10-K or any amendment to this Form 10-K.

The aggregate market value of Common Stock held by non-affiliates of the Registrant was approximately \$42,853,066 as of September 30, 2004, based upon the closing sale price of \$5.28 on the NASDAQ National Market reported on such date. This calculation does not reflect a determination that certain persons or entities are affiliates of Registrant for any other purpose.

As of June 9, 2005, the number of shares of Common Stock outstanding was approximately 12,420,388.

DOCUMENTS INCORPORATED BY REFERENCE

Items 10, 11, 12 (as to Beneficial Ownership and Equity Compensation Plans) and 13 of Part III are incorporated by reference from the Registrant s proxy statement, which is expected to be filed with the Securities and Exchange Commission no later than 120 days following the end of the fiscal year covered by this report, in connection with the solicitation of proxies for the Registrant s 2005 Annual General Meeting of Shareholders scheduled to be held August 31, 2005.

All references to the Company, Peak, we, us or our in this Annual Report on Form 10-K (Annual Report) are references to Peak International Limited, a company incorporated under Bermuda law on January 3, 1997, and, unless the context otherwise requires, its subsidiaries and predecessors. All references to Peak (HK) in this Annual Report are to Peak Plastic & Metal Products (International) Limited, a company incorporated in Hong Kong and a wholly-owned subsidiary of the Company and, unless the context otherwise requires, its subsidiaries and predecessors. References in this Annual Report to our historical business and operations assume that the corporate reorganization in 1997 (the Restructuring) by which, among other things, Peak (HK) became a wholly-owned subsidiary of the Company and the Company acquired its other subsidiaries, had already occurred as of the times to which the references relate. Any discrepancies in the tables included in this Annual Report between the amounts indicated and the totals thereof are due to rounding. All references to US Dollars, US\$ or \$ in this Annual Report are to United States dollars, references to HK Dollars or HK\$ are to Hong Kong dollars.

This Annual Report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities and Exchange Act of 1934, as amended. The forward-looking statements reflect our view at the time of this Annual Report with respect to future events and financial performance. We intend for the forward-looking statements to be covered by the safe harbor provisions for forward-looking statements in these sections. These statements, which include statements regarding our beliefs regarding the benefits of our recycling business, our beliefs regarding our distribution capabilities, our beliefs regarding the benefits of our products, our beliefs regarding the benefits of our in-house tooling facilities, our expectation that we will meet our cash requirements for 2006 from cash flows from operations, our plans to expand capacity and replace fixed assets, the Company s belief that it is not contractually obligated to pay taxes and other amounts owed by the factory at which the Company s products are manufactured and its expectations regarding the assessment of any penalties on such amounts, the Company s expected financial position, business and financing plans, our beliefs that our existing cash and cash equivalents and anticipated cash flow from operations will be sufficient to meet our anticipated cash needs in the ordinary course of business for at least the next 12 months, our expectation that we will be able to renegotiate the terms and conditions of our processing agreement, our beliefs that our operations in the PRC are now in compliance with the applicable PRC legal and regulatory requirements relating to environmental matters and custom duties, statements regarding intellectual property rights of third parties, statements regarding our critical accounting policies, and statements regarding the validity of lawsuits against the Company are forward-looking statements. Such forward-looking statements are identified by use of forward-looking words such as anticipates, believes, plans, estimates, expects, and intends or words or phrases of sim expression. These forward-looking statements are subject to various assumptions, risks and uncertainties, including but not limited to, economic conditions in the semiconductor and disk drive industries, any future economic downturn, demand for the Company s products, the Company s dependence on significant customers, technology developments affecting the Company s products, the Company s ability to raise additional capital if necessary, the price and availability of raw materials, fluctuations in currency markets, the outcome of lawsuits by and against the Company, difficulties related to working in the PRC, including regional government and processing partner relations and contracts, foreign currency exchange laws, taxation and health issues, and amounts the Company may have to pay for back taxes and social insurance contributions to the PRC tax authorities. Actual results could differ materially from those contemplated by the forward-looking statements as a result of these factors and those set forth under Factors Which May Affect Operating Results below. These forward-looking statements speak only as of the date hereof. The Company expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in the Company s expectations with regard hereto or any change in events, conditions or circumstances on which any such statement is based. Investors are cautioned not to place undue reliance on these forward-looking statements.

PART I

ITEM 1. BUSINESS

General

We are a leading supplier of precision engineered packaging products for the storage, transportation and automated handling of semiconductor devices and other electronic components. Our products are designed to interface with automated handling equipment used in the production and testing of semiconductor and electronic products. Our customers include semiconductor companies such as Texas Instruments, ST Microelectronics, Philips and Freescale (a spin off of the semiconductor assets of Motorola), disk drive manufacturers such as Seagate as well as subcontract assembly and test companies such as ASAT, STATS ChipPAC, Siliconware Precision Industries Co. Ltd (SPIL), Amkor and ASE. Our products are designed to ensure that semiconductor devices and electronic components, which are often delicate and may have significant value, are protected from mechanical and electrical damage during storage, transportation and automated handling.

We principally produce matrix and disk drive trays, carrier tapes and reels. In March 2005, we exited the production and sale of shipping tubes. We also produce leadframe boxes and interleaves used in the storage and transportation of leadframes. In addition, we collect and sell recycled matrix trays. We believe that our recycling programs, whereby we collect and recycle products we manufacture and products manufactured by others, enable us to expand our customer base by supplying both newly-manufactured and recycled products to customers.

Our main production facilities, located in Shenzhen in the People s Republic of China, or the PRC, and operated pursuant to a processing agreement with an unaffiliated PRC company, are equipped with injection molding machines, extruders, carrier tape machines, mixing machines, ultrasonic welding machines and other machinery and equipment. We maintain in-house tooling facilities capable of producing the molds used for production, dies and tooling for sale and spare parts for machines used in our production processes. We also have in-house compounding capabilities for the mixing, blending and pelletizing of raw materials used in our production processes. In addition, we maintain computer aided design, or CAD, stations, which are linked electronically to our sales offices to enable the sharing of design information. Finalized designs are transmitted electronically to our in-house tooling facilities for the production of molds and dies.

We maintain recycling programs through which we, our agents and independent contractors collect used trays in Asia. We also purchase products to recycle from independent dealers. We recycle trays manufactured by us or by others, collected from end users, such as surface mount technology, or SMT, companies and other types of assemblers of circuit boards and manufacturers of electronic products and systems. Most of the trays collected or purchased are then transported to our production facilities in Shenzhen, the PRC, where we process them through inspection, cleaning and anti-static coating, if appropriate. We then place the trays into inventory in our warehousing facilities pending sale to our customers. Recycled trays that do not meet our quality requirements, or for which there is insufficient demand, are ground and reused in the manufacturing processes for new products. Currently, we collect approximately one and a half million trays each month for recycling. By using recycled trays in our operations, we are able to decrease our cost of goods sold, and increase our operating margin without increasing prices.

We maintain eight sales offices, located in Hong Kong, the PRC, Taiwan, Singapore, Malaysia, and the United States, whereby direct sales are made to customers, and representative offices in the PRC, the Philippines, and Italy, that provide customers with technical information. We also sell our products through three sales agents located in Japan, South Korea, and Taiwan. We maintain, either directly or through our local sales representatives, a network of 25 Just-in-Time, or JIT, warehouses located in Asia, North America and Europe, near our customers production facilities which allow us to rapidly meet our customers needs.

Our principal executive office is located at 38507 Cherry Street, Unit G, Newark, California, CA 94560 and our main telephone number is (510) 449-0100.

2

Index to Financial Statements

Strategy

Our objective is to increase our market presence in serving the semiconductor and electronics industries by providing top quality service, precision engineered packaging solutions and recycling alternatives to manufacturers of semiconductor devices, disk drives and electronic components through our integrated manufacturing capability and our recycling programs. The key elements of our business strategy are as follows:

Maintain Close Customer Relationships. We plan to maintain close relationships with our customers through a network of strategically located sales, customer service and product distribution sites and by working closely with our customers in developing precision engineered packaging solutions for the storage, transportation and automated handling of their products. We believe that our ability to distribute our products to customers located in Asia, North America and Europe allows us to compete effectively with other suppliers of packaging products to the semiconductor, disk drive and electronics industries. Customer reliance on quick delivery drives our product strategy with respect to both new and recycled products. We believe that our recycling programs enable us to expand our customer base by providing us with opportunities to supply both newly manufactured and recycled products to customers.

Shorten Delivery Time. We plan to attract and retain customers based on our ability to deliver large quantities of products on short notice to meet customer demand. We believe that short delivery time is of particular importance to our customers because, in the semiconductor and electronics industries, requirements for packaging products are sometimes difficult to forecast accurately. We believe that stocking certain key products in our network of JIT warehouses, maintained either by us or by our local sales representatives reduces the amount of time required for the delivery of our products to our customers, thereby improving our responsiveness to customer requirements for flexibility in delivery and generally facilitating the improvement of inventory management by our customers. In addition, we believe our in-house tooling facilities and raw material mixing and compounding capabilities reduces the need to work with sub-contractors and enables us to achieve shorter production cycles.

Offer a Broad Range of Products. Our current product offerings, which include matrix and disk drive trays, carrier tape and reels, allow us to service a broad range of customers, who often have needs across multiple product categories. We are also currently engaged in the research and development of new products, with an emphasis on packaging products designed to carry high-value semiconductor and electronic components. Our production facilities have been formally approved, or qualified, by a number of our customers across our product categories. We believe that our customers value the range of our product offerings allowing us to compete effectively. Our in-house design and tooling capabilities help reduce the time needed for the development of new products and product features and facilitate our development of custom products which typically requires different prototype stages during product development. Our in-house design and tooling capabilities also facilitate our development of new product features such as the enhanced pocket strength, anti-reflective wall and high strength ring pedestal features for our carrier tape products. In addition, our in-house raw material mixing and compounding capabilities help us create products to meet customer specifications as to certain characteristics such as color, transparency and hardness. Our recycling programs also enable us to supply a broad range of recycled trays to our customers.

Maintain Volume Supply Capabilities. We plan to continue to maintain our production and tooling capacities and our recycling programs to maintain our high volume supply capabilities. Between fiscal 1993 and 2001, we were expanding the production capacity of our facilities in Shenzhen, the PRC in order to meet growing demand for our products. Our expansion plan was put on hold during the slow-down of the semiconductor industry between fiscal 2002 and 2003. We added approximately \$5.6 million and \$6.4 million of capital equipment in fiscal 2005 and 2004 respectively, primarily to increase capacity and to handle new products.

Emphasize Quality Assurance and Process Control. We plan to continue to maintain our standard of high quality products. We have a quality assurance and process control department which, as of March 31, 2005, consisted of approximately 175 technicians and on-line process controllers. Quality assurance and process control

Index to Financial Statements

procedures are performed at each major stage of production. These include the inspection of incoming raw materials, statistical process control at the injection molding for trays and reels and the inspection and testing of finished products. Our production facilities in Shenzhen, the PRC, obtained International Standard Organization, or ISO, 9002 and 14001 certification in October 1994 and August 2000 respectively and are subject to follow-up surveillance audits conducted semi-annually thereafter in accordance with normal ISO procedures. In addition, before making high volume purchases from us, customers generally require us to undergo a one to two month qualification process. These qualification processes often include on-site certification of our production facilities by members of the customer s engineering and quality control staff. Our production facilities in Shenzhen, the PRC, have been qualified by many of our customers including ST Microelectronics, ASE, Seagate, Amkor, Freescale, Philips, Texas Instruments, SPIL, STATS ChipPAC and ASAT. We believe that in addition to our quality assurance and process control department, our in-house design and tooling facilities and raw material compounding capabilities have enabled us to control the quality of our products.

