Notes To Consolidated Financial Statements

1. **Accounting Policies:** The significant accounting policies followed by Cooperative Bankshares, Inc. (Bankshares) for interim financial reporting are consistent with the accounting policies followed for annual financial reporting. These unaudited consolidated financial statements have been prepared in accordance with Rule 10-01 of Regulation S-X, and, in management's opinion, all adjustments of a normal recurring nature necessary for a fair presentation have been included. The accompanying consolidated financial statements do not purport to contain all the necessary financial disclosures that might otherwise be necessary in the circumstances and should be read in conjunction with the consolidated financial statements and notes thereto in Bankshares' Annual Report on Form 10-K for the year ended December 31, 2006 (the Annual Report). The results of operations for the three and six-month period ended June 30, 2007 are not necessarily indicative of the results to be expected for the full year.

2. **Basis of Presentation:** The accompanying unaudited consolidated financial statements include the accounts and transactions of Bankshares, its wholly owned subsidiary, Cooperative Bank (the Bank), and the Bank's wholly owned subsidiaries, Lumina Mortgage Company, Inc. (Lumina) and CS&L Holdings, Inc. (Holdings), and Holdings' majority owned subsidiary, CS&L Real Estate Trust, Inc. (REIT). Bankshares, the Bank and the Bank's subsidiaries are collectively referred to as the Company. All significant intercompany transactions have been eliminated. Bankshares wholly owns Cooperative Bankshares Capital Trust I (the Trust), which is not consolidated in these financial statements due to the adoption of FASB Interpretation No. (FIN) 46, Consolidation of Variable Interest Entities. Holdings and REIT were liquidated effective June 30, 2006, with all of their assets and liabilities transferring to the Bank. The liquidation did not have a material impact on the Company's financial position or results of operations. The accompanying unaudited consolidated financial statements do not include the accounts and transactions of Bank of Jefferson, which Bankshares acquired July 2, 2007. For additional information relating to Bank of Jefferson, see Management Strategy in Management's Discussion and Analysis and Note 8 of the Notes to Consolidated Financial Statements .
 In September 2006, the Securities and Exchange Commission (the SEC) issued Staff Accounting Bulletin No. 108 (SAB 108), Considering the Effects of Prior Years Misstatements when Quantifying Misstatements in Current Year Financial Statements. SAB 108 was issued in order to eliminate the diversity of practice surrounding how public companies quantify financial statement misstatements. As disclosed in our 2006 Annual Report on Form 10-K filed with the SEC on March 15, 2007, we adopted SAB 108 during the quarter ended December 31, 2006 and elected to use the cumulative effect transition method in connection with the preparation of our financial statements. Data for 2006 has been restated to reflect the effect of the adjustments resulting from the adoption of SAB 108. For additional information regarding the adoption and effect of SAB 108, see Note 1 of Notes to Consolidated Financial Statements included in Bankshares' Annual Report on Form 10-K for the year ended December 31, 2006.

Certain items included in prior years' consolidated financial statements have been reclassified to conform to the current period presentation. These reclassifications have no effect on the net income or stockholders' equity as previously reported. These reclassifications are not related to the SAB 108 adjustments referenced in the aforementioned paragraph.

All information in the Notes to Consolidated Financial Statements has been presented in thousands, except percentage, time period, share and per share data.

3. **Earnings Per Share:** Basic earnings per share (basic EPS) is calculated by dividing net income by the weighted average number of common shares outstanding. Diluted earnings per share (diluted EPS) is calculated by dividing net income by the sum of the weighted average number of common shares outstanding and potential common stock. Potential common stock consists of additional common stock that would have been outstanding as a result of the exercise of dilutive stock options. In determining the number of shares of potential common stock, the treasury stock method was applied. This method assumes that the number of shares issuable upon exercise of the stock options is reduced by the number of common shares assumed purchased at market prices with the proceeds from the assumed exercise of the common stock options plus any tax benefits received as a result of the assumed exercise.

Table of Contents

The following table presents net income available to common stockholders and the average number of shares outstanding for the periods below:

	Three months ended		Six months ended	
	June 30, 2007	June 30, 2006	June 30, 2007	June 30, 2006
Net income	\$ 2,066	\$ 1,799	\$ 4,169	\$ 3,252
Shares for basic EPS	6,526,762	6,479,741	6,520,656	6,472,292
Dilutive effect of stock options	107,386	139,135	115,260	134,470
Shares for diluted EPS	6,634,148	6,618,876	6,635,916	6,606,762

For the three and six-month periods ended June 30, 2007 and 2006, there were no options outstanding that were antidilutive since the average market price exceeded the exercise price for all outstanding options.

