UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

x **Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934**
For the quarterly period ended September 30, 2009

or

.. **Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934**
Commission File Number: 001-16715

First Citizens BancShares, Inc.

(Exact name of Registrant as specified in its charter)

Edgar Filing: FIRST CITIZENS BANCSHARES INC /DE/ - Form 10-Q

Delaware
(State or other jurisdiction of
incorporation or organization)

56-1528994
(I.R.S. Employer
Identification Number)

4300 Six Forks Road, Raleigh, North Carolina
(Address of principle executive offices)

27609
(Zip code)

(919) 716-7000
(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding twelve months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past ninety days. Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or such shorter period that the Registrant was required to submit and post such files) Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "accelerated filer" and "large accelerated filer" in Rule 12b-2 of the Exchange Act:

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Class A Common Stock \$1 Par Value 8,756,778 shares

Class B Common Stock \$1 Par Value 1,677,675 shares

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts)

Note A

Accounting Policies and Other Matters

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information. Accordingly, they do not include all of the information and notes required by accounting principles generally accepted in the United States of America for complete financial statements.

In the opinion of management, the consolidated financial statements contain all material adjustments necessary to present fairly the financial position of First Citizens BancShares, Inc. as of and for each of the periods presented, and all such adjustments are of a normal recurring nature. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates.

These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes included in the 2008 First Citizens BancShares, Inc. Form 10-K. Certain amounts for prior periods have been reclassified to conform with statement presentations for 2009. However, the reclassifications have no effect on shareholders' equity or net income as previously reported.

Acquisitions

Accounting principles generally accepted in the United States (US GAAP), requires that the acquisition method of accounting, formerly referred to as purchase method, be used for all business combinations and that an acquirer be identified for each business combination. Under US GAAP, the acquirer is the entity that obtains control of one or more businesses in the business combination, and the acquisition date is the date the acquirer achieves control. US GAAP requires that the acquirer recognize the fair value of assets acquired, liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date. In addition, acquisition-related costs and restructuring costs are recognized as period expenses as incurred.

BancShares' wholly-owned subsidiary First-Citizens Bank & Trust Company (FCB) acquired Temecula Valley Bank (TVB) headquartered in Temecula, California on July 17, 2009 and Venture Bank (VB) headquartered in Lacey, Washington on September 11, 2009. The acquisitions of TVB and VB were completed with the assistance of the Federal Deposit Insurance Corporation (FDIC), which had been appointed Receiver of each entity by its respective state banking authority immediately prior to FCB's acquisition. The acquired assets and assumed liabilities of TVB and VB were measured at estimated fair value. Management made significant estimates and exercised significant judgment in accounting for the acquisitions of TVB and VB. Management judgmentally assigned risk ratings to loans based on appraisals and estimated collateral values, expected cash flows, and statistically derived loss factors to measure fair values for loans. Other real estate acquired through foreclosure was valued based upon pending sales contracts and appraised values, adjusted for current market conditions. TVB's servicing asset related to its servicing of SBA loans sold was recorded at its estimated fair value based on an independent valuation. FCB also recorded an identifiable intangible asset representing the estimated value of the core deposits at TVB and VB. Management used quoted or current market prices to determine the fair value of investment securities, short term borrowings and long-term obligations that were assumed from TVB and VB.

Loans and Leases

Loans and leases that are held for investment purposes are carried at the principal amount outstanding. Loans that are classified as held for sale are carried at the lower of aggregate cost or fair value. Interest on substantially all loans is accrued and credited to interest income on a constant yield basis based upon the daily principal amount outstanding.

Acquired loans are recorded at fair value at the date of acquisition. The fair values of loans with evidence of credit deterioration (impaired loans) are recorded net of a non-accretable difference and, if appropriate, an accretable yield. The difference between contractually required payments at acquisition and the cash flows expected to be collected at acquisition is the nonaccretable difference, which is included in the carrying amount of acquired loans. Subsequent decreases to the expected cash flows will generally result in a provision for credit losses. Subsequent increases in cash flows result in a reversal of the provision for credit losses to the extent of prior charges, or a reclassification of the difference from nonaccretable to accretable with a positive impact on the accretable yield. Any excess of cash flows expected at acquisition over the estimated

Edgar Filing: FIRST CITIZENS BANCSHARES INC /DE/ - Form 10-Q

fair value is referred to as the accretable yield and is recognized in interest income over the remaining life of the loan when there is a reasonable expectation about the amount and timing of such cash flows. BancShares was unable to make such an estimate for acquired impaired loans.

Table of Contents

Notes to Consolidated Financial Statements (Continued)

(Dollars in thousands, except per share amounts)

Receivable from FDIC for Loss Sharing Agreements

Under loss sharing agreements with the FDIC, FCB recorded a receivable from the FDIC equal to 80 percent of the estimated losses in the covered loans and other real estate acquired from TVB and VB. The receivable was recorded at the present value of the estimated cash flows at the date of the respective acquisition and will be reviewed and updated prospectively as loss estimates related to covered loans and other real estate acquired through foreclosure change.

Other Real Estate Owned Covered under Loss Sharing Agreements

Other real estate acquired through foreclosure covered under loss sharing agreements with the FDIC is reported exclusive of expected reimbursement cash flows from the FDIC. Subsequent adjustments to the estimated recoverable value of covered other real estate result in a reduction of covered other real estate, and a charge to other expense, and an increase in the FDIC receivable for the estimated amount to be reimbursed, with a corresponding amount recorded as other income.

Servicing Asset

Other assets includes an estimate of the fair value of servicing rights on SBA loans that had been originated and subsequently sold by TVB. The asset value is updated each quarter based on valuations performed by an independent third party. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the cost to service, the discount rate, prepayment speeds, and other factors typical in such a valuation. SBA loan originations have been discontinued.

Recently Adopted Accounting Policies and Other Regulatory Issues

Various changes to US GAAP became effective during 2009. Except for the changes related to business combinations, none of these changes, which are summarized below, had a material impact on our financial condition, results of operations or liquidity.

Beginning January 1, 2009, changes to accounting for business combinations became effective. The new guidance established the acquisition method of accounting for all business combinations and required that an acquirer be identified for each business combination. The acquirer is required to recognize the fair value of assets acquired, liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date. The fair value established for loans includes any estimated losses; therefore, no allowance for loan losses is established at acquisition. The new guidance required that acquisition-related costs and restructuring costs be recognized as period expenses as incurred.

On January 1, 2009, enhanced disclosure requirements related to derivative financial instruments became effective. Subsequent to adoption, financial statements should explain why derivative instruments are used, how derivative instruments and related hedged items are accounted for under US GAAP and how derivative instruments and related hedged items affect the balance sheet, income statement and statement of cash flows.

Beginning June 30, 2009, entities were required to provide fair value disclosures about financial instruments in interim financial statements as well as disclosures about estimation methods and disclosure of changes in method from prior periods.

Beginning June 30, 2009, entities were required to adopt new guidelines to evaluate other than temporary impairment (OTTI) for debt securities. The new guidance for OTTI requires an entity to record an OTTI charge if it intends to sell a debt

Edgar Filing: FIRST CITIZENS BANCSHARES INC /DE/ - Form 10-Q

instrument or if it can not assert it is more likely than not that it will not have to sell the security before recovery. If the entity does not intend to sell the security but does not expect to recover the amortized cost basis, the amount of the impairment that results from issuer credit will be reported in earnings and the remaining impairment related to liquidity will be reflected in other comprehensive income.

Beginning June 30, 2009, when providing fair value disclosures, entities must consider various factors to determine whether there has been a significant decrease in the volume and level of activity compared to normal market activity and to consider whether an observed transaction was not orderly based on the weight of available evidence.

Companies must consider events that occur after the balance sheet date but before the financial statements are issued or are available to be issued. For the financial statements and footnotes included in this Form 10-Q, subsequent events occurring prior to November 9, 2009 have been considered.

Under revisions to US GAAP that will become effective during 2010, the concept of a qualifying special-purpose entity (QSPE) is removed, resulting in a change in the accounting for QSPEs that were previously exempt. Further, proposed changes will require evaluation of variable interests to determine whether a controlling financial interest exists. Once adopted, the off balance sheet accounting treatment for the 2005 asset securitization of home equity loans will be discontinued, and the loans will be included on the consolidated balance sheet. The securitized loans totaled \$98,940 as of September 30, 2009. BancShares continues to evaluate the impact of this accounting change on the acquired entities.

Table of Contents**Notes to Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)****Note B****Federally Assisted Acquisitions of Temecula Valley Bank and Venture Bank**

On July 17, 2009, FCB purchased substantially all the assets and assumed substantially all the liabilities of TVB from the FDIC, as Receiver of TVB. TVB operated eleven commercial banking branches primarily within the San Diego, CA area and the Temecula Valley area east of San Diego. The FDIC took TVB under receivership upon its closure by the California Department of Financial Institutions. FCB's bid to purchase TVB included the purchase of substantially all TVB's assets at a discount of \$135,000 in exchange for assuming certain TVB deposits and certain other liabilities. No cash, deposit premium or other consideration was paid by FCB. FCB and the FDIC entered into loss sharing agreements regarding future losses incurred on loans and other real estate acquired through foreclosure existing at the acquisition date. Under the terms of the loss sharing agreements, there is no reimbursement by the FDIC until net losses reach \$193,262. The FDIC will reimburse FCB for 80 percent of net losses incurred between \$193,262 and \$464,000, and 95 percent of net losses exceeding \$464,000. The term for loss sharing on residential real estate loans is ten years, while the term for loss sharing on non-residential real estate loans is five years in respect to losses and eight years in respect to loss recoveries. As a result of the loss sharing agreements with the FDIC, FCB recorded a receivable of \$103,558 at the time of acquisition. FCB has identified \$31,714 in net losses to submit to the FDIC under such loss-sharing agreements during the period from the acquisition date through September 30, 2009.

On September 11, 2009, FCB purchased substantially all the assets and assumed substantially all the liabilities of VB from the FDIC, as Receiver of VB. VB operated 18 commercial banking branches in the Seattle/Olympia, Washington vicinity. The FDIC took VB under receivership upon its closure by the Washington Department of Financial Institutions. FCB's bid to purchase VB included the purchase of substantially all VB's assets at a discount of \$110,000 in exchange for assuming certain VB deposits and certain other liabilities. The FDIC paid FCB \$19,406 in additional cash consideration at closing. FCB and the FDIC entered into loss sharing agreements regarding future losses incurred on loans and other real estate acquired through foreclosure existing at the acquisition date. Under the terms of the loss sharing agreements, the FDIC will reimburse FCB for 80 percent of net losses incurred up to \$235,000, and 95 percent of net losses exceeding \$235,000. The term for loss sharing on residential real estate loans is ten years, while the term for loss sharing on non-residential real estate loans is five years in respect to losses and eight years in respect to loss recoveries. As a result of the loss sharing agreements with the FDIC, FCB recorded a receivable of \$138,963 at the time of acquisition. The initial reports of losses under the VB loss sharing agreements are not due until the first quarter of 2010. However, FCB has identified \$8,407 in net losses incurred between the acquisition date and September 30, 2009 that will be included in the report that will be filed during the first quarter of 2010.

The acquisitions of TVB and VB were accounted for under the acquisition method of accounting. The statement of net assets acquired and the resulting bargain purchase gains are presented in the following tables. As explained in the explanatory notes that accompany the following tables, the purchased assets, assumed liabilities and identifiable intangible assets were recorded at their respective acquisition date fair values. Fair values are preliminary and subject to refinement for up to one year after the closing date of each merger as additional information regarding the closing date fair values becomes available.

Noninterest income includes a bargain purchase gain of \$104,970 that resulted from the acquisitions. The amount of the gain is equal to the excess of the fair value of the recorded assets over the fair value of liabilities assumed.