History

We were organized in 1992 by Mr. T. L. Li, a semiconductor industry entrepreneur and investor, and were incorporated as an exempted company with limited liability in 1997 under the laws of Bermuda. In the same year, we combined with a manufacturer of integrated circuit shipping tubes with production facilities in Shenzhen, the PRC. We augmented our in-house tooling capability and commenced the production and sale of matrix trays. At the same time, we commenced the establishment of a distribution network of JIT warehousing facilities located near areas of semiconductor manufacturing activity. Additionally, we commenced the operation of our recycling programs through subsidiaries doing business under the trade name SemiCycle. In 1994, we commenced the sale of the reels used in tape-and-reel IC carriers. In 1996, we commenced the sale of the tapes used in such carriers and in 2001, we commenced the sale of matrix trays used by disk drive manufacturers. Since 1992, we have expanded the production capacity of our facilities in Shenzhen, the PRC in order to meet growing demand. Our expansion plan was put on hold during the slow-down of the semiconductor industry between fiscal 2002 and 2003.

Markets That We Serve

Our products are used for the storage and transportation of semiconductor devices and other electronic components such as read-write heads for disk drives, connectors, resistors and capacitors. We design our products to interface with automated handling equipment used in the manufacture and testing of semiconductor and electronic products.

Semiconductors

Semiconductors are the basic building blocks used to create a variety of electronic products and systems. Continual improvements in semiconductor process and design technologies have enabled the production of complex, highly integrated circuits which provide faster execution, increased functionality and greater reliability. As a result, semiconductor demand has experienced growth in markets for products such as computers, communications, consumer electronic devices, automotive products and industrial automation and control systems.

Semiconductors are often classified as discrete devices such as individual diodes, transistors or ICs. In ICs, thousands of functions are combined on a single chip of silicon to form a more complex circuit, which is then encapsulated in plastic, ceramic or other materials (forming a module) for connection to a circuit board.

In pin-through-hole, or PTH, technology, modules are attached to circuit board by pins, also called input/output, or I/O, leads, inserted through or soldered to plated holes in the printed circuit board. PTH is one of the earliest technologies in the assembly of printed circuit boards. PTH semiconductor devices, such as PDIP (Plastic Dual In-Line Package) modules, are typically sorted and transported in IC shipping tubes. We produced shipping tubes until March 2005, at which point we exited the shipping tube business.

4

Index to Financial Statements

In the more technologically advanced surface mount technology, or SMT, the leads on ICs and other electronic components are soldered to the surface of the printed circuit board rather than inserted into holes. SMT can accommodate a substantially higher number of leads than PTH, thereby permitting the board to interconnect a greater number of integrated circuits. This, in turn, allows tighter component spacing which permits a reduction in the dimensions of the printed circuit board. Because of their high lead counts, most of the very large scale integrated circuits are configured for surface mounting. Additionally, SMT allows components to be placed on both sides of the circuit board, thereby permitting even greater density. The substantially higher number of leads and finer lead-to-lead spacing or pitch in SMT products require packaging solutions which are more exact than for PTH products. In addition, certain SMT products are sensitive to moisture absorption and typically undergo a baking process before surface mounting, and consequently require robust packaging solutions which are resistant to high temperature. SMT semiconductor devices are typically stored and transported in matrix trays or tape-and-reel carriers, like the ones we produce.

Electronic Components

Our products are used to package other electronic components, including connectors, resistors, capacitors and disk drive read-write heads. Connectors are electro-mechanical devices that allow an electronic signal to pass from one device to another. They are used to connect wires, cables, printed circuit boards, flat cable and other electronic components with each other and to related equipment. Connectors are found in virtually all electronic products including computers, printers, disk drives, modems, VCRs, radios, medical instruments, airplanes, appliances, cellular telephones, pagers and automobiles. Original equipment manufacturers in the electronics industry generally use connectors to complete the design and manufacture of their products.

Resistors are basic components used in all forms of electronic circuitry to adjust and regulate levels of voltage and current. They vary widely in precision and cost, and are manufactured in numerous materials and forms. Resistive components may be either fixed or variable, depending on whether the resistance is adjustable (variable) or not (fixed). Resistors can also be used as measuring devices, such as resistive sensors. Resistive sensors or strain gauges are used in experimental stress analysis systems as well as in transducers for electronic measurement of loads (scales), acceleration and fluid pressure.

Capacitors perform energy storage, frequency control, timing and filtering functions in most types of electronic equipment. The more important applications for capacitors are electronic filtering for linear and switching power supplies, decoupling and bypassing of electronic signals for ICs and circuit boards, and frequency control, timing and conditioning of electronic signals for a broad range of applications.

Disk drive read-write heads are electro-mechanical devices employed to access data stored on magnetic surfaces enclosed within the disk drives.

Products and Production Processes

We produce matrix and disk drive trays, carrier tapes and reels. We produced shipping tubes until March 2005, at which point we exited the shipping tube business. We also sell recycled matrix trays. In addition, we produce a limited number of leadframe boxes and leadframe interleaves used in the storage and transportation of leadframes.

Our products are typically categorized by their dimensions and configurations, the type and size of semiconductor devices they carry, and their physical characteristics, in particular their resistance to deformation, or warpage, at various temperatures. Our products are also categorized by their electrostatic properties as conductive, dissipative or anti-static. Conductive and dissipative products are manufactured by adding carbon fiber or carbon powder to the plastic compound. Anti-static characteristics are achieved by applying a coating to the surface of the product to prevent the accumulation of surface electrostatic charges.

Table of Contents

Index to Financial Statements

Tray Products

Our IC tray products may be used to store and transport SMT semiconductor devices. The outer dimensions of IC matrix trays are generally fixed by industry standards prescribed by electronic industry associations such as the Joint Electron Device Engineering Council, or JEDEC, in the United States and the Electronic Industries Association of Japan, or EIAJ, in Japan. We sell high temperature trays (which may be baked to temperatures up to 180 degrees Celsius), low temperature trays and non-bakeable trays.

Our three-dimensional tray products are used in the transportation of disk drive components such as read-write heads. Such trays are designed to interface with automated equipment to allow high-speed assembly of disk drives.

At the beginning of the tray production process, samples of incoming raw materials are inspected and tested for key material properties. Virgin raw materials are mixed and blended with other materials in accordance with our proprietary processes and production techniques and formed by injection molding machines into trays. The formed trays are then cleaned of surface contaminants. Trays that require anti-static coating are subsequently dipped in anti-static solution and dried. Trays made to be heat resistant undergo a baking process. Thereafter, we inspect samples of these new trays from each manufactured lot for visible defects and warpage, test for electrostatic discharge characteristics and check their dimensions prior to shipment.

Tape-and-Reel Products

Our tape-and-reel products may be used to store and transport SMT semiconductor devices and other modules, as well as other products used in the electronic industry, such as connectors. Tape-and-reel carriers comprise three parts: reels, carrier tapes and cover tapes. The semiconductor devices or other products to be carried are placed in pockets formed in the carrier tape, which is sealed with cover tape and wound around a reel for storage and transportation. We commenced sales of reels in 1994 and sales of carrier tapes in 1996.

The production process for reels is similar to that for trays except that we use different raw materials and that an additional process of ultrasonic welding is required following the injection molding process to weld two parts of the reel together. In the production of carrier tapes, we either purchase polystyrene pellets to extrude our own sheets or we purchase polystyrene or polycarbonate tapes from suppliers in large rolls, then we slit the tapes to desired widths. We form the carrier tapes by a combination of thermal, air pressure and hole punching processes, and thereafter inspect the new carrier tapes for visible defects prior to shipment. We resell cover tapes purchased from outside sources.

Tube Products

Our tube products may be used to store and transport certain SMT semiconductor devices that are configured differently from those requiring our tray products, PTH semiconductor devices and other products used in the electronic industry, such as connectors.

At the beginning of the tube production process, samples of incoming raw materials are inspected for conformity to specifications. Raw materials are mixed and blended and made into pellets, based on compounding formulae which vary depending on the characteristics, such as color, transparency and hardness, required for the product. We extrude the pellets into tubes, which we further process by hole punching, silk screen marking and applying an anti-static coating. Following this process, we inspect samples of the new tubes for visible defects and test them for electrostatic discharge prior to shipment.

In March 2005 we stopped the production and sale of shipping tubes and exited the tube business.

6

Index to Financial Statements

Other Products

In addition to the standard products in our principal product lines, we also produce an array of custom products which include customer-specific designs of trays, reels and carrier tapes. We also produce leadframe boxes and leadframe interleaves.

Product Development

We are currently engaged in the study and development of new products, with an emphasis on packaging products designed for the carriage of high-value components related to the semiconductor, disk drive and electronics industries. We undertake on-going research and development efforts which emphasize the development of features that require precision engineering in order to better serve our customer base. We have developed new product features for our carrier tape products, such as a component carrier having high strength pocket and a component carrier having a pocket including a pedestal, for which patents have issued, as well as additional features for which patent applications are pending in the United States. The enhanced pocket strength feature improves the vertical crush resistance of the pockets in the carrier tape by means of a trapezoidal shaped pedestal and a ring at the bottom of the pocket. An anti-reflective wall feature enables our customers to more effectively utilize their automated optical inspection equipment to inspect the semiconductor or electronic components placed in the carrier tape that we manufacture. By placing a chamfered corner in the wall of the carrier tape pocket, we reduce the amount of reflection which could interfere with the workings of automated optical inspection equipment. Research and development expenditures were \$157,000, \$236,000 and \$136,000 for fiscal 2005, fiscal 2004 and fiscal 2003 respectively.

Recycling Programs

We conduct our collection operations through our subsidiaries and independent contractors. We recycle trays and reels collected from end users in Asia and Europe. We also purchase products to recycle from independent dealers. Tube products and carrier tape products are generally not recycled. Currently, we collect approximately one and a half million trays each month for recycling.

The trays collected through our recycling programs are primarily transported to our production facilities in Shenzhen, the PRC where we process them, including sorting, inspection, cleaning and anti-static coating, if appropriate. We then put these recycled products into inventory in our warehousing facilities pending sale to customers. Typical end users include SMT, and other types of assemblers of circuit boards and manufacturers of computers and other end products. Recycled trays that do not meet industry quality requirements, or for which there is insufficient demand, are ground and recycled for use in the manufacturing processes for new products.

Some jurisdictions in which our packaging products are sold or used have adopted or proposed laws and regulations with a view to promote, among other things, the recycling of packaging materials. In addition, the ISO has incorporated environmental considerations in formulating its ISO 14000 quality standards. We believe that our recycling programs provide our customers with opportunities to select the packaging products that best meet their requirements in terms of cost and environmental preferences. We believe that our recycling programs help our customers comply with environmental regulations and meet ISO standards with respect to environmental issues in several ways. First, we provide a recycling alternative to the traditional disposal methods of landfill and incineration. Second, our offerings of recycled products assist our customers in complying with or meeting recycle-content and green product regulations, standards or goals. In addition, our homogeneous carrier tapes may be more easily recycled than the laminated carrier tapes.

Customers

Our customers include semiconductor and component companies as well as subcontract assembly and test companies. We also sell products to manufacturers of disk drives, connectors, sockets, resistors, capacitors and

7

Index to Financial Statements

other types of electronic components. In fiscal 2005, our top ten customers were ASE, Philips, ST Microelectronics, Freescale (a spin off of the semiconductor assets of Motorola), STATS ChipPAC, Amkor, SPIL, Seagate, ASAT Limited, and Texas Instruments who collectively accounted for 67.8% of our net sales in fiscal 2005. In fiscal 2004, these same customers accounted for 64.4% of our net sales. ASE accounted for 11.4% and 11.7% of our net sales in fiscal 2005 and 2004 respectively. No other customer accounted for 10% or more of our net sales in fiscal 2005 and 2004.

Pricing

The price quotations we provide generally contemplate the delivery of products within two weeks of the receipt of purchase orders. We charge higher prices when the customer desires shorter delivery time or additional services, such as local warehousing, special packaging provisions or special markings on the product. As a general policy, we price our recycled products at a discount to the price of corresponding new products.

Sales and Marketing

We maintain eight sales offices, located in Hong Kong, the PRC, Taiwan, Singapore, Malaysia, and the United States, whereby direct sales are made to customers, and representative offices in the PRC, the Philippines, and Italy, that provide customers with technical information. We also sell our products through three sales agents located in Japan, South Korea, and Taiwan.

We generally make our sales pursuant to purchase orders from our customers. Therefore, for the most part we do not have long-term agreements with or commitments from our customers for the purchase of products. While customers typically provide us with one-to two-month forecasts of their requirements, forecasts do not constitute binding orders.

