WisdomTree Trust Prospectus **1**

Table of Contents**WisdomTree DEFA Fund****Investment Objective**

The Fund seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dividend Index of Europe, Far East Asia and Australasia (the WisdomTree DEFA Index).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund's average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.48%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.48%

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. It also does not include transaction fees on purchases and redemptions of Creation Units because these fees will not be imposed on retail investors. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 Year	3 Years	5 Years	10 Years
	\$49	\$154	\$269	\$604

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 27% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares.

Principal Investment Strategies of the Fund

The Fund employs a passive management or indexing investment approach designed to track the performance of the WisdomTree DEFA Index. The Fund attempts to invest all, or substantially all, of its assets in the common stocks that make up the Index. The Fund generally uses a Representative Sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole.

The WisdomTree DEFA Index is a fundamentally weighted Index that is comprised of dividend-paying companies in the industrialized world, excluding Canada and the United States, that pay regular cash dividends. Eligibility requirements for the WisdomTree DEFA Index include: (i) incorporation in one of 16 developed European countries, Israel, Japan, Australia, New Zealand, Hong Kong or Singapore; (ii) payment of at least \$5 million in cash dividends on shares of common stock in the annual cycle prior to the annual Index rebalance; (iii) market capitalization

Edgar Filing: WisdomTree Trust - Form 497

of at least \$100 million as of the Index rebalance; (iv) average daily dollar volume of at least \$100,000 for three months preceding the Index rebalance; and (v) trading of at least 250,000 shares per month for each of the six months preceding the Index rebalance. Companies are weighted in the Index based on annual cash dividends paid. The maximum weight of any one sector and any one country in the Index, at the time of the Index's annual rebalance, is capped at 25%. In response to market conditions, sector and country weights may fluctuate above 25% between annual Index rebalance dates.

2 WisdomTree Trust Prospectus

Table of Contents

WisdomTree Investments, Inc., as index provider, currently uses Standard & Poor's Global Industry Classification Standards (S&P GICS) to define companies in each sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries.

Under normal circumstances, at least 95% of the Fund's total assets (exclusive of collateral held from securities lending) will be invested in the component securities of the Index. WisdomTree Asset Management, Inc. expects that, over time, the correlation between the Fund's performance and that of the Index, before fees and expenses, will be 95% or better.

To the extent the Fund's Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as its Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share (NAV), trading price, yield, total return and/or its ability to meet its objectives. For more information about the risks of investing in the Fund, see the section in the Fund's prospectus titled Additional Investment Objective, Strategy and Risk Information.

- n **Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.

- n **Market Risk.** The trading prices of equity securities, fixed income securities, currencies, commodities and other instruments fluctuate in response to a variety of factors. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

- n **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds (ETFs), Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of the Fund will approximate the Fund's NAV, there may be times when the market price of the shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount). This risk is heightened in times of market volatility or periods of steep market declines.

- n **Currency Exchange Rate Risk.** The Fund may invest a relatively large percentage of its assets in investments denominated in non-U.S. currencies or in securities that provide exposure to such currencies. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

- n **Financial Sector Risk.** The Fund may invest in companies in the financial sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector. This sector can be significantly affected by changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

- n **Fiscal Policy Risk.** Any repeal of or failure to extend the current U.S. federal tax treatment of qualified dividend income could make certain dividend-paying securities less appealing to investors and could have a negative impact on the performance of the Fund.

n

Edgar Filing: WisdomTree Trust - Form 497

Foreign Securities Risk. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.

- n **Geographic Investment Risk.** To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in the United Kingdom.

- n **Investment Style Risk.** The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to its Index.

- n **Issuer-Specific Risk.** Issuer-specific events, including changes in the financial condition of an issuer, can have a negative impact on the value of the Fund.

WisdomTree Trust Prospectus 3

Table of Contents

- n **Large-Capitalization Investing.** The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion.

- n **Mid-Capitalization Investing.** The Fund may invest in the securities of mid-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of smaller companies are often more vulnerable to market volatility than securities of larger companies.

- n **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

- n **Non-Diversification Risk.** Although the Fund intends to invest in a variety of securities and instruments, the Fund will be considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund’s volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund’s performance.

Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund’s average annual total returns, both before and after taxes. This table also shows how the Fund’s performance compares to the WisdomTree DEFA Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

The Fund’s year-to-date total return as of June 29, 2012 was 2.54%.

Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	24.41%	2Q/2009
Lowest Return	(19.97)%	4Q/2008

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

Table of Contents**Average Annual Total Returns for the periods ending December 31, 2011**

WisdomTree DEFA Fund	1 Year	5 Years	Since Inception (6/16/2006)
Return Before Taxes Based on NAV	(9.28)%	(4.26)%	(0.09)%
Return After Taxes on Distributions	(10.58)%	(5.50)%	(1.28)%
Return After Taxes on Distributions and Sale of Fund Shares	(5.97)%	(4.25)%	(0.75)%
MSCI EAFE Index (Reflects no deduction for fees, expenses or taxes)	(12.14)%	(4.72)%	(0.99)%
WisdomTree DEFA Index (Reflects no deduction for fees, expenses or taxes)	(9.26)%	(3.83)%	0.37%

Management**Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation serves as sub-adviser to the Fund.

