Geovic Mining Corp.

(an exploration stage company)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(dollars in thousands, except per share amounts or as otherwise stated)

1. NATURE OF BUSINESS AND CONTINUANCE OF OPERATIONS

Geovic Mining Corp. (the Company) is incorporated under the laws of the state of Delaware. The Company owns 100% of the shares of Geovic, Ltd. (Geovic), a company that has been in the exploratory stage since its inception on November 16, 1994. The Company is an exploration stage company that is identifying mineral properties through its subsidiaries. As an exploration stage entity we would require further technical analysis and financing in order to bring our properties into development.

Geovic is engaged in the business of exploring for cobalt, nickel and related minerals through its majority-owned (60.5%) subsidiary, Geovic Cameroon, PLC (GeoCam), a financially dependent public limited company duly organized and incorporated under the laws of the Republic of Cameroon.

The Company is also engaged in the worldwide exploration of energy and mineral resources directly or indirectly through its ownership of Geovic Energy Corp. and Geovic Mineral Sands Corp., formed in 2007 and 2009, respectively, under the laws of the State of Colorado; and Geovic France SAS, formed in December 2008 under the laws of France, and Geovic Nouvelle-Calédonie SAS, formed in March 2009 under the laws of New Caledonia.

As an exploration stage company, we have a history of losses, deficits and negative operating cash flows and may continue to incur losses in the future. We continue to evaluate our cash position and cash utilization. Our cash resources and ability to access additional financing will be critical to our financial condition until we begin to receive proceeds from the sale, joint venture, farm-out, or similar-type transaction involving one or more of our exploration prospects, the most significant of which is our 60.5% ownership stake in the Nkamouna Project in Cameroon.

Based on the estimated capital and start-up costs of the Nkamouna Project, we presently do not have sufficient capital resources available to meet anticipated equity requirements. Our ability to raise additional capital for this purpose would depend on a number of factors, many of which would result in significant dilution of our current stockholders. Consequently, we are proactively pursuing a strategic investment which, if successful, would result in our selling some or all of our interest in the Project to a third party.

We have been closely monitoring our fixed and variable costs and intend to restrict such costs to those expenses that are necessary to complete activities related to securing project financing or a strategic investment for the Nkamouna Project, to identify opportunities to generate cash from our existing exploration properties and additional sources of working capital in support of such activities. Management and the Board of Directors have already begun to implement a number of cash conservation strategies for the Company and GeoCam. The most significant cost reductions compared to previous years are our reduction of expenditures at GeoCam. With the completion of the Feasibility Study in 2011, GeoCam no longer incurs the significant costs of technical evaluations, consultant and testing fees and travel that contributed to that study. We have since reduced Project expenses to incur only necessary expenditures, primarily limited to securing the site, environmental monitoring, and supporting potential financial and strategic investor due diligence efforts. This has significantly reduced the anticipated level of GeoCam cash requirements for 2012.

We are seeking to realize value for the Cameroonian assets and shift the Company's focus to a prospect generation and strategic investment business model in 2012 and beyond. Since our position in GeoCam would likely be significantly diminished or completely eliminated through strategic investment, the future direction for the Company will be to identify new exploration prospects, minimally develop and prioritize existing and new prospects, and sell or joint venture further exploration and development of those prospects to others. The Company expects to take prospects to a level where they can be timely monetized through strategic investments by others who have the resources to complete advanced exploration, permitting and development.

Our consolidated cash balance at June 30, 2012 was approximately \$9.3 million. We anticipate that the Company will be able to satisfy the cash requirements of its operations through the second quarter of 2013 with current cash resources assuming the appellate proceedings described in Note 13(a) are resolved in a favorable outcome and that expenditures in GeoCam are reduced to a minimum level, either because we complete a successful sale of our interest in the Nkamouna Project or we place the Project on a care and maintenance status and further reduce our level of expenditures. However, our near-term expenses could be greater than projected and we may be unable to generate additional proceeds through

Edgar Filing: GEOVIC MINING CORP. - Form 10-Q

future business transactions on our exploration prospects. If we are unable to obtain additional capital, we will need to further curtail our operations in order to preserve working capital, which could materially harm our business and our ability to achieve cash flow in the future.

2. BASIS OF PRESENTATION

The accompanying interim unaudited condensed consolidated financial statements of the Company have been prepared in accordance with generally accepted accounting principles in the United States (GAAP) for interim financial statements and the

Table of Contents

Geovic Mining Corp.

(an exploration stage company)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(dollars in thousands, except per share amounts or as otherwise stated)

instructions to Form 10-Q and Article 10 of Regulation S-X and accordingly do not include all disclosures required for annual financial statements. These interim condensed consolidated financial statements follow the same significant accounting policies and methods of application as the Company's audited annual consolidated financial statements as included in the Company's annual report on Form 10-K for the year ended December 31, 2011 (the "Annual Financial Statements"). The interim condensed consolidated financial statements should be read in conjunction with the Annual Financial Statements.

These financial statements have been prepared on a going concern basis. The Company has limited cash resources and has not established an ongoing source of revenues sufficient to cover its operating costs and has incurred losses since inception, which raises substantial doubt about our ability to continue as a going concern after the second quarter 2013. Our ability to continue as a going concern is dependent upon a sale of some or all of our interest in the Nkamouna Project and/or obtaining the necessary financing to meet our current obligations arising from normal business operations when they come due. The financial statements do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts of and classifications of liabilities that might be necessary in the event the Company cannot continue in existence.

In the opinion of management, all adjustments (including normal recurring accruals) considered necessary for a fair presentation of the Company's financial condition have been included. Operating results for this interim period are not necessarily indicative of the result that may be expected for the full year ending December 31, 2012.