The following table sets forth the geographic distribution of our net sales for the periods indicated. For more details, see note 21 of Notes to our Consolidated Financial Statements included elsewhere in this Annual Report on Form 10-K.

	Yea	Year Ended March 31,			
	2005	2004	2003		
North Asia	61.6%	59.7%	56.3%		
South Asia	27.2	29.6	26.9		
North America	5.6	6.1	11.1		
Europe	5.6	4.6	5.7		
•					
	100.0%	100.0%	100.0%		

North Asia consists of the PRC, Hong Kong, the Philippines, Taiwan, Japan and Korea while South Asia consists of Singapore, Malaysia and Thailand.

Index to Financial Statements

Distribution

We maintain, either directly or through our sales representatives, a network of warehouses located near the production facilities of our customers. The following table sets forth the locations of the warehouses that we or our local sales representatives maintain.

Asia	North America	Europe	Africa			
Japan (two)	Newark, California, U.S.A.	Malta	Morocco			
Malaysia (six) the PRC (three) Hong Kong Taiwan (two) Thailand (three) The Philippines (two) Singapore (four) South Korea (five)		Italy				

We also offer drop shipment services for our products, which provide for the shipment of our products directly to end-users designated by our customers. Because drop shipment prohibits our customers from inspecting our products before their receipt by the end user, the quality of our products is an important consideration for our customers.

Customers generally place purchase orders with our sales office or sales agents near their locations. The orders are then entered into our computerized tracking system for processing by our sales and customer service staff. Employees at our production facilities in Shenzhen, the PRC generally respond to the local sales office upon receipt of the order with a committed shipping date.

Our office in Hong Kong is responsible for invoicing local sales offices and sales agents, who in turn issue customer invoices and handle collections.

Raw Materials

We can generally purchase the raw materials we use in the production of trays and reels from a variety of sources worldwide that charge similar prices. We purchase raw materials for trays principally from eight suppliers located in the United States, Malaysia, Australia, Japan, Korea and the PRC, while raw materials for reels are generally sourced from Korea and Malaysia. We purchase the polystyrene material and polycarbonate sheet used in our carrier tapes production process, as well as cover tapes, from suppliers located in Japan, Korea, Thailand, Australia, the United States and Europe. We purchased PVC compound used in the production of tubes from three suppliers located in Singapore and Shenzhen and Guangzhou, the PRC, but ceased purchasing PVC compound with the termination of our tube business in March 2005.

We generally order the various raw materials used in our production processes one and a half months before the materials are delivered to us. We try to maintain an inventory of raw materials for approximately two to three months of estimated production requirements at our facilities in Shenzhen, the PRC. Recycled trays that we or our agents collect are initially accounted for as part of our inventory of raw materials. After being sorted and processed, recycled trays that are to be reused are subsequently accounted for as part of our inventory of finished goods.

Quality Assurance and Process Control

We maintain a quality assurance and process control department. We perform quality assurance and statistical process control procedures at each major stage of production, including the inspection of raw materials,

Index to Financial Statements

statistical process control at the injection molding (for trays and reels) and extrusion (for carrier tapes) stages and the inspection and testing of finished products. We also conduct qualification procedures for our raw material suppliers. We believe that, in addition to our quality assurance and process control department, our in-house design and tooling facilities and compounding capabilities have enabled us to control the quality of our products and that such integrated quality assurance system enables us to ensure end-product integrity and to maximize customer value.

Our production facilities in Shenzhen, the PRC were certified as meeting the ISO 9002 and 14001 quality standards by the ISO in October 1994 and in August 2000 respectively, and are subject to follow-up surveillance audits conducted semi-annually thereafter in accordance with normal ISO procedures. The ISO is an organization formed by delegates from member countries to establish international quality assurance standards for products and manufacturing processes. The certification process involves subjecting our production processes and our quality management systems to review and surveillance for periods as long as nine months. The ISO certification is required by certain European countries in connection with sales of industrial products in such countries. In addition, such certification provides independent verification to our customers as to the quality control in our manufacturing processes and many of our customers require ISO certification as a prerequisite for purchasing from us.

Before making high volume purchases from us, prospective customers generally require our production facilities to undergo a one to two month qualification process. These qualification processes often include on-site certification of our production facilities by members of a customer s engineering and quality control staff. Our production facilities in Shenzhen, the PRC have been qualified by customers like ST Microelectronics, ASE, Seagate, Amkor, Freescale, Philips, Texas Instruments, Siliconware Precision Industries Co., Ltd. (SPIL), STATS ChipPAC and ASAT.

Competition

The markets for our products and services are highly competitive. Our products compete with similar products manufactured by other companies, some of which have substantially greater financial resources than we do.

We classify our competitors as large diversified manufacturers, large single-product manufacturers and small local job-shop style manufacturers. Large diversified manufacturers are typically divisions of large multinational companies which compete with us in markets for more than one product. Large single-product manufacturers typically have international operations similar to ours. Small local job-shop style manufacturers typically operate only within certain geographic regions, such as Taiwan and Singapore. We are not aware that any of our major competitors offer the range of products and services that we offer. We believe that we compete with large diversified manufacturers through our focus on serving the semiconductor, disk drive and electronic industries, with large single-product manufacturers through our broad range of product offerings and with smaller local job-shop style manufacturers through our international organization which enables us to meet the requirements of multinational customers with several production facilities at various locations.

We believe that the principal competitive factors in the markets for our products and services are responsiveness and flexibility (including short delivery cycles and the ability to supply large quantities on short notice), price, product quality and range of products and services available.

Environmental Matters

We are subject to various laws, rules and regulations in the PRC regulating the discharge of materials into the environment or otherwise relating to the protection of the environment. We believe that we are in substantial compliance with applicable laws, rules and regulations relating to the protection of the environment and that our compliance will have no material effect on our capital expenditures, earnings or competitive position.

Index to Financial Statements

Employees

As of March 31, 2005, we had 230 employees at our offices located in Asia, North America and Europe. Our employees are not covered by any collective bargaining agreements.

Our main production facilities in Shenzhen, the PRC are operated pursuant to a processing agreement with an unaffiliated PRC company initially entered into in May 1987 and subsequently amended and renewed in May 1994 and December 1996. We entered into the processing agreement with the unaffiliated PRC company which was formed by the Shenzhen Municipal Longgang District Foreign Economic Service Company, a company controlled by the local government of the Longgang District of Shenzhen. The current term of the processing agreement expires on May 28, 2016. Under the processing agreement, the PRC Company has agreed to provide the personnel for the operation of our facilities in Shenzhen, the PRC and render assistance in dealing with all matters relating to the import and export of raw materials and our products. Such personnel are not our direct employees. The processing agreement provides for our payment of a monthly fee to the PRC company for each worker. The processing agreement also provides for the renegotiation of the fee every two years, in addition to an annual fee based on the quantity of products manufactured each year. As of March 31, 2005 the personnel employed at the production facilities in Shenzhen, the PRC numbered approximately 2,180.

Insurance

We maintain insurance policies covering risks of losses due to fire, flood and other natural disasters. Our insurance policies cover certain of our buildings, machinery and equipment, raw materials and inventory. We also maintain business interruption insurance. Significant damage to any of our production facilities, whether as a result of fire or other causes, would have a material adverse effect on our results of operations and financial condition. Additionally, we maintain directors and officers insurance covering the payment and defense of certain claims asserted against our directors and officers. We are not insured against the loss of our key personnel.

Patents and Trademarks

We have obtained several patents in the United States and have additional patent applications pending in the United States and in several Asian countries in which we operate. We do not believe that these patents provide a competitive advantage to us.

Available Information

We file with the Securities and Exchange Commission (the SEC) our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to reports to be filed pursuant to Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended. The public may read and copy any materials we file with the SEC at the SEC s Public Reference Room at 450 Fifth Street, NW, Washington, DC 20549. The public may obtain information on the Public Reference Room by calling 1-800-SEC-0330. The SEC maintains a website at www.sec.gov that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

Our internet address is *www.peakf.com*. We make available, free of charge, through our internet website copies of our Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports, if any, filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, as soon as reasonably practicable after filing such material electronically or otherwise furnishing it to the SEC. Information contained on our website is not incorporated by reference unless specifically referenced herein.

ITEM 2. PROPERTIES

Our principal executive office is located at 38507 Cherry Street, Unit G, Newark, California, CA 94560.

Index to Financial Statements

Our main production facilities are located in Shenzhen, the PRC in a plant with a total floor space of approximately 273,000 square feet.

We maintain a tooling shop on the premises of our production facilities in Shenzhen, the PRC that we use to make the molds we need for production, dies and tooling for sale, and spare parts for equipment used in our production process. As of March 31, 2005, the tooling shop, with a total floor space of approximately 25,000 square feet, employed 113 tool makers.

Our existing facilities in Shenzhen, the PRC are operated pursuant to processing agreements with an unaffiliated PRC company. These facilities are located on land which was leased from the PRC government by our wholly-owned subsidiary, Warden Development Ltd. (Warden) under land use certificates and agreements with terms of fifty years from May 1, 1992. The buildings comprising the facilities were owned by Warden. The land and the buildings for the plant in operation (Land and Building) were in turn leased by Peak (HK) from Warden under a two-year lease which commenced in April 2001 and was renewed for another two years in April 2003. Peak (HK) owns the machinery and equipment in the Shenzhen facilities. Under current PRC law, all land belongs to the government, and individuals and enterprises may only lease land from the government.

On November 30, 2004, the land lease and buildings comprising the production facilities described above were transferred from Warden to another wholly-owned subsidiary, Peak China Property Ltd (Peak China). After the transfer, Warden owned a partially completed industrial building. This incomplete industrial building is located approximately three miles from the existing production facilities. We completed the sale of this building through the sale of Warden, which owned the incomplete building, on April 13, 2005 for approximately \$7.7 million in cash.

ITEM 3. LEGAL PROCEEDINGS

R.H. Murphy Co., Inc. (Murphy) is the owner of U.S. Reexamined Patent 5,400,904 C1 and certain corresponding foreign patents, which patents are directed to specific features in trays used to carry integrated circuits. Murphy has notified us and certain of our customers that it believes these patents are infringed by certain integrated circuit trays that we provided to our customers, and indicated that licenses to these patents are available. We do not believe that any valid claim of these patents is infringed, and are proceeding consistent with that belief.

On July 8, 2002, we placed a security bond of approximately \$301,000 at a Taiwanese district court in connection with a preliminary injunction order so that we can continue to sell trays in Taiwan without being interrupted by Murphy and its three distributors in Taiwan. The Taiwanese district court granted the preliminary injunction order in June 2002, after which Murphy s three local distributors filed an appeal with the Taiwanese high court against the grant of the order by the district court. In December 2002, the high court ruled that the anti-injunction order should be revoked. In February 2003, we filed an appeal to the Taiwanese Supreme Court which was granted and resulted in the dismissal of Murphy s local distributors appeals. The grant of the preliminary injunction order has now become final and, accordingly, it is unlikely that Murphy or its local distributors will be able to obtain preliminary injunctive relief against us or our Taiwan customers during the pendency of the underlying litigation. In addition, in October 2002, we filed a civil suit against Murphy with the Taiwanese district court seeking permanent relief in connection with the preliminary injunction order. An additional security bond of approximately \$13,200 was placed with the Taiwanese court in connection with the underlying civil suit, which was later increased by approximately \$23,820. If our effort to receive permanent relief is not successful, we may be required to forfeit the bonds and Murphy and its distributors in Taiwan may assert patent infringement claims against us which, if successful, could prevent us from selling certain of our products in Taiwan and could result in monetary damages. In December 2001, we also filed an action with the Taiwanese Intellectual Property Office to invalidate Murphy s patent. In February 2002, we also filed a complaint for unfair competition with the Fair Trade Commission against Murphy. The Fair Trade Commission

Table of Contents

Index to Financial Statements

dismissed the action and we have filed an appeal. That appeal was dismissed and we filed an administrative suit contesting the dismissal. At present, the outcome of this patent dispute cannot be predicted with reasonable particularity and no impact to the financial statements has been reflected in this respect.

