Performance Summary (unaudited)

WisdomTree Dreyfus Brazilian Real Fund (BZF)

Investment Breakdown as of 2/29/12

The Fund s investment breakdown is expressed as a percentage of total investments and may change over time. It does not include derivatives.

Top Holdings* as of 2/29/12

Description	% of Net Assets
U.S. Treasury Bill,	
0.01%, 3/08/12	34.4%
U.S. Treasury Bill,	
0.00%, 3/22/12	26.5%
Citigroup, Inc. tri-party repurchase agreement,	
0.19%, 3/01/12	26.3%
U.S. Treasury Bill,	
0.10%, 4/19/12	7.4%
Invesco Treasury Fund Private Class,	
0.02%	0.5%

^{*}The holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security.

Fully collateralized by a U.S. Government security.

The WisdomTree Dreyfus Brazilian Real Fund (the Fund) seeks to achieve total returns reflective of both money market rates in Brazil available to foreign investors and changes in value of the Brazilian real relative to the U.S. dollar. The Brazilian real is a developing market currency, which can experience periods of significant volatility. Although the Fund invests in short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned -4.37% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund outperformed the change in the spot currency rate by 3.13% for the six-month period. This was largely due to the Fund s investments in U.S. money market instruments and forward currency contracts.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund s total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors—assessments of the underlying value of a fund—s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns also do not reflect brokerage

commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. The annual expense ratio of the Fund during the period was 0.45%.

^{*}The ten largest holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security.

Fully collateralized by U.S. Government securities.

The WisdomTree Dreyfus Chinese Yuan Fund (the Fund) seeks to achieve total returns reflective of both money market rates in China available to foreign investors and changes in value of the Chinese yuan relative to the U.S. dollar. The Chinese yuan is a developing market currency, which can experience periods of significant volatility. Although the Fund invests in short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned 0.88% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund underperformed the change in the spot currency rate by 0.45% for the six-month period. This was primarily due to two factors. First, expectations of future currency appreciation diminished over the six-month period prompting movements in currency forwards to lag movements in spot returns. Additionally, because of the extraordinarily low levels for short-term interest rates in the U.S., the rates on the Fund s investments in U.S. money market instruments did not fully offset Fund expenses.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund s total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors assessments of the underlying value of a fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns also do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. The annual expense ratio of the Fund during the period was 0.45%.

^{*}The holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security.

Fully collateralized by a U.S. Government security.

The WisdomTree Dreyfus Commodity Currency Fund (the Fund) seeks to achieve total returns reflective of money market rates in selected commodity-producing countries and changes in value of such countries currencies relative to the U.S. dollar. The term commodity currency generally is used to describe the currency of a country whose economic success is commonly identified with the production and export of commodities (such as precious metals, oil, agricultural products or other raw materials) and whose value is closely linked to the value of such commodities. The Fund may invest in the currencies of commodity-producing countries, such as Australia, Brazil, Canada, Chile, Colombia, Indonesia, Malaysia, New Zealand, Norway, Peru, Russia and South Africa. Although this Fund invests in short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned -1.07% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund underperformed its benchmark, the Equal-Weighted Commodity Currency Composite, by 0.35% for the six-month period. This underperformance was largely the result of deductions for Fund expenses.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund s total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors—assessments of the underlying value of a fund—s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Fund sperformance is negatively impacted by these deductions. Fund returns also do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. The annual expense ratio of the Fund during the period was 0.55%.

The WisdomTree Dreyfus Emerging Currency Fund (the Fund) seeks to achieve total returns reflective of both money market rates in selected emerging market countries available to foreign investors and changes in value of these currencies relative to the U.S. dollar. Emerging market currencies can experience periods of significant volatility. Although the Fund invests in short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned -1.89% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund outperformed its industry benchmark, the JPMorgan Emerging Local Markets Index Plus (ELMI+), by 0.49%. This was largely due to its higher strategic concentration in Asian and Latin American currencies, which outperformed Eastern European currencies over the period.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund s total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The WisdomTree Dreyfus Japanese Yen Fund (the Fund) seeks to earn current income reflective of money market rates in Japan available to foreign investors. The Fund also seeks to maintain liquidity and preserve capital measured in Japanese yen. The yen is a developed market currency, which can experience periods of significant volatility. Although the Fund invests in short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned -5.66% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund underperformed the change in the spot currency rate by 0.14% for the six-month period. This was due to the low level of interest rates available from the yen-denominated money market instruments combined with the impact of Fund expenses.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund s total assets less total liabilities by the number of shares outstanding.