Explanation of fair value adjustments

a - Adjustment reflects the fair value adjustments based on FCB's evaluation of the acquired loan portfolio.

b - Adjustment reflects the estimated OREO losses based on FCB's evaluation of the acquired OREO portfolio.

c - Adjustment reflects the estimated fair value of payments FCB will receive from the FDIC under the loss sharing agreements.

d - Adjustment reflects amount needed to adjust the carrying value of other assets to estimated fair value.

e - Adjustment arises since the rates on short-term borrowings are higher than rates available on similar borrowings as of the acquisition date.

f - Adjustment arises since the rates on long-term obligations are higher than rates available on similar borrowings as of the acquisition date.

Edgar Filing: FIRST CITIZENS BANCSHARES INC /DE/ - Form 10-Q

g - Adjustment reflects amount needed to adjust the carrying value of other liabilities to estimated fair value.

Results of operations for TVB and VB prior to their respective acquisition dates are not included in the income statement. The post-acquisition operations of TVB and VB did not have a significant impact on the results of operations of BancShares for the three and nine month periods ended September 30, 2009, except for the gain recognized on the transactions.

Due to the significant amount of fair value adjustments, the resulting accretion of those fair value adjustments and the protection resulting from the FDIC loss sharing agreements, historical results of TVB and VB are not relevant to BancShares' results of operations. Therefore, no pro forma information is presented.

Investments in corporate bonds represent debt securities that were issued by various financial institutions under the Temporary Liquidity Guarantee Program. These debt obligations were issued with the full faith and credit of the United States of America. The guarantee for these securities is triggered when an issuer defaults on a scheduled payment.

Table of Contents**Notes to Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)**

Investment securities with an aggregate fair value of \$1,858 have had continuous unrealized losses for more than twelve months as of September 30, 2009 with an aggregate unrealized loss of \$99. These 48 investments include residential mortgage-backed and state, county and municipal securities. None of the unrealized losses identified as of September 30, 2009 related to the marketability of the securities or the issuer's ability to honor redemption obligations. Consequently, the securities were not deemed to be other than temporarily impaired.

At September 30, 2009, there was no intent to sell any of the securities classified as available for sale. Furthermore, it is not more likely than not that BancShares will have to sell any such securities before a recovery of the carrying value. With respect to investment securities held to maturity, BancShares has the ability and intent to hold those securities until they mature.

At September 30, 2009, other assets includes \$57,443 of stock in various Federal Home Loan Banks (FHLB) compared to \$45,797 at December 31, 2008 and \$40,179 at September 30, 2008. The FHLB stock, which is redeemable only through the issuer, is carried at its par value. The investment in the FHLB stock is considered a long-term investment, and its value is based on the ultimate recoverability of par value. Management has concluded that the investment in FHLB stock was not other-than-temporarily impaired as of September 30, 2009.

For each period presented, securities gains (losses) include the following:

	Nine months ended September 30,	
	2009	2008
Gross gains on sales of investment securities available for sale	\$ 104	\$ 8,389
Other than temporary impairment loss on an equity investment	(420)	
Total securities gains (losses)	\$ (316)	\$ 8,389

During 2009, BancShares recorded a \$420 other than temporary impairment loss on an equity security once it was determined that recovery of the original purchase price was unlikely. During 2008, following the completion of Visa Inc.'s initial public offering, FCB's former member-bank investment was converted into 486,905 shares of Class B common stock. Immediately thereafter, 188,238 shares of Visa Inc. Class B common stock were redeemed resulting in a gain of \$8,051. The remaining 298,667 shares of Class B common stock are restricted and are carried at a fair value of \$0.

Investment securities having an aggregate carrying value of \$1,998,230 at September 30, 2009 and \$2,027,592 at September 30, 2008, were pledged as collateral to secure public funds on deposit, to secure certain short-term borrowings and for other purposes as required by law.

--	-----------	--------------	--------------

Loans covered under loss sharing agreements with the FDIC (Covered Loans) are reported in loans exclusive of the expected reimbursement from the FDIC. Covered Loans are initially recorded at fair value at the acquisition date. Prospective losses incurred on Covered Loans are eligible for partial reimbursement by the FDIC once any first loss tranches have been satisfied. Subsequent decreases in the amount expected to be collected result in a provision for credit losses, an increase in the allowance for loan and lease losses, and a proportional adjustment to the FDIC receivable for the estimated amount to be reimbursed. Subsequent increases in the amount expected to be collected result in the reversal of any previously-recorded provision for credit losses and related allowance for loan and lease losses and adjustments to the FDIC receivable, or prospective adjustment to the accretable yield if no provision for credit losses had been recorded. Interest is accrued daily on the outstanding principal balances. Accretable yields related to certain fair value adjustments are accreted into income over the estimated lives of the loans on a level yield basis.

Table of Contents**Notes to Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)**

Covered Loans which are more than 90 days past due with respect to interest or principal, unless they are well secured and in the process of collection, and other covered loans on which full recovery of principal or interest is in doubt, are placed on nonaccrual status. Interest previously accrued on Covered Loans placed on nonaccrual status is charged against interest income, and the FDIC receivable would be adjusted by the amount of any estimated reimbursement. Payments received are applied against the principal balance of the loans until such time as full collection of the remaining recorded balance is expected. Additional interest payments received after that time are recorded as interest income on a cash basis.

When the fair values of Covered Loans were established, certain loans were identified as impaired due to the credit grade assigned to the acquired loan or other objective criteria. The designation of impaired or nonimpaired affects the ability to accrete discounts or amortize premiums into earnings over the loan's life. Due to uncertainty regarding the timing of future cash flows, no accretible yield is recorded for loans that are deemed to be impaired at acquisition.

Contractual loan payments receivable, estimates of amounts not expected to be collected, other fair value adjustments and the resulting fair values of acquired impaired loans and acquired nonimpaired loans as of the acquisition dates are provided in the following table:

Impaired loans:	
Contractual principal payments receivable	\$ 297,077
Non-accretable estimate of contractual principal payments not expected to be collected	202,591
Carrying value	\$ 94,486
Nonimpaired loans:	
Contractual principal payments receivable	\$ 1,566,084
Fair value discount on loans	348,322
Carrying value	\$ 1,217,762

The following table documents changes in the carrying value of acquired impaired loans during the quarter ended September 30, 2009:

Balance, June 30, 2009	\$
Fair value of acquired impaired loans covered under loss sharing agreements	94,486
Reductions since acquisition date resulting from repayments, write-offs and foreclosures	(11,044)
Balance, September 30, 2009	\$ 83,442

The following table provides information on impaired loans, exclusive of those loans evaluated collectively as a homogeneous group. For each period presented, all impaired loans were classified as nonaccrual.

	September 30, 2009	December 31, 2008	September 30, 2008
Impaired loans:

Allowances related to impaired loans	\$	4,873	\$	6,747	\$ 5,550
Non-covered impaired loans with no allowances		9,331			

Table of Contents**Notes to Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)****Note E****Fair Value Disclosures**

Fair value estimates are made at a specific point in time based on relevant market information and information about each financial instrument. Where information regarding the fair value of a financial instrument is available, those values are used, as is the case with investment securities, residential mortgage loans and certain long-term obligations. In these cases, an open market exists in which those financial instruments are actively traded.

Because no market exists for many financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates. For these financial instruments with a fixed interest rate, an analysis of the related cash flows was the basis for estimating fair values. The expected cash flows were then discounted to the valuation date using an appropriate discount rate. The discount rates used represent the rates under which similar transactions would be currently negotiated. For September 30, 2009, the fair value for loans, net of allowance for loan and lease losses included an adjustment of approximately 5 percent of gross loans to reflect the unfavorable liquidity conditions that existed in various financial markets. Generally, the fair value of variable rate financial instruments equals the book value.

	September 30, 2009		December 31, 2008		September 30, 2008	
	Carrying Value	Fair Value	Carrying Value	Fair Value	Carrying Value	Fair Value

Accrued interest payable	42,524	42,524	50,923	50,923	42,055	42,055

For off-balance sheet commitments and contingencies, carrying amounts are reasonable estimates of the fair values for such financial instruments. Carrying amounts include unamortized fee income and, in some cases, reserves for any credit losses from those financial instruments. These amounts are not material to BancShares' financial position.

Fair value represents the price that would be received to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities, BancShares considers the principal or most advantageous market in which those assets or liabilities are sold and considers assumptions that market participants would use when pricing those assets or liabilities. As required under US GAAP, individual fair value estimates are ranked based on the relative reliability of the inputs used in the valuation. Fair values determined using level 1 inputs rely on active and observable markets to price identical assets or liabilities. In situations where identical assets and liabilities are not traded in active markets, fair values may be determined based on level 2 inputs, which exist when observable data exists for similar assets and liabilities. Fair values for assets and liabilities that are not actively traded in observable

markets are based on level 3 inputs, which are considered to be unobservable.

Among BancShares' assets and liabilities, investment securities available for sale and interest rate swaps accounted for as cash flow hedges are reported at their fair values on a recurring basis. Certain other assets are adjusted to their fair value on a nonrecurring basis, including loans held for sale, which are carried at the lower of cost or market. Impaired loans, other real estate, goodwill and other intangible assets are periodically tested for impairment. Loans held for investment, deposits, short-term borrowings and long-term obligations are not reported at fair value. BancShares did not elect to voluntarily report any assets or liabilities at fair value.

Table of Contents**Notes to Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)**

For assets and liabilities carried at fair value on a recurring basis, the following table provides fair value information as of September 30, 2009:

Description	Fair value	Fair value measurements using:		
		Quoted prices in active markets for identical assets and liabilities (Level 1 inputs)	Quoted prices for similar assets and liabilities (Level 2 inputs)	Significant unobservable inputs (Level 3 inputs)
<i>September 30, 2009</i>				
<i>Assets measured at fair value</i>				
Investment securities available for sale				
U.S. Government	\$ 2,633,878	\$ 2,633,878	\$	\$
Corporate bonds	488,027	488,027		
FNMA, GNMA and FHLMC mortgage-backed securities	135,506		135,506	
Equity securities	16,545	16,545		
State, county, municipal	7,376		7,376	
Other	2,189			2,189
Total	\$ 3,283,521	\$ 3,138,450	\$ 142,882	\$ 2,189
SBA servicing asset	\$ 5,783	\$	\$ 5,783	\$
<i>Liabilities measured at fair value</i>				
Interest rate swaps accounted for as cash flow hedges	8,556		8,556	
<i>December 31, 2008</i>				
<i>Assets measured at fair value</i>				
Investment securities available for sale				
U.S. Government	\$ 3,112,428	\$ 3,112,428	\$	\$
FNMA, GNMA and FHLMC mortgage-backed securities	82,952		82,952	
Equity securities	16,120	16,120		
State, county, municipal	3,053		3,053	
Other	5,427			5,427
Total	\$ 3,219,980	\$ 3,128,548	\$ 86,005	\$ 5,427
<i>Liabilities measured at fair value</i>				
Interest rate swap accounted for as cash flow hedges	10,668		10,668	

Prices for US Government securities and corporate bonds are readily available in the active markets in which those securities are traded, and the resulting fair values are shown in the Level 1 input column. Prices for residential mortgage-backed securities, state, county and municipal securities, and the SBA servicing asset are obtained using the fair values of similar assets, and the resulting fair values are shown in the Level 2 input column. Prices for all other securities, which include a residual interest that was retained from a securitization transaction, are determined based on various assumptions that are not observable. The fair values for these investment securities are shown in the Level 3 input column. With respect to the residual interest in the asset securitization, the assumed prepayment speed, discount rate and credit spread are not observable in the market due to illiquidity and the uniqueness of the underlying assets.

Table of Contents**Notes to Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)**

Under the terms of the existing cash flow hedges, BancShares pays a fixed payment to the counterparty in exchange for receipt of a variable payment that is determined based on the 3-month LIBOR rate. The fair value of the cash flow hedge is therefore based on projected LIBOR rates for the duration of the hedge, values that, while observable in the market, are subject to adjustment due to pricing considerations for the specific instrument.