In April 2005, the PRC tax authorities began an investigation into the withholding and payment of income taxes by the factory in Shenzhen for certain current and former employees of Peak, affiliates of Peak or other companies who performed services at the factory but may not have paid income taxes in the PRC and for whom the factory may not have withheld and paid income taxes. While no claim has been made at this time, the PRC tax authorities may seek to collect unpaid income taxes on salaries and expense allowances of certain current and former employees of Peak, affiliates of Peak or other companies who performed services in the PRC based on such worker—s relationship with the factory, and interest and penalties on such amounts. Since some of these claims are based on income earned over several years, the amount of such taxes, accrued interest and penalties could be substantial. In the event the PRC tax authorities determine payments for back taxes, interest and penalties are owed, the potential consequences include substantial monetary claims against the factory or the seizure of the factory and our assets at the factory and the termination of substantially all of our production operations. We do not believe that we are liable for such claims, but in the event the PRC authorities asserted claims for such taxes against the factory, we may make such payments on a voluntary basis in order to avoid the seizure of the factory or our assets at the factory and keep it operational. Voluntary payments by us on behalf of the factory to the PRC tax authorities could diminish a significant portion of our current cash reserves and materially harm our operating results and business. At present, the outcome of this investigation cannot be predicted with reasonable particularity and no impact to the financial statements has been reflected in this respect.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to a vote of security holders during the fourth quarter of the fiscal year ended March 31, 2005.

13

Index to Financial Statements

PART II

ITEM 5. MARKET FOR REGISTRANT S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market of Common Stock

Since November 1, 2000, shares of our common stock have traded on the NASDAQ National Market under the symbol PEAK . Prior to this time, and on and after October 31, 1997, shares of our common stock traded on the NASDAQ National Market under the symbol PEAKF . Prior to October 31, 1997, the shares traded on the NASDAQ National Market under the symbol PITLF . Public trading of the shares commenced on June 20, 1997. Prior to that time, there was no public market for the shares. The following table sets forth the high and low sale prices for the shares as reported by the NASDAQ National Market for the periods indicated:

		Price Range of Common Stock	
	High	Low	
Year Ended March 31, 2004:			
1st Quarter	\$ 4.98	\$ 3.45	
2 nd Quarter	5.59	4.36	
3 rd Quarter	6.44	5.40	
4 th Quarter	8.10	5.69	
Year Ended March 31, 2005:			
1st Quarter	\$ 8.00	\$ 4.75	
2 nd Quarter	5.28	4.12	
3 rd Quarter	5.30	3.85	
4 th Quarter	4.27	3.10	

Holders of Record

As of June 7, 2005, we had approximately 11 holders of record of our common stock. Because many of our shares are held by brokers and other distributions on behalf of stockholders, we are unable to estimate the total number of stockholders represented by these record holders.

Dividend Policy

We have not paid any dividends on our common stock over the past three years and we do not anticipate paying any dividends in the foreseeable future. We intend to retain all earnings, if any, for general corporate purposes. The declaration and payment of dividends, if any, will be dependent on our results of operations, financial condition, cash requirements and other relevant factors, subject to the discretion of our board of directors.

Equity Compensation Plan Information

The information required to be disclosed by Item 201(d) of Regulation S-K Securities Authorized for Issuance Under Equity Compensation Plans is included under Item 12 of Part III of this Annual Report.

Bermuda Taxation

We are incorporated in Bermuda. Under current Bermudan law, we are not subject to tax on income or capital gains, and no Bermuda withholding tax will be imposed upon payment of dividends by us to our shareholders. Furthermore, we have received from the Minister of Finance of Bermuda under the Exempted

14

Index to Financial Statements

Undertakings Tax Protection Act of 1966 an assurance that, in the event that Bermuda enacts any legislation imposing any tax computed on profits or income or on any capital asset, gain or appreciation, or any tax in the nature of estate duty or inheritance tax, the imposition of such tax shall not be applicable to us or any of our operations, nor to the shares, debentures or other obligations of Peak until March 28, 2016. This assurance does not, however, prevent the imposition of any Bermuda tax payable in relation to any land in Bermuda leased to us or to persons ordinarily resident in Bermuda.

As an exempted company, we are liable to pay to the Bermudan government an annual registration fee not exceeding 27,825 Bermuda dollars (US\$27,825) per annum calculated on a sliding scale basis by reference to its authorized share capital plus any share premium.

Exchange Controls and Other Limitations Affecting Security Holders

We have been designated as a non-resident of Bermuda for exchange control purposes by the Bermuda Monetary Authority, whose permission for the free transferability of shares of our common stock has been obtained.

IT MUST BE DISTINCTLY UNDERSTOOD THAT, IN GRANTING SUCH PERMISSION, THE BERMUDA MONETARY AUTHORITY WILL ACCEPT NO RESPONSIBILITY FOR THE FINANCIAL SOUNDNESS OF ANY SCHEMES OR FOR THE CORRECTNESS OF ANY OF THE STATEMENTS MADE OR OPINIONS EXPRESSED HEREIN.

The transfer of shares between persons regarded as resident outside Bermuda for exchange control purposes and the issue of shares within our current authorized share capital to or by such persons may be effected without specific consent under the Exchange Control Act 1972 and regulations thereunder. Issues and transfers of shares involving any person regarded as resident in Bermuda for exchange control purposes require specific prior approval under the Exchange Control Act 1972.

There are no limitations on the rights of holders of shares of our common stock who are non-resident in Bermuda for exchange control purposes to hold or vote their shares. Because we have been designated as a non-resident for Bermuda exchange control purposes, there are no restrictions on our ability to transfer funds in and out of Bermuda or to pay dividends to United States residents who are holders of the shares, other than in respect of local Bermuda currency. We do not anticipate that we will transact business or make payments of dividends or other distributions in the local Bermuda currency.

In accordance with Bermudan law, share certificates are only issued in the names of corporations, partnerships or individuals. In the case of an applicant acting in a special capacity (for example, as trustee), certificates may, at the request of the applicant, record the capacity in which the applicant is acting. Notwithstanding the recording of any such special capacity, we are not bound to take notice of any person other than the person entered in the Register of Members of Peak.

As an exempted company, we are exempted from Bermudan laws which restrict the percentage of share capital that may be held by non-Bermudians, but as an exempted company we may not participate in certain business transactions including: (1) the acquisition or holding of land in Bermuda (except that required for our business and held by way of lease or tenancy for terms of not more than 50 years or, with the consent of the Minister of Finance of Bermuda land held by lease or tenancy agreements for terms of not more than 21 years to provide

accommodation or recreational facilities for officers or employees), (2) the taking of mortgages on land in Bermuda to secure an amount in excess of 50,000 Bermuda dollars (US\$50,000) without the consent of the Minister of Finance of Bermuda, (3) the acquisition of any bonds or debentures secured on any land in Bermuda except bonds or debentures issued by the Bermuda government or a public authority or (4) the carrying on of business of any kind in Bermuda, except in furtherance of our business carried on outside Bermuda or under a license granted by the Minister of Finance of Bermuda.

ITEM 6. SELECTED CONSOLIDATED FINANCIAL DATA

The selected consolidated income statement data for the years ended March 31, 2005, 2004 and 2003 and the selected consolidated balance sheet data as of March 31, 2005 and 2004 set forth below are derived from our audited consolidated financial statements included elsewhere herein and should be read with, and are qualified in their entirety by reference to, these financial statements, including the notes thereto. The selected consolidated income statement data for the fiscal years ended March 31, 2002 and 2001 and the selected consolidated balance sheet data as of March 31, 2003, 2002 and 2001 set forth below are derived from our audited consolidated financial statements not included herein. The consolidated financial statements have been prepared and presented in accordance with accounting principles generally accepted in the United States of America.

The consolidated financial data set forth below should be read with Item 7, Management s Discussion and Analysis of Financial Condition and Results of Operation, and the consolidated financial statements and related notes thereto, included elsewhere herein.

⁽¹⁾ Asset impairment charges were recorded during the years ended March 31, 2003 and 2001, based on independent appraisal, due initially to the Company's decision to delay in the construction of a new plant in the PRC in fiscal 1999, then the drop in property value in the PRC in fiscal 2001, and the decline in the fair value of an unoccupied factory building as it was reclassified to an asset to be disposed of by sale in fiscal 2003.

Index to Financial Statements

ITEM 7. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

Overview

We are a leading supplier of precision engineered packaging products for the storage, transportation and automated handling of semiconductor devices and other electronic components. Our products are designed to interface with automated handling equipment used in the production and testing of semiconductor and electronic products. We produce principally matrix and disk drive trays, carrier tapes and reels. We produced shipping tubes until in March 2005 at which point we exited the shipping tube business. We also produce leadframe boxes and interleaves used in the storage and transportation of leadframes. In addition, we collect and sell recycled matrix trays. We primarily derive our revenue from the sale of these products.

During fiscal 2005, we experienced an increase in demand for products servicing the semiconductor business segment. Unit volumes increased and, while prices declined generally, the rate of decline was less than the two prior years. Disk drive tray sales fell as our major customer in this segment experienced unforeseen delays in the introduction of new products. During the year, petroleum prices increased significantly. As we are largely dependent on raw materials that are petroleum based and because we have been unable to pass these increased costs on to our customers, our gross margin as a percent of sales degraded substantially. We are working on ways to mitigate this increase in raw material costs during fiscal 2006.

The following information is based on, and should be read with, our consolidated financial statements and the related notes thereto included elsewhere in this Annual Report. Our consolidated net sales increased from \$56.1 million in fiscal 2003 to \$63.8 million in fiscal 2004, and to \$67.9 million in fiscal 2005, reflecting primarily the gradual recovery of the semiconductor industry in fiscal 2004 and fiscal 2005. Our consolidated net loss decreased from \$16.5 million in fiscal 2003 to \$0.2 million in fiscal 2004, primarily due to the absence of an asset impairment charge of \$13.4 million which was recorded in fiscal 2003. Our consolidated net loss increased to \$9.2 million in fiscal 2005 primarily due to increased raw material costs caused by higher petroleum prices in fiscal 2005, an impairment charge of \$0.7 million associated with a write down of plant, machinery and equipment used in our tape and reel businesses, a loss of \$1.2 million related to the disposal and write-off of fixed assets, an inventory reserve of \$2.0 million for recycled material that could not be economically utilized, \$0.4 million of inventory reserve mainly for tubes, tapes and reels due to pricing trends and \$1.3 million of expenses related to discrepancies in the computation and payment of taxes and social insurance contributions for workers at the factory that manufactures our products, which is located in Shenzhen, the PRC and operated pursuant to a processing agreement with an unaffiliated PRC company. Also included in the net loss for the year was a \$0.3 million expense related to labor litigation in the factory in the PRC.

Critical Accounting Policies

In preparing our consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, we must make a variety of estimates that affect the reported amounts and related disclosures. The following accounting policies are currently considered most critical to the preparation of our financial statements. If actual results differ significantly from management s estimates and projections, there could be a material effect on our financial statements.

Revenue Recognition

Our revenue is recognized when product has been shipped and title to the product has transferred to the customer. Title of the product may transfer to the end customer or distributor when shipped or when received by the customer based on a specific agreement. We evaluate the provision for estimated returns monthly, based on historical sales and returns. To date we have not experienced significant returns. Any increase in the level of returns could have a material and adverse effect on our financial statements.

Table of Contents

Index to Financial Statements

Allowance for Doubtful Accounts

Allowance for doubtful accounts is made against accounts receivable to the extent they are considered to be doubtful. Accounts receivable in the balance sheet are stated net of such provision. We evaluate the collectability of our accounts receivable based on a combination of factors. In circumstances where we are aware of a specific customer s inability to meet its financial obligation to us, we record a specific reserve for bad debts against amounts due. A provision is also made based on the aging of the receivables. If circumstances change, such as the incurrence of higher than expected defaults or an unexpected material adverse change occurs regarding a major customer s ability to meet its financial obligations to us, our estimates of the recoverability of amounts due to us could be reduced by a material amount.

Inventory Valuation

We write down our inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. At each balance sheet date, inventory on hand in excess of one year s demand or usage or those that were produced more than twelve months ago, are written down to zero. If actual future demand or market conditions are less favorable than those projected by management, additional write-downs may be required.