Portfolio Managers

Karen Q. Wong, CFA, a Managing Director, Equity Index Strategies, has been a portfolio manager of the Fund since February 2008.

Richard A. Brown, CFA, a Director, Equity Portfolio Management, has been a portfolio manager of the Fund since February 2008.

Thomas J. Durante, CFA, a Director, Senior Portfolio Manager, Equity, has been a portfolio manager of the Fund since February 2008.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (Creation Units), which only institutions or large investors may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 50,000 shares. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund and/or a designated amount of U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains.

Table of Contents**WisdomTree DEFA Equity Income Fund****Investment Objective**

The Fund seeks to track the price and yield performance, before fees and expenses, of the WisdomTree DEFA Equity Income Index.

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund's average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.58%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.58%

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. It also does not include transaction fees on purchases and redemptions of Creation Units because these fees will not be imposed on retail investors. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 Year	3 Years	5 Years	10 Years
	\$59	\$186	\$324	\$726

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 32% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares.

Principal Investment Strategies of the Fund

The Fund employs a passive management or indexing investment approach designed to track the performance of the WisdomTree DEFA Equity Income Index. The Fund attempts to invest all, or substantially all, of its assets in the common stocks that make up the Index. The Fund generally uses a Representative Sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole.

The WisdomTree DEFA Equity Income Index is a fundamentally weighted Index that is comprised of companies with high dividend yields selected from the WisdomTree DEFA Index. The Index consists of companies incorporated in one of 16 developed European countries, Israel, Japan, Australia, New Zealand, Hong Kong or Singapore. At the annual Index rebalance, companies within the WisdomTree DEFA Index with market capitalizations of at least \$200 million and average daily trading volumes of at least \$200,000 for the prior three months are ranked by

Edgar Filing: WisdomTree Trust - Form 497

dividend yield. Securities ranking in the highest 30% by dividend yield are selected for inclusion within the WisdomTree DEFA Equity Income Index. Companies are weighted in the Index based on annual cash dividends paid. The maximum weight of any one sector and any one country in the Index, at the time of the Index's annual rebalance, is capped at 25%. In response to market conditions, sector and country weights may fluctuate above 25% between annual Index rebalance dates.

6 WisdomTree Trust Prospectus

Table of Contents

WisdomTree Investments, Inc., as index provider, currently uses Standard & Poor's Global Industry Classification Standards (S&P GICS) to define companies in each sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, telecommunication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries.

Under normal circumstances, at least 95% of the Fund's total assets (exclusive of collateral held from securities lending) will be invested in the component securities of the Index. WisdomTree Asset Management, Inc. expects that, over time, the correlation between the Fund's performance and that of the Index, before fees and expenses, will be 95% or better.

To the extent the Fund's Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as its Index.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share (NAV), trading price, yield, total return and/or its ability to meet its objectives. For more information about the risks of investing in the Fund, see the section in the Fund's prospectus titled Additional Investment Objective, Strategy and Risk Information.

- n **Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- n **Market Risk.** The trading prices of equity securities, fixed income securities, currencies, commodities and other instruments fluctuate in response to a variety of factors. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.
- n **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds (ETFs), Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of the Fund will approximate the Fund's NAV, there may be times when the market price of the shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount). This risk is heightened in times of market volatility or periods of steep market declines.
- n **Currency Exchange Rate Risk.** The Fund may invest a relatively large percentage of its assets in investments denominated in non-U.S. currencies or in securities that provide exposure to such currencies. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.
- n **Financial Sector Risk.** The Fund may invest in companies in the financial sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector. This sector can be significantly affected by changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.
- n **Fiscal Policy Risk.** Any repeal of or failure to extend the current U.S. federal tax treatment of qualified dividend income could make certain dividend-paying securities less appealing to investors and could have a negative impact on the performance of the Fund.

n

Edgar Filing: WisdomTree Trust - Form 497

Foreign Securities Risk. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.

n **Geographic Investment Risk.** To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The Fund currently invests a significant portion of its assets in companies organized in Australia and the United Kingdom.

n **Investment Style Risk.** The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to its Index.

Table of Contents

- n **Issuer-Specific Risk.** Issuer-specific events, including changes in the financial condition of an issuer, can have a negative impact on the value of the Fund.

- n **Large-Capitalization Investing.** The Fund may invest a relatively large percentage of its assets in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion.

- n **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

- n **Non-Diversification Risk.** Although the Fund intends to invest in a variety of securities and instruments, the Fund will be considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.

- n **Telecommunications Investing.** The Fund may invest in companies in the telecommunications industry. The telecommunications industry can be significantly affected by, among other things, government intervention and regulation, technological innovations that make existing products and services obsolete, and consumer demand.

Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the WisdomTree DEFA Equity Income Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.