For those investment securities available for sale with fair values that are determined by reliance on significant unobservable inputs, the following table identifies the factors causing the change in fair value during the first nine months of 2009 and 2008:

Description	Investment securities available for sale with fair values based on significant unobservable inputs	
	2009	2008
Beginning balance, January 1,	\$ 5,427	\$ 9,924
Total gains (losses), realized or unrealized:		
Included in earnings		
Included in other comprehensive income	(1,277)	192
Purchases, sales, issuances and settlements, net	(1,961)	(3,986)
Transfers in/out of Level 3		
Ending balance, September 30	\$ 2,189	\$ 6,130

No gains or losses were reported for the nine-month periods ended September 30, 2009 and 2008 that relate to fair values estimated based on unobservable inputs.

Certain financial assets and financial liabilities are carried at fair value on a nonrecurring basis. Loans held for sale are carried at the lower of aggregate cost or fair value and are therefore carried at fair value only when fair value is less than the asset cost. Certain impaired loans are also carried at fair value. For financial assets and financial liabilities carried at fair value on a nonrecurring basis, the following table provides fair value information as of September 30, 2009:

Description	Fair value	Fair value measurements using:		
		Quoted prices in active markets for identical assets and liabilities (Level 1 inputs)	Quoted prices for similar assets and liabilities (Level 2 inputs)	Significant unobservable inputs (Level 3 inputs)
September 30, 2009				
Loans held for sale	\$ 38,328	\$	\$	\$ 38,328
Impaired loans not covered under loss sharing agreements	19,055			19,055
Impaired loans covered under loss sharing agreements	83,442			83,442
December 31, 2008				
Loans held for sale	69,399			69,399
Impaired loans	27,858			27,858

Table of Contents**Notes to Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)**

The values of loans held for sale are based on prices observed for similar pools of loans. The values of impaired loans are determined by either the collateral value or by the discounted present value of the expected cash flows. No financial liabilities were carried at fair value on a nonrecurring basis at September 30, 2009 or December 31, 2008.

Certain non-financial assets and non-financial liabilities are measured at fair value on a nonrecurring basis. Other assets includes certain foreclosed assets that are measured and reported at fair value using Level 2 inputs for observable market data or, if needed, Level 3 inputs for valuations based on non-observable criteria. During the nine month period ended September 30, 2009, foreclosures of other real estate not covered under loss sharing agreements totaled \$37,667, all of which was valued using Level 3 inputs. In connection with the measurement and initial recognition of foreclosed assets, BancShares recognized charge-offs totaling \$15,175. Based on updates to Level 3 inputs, foreclosed property with a fair value of \$5,188 as of September 30, 2009 incurred write-downs that totaled \$792 during the nine-month period ended September 30, 2009.

At September 30, 2009, impaired loans not covered under loss sharing agreements, which include commercial purpose nonaccrual loans and troubled debt restructurings, totaled \$33,263. Allowances for impaired loans represent the difference between the impaired loans carrying value and the estimated collateral value or the present value of anticipated cash flows. At September 30, 2009, \$18,941 of impaired loans required allowances of \$4,873 to adjust the loans to their fair value of \$14,068. The remaining \$14,322 of impaired loans did not require allowances based on underlying collateral values. The calculation of allowance for impaired loans is highly dependent on collateral valuations. Since all impaired loans at September 30, 2009 are secured by real estate, fair values are based on appraised values with adjustments for various factors including estimated holding costs. Given the significant instability in real estate markets, particularly in the Atlanta, Georgia area and in Southwest Florida, the valuations are subject to significant variation based on further reductions or recoveries of property values.

Note F**Employee Benefit Plans**

Pension expense is a component of employee benefits expense. For the three and nine month periods ended September 30, the components of pension expense are as follows:

	Three month periods ended September 30,		Nine month periods ended September 30,	
	2009	2008	2009	2008
Service cost	\$ 3,190	\$ 2,830	\$ 9,472	\$ 8,917
Interest cost	5,517	4,910	16,384	15,470
Expected return on assets	(6,982)	(6,648)	(20,733)	(20,950)
Amortization of prior service cost	53	50	157	159
Amortization of net actuarial loss	908	233	2,696	736
Total pension expense	\$ 2,686	\$ 1,375	\$ 7,976	\$ 4,332

The increase in pension expense during 2009 resulted from a change in the assumed discount rate used to estimate benefit obligations, a reduction in the expected rate of return on plan assets and an increase in the estimated future rate of salary increases. The assumed discount rate for 2009 is 6.00 percent, the expected long-term rate of return on plan assets is 8.00 percent and the assumed rate of salary increases is 4.50 percent.

During the first quarter of 2009, BancShares contributed \$35,000 to the defined benefit plan.

Table of Contents**Notes to Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)****Note G****Contingencies**

As previously disclosed, on May 24, 2004, FCB filed a lawsuit in the Circuit Court of Greenbrier County, West Virginia, against a customer alleging default under a master lease on a piece of equipment and eight promissory notes. The borrower asserted a counterclaim against FCB alleging breach of lease, breach of fiduciary duty, breach of duty of good faith and fair dealing, and tortious interference with contractual relations. At trial, a jury returned a verdict against FCB and awarded a \$4,125 judgment in favor of FCB's customer. FCB filed a motion to set aside the judgment or, in the alternative, for a new trial, but the Court denied FCB's motions. FCB filed a Petition for Review of the Circuit Court's action to the West Virginia Supreme Court of Appeals. On September 3, 2009, the Supreme Court of Appeals denied FCB's request. As a result, FCB paid a total of \$5,252 to the customer, which represented the jury award plus \$1,127 in interest and other costs. Noninterest expense during the third quarter of 2009 included \$4,549 related to the resolution of this matter.

BancShares and various subsidiaries have been named as defendants in various other legal actions arising from their normal business activities in which damages in various amounts are claimed. Although the amount of any ultimate liability with respect to those other matters cannot be determined, in the opinion of management, any such liability will not have a material effect on BancShares' consolidated financial statements.

Note H**Derivatives**

At September 30, 2009, BancShares had two interest rate swaps that qualify as cash flow hedges under US GAAP. The fair values of these derivatives are included in other liabilities in the consolidated balance sheets and in the net change in other liabilities in the consolidated statements of cash flows.

The interest rate swaps are used for interest rate risk management purposes and convert variable-rate exposure on outstanding debt to a fixed rate. The interest rate swaps each have a notional amount of \$115,000, representing the amount of variable-rate trust preferred capital securities issued during 2006. The 2006 interest rate swap hedges interest payments through June 2011 and requires fixed-rate payments by BancShares at 7.125 percent in exchange for variable-rate payments of 175 basis points above 3-month LIBOR, which is equal to the interest paid to the holders of the trust preferred capital securities. The 2009 interest rate swap hedges interest payments from July 2011 through June 2016 and requires fixed-rate payments by BancShares at 5.50 percent in exchange for variable-rate payments of 175 basis points above 3-month LIBOR. As of September 30, 2009, collateral with a fair value of \$8,311 was pledged to secure the existing obligation under the interest rate swaps. For both swaps, settlement occurs quarterly.

	September 30, 2009		December 31, 2008	
	Notional amount	Estimated fair value of (asset) liability	Notional amount	Estimated fair value of liability
2006 interest rate swap hedging fixed rate exposure on trust preferred capital securities 2006-2011	\$ 115,000	\$ 8,488	\$ 115,000	\$ 10,668
2009 interest rate swap hedging fixed rate exposure on trust preferred capital securities 2011-2016	115,000	68		
		\$ 8,556		\$ 10,668

For cash flow hedges, the effective portion of the gain or loss due to changes in the fair value of the derivative hedging instrument is included in other comprehensive income, while the ineffective portion, representing the excess of the cumulative change in the fair value of the derivative over the cumulative change in expected future discounted cash flows on the hedged transaction, is recorded in the consolidated income statement. BancShares' interest rate swaps have been fully effective since inception. Therefore, changes in the fair value of the interest rate swaps

Edgar Filing: FIRST CITIZENS BANCSHARES INC /DE/ - Form 10-Q

have had no impact on net income. For the nine-month periods ended September 30, 2009 and 2008, BancShares recognized interest expense of \$3,738 and \$1,694 respectively, resulting from the interest rate swaps, none of which relates to ineffectiveness.

Table of Contents**Notes to Consolidated Financial Statements (Continued)****(Dollars in thousands, except per share amounts)**

The following table discloses activity in accumulated other comprehensive income related to the interest rate swaps during the nine-month periods ended September 30, 2009 and 2008.

	2009	2008
Accumulated other comprehensive loss resulting from interest rate swaps as of January 1, net of tax	\$ (6,456)	\$ (3,240)
Other comprehensive income recognized during nine-month period ended September 30, net of tax	1,278	78
Accumulated other comprehensive loss resulting from interest rate swaps as of September 30, net of tax	\$ (5,178)	\$ (3,162)

BancShares monitors the credit risk of the interest rate swap counterparty.

Note I**Segment Disclosures**

BancShares conducts its banking operations through its two wholly-owned subsidiaries, FCB and ISB. FCB and ISB offer similar products and services to customers through operations conducted under separate charters. A substantial portion of our revenue is derived from our operations in North Carolina, Virginia, Georgia, Florida, California and Texas. The financial results and trends of ISB reflect the impact of the de novo nature of its growth.

In the aggregate, FCB and its consolidated subsidiaries, which are integral to its branch operation, and ISB account for more than 90 percent of consolidated assets, revenues and net income. Other includes activities of the parent company and Neuse, Incorporated (Neuse), a subsidiary that owns real property. During 2009 Neuse purchased from ISB foreclosed properties that had a carrying value of \$14,418. This transaction will benefit ISB by reducing problem assets and improving certain operating ratios. To facilitate the potential purchase of additional foreclosed property in the future, ISB has agreed to lend Neuse up to \$20,000 under a revolving line of credit.

The adjustments in the accompanying tables represent the elimination of the impact of certain inter-company transactions. The adjustments to interest income and interest expense neutralize the earnings and cost of inter-company borrowings. The adjustments to noninterest income and noninterest expense reflect the elimination of certain fees paid by one company to another within BancShares consolidated group.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

INTRODUCTION

Management's discussion and analysis of earnings and related financial data are presented to assist in understanding the financial condition and results of operations of First Citizens BancShares, Inc. and subsidiaries (BancShares). This discussion and analysis should be read in conjunction with the unaudited Consolidated Financial Statements and related notes presented within this report. Intercompany accounts and transactions have been eliminated. Although certain amounts for prior years have been reclassified to conform to statement presentations for 2009, the reclassifications have no effect on shareholders' equity or net income as previously reported.

OVERVIEW

BancShares is a financial holding company with two wholly owned banking subsidiaries: First-Citizens Bank & Trust Company (FCB), a North Carolina-chartered bank, and IronStone Bank (ISB), a federally-chartered thrift institution. FCB operates branches in North Carolina, Virginia, West Virginia, Maryland, Tennessee, Washington, California, and Washington, DC. ISB operates in Georgia, Florida, Texas, New Mexico, Arizona, California, Oregon, Washington, Colorado, Oklahoma, Missouri and Kansas. FCB and ISB offer similar banking products and services to customers through branch operations under separate charters. Each entity operates in different geographic markets, with the exception of the states of California and Washington where ISB and FCB both operate. ISB has maintained a focus on providing products and services to commercial and business customers, while FCB has a broader customer base, including commercial and retail relationships. FCB offers a wide array of wealth management services through its trust department and a wholly-owned broker-dealer subsidiary. The financial results and trends of ISB reflect the impact of the de-novo nature of its growth.