Valuation of Long-lived Assets

We assess the carrying value of long-lived assets whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors we consider important which could trigger an impairment review include the following:

significant under-performance relative to expected historical or projected future operating results;

significant changes in the manner of our use of the asset;

significant negative industry or economic trends; and

our market capitalization relative to net book value.

Upon the existence of one or more of the above indicators of impairment, we test such assets for a potential impairment. The carrying value of a long-lived asset is considered impaired when the estimated future cash flows, undiscounted, are less than the asset s carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived asset. Fair market value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved.

Asset to be Disposed of by Sale

Asset to be disposed of by sale represents the factory under construction in Shenzhen, the PRC, together with the land use right on which the building is built and is stated at the lower of its carrying amount or fair value less cost to sell as of the balance sheet date in accordance with Statement of Financial Accounting Standards (SFAS) No. 144 Accounting for the Impairment of Disposal of Long-Lived Assets. Fair value was calculated on the basis of a professional valuation report on the property provided by an independent appraiser. As of March 31, 2005, fair value was calculated based on actual sales consideration received in full after year end.

Deferred Taxes

As part of the process of preparing our consolidated financial statements, we are required to estimate our income taxes and tax bases of assets and liabilities in each of the jurisdictions in which we operate. This process involves us estimating our current tax exposure together with assessing temporary differences resulting from differing treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included in our consolidated balance sheet. We must then assess the likelihood that our deferred tax assets will be recovered from future taxable income, and, to the extent we believe that recovery is more unlikely than likely, we must establish a valuation allowance. To the extent we establish a valuation

Index to Financial Statements

allowance or increase this allowance in a period, we must include an expense within the tax provision in the statement of operations. Any change in the future recoverability of the deferred tax assets could significantly affect the results of our operations or cash flows.

Property, Plant and Equipment

Property, plant and equipment is stated at cost less accumulated depreciation. Gains or losses on disposals are reflected in current operations. Major expenditures for betterments and renewals are capitalized. All ordinary repairs and maintenance costs are expensed as incurred. Depreciation is provided using the straight-line method over the estimated useful lives.

The useful lives of property, plant and equipment adopted for depreciation purposes are as follows:

Buildings	10 years
Plant, machinery and equipment	5-10 years
Molds	3-5 years
Leasehold improvements, furniture, fixtures and motor vehicles	5-10 years

Results of Operations

Cost of Goods Sold. Cost of goods sold primarily consists of costs of raw materials, labor, and manufacturing overheads.

Operating Expenses. Selling and marketing expenses primarily consists of freight and delivery costs, salaries and allowances. General and administrative expenses primarily consist of salaries and allowances and legal, professional and consulting fees. Research and development expenses primarily consist of raw material costs and fixed assets depreciation.

The following table sets forth, for the years indicated, certain of our income statement items as a percentage of net sales.

	Year	Year Ended March 31,					
	2005	2004	2003				
Net sales	100.0%	100.0%	100.0%				
Cost of goods sold	(87.8)	(70.9)	(73.7)				
Operating expenses:							
Selling and marketing	(17.8)	(19.0)	(17.9)				
General and administrative	(9.8)	(10.3)	(13.8)				

Edgar Filing: PEAK INTERNATIONAL LTD - Form 10-K

Research and development	(0.2)	(0.4)	(0.3)
Asset impairment			(23.9)
Loss from operations	(15.6)	(0.6)	(29.6)
Other income (expense), net	0.1	0.4	(0.2)
Interest income, net	0.3	0.3	0.5
Income (Loss) before income taxes	(15.2)	0.1	(29.3)
Income tax expense	1.7	(0.4)	(0.1)
Net loss	(13.5)%	(0.3)%	(29.4)%

Fiscal 2005 Compared to Fiscal 2004

Net Sales. Revenues increased by \$4.2 million or 6.5% to \$67.9 million in fiscal 2005 from \$63.8 million in fiscal 2004. The increase resulted from greater demand across all products, except for disk drive trays.

Index to Financial Statements

Revenue from sales of our IC trays increased by 9.7%. Volume for IC trays increased by 13.1% while average selling price dropped by 3.0%. The increase in volume for IC trays was primarily due to increased demand for such trays. Revenue from sales of our disk drive trays decreased by 15.4% driven mainly by a drop in average selling price by 16.0% while volume increased by 0.6%. Revenue from sales of our carrier tape products increased by 6.1% compared to last year primarily due to a volume increase of 22.2% while average selling price dropped by 13.2% compared to the prior year. Revenue from sales of our reel products increased by 7.3% compared to last year primarily due to a volume increase of 10.5% while average selling price dropped by 2.9% compared to the prior year. Revenue from sales of our cover tape products increased by 36.3% reflecting both a 35.8% increase in volume and a 0.4% increase in an average selling price. Revenue from sales of our tube products increased by 29.7% reflecting both 26.9% increase in volume and 2.2% increase in an average selling price.

Our disk drive tray sales have generally been to one major customer or to subcontractors supporting that customer. These sales are largely dependent on the introduction of new products by that customer. New product introductions are difficult to forecast both with respect to timing as well as demand. We have been producing new custom molds for that customer in anticipation of several new products, but this activity has not yet led to significant production orders. Mature products, while requiring some replacement trays, do not generally generate a sustainable high level of revenue. As a result, revenue from sales of our disk drive trays has, and will in the future, fluctuate dramatically with the corresponding fluctuations in the introduction of new products.

During the quarter ended December 31, 2004, we announced to our customers our intention to discontinue the production and sale of tubes and in March 2005 we exited the tube business. We gave our customers until the end of March to place orders for last time buys. We accelerated depreciation on the dedicated equipment used in the manufacturing of tubes and as a result all such assets had a zero book value at the time of disposal.

Gross Profit. Gross profit for fiscal 2005 decreased to \$8.3 million from \$18.5 million in fiscal 2004, a decrease 55.5%. Gross margin deteriorated to 12.2% in fiscal 2005 from 29.1% in fiscal 2004, reflecting a reduction in the average selling price of our products and an increase in the cost of raw material due to higher petroleum prices. The gross profit for fiscal 2005 also included an impairment charge of \$0.7 million associated with a write down of plant, machinery and equipment used in our tape and reel businesses, a \$1.2 million loss related to the disposal and write-off of fixed assets, an inventory reserve of \$2.0 million for recycled material that could not be economically utilized, \$0.4 million of inventory reserve mainly for tubes, tapes and reels due to pricing trends and \$1.3 million of expenses related to discrepancies in the computation and payment of taxes and social insurance contributions for workers at Peak s main production facilities (the Factory), which are located in Shenzhen, the PRC and operated pursuant to a processing agreement with an unaffiliated PRC company. The discrepancy, which was at the Factory and not at Peak, was discovered as a result of a claim by an employee regarding the computation of wages and withholding. Upon discovery of these discrepancies, we conducted an internal review of the Factory s practices and engaged third party advisors to assist us in assessing the Factory s and our obligations with respect to these discrepancies. Upon completion of this review in the third quarter of fiscal 2005, management concluded that the Factory had a duty to correct certain of these discrepancies that amounted to a total of \$1.3 million. While we believe we are not contractually obligated under the terms of our agreement with our processing partner to pay these amounts and while no claim has been made by any government agency, we voluntarily made payments of approximately \$1.3 million to the PRC tax authorities in the fourth quarter of fiscal 2005 in order to avoid the seizure of the Factory s assets and keep it operational. Also included in the gross profit for the year was a \$0.3 million expense related to labor litigation in the factory in the PRC.

Loss from Operations. An operating loss of \$10.7 million was recorded for fiscal 2005 compared to a loss of \$0.4 million recorded for fiscal 2004.

Selling and Marketing Expenses. Selling and marketing expenses remained steady at \$12.1 million in both fiscal 2005 and 2004.

Table of Contents

Index to Financial Statements

General and Administrative Expenses. General and administrative expenses remained steady at \$6.6 million in both fiscal 2005 and 2004.

Other Income (Expenses), Net. Other income (expenses), net is comprised of foreign currency gains and losses as a result of a weaker dollar at certain times during the year. Other income, net decreased by 65.4%, or \$176,000, from \$269,000 in fiscal 2004 to \$93,000 in fiscal 2005. In fiscal 2004, \$367,000 was collected in partial payment of a judgment against a former officer of the Company which was included in other income (expense), net.

Interest Income, Net. Interest income, net increased by 38.0%, from \$166,000 in fiscal 2004 to \$229,000 in fiscal 2005, primarily due to the increase in bank deposit balances and increase in interest rates for such deposits.

Net Loss. Net loss increased from \$0.2 million in fiscal 2004 to \$9.2 million in fiscal 2005, reflecting all the above factors.

Fiscal 2004 Compared to Fiscal 2003

Net Sales. Revenues increased by \$7.6 million or 13.6% to \$63.8 million in fiscal 2004 from \$56.1 million in fiscal 2003. The increase resulted from greater demand across all products, except for disk drive trays. Revenue from sales of our IC trays increased by 28.1%. Volume for IC trays increased by 37.2% while average selling price dropped by 6.6% which decrease was not as dramatic as the 11.0% drop from fiscal 2002 to 2003. Revenue from sales of our disk drive trays decreased by 30.3% driven mainly by a drop in volume by 32.4% while average selling price increased 3.1%. The decrease in volume for disk drive trays was primarily due to decreased demand for such trays. Revenue from sales of our carrier tape products increased by 8.7% compared to last year primarily due to a volume increase of 21.0% compared to the prior year. Revenue from sales of our tube products increased by 3.9% reflecting a 22.3% increase in volume offset by an average selling price decline of 15.1% as a result of a change in product sales mix. The reduction in the average selling price of our products was mainly due to product and customer mix changes.

Gross Profit. Gross profit for fiscal 2004 increased to \$18.5 million from \$14.7 million in fiscal 2003, an increase of 25.7%. Gross margin improved to 29.1% in fiscal 2004 from 26.3% in fiscal 2003, reflecting more efficient utilization of factory capacity as volumes increased, the benefit of which was partly offset by an aggregate reductions of 8.4% in the average selling price of some of our products and an increase of 15.3% in the cost of raw materials.

Loss from Operations. An operating loss of \$0.4 million was recorded for fiscal 2004 compared to a loss of \$16.6 million recorded for fiscal 2003, which included an asset impairment charge of \$13.4 million.

Asset Impairment. An asset impairment charge of \$13.4 million was recorded in fiscal 2003 due to the decline in the fair value of the unoccupied factory building in Shenzhen, the PRC, as it was reclassified to an asset to be disposed of by sale. No such charge was recorded in fiscal 2004. A valuation of the building by an independent appraiser on April 20, 2004 showed the value of this asset in fiscal 2004 to be the same as that of fiscal 2003. We have been actively marketing the building since we decided to sell it. The sale of this building was eventually completed on April 13, 2005.

Selling and Marketing Expenses. Selling and marketing expenses increased by 20.2% or \$2.0 million from \$10.1 million in fiscal 2003 to \$12.1 million in fiscal 2004. This increase is primarily due to increases in freight, storage, traveling and staffing costs associated with the increased shipment of our products, as well as increased office rental.

General and Administrative Expenses. General and administrative expenses decreased by 15.2% or \$1.2 million from \$7.8 million in fiscal 2003 to \$6.6 million in fiscal 2004 primarily due to savings in salary, legal and professional expenses and office rent.

Index to Financial Statements

Other Income (Expenses), Net. Other income (expenses), net is comprised foreign currency gains and losses and amounts collected as a result of judgment in favor of the Company against a former officer. Other income (expenses), net increased by 353.8%, or \$375,000, from an expenses \$106,000 in fiscal 2003 to an income \$269,000 in fiscal 2004 as a result of a weaker dollar at certain times during the year and a \$367,000 collected in partial payment of a judgment against a former officer of the Company.

Interest Income, Net. Interest income, net decreased by 41.8%, or \$119,000, from \$285,000 in fiscal 2003 to \$166,000 in fiscal 2004, primarily due to the reduction in bank deposit balances and reductions in interest rates for such deposits.

Net Loss. Net loss decreased 98.6% from \$16.5 million in fiscal 2003 to a net loss of \$0.2 million in fiscal 2004, reflecting all the above factors.

