated in these forward-looking statements as a result of many factors, including but not limited to, those discussed in the sections in this Annual Report on Form 10-K entitled "The CreditRiskMonitor Business", "The Company's Goals", "Marketing and Sales", "Management's Discussion and Analysis of Financial Condition and Results of Operations", and "Risks and Other Considerations". Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect management's opinions only as of the date hereof. CreditRiskMonitor.com, Inc. (the "Company" or "CRMZ") undertakes no obligation to revise or publicly release the results of any revision to these forward-looking statements. Readers should carefully review the risk factors described in this document as well as in other documents the Company files from time to time with the Securities and Exchange Commission, including the Quarterly Reports on Form 10-Q to be filed by the Company in fiscal year 2009.

Overview

CRMZ was organized in Nevada in February 1977 and was engaged in the development and sale of nutritional food products from 1982 until October 22, 1993, when it sold substantially all of its assets (the "Asset Sale"), as previously reported. In September 1998, the Company acquired an option (the "Option") to purchase the assets of the CreditRisk Monitor credit information service ("CM Service") from Market Guide Inc. ("MGI"). The Company exercised the Option on December 29, 1998 and completed the purchase of the CM Service assets effective January 19, 1999. The assets included customer contracts, receivables, equipment, software and intangibles. Following the closing of the CM Service purchase, the Company commenced doing business under the name "CreditRiskMonitor.com".

The CreditRiskMonitor Business

The overall focus of the Company's services is on facilitating the extension of trade credit from one business to another.

CRMZ (see our website at www.crmz.com) is an Internet-based publisher of financial information, designed to save time for busy corporate credit professionals, which competes with Dun & Bradstreet, Inc. ("D& B^{M} "). The service publishes comprehensive commercial credit reports covering public companies worldwide and includes detailed financial statements, ratio analysis and trend reports, peer analyses, Altman Z" default scores, company background information, plus Moody's Investors Service ("Moody's") and Standard & Poor's ("S&P") ratings. It also includes trade payment data and public filings (i.e., suits, liens, judgments and bankruptcy information) on millions of U.S. companies. The service also provides continuous filtered news monitoring that keeps subscribers up to date on events affecting the creditworthiness of companies, including financial statement updates,

²

SEC filings, Moody's and S&P rating changes, credit-relevant news stories and press releases.

Beginning in 2007, the Company added an interactive service for credit managers to use in managing recommended credit line limits for their customers, in light of changes in the companies' financial strength. This service monitors daily changes in a customized recommended credit limit for each customer and generates alert messages to subscribers as requested, so they can take immediate action when a customer's circumstances change. Mid-year 2007, the Company added its proprietary credit score, the "FRISK2" score, to its Fundamental Service. This new proprietary score predicts corporate default within the next 12 months, and provides clients with a fast, consistent method for identifying those companies at greatest risk of default. The FRISK2 score is updated daily, based on the latest information available to the Company, and is derived from a statistical model back-tested on 10,000 companies over a multi-year period.

In a business-to-business transaction, for example the purchase and sale of \$20,000 of merchandise, the seller usually will ship before the buyer pays – this is an extension of trade credit by the seller. The terms of trade credit could be "2%-10 days, net 30" which means the customer is entitled to a 2% deduction from the price if the customer makes payment within 10 days; but if not, the customer must make payment in full within 30 days. The seller takes a financial risk extending this credit, referred to as "trade credit risk". The buyer may pay late, causing the seller to incur increased borrowing costs; the seller may incur extra costs in attempting to collect the \$20,000; or the buyer may never pay the full \$20,000. Amounts unlikely to be repaid are called "bad debt". If buyers fail to pay, the seller can suffer substantial losses (e.g., assuming the seller averages a 10% pre-tax margin it will take about \$10 of sales to offset each \$1 of bad debt).

CRMZ's service is usually purchased by a seller to review the risks of extending trade credit to its customers. CRMZ believes that, with the downsizing of corporations and the related reductions in credit departmental budgets and personnel, corporate credit professionals have to do more with less. It is notable that trade credit decisions are often made under intense time pressure. Simultaneously, the Company believes, there has been an explosive growth in the volume of data about businesses. Credit professionals are often faced with an overwhelming amount of available data concerning important customers, while the time for research and analysis is severely limited.

CRMZ's service is the result of management's experience in the commercial credit industry and on-going research with respect to corporate credit department information needs. This has enabled CRMZ to satisfy the credit profession's need for a timely, efficient, low cost credit information service. CRMZ publishes and sells the following commercial credit analysis services to corporate credit managers:

(1) An annual fixed-price service (the "Fundamental Service") with unlimited usage and coverage of public companies, featuring multi-period spreads of financial reports and ratio analysis, as well as up-to-date financial news screened specifically for usefulness in credit evaluation. Another feature of the service is notification and delivery of this news via email, concerning

only companies of interest to the subscriber. This service is supplemented with trade receivable data contributed mainly by CRMZ's subscribers, as well as U.S. public-record filing information (i.e., suits, liens, judgments and bankruptcy information) covering millions of public and private U.S. companies. Midyear 2007, the Company added its proprietary FRISK2 score, which saves clients time by quickly identifying which companies are at greatest risk of default. At the end of 2008, the Fundamental Service covered over 40,000 public companies worldwide, totaling approximately \$43 trillion in corporate revenue and with payables of \$6 trillion compared to world GDP of \$71 trillion. Subscribers may opt, at lower prices, for limited regional coverage: "North American Service" for coverage of just U.S., Canadian, Mexican and Caribbean companies. In addition, the Company sells its Credit Limit Service on an annual subscription basis. This Credit Limit Service is fully integrated with the Fundamental Service, which provides analytical depth to subscribers when questions arise or more analysis is needed. It is only sold in conjunction with the Fundamental Service, for an additional fee. The fee is based, in part, on the number of subject companies evaluated during the annual subscription period, and includes monitoring. The Credit Limit Service offers subscribers the ability to calculate and monitor credit limit recommendations. These calculations are based on a sophisticated proprietary statistical model of default risk. The calculations are based, in part, on the subscriber's own financial situation and relationship with each subject company. The resulting credit limit recommendations are fast, consistent and objective, based on proven risk analysis techniques, and customized to the subscriber's unique situation.

- (2) Single credit reports on the over 40,000 companies covered in item (1) above. These reports are sold mainly via credit card and obtained via the Internet. Email alerts are not available with this single-report service.
- (3) Individual credit reports on approximately 20 million foreign public and private companies. These reports are purchased by CRMZ through affiliations with third-party suppliers and sold to CRMZ subscribers.

There is little hard data on the size of CRMZ's market. The U.S. National Association of Credit Management has about 30,000 members, but some industry observers believe the number of U.S. credit managers and other personnel performing this function is substantially greater. In addition, there are numerous U.S. based companies that do not have a full-time credit function but still require credit information. Furthermore, a market exists outside of the U.S. for information on U.S. and foreign companies. Finally, a small fraction of the Company's customers use the information for purposes outside of the credit function, including procurement and strategic planning/competitive analysis.

The viability and potential of CRMZ's business is made possible by the following characteristics:

• Low price. The prices of CRMZ's services are low compared to the subscriber's possible loss from not getting paid and low compared to the cost of most competitive products (for example, see the Price Comparison chart on our website).

- Non-cyclical. As economic growth slows, general corporate credit risk usually increases and the credit manager's function rises in importance and complexity. Additionally, products that allow credit managers to perform their jobs more efficiently and cost effectively, compared to competitive services, should gain market share in most business environments and especially during a downturn. In a contracting business environment, many companies face increasing price competition which should accelerate their shift to lower cost technologies and providers, such as CRMZ. CRMZ's business and revenues therefore have continued to grow as world economic growth slows or declines. Over the last ten years the issuance of corporate "junk bonds" and other debt by public companies and public debt by private companies (LBO's, etc.), and the development of credit instruments to hedge default and interest rate risk (i.e., credit derivatives) has increased dramatically. It is difficult to get a complete or totally accurate number of the totals, but it appears the "notional" values of these various derivative instruments may be in the range of \$25-30 trillion. To put this in perspective, in 2008 the U.S. Gross Domestic Product ("GDP") was approximately \$15 trillion, and the market value of all U.S. public company equity was approximately \$17 trillion. Thus, U.S. public companies and private companies with public debt have a looming vulnerability to business cycle contraction and the attendant market risks for interest rates and stock markets. This dramatically increases the exposure and complexity of extending commercial trade credit and puts a premium on the speed and analysis of CRMZ's service.
- **Recurring revenue stream.** The recurring annual revenue stream of its subscription fee model gives the Company stability not found in a one-time sale product-based company.
- **Profit multiplier.** Some of the Company's basic costs are being reduced. On a broad generic basis, the prices of computer hardware, software and telecommunications have been coming down for all buyers, including CRMZ. In addition, CRMZ has automated a significant amount of the processes used to create and deliver its service; therefore, its production costs, apart from the development cost of enhancing and upgrading the Company's website, are relatively stable over a wide range of increasing revenue. Offsetting these cost reductions is the cost of increasing the data content of CRMZ's services if the Company chooses to increase content and not raise its prices to cover these additional costs.
- Self financing. CRMZ's business has no inventory, manufacturing or warehouse facilities, and payment for the subscription service is
 made early in the subscription cycle. Thus, the Company's business is characterized by low capital-intensity, and yet it is a business
 capable of generating high margins and sufficient positive cash flow to grow the business organically with little need for external capital.
 In addition, the Company has approximately \$4.4 million of net operating loss carryforwards which may offset future tax liability and
 thus positively impact cash flow. (See MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL

CONDITION AND RESULTS OF OPERATIONS - Financial Condition, Liquidity and Capital Resources; and Net Operating Loss Carryforwards.)