In June 2011, the FASB issued guidance on the presentation of comprehensive income. This guidance is effective during interim and annual periods beginning after December 15, 2011. The Company does not have any components of other comprehensive income and, therefore, our comprehensive loss attributed to our stockholders is equal to our net loss attributed to stockholders as presented in our condensed consolidated statements of operations.

3. LOSS PER SHARE

Basic loss per share has been computed by dividing the net loss applicable to the Company's common shareholders by the weighted average number of shares of common stock outstanding during each period. Diluted loss per share is computed by including the dilutive effect of common stock that would be issued assuming exercise of the outstanding stock options and stock purchase warrants. Shares underlying all outstanding options and warrants are excluded from the computation of diluted loss per share for each of the three and six months ended June 30, 2012 and 2011 because the effect would have been anti-dilutive.

4. EXPLORATION COSTS

Exploration costs relate to the search for mineral deposits with economic potential. Exploration costs are expensed as incurred. GeoCam gained exclusive rights for the exploitation of the cobalt and nickel deposits with the granting of a Mining Convention by the government of Cameroon on August 1, 2002. The Mining Convention grants GeoCam the exclusive rights to mine, process, and export cobalt, nickel and related substances from lands subject to a Mining Permit, which was granted by decree on April 11, 2003. The Mining Convention, which has a primary term of 25 years, sets forth all legal and fiscal provisions governing the mining operation. It is renewable under certain conditions in 10-year increments for the life of the resource. In addition to exploration through GeoCam, our New Ventures group provides a pipeline of opportunities for future growth through grassroots exploration.

The following is a summary of the exploration costs incurred by the Company:

Edgar Filing: GEOVIC MINING CORP. - Form 10-Q

	Three Months Ended		Six Months Ended		Unaudited Period

Less accumulated depreciation	(570)	(518)
	332	276
	\$ 2,826	\$ 3,102

During the three and six months ended June 30, 2012, GeoCam rented idle equipment to a third party and recorded \$273 and \$516, respectively, as other income in our condensed consolidated statements of operations as a result of this transaction.

6. STOCK BASED COMPENSATION**Stock options**

The Company adopted a stock option plan which was amended in June 2007, 2008 and 2009 (the Company Option Plan), under which 18,700,000 Company shares were reserved for issuance upon exercise of options granted under the Company Option Plan. The Company Option Plan is intended to provide a means whereby the Company and its subsidiaries can attract, motivate and retain key employees, consultants, and

Edgar Filing: GEOVIC MINING CORP. - Form 10-Q

service providers who can contribute materially to the Company's growth and success, and to facilitate the acquisition of shares of the Company's common stock. The Company Option Plan provides for incentive stock options meeting the requirements of Section 422 of the Internal Revenue Code and nonqualified stock options that do not meet the requirements for incentive stock options. The Company Option Plan requires the option exercise price per share purchasable under the option to be equal to the greater of the closing price of the Company's common shares on the Toronto Stock Exchange the day before or date of grant for all nonqualified stock options and incentive stock options. The Company has historically issued new shares when share-based awards are exercised.

Table of Contents**Geovic Mining Corp.****(an exploration stage company)****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****(dollars in thousands, except per share amounts or as otherwise stated)**

The following table and related information summarizes the Company's stock options and the stock option activity for the six months ended June 30, 2012:

	Options Outstanding		Weighted Average Exercise Price per Share*	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value (000 \$)
	Options Available for Grant	Number Outstanding			
Available and outstanding at December 31, 2011	5,130,390	13,569,610	\$ 0.81		
Granted					
Exercised	181,848	(181,848)	0.20		
Forfeited	18,000	(18,000)	0.57		
Expired	500,000	(500,000)	0.71		
Available and outstanding at June 30, 2012	5,830,238	12,869,762	\$ 0.82	5.12	\$ 76
Exercisable at June 30, 2012		12,581,762	\$ 0.83	5.04	\$ 76
Vested or expected to vest at June 30, 2012		12,869,762	\$ 0.82	5.12	\$ 76

* Some of the options are granted with Canadian dollar exercise prices, and the weighted average prices reflect the U.S. dollar equivalent prices.

The following stock option grants were issued by the Company during the six months ended June 30, 2012 and 2011 respectively:

The Company granted no options under the Company Option Plan in 2012 [2011 1,720,000]. The Company recorded compensation expense of \$53 relating to vesting of previous grants [2011 \$431]. As of June 30, 2012, there was \$34 of total unrecognized compensation expense related to non-vested stock based compensation granted under the Company Option Plan which is expected to be recognized over a weighted average period of 0.6 years.

The weighted-average fair value per share of options granted under the Company's Options Plan during 2011 was \$0.40. The total intrinsic value of share options exercised was \$0 [2011 \$81]. The total cash received from the exercise of stock options was \$36 [2011 \$10].

The fair value of all stock options granted during the six months ended June 30, 2012 and 2011 was estimated at the date of grant using a Black-Scholes option pricing model with the following assumptions:

2012

2011

Edgar Filing: GEOVIC MINING CORP. - Form 10-Q

Expected dividend	0.0%
Risk-free interest rate	1.9%-2.6%
Expected volatility*	67.0%-67.7%
Expected life (in years)	5.5

Table of Contents

Geovic Mining Corp.

(an exploration stage company)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(dollars in thousands, except per share amounts or as otherwise stated)

* For the six months ended June 30, 2011, volatility was estimated based on combining the Company's historical volatility with the historical volatilities of certain other comparable exploration stage mining companies. The Company estimates expected forfeitures at the grant date and compensation expense is recorded only for those awards expected to vest. The estimate of expected forfeitures is reevaluated at the balance sheet date.