4. **Comprehensive Income:** Comprehensive income includes net income and all other changes to the Company's equity, with the exception of transactions with shareholders (other comprehensive income). The Company's only components of other comprehensive income relate to unrealized gains and losses on available for sale securities.

The following table sets forth the components of other comprehensive income and total comprehensive income for the three and six months ended June 30, 2007 and 2006:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Net income	\$ 2,066	\$ 1,799	\$ 4,169	\$ 3,252
Other comprehensive loss:				
Unrealized loss on available for sale securities	(306)	(503)	(128)	(804)
Income tax benefit	119	194	51	310
Other comprehensive loss	(187)	(309)	(77)	(494)
Comprehensive income	\$ 1,879	\$ 1,490	\$ 4,092	\$ 2,758

5. **Stock-Based Compensation:** The Company has a Stock Option Plan in effect at June 30, 2007 and recognizes related costs in accordance with SFAS No. 123 (revised 2004), Share-Based Payment, (SFAS No. 123R). The Company has issued 5,000 options in 2007 for which \$6 of option related compensation cost has been charged against income for the six months ended June 30, 2007. Since all options outstanding as of December 31, 2005 were fully vested and no options were issued in 2006, no option related compensation cost was recognized for the six months ended June 30, 2006.

Table of Contents

The following table presents information related to the stock option plan as of June 30, 2007 and changes during the six-month period then ended:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at December 31, 2006	337,425	\$ 8.98		
Exercised	34,084	4.92		
Expired	3,000	9.75		
Granted	5,000	16.25		
Outstanding at June 30, 2007	305,341	\$ 9.54	5.59	\$ 2,131
Exerciseable at June 30, 2007	301,341	\$ 9.45	5.54	\$ 2,130

For the three months ended June 30, 2007 and 2006, the intrinsic value of options exercised was \$356 and \$570, respectively. For the six months ended June 30, 2007 and 2006, the intrinsic value of options exercised was \$391 and \$671, respectively.

6. **Recent Accounting Pronouncements:** Statement of Financial Accounting Standards No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159), permits entities to choose to measure many financial instruments and certain other items at fair value. The objective of this standard is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. This statement is effective for fiscal years beginning after November 15, 2007, with early adoption permitted under certain circumstances. The Company has chosen not to early adopt the provision of SFAS 159. The Company has evaluated this statement and does not believe it will have a material effect on the Company's consolidated financial statements.

From time to time, the Financial Accounting Standards Board (the FASB) issue exposure drafts of proposed statements of financial accounting standards. Such exposure drafts are subject to comment from the public, to revisions by the FASB and to final issuance by the FASB as statements of financial accounting standards. Management considers the effect of the proposed statements on the consolidated financial statements of the Company and monitors the status of changes to, and proposed effective dates of, exposure drafts.

7. **Income Taxes:** Effective January 1, 2007, the Company adopted Financial Accounting Standards Board Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109 (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in financial statements and requires the impact of a tax position to be recognized in the financial statements if that position is more likely than not of being sustained by the taxing authority. The adoption of FIN 48 did not have a material effect on our consolidated financial statements.

8. **Subsequent Event:** On July 2, 2007, the Company announced the completion of its acquisition of Bank of Jefferson pursuant to which Bankshares acquired the net assets of Bank of Jefferson in an all-cash transaction. The purchase price of the net assets was \$5.5 million. Bank of Jefferson is headquartered in Chesterfield County, South Carolina. With this acquisition, Bank of Jefferson became a wholly owned subsidiary of Bankshares.

Bankshares intends to merge Bank of Jefferson with Cooperative Bank, subject to regulatory approval. This merger is expected to be completed in the third quarter of 2007. At June 30, 2007, Bank of Jefferson had \$9.4 million of deposits and \$6.8 million in loans. The acquisition and merger of Bank of Jefferson is not expected to have a significant impact on Bankshares' Consolidated Statement of Operations. For further information on Bank of Jefferson, see Management Strategy in Management's Discussion and Analysis.

Table of Contents

Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations Forward-Looking Statements

This document, as well as other written communications made from time to time by Cooperative Bankshares, Inc. and subsidiaries and oral communications made from time to time by authorized officers of the Company, may contain statements relating to the future results of the Company (including certain projections, such as earnings projections, necessary tax provisions and business trends) that are considered forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995 (the "PSLRA"). Such forward-looking statements may be identified by the use of such words as intend, believe, expect, should, planned, estimated and potential. For these statements, the Company claims the protection of the safe harbor for forward-looking statements contained in the PSLRA. The Company's ability to predict future results is inherently uncertain and the Company cautions you that a number of important factors could cause actual results to differ materially from those currently anticipated in any forward-looking statement. These factors include among others; changes in market interest rates and general and regional economic conditions, changes in government regulations, changes in accounting principles and the quality or composition of the loan and investment portfolios. Additional factors that may affect our results are discussed under Item 1A. Risk Factors in the Company's Quarterly Reports on Form 10-Q and in its Annual Report on Form 10-K, each filed with the Securities and Exchange Commission (the "SEC"), which are available at the Securities and Exchange Commission's Internet website (www.sec.gov) and to which reference is hereby made. These factors should be considered in evaluating the forward-looking statements. Stockholders are cautioned not to place undue reliance on such statements, which speak only as of the date of those documents. All subsequent written and oral forward-looking statements attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements above. Except to the extent required by applicable law or regulation, the Company does not undertake any obligation to update any forward-looking statement to reflect circumstances or events that occur after the date the forward-looking statements are made.