• Management. CRMZ has in-place an experienced management team with proven talent in business credit evaluation systems and Internet development.

The Company's Goals

- Growth in U.S. market share. Faced with a dominant U.S. competitor, D&B, as well as several other larger competitors, the Company's primary goal is to gain market share. The Company believes that many potential customers are unaware of its service, while others are aware of but have not evaluated its service.
- International penetration. Foreign companies doing business within the U.S. or other foreign countries may have the same need as domestic companies for CRMZ's credit analysis of U.S. and foreign companies. Internationally, the Internet provides a mechanism for rapid and inexpensive marketing and distribution of CRMZ's service.
- **Broaden the services supplied**. Revenue per subscriber should increase over time as the Company adds functionality and content, which for example it did in 2007 with the introduction of its Credit Limit Service and also with an increase in coverage of non-U.S. companies. Also, revenue per client should increase over time as the Company sells additional passwords to existing clients.
- Lowest cost provider. CRMZ's sourcing, analysis and preparation of data into a usable form is highly automated. CRMZ delivers all of its information to customers via the Internet and there is continuous automation between the sourcing of data and delivery of a company credit report to a subscriber. Because of this automation, CRMZ's production costs are relatively stable over a wide range of increasing revenue. Management believes CRMZ's cost structure is one of the lowest in its industry.
- High margins and return on investment. The Company foresees declining unit costs in some important expense areas, such as computer and communication costs, which should increase net profits from its subscription income stream. The Company believes that the advent of Internet delivery of telephone calls will further reduce the cost per phone call over the next several years, and computer costs per transaction should also continue to decline. The Company has lower sales expenses for customer renewals than for new sales, and the Company expects that its renewal revenue will continue to grow to be a larger share of total revenue each year. All these naturally occurring unit cost reductions will be in addition to the cost reductions achieved through servicing more accounts over the Company's in-place fixed costs.

Marketing and Sales

To gain market share for the Company's service, it will continue to use the Internet (at our website www.crmz.com) as the primary mechanism for demonstrating and distributing its service. To inform potential subscribers about its service, CRMZ uses a combination of telephone sales, Internet demonstration, direct mail, trade show representation and speaking engagements before credit groups and associations.

Value Proposition

The Company's fundamental <u>value proposition</u> is that it creates and sells high quality commercial credit reports that save busy credit managers time, at a cost significantly below that of reports from the leading provider (price comparison as of January 30, 2009). Because D&B has the largest share of the commercial credit market, their flagship product, the Business Information Report ("BIR"), is the standard by which that market measures both quality and price. The Company's research shows that its customers overwhelmingly agree that CreditRiskMonitor saves them time, helps them to make better credit decisions, and represents a significant value for the price paid compared to competitive services.

The <u>operational strategy</u> CRMZ follows to deliver on its value proposition is straightforward. CRMZ became (and remains) one of the industry's lowest cost producers of high quality commercial credit information by continuously collecting data from a wide variety of sources and employing sophisticated proprietary computer algorithms to process that data into an extensive database of valuable reports on companies. Highly automated operations add to reliability and consistency, while limiting costs. The Company employs a small number of analysts who selectively review data at critical points in its process to further enhance the quality of its products and their relevance to credit professionals.

CRMZ employs several different selling strategies to deliver this value to different customer segments:

- Credit professionals need to save time, when analyzing their most important customers, and the CRMZ service provides this critical benefit. CRMZ believes that its reports and monitoring of public companies, having aggregate revenues of approximately \$43 trillion and payables of \$6 trillion, are superior in this way to what is offered by D&B. The CRMZ service provides financial information in greater depth and better analytical efficiency. It also includes timely email alerts enabling credit professionals to easily stay on top of financial developments at their customers, without the clutter of non-financial news prevalent at other news services. Finally, the Moody's and S&P ratings, and the Altman Z" and proprietary FRISK2 scores offered by the service enable further efficiency by focusing attention on only those companies showing financial weakness.
- The Company's customers typically have contracts with D&B. Traditionally, D&B sells them prepaid units and/or reports ("units") on an annual basis, which they can then use to buy D&B products throughout the year. The price of each unit depends on

the number of units being purchased upfront, with the resulting price of a domestic U.S. BIR generally ranging between \$40 and \$60. If a customer has unused units at the end of the year, D&B may allow it to carry a percentage of them forward, if the customer renews for another year for at least the same number of units as the previous year. All other unused units may be forfeited. For these customers, CRMZ's simple unlimited usage fixed price annual subscription represents an opportunity to save money by reducing the customer's D&B usage. The best practice that CRMZ recommends to its subscription customers is to always search CRMZ's database first (which does not incur any incremental expense to them) and to save their expensive D&B units for decisions concerning those privately-held businesses where CRMZ may have little or no information. According to the Company's research, the great majority of customers report saving money as a result of using the CRMZ service. In 2005, the Company became aware that D&B had also begun selling some part of its service on a "fixed-price" basis, and in 2006 D&B expanded this practice under the trade name "DNBi". It appears that these contracts offer a fixed price for usage of D&B information within a wide range of amounts, the upper end of which is a multiple of the customer's current usage. D&B attempts to maintain or increase its total annual charges to each DNBi customer, and these charges are generally many times more than comparable CRMZ fees. At the same time, D&B attempts to bind its customers to multi-year agreements, so as to blunt the customer's ability to reduce its D&B costs over several years. The Company cannot predict the effectiveness of D&B's strategy much less whether D&B will find this DNBi pricing is even sustainable over multiple years, while attempting to continuously increase its revenues. To date, the tactic has not significantly diminished the Company's ability to win new customers.

- The Company estimates that only a small percentage of all credit-related business transactions are currently supported by objective third party credit information. This is not surprising, given the high cost of commercial credit reports from D&B and other vendors. CRMZ breaks that model by eliminating the incremental cost of a credit report. CRMZ's fixed price, unlimited usage annual subscription enables customers to employ up to date, objective credit information in many more transactions than was economically feasible before. Customers can make better credit decisions with no increase in costs.
- For low-volume customers, CRMZ sells single commercial credit reports for a flat price of \$49.95 per report, using credit card transactions via the Internet. Although D&B also sells single reports on the Internet, they impose a complicated pricing schedule, in which the price of a specific company report depends on both the customer's home country and the home country of the company about which they are inquiring. This pricing schedule includes more than 30 different price points for essentially the same D&B Business Information Report alone, ranging from \$80 to \$570 for this flagship report. This competitor's approach is apparently designed to protect its legacy revenue streams from the pre-Internet era, when charging large cross-border premiums could be justified to some extent by the increased production costs of producing and delivering reports across boundaries. In

contrast, CRMZ was designed from the ground up to be a worldwide provider of commercial credit reports over the Internet, and is not similarly constrained by legacy systems. Consequently, CRMZ's value advantage is even more apparent when customers compare the costs of cross-border report purchases.

Net Operating Loss Carryforwards

At December 31, 2008, the Company had net operating loss ("NOL") carryforwards aggregating approximately \$4.4 million, expiring in varying amounts over the next eighteen (18) years, which, to the extent available under the Internal Revenue Code of 1986, as amended (the "Code"), may be used to minimize the Company's liability for taxes on future taxable income of the Company, if any.

Section 382 of the Code provides limits on the amount of a company's NOL carryforwards which can be applied against its earnings after an "ownership change" occurs. The Company is not aware of any transaction, pending or contemplated, that could constitute an ownership change.

Employees

As of March 6, 2009, the Company had 50 full-time employees. None of the Company's employees are covered by a collective bargaining agreement. The Company believes its relations with its employees to be satisfactory and has suffered no interruption in operations.

The Company established a 401(k) Plan covering all employees effective January 1, 2000 that provides for discretionary Company contributions. The Company has no other retirement, pension, profit sharing or similar program in effect for its employees. The Company adopted a stock option plan in 1998 that covers its employees.

ITEM 2. PROPERTIES.

The Company does not own any real property. The Company's principal office is located in approximately 7,690 square feet of leased space in an industrial warehouse complex located in Valley Cottage, New York. The lease expires on July 31, 2009 and provides for a monthly cost of \$8,646, plus an allocated portion of real estate taxes, insurance and common area maintenance.

ITEM 3. LEGAL PROCEEDINGS.

Neither the Company nor its property is a party to or the subject of a pending legal proceeding.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

No matters were submitted to a vote of security holders during the fourth quarter of the Company's fiscal year ended December 31, 2008, either through the solicitation of proxies or otherwise.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURHASES OF EQUITY SECURITIES.

The Company's Common Stock trades in the over-the-counter market "Bulletin Board Service" under the symbol CRMZ. The following table sets forth the high and low closing bid quotations reported on the over-the-counter market Bulletin Board Service for each calendar quarter of 2007 and 2008. These quotations reflect inter-dealer prices without retail mark-up, mark-down or commission and may not necessarily represent actual transactions.

		High Bid	Low Bid
2007			
	First Quarter	\$ 2.70	\$ 1.20
	Second Quarter	\$ 2.50	\$ 1.75
	Third Quarter	\$ 2.50	\$ 2.32
	Fourth Quarter	\$ 2.60	\$ 1.25
2008			
	First Quarter	\$ 2.60	\$ 1.55
	Second Quarter	\$ 1.90	\$ 1.50
	Third Quarter	\$ 1.75	\$ 1.01
	Fourth Quarter	\$ 1.30	\$ 0.30

On March 6, 2009, there were approximately 323 registered holders of the Company's Common Stock. This number does not reflect the number of individuals or institutional investors holding stock in nominee name through banks, brokerage firms, and others.