The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors—assessments of the underlying value of a fund—s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Fund sperformance is negatively impacted by these deductions. Fund returns also do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. The annual expense ratio of the Fund during the period was 0.35%.

^{*}The holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security.

Fully collateralized by U.S. Government security.

The WisdomTree Dreyfus South African Rand Fund (the Fund) seeks to achieve total returns reflective of both money market rates in South Africa available to foreign investors and changes in value of the South African rand relative to the U.S. dollar. The South African rand is a developing market currency, which can experience periods of significant volatility. Although the Fund invests in short-term, investment grade instruments, the Fund is not a money market fund and it is not the objective of the Fund to maintain a constant share price.

The Fund returned -3.75% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund outperformed the change in the spot currency rate by 2.31% for the six-month period. This was the result of the Fund s investments in U.S. money market instruments and forward currency contracts.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund s total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The WisdomTree Asia Local Debt Fund (the Fund) seeks a high level of total return consisting of both income and capital appreciation. The Fund attempts to achieve its objective through investments in fixed income instruments denominated in the currencies of a broad range of Asian countries.

The Fund returned -0.73% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund underperformed its industry benchmark, the HSBC Asian Local Bond Index Unhedged USD, by 1.89% for the six-month period, due in part to the longer duration of the reference index.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund s total assets less total liabilities by the number of shares outstanding. ^{*} The ten largest holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security.

The WisdomTree Australia & New Zealand Debt Fund (the Fund) seeks a high level of total return consisting of both income and capital appreciation. The Fund attempts to achieve its investment objective through investments in fixed income instruments denominated in Australian or New Zealand dollars.

The Fund returned -0.50% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The WisdomTree Dreyfus New Zealand Dollar Fund converted into the WisdomTree Australia & New

Zealand Debt Fund on October 25, 2011. The Fund underperformed a Spliced Australia & New Zealand Debt Composite by 1.31% over the period. The Fund s underperformance can be attributed to the strong performance of corporate bonds within the Citigroup Australian Broad Investment-Grade Index, as investors were more aggressive in adding risk in early 2012. The Fund s strategy invests in government, semi-government and supranational agencies, currently excluding corporate bonds.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund s total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The WisdomTree Euro Debt Fund (the Fund) seeks a high level of total return consisting of both income and capital appreciation. The Fund attempts to achieve its objective through investments in fixed income instruments denominated in euros.

The Fund returned -4.47% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The WisdomTree Dreyfus Euro Fund converted into the WisdomTree Euro Debt Fund on October 19, 2011. The Fund underperformed the Spliced Euro Debt Composite by 2.16% and the Spliced Euro Debt ex-Greece, Ireland, Italy, Portugal & Spain Composite by 0.57% over the period. The Fund underperformed these benchmarks largely due to the underperformance of the Fund s allocation to supranational bonds relative to the Composites allocation to sovereign debt.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund s total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors—assessments of the underlying value of a fund—s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Fund sperformance is negatively impacted by these deductions. Fund returns also do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. The annual expense ratio of the Fund during the period was 0.35%.

^{*} The ten largest holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security.

The WisdomTree Global Real Return Fund (the Fund) seeks total returns (capital appreciation plus income) that exceed the rate of inflation over long-term investment horizons.

The Fund returned -2.01% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund underperformed its industry benchmark, the BofA Merrill Lynch Global Diversified Inflation-Linked Index, by 4.24% for the six-month period. This was the result of the negative performance of its allocation to commodity strategies.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund s total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange

where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors assessments of the underlying value of a fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Fund sperformance is negatively impacted by these deductions. Fund returns also do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. The annual expense ratio of the Fund during the period was 0.60%.