General

Cooperative Bankshares, Inc. ("Bankshares") is a registered bank holding company incorporated in North Carolina in 1994. Bankshares is the parent company of Cooperative Bank (the "Bank"), a North Carolina chartered commercial bank. Cooperative Bank, headquartered in Wilmington, North Carolina, was chartered in 1898. As of June 30, 2007, the Bank provides financial services through 23 offices in Eastern North Carolina.

One of the Bank's subsidiaries, Lumina Mortgage Company, Inc. ("Lumina") is a mortgage banking firm originating and selling residential mortgage loans through two offices in North Carolina. Lumina closed its Charlotte, North Carolina office on March 30, 2007. The Bank liquidated its other subsidiary, CS&L Holdings, Inc. ("Holdings"), a holding company incorporated in Virginia for CS&L Real Estate Trust, Inc. (the "REIT"), a real estate investment trust, which was also liquidated. Holdings and REIT were liquidated effective June 30, 2006, with all of their assets and liabilities transferring to the Bank. Bankshares, the Bank and the Bank's subsidiaries are collectively referred to as the Company. The liquidation of Holdings and REIT did not have a material impact on the Company's financial position or results of operations.

With the acquisition of Bank of Jefferson on July 2, 2007, Bankshares extended its footprint into South Carolina. Bank of Jefferson provides financial services through one branch located in Chesterfield County, South Carolina.

Through its offices, the Bank provides a wide range of banking products, including interest-bearing and noninterest-bearing checking accounts, certificates of deposit, savings accounts and individual retirement accounts. It offers an array of loan products: overdraft protection, commercial, consumer, agricultural, real estate, residential mortgage and home equity loans. Also offered are safe deposit boxes and automated banking services through Online Banking, Bill Payment, ATMs and Access24 Phone Banking. In addition, the Bank's third party partnership with Seagate Wealth Management Group through UVEST Investment Services gives clients access to a wide array of financial and wealth management solutions, including services such as professional money management, retirement and education planning and investment products including stocks, bonds, mutual funds, annuities and insurance products.

Table of Contents

Mission Statement

It is the mission of the Company to provide the maximum in safety and security for our depositors, an equitable rate of return for our stockholders, and excellent service for our customers, and to do so while operating in a fiscally sound and conservative manner, with fair pricing of our products and services, good working conditions, outstanding training and opportunities for our staff, along with a high level of corporate citizenship.

Management Strategy

The Bank's lending activities have traditionally concentrated on the origination of loans for the purpose of constructing, financing or refinancing residential properties. In recent years the Bank has emphasized the origination of nonresidential real estate loans, equity lines of credit, and secured and unsecured consumer and business loans. As of June 30, 2007, \$610.2 million, or 76.8%, of the Bank's loan portfolio, which excludes loans held for sale, consisted of loans secured by residential properties as compared to \$557.3 million, or 73.0%, at December 31, 2006. The Bank originates adjustable rate and fixed rate loans. As of June 30, 2007, adjustable rate and fixed rate loans totaled 66.5% and 33.5%, respectively, of the Bank's total loan portfolio.

The Bank has chosen to sell a large percentage of its fixed rate mortgage loan originations in the secondary market and through brokered arrangements. This enables the Bank to invest these funds in commercial loans, while increasing fee income and reducing interest rate risk.

On July 2, 2007, the Company announced the completion of the acquisition of Bank of Jefferson in which Bankshares acquired the net assets of Bank of Jefferson in an all-cash transaction. Bank of Jefferson is headquartered in Chesterfield County, South Carolina. This acquisition provides the Company branching opportunities within attractive markets such as the Grand Strand area of South Carolina.