Liquidity and Capital Resources

We historically met a significant portion of our cash requirements from cash flow from operations and we expect this to continue in fiscal 2006. In fiscal 2005, we generated \$0.4 million from the sale of shares of our common stock. Our primary uses of cash have been to fund capital expenditures related to the expansion of our facilities and operations and working capital requirements. We intend to continue to retain our earnings to finance the development and expansion of our business operations and do not intend to pay dividends for the foreseeable future. As of March 31, 2005, cash and cash equivalents were \$22.3 million, an increase of \$2.0 million as compared to cash and cash equivalents of \$20.3 million as of March 31, 2004.

Our net cash provided by operating activities was \$6.3 million in fiscal 2005, compared to a net cash provision of \$3.1 million in fiscal 2004 and a net cash usage of \$0.8 million in fiscal 2003. The increase in cash provided by operating activities during fiscal 2005 as compared to fiscal 2004 was primarily due to better control of collections and the management of payouts for purchases and the deposit received regarding the sale of our subsidiary that held the assets to be disposed of by sale. The increase in cash provided by operating activities during fiscal 2004 as compared to fiscal 2003 was primarily caused by an operating loss incurred during fiscal year 2003.

Our net cash used in investing activities was \$4.7 million in fiscal 2005, compared to \$7.4 million in fiscal 2004 and \$2.5 million in fiscal 2003. Net cash used in investing activities primarily consisted of capital expenditures of \$5.6 million, \$6.4 million and \$2.6 million for the acquisition of new equipment in our current facility during fiscal 2005, fiscal 2004 and fiscal 2003, respectively. The continuous investment in capital expenditure during fiscal 2005 and 2004 reflected capacity expansion due to the increase in economic activity in the semiconductor industry and replacement of obsolete fixed assets.

As of March 31, 2005, we had commitments for capital expenditures of \$0.1 million. The actual amounts of capital expenditures may vary substantially from those budgeted or estimated for a variety of reasons, including changes in market conditions, unavailability or changes in scheduled delivery of specific equipment, changes in interest rates and other factors. In addition, we plan to continue to expand capacity and replace our obsolete fixed assets in future periods and plan to fund such expansion through our current cash reserves, future cash flow from operations and new bank borrowings as required. We lease office and warehouse facilities under various leases that expire through 2008. Total future minimum commitments under these leases amount to approximately \$1.7 million.

As of March 31, 2005, we had no outstanding indebtedness. At March 31, 2005, the Company had unsecured letter of credit facilities available of \$5.6 million of which \$4.2 million remained unused. Interest rates in respect of credit facilities are generally based on the weighted average lending rates of 3.60% and the line of credit is normally subject to annual review.

According to customs rules in the PRC, it is possible that we may be subject to classification by the Chinese customs authorities in a manner that would require us to supply a substantial bond against customs duties that we

Index to Financial Statements

would have to pay if we were importing material for ultimate sale in the PRC. If the customs authorities of the PRC require us to post a bond in connection with our exemption status from PRC duties on imported raw materials for export sales, and exported products, we will experience a substantial drain of our cash resources.

Net cash provided by financing activities was \$0.4 million in fiscal 2005, compared to a cash usage of \$1.3 million in fiscal 2004 and a net cash provision of \$0.02 million in fiscal 2003. Net cash provided by financing activities in fiscal 2005 was due to proceeds from issuance of common stock. Net cash used in financing activities in fiscal 2004 was primarily used to repurchase shares of our common stock. In September 2000, our board of directors authorized the repurchase, at management s discretion, of up to \$10.0 million worth of our common stock at prices not to exceed 150% of our net asset value per share. Common stock repurchased was cancelled immediately. During the years ended March 31, 2004 and 2003, we repurchased 660,186 and 47,366 shares of common stock, respectively, at an average cost of \$3.66 and \$4.20 respectively per share. There was no repurchase of shares for year ended March 31, 2005.

As of March 31, 2005, our principal source of liquidity consisted of \$22.3 million in cash and cash equivalents. We believe that our existing cash and cash equivalents and anticipated cash flow from operations will be sufficient to meet our anticipated cash needs in the ordinary course of business for at least the next 12 months. If our existing cash and cash equivalents and cash generated from operations is insufficient to satisfy our liquidity requirements, we may seek to sell additional public or private equity securities or obtain debt financing. There can be no assurance that additional financing will be available at all, or if available, will be obtained on terms favorable to us. Additional financing may also be dilutive to our existing shareholders.

The Company does not use off-balance-sheet arrangements with unconsolidated entities or related parties, nor does it use other forms of off-balance-sheet arrangements such as research and development arrangements. Accordingly, the Company s liquidity and capital resources are not subject to off-balance-sheet risks from unconsolidated entities.

From time to time, we may evaluate possible investments or acquisitions and may, if a suitable opportunity arises, make such an investment or acquisition. We currently have no commitments to make any material investments or acquisitions.

Contractual Obligations and Commercial Commitments

Operating Leases

Purchase Orders

As of March 31, 2005, our future fixed commitments are as follows (in thousands):

		Less than			More than

\$1,747

\$ 105

974

105

Payments due by period

\$ 773

PVC Compound Price

PVC compound, the principal material used in the manufacture of our tubes, accounted for 10.1%, 7.4% and 7.0% of our total raw material costs in fiscal 2005, fiscal 2004 and fiscal 2003, respectively. In March 2005, we exited the shipping tube business.

Hong Kong Profits Tax

The factory at which our products are produced, which is located in Shenzhen, the PRC, is operated pursuant to a processing agreement with an unaffiliated PRC company. According to the tax guidelines issued by the tax authority in a situation where a Hong Kong company manufactures goods partly in Hong Kong and partly

Index to Financial Statements

outside Hong Kong, the Hong Kong Inland Revenue Department (IRD) may accept profits that relate to the manufacture of the goods outside Hong Kong to be offshore in nature and therefore not subject to Hong Kong profits tax. The offshore claim would only be allowed by the IRD by way of concession and provided that certain criteria are met to their satisfaction. We believed that most of its manufacturing activities were conducted outside Hong Kong and therefore since fiscal 1996 it apportioned a substantial amount of its profits (80% to 90%) to activities outside Hong Kong for tax filing purposes. However, since fiscal 1996, there was a dispute with the IRD in relation to the apportionment basis of the profit derived from manufacturing activities outside Hong Kong. We raised a number of objections to the tax assessments and examined factors that the IRD used to ascertain the geographic nature of our activities and sources of the profits. We made provisions for taxes payable according to the apportionment basis based on practices normally acceptable by the IRD in general cases. Interest associated with the tax payable for fiscal years 1996 to 2004 had also been accrued. We believed that the aggregate maximum amount of its potential exposure was approximately \$4.3 million plus interest in the amount of \$1.4 million. As a result, the Company accrued \$5.6 million as of March 31, 2004 and \$5.6 million as of March 31, 2003 as part of the income taxes payable.

In connection with the above, the IRD requested that we place tax reserve certificates of \$5.1 million with IRD as of March 31, 2004 and \$3.7 million and letters of credit of \$0.6 million with the IRD as of March 31, 2003, which could be recovered if we prevailed.

In the year ended March 31, 2005, we reached a settlement with the IRD and these tax reserve certificates were utilized to pay for the prior year taxes. A net gain of \$0.3 million was recognized as a result of the settlement with the IRD.

New Accounting Standards

In December, 2004, the FASB issued FASB Statement No. 123 (revised 2004), Share-Based Payment, or Statement 123(R), which is a revision of FASB Statement No. 123, Accounting for Stock-Based Compensation . Statement 123(R) supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees. or Opinion 25. Generally, the approach in Statement 123(R) is similar to the approach described in the unrevised Statement 123. However, Statement 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an alternative. In April 2005, the SEC deferred the effective date of Statement 123(R) so that companies may now adopt its provisions at the beginning of their first annual period beginning after June 15, 2005 which would be fiscal 2007, beginning April 1, 2006 for us. As permitted by the unrevised Statement 123, we currently account for share-based payments to employees using Opinion 25 s intrinsic value method, under which we generally do not record compensation cost for employee stock options. Accordingly, the adoption of Statement 123(R) s fair value method will have a significant impact on our results of operations, although it will have no impact on our overall financial position. The impact of adoption of Statement 123(R) cannot be predicted at this time because it will depend, in part, on levels of share-based payments granted in the future. However, had we adopted Statement 123(R) in prior periods, the impact of that standard would have approximated the impact of Statement 123 as described in the disclosure of pro forma net income and earnings per share in Note 23 to our Consolidated Financial Statements.

In December 2004, the FASB issued SFAS No. 153, Exchanges of Nonmonetary Assets, an amendment of APB Opinion No. 29. SFAS No. 153 addresses the measurement of exchanges of nonmonetary assets and redefines the scope of transactions that should be measured based on the fair value of the assets exchanged. SFAS No. 153 is effective for nonmonetary asset exchanges occurring in fiscal periods beginning after June 15, 2005, which would be our second quarter of fiscal 2006. The adoption of SFAS No. 153 is not expected to have a material effect on our consolidated financial position or results of operations.

In November 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 151, Inventory Costs An Amendment of ARB No. 43, Chapter 4, which clarifies the accounting for abnormal amounts of idle facility expense, freight, handling costs and wasted material (spoilage).

SFAS No. 151 is effective for inventory

Index to Financial Statements

costs incurred during fiscal years beginning after June 15, 2005, which would be our second quarter of fiscal 2006 and its adoption is not expected to have a significant impact on our results of operations or financial position.

Factors that May Affect Operating Results

The risks and uncertainties described below are not the only ones we face. If an adverse outcome of any of the following risks actually occurs, our business, financial condition or results of operations could be materially and adversely affected. In evaluating our business, shareholders should consider carefully the following factors in addition to the other information presented herein.

Our operating results are difficult to predict and are likely to fluctuate significantly based on several factors, which can cause our stock price to decline.

Our operating results are affected by a wide variety of factors that could materially affect net sales and profitability or lead to significant fluctuations in our quarterly or annual operating results. These factors include, among others:

the price of raw materials, the majority of which are petroleum derivatives. Prices of these raw materials are significantly affected by oil prices which recently have become volatile;

factors relating to conditions in the semiconductor, disk drive and electronic industries including:

lower demand for products;

increased price competition;

downturns and deterioration of business conditions;

technological changes; and

changes in production processes in the semiconductor and electronic industries which could require changes in packaging products;

although we do not believe that it is our liability, the need for us to pay and the amounts that we might pay on a voluntary basis for certain tax, social insurance contributions and potential penalties on behalf of the Factory at which our products are manufactured in order to avoid the seizure of the Factory s assets and keep it operational, as well as claims resulting from employee lawsuits against the Factory;

capital requirements and the availability of funding;
our expansion plan and possible disruptions caused by the installation of new equipment or the construction of new facilities;
the lack of long-term purchase or supply agreements with customers;
the loss of key personnel or the shortage of available skilled employees;
international political or economic events or developments, including those relating to Hong Kong and the PRC;
our relationship with our processing partner in the PRC and the ability of the government of the PRC to seize the assets and shut down our factory operated in the PRC;
production volume fluctuations and the management of our inventories;
currency fluctuations and foreign exchange rules and regulations in the PRC;
the recurrence of SARS or other major health issues in Asia;
the outcome of patent litigation in Taiwan; and

25

Index to Financial Statements

the imposition of fines, penalties and bonds arising from violations of rules and regulations in the PRC relating to customs regulations, foreign currency exchange rules, taxation, the withholding of taxes for employees and other laws and regulation.

Unfavorable changes in the above or other factors could substantially harm our results of operations or financial condition. We believe that period to period comparisons of our results of operations will not necessarily be meaningful. You should not rely on these comparisons as an indication of our future performance. If our results of operations in one or more periods fail to meet or exceed the expectations of securities analysts or investors, the trading price of our common stock may decline, possibly by a significant amount.

We depend on the health of the semiconductor, disk drive and electronics industries which are highly cyclical and the decline in demand for products in these industries could severely affect our net sales and financial results.