BancShares' earnings and cash flows are derived primarily from the commercial banking activities conducted by its banking subsidiaries. These activities include commercial and consumer lending, deposit and treasury services products, cardholder, merchant, wealth management services as well as various other products and services typically offered by commercial banks. FCB and ISB gather interest-bearing and noninterest-bearing deposits from retail and commercial customers. BancShares and its subsidiaries also secure funding through various non-deposit sources. We invest the liquidity generated from these funding sources in various types of interest-earning assets including loans and leases, investment securities and overnight investments. We also invest in bank premises, furniture and equipment used to conduct the subsidiaries' commercial banking business.

Various external factors influence customer demand for our loan, lease and deposit products. In an effort to stimulate and control the rate of growth of economic activity, monetary actions by the Federal Reserve are significant to the interest rate environment in which we operate. At any point in time, both the existing level and anticipated movement of interest rates have a material impact on customer demand for our products, our pricing of those products and our profitability. In addition to the interest rate environment, the general strength of the economy influences the demand for as well as the quality and collectibility of our loan and lease portfolio. External economic indicators such as consumer bankruptcy rates and business debt service capacity closely follow trends in the economic cycle.

Although we are unable to control the external factors that influence our business, through the utilization of various liquidity, interest rate and credit risk management tools, we seek to minimize the potentially adverse risks of unforeseen and potentially unfavorable economic trends and take advantage of favorable economic conditions when appropriate.

Financial institutions frequently focus their strategic and operating emphasis on maximizing profitability and measure their relative success by reference to profitability measures such as return on average assets or return on average shareholders' equity. Historically, we have placed primary emphasis upon asset quality, balance sheet liquidity and capital conservation, even when those priorities may be detrimental to short-term profitability.

Table of Contents

In recent years, our growth has resulted through *de novo* expansion. However, during 2009, the increase in the number of bank failures has led the FDIC to offer significant loss protection to acquirers. We believe that expansion opportunities exist and continue to evaluate potential acquisition targets. Our expansion considerations focus on geographic markets with long-term growth potential.

We also continue to focus on organic growth. We believe that through competitive products and superior customer service, we can increase our business volumes and profitability. While offering products and services appropriate for customers with varying needs, we generally focus our efforts on businesses owners, medical and other professionals and financially active individuals.

We seek to increase fee income within our key business units including cardholder and merchant services, insurance, treasury services, wealth management and other private banking services. We also remain focused on opportunities to generate income by providing various processing services to other banks.

As a result of costs arising from recent and projected failures of insured banks, the reserve level of the FDIC's Deposit Insurance Fund (DIF) has declined to less than the amount mandated by the Federal Deposit Insurance Reform Act of 2005. The FDIC has a legally-imposed duty to adopt a plan to restore the DIF to a specific level, and as a result increased deposit insurance rates and imposed a special assessment on all insured banks during 2009. Additional special assessments and further increases in FDIC insurance premiums could have a material negative impact upon our earnings.

ACQUISITIONS

Temecula Valley Bank. On July 17, 2009, FCB entered into an agreement with the FDIC to purchase substantially all the assets and assume the majority of the liabilities of Temecula Valley Bank (TVB) of Temecula, California. Immediately prior to the effectiveness of the acquisition, the FDIC had been appointed Receiver of TVB by the California Department of Financial Institutions.

Table 1 identifies the assets acquired and liabilities assumed, the fair value adjustments, the amounts recorded by FCB, and the calculation of the gain recognized on the acquisition.

Acquisition of Temecula Valley Bank**Table 1**

Table of Contents

The loans and other real estate acquired through foreclosure are covered by loss sharing agreements that provide for the FDIC to absorb 80 percent of losses incurred on covered loans and other real estate in excess of \$193.3 million. The 80 percent coverage ratio applies to losses up to \$464.0 million with losses in excess of \$464.0 million covered by the FDIC at a rate of 95 percent. FCB recorded a receivable from the FDIC equal to \$103.6 million as an estimate of the fair value of the amount that will be reimbursed by the FDIC from the loss sharing agreements.

The \$58.7 million gain is included within noninterest income in the Consolidated Statements of Income. Our operating results for the period ended September 30, 2009 include the results of the acquired assets and liabilities for the period from July 18, 2009 through September 30, 2009. Accretion and amortization of various purchase accounting discounts and premiums were recorded in the third quarter.

Venture Bank. On September 11, 2009, FCB entered into an agreement with the FDIC to purchase substantially all the assets and assume the majority of the liabilities of Venture Bank (VB) of Lacey, Washington. Immediately prior to the effectiveness of the acquisition, the FDIC had been appointed Receiver of VB by the Washington Department of Financial Institutions.

Table 2 identifies the assets acquired and liabilities assumed, the fair value adjustments, the amounts recorded by FCB, and the calculation of the gain recognized on the acquisition.

Gain on acquisition of VB			\$ 46,242

The loans and other real estate acquired through foreclosure are covered by loss sharing agreements that provide for the FDIC to absorb 80 percent of all losses incurred on covered loans and other real estate up to \$235.0 million. Losses in excess of \$235.0 million are covered by the FDIC at a rate of 95 percent. FCB recorded a receivable from the FDIC equal to \$139.0 million as an estimate of the fair value of the amount that will be reimbursed by the FDIC from the loss sharing agreements.

The \$46.2 million gain is included within noninterest income in the Consolidated Statements of Income. Our operating results for the period ended September 30, 2009 include the results of the acquired assets and liabilities for the period from September 11, 2009 through September 30, 2009. Accretion and amortization of various purchase accounting discounts and premiums were recorded in the third quarter.

Table of Contents

PERFORMANCE SUMMARY

Weak economic conditions in our principal market areas continue to have an adverse impact on our financial condition and results of operations through soft demand for our loan products, reduced noninterest income, a low net yield on interest-earning assets and high provisions for credit losses. In many of our markets, unfavorable measures such as increased unemployment, falling real estate prices and increased default and bankruptcy rates demonstrate the difficult business conditions affecting the general economy and our operating results.

BancShares earnings increased significantly during the third quarter of 2009 compared to the third quarter of 2008 due to \$105.0 million of gain on the acquisitions of TVB and VB. The after-tax impact of the gains totaled \$63.9 million or \$6.12 per share. Consolidated net income during the third quarter of 2009 equaled \$82.5 million, compared to \$19.6 million earned during the corresponding period of 2008. The annualized return on average assets was 1.83 percent during the third quarter of 2009, compared to 0.47 percent during the same period of 2008. The annualized return on average equity was 22.45 percent during the third quarter of 2009, compared to 5.20 percent during the same period of 2008. Net income per share during the third quarter of 2009 totaled \$7.90, compared to \$1.87 during the third quarter of 2008.

For the first nine months of 2009, BancShares recorded net income of \$97.3 million, compared to \$78.2 million earned during the first nine months of 2008. The \$19.2 million or 24.5 percent increase was the result of gains associated with bank acquisitions. Net income per share for the first nine months of 2009 amounted to \$9.33, compared to \$7.49 during the same period of 2008. On an annualized basis, BancShares returned 0.75 percent on average assets during the first nine months of 2009, compared to 0.64 percent from the corresponding period of 2008. Annualized return on average equity for the first nine months of 2009 was 9.01 percent, compared to 7.05 percent during the same period of 2008.

Excluding nonperforming assets covered by FDIC loss sharing agreements, asset quality measurements were favorable during the third quarter. The provision for credit losses for the third quarter of 2009 equaled \$18.3 million, down \$2.5 million from the second quarter of 2009 and \$1.7 million from the third quarter of 2008. Net charge-offs decreased to \$15.3 million, down \$5.5 million compared to the previous quarter. As a percentage of average loans not covered by loss sharing agreements, net charge-offs for the third quarter of 2009 equaled 0.50 percent, down from 0.72 percent in the second quarter of 2009. Nonperforming assets not covered by loss sharing agreements amounted to \$106.3 million at September 30, 2009, 0.92 percent of loans not covered by loss sharing agreements, up \$7.5 million from June 30, 2009 and \$44.2 million from September 30, 2008. In addition, there are \$205.1 million of nonperforming assets covered by loss sharing agreements. Net charge-offs for the nine month period ended September 30, 2009 amounted to \$50.0 million or 0.57 percent of average loans not covered by loss sharing agreements, up \$22.7 million for the comparable period in 2008. The provision for credit losses increased \$14.5 million from the prior year to \$57.7 million.

Net interest income for the third quarter 2009 increased \$8.0 million from the comparable period of 2008 caused by a significant growth in interest-earning assets. The net yield on interest-earning assets for the third quarter of 2009 increased by 39 basis points from last quarter. Net interest income for the nine month period ended September 30, 2009 declined \$6.1 million from the prior years due to a contraction in the net yield on interest-earning assets.

Noninterest income excluding the \$105.0 million gain on acquisitions was \$77.7 million during the third quarter of 2009, unchanged from the comparable period of 2008. For the nine month period ended September 30, 2009, noninterest income excluding the gain on acquisitions equaled \$222.4 million, down \$18.9 million from the nine month period ended September 30, 2008. The unfavorable trends in 2009 are due to lower levels of service charge income, wealth management services, securities gains, and cardholder and merchant services.

Noninterest expenses increased \$10.5 million and \$32.4 million in the third quarter and nine month period ended September 30, 2009 versus the comparable periods of 2008. Higher FDIC insurance, employee benefits costs, occupancy costs and expenses related to the maintenance, writedown and resolution of other real estate caused the higher current year expenses.

Table of Contents**INTEREST-EARNING ASSETS**

Interest-earning assets include loans and leases, investment securities and overnight investments, all of which reflect varying interest rates based on the risk level and maturity of the underlying asset. Riskier investments typically carry a higher interest rate, but expose the investor to potentially higher levels of default. We have historically focused on maintaining strong asset quality, which results in a loan and lease portfolio subjected to strenuous underwriting and monitoring procedures. United States Treasury and U.S. government agency securities represent 80.1 percent of our investment securities portfolio. Debt obligations guaranteed by the Temporary Liquidity Guarantee Program represent 14.8 percent of the investment securities portfolio. Residential mortgage-backed securities designated as available for sale and carried at fair value represent only 3.6 percent of total investment securities.

Generally, the investment securities portfolio grows and shrinks based on loan, lease and deposit trends. When deposit growth exceeds loan and lease demand, we invest excess funds in the securities portfolio. Conversely, when loan and lease demand exceeds deposit growth, we use proceeds from maturing securities to fund loan and lease demand. Overnight investments are selectively made with other financial institutions that are within our risk tolerance.

Loans and leases not covered by loss sharing agreements. At September 30, 2009 and 2008, loans and leases not covered by loss sharing agreements totaled \$11.52 billion and \$11.56 billion, respectively. The \$43.0 million or 0.4 percent reduction from September 30, 2008 to September 30, 2009 resulted from declines within the construction and land development and consumer portfolios, partially offset by growth in the commercial and revolving mortgage portfolios.

Commercial mortgage loans totaled \$4.51 billion at September 30, 2009, 39.2 percent of the noncovered loan and lease portfolio. This represents an increase of \$249.1 million or 5.8 percent since September 30, 2008 and \$117.3 million since June 30, 2009. Competition for high-quality loans secured by owner-occupied medical and professional facilities remains intense. Our commercial mortgage loans, the majority of which are owner occupied, are underwritten based primarily upon the cash flow from the operation of the business rather than the value of the real estate collateral.

At September 30, 2009, revolving mortgage loans totaled \$2.11 billion, 18.3 percent of noncovered loans and leases outstanding, an increase of \$320.8 million or 17.9 percent since September 30, 2008. Revolving mortgage loans increased \$61.1 million from June 30, 2009. Attractive interest rates have stimulated line utilization during 2009.

Commercial and industrial loans equaled \$1.82 billion or 15.8 percent of total loans and leases outstanding, down \$64.3 million or 3.4 percent since September 30, 2008. Commercial and industrial loans declined \$36.4 million from June 30, 2009, the result of customer efforts to deleverage.