Interest Rate Sensitivity Analysis

Interest rate sensitivity refers to the change in interest spread resulting from changes in interest rates. To the extent that interest income and interest expense do not respond equally to changes in interest rates, or that all rates do not change uniformly, earnings will be affected. Interest rate sensitivity, at a point in time, can be examined using a static gap analysis that measures the match in balances subject to repricing between interest-earning assets and interest-bearing liabilities. Gap is considered positive when interest rate sensitive assets exceed interest rate sensitive liabilities. Gap is considered negative when interest rate sensitive liabilities exceed interest rate sensitive assets. At June 30, 2007, the Company had a one-year positive gap position of 6.93% compared to a positive gap position of 4.8% at December 31, 2006. During a period of rising interest rates, a positive gap would tend to result in an increase in net interest income, while a negative gap would tend to adversely affect net interest income. During a period of falling interest rates, a positive gap would tend to adversely affect net interest income, while a negative gap would tend to result in an increase in net interest income. It is important to note that certain shortcomings are inherent in static gap analysis. Although certain assets and liabilities may have similar maturities or periods of repricing, they may react in different degrees to changes in market interest rates. For example, a part of the Company's adjustable-rate mortgage loans have been indexed to the National Monthly Median Cost of Funds ratio for the Office of Thrift Supervision regulated institutions. This index is considered a lagging index that may lag behind changes in market rates. The one-year or less interest-bearing liabilities also include checking, savings and money market deposit accounts. Historically, the Company has experienced relatively modest repricing on these types of transaction accounts. Management takes this into consideration in determining acceptable levels of interest rate risk.

When Lumina enters into a rate lock commitment to a customer, there is a concurrent lock in for the loan with a secondary market investor under a best efforts delivery mechanism. Therefore, interest rate risk is mitigated because any commitment to fund a loan available for sale is concurrently hedged by a commitment from an investor to purchase the loan under the same terms. Loans originated by Lumina are usually sold within 60 days after closing.

Liquidity

The Company's goal is to maintain adequate liquidity to meet potential funding needs of loan and deposit customers, pay operating expenses and meet regulatory liquidity requirements. Maturing securities, principal

Table of Contents

repayments of loans and securities, proceeds from loan sales, growth in deposits, income from operations and borrowings are the main sources of liquidity. The Bank has been granted a line of credit by the Federal Home Loan Bank of Atlanta (FHLB) in an amount of up to 25% of the Bank's total assets. At June 30, 2007, the Bank's borrowed funds from the FHLB equaled 13.1% of its total assets. Scheduled loan repayments are a relatively predictable source of funds, unlike deposits and loan prepayments that are significantly influenced by general interest rates, economic conditions and competition. The Bank also made use of an additional \$9.5 million in brokered deposits obtained during the quarter ended June 30, 2007 as compared to \$24.8 million obtained during the quarter ended June 30, 2006. The increased use of brokered deposits primarily results from management's belief that these deposits were the best means to augment organic deposit origination to fund loan growth.

At June 30, 2007, the estimated market value of liquid assets (cash, cash equivalents, marketable securities and loans held for sale) was approximately \$66.0 million, which represents 8.0% of deposits and borrowed funds, compared to \$66.5 million, or 8.3% of deposits and borrowed funds, at December 31, 2006. The decrease in liquid assets was primarily due to a decrease in securities available for sale and loans held for sale, partially offset by an increase in cash.

The Bank's primary uses of liquidity are to fund loans and to purchase investments. Management considers current liquidity levels adequate to meet the Bank's cash flow requirements. However, if loan portfolio growth exceeds deposit origination growth as it has in the past, management may need to increase the bank's utilization of funding sources, such as an increased use of brokered deposits, additional borrowings or loan sales.

Off-Balance Sheet Arrangements and Contractual Commitments

At June 30, 2007, outstanding off-balance sheet commitments to extend credit totaled \$98.2 million, and the undisbursed portion of construction loans was \$97.5 million. The Company continued to be obligated to make future payments under contracts, such as debt and lease agreements, the amounts of which were consistent with the amounts at December 31, 2006 other than the decrease in borrowed funds of \$1.1 million and the increase in deposits of \$28.9 million at June 30, 2007. For further information on the Company's off-balance sheet arrangements and contractual commitments, see the discussion regarding deposits in Financial Condition at June 30, 2007 compared to December 31, 2006.

Capital

Stockholders' equity at June 30, 2007, was \$61.4 million, an increase of 6.5% from \$57.6 million at December 31, 2006. The improved capital position at June 30, 2007 reflects the impact of earnings retention after the declaration of cash dividends of \$654,000. Stockholders' equity at June 30, 2007 includes an unrealized loss net of tax of \$524,000, compared to an unrealized loss net of tax of \$447,000 at December 31, 2006, on securities available for sale marked to estimated fair market value.