Option pricing models require the input of highly subjective assumptions, particularly as to the expected price volatility of the market value of the underlying stock. Changes in these assumptions can materially affect the fair value estimate and therefore it is management's view that the existing models do not necessarily provide a single reliable measure of the fair value of the Company's equity instruments.

Stock awards

The Company adopted the 2010 Company Stock Award Plan (the "Stock Award Plan") that was approved in June 2010. The Common Stock that may be issued pursuant to Stock Awards shall not exceed 2,000,000 shares of Common Stock. The Common Stock subject to the Stock Award Plan shall be authorized and unissued stock. Stock Awards may be granted to Employees, Directors, Officers and Consultants. Stock Awards may be granted as Restricted Stock Awards or Restricted Stock Units. During the six months ended June 30, 2012, we did not grant any Restricted Stock Awards. During the six months ended June 30, 2011, we granted 210,000 Restricted Stock Awards to certain members of the executive management team and the Board of Directors. The Restricted Stock Awards vest 40% on the grant date (January 21, 2011), 30% on the 1st anniversary of the grant date, and 30% on the 2nd anniversary of the grant date. For the six months ended June 30, 2012, the Company recognized compensation expense of \$16 [2011 \$87] related to the Restricted Stock Awards. Also during the six months ended June 30, 2012, we did not grant any Restricted Stock Units. During the six months ended June 30, 2011, we issued 180,000 Restricted Stock Units to certain members of the Board of Directors. The Restricted Stock Units vested on the first anniversary of the grant date. The shares will be issued to the recipient on the earlier of their termination date or on the third anniversary of the grant date. During the six months ended June 30, 2012, 100,000 shares were issued to two members of the Board of Directors who resigned in the first quarter. For the six months ended June 30, 2012, the Company recognized compensation expense of \$6 [2011 \$55] related to the Restricted Stock Units.

7. STOCKHOLDERS' EQUITY

Preferred stock

The Company is authorized to issue 50 million shares of preferred stock, with a par value of \$0.0001. There are no shares of preferred stock issued or outstanding as of June 30, 2012.

Stock Purchase Warrants

The Company adjusts the share-based payment liability to the fair value each reporting period. The warrants outstanding at December 31, 2011 expired in March and April 2012. The fair value adjustment for the stock purchase warrants did not materially affect net loss or loss per share in the condensed consolidated statement of operations for the six months ended June 30, 2012.

The following table and related information summarizes the Company's stock purchase warrants at June 30, 2012 and the stock purchase warrant activity for the six months ended June 30, 2012:

Number Outstanding	Weighted-Average Exercise Price per Share
-----------------------	--

Edgar Filing: GEOVIC MINING CORP. - Form 10-Q

Warrants outstanding at December 31, 2011	15,592,100	\$	3.14
Expired	(15,592,100)		3.14
Warrants outstanding at June 30, 2012		\$	

All outstanding warrants were fully amortized in 2009 thus the Company recorded no compensation expense relating to vesting of grants [2011 \$0]. The Company did not record any gain or loss for the change in the fair value of the warrants with exercise prices denominated in Canadian dollars, for the six months ended June 30, 2012 compared to the \$129 gain for the six months ended June 30, 2011.

(dollars in thousands, except per share amounts or as otherwise stated)

8. DERIVATIVE INSTRUMENTS

Derivative Liabilities

The Company currently does not hold derivative instruments to manage its exposure to commodity prices. The Company evaluates all of its financial instruments to determine if such instruments are derivatives or contain features that qualify as embedded derivatives. All derivative financial instruments are recognized on the condensed consolidated balance sheets at fair value. Changes in fair value are recognized in earnings if they are not eligible for hedge accounting or other comprehensive income if they qualify for cash flow hedge accounting.

A Black-Scholes option-pricing model was used to obtain the fair value of the Company's stock purchase warrants. The fair value of outstanding derivative instruments not designed as hedging instruments on the accompanying condensed consolidated balance sheets were \$0.

The effect of derivative instruments not designed as hedging instruments on the accompanying condensed consolidated statements of operations was \$0 [2011 gain of \$129] for the six months ended June 30, 2012.

9. FAIR VALUE MEASUREMENTS

ASC 820, *Fair Value Measurements and Disclosures*, defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy, as defined below, gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs.

Level 1, defined as observable inputs such as quoted prices in active markets for identical assets.

Level 2, defined as observable inputs other than Level 1 prices. These include quoted prices for similar assets or liabilities in an active market, quoted prices for identical assets and liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

The fair value of the share-based payment liability, as described in note 8, is based on unobservable inputs in which little or no market data exists, therefore, it is classified as Level 3.

At June 30, 2012 and December 31, 2011, the carrying amounts of cash and cash equivalents, restricted cash and trade payables represented fair value because of the short-term nature of these instruments.

10. NONCONTROLLING INTEREST

In May 2010 GeoCam shareholders approved a capital increase equivalent to approximately \$11 million for 2010. In December 2010 they approved an additional \$13 million for the remainder of 2010 and 2011. As of June 30, 2012, there are no approved cash calls remaining.

Edgar Filing: GEOVIC MINING CORP. - Form 10-Q

however, GeoCam shareholders may approve another capital increase in 2012.

During the six months ended June 30, 2011 GeoCam completed two cash calls, equivalent to approximately \$8.2 million. In the cash call Geovic paid approximately \$5.0 million, representing 60.5% of the cash calls and the noncontrolling interest paid cash of approximately \$3.2 million.