Residential mortgage loans totaled \$876.0 million or 7.6 percent of total loans and leases at September 30, 2009, down \$21.2 million or 2.4 percent from September 30, 2008. Substantially all of our production of residential mortgage loans is sold on a servicing released basis.

Consumer loans totaled \$998.0 million or 8.7 percent of total loans and leases at September 30, 2009, compared to \$1.32 billion or 11.4 percent of covered loans and leases at September 30, 2008 and \$1.07 billion at June 30, 2009. The decline in consumer loan balances results from the discontinuation of indirect lending through our sales finance division in late 2008.

Construction and land development loans equaled \$621.2 million or 5.4 percent of covered loans at September 30, 2009, a decrease of \$182.8 million or 22.7 percent since September 30, 2008 and \$56.7 million from June 30, 2009. Given the continuing soft residential real estate markets, we have substantially reduced lending within this product line particularly in the Atlanta, Georgia and southwest Florida markets.

Loans covered by loss sharing agreements. At September 30, 2009 loans covered by loss sharing agreements arising from our purchases of TVB and VB loans equaled \$1.26 billion, net of fair value adjustments. The majority of the loans covered by loss sharing agreements are construction and land development and commercial mortgage loans, with balances of \$427.4 million and \$645.6 million respectively as of September 30, 2009. Significant reductions are expected in the balance of loans covered by loss sharing agreements over the next year due to charge-offs and write-downs of uncollectible loans as well as the collection of outstanding balances.

Table of Contents**Loans and Leases****Table 4**

	Third Quarter	2009 Second Quarter	First Quarter (thousands)	2008 Fourth Quarter	2008 Third Quarter

Investment securities. Investment securities available for sale totaled \$3.28 billion at September 30, 2009, compared to \$2.93 billion at September 30, 2008 and \$3.75 billion at June 30, 2009. The \$354.9 million or 12.1 percent increase from September 30, 2008 results from improved liquidity arising from deposit growth offset in part by lower demand for treasury services products by commercial customers. The \$461.9 million decline from June 30, 2009 resulted from liquidity needs arising due to deposit outflows at TVB and VB. Available-for-sale securities are reported at aggregate fair value and unrealized gains and losses are included as a component of other comprehensive income, net of deferred taxes. Table 5 presents detailed information relating to the investment securities portfolio.

- (1) Average maturity assumes callable securities mature on their earliest call date; yields are based on amortized cost; yields related to securities that are exempt from federal and/or state income taxes are stated on a taxable-equivalent basis assuming statutory rates of 35.0 percent for federal income tax purposes and 6.9 percent for state income taxes for all periods.
- (2) Debt securities issued pursuant to the Temporary Liquidity Guarantee Program issued with the full faith and credit of the United States of America.

Table of Contents

Income on interest-earning assets. Interest income amounted to \$189.7 million during the third quarter of 2009, a \$9.4 million or 4.7 percent decrease from the third quarter of 2008. The impact of lower asset yields more than offset the impact of growth in interest-earning assets. The taxable-equivalent yield on interest-earning assets for the third quarter of 2009 equaled 4.66 percent, compared to 5.40 percent for the corresponding period of 2008. Average interest-earning assets increased \$1.09 billion, the result of the TVB and VB acquisitions. The accretion of fair value adjustments in the third quarter of 2009 was not material but may become material in future periods.

Interest income amounted to \$546.2 million during the first nine months of 2009, a \$71.8 million or 11.6 percent decrease from the same period of 2008, the net result of lower yields and growth in interest-earning assets. The taxable-equivalent yield declined 96 basis points from 5.65 percent for the first nine months of 2008 to 4.69 percent during the same period of 2009, caused by lower market interest rates during 2009.

INTEREST-BEARING LIABILITIES

Interest-bearing liabilities include our interest-bearing deposits as well as short-term borrowings and long-term obligations. Deposits represent our primary funding source, although we also utilize non-deposit borrowings to provide cash management services to commercial customers. Certain long-term borrowings also qualify as capital under existing guidelines established by the Federal Reserve Bank and other banking regulators.

Deposits. At September 30, 2009, deposits totaled \$15.35 billion, an increase of \$1.98 billion or 14.8 percent over September 30, 2008 caused by increases in customer savings, demand for high-quality bank deposits and a desire by customers to seek safety from uncertain investment instruments. We continue to focus on deposit attraction and retention as a key business objective.

The balance of deposits that we assumed from TVB and VB at the respective acquisition dates during the third quarter of 2009 totaled \$1.67 billion. Due to the presence of \$158.0 million in highly volatile out of market time deposits and our decision to reduce the existing rates on acquired time deposits at both TVB and VB, the balance of assumed deposits declined to \$1.07 billion as of September 30, 2009. Further reductions are expected during the fourth quarter of 2009, with generally stable balances thereafter.

Short-term borrowings. At September 30, 2009, short-term borrowings totaled \$576.6 million compared to \$1.01 billion at September 30, 2008, a \$437.8 million reduction. The 43.2 percent decline resulted from reduced demand for treasury service products caused by falling interest rates.

Long-term obligations. Long-term obligations equaled \$879.8 million at September 30, 2009, up \$230.5 million from September 30, 2008 due primarily to Federal Home Loan Bank borrowings.

Expense on interest-bearing liabilities. Interest expense amounted to \$54.4 million during the third quarter of 2009, a \$17.3 million or 24.2 percent decrease from the third quarter of 2008. Significantly lower rates more than offset the impact of the growth in interest-bearing liabilities. The rate on average interest-bearing liabilities equaled 1.64 percent during the third quarter of 2009, a 70 basis point decrease in the blended rate on interest-bearing liabilities as compared to the third quarter of 2008. Average interest-bearing liabilities increased \$950.3 million or 7.8 percent from the third quarter of 2008 to the third quarter of 2009, the net result of \$1.27 billion growth in interest-bearing deposits and a \$515.9 million decline in short-term borrowings. The growth of average interest-bearing deposits was influenced by growth within the core franchise as well as the acquisitions of TVB and VB.

Year-to-date interest expense equaled \$178.1 million, compared to \$243.7 million for the same period of 2008. The \$65.7 million or 26.9 percent decrease results from lower interest rates, partially offset by the impact of growth in deposits and long-term borrowings. The rate on interest-bearing liabilities decreased from 2.66 percent during the first nine months of 2008 to 2.00 percent for the same period of 2009, a 66 basis point drop. For the first nine months of 2009, average interest-bearing liabilities increased \$601.1 million or 4.9 percent from \$12.26 billion to \$12.86 billion.

Average loan and lease balances include nonaccrual loans and leases. Yields related to loans, leases and securities exempt from both federal and state income taxes, federal income taxes only, or state income taxes only are stated on a taxable-equivalent basis assuming a statutory federal income tax rate of 35 percent and state income tax rate of 6.90 percent for each period. The taxable-equivalent adjustment was \$1,149 for 2009 and \$1,553 for 2008.

NET INTEREST INCOME

Net interest income totaled \$135.3 million during the third quarter of 2009, an increase of \$8.0 million or 6.3 percent from the third quarter of 2008. The taxable-equivalent net yield on interest-earning assets equaled 3.41 percent for the third quarter of 2009, down 6 basis points from the third quarter 2008 net yield of 3.47 percent, but up 39 basis points from the second quarter of 2009. The significant improvement in the net yield on interest-earning assets from the prior quarter is due to the reduction in the average rate for outstanding time deposits without a similar decline in the yield on interest-earning assets as well as a favorable mix of yields and rates on acquired interest-earning assets and interest-bearing liabilities. For the nine-month period ended September 30, 2009, net interest income decreased by \$6.1 million or 1.6 percent from the same

period of 2008 due to a 27 basis point contraction in the net yield on interest-earning assets caused by the extremely low interest rate environment.

Average loan and lease balances include nonaccrual loans and leases. Yields related to loans, leases and securities exempt from both federal and state income taxes, federal income taxes only, or state income taxes only are stated on a taxable-equivalent basis assuming a statutory federal income tax rate of 35 percent and a state income tax rate of 6.90 percent for each period. The taxable-equivalent adjustment was \$3,887 and \$5,121 for 2009 and 2008, respectively.

NONINTEREST INCOME

The growth of noninterest income is essential to our ability to sustain adequate levels of profitability. The primary sources of noninterest income are cardholder and merchant services income, service charges on deposit accounts, revenues derived from wealth management services, and fees from processing services. For 2009, gains recognized on the TVB and VB acquisitions had significant impact on our noninterest income.

During the first nine months of 2009, noninterest income totaled \$327.3 million compared to \$241.3 million during 2008. Excluding the \$105.0 million gain on acquisitions, noninterest income totaled \$222.4 million, down \$18.9 million or 7.8 percent from the same period of 2008.

Edgar Filing: FIRST CITIZENS BANCSHARES INC /DE/ - Form 10-Q

Unfavorable variances occurred in service charge income, wealth management services, securities gains and cardholder and merchant income. Of the \$18.9 million decrease in noninterest income, \$8.1 million resulted from a securities gain recognized in 2008 in conjunction with our investment in Visa, Inc.

Service charges on deposit accounts generated \$57.4 million for the first nine months of 2009, a decrease of \$4.8 million or 7.7 percent from 2008. Bad check and service charges were lower for both personal and commercial account customers in 2009 due to reductions in transaction activity and lower interest rates.

Table of Contents

Wealth management services generated \$34.3 million in the first nine months of 2009 compared to revenues of \$38.1 million in 2008. The \$3.8 million or 10.0 percent decrease resulted from lower trust and brokerage income. Cardholder and merchant services generated \$70.9 million during the first nine months of 2009, a decrease of \$3.5 million or 4.7 percent compared to 2008. This decrease resulted from lower interchange and merchant discount income caused by reduced transaction volumes by both debit and credit cardholders.

Noninterest income benefited from improvements in fees from processing services and mortgage income. Mortgage income increased \$3.9 million or 80.8 percent from \$4.8 million in 2008 to \$8.7 million in 2009. Servicing income and loan origination fees increased during the first nine month period of 2009 caused by favorable impacts from higher refinance activity and purchase activity resulting from tax credits provided to first-time home buyers. Fees from processing services added \$1.3 million or 5.1 percent in 2009 caused by higher transaction volumes and the addition of new clients.

Noninterest income for the third quarter of 2009 excluding the gain on acquisitions equaled \$77.7 million, unchanged from the third quarter of 2008. Higher mortgage income and fees from processing services offset reductions in service charges on deposit accounts and cardholder and merchant services. We expect the trend of weak noninterest income will continue through the fourth quarter of 2009.

NONINTEREST EXPENSE

The primary components of noninterest expense are salaries and employee benefit costs, occupancy expenses related to branch offices and support facilities, and equipment costs for branch offices and our technology infrastructure. Noninterest expense equaled \$483.5 million for the first nine months of 2009, a \$32.4 million or 7.2 percent increase over the same period of 2008. During 2009, FDIC deposit insurance costs emerged as a significant component of noninterest expense, with a \$21.2 million increase recorded versus the first nine months of 2008.

Salaries and wages totaled \$195.4 million for the first nine months of 2009, an increase of \$2.6 million or 1.3 percent when compared to the same period of 2008. The increase resulted from acquisitions, new branch offices, and the effect of mid-year 2008 merit increases. Employee benefits expense totaled \$48.5 million for the first nine months of 2009, an increase of \$3.5 million or 7.8 percent. Pension expense increased \$3.6 million while health costs increased \$2.6 million during 2009. These increases were partially offset by lower executive retirement costs in 2009.

Occupancy expense amounted to \$48.7 million during the first three quarters of 2009 compared to \$45.4 million during the same period of 2008. The \$3.3 million or 7.2 percent increase resulted from higher expansion-related facility costs. Equipment expense equaled \$44.5 million in 2009, an increase of \$1.7 million or 4.1 percent over 2008, primarily due to higher software costs.