Under the capital regulations of the Federal Deposit Insurance Corporation (FDIC), the Bank must satisfy minimum leverage ratio requirements and risk-based capital requirements. Banks supervised by the FDIC must maintain a minimum leverage ratio of core (Tier I) capital to average adjusted assets of at least 3% if a particular institution has the highest examination rating and at least 4% for all others. At June 30, 2007, the Bank's leverage capital ratio was 8.76%. The FDIC's risk-based capital rules require banks supervised by the FDIC to maintain risk-based capital to risk-weighted assets of at least 8.00%. Risk-based capital for the Bank is defined as Tier I capital plus the balance of the allowance for loan losses. At June 30, 2007, the Bank had a ratio of qualifying total capital to risk-weighted assets of 11.19%.

Bankshares, as a bank holding company, is also subject, on a consolidated basis, to the capital adequacy guidelines of the Board of Governors of the Federal Reserve (the Federal Reserve Board). The capital requirements of the Federal Reserve Board are similar to those of the FDIC governing the Bank.

At June 30, 2007 Bankshares exceeds all of its capital requirements. With the purchase of Bank of Jefferson, Bankshares may need to undertake capital raising measures in the future such as issuing additional junior subordinated debentures. If this is necessary, management does not believe this would materially alter current operations or strategies. In addition, if the Bank continues to grow at a pace similar to the growth experienced in recent years, Bankshares may need to undertake similar capital raising measures to supplement risk-based capital.

Table of Contents

On May 29, 2007, the Company's Board of Directors approved a quarterly cash dividend of \$.05 per share that was paid on July 17, 2007 to stockholders of record as of July 2, 2007. Any future payment of dividends is dependent on the financial condition and capital needs of the Company, requirements of regulatory agencies and economic conditions in the marketplace.

Critical Accounting Policies

The Company's most significant critical accounting policies are those that govern accounting for allowance for loan losses and goodwill. A critical accounting policy is one that is both very important to the portrayal of the Company's financial condition and results of operations and requires a difficult, subjective or complex judgment by management. What makes these judgments difficult, subjective and/or complex is the need to make estimates about the effects of matters that are inherently uncertain. For further information on the allowance for loan losses, see Critical Accounting Policies and Financial Condition in Management's Discussion and Analysis and Note 1 and Note 3 of Notes to Consolidated Financial Statements included in the Annual Report on Form 10-K filed with the SEC on March 15, 2007. For further information on goodwill, see Critical Accounting Policies in Management's Discussion and Analysis and Note 1 of Notes to Consolidated Financial Statements included in the Annual Report on Form 10-K filed with the SEC on March 15, 2007.

FINANCIAL CONDITION AT JUNE 30, 2007 COMPARED TO DECEMBER 31, 2006

The Company's total assets increased 3.7% to \$891.6 million at June 30, 2007, compared to \$860.1 million at December 31, 2006. Asset growth was primarily attributable to an increase of \$31.0 million, or 4.1%, in loans. Loan growth was funded primarily by increases in deposits of \$28.9 million or 4.4%. The increase in loans and deposits was primarily the result of continued loan and deposit growth attributable to the markets in which the Bank conducts its business, the Bank's expanded and improved branch network and the Bank's continued emphasis on increasing overall loan production. Deposit growth was also fostered by growth in the thirteen month certificate due to the Bank offering a competitive promotional rate on a reasonably short term deposit. In addition, the Bank increased brokered deposits by \$11.5 million. The majority of the loan growth occurred in construction and land development loans, which grew \$27.6 million, or 16.7%, to \$193.4 million from December 31, 2006, and one-to-four family residential loans, which grew \$12.3 million, or 3.4%, to \$378.1 million from December 31, 2006. Investment securities, both available for sale and held to maturity portfolios, decreased \$1.6 million, or 3.5%, from \$45.1 million to \$43.5 million as proceeds from the repayment of securities were used to increase cash and cash equivalents.

At June 30, 2007, the Bank's allowance for loan losses was \$8.4 million, or 1.06% of loans, compared to \$7.8 million, or 1.02% of loans, at December 31, 2006. The Company's nonperforming assets (nonaccrual loans, loans 90 days or more delinquent and foreclosed real estate) were \$2.2 million, or 0.24% of assets, at June 30, 2007, compared to \$1.9 million, or 0.23% of assets, at December 31, 2006. Foreclosed real estate decreased to \$574,000 at June 30, 2007, from \$653,000 at December 31, 2006, and is made up of one ocean front lot which must have mature vegetation on the lot's dunes before the property can be developed. The change in nonperforming assets was primarily the result of an increase in nonaccrual loans. The increase in the ratio of allowance for loan losses to loans was due to the softening of the economy and the concentration of loans secured by commercial real estate. At June 30, 2007, there was one customer relationship consisting of several loans which were delinquent but that are not included in nonperforming assets and are still accruing interest. These loans range from 62 to 66 days past due and had a total principal balance of \$4.3 million at June 30, 2007. This relationship is involved in a legal dispute between its partners. Given the value of the underlying collateral relative to the loan balances, the Company does not anticipate a loss on this relationship. Management considers the current level of the allowance to be appropriate based on loan composition, the current level of delinquencies and other nonperforming assets, overall economic conditions and other factors. The Company assumes an aggressive position in collecting delinquent loans and disposing of foreclosed assets to minimize balances of nonperforming assets and continues to evaluate the loan and real estate portfolios to provide loss reserves as considered necessary. For further information, see Comparison of Operating Results Provision and Reserve for Loan Losses.

