The following language appeared as Item 8.01 Other Events on Forest Oil Corporation's Form 8-K filed November 12, 2014.

Settlement of Certain Litigation

As previously disclosed at page 52 of the definitive proxy statement/prospectus dated October 20, 2014 (the Definitive Proxy Statement/Prospectus) under the heading "Litigation Relating to the Combination Transaction," seven actions have been filed by putative stockholders of Forest Oil Corporation (Forest) challenging the proposed combination of Forest and Sabine Oil & Gas LLC's (Sabine) businesses, six in the Supreme Court of the State of New York (the New York Court) and one in the United States District Court for the District of Colorado. The New York cases have been consolidated under the caption *In re Forest Oil Corporation Shareholder Litigation*, Index No. 651418/2014 (the New York Action) and the Colorado case has been captioned as *Olinatz v. Forest Oil Corp., et al.*, Case No. 1:14-cv-01409 (the Colorado Action, together with the New York Action, the Actions).

On November 11, 2014, the defendants reached an agreement in principle with plaintiffs in the New York Action regarding a settlement of that action (which will also resolve the Colorado Action), and that agreement is reflected in a memorandum of understanding. In connection with the settlement contemplated by the memorandum of understanding, Forest agreed to make certain additional disclosures related to the proposed transaction with Sabine, which are contained in this Form 8-K, and Sabine agreed that, within 120 days after the closing of the proposed combination transaction, Sabine Investor Holdings LLC will designate for a period of no less than three (3) years at least one additional independent director, as defined in Section 303A.02 of the New York Stock Exchange Listed Company Manual, as a Sabine Nominee (as defined in Section 1.4 of the Amended and Restated Agreement and Plan of Merger entered into on July 9, 2014 among Forest, Sabine Investor Holdings, AIV Holdings and certain of their affiliated entities (the Amended and Restated Agreement and Plan of Merger)). The total number of Sabine Nominees will remain unchanged, but at least one of the remaining two Sabine Nominees that have not yet been determined will be independent. The memorandum of understanding contemplates that the parties will enter into a stipulation of settlement.

The stipulation of settlement will be subject to customary conditions, including court approval. In the event that the parties enter into a stipulation of settlement, a hearing will be scheduled at which the New York Court will consider the fairness, reasonableness, and adequacy of the settlement. If the settlement is finally approved by the court, it will resolve and release all claims in all actions that were or could have been brought challenging any aspect of the proposed combination transaction, the Amended and Restated Agreement and Plan of Merger, the merger agreement originally entered into by Sabine Investor Holdings, Forest, New Forest Oil Inc. and certain of their affiliated entities on May 5, 2014, any disclosure made in connection therewith, including in the Definitive Proxy Statement/Prospectus, and all other matters that were the subject of the complaint in the New York Action, pursuant to terms that will be disclosed to stockholders prior to final approval of the settlement. In addition, in connection with the settlement, the parties contemplate that the parties shall negotiate in good faith regarding the amount of attorneys' fees and expenses that shall be paid to plaintiffs' counsel in connection with the Actions. There can be no assurance that the parties will ultimately enter into a stipulation of settlement or that the New York Court will approve the settlement even if the parties were to enter into such stipulation. In such event, the proposed settlement as contemplated by the memorandum of understanding may be terminated.

SUPPLEMENT TO DEFINITIVE PROXY STATEMENT/PROSPECTUS

In connection with the settlement of certain outstanding stockholder suits as described in this Form 8-K, Forest has agreed to make these supplemental disclosures to the Definitive Proxy Statement/Prospectus dated October 20, 2014. This supplemental information should be read in conjunction with the Definitive Proxy Statement/Prospectus, which should be read in its entirety.

The first table at the top of page 52 of the Definitive Proxy Statement is replaced, in its entirety, with the following:

The last full paragraph on page 53 of the Definitive Proxy Statement is replaced, in its entirety, with the following:

J.P. Morgan prepared a discounted cash flow analysis of the projected cash flow derived from production of Forest's proved reserves and probable and possible resource potential (the 3P assets) as of calendar year-end 2013, based upon extrapolations from estimates provided by Forest's management for fiscal years 2014 through 2053 plus one additional period representing the remaining production thereafter, that were in each case reviewed and approved by Forest's management for J.P. Morgan's use in connection with its financial analyses and rendering its fairness opinion. The projected cash flows from Forest's 3P assets were discounted to present values using a range of discount rates from 10.5% to 12%, which were chosen by J.P. Morgan based upon an analysis of the weighted average cost of capital of Forest. The present pre-tax value of Forest's 3P assets was then adjusted for Forest's net present value of projected general and administrative expenses (not including stock-based compensation), net present value of projected cash taxes (net of the present value of projected net operating loss utilization), 2013 calendar year-end net debt (calculated as the sum of net debt and expected cash settlement of stock awards) and other adjustments to indicate a range of implied net asset equity values of between \$151 million and \$358 million for Forest. The implied net asset equity values for Forest were divided by the number of fully diluted shares outstanding at Forest to arrive at the following range of implied net asset values per share of Forest common stock.

