SAFE HARBOR STATEMENT

The matters discussed in this Quarterly Report contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements, which are not statements of historical fact, contain estimates, assumptions, projections and/or expectations regarding future events, which may or may not occur. Words such as aim, anticipate, assume, believe, continue, could, expect, foresee, guidance, intend, may, might, objective, plan, potential, project, seek, shall, should, target, will, other expressions that refer to future events and trends, identify forward-looking statements. These forward-looking statements, and financial or other business targets, are subject to certain risks and uncertainties, which could cause actual results to differ materially from expected results, performance or achievements of the Company expressed or implied by such forward-looking statements.

Certain risks and uncertainties are discussed in more detail under Risk Factors and Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's Annual Report on Form 10-K for the year ended January 1, 2011 and subsequent Quarterly Reports on Form 10-Q, and include, but are not limited to, risks and uncertainties relating to the following: fluctuations in demand affecting sales to customers; the financial condition and inventory strategies of customers; changes in customer order patterns; worldwide and local economic conditions; fluctuations in cost and availability of raw materials; ability of the Company to generate sustained productivity improvement; ability of the Company to achieve and sustain targeted cost reductions; impact of competitive products and pricing; loss of significant contracts or customers; collection of receivables from customers; selling prices; business mix shift; changes in tax laws and regulations; outcome of tax audits; timely development and market acceptance of new products, including sustainable or sustainably-sourced products; investment in development activities and new production facilities; fluctuations in foreign currency exchange rates and other risks associated with foreign operations; integration of acquisitions and execution of divestitures; customer and supplier concentrations; successful implementation of new manufacturing technologies and installation of manufacturing equipment; disruptions in information technology systems; successful installation of new or upgraded information technology systems; volatility of financial markets; impairment of capitalized assets, including goodwill and other intangibles; credit risks; ability of the Company to obtain adequate financing arrangements and maintain access to capital; fluctuations in interest and tax rates; fluctuations in pension, insurance and employee benefit costs; impact of legal and regulatory proceedings, including with respect to environmental, health and safety; changes in governmental laws and regulations; changes in political conditions; impact of epidemiological events on the economy and the Company's customers and suppliers; acts of war, terrorism, and natural disasters; and other factors.

The Company believes that the most significant risk factors that could affect its financial performance in the near-term include (1) economic conditions on underlying demand for the Company's products; (2) the degree to which higher costs can be offset with productivity measures and/or passed on to customers through selling price increases, without a significant loss of volume; (3) competitors' actions, including pricing, expansion in key markets, and product offerings; and (4) changes in tax laws, regulations, and uncertainties associated with interpretations of such laws and regulations.

The Company's forward-looking statements represent judgments only on the dates such statements were made. By making these forward-looking statements, the Company assumes no duty to update them to reflect new, changed or unanticipated events or circumstances, other than as may be required by law.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**Note 1. General**

In the opinion of management, the accompanying unaudited condensed consolidated financial statements include normal recurring adjustments necessary for a fair statement of the interim results of Avery Dennison Corporation (the Company). The unaudited condensed consolidated financial statements and notes in this Quarterly Report on Form 10-Q are presented as permitted by Article 10 of Regulation S-X. The unaudited condensed consolidated financial statements do not contain certain information included in the Company's audited consolidated financial statements and notes thereto in its 2010 Annual Report on Form 10-K, which should be read in conjunction with this Quarterly Report on Form 10-Q.

During the first quarter of 2011, the Company changed the names of certain of its segments and businesses. The Company's Retail Information Services segment was changed to Retail Branding and Information Solutions. Within the Company's Pressure-sensitive Materials segment, the names of the Roll Materials business and Graphics and Reflective Products business were changed to Label and Packaging Materials and Graphics and Reflective Solutions, respectively.

The third quarters of 2011 and 2010 consisted of thirteen-week periods ending October 1, 2011 and October 2, 2010, respectively. The interim results of operations are not necessarily indicative of future financial results.

Note 2. Inventories

Inventories, net, consisted of:

(In millions)	October 1, 2011	January 1, 2011
Raw materials	\$ 257.8	\$ 243.3

Indefinite-lived Intangible Assets

The carrying value of indefinite-lived intangible assets resulting from business acquisitions, consisting of trade names and trademarks, was \$18 million at October 1, 2011 and January 1, 2011.

Table of Contents

Avery Dennison Corporation

Finite-lived Intangible Assets

The following table sets forth the Company's finite-lived intangible assets resulting from business acquisitions at October 1, 2011 and January 1, 2011, which continue to be amortized:

	October 1, 2011			January 1, 2011		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
(In millions)						
Customer relationships	\$ 291.7	\$ 139.1	\$ 152.6	\$ 291.9	\$ 119.2	\$ 172.7

Total	\$ 404.7	\$ 219.1	\$ 185.6	\$ 404.7	\$ 193.8	\$ 210.9

Amortization expense for finite-lived intangible assets resulting from business acquisitions was \$8.5 million and \$25.3 million for the three and nine months ended October 1, 2011, respectively, and \$8.3 million and \$24.6 million for the three and nine months ended October 2, 2010, respectively.

The estimated amortization expense for finite-lived intangible assets resulting from business acquisitions for the remainder of the current fiscal year and each of the next four fiscal years is expected to be as follows:

	Estimated Amortization Expense
(In millions)	
Remainder of 2011	\$ 8.0
2012	33.0
2013	31.4
2014	27.7
2015	24.2

Note 4. Debt

The fair value of the Company's debt is primarily based on the credit spread above U.S. Treasury securities on notes with similar rates, credit rating, and remaining maturities. The fair value of the Company's total debt, including short-term borrowings, was \$1.44 billion at October 1, 2011 and \$1.40 billion at January 1, 2011. Fair value amounts were primarily based on Level 2 inputs, which are defined as inputs other than quoted prices in active markets that are either directly or indirectly observable.

As of October 1, 2011, the Company was in compliance with its financial covenants.