Net premises and equipment increased \$1.4 million, or 13.2%, to \$11.8 million at June 30, 2007 compared to \$10.4 million at December 31, 2006. This increase is attributable primarily to purchases made relating to the opening of the Bank's Leland branch and the purchase of two adjoining lots in Whiteville, North Carolina, which may be used for a branch relocation. Other assets decreased \$251,000, or 1.5%, to \$15.9 million mostly due to the receipt of

Table of Contents

funds held by an exchange company used to purchase the Whiteville lots. Loans held for sale, which are funded by and collateralize a short-term borrowing at another financial institution, decreased \$1.1 million, or 24.6%, since December 31, 2006 to \$3.4 million at June 30, 2007.

Borrowed funds at June 30, 2007 decreased \$1.1 million, or 0.8%, since December 31, 2006, which matches the reduction in loans held for sale. Borrowings are collateralized with loans available for sale, the Bank's investment in FHLB stock and qualifying first mortgage loans.

Accrued expenses and other liabilities decreased \$536,000, or 14.6%, to \$3.1 million at June 30, 2007 compared to \$3.7 million at December 31, 2006. A deferred gain recognized and a reduction in accrued federal and state income taxes are the primary reasons for the decrease in accrued expenses and other liabilities during the six months ended June 30, 2007.

COMPARISON OF OPERATING RESULTS

Overview

The net income of the Company depends primarily upon net interest income. Net interest income is the difference between the interest earned on loans, the securities portfolios and interest-earning deposits offset by the cost of funds, consisting principally of the interest paid on deposits and borrowings. The Company's operations are materially affected by general economic conditions, the monetary and fiscal policies of the Federal government and the policies of regulatory authorities. Yields and costs have increased because of the actions taken by the Federal Reserve to increase interest rates during 2005 and the first six months of 2006. In addition, the cost of funds has increased due in part to increased competition for deposits in the markets in which the Bank conducts its business.

Net Income

Net income for the three and six-month period ended June 30, 2007 increased 14.8% to \$2.1 million, and 28.2% to \$4.2 million, respectively, as compared to the same periods last year. The following analysis of the Company's results of operations will explain the significant changes that had an effect on net income for the periods under review.

Interest Income

For the three-month period ended June 30, 2007, interest income increased 14.8% to \$15.9 million compared to \$13.9 million for the prior year period. The increase in interest income is primarily a result of the average balance of interest-earning assets increasing \$60.8 million, or 7.9%, and the average yield increasing 46 basis points to 7.65% for the June 2007 quarter compared to 7.19% for the same period a year ago. The increase in average interest earning assets is primarily the result of a \$59.7 million, or 8.3%, increase in the average balance of loans compared to the three-months ended June 30, 2006.

Interest income increased 19.7% to \$31.4 million for the six-month period ended June 30, 2007, as compared to the same period a year ago. The increase in interest income can be attributed to the average balance of interest-earning assets increasing 10.4% and the yield on average interest-earning assets increasing to 7.59% as compared to 7.00% for the same period a year ago. The increase in average interest earning assets is primarily the result of a \$78.5 million, or 11.3%, increase in the average balance of loans compared to the six-month period ended June 30, 2006. As discussed above, loan growth during these periods is primarily a result of the growth of the markets in which the Bank conducts its business, the Bank's expanded and improved branch network and the Bank's continued emphasis on increasing overall loan production. The increase in the average yields is primarily due to the rising interest rate environment.

Interest Expense

Interest expense increased \$2.0 million, or 29.5%, to \$8.7 million for the three-month period ended June 30, 2007, compared to \$6.7 million for the same period a year ago. This increase was caused by the combined effect of an 8.6% increase in the average balance of total interest-bearing liabilities and the average cost of interest-bearing liabilities increasing to 4.61% from 3.86% compared to the same period a year ago, which was primarily due to the rising interest rate environment and, to a lesser extent, the Bank's offering of promotional rates on certificates of

Table of Contents

deposit and the Bank's increased use of brokered deposits. The increase in interest-bearing liabilities is the result of a \$64.5 million, or 11.6%, increase in the average balance of deposits, partially offset by a \$4.6 million, or 3.3%, decrease in the average balance of borrowed funds.