Expenses related to the maintenance, writedowns and resolution of other real estate increased \$6.8 million during 2009 due to a significant increase in other real estate acquired through foreclosure in the Atlanta, Georgia and southwest Florida markets. Other expenses decreased \$6.6 million or 5.4 percent from the first nine months of 2008 to the same period of 2009 due to lower credit and debit card loyalty costs and savings derived from expense reduction initiatives, partially offset by higher non-credit charge-offs.

For the third quarter of 2009, noninterest expense totaled \$166.3 million, a \$10.5 million or 6.8 percent increase over the same period of 2008. Noninterest expenses incurred in the third quarter of 2009 for the TVB and VB acquisitions totaled \$6.6 million. Employee benefits increased \$1.6 million or 11.8 percent due to higher health insurance and pension costs. FDIC insurance expense increased \$4.5 million in 2009 due to higher quarterly rates and deposit levels. Occupancy expense increased \$1.9 million or 12.5 percent as a result of branch repairs and new branch offices. Foreclosure related costs increased \$3.8 million for the quarter while other expenses declined \$1.4 million caused by lower card loyalty costs and expense reduction savings.

INCOME TAXES

BancShares continually monitors and evaluates the potential impact of current events on the estimates used to establish income tax expenses and income tax liabilities. On a periodic basis, we evaluate our income tax positions based on current tax law, positions taken by various tax auditors within the jurisdictions that BancShares is required to file income tax returns as well as potential or pending audits or assessments by such tax auditors.

Income tax expense amounted to \$56.9 million during the nine months ended September 30, 2009, compared to \$43.0 million during the same period of 2008. The increase in income tax expense was primarily the result of higher pretax earnings which diluted the favorable effect of permanent differences. The effective tax rates for these periods were 36.9 percent and 35.5 percent, respectively. Income tax expense for the third quarter 2009 amounted to \$50.9 million versus \$9.5 million during the same period of 2008, with effective tax rates of 38.2 percent and 32.8 percent, respectively. The higher effective tax rate for 2009 reflects the impact of various permanent differences on higher pre-tax income.

SHAREHOLDERS EQUITY AND CAPITAL ADEQUACY

We continually monitor the capital levels and ratios for BancShares and the subsidiary banks to ensure that they exceed the minimum requirements imposed by their respective regulatory authorities and to ensure that the subsidiary banks' capital is appropriate given each bank's growth projection and risk profile. Failure to meet capital requirements may result in actions by regulatory agencies that could have a material effect on us and on the financial statements. Table 8 provides information on capital adequacy for BancShares as of September 30, 2009 and 2008.

Regulatory agencies have determined that acquired assets covered by loss sharing agreements carry a risk weighting of 20 percent. Therefore, the acquisitions of TVB and VB resulted in moderate increases in our risk-weighted assets. The combination of the incremental capital created from the after-tax impact of the acquisition gains and the moderate increase in risk-weighted assets allowed our risk-based capital ratios to remain virtually unchanged. The leverage ratios for BancShares and FCB will decline by approximately 45 basis points as a result of the acquisitions, although a portion of the reduction is expected to be recovered during 2010 as the acquired assets decline.

As of September 30, 2009, BancShares and each subsidiary bank exceed minimum capital standards to remain well-capitalized. Due to the adequacy of our capital levels, we did not apply for TARP funding under the TARP Capital Purchase Program.

The historic growth and operating losses of ISB has required BancShares to infuse significant amounts of capital into ISB to support its balance sheet. Since ISB was formed in 1997, BancShares has provided \$378.3 million in capital. BancShares' prospective capacity to provide capital to support the future growth and expansion of ISB is highly dependent upon FCB's ability to return capital through dividends to BancShares. Dividends from FCB to BancShares provide the sole source for capital infusions into ISB, and are the funding source for BancShares' shareholder dividends and interest payments on a portion of its long-term obligations.

During 2009, our board of directors authorized the repurchase of up to 100,000 shares of Class A common stock and up to 25,000 shares of Class B common stock. The authorization does not require repurchase of any particular number of shares. Any shares of stock that are repurchased will be cancelled. No shares have been purchased as of September 30, 2009.

Table of Contents

RISK MANAGEMENT

In the normal course of its business, BancShares is exposed to various risks. To manage our major risks and to provide reasonable assurance that our long-term business objectives will be attained, various policies and risk management processes identify, monitor and manage risk within acceptable tolerances. Management continually refines and enhances its risk management policies and procedures to maintain effective risk management.

Our most critical risk exposures are credit, interest rate and liquidity risk. Credit risk is the risk of not collecting the amount of a loan or investment when it is contractually due. Interest rate risk is the potential reduction of net interest income and thus earnings as a result of unfavorable changes in market interest rates. Liquidity risk is the possible inability to fund obligations to depositors, creditors, investors or borrowers.

Credit risk. We manage and monitor extensions of credit and the quality of the loan and lease portfolio through rigorous initial underwriting processes and ongoing periodic reviews. Underwriting standards reflect credit policies and procedures, and much of our credit approval process is centralized. We have a centralized independent credit review function that conducts independent risk reviews and analyses for the purpose of ensuring compliance with credit policies and to monitor asset quality trends. The risk reviews include portfolio analysis by geographic location and horizontal reviews across industry sectors within the banking subsidiaries. We identify potential credit problems as early as possible, to take reasonable and appropriate charge-offs or write-downs.

We maintain a well-diversified loan and lease portfolio and seek to avoid the risk associated with large concentrations within specific geographic areas or industries. Our continuing expansion has allowed us to mitigate our historic exposure to geographic risk concentration in North Carolina and Virginia. As we have entered new markets, we have endeavored to ensure that rigorous centralized underwriting and monitoring controls are functioning effectively. We will continue to place emphasis upon maintaining strong lending standards in new markets.

Our exposure to subprime loans is limited to programs we initiated to provide financing for affordable housing in connection with our ongoing efforts to comply with the Community Reinvestment Act. The carrying value of these loans as of September 30, 2009 was \$3.3 million.

We maintain an appropriate and adequate allowance for loan and lease losses. In addition to the review of credit quality through ongoing credit review processes, we employ a variety of modeling and estimation techniques to measure credit risk and construct our allowance. Numerous quantitative and judgmental asset quality measures are considered in estimating the allowance including net charge-off trends, collateral values, geographic concentrations, nonperforming and restructured loans, product mix, and economic conditions. These credit quality factors are incorporated into various loss estimation models utilized in our allowance process, or are considered in evaluating the overall reasonableness of the allowance for loan and lease loss.

In recent years, one of our key strategic business goals is to provide financial services to businesses associated with and professionals within the medical community. Due to strong growth within this segment of our loan and lease portfolio, our non-covered loans and leases to borrowers in medical, dental or related fields totaled \$2.87 billion as of September 30, 2009, which represents 24.9 percent of loans and leases not covered under loss sharing agreements, compared to \$2.62 billion or 22.7 percent at September 30, 2008. Except for this concentration, no other industry represented more than 10 percent of non-covered loans and leases outstanding at September 30, 2009. Management has not established a limit for our concentration in the medical, dental or related field.

Table of Contents

Nonperforming assets include nonaccrual loans and leases, restructured loans, and other real estate owned. Other real estate owned consists of foreclosed property and closed branch facilities. As a result of the acquisitions of TVB and VB assets, certain nonperforming assets are covered by loss sharing agreements with the FDIC. At September 30, 2009, nonperforming assets covered by loss sharing agreements equaled \$205.1 million, or 15.1 percent of covered loans plus other real estate owned.

At September 30, 2009, nonperforming assets not covered by loss sharing agreements amounted to \$106.3 million, or 0.92 percent of non-covered loans and leases plus other real estate owned, compared to \$102.4 million at June 30, 2009 and \$62.2 million at September 30, 2008. The increase from September 30, 2008 is due principally to weakness in the Atlanta, Georgia and southwest Florida residential construction loan portfolio. Residential construction loans secured by properties located in these markets have suffered from significant excess housing capacity and falling property values. Our borrowers, who are dependent on proceeds from sales to fund their obligations to us, face significant liquidity challenges.

Residential construction loans in the Atlanta, Georgia and southwest Florida markets as of September 30, 2009 equaled \$71.9 million, compared to \$91.0 million at June 30, 2009 and \$128.8 million at December 31, 2008. As of September 30, 2009, \$20.1 million of the residential construction loans were classified as nonperforming, and \$37.0 million were identified as potential problem loans due to concerns about borrowers' abilities to comply with existing loan repayment terms. We continue to closely monitor past due and problem accounts to identify any loans and leases that should be classified as impaired or non-accrual.

At September 30, 2009, the allowance for loan and lease losses totaled \$165.3 million or 1.43 percent of loans and leases not covered by loss sharing agreements, up \$12.3 million from September 30, 2008 when the coverage ratio equaled 1.32 percent. The increase in the allowance was primarily due to additional provisions related to downgrades of residential construction loans. In addition, as a result of deteriorating charge-off trends and loss projections, the loss estimates related to revolving mortgage loans were increased resulting in a \$2.3 million increase in the allowance during the third quarter of 2009.

Management considers the allowance adequate to absorb estimated probable losses that relate to non-covered loans and leases and to post-acquisition changes in credit quality on covered loans, although future additions may be necessary based on changes in economic conditions and other factors. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the allowance for credit losses. Such agencies may require the recognition of adjustments to the allowance based on their judgments of information available to them at the time of their examination.

At September 30, 2009, acquired loans subject to protection under loss sharing agreements totaled \$1.26 billion. Under US GAAP, estimated losses related to acquired loans that existed as of the acquisition date are not considered in determining the allowance for loan and lease losses. However, exposures that result from events that occur subsequent to the acquisition date will be considered in the calculation of the allowance for loan and lease losses for periods subsequent to the acquisition date. In addition, if estimated losses on acquired loans exceed the fair value adjustment established at acquisition, allowances will be established by a charge to provision for credit losses.

The provision for loan and lease losses charged to operations during the first nine months of 2009 equaled \$57.7 million, compared to \$43.3 million during the comparable period of 2008. The \$14.5 million increase resulted from higher net charge-offs, the impact of commercial loan downgrades, and changes in loss projections for revolving mortgage loans. Net charge-offs during the first nine months of 2009 equaled \$50.0 million compared to \$27.3 million during 2008. The increases were concentrated in residential construction loans, revolving credit and other consumer loans. Commercial and business loan losses remained modest. On an annualized basis, net charge-offs represent 0.57 percent of average loans and leases during the first nine months of 2009 compared to 0.33 percent in the first nine months of 2008.

Table 9 provides details concerning the allowance for loan and lease losses during the past five quarters. The provision for credit losses, allowance for loan and lease losses and net charge-offs relate primarily to non-covered loans, as post-acquisition amounts related to covered loans have not been material. Post-acquisition deterioration in credit quality will affect future provision for credit losses.

Table of Contents

Interest rate risk. Interest rate risk results principally from assets and liabilities maturing or repricing at different points in time, from assets and liabilities repricing at the same point in time but in different amounts and from short-term and long-term interest rates changing in different magnitudes. External interest rates may also have a direct or indirect impact on the interest rate and repricing characteristics of loans and leases that are originated as well as the rate characteristics of our interest-bearing liabilities.

We do not typically utilize interest rate swaps, floors, collars or other derivative financial instruments to attempt to hedge our rate sensitivity and general balance sheet interest rate risk. However, in conjunction with the issuance of \$115.0 million in trust preferred securities in 2006, we entered into an interest rate swap to synthetically convert the variable rate coupon on the securities to a fixed rate of 7.125 percent for a period of five years. As a result of favorable market interest rates during the second quarter of 2009, we entered into a second five-year interest rate swap that will similarly convert the variable coupon rate to a fixed rate of 5.50 percent from June 2011 through June 2016.

