FOR IMMEDIATE RELEASE

Camtek launches Phoenix: Its next generation AOI system for the PCB and IC Substrates Industry

MIGDAL HAEMEK, Israel – December 5, 2011 – Camtek Ltd. (NASDAQ and TASE: CAMT) (“Camtek”), a leading provider of automated solutions, dedicated for enhancing production processes and yield for the semiconductor manufacturing and packaging, and the PCB and IC substrate industries, today announced the launch of the Phoenix product family: The next generation of Automatic Optical Inspection (AOI) systems for the PCB and IC Substrates industry.

The Phoenix product family is designed to support a broad range of the most demanding PCB and IC substrate applications, while keeping in pace with the PCB market’s dynamic technology changes.

“The Phoenix product family was designed to increase our customer’s AOI room total yield,” commented Roy Porat, Camtek’s CEO. “The Phoenix offers exceptional performance in all AOI aspects. These include detection, minimum false calls, as well as quick and easy setup and high throughput. This new system’s higher-end positioning, compared with our previous models, provides our customers with even better price-performance, thus making it an attractive choice to meet all their inspection needs.”

The Phoenix product family is enhanced with Spark – Camtek’s unique and powerful detection engine providing high detection capabilities, while minimizing false calls. Spark’s open architecture software enables easy adaptation to new applications and technology, and supports critical dimensions detection.

ABOUT CAMTEK LTD.

Camtek Ltd provides automated and technologically advanced solutions dedicated to enhancing production processes and increasing yields, enabling and supporting customers’ latest technologies in the Semiconductor and Printed Circuit Board (PCB) & IC Substrates industries.

Camtek addresses the specific needs of these interconnected industries with dedicated solutions based on a wide and advanced platform of technologies including intelligent imaging, image processing, ion milling and digital material deposition. Ranging from micro-to-nano, Camtek provides a complete solution for the whole production cycle of all electronic devices including smartphones, tablets and other cutting edge consumer products and applications.