In the six-month period ended June 30, 2007, interest expense increased 35.7% to \$17.0 million as compared to the same period a year ago. The average balance of interest-bearing liabilities increased 11.0% as compared to the same period a year ago. The average cost of interest-bearing liabilities increased to 4.53% as compared to 3.70% for the same period last year. The increase in interest-bearing liabilities is primarily the result of a \$75.6 million, or 13.9%, increase in the average balance of deposits, partially offset by a \$1.0 million, or 0.8%, decrease in the average balance of borrowed funds. The increase in the average balance of deposits for the three and six-month periods is primarily attributable to the growth of the markets in which the Bank conducts its business, the Bank's expanded and improved branch network and the Bank's use of brokered deposits. Brokered deposits increased by \$9.5 million and \$11.5 million during the three-month period and six-month period ended June 30, 2007, respectively.

Net Interest Income

Net interest income for the three and six-month periods ended June 30, 2007 increased 1.0% and 5.2% to \$7.3 million and \$14.4 million, respectively, compared to the same period a year ago. The Average Yield/Cost Analysis tables analyze the interest-earning assets and interest-bearing liabilities for the three and six months ended June 30, 2007. As stated earlier, the increases in the average yield were primarily the result of increases in market interest rates. The interest rate spread for the three and six-month periods ended June 30, 2007 was 3.04% and 3.06%, respectively, compared to 3.33% and 3.30% for the same periods a year ago. The decrease in interest rate spread for the three-month period was primarily caused by the average cost of interest-bearing liabilities going up 29 basis points more than the average yield on interest-earning assets. The decrease in interest rate spread for the six-month period was primarily caused by the average cost of interest-bearing liabilities going up 24 basis points more than the average yield on interest-earning assets. This can primarily be attributed to the need of the Bank to generate liquidity in order to fund loan growth by paying higher rates of return on our deposit accounts in order to attract new deposits and retain existing deposit accounts. The net yield on interest-earning assets for the three and six months ended June 30, 2007 was 3.48% and 3.49%, respectively, compared to 3.72% and 3.66% for the same periods a year earlier. See Interest Income, Interest Expense and the Average Yield/Cost Analysis tables for further information on interest income and interest expense.

Table of Contents**Average Yield/Cost Analysis**

The following tables contain information relating to the Company's average balance sheet and reflect the average yield on interest-earning assets and average cost of interest-bearing liabilities for the periods indicated. Such annualized yields and costs are derived by dividing income or expense by the average balances of assets or liabilities, respectively, for the periods presented. The average loan portfolio balances include nonaccrual loans.

Table of Contents

Provision and Reserve for Loan Losses

During the six-month period ended June 30, 2007, the Bank had net charge-offs against the allowance for loan losses of \$69,000 compared to \$790,000 for the same period in 2006. This decrease was primarily the result of one charge-off in 2006 in the amount of \$750,000 caused by an impairment to collateral due to hurricane damage. The Bank added \$650,000 to the allowance for loan losses for the current six-month period compared to \$1.4 million for the same period last year, increasing the balance to \$8.4 million at June 30, 2007. The provision was added due to overall growth of the loan portfolio, the softening of the economy, and the concentration of loans secured by commercial real estate. The decrease in the provision for loan losses for the six months ended June 30, 2007 compared to the same period a year earlier was caused by slower loan growth during the 2007 period compared to the 2006 period. The Company's nonperforming assets (nonaccrual loans, loans 90 days or more delinquent and foreclosed real estate) were \$2.2 million, or 0.24% of assets, at June 30, 2007, compared to \$1.9 million, or 0.23% of assets, at December 31, 2006. The increase in nonperforming assets during the first six months of 2007 was a result of an increase in nonaccrual loans, which consists of one customer relationship.

During the three-month period ended June 30, 2007, the Bank had net charge-offs against the allowance for loan losses of \$68,000 compared to \$788,000 for the same period in 2006. The Bank added \$350,000 to the allowance for loan losses for the current three-month period compared to \$775,000 for the same period last year. The reasons for the changes in the three-month period are the same as stated above for the six-month period.

Management considers the current level of the allowance to be appropriate based on loan composition, the current level and types of delinquencies and other nonperforming assets, historical charge-off patterns, overall economic conditions and other factors. Future increases to the allowance may be necessary due to changes in loan composition or loan volume, changes in economic or market area conditions and other factors. Additionally, various regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses. Such agencies may require the recognition of adjustments to the allowance for loan losses based on their judgments of information available to them at the time of their examination.

