NEWS ANNOUNCEMENT

FOR IMMEDIATE RELEASE

TowerJazz Ramps Mass Production of Touch Screen Controller Developed by  
N-trig for Digital Pen

Controller designed and manufactured using TowerJazz's advanced power management technology platform

MIGDAL HAEMEK, Israel, July 29, 2015 – TowerJazz, the global specialty foundry leader, today announced it is ramping high volume production of a touch screen controller developed by N-trig, an Israeli company. Recently, this advanced digital pen technology was acquired by Microsoft for use with its Surface products. The touch screen controller, which enables special capabilities of sensing multi-fingers touch and a digital pen (stylus), will be produced using TowerJazz's advanced 0.18-micron power management process (TS18PM). N-trig's ICs were designed by N-trig with the support of TowerJazz's Netanya Design Center (NDC) in Israel and are being manufactured in its Migdal Haemek, Israel fabrication facility (Fab 2).

“Mass producing N-trig technology for an industry giant further enhances our position as a leading power management IC manufacturer. N-trig chose to work with TowerJazz due to our excellent design and engineering support as well as our platform capability. We look forward to supporting further innovation for these products and providing volume production as the tablet market continues to grow,” said Russell Ellwanger, TowerJazz Chief Executive Officer.

TowerJazz offers an industry leading Bipolar-CMOS-DMOS (BCD) power management process used in consumer, communications and computing applications. The foundry's customizable LDMOS (20V to 80V) process platform provides design optimization and the lowest die size at any given breakdown voltage. The platform offers maximum flexibility, enabling customers to create cost-effective products at any desired level of integration and achieve first-pass success for faster time-to-market. For enhanced power management solutions, TowerJazz offers Non-Volatile Memory (NVM) and a groundbreaking 700V power platform that is unrivaled by other foundries.

#### About TowerJazz

Tower Semiconductor Ltd. (NASDAQ: TSEM, TASE: TSEM) and its fully owned U.S. subsidiary Jazz Semiconductor, Inc. operate collectively under the brand name TowerJazz, the global specialty foundry leader. TowerJazz manufactures integrated circuits, offering a broad range of customizable process technologies including: SiGe, BiCMOS, mixed-signal/CMOS, RF CMOS, CMOS image sensor, integrated power management (BCD and 700V), and MEMS. TowerJazz also provides a world-class design enablement platform for a quick and accurate design cycle as well as Transfer Optimization and development Process Services (TOPS) to IDMs and fabless companies that need to expand capacity. For more information, please visit [www.towerjazz.com](http://www.towerjazz.com).

To provide multi-fab sourcing and extended capacity for its customers, TowerJazz operates two manufacturing facilities in Israel (150mm and 200mm), one in the U.S. (200mm) and three additional facilities in Japan (two 200mm and one 300mm) through TowerJazz Panasonic Semiconductor Co. (TPSCo), established with Panasonic Corporation of which TowerJazz has the majority holding. Through TPSCo, TowerJazz provides leading edge 45nm CMOS, 65nm RF CMOS and 65nm 1.12um pixel technologies, including the most advanced image sensor technologies.