The Company has not paid any cash dividends on its Common Stock and does not anticipate paying any cash dividends in the foreseeable future.

The Company did not repurchase any of its common stock during the fourth quarter of 2008.

ITEM 6. SELECTED FINANCIAL DATA

Not applicable.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Business Environment

The continuing uncertainty in the worldwide financial system has negatively impacted general business conditions. It is possible that a weakening economy could adversely affect our clients' need for credit information, or even their solvency, but we cannot predict whether or to what extent this will occur. To the contrary, monthly bookings of new business subscriptions for the fourth quarter of 2008 were the highest in the Company's history supporting our belief that the need for our credit information appears to be non-cyclical.

Our strategic priorities and plans for 2009 will continue to build on the improvement initiatives underway to achieve sustainable, profitable growth. Global market conditions, however, may affect the level and timing of resources deployed in pursuit of these initiatives in 2009.

Financial Condition, Liquidity and Capital Resources

At December 31, 2008, the Company had cash and cash equivalents of \$913,000 compared to \$2.97 million at December 31, 2007. This decrease of over \$2 million was the result of the Company investing excess cash funds at December 31, 2008 in U.S. Government intermediate bond funds which are classified for financial reporting purposes as trading securities. The Company had working capital (i.e., total current assets in excess of total current liabilities) of approximately \$197,000 at December 31, 2008 compared to approximately \$44,000 at December 31, 2007. The Company's current ratio (which measures a company's ability to meet its current obligations and is computed by dividing total current assets by total current liabilities) went from 1.01 at December 31, 2007 to 1.04 at December 31, 2008. Additionally, the main component of current liabilities at December 31, 2008 is deferred revenue of \$4.39 million, which should not require significant future cash outlay other than the cost of preparation and delivery of the applicable commercial credit reports which cost much less than the deferred revenue shown. The deferred revenue is recognized as income over the subscription term, which approximates twelve months. The Company has no bank lines of credit or other currently available credit sources.

The Company believes that it has sufficient resources to meet its working capital and capital expenditure needs for the foreseeable future.

As described more fully in Note 10 of the Notes to Financial Statements, at December 31, 2008 the Company had certain cash obligations, which are due as follows:

	Total	Less than 1 Year	1-3 Years	4-5 Years	More than 5 Years
Operating leases	\$ 100,226	\$ 94,360	\$ 4,266	\$ 1,600	
Total	\$ 100,226	\$ 94,360	\$ 4,266	\$ 1,600	

Off-Balance Sheet Arrangements

The Company is not a party to any off-balance sheet arrangements.

Results of Operations

2008 vs. 2007

	Year Ended December 31,								
	200)8	200)7					
	Amount	% of Total Revenue	Amount	% of Total Revenue					
Operating revenues	\$ 5,872,996	100.00%	\$ 4,989,177	100.00%					
Operating expenses:									
Data and product costs	1,753,338	29.85%	1,651,606	33.11%					
Selling, general and administrative expenses	3,795,232	64.62%	2,953,648	59.20%					
Depreciation and amortization	81,531	1.39%	65,895	1.32%					
Total operating expenses	5,630,101	95.86%	4,671,149	93.63%					
Income from operations	242,895	4.14%	318,028	6.37%					
Other income	142,923	2.43%	93,344	1.87%					
Interest expense	(9,875)	-0.17%	(37,535)	-0.75%					
Income before income taxes	375,943	6.40%	373,837	7.49%					
Provision for state and local income taxes	4,117	0.07%	3,606	0.07%					
Net income	\$ 371,826	6.33%	\$ 370,231	7.42%					

Operating revenues increased 18% for fiscal 2008. This increase was primarily due to an increase in the number of subscribers and increased revenue from existing subscribers to the Company's Internet subscription service as the market became more aware of the Company's enhanced service, offset in part by a decrease in the number of subscribers to the Company's third-party international credit report subscription service.

Data and product costs increased 6% for fiscal 2008. This increase was primarily due to higher salary and related employee benefits, including the hiring of an employee, and the higher cost of third-party content due to price increases.

Selling, general and administrative expenses increased 28% for fiscal 2008. This increase was primarily due to higher salary and related employee benefit costs, resulting from an increase in the Company's sales force during the past 12 months, and higher marketing expenses. New salespeople require a learning curve to understand and sell the Company's service. Thus, there is a lag between the increase in the Company's sales force and anticipated higher sales.

Depreciation and amortization increased 24% for fiscal 2008, due to a higher depreciable asset base reflecting the replacement of computer equipment that had been in operation past its depreciable life.

Other income increased 53% for fiscal 2008, primarily due to a higher level of funds invested in interest bearing accounts.

Interest expense decreased 74% for fiscal 2008, primarily due to the Company prepaying its long-term debt in April 2008, as well as a lower outstanding long-term debt balance during the first quarter of 2008.

The Company did not report a provision for Federal income taxes because of the availability of net operating loss carryforwards to offset its current tax liability.

2007 vs. 2006

	Year Ended December 31,							
	200)7	200	06				
	Amount	% of Total Revenue						
Operating revenues	\$ 4,989,177	100.00%	\$ 4,322,785	100.00%				
Operating expenses:								
Data and product costs	1,651,606	33.11%	1,404,182	32.48%				
Selling, general and administrative expenses	2,953,648	59.20%	2,849,002	65.91%				
Depreciation and amortization	65,895	1.32%	65,951	1.53%				
Total operating expenses	4,671,149	93.63%	4,319,135	99.92%				
Income from operations	318.028	6.37%	3,650	0.08%				
Other income	93,344	1.87%	68,285	1.58%				
Interest expense	(37,535)	-0.75%	(52,416)	-1.21%				
Income before income taxes	373,837	7.49%	19,519	0.45%				
Provision for state and local income taxes	3,606	0.07%	4,922	0.11%				
Net income	\$ 370,231	7.42%	\$ 14,597	0.34%				

Operating revenues increased 15% for fiscal 2007. This increase was primarily due to an increase in the number of subscribers and increased revenue from existing subscribers to the Company's Internet subscription service as the market became more aware of the Company's enhanced service as well as sales from the Company's new credit limit service introduced during the first quarter.

Data and product costs increased 18% for fiscal 2007. This increase was primarily due to higher salary and related employee benefits costs including the hiring of additional quality control and IT personnel, as well as the cost of new third-party content added to the Company's website offset in part by lower consulting fees.

Selling, general and administrative expenses increased 4% for fiscal 2007. This increase was primarily due to higher salary and related employee benefit costs due to an increase in the Company's sales force during the past 12 months and an increase in professional fees, primarily for outside assistance in complying with the requirements of the Sarbanes-Oxley Act of 2002, partially offset by a decrease in marketing expenses.

Depreciation and amortization decreased less than 1% for fiscal 2007, due to a lower depreciable asset base reflecting the continued use of certain items that have been fully depreciated.

Other income increased 37% for fiscal 2007, primarily due to a higher level of funds invested in interest bearing accounts as well as a higher interest rate received on such funds during the current period compared to the same period last year.

Interest expense decreased 28% for fiscal 2007, due to a lower outstanding promissory note balance.

The Company did not report a provision for Federal income taxes because of the availability of net operating loss carryforwards to offset its current tax liability.

Future Operations

The Company over time intends to expand its operations by expanding the breadth and depth of its product and service offerings and introducing new and complementary products. Gross margins attributable to new business areas may be lower than those associated with the Company's existing business activities.

As a result of the Company's limited operating history and the evolving nature of the markets in which it competes, the Company's ability to accurately forecast its revenues, gross profits and operating expenses as a percentage of net sales is limited. The Company's current and future expense levels are based largely on its investment plans and estimates of future revenues. To a large extent these costs do not vary with revenue. Sales and operating results generally depend on the Company's ability to attract and retain customers and the volume of and timing of customer subscriptions for the Company's services, which are difficult to forecast. The Company may be unable to adjust spending in a timely manner to compensate for any unexpected revenue shortfall. Accordingly, any significant shortfall in revenues in relation to the Company's planned expenditures would have an immediate adverse effect on the Company's business, prospects, financial condition and results of operations. Further, as a strategic response to changes in the competitive environment, the Company may from time to time make certain pricing, service, marketing or acquisition decisions that could have a material adverse effect on its business, prospects, financial condition and results of operations.

Achieving greater profitability depends on the Company's ability to generate and sustain increased revenue levels. The Company believes that its success will depend in large part on its ability to (i) increase its brand awareness, (ii) provide its customers with outstanding value, thus encouraging customer renewals, and (iii) achieve sufficient sales volume to realize economies of scale. Accordingly, the Company intends to continue to increase the size of its sales force, invest in product development, operating infrastructure, marketing and promotion. There can be no assurance that the Company will be able to achieve these objectives within a meaningful time frame.

Critical Accounting Policies, Estimates and Judgments

The Company's financial statements are prepared in accordance with accounting principles that are generally accepted in the United States. The preparation of these financial statements require management to make estimates and judgments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Management bases its estimates and judgments on historical experience and other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. Management continually evaluates its estimates and judgments, the most critical of which are those related to:

Revenue recognition - CRMZ's North American and worldwide service is sold on a subscription basis pursuant to customer

contracts that span varying periods of time, but are generally for a period of one year. The Company initially records amounts billed as accounts receivable and defers the related revenue until persuasive evidence of an arrangement exists, fees are fixed or determinable, and collection is reasonably assured. Revenues are recognized ratably over the related subscription period. Revenue from the Company's third-party international credit report service is recognized as information is delivered and products and services are used by customers.