Performance as of 2/29/12

	Cumulative Total Return	
		Since
	6-Month	Inception ¹
Fund NAV Returns	-2.01%	-0.69%
Fund Market Price Returns	-4.59%	-3.42%
BofA Merrill Lynch Global Diversified Inflation-Linked Index	2.23%	5.04%

¹ Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on July 14, 2011.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and the principal value of an investment will fluctuate so that an investor s shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at www.wisdomtree.com. WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Fund NAV returns are calculated using the Fund s daily 4:00 p.m. NAV. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times. The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Total returns for a period of less than one year are cumulative.

^{*}The holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular security.

The WisdomTree Managed Futures Strategy Fund (the Fund) seeks to provide investors with positive total returns in rising or falling markets.

The Fund returned -11.29% on net asset value (NAV) for the six-month period ended February 29, 2012 (for more complete performance information please see the chart below). The Fund underperformed its industry benchmark, the Diversified Trends Indicator, by 0.56% during the period. This was primarily due to deductions for Fund expenses.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of the Fund s total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for fund shares and investors—assessments of the underlying value of a fund—s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore index returns do not reflect deductions for fees or expenses and are not available for direct investment. In comparison, the Fund sperformance is negatively impacted by these deductions. Fund returns also do not reflect brokerage commissions or taxes a shareholder would pay on the sale of Fund shares or on Fund distributions. The annual expense ratio of the Fund during the period was 0.95%.

WisdomTree Currency, Fixed Income and Alternative Funds

13

¹ Total returns are calculated based on the commencement of Fund trading on the NYSE Arca, Inc. on January 5, 2011.

Description of Terms and Indexes (unaudited)

Below are descriptions of certain terms and of each index referenced in this report.

Euro Area:

The area encompassing the European Union Member States whose currency is the euro and in which there is a single monetary policy. It currently comprises Belgium, Germany, Greece, Spain, Estonia, Ireland, France, Italy, Cyprus, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland.

Forward Contracts:

A forward currency contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A forward contract may either be deliverable or non-deliverable. A **deliverable forward currency contract** is an agreement by two parties to transact in currencies at a specific rate on a future date upon which each party delivers the promised currency. A **non-deliverable forward currency contract** is an agreement by two parties to transact in currencies at a specific rate on a future date and then cash settle the agreement with a simple exchange of the market value difference between the current market rate and the initial agreed-upon rate.

Spot Rate:

A spot rate is the foreign exchange market price at which a currency will be delivered on the settlement date. Spot rate is the starting point for all foreign exchange transactions. The spot return rate is the rate of return percentage difference between the end of period spot rate and the beginning of period spot rate.

Swap:

A swap is an agreement between two parties to exchange payments based on a reference asset, which may be a currency or interest rate, but also may be a single asset, a pool of assets or an index of assets.

Asia Pacific ex-Japan Local Debt Composite:

The composite tracks an equal-weighted exposure to the local currency sovereign bond markets of the Funds constituent countries. Currently, the composite tracks the returns from the following sovereign bond markets: Australia, China, Hong Kong, Indonesia, India, Malaysia, New Zealand, Philippines, Singapore, South Korea, Taiwan, and Thailand. Performance for South Korean, Taiwanese, and Philippine government bonds is proxied by the total returns of the respective Bank of America Merrill Lynch Global Sovereign country subindex. Performance for the remaining bond markets is proxied by the JPMorgan Government Bond Index for each country. Country exposures are rebalanced back to equal-weighting quarterly. Constituent changes are made at the end of the month following the annual review unless otherwise noted.

BofA Merrill Lynch Euro Currency One-Month LIBID Constant Maturity Index:

The BofA Merrill Lynch Euro Currency One-Month LIBID Constant Maturity Index tracks a consistent investment in one-month euro-denominated bank deposits.

BofA Merrill Lynch Euro Government ex-Greece, Ireland, Italy, Portugal & Spain Index:

The BofA Merrill Lynch Euro Government ex-Greece, Ireland, Italy, Portugal & Spain Index is a subset of the BofA Merrill Lynch Euro Government Index. It is a market capitalization-weighted index that tracks the performance of euro-denominated sovereign debt publicly issued by Euro member countries excluding Greece, Ireland, Italy, Portugal and Spain as the country of risk.

14 WisdomTree Currency, Fixed Income and Alternative Funds

Description of Terms and Indexes (unaudited) (continued)

BofA Merrill Lynch Euro Government Index:

The BofA Merrill Lynch Euro Government Index is a market capitalization-weighted index that tracks the performance of euro-denominated sovereign debt publicly issued by Euro member countries.