The noncontrolling interest balance of approximately \$9.4 million at June 30, 2012 [December 31, 2011 \$9.9 million] represents the balance from the capital increases contributed by the noncontrolling interest as described above. The difference between the amounts contributed and the balance at June 30, 2012 represents the noncontrolling interest share of the actual expenditures from January 1, 2007 through June 30, 2012.

11. INCOME TAXES

The Company files income tax returns in the U.S. federal jurisdiction, Cameroon, France, New Caledonia and Colorado. The Company has open tax years for the U.S. federal return from 2000 forward with respect to its net operating loss (NOL)

Table of Contents

Geovic Mining Corp.

(an exploration stage company)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(dollars in thousands, except per share amounts or as otherwise stated)

carryforwards, where the IRS may not raise tax for these years, but can reduce NOLs. Otherwise, with few exceptions, the Company is no longer subject to federal, state, or local income tax examinations for years prior to 2008. The Company has incurred losses since inception. Due to the full valuation allowance against its net deferred tax asset, management would expect that any adjustment resulting from the audit would not result in an adjustment to the Company's financial statements. In addition, the Company's ability to deduct NOL carryforwards may be subject to a limitation if the Company were to undergo an ownership change for purposes of Section 382 of the Internal Revenue Code of 1986, as amended.

There was no benefit from income taxes in the three and six month periods ended June 30, 2012 and during the same periods in 2011. The effective tax rate was 0% for the three and six month periods ended June 30, 2012 and for the same periods in 2011. Our effective rates differ from the statutory federal rate of 35% for certain items, such as state and local taxes, non-deductible expenses, change in valuation allowance offsetting foreign and domestic operating losses and foreign taxes at rates other than 35%.

The Company recognizes potential accrued interest and penalties related to unrecognized tax benefits in income tax expense. For the three and six month periods ended June 30, 2012, the Company recognized no potential interest or penalties with respect to unrecognized tax benefits.

The Company had no unrecognized tax benefit as of June 30, 2012 or change in unrecognized tax benefits that would impact the effective rate. The Company does not anticipate a significant change to the total amount of unrecognized tax benefits over the remainder of the year.

12. RELATED PARTY TRANSACTIONS

GeoCam entered into a professional and management services contract with Société Nationale d' Investissement du Cameroun (SNI), the holder of 20% and representative of other holders of an additional 19.5% of the outstanding shares of GeoCam, that was effective for fiscal year 2011. The services were for government relations and administrative matters related to project development. No agreement has been entered into for 2012. GeoCam has expensed \$0 for the six months ended June 30, 2012 for these services [2011 \$164].

13. COMMITMENTS AND CONTINGENCIES

[a] In November 2009, five management level consultants or employees of GeoCam filed litigation in Cameroon, claiming approximately \$2.2 million as compensation and damages as a result of termination of their services by GeoCam in connection with a reduction in workforce in February and March 2009. In April 2010 the litigation was dismissed. In July 2010 the litigation was brought before another jurisdiction. On June 3, 2011, the court before which four of the matters were pending entered judgments in favor of the four claimants totaling CFA 780,339,500 (approximately \$1.5 million at June 30, 2012). On November 14, 2011, the court before which the fifth matter was pending entered a judgment in favor of the claimant totaling CFA 118,804,219 (approximately \$0.2 million at June 30, 2012). In the second quarter of 2012, approximately CFA 52,000,000 (approximately \$0.1 million at June 30, 2012) of GeoCam funds were attached in the court proceeding and placed in a restricted account at the bank pending resolution of the fifth matter. GeoCam has filed appeals in all five matters which stayed enforcement of the judgments pending resolution of the appeals. The Company believes all contractual and other obligations to the individuals were satisfied and that the appeals will ultimately be resolved favorably to GeoCam. Given the judgments, we believe it is reasonably possible that the outcome will be unfavorable to GeoCam, but we do not believe that an unfavorable outcome is probable; therefore, we have not accrued any amounts for these judgments in our consolidated financial statements.

[b] In December 2009 the Company engaged a financial advisor in connection with the financing of the Nkamouna Project. The Company agreed to pay a fixed retainer fee of \$50 per month and a \$0.8 million success fee upon completion. The terms of the agreement were

Edgar Filing: GEOVIC MINING CORP. - Form 10-Q

based on the assumption that the completion would occur by December 2010. A replacement agreement with GeoCam was entered into August 2010 with substantially the same terms except the new agreement extended the date of the expected completion of financing. During the first quarter of 2012, the \$50 per month retainer obligation was mutually suspended.

- [c] In January 2011, the Company engaged a financial advisor to advise it with respect to the Company's obligations in connection with financing of the Nkamouna Project and to assist in developing arrangements with strategic investors. The Company agreed to pay a fixed retainer fee of \$50 per month plus reimbursement of expenditures, and a minimum success fee of \$1.0 million based on a sliding scale depending on the size of any financing transaction. During the first quarter of 2012, the \$50 per month retainer obligation was mutually suspended at least until a financing transaction is underway.