Our net sales depend on increased demand for our products from manufacturers of semiconductor, disk drive and electronic components. Any deterioration of business conditions in the semiconductor industry, including lower demand for semiconductor products, decreased unit volume of semiconductor products shipped, other factors resulting in decreased demand for packaging products, or increased price competition in the semiconductor industry could result in increased price pressure on suppliers to the semiconductor industry, and could have a material adverse effect on our results of operations and financial condition. The industries we serve are characterized by rapid technological change leading to more complex products, evolving industry standards, intense competition and fluctuations in demand. From time to time, demand for electronic systems, which generally include both semiconductors and electronic components, has suffered significant downturns, which in some cases have been prolonged. For example, during 2002 and 2003, demand for our products decreased as the overall economy and the electronics industry experienced a general downturn in business. These downturns have been characterized by diminished product demand, product over-capacity and accelerated erosion of average selling prices. Any future downturn in the semiconductor or disk drive or electronics industries may substantially harm our results of operations or financial condition.

Our customer base is concentrated and the loss of one or more of our key customers would harm our business.

Our top 10 customers together accounted for 67.8%, 64.4% and 60.0% of our net sales in fiscal 2005, fiscal 2004 and fiscal 2003, respectively. We are dependent upon a single customer, Seagate Technology, for substantially all sales of our disk drive trays, with whom we have no long-term contract. In addition, in fiscal 2005, ASE accounted for 11.4% of our net sales. Like Seagate Technology, we do not have a long-term contract with ASE. Our ability to maintain close, mutually beneficial relationships with our leading customers is important to the ongoing growth and profitability of our business. Although our sales to specific customers have varied from year to year, our results of operations have been dependent on a number of significant customers and the conditions of their respective industries. All of our customers operate in the global semiconductor, disk drive and electronic industries which historically have been highly cyclical. As a result of the concentration of our customer base, the loss or cancellation of business from, or significant changes in scheduled deliveries or decreases in the prices of products or services provided to, any of these customers could materially and adversely affect our results of operations and financial condition. Our sales are made pursuant to purchase orders, and therefore, we generally have no agreements with or commitments from our customers for the purchase of products. Although customers typically provide us with forecasts of their requirements, these forecasts are not binding. Our customers may not maintain or increase their sales volumes or orders for our products and we may be unable to maintain or add to our existing customer base.

Our operations are concentrated in the People s Republic of China and we are subject to the risks associated with international operations, which may negatively affect our business.

As of March 31, 2005, substantially all of our fixed assets and inventories were located in Shenzhen, the PRC. Our main production facilities are located in Shenzhen, the PRC and are operated pursuant to a processing

Index to Financial Statements

agreement with an unaffiliated PRC company that obligates it to provide all of the personnel for the operation of our facilities and to render assistance in dealing with matters relating to the import of raw materials and the export of our products. We are dependent on continued good relations with our processing partner in order to supervise the operation of the factory and its employees. Our existing production facilities in Shenzhen, the PRC are located on land leased from the PRC government by one of our wholly-owned subsidiaries under land use certificates and agreements with a remaining term of approximately 37 years. Our assets and facilities located in the PRC and the PRC company s operation of these facilities are subject to the laws and regulations of the PRC and our results of operations in the PRC are subject to the economic and political situation in the PRC. In January 2005, we entered into negotiations with our processing partner to revise and update our agreement regarding the operation of the Factory. While these negotiations have been suspended, we expect to be able to renegotiate some of the terms and conditions of the processing agreement. There are no assurances that we will be able to do so, which could lead to increased costs and harm our business. In addition, during the third fiscal quarter of 2005, we discovered discrepancies, which were at the our main production facilities in Shenzhen and not at Peak, in the computation and withholding of both taxes and social insurance contributions for workers at the Factory. Upon discovery of these discrepancies, we conducted an internal review of the Factory s practices and we concluded that the factory had a duty to correct certain of these discrepancies. While we believe we were not contractually obligated under the terms of our agreement with our processing partner to pay these amounts, we elected to voluntarily make such payment in order to avoid the seizure of the Factory s assets and keep it operational. In April 2005, the PRC tax authorities began an investigation into the withholding and payment of income taxes by the Factory in Shenzhen for certain current and former employees of Peak, its affiliates or other companies who performed services at the Factory but may not have paid income taxes in the PRC and for whom the factory may not have withheld and paid income taxes. We are assisting the PRC authorities and, while no claim has been made at this time, the PRC tax authorities may seek to collect unpaid incomes taxes on salaries and expense allowances of certain current and former employees of Peak, affiliates of Peak or other companies who performed services in the PRC based on such worker's relationship with the Factory, and interest and penalties on such amounts. Since some of these claims are based on income earned over several years, the amount of such taxes, accrued interest and penalties could be substantial. We do not believe that we are liable for such claims, but in the event the PRC tax authorities determine payments for back taxes, interest and penalties are owed, the potential consequences include substantial monetary claims against the Factory or the seizure of the Factory and our assets at the Factory and the termination of substantially all of our production operations. In the event the PRC authorities asserted claims for such taxes against the Factory, we may make such payments on a voluntary basis in order to avoid the seizure of the Factory or our assets at the Factory and keep it operational. Voluntary payments by us on behalf of the Factory to the PRC tax authorities could diminish a significant portion of our current cash reserves and materially harm our operating results and business. In addition, the Factory may in the future be subject to further investigations by the PRC tax authorities for claims of unpaid taxes, which we may be required to pay in order to avoid seizure of the Shenzhen Factory.

The operations of our production facilities in Shenzhen, the PRC may be harmed by changes in the laws and regulations of the PRC or the interpretation thereof, such as those relating to taxation, import and export tariffs, environmental regulations, land use rights, property, foreign currency exchange regulations and other matters. Prior to September 2002, we exported all the products manufactured at our production facilities in Shenzhen, the PRC. Accordingly, we were not subject to certain PRC taxes and are exempt from customs duties on imported raw materials and exported products. During the fourth quarter of fiscal 2003, we finished the procedure of setting up a wholly owned subsidiary in the PRC and hence a small portion of our products was sold locally in the PRC. This newly established PRC subsidiary is subject to PRC taxes and customs duties on materials imported for such PRC sales.

According to customs rules in the PRC, we may be subject to classification by the Chinese customs authorities in a manner that would require us to supply a substantial bond against customs duties that we would have to pay if we were importing material for ultimate sale in the PRC. We may also be subject to significantly higher administrative importation costs generally. These measures could harm our ability to manufacture products at a competitive price and our results of operations could suffer. In addition, if we are required to post a

27

Index to Financial Statements

bond in connection with our exemption status from PRC duties on imported raw materials for export sales and exported products, we will experience a substantial drain of our liquid resources. We may not be able to provide the required bond at a commercially feasible cost, or at all.

We may become subject to PRC taxes and may be required to pay customs duties in the future even under the contract processing agreement. If we are required to pay PRC taxes or customs duties, our results of operations could suffer. We believe that our operations in Shenzhen, the PRC are now in compliance with the applicable PRC legal and regulatory requirements for custom duties. However, the central or local governments of the PRC may impose new regulations or interpretations of existing laws, rules and regulations which could require additional expenditures or preclude the production of products in the PRC by Peak or our processing partner.

The economy of the PRC differs from the economies of many countries in many respects such as structure, government involvement, level of development, growth rate, capital reinvestment, allocation of resources, self-sufficiency, rate of inflation and balance of payments position, among others. In the past, the economy of the PRC has been primarily a planned economy subject to state plans. Since the entry of the PRC into the World Trade Organization in 2002, the PRC government has been reforming its economic and political systems. These reforms have resulted in significant economic growth and social change. We cannot assure, however, that the PRC government s policies for economic reforms will be consistent or effective. Our results of operations and financial position may be harmed by changes in the PRC s political, economic or social conditions.

We have in the past and may in the future, be party to legal proceedings that could have a negative financial impact on us.

We have in the past been involved in litigation relating to securities and employment law, and are currently involved in litigation in Taiwan related to intellectual property, tax and labor disputes in the PRC. While these lawsuits and disputes vary greatly in the materiality of potential liability associated with them, the uncertainty associated with substantial unresolved litigation could seriously harm our business, financial condition and reputation, whether material individually or in the aggregate. In particular, this uncertainty could harm our relationships with existing customers, our ability to obtain new customers and our ability to operate our business.

Litigation and the resolution of disputes also could result in the diversion of our management s time and attention away from business operations, which could harm our business. Negative developments with respect to the litigation could cause the price of our common stock to decline significantly. In addition, we are unable to determine the amount, if any, that we may be required to pay if litigation is not resolved in a favorable manner. For more information about the litigation, please see Item 3 entitled Legal Proceedings.

A significant portion of our business is conducted in the Asia Pacific region. This concentration could expose us to risks inherent to doing business in the Asia Pacific region that could harm our business.

A significant portion of our net sales are derived from sales to customers in Hong Kong, Singapore, Taiwan, the Philippines and other countries in East and Southeast Asia, or the Asia Pacific region. Accordingly, our financial condition and results of operations and the market price of shares of our common stock may be affected by:

economic and political instability;
changes in regulatory requirements, tariffs, customs, duties and other trade barriers;
transportation delays;
fluctuations in currency exchange rates;
currency convertibility and repatriation;
taxation of our earnings and the earnings of our personnel;
the recurrence of SARS and other major health issues:

Index to Financial Statements

amounts we may have to pay in the PRC on behalf of the Factory in Shenzhen for past personal income taxes, interest and penalties that may be imposed by PRC tax authorities on the income of foreign workers who performed services in the Shenzhen Factory;

amounts we may have to pay on behalf of the factory in the PRC as a result of employees litigation against the factory in Shenzhen; and

other risks relating to changes, administration or new interpretations of laws, regulations and policies in the jurisdictions in which we conduct our business.

None of these factors are within our control. In fiscal 1999, many countries in the Asia Pacific region experienced considerable currency volatility and depreciation, high interest rates, stock market volatility and declining asset values which contributed to net foreign capital outflows, an increase in the number of insolvencies, a decline in business and consumer spending and a decrease in economic growth as compared with prior years.

Consumer demand for products that use semiconductors, disk drives and electronic components generally rises as the overall level of economic activity increases and falls as such activity decreases. In addition, currency devaluations in the Asia Pacific region could result in accelerated price erosion of semiconductor and electronic products as products manufactured in countries whose currencies have devalued significantly against the US dollar become less expensive in US dollar terms. Any adverse effect on the global semiconductor, disk drive and electronic industries as a result of lower demand for products in the Asia Pacific region or accelerated product price erosion arising from currency devaluations in the Asia Pacific region could harm our financial condition or results of operations.

We are incorporated under the laws of Bermuda and there may be potential difficulties in protecting our shareholders rights.

We are incorporated under the laws of Bermuda and our corporate affairs are governed by our Memorandum of Association and Bye-laws and by the laws governing corporations incorporated in Bermuda.

The rights of our shareholders and the responsibilities of members of our Board of Directors under Bermuda law are different from those applicable to a corporation incorporated in the United States and, therefore, our shareholders may have more difficulty protecting their interests in connection with actions by our management, members of our Board of Directors or our principal shareholder than they would as shareholders of a corporation incorporated in the United States.

Our stock price has been and will likely continue to be volatile. A decline in our stock price could result in securities class action litigation against us, which could divert management s attention and harm our business.

Our stock price has been and is likely to continue to be highly volatile. Our stock price could fluctuate significantly due to a number of factors, including:

variations in our actual or anticipated operating results;
sales of substantial amounts of our stock;
announcements about us or about our competitors, including technological innovation or new products or services
litigation and other developments relating to patents or other proprietary rights or those of our competitors;
conditions in the semiconductor, disk drive and electronics industries;
governmental regulation and legislation;
international political or economic events or developments, including those relating to Hong Kong and the PRC;

29

Index to Financial Statements

the recurrence of SARS and other major health issues;

amounts we may have to pay in the PRC for past personal income taxes, interest and penalties that may be imposed by PRC tax authorities on the income of foreign workers who performed services in the Shenzhen Factory;

amounts we may have to pay on behalf of the factory in the PRC as a result of employees litigation against the Factory; and

changes in securities analysts estimates of our performance, or our failure to meet analysts expectations.