Note 5. Pension and Other Postretirement Benefits

The following table sets forth the components of net periodic benefit cost for the periods shown:

The Company contributed \$37.6 million and \$2.4 million to its U.S. pension plans during the nine months ended October 1, 2011 and October 2, 2010, respectively. During the remainder of 2011, the Company expects to contribute approximately \$10 million to its U.S. pension plans. The Company contributed \$1.6 million and \$2.7 million to its U.S. postretirement health benefit plan during the nine months ended October 1, 2011 and October 2, 2010, respectively. During the remainder of 2011, the Company expects to contribute approximately \$1 million to its U.S. postretirement health benefit plan.

The Company contributed approximately \$17 million and \$19 million to its international pension plans during the nine months ended October 1, 2011 and October 2, 2010, respectively. During the remainder of 2011, the Company expects to contribute approximately \$4 million to its international pension plans.

The Company recognized expense of \$6.5 million and \$22 million for the three and nine months ended October 1, 2011, respectively, and \$2.8 million and \$9.1 million for the three and nine months ended October 2, 2010, respectively, related to its match of participant contributions to its U.S. defined contribution plan. These contributions were funded using shares of the Company's common stock held in the Company's Employee Stock Benefit Trust (ESBT) prior to the ESBT's termination. The ESBT terminated on July 21, 2011 as a result of the utilization of the remaining shares held therein, and thereafter, the Company began funding these contributions using shares of the Company's common stock held in treasury.

Subsequent to the third quarter of 2011, the Company made certain changes to its U.S. postretirement health benefit plan. As a result of these changes, retiree medical premiums for eligible participants who retire after December 31, 2013 will no longer be subsidized by the Company. In addition, beginning January 1, 2012, retiree medical premiums for eligible participants who retired on or after January 1, 2007 will be based on the claims expense of the retiree group, resulting in a higher premium rate for retirees and lower claims expense for the Company.

Note 6. Research and Development

Research and development expense for the three and nine months ended October 1, 2011 was \$26.4 million and \$77.3 million, respectively. For the three and nine months ended October 2, 2010, research and development expense was \$23.4 million and \$69.7 million, respectively. Research and development expense was included in Marketing, general and administrative expense in the unaudited Consolidated Statements of Income.

Note 7. Stock-Based Compensation

Net income included stock-based compensation expense related to stock options, performance units (PUs), restricted stock units (RSUs) and restricted stock of \$9.2 million and \$29.9 million for the three and nine months ended October 1, 2011, respectively, and \$9.8 million and \$25.9 million for the three and nine months ended October 2, 2010, respectively. Total stock-based compensation expense was included in Marketing, general and administrative expense in the unaudited Consolidated Statements of Income.

In February and April 2011, the Company granted its annual stock-based compensation awards to eligible employees and directors, respectively. Awards granted to retirement-eligible employees vest in full upon retirement; as such, awards to these employees are treated as though the awards were fully vested as of the date of grant. Compensation expense related to awards granted to retirement-eligible employees of \$4.5 million and \$.6 million was recognized and included in stock-based compensation expense during the nine months ended October 1, 2011 and October 2, 2010, respectively.

Edgar Filing: Avery Dennison Corp - Form 10-Q

As of October 1, 2011, the Company had approximately \$63 million of unrecognized compensation cost related to unvested stock options, PUs, RSUs and restricted stock. This unrecognized compensation expense is expected to be recognized over the remaining weighted-average requisite service period of approximately two years for stock options and RSUs, and one year for restricted stock and PUs.

Table of Contents

Avery Dennison Corporation

Through the second quarter of 2011, exercises of stock options and releases of RSUs and PUs were settled using shares of the Company's common stock held in the ESBT. After the ESBT terminated, the Company began using shares of the Company's common stock held in treasury to settle awards under the Company's stock option and incentive plans.

Note 8. Cost Reduction Actions

Severance charges under the restructuring actions below were recorded to Other current liabilities in the unaudited Condensed Consolidated Balance Sheets. Severance and related costs represented cash paid or to be paid to employees terminated under these actions. Asset impairments were based on the estimated market value of the assets. Charges below were included in Other expense, net in the unaudited Consolidated Statements of Income.

2011

During the first nine months of 2011, the Company implemented restructuring actions and recorded charges of \$28.5 million, which consisted of \$24.3 million of severance and related costs and \$4.2 million of asset impairment and lease cancellation charges. These actions are expected to result in the reduction of approximately 700 positions across all segments and geographic regions. As of October 1, 2011, approximately 65 of these employees remained with the Company and are expected to leave by the first quarter of 2012.

Accruals and payments for severance and related costs and charges for asset impairments and lease cancellations, by reportable segment and other businesses during the periods presented, were as follows:

2010

Edgar Filing: Avery Dennison Corp - Form 10-Q

In 2010, the Company continued its cost reduction program initiated in late 2008 and implemented additional restructuring actions, resulting in the reduction of approximately 1,040 positions, impairment of certain assets, and lease cancellations. At October 1, 2011, approximately 10 employees impacted by these actions remained with the Company and are expected to leave in 2011. In 2010, charges related to these actions totaled \$19 million, including severance and related costs of \$15.3 million, and asset impairment and lease cancellation charges of \$3.7 million.

Note 9. Financial Instruments and Foreign Currency

The Company enters into certain foreign exchange hedge contracts to reduce its risk from exchange rate fluctuations associated with receivables, payables, loans and firm commitments denominated in certain foreign currencies that arise primarily as a result of its operations outside the U.S. The Company enters into certain interest rate contracts to help manage its exposure to interest rate fluctuations. The Company also enters into certain natural gas and other commodity futures contracts to hedge price fluctuations for a portion of its anticipated domestic purchases. The maximum length of time for which the Company hedges its exposure to the variability in future cash flows for forecasted transactions is 12 to 24 months.

As of October 1, 2011, the aggregate U.S. dollar equivalent notional value of the Company's outstanding commodity contracts and foreign exchange contracts was \$10.6 million and \$1.17 billion, respectively.

The Company recognizes all derivative instruments as either assets or liabilities at fair value in the unaudited Condensed Consolidated Balance Sheets. The Company designates commodity forward contracts on forecasted purchases of commodities and foreign exchange contracts on forecasted transactions as cash flow hedges and foreign exchange contracts on existing balance sheet items as fair value hedges.