BofA Merrill Lynch Global Diversified Inflation-Linked Index:

The BofA Merrill Lynch Global Diversified Inflation-Linked Index is a broad, market value-weighted, capped total return index designed to measure the performance of inflation-linked sovereign debt that is publicly issued and denominated in the issuer sown domestic market and currency.

BofA Merrill Lynch Japanese Yen One-Month LIBID Constant Maturity Index:

The BofA Merrill Lynch Japanese Yen One-Month LIBID Constant Maturity Index tracks a consistent investment in one-month Japanese yen-denominated bank deposits.

BofA Merrill Lynch New Zealand Dollar One-Month LIBID Constant Maturity Index:

The BofA Merrill Lynch New Zealand Dollar One-Month LIBID Constant Maturity Index tracks a consistent investment in one-month New Zealand dollar-denominated bank deposits.

Citigroup Australian Broad Investment-Grade Index:

The Citigroup Australian Broad Investment-Grade Index is a market capitalization weighted index designed to represent the Australian fixed-coupon bond market, including government, semigovernment, and investment grade credit markets (including supranational issuers).

Diversified Trends Indicator:

The Diversified Trends Indicator (DTI) is a long/short rules-based index constructed of 24 liquid commodity and financial futures contracts comprised of 10 sectors. Each month the DTI index sector exposure is rebalanced back to the fixed weights, 50% physical commodities and 50% financials (when energy is long) and approximately 39.5% commodities and 60.5% financials (when energy is flat). The sectors are positioned either long or short depending on the current market environment. The DTI Index individual market components, sectors and related weightings, as well as other aspects of the calculation of the DTI Index, are subject to change at any time.

Equal-Weighted Commodity Currency Composite:

A composite incorporating equal-weighted exposures to the currencies within the Commodity Currency Fund was constructed as a benchmark for Fund performance. Returns for the individual emerging market currencies are represented by the return of the country subindices of the JPMorgan Emerging Local Markets Index Plus (ELMI+). Returns for the individual developed market countries are represented by the returns of the BofA Merrill Lynch One-Month Constant Maturity LIBID index for each country. The JPMorgan indices use a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the returns for emerging currency positions. The BofA Merrill Lynch indices track a consistent investment in one-month bank deposits denominated in the specified currency. Within the composite, currency exposures are rebalanced back to equal-weight at the end of the month in which the Fund rebalances its portfolio. Changes to currencies within the Fund are reflected in the composite at the end of the month they are added to, or deleted from, the Fund.

WisdomTree Currency, Fixed Income and Alternative Funds

Description of Terms and Indexes (unaudited) (continued)

Equal-Weighted Emerging Currency Composite:

A composite incorporating equal-weighted exposure to the currencies within the Emerging Currency Fund was constructed as an additional gauge of Emerging Currency Fund performance. Currently, the composite tracks the returns for the currencies of the following countries: Brazil, Chile, Mexico, Poland, Indonesia, South Africa, Turkey, India, China, Russia and South Korea, using the total returns of the country subindices of the JPMorgan Emerging Local Markets Index Plus (ELMI+). Each subindex uses a weighted basket of one-month, two-month and three-month currency forwards (deliverable or nondeliverable) collateralized with U.S. money market rates to proxy the total returns of an investment in local-currency money market instruments. Currency exposures are rebalanced back to equal-weighting at the end of the month in which the Emerging Currency Fund intends to rebalance, and currency changes are reflected in the composite at the end of the month they are reflected in the Fund.

HSBC Asian Local Bond Index Unhedged USD:

The HSBC Asian Local Bond Index Unhedged USD (ALBI) tracks the total return performance of a bond portfolio which consists of local currency denominated, high quality and liquid bonds in Asia ex-Japan. The ALBI includes bonds from the following countries/regions: Korea, Hong Kong, India, Singapore, Taiwan, Malaysia, Thailand, the Philippines, Indonesia and China.

JPMorgan Emerging Local Markets Index Plus (ELMI+):

The JPMorgan Emerging Local Markets Index Plus (ELMI+) and its underlying country and regional subindices track the total returns for local-currency denominated money market instruments in emerging market countries.