(dollars in thousands, except per share amounts or as otherwise stated)

- [d] GeoCam has engaged legal counsel in connection with expected Project financing, payable monthly with fees of approximately GBP 0.5 million paid in 2011 (equivalent to approximately \$0.8 million at June 30, 2012). No services have been performed in 2012.
- [e] The Company and its subsidiaries have been providing support to provide persons living in the Cameroon region with social, sports, education and health infra-structure to promote their wellbeing. This support has been provided through contracting with GeoAid International Inc. and/or its affiliate GeoAid Cameroon (GeoAid), non-profit international humanitarian organizations. During the three and six months ended June 30, 2012 the Company contributed \$90k and \$149k [2011 \$107 and \$196] to GeoAid. While the Company is not legally obligated to contribute a specific amount, the Company was a primary financial contributor to GeoAid in 2012 and 2011.
- [f] GeoCam, entered into purchase orders for mining equipment in 2008 for obligations totaling 615 and deposited 99 toward the purchases. In 2009, GeoCam requested delay of the delivery of the equipment to 2010 or thereafter. The sellers agreed to accept the delay and keep the deposit for future use. No formal agreement to delay delivery has been completed. No liabilities were accrued in 2011 or 2012 for these commitments. In 2010, GeoCam utilized 55 of the deposits toward vehicle purchases.

14. SUBSEQUENT EVENTS

The Company has evaluated all events occurring after the June 30, 2012 balance sheet date through the date of issuance of these condensed consolidated financial statements for necessary subsequent event disclosures.

The Company terminated its lease for its executive office at 1200 Seventeenth Street, Suite 980 in Denver, Colorado and paid \$155 and forfeited the security deposit of \$14 as a termination settlement in July 2012. On August 1, 2012 the Company moved its Denver headquarters to new offices at 5500 East Yale Ave, Suite 302, Denver, CO 80222.

On August 2, 2012, the Court of Appeals in Cameroon before which four of the five appeals described in Note 13 (a) are pending, continued until September 6, 2012 the court hearings at which the appellate decisions are expected to be released. GeoCam plans to continue to vigorously defend these lawsuits.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2011 as well as with the financial and related notes and the other information appearing elsewhere in this report. As used in this report, unless the context otherwise indicates, references to we, our, ours and us refer to Geovic Mining Corp. and its subsidiaries collectively.

Overview

This Management's Discussion and Analysis (MD&A) is intended to provide an analysis of our capital resources and liquidity at June 30, 2012, and financial results for the three and six months ended June 30, 2012 compared to the prior period. All amounts are presented in United States dollars unless indicated otherwise. Reference should also be made to the financial statements filed with this report and the Company's other disclosure materials filed from time to time on www.sec.gov or the Company's website at www.geovic.net.

Business

We are engaged in the business of identifying, planning and initially developing mineral exploration prospects. Our primary asset is a cobalt, nickel, and manganese mining project in Cameroon held by GeoCam, our majority-owned (60.5%) subsidiary incorporated under the laws of the Republic of Cameroon. We also explore for exploitable deposits of other minerals. We hold the following early stage exploration prospects: exploration licenses in New Caledonia (chromite); state exploration permits in Arizona (gold); mineral leases and mining claims in Colorado and Wyoming (uranium); mining claims in New Mexico and California (rare earth and other specialty metals); and an exploration license in Papua New Guinea (advanced and specialty metals).

Our future success will be largely dependent on our ability to complete the sale of some or all of our interest in the Nkamouna Project. We do not have available financial resources necessary to construct and open the Nkamouna Project and we are actively seeking third party sources of funding. A feasibility study we initiated for the Nkamouna Project in December 2009 was completed in April 2011. The feasibility study estimated approximately \$617 million of initial capital costs, including contingencies, to construct and start-up the Nkamouna Project. The GeoCam financial advisor estimated that the total of capital, financing, working capital, contingency and start-up costs will be approximately \$698 million, based on estimates included in the feasibility study. Additionally, cost overrun requirements of lenders to the Nkamouna Project are estimated to be approximately \$100 million.

Since the feasibility study was completed, we have devoted most of our efforts to seeking and evaluating a means to finance the Nkamouna Project. We have considered many possible alternatives, and we continue to focus our attention on joint ventures or similar arrangements, including a sale of a significant portion or all of our interest in the Nkamouna Project. We have had discussions with strategic investors who could assist in financing and would have an interest in purchasing the cobalt, nickel and manganese products produced from the Nkamouna Project.

Beyond the Nkamouna Project financing, we also face other significant challenges affecting development and operation of the Nkamouna Project if we continue to hold a significant interest. These challenges include operating the Nkamouna Project through GeoCam as an autonomous Cameroonian entity, GeoCam's ability to recruit, train and retain a team of qualified mining professionals and a stable local workforce to manage the development, construction and operation of the Nkamouna Project in a relatively undeveloped, remote area in Cameroon.

We are the majority shareholder of GeoCam. Under the Shareholder Agreement, GeoCam is operated as an autonomous entity and governed by a Board of Directors to which we select three of the five directors and two directors are selected by the other shareholders. A potential strategic investment into the Nkamouna Project by an outside party would necessitate mutual agreement among Geovic, SNI, and the new investor(s), and approval by the GeoCam Board of Directors. While we represent the majority of Directors on the GeoCam Board, we generally do not take major strategic actions or decisions without general concurrence by the other shareholders who are collectively represented by SNI. We view a good working relationship with the other shareholders of GeoCam as important to the future success of the Nkamouna Project.

We are seeking to realize value for our Cameroonian assets and shift the Company's focus to a prospect generation and strategic investment business model in 2012 and beyond. Because our plan is to reduce or eliminate our interest in the Nkamouna Project, the future direction for the Company will be to identify new exploration prospects, minimally explore and prioritize the new prospects, and transfer the most likely prospects to others for more extensive exploration and development. Thus we expect to take prospects to a level where they can be monetized in a timely manner through strategic investments by others with the resources to complete advanced exploration, permitting and development.