Valuation of goodwill — Goodwill is reviewed for impairment annually, or more frequently if events or changes in circumstances warrant. If the carrying value of this asset exceeds its estimated fair value, the Company will record an impairment loss to write the asset down to its estimated fair value.

Income taxes — The Company provides for deferred income taxes resulting from temporary differences between financial statement and income tax reporting. Temporary differences are differences between the amounts of assets and liabilities reported for financial statement purposes and their tax bases. Deferred tax liabilities are recognized for temporary differences that will be taxable in future years' tax returns. Deferred tax assets are recognized for temporary differences that will be deductible in future years' tax returns and for operating loss and tax credit carryforwards. Deferred tax assets are reduced by a valuation allowance if it is deemed more likely than not that some or all of the deferred tax assets will not be realized. The Company considers that the cumulative losses incurred in recent years creates a rebuttable presumption that a full valuation allowance continues to be required for its deferred tax assets.

Federal Tax Considerations

The Company has available net operating loss carryforwards ("NOLs"), which may be used to reduce its Federal income tax liability. However, provisions contained in the Internal Revenue Code of 1986, as amended (the "Code"), may impose substantial limitations upon the Company's ability to utilize its NOLs. For example, the Company may be subject to the "alternative minimum tax" which does not always permit full utilization of NOLs otherwise available.

Limitations imposed by Section 382 of the Code upon the availability of NOLs would apply if certain changes were to occur in ownership of the Company. Thus, the Company's utilization of its carryforwards in the future may be deferred and/or reduced if the Company undertakes further equity financings or if certain other changes occur in the ownership of the Common Stock. See "Business - Net Operating Loss Carryforwards".

Recently Issued Accounting Standards

The Financial Accounting Standards Board ("FASB") and the Securities and Exchange Commission ("SEC") have issued accounting pronouncements as of December 31, 2008 that will become effective in subsequent periods; however, management does not believe that any of those pronouncements would have significantly affected our financial

accounting measurements or disclosures had they been in effect during the annual period for which financial statements are included in this annual report, nor does management believe those pronouncements would have a significant effect on our future financial position or results of operations.

Risks and Other Considerations

The risks and uncertainties described below are not the only ones facing the Company. Additional risks and uncertainties not presently known to the Company or currently deemed immaterial also may impair its business operations. If any of the risks described below actually occur, the Company's business could be impaired.

From time to time, information provided by the Company or statements made by its employees, or information provided in its filings with the Securities and Exchange Commission may contain forward-looking information. Any statements contained herein or otherwise made that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the foregoing, the words "believes", "expects", "anticipates", "plans" and similar expressions are intended to identify forward-looking statements. The Company's actual future operating results or short-term or long-term liquidity may differ materially from those projections or statements made in such forward-looking information as a result of various risks and uncertainties, including but not limited to the following in addition to those set forth elsewhere herein or in other filings made by the Company with the Commission.

Limited Operating History of CRMZ; Anticipated Losses and Negative Cash Flow. The Company has been operating its business since January 1999, when it acquired the assets of the CreditRisk Monitor credit information service. Accordingly, CRMZ has a limited operating history on which to base an evaluation of its business and prospects. The Company's prospects must be considered in light of the risks, expenses and difficulties frequently encountered by companies in their early stage of development, particularly companies in new and rapidly evolving markets such as online commerce. Such risks for the Company among other things, must maintain and increase its customer base, implement and successfully execute its business and marketing strategy and its expansion into new product markets, effectively integrate acquisitions and other business combinations, continue to develop and upgrade its technology and transaction-processing systems, improve its Web site, provide superior customer service, respond to competitive developments and attract, retain and motivate qualified personnel. There can be no assurance that the Company will be successful in addressing such risks, and the failure to do so could have a material adverse effect on the Company's business, prospects, financial condition and results of operations.

Since inception, CRMZ incurred significant operating losses, and it has been generating operating profits only since 2006. There can be no assurance that the Company may not again incur additional losses and negative cash flow. See "MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS."

Unpredictability of Future Revenues and Profits; Potential Fluctuations in Quarterly Operating Results. As a result of the Company's limited operating history and the emerging nature of the markets in which it competes, the Company's ability to accurately forecast its revenues, gross profits and operating expenses as a percentage of net sales is limited. The Company's current and future expense levels are based largely on its investment plans and estimates of future revenues and to a large extent are fixed. Sales and operating results generally depend on the Company's ability to attract and retain customers and the volume of and timing of their subscriptions for the Company's services, which are difficult to forecast. The Company may be unable to adjust spending in a timely manner to compensate for any unexpected revenue shortfall. Accordingly, any significant shortfall in revenues in relation to the Company's planned expenditures would have an immediate adverse effect on the Company's business, prospects, financial condition and results of operations. Further, as a strategic response to changes in the competitive environment, the Company may from time to time make certain pricing, service, marketing or acquisition decisions that could have a material adverse effect on its business, prospects, financial condition and results of operations.

Maintaining and improving profitability depends on the Company's ability to generate and sustain substantially increased revenue levels. The Company believes that its success will depend in large part on its ability to (i) extend its brand position, (ii) provide its customers with outstanding value, and (iii) achieve sufficient sales volume to realize economies of scale. Accordingly, the Company intends to continue to invest in marketing and promotion, product development and technology and operating infrastructure development. There can be no assurance that the Company will be able to achieve these objectives within a meaningful time frame.

The Company expects to experience significant fluctuations in its future quarterly operating results due to a variety of factors, some of which are outside the Company's control. Factors that may adversely affect the Company's quarterly operating results include, among others, (i) the Company's ability to retain existing customers, attract new customers at a steady rate and maintain customer satisfaction, (ii) the Company's ability to maintain gross margins in its existing business and in future product lines and markets, (iii) the development of new services and products by the Company and its competitors, (iv) price competition, (v) the level of use of the Internet and online services and increasing acceptance of the Internet and other online services for the purchase of products such as those offered by the Company, (vi) the Company's ability to upgrade and develop its systems and infrastructure, (vii) the Company's ability to attract new personnel in a timely and effective manner, (viii) the level of traffic on the Company's website, (ix) the Company's ability to manage effectively its development of new business segments and markets, (x) the Company's ability to successfully manage the integration of operations and technology of acquisitions or other business combinations, (xi) technical difficulties, system downtime or Internet brownouts, (xii) the amount and timing of operating costs and capital expenditures relating to expansion of the Company's business, operations and infrastructure, (xiii) governmental regulation and taxation policies, (xiv) disruptions in service by common carriers due to strikes or otherwise, (xv) risks of fire or other casualty, (xvi)

litigation costs or other unanticipated expenses, (xvii) interest rate risks and inflationary pressures, and (xviii) general economic conditions and economic conditions specific to the Internet and online commerce.

Due to the foregoing factors and the Company's limited forecasting abilities, the Company believes that period-to-period comparisons of its revenues and operating results are not necessarily meaningful and should not be relied on as an indication of future performance.

Competition. The online commerce market, particularly over the Web, is new, rapidly evolving and intensely competitive. The Company's current or potential competitors include (i) companies now selling or who will be selling credit analysis data, such as D&BTM which currently has the dominant position in the industry and the financial resources to invest much more than the Company can while withstanding substantial price competition, and (ii) a number of indirect competitors that specialize in online commerce or information or who derive a substantial portion of the revenues from online commerce, advertising or information, and who may offer competing products, and many of which possess significant brand awareness, sales volume and customer bases. The Company believes that the principal competitive factors in its market are brand recognition, selection, personalized services, convenience, price, accessibility, customer service, quality of search tools, quality of editorial and other site content and reliability and speed of delivery. Many of the Company's competitors have longer operating histories, larger customer bases, greater brand recognition and significantly greater financial, marketing and other resources than the Company. Certain of the Company's competitors may be able to secure data from vendors on more favorable terms, devote greater resources to marketing and promotional campaigns, adopt more aggressive pricing and devote substantially more resources to Web site and systems development than the Company. Increased competition may result in reduced operating margins, loss of market share and a diminished brand franchise. There can be no assurance that the Company will be able to compete successfully against current and future competitors.

The Company expects that the competition in the Internet and online commerce markets will intensify in the future. For example, as various Internet market segments obtain large, loyal customer bases, participants in those segments may seek to leverage their market power to the detriment of participants in other market segments. In addition, new technologies and the expansion of existing technologies may increase the competitive pressures on the Company. Competitive pressures created by any one of the Company's competitors, or by the Company's competitors collectively, could have a material adverse effect on the Company's business, prospects, financial condition and results of operations.

<u>Need for Additional Financing: Risks of Default</u>. The Company's future liquidity and capital funding requirements will depend on numerous factors, including whether or when the Company will increase its customer base and revenues, and the costs and timing of expansion of sales, control of information costs and other expenses and competition. There can be no assurance that additional capital, if needed, will be available on terms acceptable to the Company, or at

all. Furthermore, any additional equity financing may be dilutive to stockholders and may cause a loss or material limitation of the Company's NOL carryovers, and debt financing, if available, will likely include restrictive covenants, including financial maintenance covenants restricting the Company's ability to incur additional indebtedness and to pay dividends. The failure of the Company to raise capital on acceptable terms when needed could have a material adverse effect on the Company.

