Spinnaker Exploration Company Reports 174% Increase in First Quarter Earnings and Production of 13.7 Bcfe

HOUSTON, April 29 /PRNewswire/ Spinnaker Exploration Company (NYSE: SKE) today reported first quarter 2003 earnings of \$15.3 million, or \$0.45 per diluted share, after a cumulative effect of change in accounting principle; and \$18.8 million, or \$0.56 per diluted share, before the cumulative effect of change in accounting principle. Effective January 1, 2003, Spinnaker adopted Statement of Financial Accounting Standards ( SFAS ) No. 143, Accounting for Asset Retirement Obligations, which resulted in a cumulative, one-time charge to earnings of \$3.5 million, or \$0.11 per diluted share. First quarter 2003 net income of \$15.3 million increased 174% over first quarter 2002 net income of \$5.6 million, or \$0.20 per diluted share.

First quarter 2003 production increased 40% to 13.7 billion cubic feet of natural gas equivalent ( Bcfe ) compared to first quarter 2002 production of 9.8 Bcfe and decreased 16% compared to fourth quarter 2002 production of 16.3 Bcfe.

First quarter 2003 revenues increased 120% to \$71.7 million compared to first quarter 2002 revenues of \$32.6 million. The increase in revenues was due to both higher natural gas and oil prices and production in the first quarter of 2003 compared to the first quarter of 2002.

## Edgar Filing: SPINNAKER EXPLORATION CO - Form 8-K

Average natural gas prices increased approximately 54% and average oil prices increased approximately 84% in the first quarter of 2003 compared to the first quarter of 2002. Excluding the effects of hedging activities, first quarter 2003 prices averaged \$6.69 per thousand cubic feet of natural gas ( Mcf ) and \$34.28 per barrel of oil ( Bbl ) compared to first quarter 2002 average prices of \$2.46 per Mcf and \$18.60 per Bbl. First quarter 2003 natural gas prices were negatively impacted by \$1.53 per Mcf related to hedging activities. Including the effects of hedging activities, first quarter 2003 realized prices averaged \$5.16 per Mcf and \$34.28 per Bbl compared to first quarter 2002 average realized prices of \$3.35 per Mcf and \$18.60 per Bbl.

First quarter 2003 per unit lease operating expenses were \$0.40 per Mcfe compared to \$0.35 per Mcfe in the first quarter of 2002. The depreciation, depletion and amortization rate was \$2.40 per Mcfe in the first quarter of 2003 compared to \$2.37 per Mcfe in the fourth quarter of 2002 and \$1.78 per Mcfe in the first quarter of 2002.

2

Net cash provided by operating activities before changes in operating assets and liabilities is presented because of its acceptance as an indicator of the ability of an oil and gas exploration and production company to internally fund exploration and development activities. This measure should not be considered as an alternative to net cash provided by operating activities as defined by generally accepted accounting principles. A reconciliation of net cash provided by operating activities before changes in operating assets and liabilities to net cash provided by operating activities is shown below:

	<b>First Quarter</b>	<b>First Quarter</b>
	<b>2003</b>	<b>2002</b>
Net cash provided by operating activities	\$ 49,522	\$ 31,997
Change in operating assets and liabilities	13,486	(5,135)
Net cash provided by operating activities before changes in operating assets and liabilities	\$ 63,008	\$ 26,862

First quarter 2003 additions to property of \$77.7 million included \$22.2 million related to asset retirement costs. Capital expenditures were \$60.3 million in the first quarter of 2003.

Income tax and cash tax rates in the first quarter of 2003 were 36% and 0%, respectively.

SFAS No. 143 requires entities to record a liability for asset retirement obligations at fair value in the period in which it is incurred and a corresponding increase in the carrying amount of the related long-lived asset. As of January 1, 2003, the Company recorded an increase to property of \$21.4 million and an asset retirement obligation of \$26.0 million. The cumulative effect of change in accounting principle was \$3.5 million, net of taxes of \$2.0 million.

## Edgar Filing: SPINNAKER EXPLORATION CO - Form 8-K

Spinnaker Exploration Company is an independent energy company engaged in the exploration, development and production of natural gas and oil in the U.S. Gulf of Mexico.

Certain statements in this press release are forward-looking and are based upon Spinnaker's current belief as to the outcome and timing of future events that are subject to numerous uncertainties. Important factors that could cause actual results to differ materially from those in the forward-looking statements herein include the timing and extent of changes in commodity prices for natural gas and oil, operating risks and other risk factors as described in Spinnaker's Annual Report on Form 10-K for the year ended December 31, 2002 and its other filings with the Securities and Exchange Commission. Should one or more of these risks or uncertainties occur, or should underlying assumptions prove incorrect, Spinnaker's actual results and plans could differ materially from those expressed in the forward-looking statements. The forward-looking statements in this press release are made only as of the date hereof, and Spinnaker undertakes no obligation to update such forward-looking statements.

Spinnaker Exploration Company Summarizes First Quarter Operations

HOUSTON, April 29/PRNewswire/ Spinnaker Exploration Company (NYSE: SKE) today provided a summary of its operating activities since February 12, 2003. The Company also provided production estimates for the second quarter and full-year 2003 and an update of its recent and anticipated activities.

PRODUCTION

Production for the first quarter totaled 13.7 billion cubic feet of gas equivalent (Bcfge), including approximately 11.6 Bcf and 352,000 barrels of oil (BO). Production was up 40% from levels of one year ago and was down 16% from the fourth quarter of 2002. Production for the quarter

7

exceeded the Company's expectations. Current production is approximately 140 million cubic feet of gas equivalent per day (MMcfge).