Table of Contents**Capital Resources and Liquidity**

Our cash resources and ability to monetize one or more of our exploration prospects, including the Nkamouna Project, will be critical to our future financial condition. Since the completion of the Feasibility Study in April 2011, spending activity for the Nkamouna Project has mainly been limited to securing the Nkamouna Project site and protecting assets, reclaiming certain prior exploration disturbances, continuing environmental monitoring and community development programs, and assisting potential strategic investors with their due diligence activities. We plan to continue this approach until we are reasonably satisfied that an appropriate strategic transaction for the Nkamouna Project can be accomplished and the remaining financing can be secured.

At June 30, 2012 we had approximately \$9.3 million of cash and cash equivalents on a consolidated basis compared to \$15.6 million at December 31, 2011, a decrease of approximately \$6.2 million. We expect that our cash resources will continue to be utilized at a slower rate during the balance of 2012, subject to adjustments that may become necessary if a strategic transaction is agreed upon and completed later this year. Our cash is invested in U.S. dollar deposits and highly liquid money market funds and in the Cameroon branch of a large international bank.

New mining projects such as the Nkamouna Project are typically financed using a combination of debt secured by the project and owners' equity. Our plan had been to attempt to finance the capital costs, startup expenses and financing costs of the Project in such a manner. In conventional project debt financing, GeoCam would be required to furnish, as equity, more than 40% of the total estimated capital and financing costs and expenses for the Nkamouna Project as a condition to securing loans for the balance of such costs and expenses. Based on the estimated capital and start-up costs of the Nkamouna Project, GeoCam's financial advisor estimated that our share of GeoCam equity to complete such debt financing for the Nkamouna Project would be approximately \$225 million, which reflects the amount of equity capital we would be required to contribute to GeoCam as a condition to conventional debt financing. We presently do not have sufficient capital resources available to meet the estimated equity requirements. Our ability to raise additional capital for this purpose would depend on a number of factors, many of which are partly or wholly outside of our control, including the state of worldwide financial, commodity and other markets, the market trading price of our common stock and demand for future access to the cobalt resources in the Nkamouna Project. We therefore concluded that a sale of some or all of our interest in the Nkamouna Project to a third party would be in the best interest of our stockholders.

We have met with various large international businesses with respect to the potential purchase of future off-take from, and possible investment in, the Nkamouna Project. The Company and the other GeoCam shareholders have discussed possible strategic investment arrangements with several large Asian companies. In 2012 these discussions have focused on one potential purchaser. These discussions could lead to a proposal under which the strategic investor would acquire a large interest in GeoCam or in the Nkamouna Project directly, for cash, and would assist GeoCam in raising the additional required funding to construct the Nkamouna Project and the investor would gain preferred access to future Nkamouna Project off-take. Any such cash paid by the strategic investor for our interest could be available to fund all or a portion of our remaining project equity requirements. Under such an arrangement our interest in the Nkamouna Project would be reduced, perhaps significantly, or eliminated. As of the date of this Report, no such strategic investment arrangement has been finalized. If we are unable to raise our share of equity required as a condition to project debt financing or to secure a strategic investment by another qualified party, construction of the Nkamouna Project will not be undertaken. We may consider putting the Nkamouna Project on a care and maintenance status in 2013 if we have been unable to close an acceptable strategic investment.

We do not anticipate that the Nkamouna Project will generate revenues until it begins operations, which could be at least three years after completion of required financing arrangements and commencement of construction. If we are successful in selling some or all of our interest in the Nkamouna Project to a third party, our future requirement to fund GeoCam and Project construction would be reduced and our opportunity to realize revenue from the Nkamouna Project would also be reduced or eliminated. Some or all of the proceeds from such a sale could be available for other purposes. We believe that our cash resources will satisfy our capital and liquidity requirements for pre-construction operations and other Company expenses through the second quarter of 2013, depending on GeoCam's level of activity and assuming the pending appeals described below are resolved favorably. The GeoCam pre-construction cash expenditures are presently expected to total approximately \$2.6 million for 2012, for which Geovic is responsible to fund 60.5%. As described in note 13(a) of the Consolidated Financial Statements, five judgments totaling approximately \$1.7 million against GeoCam are outstanding and under appeal and \$0.1 million has been attached in one court proceeding and is now restricted until resolution of the case. Should the judgments be upheld in full or in part upon exhaustion of final appeals, the GeoCam Shareholders would be required to fund a capital increase for GeoCam to satisfy the judgments. Funding the Geovic share of such a capital increase would adversely affect our remaining capital resources, and could result in exhaustion of the Company's cash resources earlier than we presently anticipate.

GeoCam's operating expenses are paid through capital increases approved by the shareholders of GeoCam and funded in accordance with the respective ownership interests prior to the capital increase. We will be obligated to fund 60.5% of future GeoCam capital increases. We anticipate further capital increases at GeoCam during 2012, and that approximately \$1.6 million of our available cash will be used during the balance of 2012 to pay our share of pre-construction operating expenses in Cameroon.

Table of Contents

We expect our general and administrative expenses for 2012 to total approximately \$5.9 million, not including any transaction costs related to any potential sale of some or all of our interest in the Nkamouna Project. We also expect to spend up to \$2.0 million for exploration of mineral properties, or investment in other resource entities, in the United States and elsewhere. We expect that a significant portion of our cash resources will be expended or committed for these purposes through early 2013 or later and that our cash balances will continue to decrease from quarter to quarter. Based on our current planned 2012 expenditures, we anticipate that our 2012 year-end consolidated cash and cash equivalents will be approximately \$3 to \$4 million. If we complete a sale of some or all of our interest in the Nkamouna Project during 2012, this estimate would be adjusted appropriately.