<u>System Development and Operation Risks</u>. Any system interruptions that result in the unavailability of the Company's Web site would reduce the attractiveness of the Company's service offerings. The Company has experienced periodic system interruptions, which it believes will continue to occur from time to time. The Company will be required to add additional software and hardware and further develop and upgrade its existing technology and network infrastructure to accommodate increased traffic on its Web site resulting from increased sales volume. Any inability to do so may cause unanticipated system disruptions, slower response times, degradation in levels of customer service, impaired quality, or delays in reporting accurate financial information. There can be no assurance that the Company will be able to accurately project the rate or timing of increases, if any, in the use of its Web site or in a timely manner to effectively upgrade and expand its systems or to integrate smoothly any newly developed or purchased modules with its existing systems. Any inability to do so could have a material adverse effect on the Company's business, prospects, financial condition and results of operations.

The Company's web servers were located to a secure offsite location during 2004. Its back office computer and communications hardware is located at a single leased facility in Valley Cottage, New York. The Company's systems and operations are vulnerable to damage or interruption from fire, flood, power loss, telecommunications failure, break-ins, earthquake and similar events. The Company does not currently have redundant systems or a formal disaster recovery plan and does not have sufficient business interruption insurance to compensate it for losses that may occur. Despite the implementation of network security measures by the Company, its servers are vulnerable to computer viruses, physical or electronic break-ins and similar disruptions, which could lead to interruptions, delays, loss of critical data or the inability to accept and fulfill customer orders. The occurrence of any of the foregoing events could have a material adverse effect on the Company's business, prospects, financial condition and results of operations.

<u>Management of Potential Growth</u>. To manage the expected growth of its operations and personnel, the Company will be required to improve existing and implement new operational and financial systems, procedures and controls, as well as to expand, train and manage its growing employee base. There can be no assurance that the Company's current and planned personnel, systems, procedures and controls will be adequate to support the Company's future operations, that management will be able to hire, train, retain, motivate and manage required personnel or that Company management will be able to successfully identify, manage and exploit existing and potential market opportunities. If the Company is unable to manage growth effectively, such inability could have a material adverse effect on the Company's business, prospects, financial condition and results of operations.

Limited Personnel. The Company currently has limited personnel and other resources to undertake the extensive marketing activities necessary to maintain and grow is revenues. The Company's ability to generate revenue will be dependent upon, among other things, its ability to manage an effective sales organization. The Company will need to continue to develop and expand a sales force and a marketing group with technical expertise to coordinate marketing efforts. In addition, there can be no assurance that the Company will be able to market its products effectively through an in-house sales force, independent sales representatives, through arrangements with an outside sales force, or through strategic partners.

Risks of New Business Areas. The Company intends to expand its operations by continuing to promote new and complementary products and by expanding the breadth and depth of its product or service offerings. Expansion of the Company's operations in this manner will require significant additional expense and development, operations and editorial resources and could strain the Company's management, financial and operational resources. There can be no assurance that the Company will be able to expand its operations in a cost-effective or timely manner. Furthermore, any new business launched by the Company that is not favorably received by customers could damage the Company's reputation or the CRMZ brand. The lack of market acceptance of such efforts or the Company's inability to generate satisfactory revenues from such expanded services or products to offset their cost could have a material adverse effect on the Company's business, prospects, financial condition and results of operations. Gross margins attributable to new business areas may be lower than those associated with the Company's existing business activities.

Risks of Business Combinations and Strategic Alliances. The Company may choose to expand its operations or market presence by entering into business combinations, investments, joint venture or other strategic alliances with third parties. Any such transaction will be accompanied by risks commonly encountered in such transactions, which include, among others, the difficulty of assimilating the operations, technology and personnel of the combined companies, the potential disruption of the Company's ongoing business, the possible inability to retain key technical and managerial personnel, the potential inability of management to maximize the financial and strategic position of the Company through the successful integration of acquired businesses, additional expenses associated with amortization of purchased intangible assets, additional operating losses and expenses associated with the activities and expansion of acquired businesses, the maintenance of uniform standards, controls and policies and the possible impairment of relationships with existing employees and customers. There can be no assurance that the Company will be successful in overcoming these risks or any other problems encountered in connection with such business combinations, investments, joint ventures or other strategic alliances, or that such transactions will not have a material adverse effect on the Company's business, prospects, financial condition and results of operations.

<u>Rapid Technological Change</u>. To remain competitive, the Company must continue to enhance and improve the responsiveness, functionality and features of its services. The Internet and the online commerce

industry are characterized by rapid technological change, changes in user and customer requirements and preferences, frequent new products and service introductions embodying new technologies and the emergence of new industry standards and practices that could render the Company's existing website and proprietary technology and systems obsolete. The Company's success will depend, in part, on its ability to license leading technologies useful in its business, enhance its existing services, develop new services and technology that address the increasingly sophisticated and varied needs of its prospective customers and respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis. The development of a website and other proprietary technology entails significant technical, financial and business risks. There can be no assurance that the Company will successfully implement new technologies or adapt its website, proprietary technology and transaction-processing systems to customer requirements or emerging industry standards. If the Company is unable, for technical, legal, financial or other reasons, to adapt in a timely manner in response to changing market conditions or customer requirements, such inability could have a material adverse effect on the Company's business, prospects, financial condition and results of operations.

Dependence on Key Personnel. The Company's performance is substantially dependent on the continued services and on the performance of its senior management and other key personnel. The Company does not have long-term employment agreements with any of its key personnel and maintains no "key person" life insurance policies. The loss of the services of its executive officers or other key employees could have a material adverse effect on the Company's business, prospects, financial condition and results of operations.

Reliance on Certain Suppliers. The Company purchases its data and/or credit reports from a limited number of vendors under agreements having terms of 24 months or less. The Company has no longer-term contracts or arrangements with any vendor of data that guarantee the availability of data, the continuation of particular payment terms or the extension of credit. Nevertheless, the Company believes that it would be able to obtain the necessary data from other sources, at competitive prices, should it become necessary or advisable to do so. There can be no assurance, however, that the Company's vendors will continue to supply data to the Company on current terms or that the Company will be able to establish new or extend current vendor relationships to ensure acquisition of information in a timely and efficient manner and on acceptable commercial terms. If the Company were unable to maintain or develop relationships with vendors that would allow it to obtain sufficient quantities of reliable information on acceptable commercial terms, such inability could have a material adverse effect on the Company's business, prospects, financial condition and results of operations.

Risk of Expansion and Implementation of Growth Strategy. The Company's growth and expansion have placed, and may continue to place, a strain on the Company's management, administrative, operational, financial and technical resources and increased demands on its systems and controls. Demands on the Company's network resources and technical staff and resources have grown rapidly with the Company's expanding customer bases. A failure to effectively provide customer and technical support services will adversely affect the Company's ability

to attract and maintain its customer base. The Company expects to experience continued strain on its operational systems as it develops, operates and maintains its network. Expected increases in the Company's Internet client base will produce increased demands on sales, marketing and administrative resources, its engineering and technical resources, and its customer and technical support resources. The Company believes that it will need, both in the short-term and the long-term, to hire additional sales and marketing and technical personnel as well as qualified administrative and management personnel in the accounting and finance areas to manage its financial control systems. In addition, the Company will need to hire or to train managerial and support personnel. Although the Company has hired additional personnel and upgraded certain of its systems, there can be no assurance that the Company's administrative, operating and financial control systems, infrastructure, personnel and facilities will be adequate to support the Company's future operations or maintain and effectively adapt to future growth.

There can be no assurance that the Company will be able to build its infrastructure, add services, expand its customer bases or implement the other features of its business strategy at the rate or to the extent presently planned, or that its business strategy will be successful. The Company's ability to continue to grow may be affected by various factors, many of which are not within the Company's control, including U.S. and foreign regulation of the Internet industry, competition and technological developments. The inability to continue to upgrade the networking systems or the operating and financial control systems, the inability to recruit and hire necessary personnel or the emergence of unexpected expansion difficulties could have a material adverse effect on the Company's business, prospects, financial condition and results of operations.

Risks of Network Failure. The success of the Company is largely dependent on its ability to deliver high quality, uninterrupted access to its product over the Internet. Any system or network failure that causes interruptions in the Company's Internet operations could have a material adverse effect on the business, financial condition or results of operations of the Company. The Company's operations are dependent on its ability to successfully expand its network and integrate new and emerging technologies and equipment into its network, which are likely to increase the risk of system failure and cause unforeseen strain upon the network. The Company's operations also are dependent on the Company's protection of its hardware and other equipment from damage from natural disasters such as fires, floods, hurricanes, and earthquakes, or other sources of power loss, telecommunications failures or similar occurrences.

Significant or prolonged system failures could damage the reputation of the Company and result in the loss of customers. Such damage or losses could have a material adverse effect on the Company's ability to obtain new subscribers and customers, and on the Company's business, prospects, financial condition and results of operations.

<u>Security Risks</u>. Despite the implementation of network security measures by the Company, such as limiting physical and network access to its routers, its Internet access systems and information services are vulnerable to computer viruses, break-ins and similar disruptive problems caused by its customers or other Internet users. Such

problems caused by third parties could lead to interruption, delays or cessation in service to the Company's Internet customers. Furthermore, such inappropriate use of the Internet by third parties could also potentially jeopardize the security of confidential information stored in the computer systems of the Company's customers and other parties connected to the Internet, which may deter potential subscribers. Persistent security problems continue to plague public and private data networks. Recent break-ins, "worms" and "viruses" reported in the press and otherwise have reached computers connected to the Internet at major corporations and Internet access providers and have involve the theft of information, including incidents in which hackers bypassed firewalls by posing as trusted computers. Alleviating problems caused by computer viruses, worms, break-ins or other problems caused by third parties may require significant expenditures of capital and resources by the Company, which could have a material adverse effect on the Company. Until more comprehensive security technologies are developed, the security and privacy concerns of existing and potential customers may inhibit the growth of the Internet service industry in general and the Company's customer base and revenues in particular. Moreover, if the Company experiences a breach of network security or privacy, there can be no assurance that the Company's customers will not assert or threaten claims against the Company based on or arising out of such breach, or that any such claims will not be upheld, which could have a material adverse effect on the Company's business, prospects, financial condition and results of operations.