Per unit lease operating expense (LOE) inclusive of severance tax and workover expense was \$0.40 per thousand cubic feet of gas equivalent (Mcf). LOE was up from the \$0.36 per Mcfe level experienced in the fourth quarter of 2002 due in part to the addition of compression facilities at two locations and was in line with the Company's expectation for the quarter.

EXPLORATION

Since February 12, 2003, Spinnaker has participated in four successful wells in five attempts.

Well	Working Interest (WI)	Net Revenue Interest	
		(NRI)	Operator
Galveston 352 #2	33%	28%	Westport
Green Canyon 338 #7	25%	25%*	Murphy

## Edgar Filing: SPINNAKER EXPLORATION CO - Form 8-K

Mississippi Canyon 496 #1 ST	35%	30%	Ocean
Undisclosed	25%	18%	Undisclosed (Shelf)

\* Subject to terms of Royalty Relief

The Company's unsuccessful exploratory attempt was located at Atwater Valley 70 on the Golden Eye prospect. The Company held a 30% interest in the well and prospect. The Company expended no incremental cash in drilling the well by virtue of a reimbursement of sunk costs and the provision of a drilling carry by an industry partner.

Spinnaker has participated in 77 successful wells in 128 attempts since inception

(60% gross/60% net).

### CURRENT ACTIVITY

The Company has seven rig operations in progress. Five of the operations are exploratory in nature and two involve completion activity. Four current operations are located on the shelf (three exploratory/one completion) and three are located in deep water (two exploratory/one completion). The Company anticipates adding three to four operated drilling rigs to its shelf effort in the near future.

### DEVELOPMENT ACTIVITY

Drilling, completion, evaluation, design and/or construction are ongoing in nine field developments. Five are located in deep water and four are located on the shelf.

Front Runner/Front Runner South/Quatrain (Green Canyon 338/339/382)

The GC 338 #7 has been drilled to a total depth of 23,214 feet. The well encountered productive interval in the FR 44, 45, 46 and 47 sands and met the Company's expectations. The drilling of the GC 338 #8 has commenced. The GC 338 #8 will be the last exploitation/exploration well to

8

---

be drilled from the Front Runner Spar site. Following the completion of that drilling operation, the rig will be released.

The Front Runner Spar project is now 58% complete and first production is anticipated by mid-year 2004. The Spar and related facilities are designed to accommodate production rates of approximately 80,000 barrels of oil equivalent per day (BOEPD).

Spinnaker holds a 25% WI in the Front Runner Field complex and in approximately 100,000 acres adjacent to the discoveries. The Company and its partners own a number of prospects in the area. One of those exploratory prospects, located in Green Canyon Block 380 (Cool Papa), is currently drilling.

## Edgar Filing: SPINNAKER EXPLORATION CO - Form 8-K

### Zia Field (Mississippi Canyon 496)

The MC 496 #1 ST has been drilled to a location considered optimal for production of the field. The well encountered excellent pay thicknesses and rock properties. Approximately 150 feet of true vertical depth (TVD) pay was encountered in the two targeted reservoirs. The well was drilled to a depth of 15,690 feet and is situated in approximately 1,600 feet of water.

The subsea project is progressing on schedule. Flowline and termination skid installation is now proceeding. Following that work, the well will be completed for production. Production ramp-up is scheduled to commence early in the third quarter. Production rates of 7,500 - 9,000 BOEPD are anticipated. Ramp-up will require two to three weeks. Spinnaker owns a 35% WI and 30% NRI in the Zia field.

### Goose Project (Mississippi Canyon 751)

Flow assurance evaluation is proceeding for various oil samples that were collected from the Goose discovery well and sidetrack. Although additional work is required, initial indications are encouraging. Should development proceed, it appears that pipe-in-pipe flowline design should not be required, which would reduce project cost considerably.

Spinnaker owns a 100% WI in the Goose discovery.

### High Island 206

The High Island 206 discovery has commenced production at a rate of approximately 20 MMcf/d. Spinnaker holds a 34% WI and 26% NRI in the discovery and is the operator of the field. Additional drilling in the field is possible during 2003.

### Grasshopper Field (Grand Isle 52)

The Grasshopper field is currently producing approximately 8,000 BOEPD from two wells. The operator anticipates that additional drilling on the prospect will commence during the third quarter. The drilling program could include two wells should the next attempt prove successful. Both wells would be drilled from the existing platform. Spinnaker owns a 50% WI in the Grasshopper project.

### Galveston 352 #2

The Galveston 352 #2 is currently being completed as a new fault block discovery related to the GI 352 Field. The well was drilled from a remote location and will require a separate minimal structure. The well should commence production during the fourth quarter of 2003. Spinnaker owns a 33% WI in the well and field.

### OCS SALE #185

## Edgar Filing: SPINNAKER EXPLORATION CO - Form 8-K

As previously reported via press release on March 19, 2003, Spinnaker placed the Apparent High Bid (AHB) on fifteen blocks in the Gulf of Mexico. The blocks cover approximately 77,000 gross (69,000 net) acres. Five of those AHB's have now been awarded. The MMS may require up to 90 days to issue leases on acceptable bids from the sale.

### FUTURE OUTLOOK

The Company expects to produce approximately 11.1 Bcfge during the second quarter of 2003. Detailed guidance parameters for the second quarter and full year 2003 follows.