We expect that we will work with the other shareholders of GeoCam to reach an agreement with a third party on strategic investment transactions for the Nkamouna Project in 2012. We have budgeted a lower level of general, administrative and operating expenditures for 2012 to reflect our lower liquidity and relatively limited cash. We have also identified other areas where we can further reduce our expenses during the last half of 2012 if we have not progressed toward financing or selling some or all of our interest in the Nkamouna Project. We have taken these steps with a view to assuring that our cash resources will satisfy our cash requirements through the second quarter of 2013.

Management and the Board of Directors have begun to implement a number of cash conservation strategies for the Company and GeoCam. The most significant cost reductions compared to previous years is our reduction of expenditures at GeoCam. With the completion of the Feasibility Study in April 2011, the significant costs of technical evaluations, consultant and testing fees and travel are no longer being incurred. We have since reduced the Nkamouna Project expenses to incur only necessary expenditures, primarily limited to securing the site, reclaiming prior exploration disturbances, environmental monitoring, and supporting potential financial and strategic investor due diligence efforts. This has significantly reduced the anticipated level of GeoCam cash requirements for 2012.

In addition, we reduced the size of our Board of Directors to five persons, eliminated two consulting positions, agreed with a financial advisor to discontinue its services at least until a financing transaction is underway, eliminated much of our mineral and corporate marketing activities and limited travel and office expenses. In the third quarter we moved our Denver executive office to a smaller less expensive location after negotiating a termination of our existing lease. We have also deferred major exploration expenditures planned for New Caledonia. These downsizing and deferral efforts have been implemented to reduce financial commitments and overheads and position the Company for success going forward.

The Company and its subsidiaries do not have any material debt or other similar obligations or commitments. We believe that our present capital resources will be sufficient to satisfy the Company's existing capital and liquidity requirements described above through the second quarter of 2013, not including any equity requirements in connection with any Nkamouna Project debt financing by GeoCam or satisfaction of any judgments that may be upheld in final appeals of pending litigation. We have no standby financing arrangements currently in place.

Results of Operations

Three Months Ended June 30, 2012 Compared to Three Months Ended June 30, 2011:

The Company had no revenue and incurred losses from operations during the second quarters of 2012 and 2011, and has had no revenue from operations since inception. The net loss attributed to the Company decreased approximately \$1.6 million in the second quarter of 2012 compared to the second quarter 2011. Exploration expenses decreased by \$1.7 million in the quarter compared to the year earlier period, of which approximately \$0.8 million represents a decrease in exploration costs in Cameroon due to the completion of the feasibility study in 2011 and \$0.1 million represents a decrease in exploration expense in other Company projects mainly in Arizona, New Mexico and Papua New Guinea. Exploration office costs of GeoCam decreased approximately \$0.8 million from 2011 to 2012. .

Stock compensation expense decreased approximately \$0.2 million from in the second quarter of 2012 compared to the second quarter 2011. Stock compensation expense was lower in 2012 due to no stock options or restricted shares being granted in the first and second quarter of 2012 as they had been in 2011. The change in fair value of warrants for the second quarter of 2012 was \$0. This is due to the fair value of the warrants becoming \$0 in the second quarter of 2011 due to the decrease in the stock price and lower volatility as the warrants were getting closer to their expiration date. The warrants expired in March and April 2012.

General and administrative expenses decreased \$0.2 million in the quarter, when compared to the second quarter of 2011 primarily related to reduced financial advising fees, Delaware franchise taxes, travel expenses, Board of Director fees and charitable contributions to GeoAid.

Table of Contents

As an exploration stage company, we have charged our exploration and pre-construction expenses incurred for GeoCam to operations in the periods incurred and no such expenditures have been capitalized. We expect to continue this practice until a final development and mining plan is adopted and project financing is committed.

Six Months Ended June 30, 2012 Compared to Six Months Ended June 30, 2011:

The Company had no revenue and incurred losses from operations during the six months ended June 30, 2012 and 2011, and has had no revenue from operations since inception. The net loss attributed to the Company decreased approximately \$2.6 million in the six months ended June 30, 2012 compared to the same period in 2011. Exploration expenses decreased by \$3.3 million in the six months ended June 30, 2012 compared to the year earlier period, of which \$1.9 million represents a decrease in exploration costs in Cameroon due to completion of the feasibility study in April 2011 and a decrease of \$0.2 million in exploration expense in other Company projects mainly in Arizona, New Mexico, New Caledonia, and Papua New Guinea. Exploration office costs of GeoCam decreased \$1.1 million in the six months ended June 30, 2012, reflecting the scaling back of activities.

Stock compensation expense decreased approximately \$0.5 million in the quarter, when compared to the second quarter of 2011. There was no change in fair value of warrants for the six months ended June 30, 2012 compared to a gain of \$0.1 million for the same period in 2011. The fair value of the warrants became \$0 in the second quarter of 2011, resulting in no changes each subsequent quarter. The warrants expired in March and April 2012.

General and administrative expenses in the United States remained constant for the six months ended June 30, 2012, when compared to the same period of 2011. The Company continues to reduce general and administrative expenses, however the offsetting increase is a result of severance paid for an executive termination and the termination of the executive office lease in Denver during the six month period ended June 30, 2012.

As an exploration stage company, we have charged our exploration and pre-construction expenses incurred for GeoCam to operations in the periods incurred and no such expenditures have been capitalized. We expect to continue this practice until a final development and mining plan is adopted and project financing is committed. Once we begin to capitalize expenditures at the Nkamouna Project, our results of operations for financial reporting purposes may be affected for the period prior to commencement of mining and processing activities.

Off-Balance Sheet Arrangements

We have no off balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources.

