Item 7.01 Regulation FD Disclosure.

On March 21, 2013, Golden Star Resources Ltd. (the Company) issued a press release announcing the filing of the National Instrument 43-101 (NI 43-101) compliant technical report (the Technical Report) for the Wassa Gold Mine, Ghana that culminated in the Company updating its Proven and Probable Mineral Reserves. The press release dated March 21, 2013, is hereby being furnished to the Securities and Exchange Commission (SEC) as Exhibit 99.1 hereto.

On March 21, 2013, the Company filed the Technical Report titled NI 43-101 Technical Report on Mineral Resources and Mineral Reserves Golden Star Resources Ltd, Wassa Gold Mine, Ghana Effective Date 31st December 2012 dated March 1, 2013 with the securities regulatory authorities in Canada. The Technical Report is hereby being furnished to the SEC as Exhibit 99.2 hereto to satisfy the Company's public disclosure obligations under Regulation FD under the Securities Exchange Act of 1934, as amended (the Exchange Act). The Technical Report was prepared by SRK Consulting (UK) Limited under the supervision of Dr. Lucy Roberts, Senior Consultant, Resource Geology, a Qualified Person pursuant to NI 43-101.

All mineral resources in the Technical Report have been estimated in accordance with the definition standards on mineral resources of the Canadian Institute of Mining, Metallurgy and Petroleum referred to in NI 43-101. U.S. reporting requirements for disclosure of mineral properties are governed by the SEC Industry Guide 7 (Guide 7). NI 43-101 and Guide 7 standards are substantially different. The Technical Report uses the terms Measured Mineral Resources, Indicated Mineral Resources and Inferred Mineral Resources. These terms are defined in and required to be disclosed by NI 43-101; however, these terms are not defined terms under Guide 7 and are normally not permitted to be used in reports and registration statements filed with the SEC. US Investors are cautioned not to assume that any part or all of the mineral deposits in these categories will ever be converted into a higher category or into mineral reserves. US investors are cautioned not to assume that any part or all of the Inferred Mineral Resource exists, or is economically or legally mineable. Also, disclosure of contained ounces is permitted under Canadian regulations; however the SEC generally requires mineral resource information to be reported as in-place tonnage and grade.

The information in this Item 7.01, including the information set forth in the Technical Report, are deemed to be furnished and shall not be deemed to be filed for purposes of the Exchange Act, nor shall they be deemed incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act. The information set forth in this Item 7.01 shall not be deemed an admission as to the materiality of any information in this Current Report on Form 8-K that is required to be disclosed solely to satisfy the requirements of Regulation FD.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits.

The following exhibits relating to Item 7.01 are intended to be furnished to, not filed with, the SEC pursuant to Regulation FD.
