Use of Proceeds: We estimate that the aggregate net proceeds, after deducting underwriters' discounts and commissions and other estimated offering expenses payable by us, from sale of the notes offered hereby will be approximately \$1,579 million. We intend to use all or a portion of the net proceeds from this offering to fund the purchase price of the Tender Notes tendered and accepted by us for purchase in the Tender Offer, including the payment of accrued interest. We intend to use any net proceeds remaining from this offering, including if the Tender Offer is not consummated, for general corporate purposes, including repayment of indebtedness.

We expect to deliver the notes against payment by the underwriters on or about June 10, 2014, which will be the fifth business day following the date of the pricing of the notes (such settlement being referred to as T+5). Since trades in the secondary market generally settle in three business days, purchasers who wish to trade notes on the date of pricing or the next succeeding business day will be required, by virtue of the fact the notes initially will settle on T+5, to specify alternative settlement arrangements to prevent a failed settlement.