The following table provides the balances and locations of derivatives as of October 1, 2011:

Edgar Filing: Avery Dennison Corp - Form 10-Q

Fair Value Hedges

For derivative instruments that are designated and qualify as fair value hedges, the gain or loss on the derivative, as well as the offsetting loss or gain on the hedged item attributable to the hedged risk, are recognized in current earnings, resulting in no material net impact to income.

The following table provides the components of the gain (loss) recognized in income related to fair value hedge contracts. The corresponding gains or losses on the underlying hedged items approximated the net gain (loss) on these fair value hedge contracts.

(In millions)	Location of Gain (Loss) in Income	Three Months Ended		Nine Months Ended	
		October 1, 2011	October 2, 2010	October 1, 2011	October 2, 2010
Foreign exchange contracts	Cost of products sold	\$ (.1)	\$ (.2)	\$.7	\$ (2.1)
Foreign exchange contracts	Marketing, general and administrative expense	(11.8)	.2	(13.8)	33.5
		\$ (11.9)	\$.2	\$ (13.1)	\$ 31.4

Cash Flow Hedges

For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative is reported as a component of Accumulated other comprehensive loss and reclassified into earnings in the same period(s) during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings.

Gains (losses) recognized in Accumulated other comprehensive loss (effective portion) on derivatives related to cash flow hedge contracts were as follows:

(In millions)	Three Months Ended		Nine Months Ended	
	October 1, 2011	October 2, 2010	October 1, 2011	October 2, 2010
Foreign exchange contracts	\$.8	\$ (.5)	\$.4	\$ (3.8)

	\$ (.3)	\$ (1.9)	\$ (1.3)	\$ (8.0)

Amounts reclassified from Accumulated other comprehensive loss (effective portion) related to cash flow hedge contracts were as follows:

(In millions)	Location of Loss in Income	Three Months Ended		Nine Months Ended	
		October 1, 2011	October 2, 2010	October 1, 2011	October 2, 2010

Edgar Filing: Avery Dennison Corp - Form 10-Q

\$ (1.5) \$ (3.1) \$ (5.5) \$ (8.5)

As of October 1, 2011, a net loss of approximately \$6 million is expected to be reclassified from Accumulated other comprehensive loss to earnings within the next 12 months. See Note 12, Comprehensive (Loss) Income, for more information.

Foreign Currency

Transactions in foreign currencies (including receivables, payables and loans denominated in currencies other than the functional currency) decreased net income by \$2.2 million and \$5.7 million for the three and nine months ended October 1, 2011, respectively, and \$2.3 million and \$5.3 million for the three and nine months ended October 2, 2010, respectively. These amounts exclude the effects from translation of foreign currencies on the Company's unaudited Condensed Consolidated Financial Statements.

During the three and nine months ended October 1, 2011 and October 2, 2010, no translation gains or losses for hyperinflationary economies were recognized in net income since the Company had no operations in hyperinflationary economies.

Note 10. Taxes Based on Income

The following table summarizes the Company's income before taxes, provision for income taxes, and effective tax rate for the periods presented:

(In millions)	Three Months Ended		Nine Months Ended	
	October 1, 2011	October 2, 2010	October 1, 2011	October 2, 2010
Income before taxes	\$ 70.9	\$ 77.0	\$ 249.1	\$ 279.7
Provision for income taxes	21.1	12.8	81.2	77.0
Effective tax rate	30%	17%	33%	28%

The increase in the effective tax rate for the three and nine months ended October 1, 2011 was primarily related to lower net benefits from releases and accruals of certain tax reserves and the impact of unfavorable changes in the geographic mix of the Company's income. The effective tax rate for the three and nine months ended October 1, 2011 included net benefits from the discrete events of releases and accruals of certain tax reserves, which were partially offset by accruals for other discrete items. The Company's effective tax rate is lower than the U.S. federal statutory rate of 35% due to the Company's operations in jurisdictions outside the U.S. where statutory tax rates are generally lower. Additional deferred taxes are not provided for most foreign earnings because the Company currently plans to indefinitely reinvest these amounts.

The amount of income taxes the Company pays is subject to ongoing audits by taxing jurisdictions around the world. The Company's estimate of the potential outcome of any uncertain tax issue is subject to management's assessment of relevant risks, facts, and circumstances existing at that time. The Company believes that it has adequately provided for reasonably foreseeable outcomes related to these matters. However, the Company's future results may include favorable or unfavorable adjustments to its estimated tax liabilities in the period the assessments are made, revised or resolved, which may impact the Company's effective tax rate and the amount of cash payments for taxes. With some exceptions, the Company and its subsidiaries are no longer subject to income tax examinations by tax authorities for years prior to 2006.

It is reasonably possible that during the next 12 months the Company may realize a decrease in its gross uncertain tax positions by approximately \$23 million, primarily as the result of making cash payments and closing tax years. The Company anticipates that it is reasonably possible that cash payments of up to \$7 million relating to gross uncertain tax positions could be made within the next 12 months.

Tax authorities in a foreign jurisdiction offered to settle certain tax matters relating to the 2002 through 2005 tax years for approximately \$25 million. The Company is currently evaluating its options regarding this matter. However, due to the technical merits of its position, the Company has not recorded a reserve for uncertain tax positions related to this matter.

Note 11. Net Income Per Share

Net income per common share was computed as follows:

(In millions, except per share amounts)	Three Months Ended		Nine Months Ended	
	October 1,	October 2,	October 1,	October 2,
	2011	2010	2011	2010

(B) Weighted-average number of common shares outstanding	106.0	105.8	105.7	105.6
Dilutive shares (additional common shares issuable under employee stock-based awards)	.6	1.3	1.0	1.1

Edgar Filing: Avery Dennison Corp - Form 10-Q

(C) Weighted-average number of common shares outstanding, assuming dilution	106.6	107.1	106.7	106.7
Net income per common share (A) ÷ (B)	\$.47	\$.61	\$ 1.59	\$ 1.92
Net income per common share, assuming dilution (A) ÷ (C)	\$.47	\$.60	\$ 1.57	\$ 1.90

Certain employee stock-based awards were not included in the computation of net income per common share, assuming dilution, because they would not have had a dilutive effect. Employee stock-based awards excluded from the computation totaled approximately 12 million shares and 11 million shares for the three and nine months ended October 1, 2011, respectively, and approximately 10 million shares for each of the three and nine months ended October 2, 2010.