JPMorgan Emerging Local Markets Index Plus (ELMI+) Brazil:

The Brazil subindex uses a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in Brazilian real money market instruments. The returns are reported in U.S. dollar terms.

JPMorgan Emerging Local Markets Index Plus (ELMI+) China:

The China subindex uses a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in Chinese yuan money market instruments. The returns are reported in U.S. dollar terms.

JPMorgan Emerging Local Markets Index Plus (ELMI+) India:

The India subindex uses a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in Indian rupee money market instruments. The returns are reported in U.S. dollar terms.

JPMorgan Emerging Local Markets Index Plus (ELMI+) South Africa:

The South Africa subindex uses a weighted basket of one-month, two-month and three-month currency forwards collateralized with U.S. money market rates to proxy the total returns of an investment in South African rand money market instruments. The returns are reported in U.S. dollar terms.

JPMorgan Government Bond Index-Emerging Markets (GBI-EM) Global Diversified Composite Unhedged USD:

The JPMorgan Government Bond Index-Emerging Markets (GBI-EM) Global Diversified Composite Unhedged USD tracks the performance of local currency debt issued by

6 WisdomTree Currency, Fixed Income and Alternative Funds

Description of Terms and Indexes (unaudited) (concluded)

emerging market governments, whose debt is accessible by most of the international investor base. The index incorporates a constrained market-capitalization methodology in which individual issuer exposures are capped at 10% (with the excess distributed to smaller issuers) for greater diversification among issuing governments. The returns are reported in U.S. dollar terms.

JPMorgan New Zealand Government Bond Index:

The JPMorgan New Zealand Government Bond Index is a market capitalization weighted index of locally denominated, fixed rate government debt.

LIBID:

London Interbank Bid Rate or the rate at which banks are willing to borrow for a discrete period of time.

Spliced Australia & New Zealand Debt Composite:

A spliced index which tracks the BofA Merrill Lynch New Zealand Dollar One-Month LIBID Constant Maturity Index through October 24, 2011. Thereafter, the composite tracks an 80% / 20% weighted exposure to the local currency bond markets of Australia and New Zealand, respectively. Performance for Australia is proxied by the total returns of the Citigroup Australian Broad Investment-Grade Index. Performance for the New Zealand bond market is proxied by the JPMorgan New Zealand Government Bond Index. Country exposures are rebalanced back to target weighting quarterly.

Spliced Euro Debt Composite:

A spliced index which tracks the BofA Merrill Lynch Euro Currency One-Month LIBID Constant Maturity Index through October 18, 2011. Thereafter, the composite tracks the BofA Merrill Lynch Euro Government Index.

Spliced Euro Debt ex-Greece, Ireland, Italy, Portugal & Spain Composite:

A spliced index which tracks the BofA Merrill Lynch Euro Currency One-Month LIBID Constant Maturity Index through October 18, 2011. Thereafter, the composite tracks the BofA Merrill Lynch Euro Government ex-Greece, Ireland, Italy, Portugal & Spain Index.

Index returns do not reflect expenses paid by the Funds. Index returns assume reinvestment of distributions. It is not possible to invest directly in an index.

Return on the Underlying Currency Relative to the U.S. Dollar:

South African rand; Brazilian real; euro; Japanese yen

Shareholder Expense Examples (unaudited)

As a shareholder of a WisdomTree Fund, you incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of your Fund shares and (2) ongoing costs, including management fees and other Fund expenses. The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from September 1, 2011 to February 29, 2012.

Actual expenses

The first line under each Fund in the table on the next page provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for your Fund under the heading entitled Expenses Paid During the Period 9/01/11 to 2/29/12 to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The second line under each Fund in the table on the next page provides information about hypothetical account values and hypothetical expenses based on each Fund s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Fund shares. Therefore, the second line under each Fund in the table is useful in comparing ongoing Fund costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Portfolio turnover rate ⁵		35%		0%

^{*} Commencement of investment operations.

1	Based on average shares outstanding.
2	Amount represents less than \$0.005.
3	Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. Total return calculated for a period of less than one year is not annualized.
4	Annualized.
5	Portfolio turnover rate is not annualized.
6	The Fund invested in short-term securities with maturities less than or equal to 365 days. SEC rules exclude such securities from portfolio turnover calculations.
	See Notes to Financial Statements.