We assess our interest rate risk by simulating future amounts of net interest income under various interest rate scenarios and comparing those results to forecasted net interest income assuming stable rates. These simulations indicate that net interest income will vary by no more than 4.0 percent when interest rates rise or decline by 200 basis points. We also utilize the market value of equity as a tool in measuring and managing interest rate risk. The market value of equity as a percentage of the economic value of assets is estimated to range from 7.5 percent to 9.4 percent when interest rates move 200 basis points in either direction.

Liquidity Risk. Liquidity risk results from the mismatching of asset and liability cash flows. We manage this risk by structuring our balance sheet prudently and by maintaining various borrowing resources to fund potential cash needs. We have historically maintained a strong focus on liquidity, and our deposit base represents our primary liquidity source. Through our deposit pricing strategies, we have the ability to stimulate or curtail deposit growth. We maintain additional sources for borrowed funds through federal funds lines of credit, Federal Home Loan Bank advances, and other borrowing facilities. We also utilize deposit brokers and the CDARS[®] program to provide limited wholesale funding. At September 30, 2009, we had access to \$500.0 million in unfunded borrowings through arrangements with various banks and approximately \$850.0 million of borrowing capacity at the Federal Home Loan Bank of Atlanta.

Once we have generated the needed liquidity and satisfied our loan and lease demand, residual liquidity is invested in overnight and longer-term investment products. Net of amounts pledged for various purposes, investment securities available for sale provide immediate liquidity as needed.

SEGMENT REPORTING

BancShares conducts its banking operations through its two banking subsidiaries, FCB and ISB. FCB and ISB offer similar products and services to customers. We monitor growth and financial results in these institutions separately and, within each institution, by geographic segregation.

Although FCB's growth in 2009 has primarily resulted from acquisitions, throughout its history the majority of its expansion has been accomplished on a *de novo* basis. Because of its size, the initial costs associated with FCB's expansion are not material to its financial performance. Since ISB began operations in 1997, it has followed a *de novo* business model for growth and expansion. However, due to the rapid pace of its growth and the number of branch offices that have not attained sufficient size to achieve profitability, the financial results and trends of ISB are significantly affected by its recent expansion. Losses incurred since ISB's inception total \$81.3 million.

In the aggregate, FCB and ISB account for more than 90 percent of consolidated assets, revenues and net income. All other entities are combined for segment disclosure purposes, including activities of the parent company and Neuse, Incorporated (Neuse), a subsidiary that owns real property.

IronStone Bank. At September 30, 2009, ISB operated 56 facilities in twelve states. Assets totaled \$2.64 billion at September 30, 2009 and 2008. ISB reported a net loss of \$17.7 million during the first nine months of 2009, compared to a net loss of \$19.5 million reported during 2008. The lower net loss in 2009 resulted from higher net interest income and a reduction in the provision for loan and lease losses. Net interest income increased \$7.4 million or 14.8 percent in 2009, the result of an improved net yield on interest-earning assets.

Table of Contents

The provision for credit losses totaled \$26.7 million during the first nine months of 2009, an increase of \$2.9 million due to allowances for downgraded and nonperforming residential construction loans. Net charge-offs increased from \$13.5 million in 2008 to \$24.6 million in 2009. On an annualized basis, the ratio of current year net charge-offs to average loans and leases outstanding equaled 1.51 percent, compared to 1.66 percent in the prior year. For the third quarter of 2009, net charge-offs totaled \$6.5 million, an increase of \$208,000 over the same period of 2008. Net charge-offs represent 1.20 percent of average loans and leases for the third quarter of 2009, compared to 2.19 percent for the same period of 2008.

Noninterest income increased \$1.1 million or 12.3 percent from \$8.9 million in 2008 to \$10.0 million in 2009. Improvements were noted in cardholder and merchant services income and mortgage income.

Noninterest expense increased \$3.4 million or 5.3 percent during the first nine months of 2009, versus the same period of 2008. Salaries and wages decreased \$1.9 million or 7.9 percent during the first nine months of 2009, the result of branch closings. FDIC deposit insurance expense increased \$2.4 million due to higher rates and a special assessment. Expenses related to the maintenance and resolution of other real estate surged \$3.8 million due to higher balances of other real estate owned. Similar variances were noted in the comparison of the third quarter of 2009 to the same period of 2008.

During the third quarter of 2009 Neuse purchased from ISB foreclosed properties with a carrying value of \$6.5 million, bringing 2009 total purchases to \$14.3 million. This transaction will benefit ISB by reducing problem assets and improve certain operating ratios.

First-Citizens Bank & Trust Company. At September 30, 2009, FCB operated 355 branches in five mid-Atlantic states. Additionally, as a result of the acquisition transactions related to TVB and VB, FCB added 11 branches in California and 18 branches in Washington. FCB's total assets increased \$2.11 billion from \$13.71 billion at September 30, 2008 to \$15.82 billion at September 30, 2009. First Citizens earned \$124.0 million during the first three quarters of 2009, compared to net income of \$102.6 million during 2008. The \$21.4 million increase in net income resulted from gains associated with the acquisition of TVB and VB.

Net interest income decreased \$7.6 million or 2.3 percent during 2009, due to falling interest rates and a lower net yield on interest-earning assets. Noninterest income increased \$84.8 million from \$239.6 million in the first nine months of 2008 to \$324.4 million in the first nine months of 2008, due to the acquisition gains.

Noninterest expense increased \$28.5 million or 7.2 percent during 2009, primarily the result of an \$18.8 million increase in FDIC insurance costs and a \$4.5 million increase in salary expense. FDIC insurance expense was also the primary cause of the increase in noninterest expense during the third quarter of 2009, when compared to the same period of 2008.

The provision for loan and lease losses increased \$11.6 million due to higher net charge-offs. On an annualized basis, the ratio of current year net charge-offs to average loans and leases outstanding equaled 0.35 percent, compared to 0.20 percent in the prior year. Net charge offs in the third quarter of 2009 equaled 0.35 percent of total loans and leases, compared to 0.38 percent during the third quarter of 2008.

IMPAIRMENT

US GAAP requires that we perform an impairment test each year to determine if goodwill is impaired. Annual impairment tests have been conducted as of July 31 each year, and have not indicated impairment exists. We performed the annual goodwill impairment test during the third quarter of 2009, and there was no impairment of goodwill.

The goodwill impairment test requires a two-step method to evaluate and calculate impairment. The first step requires estimation of each reporting unit's fair value. If the fair value exceeds the carrying value, no further testing is required. If the carrying value exceeds the fair value, we are required to determine whether an impairment charge must be recorded and, if so, the amount of such charge. Based on the results of the first step, there was no indication of potential impairment for FCB's goodwill; however, the test indicated that an impairment of ISB's \$793,000 of goodwill was possible.

The evaluation of impairment performed in the second step included the preparation of a fair value balance sheet for ISB to confirm whether impairment exists. Based on the fair value estimates considered in the analysis, including fair value discounts recognized on assets that are not carried at fair value, goodwill was not impaired for ISB. Therefore, no impairment of goodwill was recorded during the third quarter of 2009 as a result of the annual goodwill impairment test.

Table of Contents

In addition to the annual testing requirement, we are required to test goodwill for impairment for various other events including significant adverse change in the business climate. Throughout much of 2009, the market price of our common stock was lower than book value, suggesting the possibility of impairment. We conducted impairment tests as of June 30, 2009 and March 31, 2009 and concluded that no impairment existed.

As of September 30, 2009, the market price of our common stock traded above book value, and no impairment test was performed. If the stock price deteriorates, subsequent impairment tests may indicate that impairment exists. An impairment charge could have a significant impact on our consolidated income statement. However, a goodwill impairment charge would not impact our capital ratios as those ratios are calculated using tangible capital amounts.

LEGAL PROCEEDINGS

As previously disclosed, on May 24, 2004, FCB filed a lawsuit in the Circuit Court of Greenbrier County, West Virginia, against a customer claiming default under a master lease on a piece of equipment and eight promissory notes. The customer asserted a counterclaim against us alleging breach of lease, breach of fiduciary duty, breach of duty of good faith and fair dealing, and tortious interference with contractual relations. At trial, a jury returned a verdict against FCB and awarded a judgment of \$4.1 million in favor of our customer. FCB filed a motion to set aside the judgment or, in the alternative, for a new trial, but the Court denied FCB's motions. FCB filed a Petition for Review of the Circuit Court's action to the West Virginia Supreme Court of Appeals. On September 3, 2009, the Supreme Court of Appeals denied FCB's request. As a result, FCB paid a total of \$5.3 million to the customer, which represents the jury award plus approximately \$1.1 million in interest and costs. Noninterest expense during the third quarter of 2009 included \$4.5 million related to the resolution of this matter.

BancShares and various subsidiaries have been named as defendants in various other legal actions arising from our normal business activities in which damages in various amounts are claimed. Although the amount of any ultimate liability with respect to those other matters cannot be determined, in the opinion of management, any such liability will not have a material effect on BancShares' consolidated financial statements.

CURRENT ACCOUNTING AND REGULATORY ISSUES

Recent changes to US GAAP have resulted in the following:

Accounting for business combinations - established the acquisition method of accounting for all business combinations and required that an acquirer be identified for each business combination; required the acquirer to recognize the fair value of assets acquired, liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date; required that acquisition-related costs and restructuring costs be recognized as period expenses as incurred;

Accounting for derivatives - expanded disclosures regarding how and why derivative instruments are used, how derivative instruments and related hedged items are accounted for and how derivative instruments and related hedged items affect the balance sheet, income statement and statement of cash flows; these changes were effective January 1, 2009;

Other than temporary impairment of investment securities - revised method of calculating other than temporary impairment (OTTI) for debt securities; an entity must now record an OTTI charge if it intends to sell a debt instrument or if it can not assert it is more likely than not that it will not have to sell the security before recovery; if the entity does not intend to sell the security but does not expect to recover the amortized cost basis, the amount of the impairment that results from issuer credit will be reported in earnings and the remaining impairment related to liquidity will be reflected in other comprehensive income;

Fair value disclosures - expanded fair value disclosures about financial instruments in interim financial statements as well as disclosures about estimation methods and disclosure of changes in method from prior periods; also in situations when markets normally used to establish fair values are not orderly, a company must consider whether an observed transaction was not orderly based on the weight of available evidence.

Each of these changes was implemented during 2009. Except for the changes related to accounting for business combinations, none of the changes had a material impact on our financial condition, results of operations or liquidity.

Edgar Filing: FIRST CITIZENS BANCSHARES INC /DE/ - Form 10-Q

In response to the challenges facing the financial services sector, several regulatory and governmental actions have been enacted including The Emergency Economic Stabilization Act, the TARP Capital Purchase Program and the Temporary Liquidity Guarantee Program (TLGP). Based on the expectation that our current capital levels will be adequate to sustain our growth for the foreseeable future, we did not apply to participate in the TARP Capital Purchase Program. Further, we waived the right to participate in the TLGP guarantee of unsecured debt. However, we did elect to participate in the TLGP's enhanced deposit insurance program.

While it is possible that further regulatory actions will arise as the Federal government continues to address the economic situation, management is not aware of any further recommendations by regulatory authorities that, if implemented, would have or would be reasonably likely to have a material effect on liquidity, capital ratios or results of operations.

Table of Contents

FORWARD-LOOKING STATEMENTS

Statements in this Report and exhibits relating to plans, strategies, economic performance and trends, projections of results of specific activities or investments, expectations or beliefs about future events or results, and other statements that are not descriptions of historical facts, may be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934.

Forward-looking information is inherently subject to risks and uncertainties, and actual results could differ materially from those currently anticipated due to a number of factors, which include, but are not limited to, factors discussed in our Annual Report on Form 10-K and in other documents filed by us from time to time with the Securities and Exchange Commission.