Note 12. Comprehensive (Loss) Income

Comprehensive (loss) income includes net income, foreign currency translation adjustment, net actuarial loss, prior service cost and net transition assets, net of tax, and the gains or losses on the effective portion of cash flow and firm commitment hedges, net of tax, that are currently presented as a component of shareholders' equity. The Company's total comprehensive (loss) income was \$(45.0) million and \$146.8 million for the three and nine months ended October 1, 2011, respectively, and \$130.6 million and \$196.6 million for the three and nine months ended October 2, 2010, respectively.

The components of Accumulated other comprehensive loss (net of tax, with the exception of the foreign currency translation adjustment) in the unaudited Condensed Consolidated Balance Sheets were as follows:

(In millions)	October 1, 2011	January 1, 2011
Foreign currency translation adjustment	\$ 153.8	\$ 187.3
Net actuarial loss, prior service cost and net transition assets, less amortization	(313.0)	(321.2)
Net loss on derivative instruments designated as cash flow and firm commitment hedges	(4.8)	(9.0)
Accumulated other comprehensive loss	\$ (164.0)	\$ (142.9)

Cash flow and firm commitment hedging instrument activities in other comprehensive loss, net of tax, for the nine months ended October 1, 2011, were as follows:

(In millions)	
Beginning accumulated derivative loss	\$ (9.0)
Net loss reclassified to earnings	5.5
Net change in the revaluation of hedging transactions	(1.3)
Ending accumulated derivative loss	\$ (4.8)

Available for sale securities are measured at fair value using quoted prices and classified within Level 1 of the valuation hierarchy. Derivatives that are exchange-traded are measured at fair value using quoted market prices and are classified within Level 1 of the valuation hierarchy. Derivatives measured based on inputs that are readily available in public markets are classified within Level 2 of the valuation hierarchy. Available for sale securities were included in Other current assets in the unaudited Condensed Consolidated Balance Sheets.

Non-recurring Fair Value Measurements

Long-lived assets with carrying amounts totaling \$4.4 million were written down to their fair value of \$1.3 million, resulting in an impairment charge of \$3.1 million for the nine months ended October 1, 2011, which was included in Other expense, net in the unaudited Consolidated Statements of Income. Of the \$1.3 million, \$1.1 million was primarily based on Level 2 inputs and \$.2 million was primarily based on Level 3 inputs.

Long-lived assets with carrying amounts totaling \$2.4 million were written down to their fair values of \$1.9 million, resulting in an impairment charge of \$.5 million for the nine months ended October 2, 2010, which was included in Other expense, net in the unaudited Consolidated Statement of Income. Fair value amounts were primarily based on Level 2 inputs.

Note 14. Commitments and Contingencies

Legal Proceedings

The Company and its subsidiaries are involved in various lawsuits, claims, inquiries, and other regulatory and compliance matters, most of which are routine to the nature of the Company's business. Based upon current information, management believes that the impact of the resolution of these other matters is not, individually or in the aggregate, material to the Company's financial position, or is not reasonably estimable.

Environmental

As of October 1, 2011, the Company had been designated by the U.S. Environmental Protection Agency (EPA) and/or other responsible state agencies as a potentially responsible party (PRP) at thirteen waste disposal or waste recycling sites, which are the subject of separate investigations or proceedings concerning alleged soil and/or groundwater contamination and for which no settlement of the Company's liability has been agreed. The Company is participating with other PRPs at such sites, and anticipates that its share of cleanup costs will be determined pursuant to remedial agreements entered into in the normal course of negotiations with the EPA or other governmental authorities.

The Company has accrued liabilities for sites where it is probable that a loss will be incurred and the cost or amount of loss can be reasonably estimated. Because of the uncertainties associated with environmental assessment and remediation activities, future expense to remediate these sites could be higher than the liabilities accrued by the Company; however, the Company is unable to reasonably estimate a range of potential expenses. If information becomes available that allows the Company to reasonably estimate the range of potential expenses or an amount higher or lower than what it has accrued, the Company will adjust its environmental liabilities accordingly. In addition, the Company could identify additional sites for cleanup in the future. The range of expense for remediation of any future-identified sites will be addressed at the time of identification; consequently, until such sites are identified, the range of expense for remediation cannot be determined.

The activity for the nine months ended October 1, 2011 related to environmental liabilities was as follows:

(In millions)	
Balance at January 1, 2011	\$ 46.3
Accruals	.2
Payments	(4.2)
Balance at October 1, 2011	\$ 42.3

Edgar Filing: Avery Dennison Corp - Form 10-Q

As of October 1, 2011, approximately \$11 million of the total environmental liabilities balance was included in Other current liabilities in the unaudited Condensed Consolidated Balance Sheets.

These estimated liabilities could change as a result of changes in planned remedial actions, remediation technologies, site conditions, the estimated time to complete remediation, environmental laws and regulations, and other factors.

Avery Dennison Corporation

On September 9, 2005, the Company completed a ten-year lease financing for a commercial facility located in Mentor, Ohio, used primarily for the headquarters and research center of its Label and Packaging Materials division. The facility consists generally of land, buildings, equipment and office furnishings. The Company leases the facility under an operating lease arrangement, which contains a residual value guarantee of \$31.9 million, as well as certain obligations with respect to the refinancing of the lessor's debt of \$12.3 million (collectively, the Guarantee). At the end of the lease term, the Company has an option to either purchase or remarket the facility at an amount equivalent to the value of the Guarantee. During the second quarter of 2011, the Company estimated a shortfall with respect to the Guarantee and began to recognize the shortfall on a straight-line basis over the remaining lease term. The carrying amount of the shortfall was approximately \$3 million at October 1, 2011 and included in Long-term retirement benefits and other liabilities in the unaudited Condensed Consolidated Balance Sheets.

The Company participates in international receivable financing programs with several financial institutions whereby advances may be requested from these financial institutions. These advances are guaranteed by the Company. At October 1, 2011, the Company had guaranteed approximately \$14 million.