Noninterest Income

Noninterest income increased by 3.9% to \$2.6 million for the six-month period ended June 30, 2007, compared to \$2.5 million for the same period a year ago. Gain on disposal of premises and equipment increased \$272,000 due to a gain of \$275,000 recognized on the sale of an unoccupied former branch building in February 2007. There was no similar gain recognized in the 2006 period. Deposit-related fees increased \$40,000 during the six months ended June 30, 2007 compared to the six months ended June 30, 2006. The change in deposit-related fees was primarily due to increases in ATM fees due to increases in new deposit accounts and the opening of a new branch with an ATM. Gain on sale of loans and service charges and fees on loans decreased \$110,000 and \$87,000, respectively, primarily as a result of a decrease in mortgage banking activities. Other income decreased \$13,000 primarily due to the change in commissions received for annuity sales and mutual funds sold through UVEST Investment Services. Earnings on bank owned life insurance remained relatively constant during the six-months ended June 30, 2007 compared to the same period a year earlier.

In the three-month period ended June 30, 2007, noninterest income decreased 9.2% to \$1.2 million as compared to the same period last year. The majority of this decrease was due to the gain on sale of loans and service charges and fees on loans decreasing \$63,000 and \$55,000, respectively, primarily caused by a decrease in mortgage banking activities. Other income decreased \$14,000 primarily due to the change in commissions received for annuity sales and mutual funds sold through UVEST Investment Services. Deposit-related fees increased \$16,000 primarily due to increases in ATM fees due to increases in new deposit accounts and the opening of a new branch with an ATM. Loss on disposal of premises and equipment and earnings on bank-owned life insurance remained relatively constant during the three-month period.

Noninterest Expense

For the six-month period ended June 30, 2007, noninterest expense increased 1.4% to \$9.8 million compared to the same period last year. Most of the increase in noninterest expense can be attributed to compensation and fringe benefits increasing \$199,000, or 3.4%, due to increases in costs of benefits, increased staffing levels, opening a new branch and normal increases in salaries. Occupancy and equipment increased \$40,000 and advertising increased

Table of Contents

\$22,000 due to normal increases and the opening of the Leland branch in April 2007. Other expenses decreased \$117,000 mostly due to a reduction in franchise taxes due to the dissolution of the REIT and a reduction in bank service charges due to the Bank now handling ACH transactions in house. Professional and exam fees remained relatively constant during the six-month period.

In the three-month period ended June 30, 2007, noninterest expense increased 1.5% to \$4.9 million compared to the same period last year. Compensation and fringe benefits, occupancy and equipment and advertising increased \$88,000, \$22,000 and \$12,000, respectively. Other expenses decreased \$33,000. Professional and examination fees decreased \$17,000 during the three-month period ended June 30, 2007 compared to the same period in the prior year due to additional costs associated with the dissolution of Holdings and REIT. The reasons for the remaining changes in the three-month period are the same as stated above for the six-month period.

Income Taxes

The effective tax rate for the six-month periods ended June 30, 2007 and 2006 was 36.5% and 37.3% respectively. The effective tax rate for the three-month periods ended June 30, 2007 and 2006 was 36.8% and 39.4%. The Company accrued at a higher tax rate in 2006 because the Company was undergoing a state tax audit and the State of North Carolina's announced treatment regarding dividends received from entities such as the real estate investment trust controlled by the Company. For further information on income taxes see Income Taxes in Management's Discussion and Analysis and Note 10 of Notes to Consolidated Financial Statements included in the Annual Report.

Item 3 Quantitative and Qualitative Disclosures About Market Risk

The Company's primary market risk is interest rate risk. Interest rate risk is the result of differing maturities or repricing intervals of interest-earning assets and interest-bearing liabilities and the fact that rates on these financial instruments do not change uniformly. These conditions may impact the earnings generated by the Company's interest-earning assets or the cost of its interest-bearing liabilities, thus directly impacting the Company's overall earnings. The Company's management actively monitors and manages interest rate risk. One way this is accomplished is through the development of, and adherence to, the Company's asset/liability policy. This policy sets forth management's strategy for matching the risk characteristics of the Company's interest-earning assets and interest-bearing liabilities so as to mitigate the effect of changes in the rate environment. The Company's market risk profile has not changed materially since December 31, 2006.

Item 4 Controls and Procedures

The Company's management, including the Company's principal executive officer and principal financial officer, has evaluated the effectiveness of the Company's disclosure controls and procedures, as such term is defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act). Based upon their evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective for the purpose of ensuring that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the SEC (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. In addition, based on that evaluation, no change in the Company's internal control over financial reporting occurred during the quarter ended June 30, 2007 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1 Legal Proceedings

Not applicable

Table of Contents**Item 1a Risk Factors**

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2006, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Item 2 Unregistered Sales of Equity Securities and Use of Proceeds

The Company did not purchase any shares of its common stock during the three months ended June 30, 2007.

Item 3 Defaults Upon Senior Securities

Not applicable