Forward-looking statements may be identified by terms such as may, will, should, could, expects, plans, intends, anticipates, believe, predicts, forecasts, projects, potential or continue, or similar terms or the negative of these terms, or other statements concerning opinions or judgments of BancShares management about future events.

Factors that could influence the accuracy of those forward-looking statements include, but are not limited to, the financial success or changing strategies of our customers, customer acceptance of our services, products and fee structure, the competitive nature of the financial services industry, our ability to compete effectively against other financial institutions in our banking markets, actions of government regulators, the level of market interest rates and our ability to manage our interest rate risk, changes in general economic conditions that affect our loan and lease portfolio, the abilities of our borrowers to repay their loans and leases, the values of real estate and other collateral, the impact of the acquisitions of Temecula Valley Bank and Venture Bank, and other developments or changes in our business that we do not expect.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. We have no obligation to update these forward-looking statements.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Market risk is the potential economic loss resulting from changes in market prices and interest rates. This risk can either result in diminished current fair values of financial instruments or reduced net interest income in future periods. As of September 30, 2009, BancShares' market risk profile has not changed significantly from December 31, 2008. Changes in fair value that result from movement in market rates cannot be predicted with any degree of certainty. Therefore, the impact that future changes in market rates will have on the fair values of financial instruments is uncertain.

Item 4. Controls and Procedures

BancShares' management, with the participation of its Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of BancShares' disclosure controls and procedures in accordance with Rule 13a-15 of the Securities Exchange Act of 1934 (Exchange Act). Based on their evaluation, except as described in Part II, Item 5 below, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, BancShares' disclosure controls and procedures were effective to provide reasonable assurance that BancShares is able to record, process, summarize and report in a timely manner the information required to be disclosed in reports it files under the Exchange Act. BancShares' management has taken steps to ensure that, in the future, it is able to timely report information required to be reported regarding transactions of the type described in Part II, Item 5, below.

No change in BancShares' internal control over financial reporting occurred during the third quarter of 2009 that had materially affected, or is reasonably likely to materially affect, BancShares' internal control over financial reporting.

Table of Contents

PART II

Item 1A. Risk Factors

Unfavorable changes in economic conditions

BancShares' business is highly affected by national, regional and local economic conditions. These conditions cannot be predicted or controlled, and may have a material impact on our operations and financial condition. Unfavorable economic developments such as an increase in unemployment rates, decreases in real estate values, rapid changes in interest rates, higher default and bankruptcy rates and various other factors could weaken the national economy as well as the economies of specific communities we serve. Weakness in our market areas could depress our earnings and financial condition because borrowers may not be able to repay their loans, collateral values may fall, and the general quality of our loan portfolio may decline.

Deposit insurance premiums

During 2009, due to a higher level of bank failures, the FDIC increased recurring deposit insurance premiums and imposed a special assessment on insured financial institutions. Due to the continuing volume of bank failures, it is possible that higher deposit insurance rates or additional special assessments will be required to restore the Deposit Insurance Fund to the Congressionally-established target.

Instability in real estate markets

Disruption in residential housing markets including reduced sales activity and falling market prices have adversely affected collateral values and customer demand, particularly with respect to our operations in Atlanta, Georgia and southwest Florida. Instability in residential and commercial real estate markets could result in higher credit losses in the future if customers default on loans that, as a result of lower property values, are no longer adequately collateralized. The weak real estate markets could also affect our ability to sell other real estate owned.

Gain on acquisitions

The gain recorded during the third quarter of 2009 is preliminary and subject to revision for a period of one year following the acquisition date. Revisions would be made based on additional information that becomes available that affects the acquisition date fair values of assets acquired and liabilities assumed.

Access to capital

Based on existing capital levels, BancShares and its subsidiary banks maintain well-capitalized ratios under current leverage and risk-based capital standards. On a proforma basis considering the impact of the acquisition of Temecula Valley Bank, BancShares and FCB retain their well-capitalized status. Historically, our primary capital sources have been retained earnings and debt issued through both private and public markets including trust preferred capital securities and subordinated debt. The market for trust preferred capital securities has been severely limited during the current economic environment, and our ability to raise capital by issuing trust preferred capital securities at reasonable rates is highly questionable. A lack of access to capital could limit our ability to make new loans, to meet our existing lending commitments and could potentially affect our liquidity and capital adequacy.

The major rating agencies regularly evaluate our creditworthiness and assign credit ratings to the debt of BancShares and one of our bank subsidiaries. The agencies' ratings are based on a number of factors, some of which are not within our control. In addition to factors specific to our financial strength and performance, the rating agencies also consider conditions affecting the financial services industry generally. In light of the difficulties currently confronting the financial services industry, there can be no assurance that we will maintain our current credit ratings. Rating reductions could adversely affect our access to funding sources and the cost of obtaining funding. Long-term debt ratings also factor into the calculation of deposit insurance premiums, and a reduction in our subsidiary banks' ratings would increase premiums and expense.

Condition of other financial institutions

Financial services institutions are interrelated as a result of trading, clearing, counterparty, or other relationships. We have exposure to many different financial service providers, including other banks, brokers and dealers in securities, and other institutional clients. Transactions with other financial institutions expose us to credit risk in the event of default of the counterparty. These types of losses could materially and

adversely affect our results of operations or earnings.

Table of Contents

Changes in interest rates

Our earnings and financial condition are highly dependent upon net interest income. The compression of interest rate spreads has adversely affected our earnings and financial condition. We cannot predict with certainty changes in interest rates or actions by the Federal Reserve that may have a direct impact on interest rates. While we maintain policies and procedures designed to mitigate the risks associated with changes in interest rates, those changes may nonetheless have further adverse effects on our profitability.

Changes in banking laws

Financial institutions are regulated under federal and state banking laws and regulations that primarily focus on the protection of depositors, federal deposit insurance funds and the banking system as a whole. Federal and state banking regulators possess broad powers to take supervisory actions as they deem appropriate. These supervisory actions may result in higher capital requirements, higher insurance premiums and limitations on activities that could have a material adverse effect on our results of operations.

In addition, financial institutions are significantly affected by changes in economic and monetary policies. The current economic environment will likely result in increased compliance requirements, some of which may affect our results of operations.

Competition

There is intense competition among commercial banks in our market areas. In addition, we compete with other providers of financial services, such as credit unions, consumer finance companies, commercial finance and leasing companies and brokerage firms as well as other institutions that deliver their products and services through alternative delivery networks. Some of our larger competitors, including various banks that have a significant presence in our market areas, have the capacity to offer products and services we do not offer.

Catastrophic events

The occurrence of catastrophic events including weather-related events such as hurricanes, tropical storms, floods, windstorms or severe winter weather, as well as earthquakes, pandemic disease, fires and other catastrophes could adversely affect our consolidated financial condition or results of operations.

In addition to natural catastrophic events, man-made events such as acts of terror and governmental response to acts of terror could adversely affect general economic conditions, which could have a material impact on our results of operations.

Unpredictable natural and other disasters could have an adverse effect if those events materially disrupt our operations or affect customers' access to the financial services we offer. Although we carry insurance to mitigate our exposure to certain catastrophic events, catastrophic events could nevertheless affect our results of operations.

Operational and data security risk

We are exposed to many types of operational risks, including reputational risk, legal and compliance risk, the risk of illegal activities conducted by employees or outsiders, data security risk and operational errors. Our dependence on automated systems, including the automated systems used by acquired entities, to record and process transactions may further increase the risk that technical failures or tampering of those systems will result in losses that are difficult to detect. We are also subject to disruptions of our operating systems arising from events that are wholly or partially beyond our control.

Liquidity

Liquidity is essential to our businesses. Our deposit base represents our primary source of liquidity, and we normally have the ability to stimulate deposit growth through our pricing strategies. However, in circumstances where our ability to generate needed liquidity is impaired, we would need access to alternative liquidity sources such as overnight or other short-term borrowings. While we maintain access to alternative funding sources, we are dependent on the counterparty's willingness to lend to us and their liquidity capacity.

Table of Contents

Reliance on vendors

Third party vendors provide key components of our business infrastructure. Failures of these third parties to provide services for any reason could adversely affect our ability to deliver products and services to our customers. Replacing these third party vendors could also result in interruption of service and significant expense.

Litigation

The frequency of claims and amount of damages and penalties claimed in litigation and regulatory proceedings against financial institutions remain high. Substantial legal liability or significant regulatory action against us may have material adverse financial effects or cause significant reputational harm.

Interpretation of tax laws and regulations

Our interpretation of federal, state or local tax laws and regulations that allow for our estimation of tax liabilities may differ from tax authorities. Those differing interpretations may result in the disallowance of deductions or credits, differences in the timing of deductions or other differences that could result in the payment of additional taxes, interest or penalties that could materially affect our results of operations.

Changes in accounting standards

The Financial Accounting Standards Board periodically modifies the standards that govern the preparation of our financial statements. These changes are not predictable and can materially impact how we record and report our financial condition and results of operations. In some cases, we could be required to apply a new or revised standard retroactively, resulting in changes to previously reported financial results or a cumulative adjustment to retained earnings.

Mergers and acquisitions

We must receive federal and state regulatory approvals before we can acquire a bank or bank holding company. Prior to granting approval, bank regulators will consider, among other factors, the effect of the acquisition on competition, financial condition and future prospects including current and projected capital ratios, the competence, experience and integrity of management, our record of compliance with laws and regulations, and the convenience and needs of the communities to be served, including our record of compliance under the Community Reinvestment Act. We cannot be certain when or if any required regulatory approvals will be granted or what conditions may be imposed by the approving authority.

In addition to the risks related to regulatory approvals, complications in the conversion of operating systems, data systems and products may result in the loss of customers, damage to our reputation, operational problems, one-time costs currently not anticipated or reduced cost savings resulting from a merger or acquisition. The integration could result in higher than expected deposit attrition, loss of key employees, disruption of our businesses or the businesses of the acquired company, or otherwise adversely affect our ability to maintain relationships with customers and employees or achieve the anticipated benefits of the acquisition.

With respect to the 2009 acquisitions, the exposures to prospective losses on certain assets are covered under loss sharing agreements with the FDIC. These loss sharing agreements impose certain obligations on us that, in the event of noncompliance could result in the disallowance of our rights under the loss sharing agreements.

Volatility in stock price and impairment of goodwill

Market prices of our common stock price can fluctuate widely in response to a variety of factors including expectations of operating results, actual operating results, market perception of business combinations, stock prices of other companies that are similar to BancShares, general market expectations related to the financial services industry, and the potential impact of government actions affecting the financial services industry.

General market fluctuations, industry factors and general economic and political conditions and events, such as economic slowdowns or recessions, interest rate changes or credit loss trends could also cause our stock price to decrease regardless of our operating results.

Edgar Filing: FIRST CITIZENS BANCSHARES INC /DE/ - Form 10-Q

Goodwill is tested for impairment at least annually and the impairment test compares the estimated fair value of a reporting unit with its net book value. A write-off of impaired goodwill could have a significant impact on our results of operations, but would not impact our capital ratios as such ratios are calculated using tangible capital amounts.

Table of Contents

Item 5. Other information

A Current Report on Form 8-K filed by BancShares during the period covered by this report in connection with its purchase and assumption from the Federal Deposit Insurance Corporation of certain of the assets and liabilities of a troubled financial institution in receivership did not contain, and has not been timely amended as permitted by the reporting rules to include, all information required to be disclosed regarding that transaction. BancShares currently is assembling the additional information, which requires an audit of the acquired assets and liabilities, and will report that information by amendment to its Form 8-K as soon as the information is available.

Item 6. Exhibits

- 31.1 Certification of Chief Executive Officer
- 31.2 Certification of Chief Financial Officer
- 32.1 Certifications of Chief Executive Officer
- 32.2 Certifications of Chief Financial Officer