Risks Associated with Domain Names. The Company currently utilizes its domain names "CreditRiskMonitor.com" and "crmz.com" in its business. The acquisition and maintenance of domain names generally is regulated by governmental agencies and their designees. For example, in the United States, the National Science Foundation has appointed Network Solutions, Inc. as the exclusive registrar for the ".com", ".net" and ".org" generic top-level domains. The regulation of domain names in the United States and in foreign countries is subject to change. Governing bodies may establish additional top-level domains, appoint additional domain name registrars or modify the requirements for holding domain names. As a result, there can be no assurance that the Company will be able to acquire or maintain relevant domain names in the United States and all other countries in which it may conduct business. Furthermore, the relationship between regulations governing domain names and laws protecting trademarks and similar proprietary rights is unclear. The Company, therefore, may be unable to prevent third parties from acquiring domain names that are similar to, infringe upon or otherwise decrease the value of its trademarks and other proprietary rights. Any such inability could have a material adverse effect on the Company's business, prospects, financial condition and results of operations.

<u>Governmental Regulation and Legal Uncertainties</u>. The Company is not currently subject to direct regulation by any domestic or foreign governmental agency, other than regulations applicable to businesses generally and laws or regulations directly applicable to access to online commerce. However, due to the increasing popularity and use of the Internet and other online services, it is possible that a number of laws and regulations may be adopted with respect to the Internet or other online services covering issues such as user privacy, pricing, content, copyrights, distribution and characteristics and quality of

products and services. Furthermore, the growth and development of the market for online commerce may prompt calls for more stringent consumer protection laws that may impose additional burdens on those companies conducting business online. The adoption of any additional laws or regulations may decrease the growth of the Internet or other online services, which could, in turn, decrease the demand for the Company's products and services and increase the Company's cost of doing business, or otherwise have a material adverse effect on the Company's business, prospects, financial condition and results of operations. Moreover, the applicability to the Internet and other online services of existing laws in various jurisdictions governing issues such as property ownership, sales and other taxes, libel and personal privacy is uncertain and may take years to resolve. Any such new legislation or regulation of laws and regulations from jurisdictions whose laws do not currently apply to the Company's business, or the application of existing laws and regulations to the Internet and other online services could have a material adverse effect on the Company's business, prospects, financial condition services are provided business.

<u>Proprietary Rights</u>. The Company relies and expects to continue to rely on a combination of copyright, trademark and trade secret laws and contractual restrictions to establish and protect its technology. The Company does not currently have any issued patents or registered copyrights.

The Company has a policy to require employees and consultants to execute confidentiality and technology ownership agreements upon the commencement of their relationships with the Company. There can be no assurance that the steps taken by the Company will be adequate to prevent misappropriation of its technology or other proprietary rights, or that the Company's competitors will not independently develop technologies that are substantially equivalent or superior to the Company's technology. There can be no assurance that the Company's trademark applications will result in any trademark registrations, or that, if registered, any registered trademark will be held valid and enforceable if challenged.

In addition, to the extent the Company becomes involved in litigation to enforce or defend its intellectual property rights, such litigation can be a lengthy and costly process causing diversion of effort and resources by the Company and its management with no guarantee of success.

<u>Sarbanes-Oxley Act of 2002</u>. Beginning with the enactment of the Sarbanes-Oxley Act of 2002, a significant number of new corporate governance requirements have been adopted or proposed by the SEC. Although we currently comply with all current requirements, we may not be successful in complying with these requirements in the future. In addition, certain of these requirements may require us to make changes to our corporate governance.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA. Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of CreditRiskMonitor.com, Inc.:

We have audited the accompanying balance sheets of CreditRiskMonitor.com, Inc. as of December 31, 2008 and 2007, and the related statements of income, stockholders' equity and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express and opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of CreditRiskMonitor.com, Inc. as of December 31, 2008 and 2007, and its results of operations and cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States.

CREDITRISKMONITOR.COM, INC. NOTES TO FINANCIAL STATEMENTS

NOTE 1 - ORGANIZATION AND DESCRIPTION OF BUSINESS

CreditRiskMonitor.com, Inc. (also referred to as the "Company" or "CRMZ") provides a totally interactive business-to-business Internet-based service designed specifically for corporate credit professionals. This service is sold predominantly to corporations located in the United States. In addition, the Company is a re-distributor of international credit reports in the United States.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Cash and Cash Equivalents

The Company has invested some of its excess cash in debt instruments of the United States Government. All highly liquid investments with an original maturity of three months or less are considered cash equivalents.

Property and Equipment

Property and equipment are recorded at cost. Depreciation is provided on the straight-line method over the estimated useful life of the asset. Assets under capital leases are recorded at the lower of the fair market value of the asset or the present value of future minimum lease payments. Assets under capital leases are amortized on the straight-line method over their primary term. Estimated useful lives are generally as follows: fixtures, equipment and software—3 to 6 years; capitalized leases—3 to 5 years; and leasehold improvements—lower of life or term of lease.

Goodwill

In accordance with Statement of Financial Accounting Standards ("SFAS") No. 142, "Goodwill and Other Intangible Assets", goodwill and other indefinite-lived intangible assets are no longer amortized, but are reviewed for impairment at least annually and if a triggering event were to occur in an interim period. Goodwill impairment is determined using a two-step process. The first step of the impairment test is used to identify potential impairment by comparing the fair value of a reporting unit to the book value, including goodwill. If the fair value of a reporting unit exceeds its book value, goodwill of the reporting unit is not considered impaired and the second step of

CREDITRISKMONITOR.COM, INC. NOTES TO FINANCIAL STATEMENTS

the impairment test is not required. If the book value of a reporting unit exceeds its fair value, the second step of the impairment test is performed to measure the amount of impairment loss, if any. The second step of the impairment test compares the implied fair value of the reporting unit's goodwill with the book value of that goodwill. If the book value of the reporting unit's goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination. The Company completed its annual goodwill impairment tests for 2008 and 2007 during the fourth quarter of each year and determined there was no impairment of existing goodwill.

Long-Lived Assets

The Company reviews its long-lived amortizable assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable in accordance with SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets". Recoverability of assets held and used is measured by a comparison of the carrying amount of an asset to undiscounted pre-tax future net cash flows expected to be generated by that asset. An impairment loss is recognized for the amount by which the carrying amount of the assets exceeds the fair value of the assets. As of December 31, 2008, management believes no impairment of long-lived assets has occurred.

Income Taxes

The Company provides for deferred income taxes resulting from temporary differences between financial statement and income tax reporting. Temporary differences are differences between the amounts of assets and liabilities reported for financial statement purposes and their tax bases. Deferred tax liabilities are recognized for temporary differences that will be taxable in future years' tax returns. Deferred tax assets are recognized for temporary differences that will be deductible in future years' tax returns and for operating loss and tax credit carryforwards. Deferred tax assets are reduced by a valuation allowance if it is deemed more likely than not that some or all of the deferred tax assets will not be realized.

Revenue Recognition

CRMZ's North American and worldwide service is sold on a subscription basis pursuant to customer contracts that span varying periods of time, but are generally for a period of one year. The Company initially records amounts billed as accounts receivable and defers the related revenue until persuasive evidence of an arrangement exists, fees are fixed or determinable, and collection is reasonably assured. Revenues are recognized ratably over the related subscription period. Revenue from the Company's third-party international credit report service is recognized as information is delivered and products and services are used by customers.

Income Per Share

Income per share is computed under the provisions of SFAS No. 128, "Earnings Per Share". Amounts reported as basic and diluted net income per share for each of the two years in the period ended December 31, 2008 reflect the net income for the year divided by the weighted average of common shares outstanding during the year and the weighted average of common shares outstanding adjusted for the effects of potentially dilutive securities (see Note 11).

Fair Value of Financial Instruments

The Company follows the provisions of SFAS No. 107, "Disclosure about Fair Value of Financial Instruments". This pronouncement requires that the Company calculate the fair value of financial instruments and include this additional information in the notes to the financial statements when the fair value is different than the book value of those financial instruments. The Company believes the recorded value of cash and cash equivalents, accounts receivable, and accounts payable and other liabilities approximates fair value because of the short maturity of these financial instruments. The Company's promissory note was originally discounted, as appropriate, to bear an interest rate that represents the cost of borrowings with third-party lenders. Management believes that the carrying value of the note approximates its fair value at December 31, 2007.

Comprehensive Income

The Company adheres to the provisions of SFAS No. 130, "Reporting Comprehensive Income". This pronouncement establishes standards for reporting and display of comprehensive income or loss and its components (revenues, expenses, gains, and losses). The statement requires that all items that are required to be recognized under accounting standards as components of comprehensive income be classified by their nature. Furthermore, the Company is required to display the accumulated balances of other comprehensive income separately from retained earnings and additional paid-in capital in the equity section of the balance sheet. For the years ended December 31, 2008 and 2007, there were no items that gave rise to other comprehensive income or loss and net income equaled comprehensive income.