As of October 1, 2011, the Company guaranteed up to approximately \$17 million of certain foreign subsidiaries' obligations to their suppliers, as well as approximately \$472 million of certain subsidiaries' lines of credit with various financial institutions.

Note 16. Recent Accounting Requirements

In September 2011, the Financial Accounting Standards Board (FASB) issued updated guidance that simplifies goodwill impairment testing by allowing a qualitative review to assess whether a quantitative impairment analysis is necessary as a first step to the testing. Under this guidance, a company will not be required to calculate the fair value of a reporting unit that contains recorded goodwill unless it concludes, based on the qualitative assessment, that it is more likely than not that the fair value of that reporting unit is less than its book value. If a decline in fair value is deemed more likely than not to have occurred, then the quantitative goodwill impairment test that is provided under generally accepted accounting principles in the United States of America, or GAAP, must be completed; otherwise, goodwill is deemed not to be impaired and no further testing is required until the next annual test date (or sooner if conditions or events before that date raise concerns of potential impairment in the reporting unit). The amended goodwill impairment guidance does not affect the manner in which a company estimates fair value. The new standard is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on its financial condition, results of operations, cash flows, or disclosures.

In June 2011, the FASB issued a final standard requiring entities to present net income and other comprehensive income in either a single continuous statement or in two, consecutive statements of net income and other comprehensive income. Under both alternatives, an entity is required to present each component of net income and other comprehensive income, their respective totals, and totals for comprehensive income. This standard eliminates the option to present the components of other comprehensive income as part of the statement of changes in shareholders equity. The amendment is effective for interim and annual periods beginning after December 15, 2011. The Company does not expect the adoption of this guidance to have a material impact on its financial condition, results of operations, cash flows, or disclosures.

In May 2011, the FASB amended fair value measurement and disclosure guidance. The amended guidance clarified existing fair value measurement guidance, revised certain measurement guidance and expanded the disclosure requirements for Level 3 fair value measurements. The guidance is effective for interim and annual periods beginning after December 15, 2011. The Company does not expect the adoption of this guidance to have a material impact on its financial condition, results of operations, cash flows, or disclosures.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

ORGANIZATION OF INFORMATION

Management's Discussion and Analysis of Financial Condition and Results of Operations provides a narrative concerning our financial performance and condition, and should be read in conjunction with the accompanying unaudited condensed consolidated financial statements. It includes the following sections:

<u>Non-GAAP Financial Measures</u>	17
<u>Forward-Looking Statements</u>	17
<u>Overview and Outlook</u>	18
<u>Analysis of Results of Operations for the Third Quarter</u>	20
<u>Results of Operations by Segment for the Third Quarter</u>	21
<u>Analysis of Results of Operations for the Nine Months Year-to-Date</u>	23
<u>Results of Operations by Segment for the Nine Months Year-to-Date</u>	24
<u>Financial Condition</u>	27
<u>Recent Accounting Requirements</u>	30

NON-GAAP FINANCIAL MEASURES

Our consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States of America, or GAAP. Our discussion of financial results includes several non-GAAP financial measures to provide additional information concerning our operating performance and liquidity measures. These non-GAAP financial measures are not in accordance with, nor are they a substitute for, the comparable GAAP financial measures. These non-GAAP financial measures are intended to supplement our presentation of our financial results that are prepared in accordance with GAAP. Based upon feedback from investors and financial analysts, we believe that supplemental non-GAAP financial measures provide information that is useful to the assessment of our performance and operating trends, as well as liquidity.

Non-GAAP financial measures exclude the impact of certain events, activities or strategic decisions. The accounting effects of these events, activities or decisions, which are included in the GAAP financial measures, may make it difficult to assess our underlying performance in a single period. By excluding certain accounting effects, both positive and negative, from certain of our GAAP financial measures, we believe that we are providing meaningful supplemental information to facilitate an understanding of our core or underlying operating results, liquidity and cash flows. These non-GAAP financial measures are used internally to evaluate trends in our underlying business, as well as to facilitate comparison to the results of competitors for a single period. While some of the items we exclude from GAAP financial measures may recur, they tend to be disparate in amount, frequency, and timing.

We use the following non-GAAP financial measures in this report:

Organic sales growth (decline) refers to the change in sales excluding the estimated impact of currency translation and, where applicable, the extra week in fiscal year 2009. The estimated impact of foreign currency translation is calculated on a constant currency basis, with prior-period results translated at current period average exchange rates to remove the effect of foreign currency fluctuations.

Free cash flow refers to cash flow from operations, less net payments for property, plant, and equipment, software and other deferred charges, plus net proceeds from sale (purchase) of investments. Free cash flow excludes mandatory debt service requirements and other uses of cash that do not directly or immediately support the underlying business (such as discretionary debt reductions, dividends, share repurchases and acquisitions, etc.).

Operational working capital refers to trade accounts receivable and inventories, net of accounts payable. This non-GAAP financial measure excludes cash and cash equivalents, short-term debt, deferred taxes, other current assets and other current liabilities, as well as current assets and current liabilities of held-for-sale businesses.

OVERVIEW AND OUTLOOK**Overview***Fiscal Year*

Normally, each fiscal year consists of 52 weeks, but every fifth or sixth year consists of 53 weeks. Our 2009 fiscal year consisted of a 53-week period, with the extra week reflected in the first quarter.

Segment and Business Name Changes

Refer to Note 1, General, to the unaudited Condensed Consolidated Financial Statements for information regarding the recent name changes of certain of our segments and businesses.

Sales

Our sales increased 4% in each of the third quarter and first nine months of 2011, compared to the same periods last year.

Reported sales growth ⁽¹⁾	4%	6%	4%	10%

⁽¹⁾ Totals may not sum due to rounding.

Net Income

Net income decreased approximately \$14 million and \$35 million in the third quarter and first nine months of 2011, respectively, compared to the same periods last year.