Many of these factors are beyond our control. In addition, the stock markets in general, and the NASDAQ National Market in particular, have experienced extreme price and volume fluctuations recently. These fluctuations often have been unrelated or disproportionate to the operating performance of these companies. These broad market and industry factors may decrease the market price of our common stock, regardless of our actual operating performance. In the past, companies that have experienced volatility in the market prices of their stock have been the object of securities class action litigation. If we were the object of other securities class action litigation, it could result in substantial costs and a diversion of management s attention and resources, which could harm our business.

If we fail to maintain an effective system of internal controls, we may not be able to accurately or timely report our financial results or prevent fraud. As a result, current and potential shareholders could lose confidence in our financial reporting, which would harm our business and the trading price of our stock.

Effective internal controls are necessary for us to provide reliable financial reports and effectively prevent fraud. If we cannot provide reliable financial reports or prevent fraud, our operating results could be harmed. We have in the past discovered, and may in the future discover, areas of our internal controls that need improvement and we have devoted, and will in the future devote, resources to remediate and improve our internal controls. Although we believe that these efforts have strengthened our internal controls, we are continuing to work to improve our internal controls. We cannot be certain that these measures will ensure that we implement and maintain adequate controls over our financial processes and reporting in the future. Any failure to implement required new or improved controls, or difficulties encountered in their implementation, could harm our operating results or cause us to fail to meet our reporting obligations. Inferior internal controls could also cause investors to lose confidence in our reported financial information, which could have a negative effect on the trading price of our common stock.

Changes to financial accounting standards may affect our results of operations and cause us to change our business practices.

We prepare our financial statements to conform with generally accepted accounting principles, or GAAP, in the United States. These accounting principles are subject to interpretation by the American Institute of Certified Public Accountants, the Securities and Exchange Commission and various bodies formed to interpret and create appropriate accounting policies. A change in those policies can have a significant effect on our reported results and may affect our reporting of transactions completed before a change is announced. Changes to those rules or the questioning of current practices may adversely affect our reported financial results or the way we conduct our business. For example, accounting policies affecting many aspects of our business, including rules relating to employee stock option grants, have recently been revised or are under review. The Financial Accounting Standards Board and other agencies have finalized changes to U.S. generally accepted accounting principles that will require us, starting in our fiscal year 2007, to record a charge to earnings for employee stock option grants and other equity incentives. We may have significant and ongoing accounting charges resulting from option grant and other equity incentive expensing that could reduce our overall net income. In addition, since we historically have used equity-related compensation as a component of our total employee compensation program, the accounting change could make the use of equity-related compensation less attractive to us and therefore make it more difficult to

attract and retain employees.

Index to Financial Statements

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Currency Exchange Rate Fluctuations

Our sales are denominated primarily in US dollars while our cost of goods sold are generally incurred in US dollars, Hong Kong dollars and Renminbi, and our operating expenses are generally denominated in Renminbi, Hong Kong dollars, Singapore dollars, New Taiwanese dollars and US dollars. In addition, a substantial portion of our capital expenditures, primarily for the purchase of equipment, has been and is expected to continue to be denominated in US dollars, Renminbi, Japanese Yen and the Euro. Consequently, a portion of our costs and operating margins may be affected by fluctuations in exchange rates, primarily between the US dollar and other currencies. Our results of operations and financial condition could be adversely affected by fluctuations in currency exchange rates or the imposition of new or additional currency controls in the jurisdictions in which we operate. At March 31, 2005 and 2004, we had no outstanding foreign exchange contracts.

Many of our competitors are located in countries whose currencies devalued significantly against the US dollar beginning in the second half of 1997. As a result of such devaluation, these competitors products have become less expensive in US dollar terms. This reduction could result in our customers purchasing products from these competitors rather than from us, which would have a material and adverse effect on our net sales and results of operations.

As the Hong Kong dollar is officially pegged to the US dollar and the Renminbi is controlled by the PRC government such that it only trades within a limited range against the US dollar, unless there are significant changes in the policies of the Hong Kong and the PRC government, fluctuations in the exchange rates of the Hong Kong dollar and the Renminbi are not expected to have a significant impact on our results of operations.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

On September 7, 2004, the Audit Committee of the Company s Board of Directors approved a change in the Company s independent public accountants for the fiscal year ending March 31, 2005. The Board of Directors ratified the Audit Committee s dismissal of PricewaterhouseCoopers (PwC) and the selection of BDO McCabe Lo & Company (BDO McCabe) as the Company s independent public accountants for the fiscal year ended March 31, 2005.

The reports of PwC on the Company s consolidated financial statements for the fiscal years ended March 31, 2004 and March 31, 2003, did not contain an adverse opinion or disclaimer of opinion, nor were they qualified or modified as to uncertainty, audit scope or accounting principle.

During the fiscal years ended March 31, 2004 and March 31, 2003 and through September 7, 2004, there were no disagreements between the Company and PwC on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure which disagreements, if not resolved to PwC s satisfaction, would have caused it to make reference thereto in their reports on the financial statements for such years. In addition, during the fiscal years ended March 31, 2004 and March 31, 2003 and through September 7, 2004, there were no reportable events, as defined in Item 304(a)(1)(v) of Regulation S-K.

The Company has provided PwC with a copy of the foregoing disclosures and has requested that PwC provide a letter addressed to the Securities & Exchange Commission stating whether or not PwC agrees with the above statements. Attached as an exhibit hereto is the letter of PwC, received by the Company on October 6, 2004, relating to such disclosures.

During the fiscal years ended March 31, 2004 and March 31, 2003 and through September 7, 2004, the Company did not consult BDO McCabe with respect to the application of accounting principles to a specified transaction, either completed or proposed, or the type of audit opinion that might be rendered on the Company s consolidated financial statements, or any other matters or reportable events as set forth in Items 304(a)(2)(i) and (ii) of Regulation S-K.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures. We maintain disclosure controls and procedures, as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the Exchange Act), that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, management recognized that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Our disclosure controls and procedures have been designed to meet reasonable assurance standards. Additionally, in designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Based on their evaluation as of the end of the period covered by this Annual Report on Form 10-K, our Chief Executive Officer and Chief Financial Officer have concluded that, subject to the limitations noted above, our disclosure controls and procedures were effective to ensure that material information relating to us, including

Index to Financial Statements

our consolidated subsidiaries, is made known to them by others within those entities, particularly during the period in which this Annual Report was being prepared.

(b) *Changes in internal control over financial reporting*. There was no significant change in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) identified in connection with management s evaluation during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

As discussed in Management s Discussion and Analysis of Financial Condition and Results of Operations, in the third quarter of 2005, we discovered discrepancies in the computation and withholding of both taxes and social insurance contributions for workers at our main production facilities (the Factory), which are located in Shenzhen, the PRC and operated pursuant to a processing agreement with an unaffiliated PRC company that obligates it to provide all of the personnel for the operation of our facilities and to render assistance in dealing with matters relating to the import of raw materials and the export of our products. The discrepancy, which was at the Factory and not at Peak, was discovered as a result of a claim by an employee regarding the computation of wages and withholding. Upon discovery of these discrepancies, we conducted an internal review of the Factory s practices and engaged third party advisors to assist us in assessing the Factory s and our obligations with respect to these discrepancies. Upon completion of this review in the third quarter of fiscal 2005, management concluded that the Factory has a duty to correct certain of these discrepancies that amounted to a total of \$1.3 million. While we believe we are not contractually obligated under the terms of our agreement with our processing partner to pay these amounts and while no claim has been made by any government agency, in the event the Factory was required to pay all or any portion of these liabilities, it is likely that we would voluntarily make such payment in order to avoid the seizure of the Factory s assets and keep it operational. Therefore, we accrued \$1.3 million as additional manufacturing costs for the third fiscal quarter of 2005. As a result of the discovery of these discrepancies and our subsequent review, we were unable to timely file our quarterly report on Form 10-Q for the quarter ended December 31, 2004.

In addition, as a result of a general review of the Factory s controls and procedures, management noted additional areas for improvement in the Factory s internal controls. Although we have no responsibility for the Factory, management, with the oversight of the Audit Committee, has been addressing these issues at the Factory and is committed to effectively improve the internal controls at the Factory as expeditiously as possible. To address these issues:

the Factory is in the process of implementing a more integrated payroll system and new procedures to properly record the number of hours employees work at the Factory;

the Factory has instituted a formal cash management system, eliminated cash payments for material transactions and developed new expense approval procedures for the Factory;

we and the Factory are in the process of hiring additional qualified personnel for our operations in China and Hong Kong and the Factory, respectively. We have recently hired a new President and Chief Operating Officer, and are working to improve certain communications procedures between the Factory and our Hong Kong subsidiary;

we are instituting revised procedures and additional required approvals at the Factory for the release of Company assets at the Factory; and

we are reviewing and updating the current standard costs for our finished goods.

We will continue to evaluate and monitor the Factory s and our efforts to remediate known Factory s deficiencies and will take all appropriate action when and as necessary to ensure we have effective internal controls over financial reporting.

ITEM 9B. OTHER INFORMATION

The Company s 2005 Annual General Meeting of Shareholders will be held on August 31, 2005 at a time and place to be announced in the Company s notice and proxy statement to be sent to holders of the Company s stock as of the record date. The Company has set July 18, 2005 as the record date for determining the shareholders entitled to notice of and to vote at the 2005 Annual Meeting. The Company currently anticipates beginning to print and mail the notice and proxy statement for the 2004 Annual Meeting on or about July 20, 2005. The deadline for submission of a proposal by a shareholder to be included in the proxy statement is July 6, 2005. Such proposal must be submitted in accordance with the provisions of the Company s bye-laws.

35

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT.

The information required by Item 10 of Form 10-K with respect to directors and executive officers is incorporated herein by reference from the information contained in the sections entitled Directors and Executive Officers and Information about the Board of Directors and Committees of the Board in our definitive Proxy Statement for the 2005 Annual General Meeting of Shareholders scheduled to be held on August 31, 2005 (the Proxy Statement), which proxy statement will be filed with the Securities and Exchange Commission before July 29, 2005.

The information required by Item 405 of Regulation S-K with respect to disclosure of any known late filings or failure by an insider to file a report required by Section 16(a) of the Exchange Act is incorporated herein by reference from the information contained in the section entitled Section 16(a) Beneficial Ownership Reporting Compliance in the Proxy Statement.

Peak has adopted a code of ethics that applies to all Peak employees, including Peak s principal executive officer, its principal financial officer, its controller and persons performing similar functions. This code of ethics is available free of charge on the Peak public website (www.peakf.com) on the investor relations webpage. Future amendments or waivers relating from the provisions of the code of ethics to our Chief Executive Officer, Chief Financial Officer or Corporate Controller that requires disclosure under applicable SEC rules will be disclosed on the webpage referenced in this paragraph within five (5) business days following the date of such amendment or waiver.

We have a separately designated standing Audit Committee established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934. The members of the Audit Committee are Christine Russell, Douglas Broyles and Thomas Gimple. All of such members meet the independence standards established by The Nasdaq Stock Market for serving on an audit committee. SEC regulations require us to disclose whether a director qualifying as an audit committee financial expert serves on our Audit Committee. Our Board of Directors has determined that Christine Russell qualifies as an audit committee financial expert within the meaning of such regulations.

ITEM 11. EXECUTIVE COMPENSATION

The information required by Item 11 of Form 10-K is incorporated herein by reference from the information contained in the sections entitled Executive Compensation and Related Information and Information About the Board of Directors and Committees of the Board Compensation Committee Interlocks and Insider Participation in the Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by Item 12 of Form 10-K is incorporated herein by reference from the information contained in the sections entitled Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Board of Directors and Shareholders

Peak International Limited

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We have audited the accompanying consolidated balance sheet of Peak International Limited as of March 31, 2005 and the related consolidated statements of operations, shareholders—equity, and cash flows for the year then ended. These financial statements are the responsibility of the

Company s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting.

misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Peak International Limited at March 31, 2005, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

Peak International Limited:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, consolidated statements of shareholders equity and consolidated statements of cash flows present fairly, in all material respects, the financial position of Peak International Limited and its subsidiaries at March 31, 2004 and the results of its operations and its cash flows for each of the two years in the period ended March 31, 2004 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accountancy Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.