Segment Information

The Company follows the provisions of SFAS No. 131, "Disclosures About Segments of an Enterprise and Related Information". This pronouncement establishes standards for the way public business enterprises report information about operating segments in annual financial statements and requires that those enterprises report selected information about operating segments in interim financial reports issued to shareholders. The pronouncement also establishes standards for related disclosure about products and services, geographic areas and major customers. The Company currently believes it operates in one segment.

Stock-Based Compensation

The Company adopted SFAS No. 123R "Share-Based Payment" ("SFAS 123R") at the beginning of fiscal 2006 utilizing the modified prospective method, which does not require restatement of prior periods. The modified prospective method requires that compensation expense be recorded for all unvested stock options and restricted stock awards over the requisite service period (generally the vesting schedule).

See Note 6 for more information regarding the Company's stock compensation plan.

Fair Value Measurements

In September 2006, the Financial Accounting Standards Board ("FASB") issued SFAS No. 157, "Fair Value Measurements" ("SFAS 157"). This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The fair value hierarchy is broken down into three levels based on the source of inputs as follows: (a) Level 1 – valuations based on unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities; (b) Level 2 – valuations based on quoted prices in markets that are not active, or financial instruments for which all significant inputs are observable; either directly or indirectly; and (c) Level 3 – valuations based on prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable; thus, reflecting assumptions about the market participants. The statement was effective in the fiscal first quarter of 2008 except for non-financial assets and liabilities recognized or disclosed at fair value on a recurring basis, for which the effective date is for fiscal years beginning after November 15, 2008. The Company adopted SFAS 157 in the fiscal first quarter of 2008. The adoption of the pronouncement did not have a material impact on the Company's 2008 financial statements and the Company does not believe that the SFAS 157 requirements which were effective for the Company on January 1, 2009 will have a material impact on the Company's results of operations and financial position.

Recently Issued Accounting Standards

The FASB and the SEC had issued certain accounting pronouncements as of December 31, 2008 that will become effective in subsequent periods; however, management does not believe that any of those pronouncements would have significantly affected our financial accounting measurements or disclosures had they been in effect during the interim periods for which financial statements are included in this annual report, nor does management believe those pronouncements would have a significant effect on our future financial position or results of operations.

Concentrations of Credit Risk

Financial instruments that potentially subject the Company to concentrations of credit risk principally consist of cash, cash equivalents and accounts receivable. The Company maintains its cash and cash equivalents in bank deposit and other accounts, the balances of which, at times, may exceed Federally insured limits. Exposure to credit risk is reduced by placing such deposits in high credit quality financial institutions.

The Company closely monitors the extension of credit to its customers. The Company's accounts receivable balance is net of an allowance for doubtful accounts. The Company does not require collateral or other security to support credit sales, but provides an allowance for doubtful accounts based on historical experience and specifically identified risks. Accounts receivable are charged off against the allowance for doubtful accounts when management determines that recovery is unlikely and the Company ceases collection efforts. The Company does not believe that significant credit risk existed at December 31, 2008 and 2007.

NOTE 3 - CASH AND CASH EQUIVALENTS

Cash and cash equivalents consisted of the following as of December 31:

		2008	2007			
Cash	\$	305,010	\$	353,407		
Money market funds		607,581		1,125,124		
U.S. Government securities		_		— 1,49		1,494,732
	\$	912,591	\$	2,973,263		

NOTE 4 – MARKETABLE SECURITIES

The Company accounts for its marketable securities in accordance with SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities" ("SFAS 115"). Accordingly, the Company classifies its marketable securities at acquisition as either (i) held-to-maturity, (ii) trading or (iii) available-for-sale. The Company's investment in U.S. Government intermediate bond funds are classified as trading securities, which are carried at fair value, as determined by quoted market price, which is Level 1 input, as established by the fair value hierarchy under SFAS 157. The related unrealized gains are included in the caption "Other income" on the accompanying Statements of Income. The Company's marketable securities at December 31, 2008 are summarized as follows:

	A	mortized Cost	Gross Unrealized Holding Gains	Unrea Hold	Gross Unrealized Holding Losses		Holding Re		Recorded Value
U.S. Government intermediate bond funds	\$	2,893,092	\$ 65,904	\$	_	\$	2,958,996		

NOTE 5 – INCOME TAXES

The Company has generated net operating loss ("NOL") carryforwards for income tax purposes, which are available for carryforward against future taxable income. At December 31, 2008, the Company had Federal NOL carryforwards of approximately \$4,398,000, which expire through 2026.

The actual tax expense for 2008 and 2007 differs from the "expected" tax expense for those years (computed by applying the applicable United States federal corporate tax rate to income before income taxes) as follows:

		2008		2008 200		2007
Computed "expected" expense	\$	127,821	\$	127,116		
Expiration of net operating loss carryforward		55,001		142,024		
Permanent differences		1,305		1,252		
State and local income tax expense		4,117		3,451		
Other		26,366		31,796		
Decrease in valuation allowance		(210,493)		(302,033)		
State and local income tax expense	\$	4,117	\$	3,606		

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets at December 31, 2008 and 2007 are as follows:

	 2008		2007
Deferred tax assets:			
Net operating loss carryforwards	\$ 1,759,209	\$	1,854,479
Other	42,642		58,684
Total deferred tax assets	1,801,851		1,913,163
Valuation allowance	(1,285,058)		(1,495,551)

Net deferred tax assets		516,793	417,612
Deferred tax liabilities:			
Goodwill amortization		(472,803)	(411,935)
Mark-to-market		(32,450)	_
Fixed asset depreciation		(11,540)	(5,677)
Total deferred tax liabilities		(516,793)	(417,612)
Net deferred tax assets		\$	\$
	35		

Prior to 2005 the Company had never reported income from operations. Although the Company was profitable for the last 3 years the current economic climate creates major uncertainty that the Company will continue to be profitable thus creating the rebuttable presumption that a full valuation allowance continues to be required for its deferred tax assets. Therefore, no deferred tax benefit has been recorded and a full valuation allowance has been charged against the related deferred tax assets because the Company does not consider it more likely than not that the deferred tax assets will be realized.

The net change in the total valuation allowance for the years ended December 31, 2008 and 2007 was a decrease of \$210,493 and \$302,033, respectively.

NOTE 6 – COMMON STOCK, STOCK OPTIONS, AND STOCK APPRECIATION RIGHTS Common Stock

At December 31, 2008, 675,500 shares of the Company's authorized common stock were reserved for issuance upon exercise of outstanding options under its stock option plan.

Preferred Stock

The Company's Articles of Incorporation provide that the Board of Directors has the authority, without further action by the holders of the outstanding common stock, to issue up to five million shares of preferred stock from time to time in one or more series. The Board of Directors shall fix the consideration to be paid, but not less than par value thereof, and to fix the terms of any such series, including dividend rights, dividend rates, conversion or exchange rights, voting rights, rights and terms of redemption (including sinking fund provisions), the redemption price and the liquidation preference of such series. As of December 31, 2008, the Company does not have any preferred stock outstanding.

Stock Options and Stock Appreciation Rights

At December 31, 2008, the Company has one stock option plan: the 1998 Long-Term Incentive Plan.

The 1998 Long-Term Incentive Plan authorizes the grant of incentive stock options, non-qualified stock options, stock appreciation rights (SARs), restricted stock, bonus stock, and performance shares to employees, consultants, and non-employee directors of the Company. The exercise price of each option shall not be less than the fair market value of the common stock at the date of grant. The total number of the Company's shares that may be awarded under this plan is 1,500,000 shares of common stock. At December 31, 2008, there were options outstanding for 582,500 shares of common stock under this plan.

Options expire on the date determined, but not more than ten years from the date of grant. The plan terminates ten years from the date of stockholder approval. All of the options granted may be exercised

CREDITRISKMONITOR.COM, INC. NOTES TO FINANCIAL STATEMENTS

after three years in installments upon the Company attaining certain specified gross revenue and pre-tax margin objectives, unless such objectives are modified in the sole discretion by the Board of Directors. No modifications to these criteria have been made.

Notwithstanding that the objectives may not be met in whole or in part, these options will vest in full on a date that is two years prior to the expiration date of the option or, in the event of a change in control (as defined), will vest in full at time of such change in control.

There have been no transactions with respect to the Company's stock appreciation rights during the years ended December 31, 2008 and 2007, nor are there any stock appreciation rights outstanding at December 31, 2008 and 2007.

Transactions with respect to the Company's stock option plan for the years ended December 31, 2008 and 2007 are as follows:

	Number of Shares	A E	eighted verage xercise Price
Outstanding at January 1, 2007	695,500	\$	0.8372
Granted	55,000		2.3818
Forfeited	(13,000)		1.1923
Outstanding at December 31, 2007	737,500	\$	0.9461
Exercised	(155,000)	Ψ	0.0324
Outstanding at December 31, 2008	582,500	\$	1.1893

As of December 31, 2008, there were 675,500 shares of common stock reserved for the granting of additional options.

The following table summarizes the stock-based compensation expense for stock options that was recorded in the Company's results of operations in accordance with SFAS 123R for the years ended December 31:

	 2008	 2007
Data and product costs Selling, general and administrative costs	\$ 7,810 46,086	\$ 7,810 36,413
	\$ 53,896	\$ 44,223

The fair value of each option is estimated on the date of grant using the Black-Scholes option-pricing model that uses the weighted average assumptions noted in the following table. Expected volatilities are based on historical volatility of our stock through the date of grant. The Company uses the simplified method under Staff Accounting Bulletin No. 107, "Valuation of Share-Based Payment Arrangements for Public Companies", to estimate the options' expected term. The risk-free interest rate used is based on the U.S. Treasury constant maturities at the time of grant having a term that approximates the expected life of the option.