Factors affecting changes in net income in the first nine months of 2011 compared to the same period last year included:

Positive factors:

- Pricing actions
- Cost savings from productivity initiatives, including savings from restructuring actions
- Lower employee-related costs, including incentive compensation
- Favorable impact of foreign currency translation

Negative factors:

- Raw material inflation
- Lower volume
- Higher restructuring and asset impairment charges related to cost reduction actions, and other items
- Higher investments in growth and infrastructure, net of lower advertising costs

Cost Reduction Actions

Edgar Filing: Avery Dennison Corp - Form 10-Q

2011 Actions

In the first nine months of 2011, we recorded approximately \$29 million in charges, consisting of severance and related costs for the reduction of approximately 700 positions, asset impairment charges, and lease cancellation costs. For the full year 2011, we expect to incur approximately \$45 million in total charges (\$42 million of which represents cash charges) related to these actions. We anticipate approximately \$55 million in annualized savings from these actions to be realized by early 2013, one-fourth of which is expected to be realized in 2011.

Q3 2010 Q4 2010 Actions

In the second half of 2010, we recorded approximately \$10 million in charges, consisting of severance and related costs for the reduction of approximately 725 positions, asset impairment charges, and lease cancellation costs. We anticipate approximately \$12 million in annualized savings from these restructuring actions to be realized by the end of 2012.

Q4 2008 Q2 2010 Program

Table of Contents

Avery Dennison Corporation

In the fourth quarter of 2008, we initiated a restructuring program that generated approximately \$180 million in annualized savings. We realized actual savings, net of transition costs, of approximately \$75 million in 2009 and an incremental \$72 million in 2010. We expect the remainder of the savings to be realized in 2011.

We recorded approximately \$150 million in charges (\$105 million of which represents cash charges) related to this restructuring program, consisting of severance and related costs, asset impairment charges, and lease cancellation costs. Of the total charges, approximately \$12 million was recorded in 2008, \$129 million was recorded in 2009, and \$9 million was recorded in 2010. Severance and related costs were related to approximately 4,350 positions. We do not expect to incur any further charges related to this program.

Refer to Note 8, Cost Reduction Actions, to the unaudited Condensed Consolidated Financial Statements for further detail.

Effective Rate of Taxes on Income

Our effective tax rate was approximately 33% for the nine months ended October 1, 2011 and approximately 28% for the nine months ended October 2, 2010. Our effective tax rate for the first nine months of 2011 included a net benefit from the discrete events of releases and accruals of certain tax reserves, which were partially offset by accruals for other discrete items. Refer to Note 10, Taxes Based on Income, to the unaudited Condensed Consolidated Financial Statements for further information.

Free Cash Flow

We use free cash flow as a measure of funds available for uses of cash that do not directly or immediately support our underlying businesses, such as dividends, debt reductions, acquisitions, and share repurchases. We believe that this non-GAAP financial measure provides meaningful supplemental information to our investors to assist them in their financial analysis of the Company.

(In millions)	Nine Months Ended	
	October 1, 2011	October 2, 2010
Net cash provided by operating activities	\$ 120.0	\$ 283.6
Purchase of property, plant and equipment, net	(76.1)	(50.1)
Purchase of software and other deferred charges	(19.1)	(17.1)
(Purchase) proceeds from sale of investments, net ⁽¹⁾	(1.0)	.2
Free cash flow	\$ 23.8	\$ 216.6

⁽¹⁾ Net (purchase) proceeds from sales of investments related to net purchases/sales of securities held by our captive insurance company, and sales of other investments in 2010.

Free cash flow in the first nine months of 2011 reflected payments of 2010 employee bonuses, the timing of collection of trade accounts receivable, net spending on property, plant, and equipment, the amount and timing of inventory purchases and payments, contributions to our pension plans, as well as payments of customer trade rebates. In addition, free cash flow reflected a benefit from the timing of collection of value-added tax receivables. See Analysis of Results of Operations and Liquidity below for more information.

2011 Outlook

Certain factors that we believe may contribute to results for 2011 compared to results for 2010 are listed below.

We expect sales to be approximately flat on an organic basis and earnings to decrease in 2011, the extent to which is subject, but not limited to, the impact of economic conditions on underlying demand for our products, and the degree to which higher costs, principally due to raw material inflation, can be offset with productivity measures and/or price increases.

We expect aggregate contributions to our pension plans (both domestic and international) of approximately \$70 million in 2011.

Edgar Filing: Avery Dennison Corp - Form 10-Q

Subsequent to the third quarter of 2011, we made certain changes to our U.S. postretirement health benefit plan. In connection with these changes, we estimate a decrease in our accumulated postretirement benefit obligation of approximately \$35 million, with a corresponding decrease to accumulated other comprehensive loss, in the fourth quarter of 2011. Refer to Note 5, Pension and Other Postretirement Benefits, to the unaudited Condensed Consolidated Financial Statements for more information.

We anticipate 2011 interest expense to be slightly lower than 2010. Our assumptions on interest expense are subject to changes in market rates through the remainder of the year.

We expect our annual effective tax rate to be higher in 2011. Our annual effective tax rate may be impacted by future events including changes in tax laws, geographic income mix, repatriation of cash, tax audits, closure of tax years, legal entity restructuring, and changes in valuation allowances on deferred tax assets. Our effective tax rate can potentially have wide variances from quarter to quarter, resulting from interim reporting requirements and the recognition of discrete events.

We anticipate increased operating expense from investments in marketing, research and development, and infrastructure.

We anticipate our capital and software expenditures to be approximately \$145 million.

ANALYSIS OF RESULTS OF OPERATIONS FOR THE THIRD QUARTER**Income Before Taxes**

As a Percent of Net Sales:

Gross profit margin	25.6%	27.6%
Marketing, general and administrative expense	19.2	21.1
Income before taxes	4.2	4.7

Net Sales

Sales increased 4% in the third quarter of 2011 compared to the same period last year, due to the favorable impact of foreign currency translation (approximately \$88 million), partially offset by a decline in sales on an organic basis.

On an organic basis, sales declined 2% in the third quarter of 2011, primarily reflecting lower volumes across all segments and most regions, driven primarily by lower market demand. Volume declines were partially offset by the impact of changes in pricing.

Refer to Results of Operations by Segment for the Third Quarter for information by reportable segment and other businesses.