The second full paragraph on page 54 of the Definitive Proxy Statement is replaced, in its entirety, with the following:

J.P. Morgan prepared a discounted cash flow analysis of the projected cash flow derived from production of Sabine's 3P assets as of calendar year-end 2013, based upon extrapolations from estimates provided by Forest's management for fiscal years 2014 through 2053 plus one additional period representing the remaining production thereafter, that were in each case reviewed and approved by Forest's management for J.P. Morgan's use in connection with its financial analyses and rendering its fairness opinion. The projected cash flows from Sabine's 3P assets were discounted to present values using a range of discount rates from 9.0% to 10.5%, which were chosen by J.P. Morgan based upon an analysis of the weighted average cost of capital of Sabine. The present pretax value of Sabine's 3P assets was then adjusted for Sabine's net present value of projected general and administrative expenses (not including stock-based compensation), net present value of projected cash taxes (net of the present value of projected net operating loss utilization), 2013 calendar year-end net debt and other adjustments to indicate the following range of implied net asset equity values for Sabine.

The last full paragraph on page 55 and first full paragraph on page 56 of the Definitive Proxy Statement are replaced, in their entirety, with the following:

J.P. Morgan conducted an analysis of the theoretical value creation to the holders of Forest common stock that compared the estimated implied equity value of Forest on a standalone basis based on the midpoint value determined in J.P. Morgan's Net Asset Value Analysis described above to the implied equity value of Forest shares pro forma for the proposed transactions contemplated by the original merger agreement. J.P. Morgan calculated the pro forma implied equity value of Forest shares by (1) adding the sum of (a) the implied equity value of Forest using the midpoint value determined in J.P. Morgan's Net Asset Value Analysis described above, (b) the implied equity value of Sabine using the midpoint value determined in J.P. Morgan's Net Asset Value Analysis described above, (c) the estimated present value of the Synergies of \$256 million and (d) the estimated impact of improved cost of capital of the combined company relative to the estimated cost of capital for Forest on a standalone basis of \$197 million, (2) subtracting the sum of (a) the estimated implied impact on the present value of the projected net operating loss usage for the combined company relative to the estimated present value of the net operating loss usage of each company on a standalone basis of \$14 million and (b) the estimated present value of transaction fees and expenses relating to the transactions contemplated by the original merger agreement of \$69 million, and (3) multiplying such sum of the estimated valuations described above by a factor of 26.5%, representing the approximate pro forma equity

ownership of the combined company by the holders of Forest common stock. Based on the assumptions described above, this analysis implied value creation for the holders of Forest common stock of approximately 5.0%.

J.P. Morgan also conducted an analysis of the theoretical value creation to the holders of Forest common stock that compared the equity value of Forest based on the per share closing price of Forest shares on May 2, 2014 to the implied equity value of Forest shares pro forma for the proposed transactions contemplated by the original merger agreement. J.P. Morgan calculated the pro forma implied equity value of Forest shares by (1) adding the sum of (a) the aggregate market value of Forest based upon the per share closing price of Forest shares on May 2, 2014, (b) the implied equity value of Sabine based on (i) the application of the 5.1x multiple of Forest's firm value to estimated EBITDAX for

2014 based on research analysts' consensus estimates to Sabine's estimated EBITDAX for 2014 based on Sabine Risked Budget, less (ii) Sabine's net debt as of calendar year-end 2013 and (c) the estimated present value of the Synergies of \$256 million, (2) subtracting the sum of (a) the implied impact on projected net operating loss usage for the combined company relative to the estimated present value of the projected net operating loss usage of each company on a standalone basis of \$14 million and (b) the estimated present value of transaction fees and expenses relating to the transactions contemplated by the original merger agreement of \$69 million, and (3) multiplying such sum of the estimated valuations described above by a factor of 26.5%, representing the approximate pro forma equity ownership of the combined company by the holders of Forest common stock. Based on the assumptions described above, this analysis implied value creation for the holders of Forest common stock of approximately 26.0%.

The following disclosure supplements the disclosure on page 57 of the Definitive Proxy Statement by adding a new sentence immediately following the table on such page:

Forest estimated the present value of total deal costs for the transaction to be \$69 million. Forest also estimated \$40 million per year in synergies for the combined companies, with 6% (or \$2.4 million) to be realized in 2014, 44% (or \$17.5 million) to be realized in 2015, and 100% (\$40 million) thereafter.