No options were granted during the year ended December 31, 2008. The fair value of options granted during the year ended December 31, 2007, ranged from \$2.19 to \$2.39, with a weighted-average fair value of \$2.21. The fair value of options at date of grant was estimated using the Black-Scholes model with the following weighted average assumptions:

Assumption	Year ended December 31, 2007
Risk-free interest rate	4.43%
Expected dividend yield	0.00%
Expected volatility factor	1.77
Expected life of the option (years) The Company issues new shares upon the exercise of options.	9

The following table summarizes information about the Company's stock options outstanding at December 31, 2008:

	Opti	Options Outstanding			
Range of Exercise Prices	Number Outstanding	Weighted Average Remaining Contractual Life (in years)	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
\$ 1 0000 \$ 1 2000	428 500	5.45	¢ 1.0000		
\$ 1.0000 - \$ 1.2000 \$ 1.2100 - \$ 1.6500	438,500 89,000	6.84	\$ 1.0000 \$ 1.3848		
\$ 1.2100 - \$ 1.0500	55,000	8.72	\$ 2.3818		
4 1.0000 4 2 00		0.72	÷ 2.5010		
	582,500	5.97	\$ 1.1893	_	

The aggregate intrinsic value represents the total pretax intrinsic value, based on options with an exercise price less than the Company's closing stock price of \$0.83 as of December 31, 2008, which would have been received by the option holders had those option holders exercised their options as of that date. The aggregate intrinsic value of options outstanding and exercisable as of December 31, 2008 and 2007 was \$-0- and \$1,079,610, respectively.

As of December 31, 2008, the total compensation cost related to unvested stock-based awards granted to employees under the Company's stock option plan but not yet recognized was \$263,000. This cost will be amortized on a straight-line basis over a weighted average term of 3.97 years and will be adjusted for subsequent changes in estimated forfeitures.

NOTE 7 – PROPERTY AND EQUIPMENT

Property and equipment consisted of the following:

	 2008		2007
Computer equipment and software	\$ 424,504	\$	306,283
Furniture and fixtures	77,696		74,814
Leasehold improvements	36,445		35,855
Capitalized lease	90,043		90,043
	628,688		506,995
Less accumulated depreciation and amortization	(415,546)		(357,222)
	\$ 213,142	\$	149,773

NOTE 8 – PROMISSORY NOTE

In April 2008, the Company prepaid, without penalty, the remaining \$254,000 balance on the promissory note related to the January 1999 purchase of the CreditRisk Monitor credit information service from Market Guide Inc. This note provided for periodic monthly payments with the last payment due on December 31, 2009.

NOTE 9 – ACCRUED COMPENSATION

Beginning January 20, 1999 and continuing through June 30, 2003, the Company's Chairman and Chief Executive Officer agreed to defer a portion of his annual salary. In April 2008, the Company paid in full the remaining deferred compensation of \$58,890 owed to its Chairman and Chief Executive Officer.

NOTE 10 – LEASE COMMITMENTS

The Company's operations are conducted from a leased facility, which is under an operating lease that expires in 2009. The Company also leases certain equipment under operating leases that expire through 2012. Rental expenses under operating leases were \$172,082 and \$158,854 for the years ended December 31, 2008 and 2007, respectively.

Future minimum lease payments for the capital lease and noncancelable operating leases at December 31, 2008 are as follows:

	_	Operating Leases
2009	\$	94,360
2010		2,133
2011		2,133
2012		94,360 2,133 2,133 1,600

Total minimum lease payments	\$ 100,226

NOTE 11 – NET INCOME PER SHARE

The following table sets forth the computation of basic and diluted net income per share:

	2008		2007	
Net income	\$	371,826	\$	370,231
Basic weighted average common shares outstanding		7,736,965		7,694,462
Net income per share – basic	\$	0.05	\$	0.05
Diluted weighted average common shares outstanding		7,968,425		8,138,336
Net income per share – diluted	\$	0.05	\$	0.05

For fiscal 2008, the computation of diluted net income per share excludes the effects of the assumed exercise of 85,000 options since their inclusion would be anti-dilutive as their exercise prices were above market value.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A(T). CONTROLS AND PROCEDURES. Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective.

There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended) during its fiscal fourth quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Under the supervision and with the participation of the Company's management, including its principal executive officer and principal financial officer, the Company conducted an evaluation of the effectiveness of its internal control over financial reporting based on criteria established in the framework in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, the Company's management concluded that its internal control over financial reporting was effective as of December 31, 2008.

Internal controls over financial reporting, no matter how well designed, have inherent limitations. Therefore, internal control over financial reporting determined to be effective can provide only reasonable assurance with respect to financial statement preparation and may not prevent or detect all misstatements. Moreover, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission

that permit the Company to provide only management's report in this annual report.

ITEM 9B. OTHER INFORMATION.

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE. Directors and Executive Officers

The following table sets forth certain information with respect to the directors and executive officers of the Company and the period such persons held their respective positions with the Company.

Name	Age	Principal Occupation/Position Held with Company	Officer or Director Since
Jerome S. Flum	68	Chairman of the Board/Chief Executive Officer	1983
William B. Danner	52	President/Chief Operating Officer	2005
Lawrence Fensterstock	58	Senior Vice President/Chief Financial Officer/ Secretary	1999
Andrew J. Melnick	67	Director	2005
Jeffrey S. Geisenheimer	43	Director	2005
Joshua M. Flum	39	Director	2007
Richard J. James	69	Director	1992

Jerome S. Flum was appointed President and Chief Executive Officer of the Company and Chairman of the Board of Directors in June 1985. He resigned from the office of Presidency in 2007. From 1968 to 1985, Mr. Flum was in the investment business as an institutional security analyst, research and sales partner at an investment firm and then as a general partner of a private investment pool. Before entering the investment business Mr. Flum practiced law, helped manage a U.S. congressional campaign and served as a legal and legislative aide to a U.S. congressman. Mr. Flum has been a guest lecturer at the Massachusetts Institute of Technology/Sloan School of Management Lab for Financial Engineering. Mr. Flum received a BS degree in Business Administration from Babson College and a JD degree from Georgetown University Law School.

William B. Danner joined the Company in May 2005 as Chief Marketing Officer, was appointed Chief Operating Officer in October 2005 and appointed President in May 2007. Mr. Danner brings to the Company over 20 years of financial services and information services experience. His most recent experience includes brand strategy and business development consulting for financial services clients at his own firm, Danner Marketing. Clients included WellPoint and Bowne & Co. Previously, he was at Citigate Albert Frank, a marketing communications company in New York City, where he provided strategic planning and brand consulting for a variety of leading financial services organizations including Reuters Instinet and the CFA

Institute. From 1997 to 2001, Mr. Danner was Vice President of Market Development at MetLife's employee-benefits business. Before joining MetLife, he was at Dun & Bradstreet for over 5-1/2 years, most recently as Vice President, Strategic Planning. He spent nearly the first 10 years of his career at General Electric Company, working in increasingly responsible positions at GE Information Services and GE Capital. Mr. Danner earned a BA in economics at Harvard College and an MBA at Harvard Business School.

Lawrence Fensterstock joined the Company and was elected to his current offices in January 1999. Previously, he joined Market Guide Inc. in September 1996 to assist in the formation of its credit information services division. From 1993 to 1996, Mr. Fensterstock was with Information Clearinghouse Incorporated ("ICI") and was closely involved in the formation of its credit reporting service. In addition to being responsible for the publication of the various facets of this credit reporting service, he was chief operating and financial officer of ICI. From August 1989 through October 1992, Mr. Fensterstock was Vice President-Controller, Treasurer and Corporate Secretary for a private entity formed to acquire Litton Industries' office products operations in a leveraged buyout. There, he spent 2-1/2 years acting as de facto chief financial officer. Mr. Fensterstock is a certified public accountant who began his career in 1973 with Arthur Andersen LLP. He has an MBA degree from The University of Chicago Business School and a BA degree from Queens College.

Andrew J. Melnick has been a Director since March 2005. He retired from Goldman, Sachs & Co. at the end of 2004. He joined Goldman Sachs in 2002 as Co-Director of its Global Investment Research Division and a member of its Management Committee. Prior to joining Goldman Sachs, Mr. Melnick was Senior Vice President and Director of the Global Securities and Economics Research Group of Merrill Lynch. During his 13 years at Merrill Lynch, he expanded the Firm's Research Group from primarily a domestic effort to one with research offices in 26 countries around the world. During that period Merrill Lynch was ranked as the top research department in nearly all regions of the world including six straight times as the number one equity research department in the United States. Previous employment: President of Woolcott & Co. a boutique research and investment banking firm; Director of Research and a Partner of L.F. Rothschild Unterberg Towbin; and Senior Analyst at Drexel Burnham Lambert. Mr. Melnick is a director of Copal Partners, a provider of financial research and analytics services through client-specific proprietary products, a director of Pop-A-Lock, a car door unlocking, roadside assistance and locksmith service business, and a director of the New York Society of Security Analysts. Mr. Melnick earned a B.A. in Economics and M.B.A. in Finance from Rutgers. He is a Chartered Financial Analyst (C.F.A.).

Jeffrey S. Geisenheimer has been a Director since December 2005. He is Chief Financial Officer of Ford Models, Inc., the largest talent and modeling agency in world. In this capacity he is responsible for the daily financial and administrative activities of the Company. Prior to joining Ford Models, Mr. Geisenheimer was the CFO of two publicly traded companies (Market Guide, Inc. and Multex.com, Inc.) and four