Gross Profit Margin

Gross profit margin for the third quarter of 2011 declined compared to the same period last year, as the impact of raw material inflation and lower volume more than offset the benefits of pricing actions and productivity initiatives.

Marketing, General and Administrative Expense

The decrease in marketing, general and administrative expense in the third quarter of 2011 compared to the same period last year primarily reflected lower employee-related costs driven by decreased incentive compensation, lower spending on growth and infrastructure, and savings from restructuring and productivity initiatives, partially offset by the unfavorable impact of foreign currency translation.

Other expense, net	\$ 20.5	\$ 10.5

In the third quarter of 2011, Other expense, net consisted of charges for severance and related costs resulting in the reduction in headcount of approximately 350 positions across all segments and geographic regions, and other items. Other items included certain legal and consulting costs, legal settlement costs, and lease cancellation costs.

In the third quarter of 2010, Other expense, net consisted of charges for severance and related costs due to the reduction in headcount of approximately 620 positions, primarily in the Office and Consumer Products and Retail Branding and Information Solutions segments, and other items. Other items included asset impairment charges, lease cancellation costs, and a loss from curtailment of a domestic pension obligation.

For cash flow purposes, changes in assets and liabilities and other adjustments exclude the impact of foreign currency translation (discussed below in Analysis of Selected Balance Sheet Accounts).

During the first nine months of 2011, cash flow from operating activities reflected payments of 2010 employee bonuses, the timing of collection of trade accounts receivable, the amount and timing of inventory purchases and payments, contributions to our pension plans, as well as payments of customer trade rebates. In addition, cash flow from operating activities reflected a benefit from the timing of collection of value-added tax receivables.

During the first nine months of 2010, cash flow from operating activities reflected the amount and timing of inventory purchases and improved collection efforts. These factors were more than offset by higher trade accounts receivable and inventory levels to support the increase in sales, and payments of severance and other accrued costs related to various restructuring actions, as well as payments of 2009 employee bonuses and customer trade rebates.

<i>Borrowings and Repayment of Debt</i>			

During the first nine months of 2011, we increased our commercial paper and foreign short-term borrowings to support operational requirements, which also included contributions to our pension plans.

On April 13, 2010, we issued \$250 million of senior notes bearing an interest rate of 5.375% per year, due April 2020. The approximately \$248 million in proceeds from the offering, net of the underwriting discounts and offering expenses, were used, together with commercial paper borrowings, to repay the \$325 million in indebtedness outstanding under a term loan credit facility of one of our subsidiaries in May 2010.

Dividend Payments

Our dividend per share was \$.75 in the first nine months of 2011, a 25% increase from our dividend of \$.60 per share for the same period in the prior year.

Share Repurchases

In December 2010, we executed the repurchase of approximately .3 million shares for \$13.5 million, which settled in January 2011.

On January 27, 2011, our Board of Directors authorized the repurchase of an additional five million shares of our stock. As of October 1, 2011, approximately 6 million shares were available for repurchase under this and prior Board authorizations.

Analysis of Selected Balance Sheet Accounts

Long-lived Assets

In the first nine months of 2011, goodwill decreased approximately \$7 million to \$934 million, which primarily reflected the impact of foreign currency translation.

In the first nine months of 2011, other intangibles resulting from business acquisitions, net, decreased approximately \$25 million to \$204 million, which primarily reflected amortization expense.

Refer to Note 3, Goodwill and Other Intangibles Resulting from Business Acquisitions, to the unaudited Condensed Consolidated Financial Statements for more information.

In the first nine months of 2011, other assets increased approximately \$8 million to \$457 million, which primarily reflected purchase of software and other deferred charges (\$19 million), a reclassification of held for sale assets from Property, plant and equipment to Other assets (\$14 million), and an increase in the cash surrender value of corporate-owned life insurance (\$7 million). These increases were partially offset by amortization expense of software and other deferred charges (\$30 million). Refer to Note 17, Assets Held for Sale, to the unaudited Condensed Consolidated Financial Statements for more information.

Other Shareholders' Equity Accounts

Our shareholders' equity was \$1.75 billion at October 1, 2011 compared to \$1.65 billion at January 1, 2011. During the first nine months of 2011, the increase in our shareholders' equity reflected net income and the full utilization of the remaining shares held in our Employee Stock Benefit Trust (ESBT). These increases were partially offset by dividend payments, an increase of our treasury stock (see below for more information), and the impact of foreign currency translation. See Dividend Payments and Share Repurchases above for more information.

We terminated the ESBT on July 21, 2011 upon the utilization of the remaining balance of shares held therein, and thereafter, began funding employee-related expenses using shares of our common stock held in treasury.

The value of the ESBT decreased by approximately \$73 million in the first nine months of 2011, reflecting the full utilization of shares held therein to settle our employee benefit obligations (\$31 million). These shares were included as Treasury stock at cost in the unaudited Condensed Consolidated Balance Sheets. The decrease was also attributable to the use of these shares to settle exercises of stock options and releases of restricted stock units (\$18 million) and fund our match of participant contributions in our U.S. defined contribution plan (\$16 million), as well as a decrease in the market value of shares held in the ESBT (\$8 million).

Edgar Filing: Avery Dennison Corp - Form 10-Q

The value of our treasury stock increased by approximately \$39 million in the first nine months of 2011, reflecting shares from our ESBT to settle employee benefit obligations (\$31 million) and share repurchase activity which settled in January 2011 (\$14 million). These increases were partially offset by the use of treasury shares to settle exercises of stock options, releases of restricted stock units and fund our match of participant contributions in our U.S. defined contribution plan (\$6 million). See [Share Repurchases](#) above for more information.

Impact of Foreign Currency Translation for the First Nine Months:

(In millions)	2011	2010
Change in net sales	\$ 171	\$ 48
Change in net income	10	(2)

International operations generated approximately 69% of our net sales during the first nine months of 2011. Our future results are subject to changes in political and economic conditions in the regions in which we conduct business and the impact of fluctuations in foreign currency exchange and interest rates.

The effect of currency translation on sales in the first nine months of 2011, compared to the first nine months of 2010, primarily reflected a favorable impact from sales denominated in euros, as well as sales in the currencies of Australia, China and Brazil.