Safe Harbor Statement

Certain statements contained in this report (including information incorporated by reference) are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and are intended to be covered by the safe harbor provided for under these sections. Our forward-looking statements include, without limitation statements with respect to the feasibility study for the Nkamouna Project; our ability to complete a disposition of some or all of our interest in the Nkamouna Project; our expectations regarding capital required at the Nkamouna Project; requirements for additional capital; anticipated terms and requirements under future Project debt financing arrangements; anticipated expenditures in 2012; our anticipated cash position at the end of 2013; our plans with respect to future debt and equity financing; and our ability to realize our future plans to become a mineral prospect generation and strategic investment business.

Where we express an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, our forward-looking statements are subject to risks, uncertainties, and other factors, which could cause actual results to differ materially from future results expressed, projected, or implied by those forward-looking statements. Important factors that could cause actual results to differ materially from such forward-looking statements (cautionary statements) are disclosed under Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2011 and include actual deviation from the feasibility study results; the availability of financing on acceptable terms or at all; actual results of current exploration activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of metals; market demand for metals; ability to negotiate acceptable metal sales agreements; possible variations in ore reserves, grades, or recovery rates; labor disputes, cost trends and availability of mining and processing equipment, operating materials and services; geopolitical developments and the results of national elections in Cameroon; delays in obtaining governmental approvals or changes in governmental laws and regulations; delays in the completion of development or construction activities and other factors as described herein. Many of these factors are beyond our ability to control or predict. Given these uncertainties, readers are cautioned not to place undue reliance on our forward-looking statements.

Table of Contents

All subsequent written and oral forward-looking statements attributable to us or to persons acting on our behalf are expressly qualified in their entirety by the cautionary statements. We disclaim any intention or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Not required.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Geovic maintains disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Our management is responsible for establishing and maintaining our disclosure controls and procedures. Our Chief Executive Officer and Chief Financial Officer participated with our management in evaluating the effectiveness of our disclosure controls and procedures as of June 30, 2012.

Based on our management's evaluation (with the participation of our Chief Executive Officer and Chief Financial Officer), our Chief Executive Officer and Chief Financial Officer have concluded that, as of June 30, 2012 our disclosure controls and procedures were effective to provide reasonable assurance that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

Management has evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, whether any changes in our internal control over financial reporting occurred during our last fiscal quarter which have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. During the quarter ended June 30, 2012, management concluded that there were no such changes to our internal control over financial reporting. The Company Controller left the Company in May 2012 and the review and control functions that had been performed by the Controller were assumed by the Chief Financial Officer.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

In November 2009, five management level consultants or employees of GeoCam filed lawsuits against GeoCam in Cameroon, claiming approximately \$2.2 million as compensation and damages as a result of termination of their services by GeoCam in connection with a reduction in workforce in February and March 2009. In April 2010 the litigation was dismissed. In July 2010 the litigation was re-filed in other jurisdictions and, on June 3, 2011, the High Court of Abong-Mbang before which four of the matters were pending entered judgments in favor of the four claimants totaling CFA 780,339,500 (approximately \$1.5 million at June 30, 2012). On November 14, 2011, the High Court of Mfoundi, Yaoundé before which the fifth matter was pending entered a judgment in favor of the claimant totaling CFA 118,804,219 (approximately \$0.2 million at June 30, 2012). GeoCam has filed appeals with the Court of Appeal of the Court of Appeal East Region at Bertoua in the four matters and to the Court of Appeal of the Center Region at Yaoundé in the fifth matter. These appeals stayed enforcement of the judgments pending resolution of the appeals. During June 2012, approximately CFA 52,000,000 (approximately \$0.1 million at June 30, 2012) of GeoCam funds were attached and restricted pending resolution of the fifth matter. The Courts before which the appeals are now pending are expected to issue decisions in September 2012. Further appeals to any adverse decisions could be taken to The Supreme Court in

Edgar Filing: GEOVIC MINING CORP. - Form 10-Q

Cameroon. The Company believes all contractual and other obligations to the claimants in these cases were satisfied at the time of termination and that the appeals will ultimately be resolved favorable to GeoCam. GeoCam intends to vigorously defend its position throughout the appellate process.

ITEM 1A. RISK FACTORS.

There are no material changes to the Risk Factors previously disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011. The following additional Risk Factor should be considered.

Table of Contents

We may be unable to complete a disposition of some or all of our interest in the Nkamouna Project in Cameroon.

We have been negotiating with a potential purchaser of some or all of our interest in the Nkamouna Project for over one year. As of the date of this report, no preliminary or definitive agreement for such a transaction has been mutually accepted by the Geovic Cameroon shareholders and the potential purchaser. If an agreement is reached, it will be subject, among other matters, to approval of our stockholders. If we are unable to complete and close an agreement to sell a significant interest in the Nkamouna Project to a strategic partner in a timely manner, our plan is to place the Nkamouna Project on a care and maintenance status and significantly further reduce our level of expenditures in Cameroon. In such event, we would not have sufficient resources to maintain our interest in the Project indefinitely and we could lose our interest in the Project. In such a scenario, our cash resources would likely be insufficient to sustain our other business activities.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. MINE SAFETY DISCLOSURES.

Pursuant to Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K, issuers that are operators, or that have a subsidiary that is an operator, of a coal or other mine in the United States are required to disclose in their annual reports filed with the SEC information regarding specified health and safety violations, orders and citations, related assessments and legal actions, and mining-related fatalities. During the fiscal year ended December 31, 2011 and through June 30, 2012, our U.S. exploration properties were not subject to regulation by the Federal Mine Safety and Health Administration under the Federal Mine Safety and Health Act of 1977.

ITEM 5. OTHER INFORMATION.

None.

ITEM 6. EXHIBITS.