Impact of Foreign Currency Transactions

The impact on net income from transactions denominated in foreign currencies may be mitigated because the costs of our products are generally denominated in the same currencies in which they are sold. In addition, to reduce our income and cash flow exposure to transactions in foreign currencies, we may enter into foreign exchange forward, option and swap contracts, where available and appropriate.

Analysis of Selected Financial Ratios

We utilize certain financial ratios to assess our financial condition and operating performance, as discussed below.

Operational Working Capital Ratio

Working capital (current assets minus current liabilities), as a percent of annualized net sales, increased in the first nine months of 2011 primarily due to a decrease in accrued payroll and benefits and accounts payable, partially offset by a decrease in trade accounts receivable, net, and cash and cash equivalents.

Operational working capital, as a percent of annualized net sales, is reconciled with working capital below. We use this non-GAAP financial measure as a tool to assess our working capital requirements because it excludes the impact of fluctuations attributable to our financing and other activities (that affect cash and cash equivalents, deferred taxes, other current assets, and other current liabilities) that tend to be disparate in amount and timing, and therefore, may increase the volatility of the working capital ratio from period to period. Additionally, the items excluded from this measure are not necessarily indicative of the underlying trends of our operations and are not significantly influenced by the day-to-day activities that are managed at the operating level. Refer to Non-GAAP Financial Measures. Our objective is to minimize our investment in operational working capital, as a percentage of sales, by reducing this ratio to maximize cash flow and return on investment.

Operational Working Capital for the First Nine Months:

(In millions)	2011	2010
(A) Working capital (current assets minus current liabilities)	\$ 294.7	\$ 237.1
Reconciling items:		
Cash and cash equivalents	(119.7)	(157.8)
Current deferred and refundable income taxes and other current assets	(271.5)	(316.7)
Short-term and current portion of long-term debt	433.2	443.5
Current deferred and payable income taxes and other current liabilities	589.1	686.5
(B) Operational working capital	\$ 925.8	\$ 892.6
(C) Annualized net sales (year-to-date sales divided by 3, multiplied by 4)	\$ 6,779.5	\$ 6,500.8

Edgar Filing: Avery Dennison Corp - Form 10-Q

Working capital, as a percent of annualized net sales (A) ÷ (C)	4.4%	3.7%
Operational working capital, as a percent of annualized net sales (B) ÷ (C)	13.7%	13.7%

As a percent of annualized sales, operational working capital for the first nine months of 2011 remained flat compared to the same period in the prior year. The primary factors contributing to the operational working capital, as a percent of annualized net sales, which includes the impact of foreign currency translation, are discussed below.

Accounts Receivable Ratio

Table of Contents

Avery Dennison Corporation

The average number of days sales outstanding, calculated using the three-quarter average trade accounts receivable balance divided by the average daily sales for the first nine months of 2011 and 2010, respectively, was 59 days in the first nine months of 2011 compared to 58 days in the first nine months of 2010. The increase from prior year in the average number of days sales outstanding primarily reflected the timing of collections.

Inventory Ratio

Average inventory turnover, calculated using the annualized cost of sales (cost of sales for the first nine months divided by three and multiplied by four) divided by the inventory balance at quarter end, was 8.1 in the first nine months of 2011 compared to 8.4 in the first nine months of 2010. The decrease from prior year in the average inventory turnover reflected the timing of inventory purchases.

Accounts Payable Ratio

The average number of days payable outstanding, calculated using the three-quarter average accounts payable balance divided by the average daily cost of products sold for the first nine months of 2011 and 2010, respectively, was 56 days in the first nine months of 2011 compared to 58 days in the first nine months of 2010. The decrease from prior year in the average number of days payable outstanding reflected the timing of payments to vendors.

Capital Resources

Capital resources include cash flows from operations, cash and cash equivalents and debt financing. At October 1, 2011, we had cash and cash equivalents of approximately \$120 million held in accounts at third-party financial institutions.

Our \$1 billion revolving credit facility, which supports our commercial paper programs, matures in 2012, and we intend to refinance this facility. No balances were outstanding under this facility as of October 1, 2011. Based upon our current outlook for our business and market conditions, we believe that this facility, in addition to the uncommitted bank lines of credit maintained in the countries in which we operate, will continue to be able to provide the liquidity to fund our operations during the year.

We are exposed to financial market risk resulting from changes in interest and foreign currency rates, and to possible liquidity and credit risks of our counterparties.

Capital from Debt

Our total debt increased by approximately \$50 million in the first nine months of 2011 to \$1.39 billion, compared to \$1.34 billion at year end 2010, reflecting an increase in commercial paper and foreign short-term borrowings to support operational requirements, which included contributions to our pension plans.

Credit ratings are a significant factor in our ability to raise short-term and long-term financing. The credit ratings assigned to us also impact the interest rates paid and our access to commercial paper, credit facilities, and other borrowings. A downgrade of our short-term credit ratings below our current levels could impact our ability to access the commercial paper markets. If our access to commercial paper markets were to become limited, our revolving credit facility and other credit facilities would be available to meet our short-term funding requirements, if necessary. When determining a credit rating, the rating agencies place significant weight on our competitive position, business outlook, consistency of cash flows, debt level and liquidity, geographic dispersion and management team. We remain committed to retaining an investment grade rating.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes to the information provided in Part II, Item 7A of the Company's Form 10-K for the fiscal year ended January 1, 2011.

ITEM 4. CONTROLS AND PROCEDURES

The Company maintains disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(f)) that are designed to ensure that information required to be disclosed in the Company's Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding the required disclosure.

In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily is required to apply its judgement in evaluating the cost-benefit relationship of possible controls and procedures.

The Company's disclosure controls system is based upon a global chain of financial and general business reporting lines that converge in the Company's headquarters in Pasadena, California. As required by SEC Rule 13a-15(b), the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the quarter covered by this report.

Based on the foregoing, the Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective to provide reasonable assurance that information is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding the required disclosure.

The Company periodically assesses its overall control environment, including the control environment of acquired businesses.

There has been no change in the Company's internal control over financial reporting during the Company's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
