## The Markets in Review

Dear Shareholder.

Diverging monetary policies and shifting economic outlooks between regions were the broader themes underlying market conditions during the 12-month period ended August 31, 2015. The period began with investors caught between the forces of low interest rates and an improving U.S. economy, high asset valuations, oil price instability and lingering geopolitical risks in Ukraine and the Middle East. U.S. growth picked up considerably in the fourth quarter of 2014, while the broader global economy showed signs of slowing. Investors favored the stability of U.S. assets despite expectations that the Federal Reserve (Fed) would eventually be inclined to raise short-term interest rates. International markets continued to struggle even as the European Central Bank and the Bank of Japan eased monetary policy. Oil prices plummeted in late 2014 due to a global supply-and-demand imbalance, sparking a sell-off in energy-related assets and emerging markets. Investors piled into U.S. Treasury bonds as their persistently low yields had become attractive as compared to the even lower yields on international sovereign debt.

Equity markets reversed in early 2015, with international markets outperforming the United States as global risks abated. Investors had held high expectations for the U.S. economy, but a harsh winter and west coast port strike brought disappointing first-quarter data and high valuations took their toll on U.S. stocks, while bond yields fell to extreme lows. (Bond prices rise as yields fall.) In contrast, economic reports in Europe and Asia easily beat investors—very low expectations, and accommodative policies from central banks in those regions helped international equities rebound. Oil prices stabilized, providing some relief for emerging market stocks, although a stronger U.S. dollar continued to be a headwind for the asset class.

U.S. economic data regained momentum in the second quarter, helping U.S. stocks resume an upward path; however, the improving data underscored the likelihood that the Fed would raise short-term rates before the end of 2015 and bond yields moved swiftly higher. The month of June brought a sharp, but temporary, sell-off across most asset classes as Greece s long-brewing debt troubles came to an impasse. Although these concerns abated in the later part of July when the Greek parliament passed a series of austerity and reform measures, the calm was short-lived. Chinese equity prices plunged and experienced extreme volatility despite policymakers attempts to stabilize the market. Financial markets broadly were highly volatile during the month of August as evidence of a further deceleration in China s economy stoked worries about global growth. Equity and high yield assets declined, with emerging markets especially hard hit given falling commodity prices and lower growth estimates for many of those economies. High quality fixed income assets such as U.S. Treasury and municipal bonds benefited from investors seeking shelter from global volatility.

At BlackRock, we believe investors need to think globally, extend their scope across a broad array of asset classes and be prepared to move freely as market conditions change over time. We encourage you to talk with your financial advisor and visit blackrock.com for further insight about investing in today s markets.

## Municipal Market Overview

For the Reporting Period Ended August 31, 2015 Municipal Market Conditions

Municipal bonds generated positive performance for the period, thanks to a favorable supply-and-demand environment and declining interest rates in the earlier half. (Bond prices rise as rates fall.) Interest rates moved lower in 2014 even as the U.S. Federal Reserve (the Fed ) curtailed its open-market bond purchases. This, coupled with reassurance from the Fed that short-term rates would remain low for a considerable amount of time, resulted in strong demand for fixed income investments in 2014, with municipal bonds being one of the stronger-performing sectors for the year. This trend continued into the beginning of 2015 until rate volatility ultimately increased in February as a result of uneven U.S. economic data and widening central bank divergence, i.e., rate cuts outside the United States while the Fed poised for normalizing U.S. rates. During the 12 months ended August 31, 2015, municipal bond funds garnered net inflows of approximately \$20 billion (based on data from the Investment Company Institute).

For the same 12-month period, total new issuance remained relatively strong from a historical perspective at \$417 billion (considerably higher than the \$308 billion issued in the prior 12-month period). A noteworthy portion of new supply during this period was attributable to refinancing activity (roughly 60%) as issuers took advantage of low interest rates and a flatter yield curve to reduce their borrowing costs.

S&P Municipal Bond Index Total Returns as of August 31, 2015 6 months: 0.21%

12 months: 2.38%

### A Closer Look at Yields

From August 31, 2014 to August 31, 2015, yields on AAA-rated 30-year municipal bonds rose by 7 basis points (bps) from 3.03% to 3.10%, while 10-year rates rose by 9 bps from 2.07% to 2.16% and 5-year rates increased 25 bps from 1.08% to 1.33% (as measured by Thomson Municipal Market Data). Overall, the municipal yield curve remained relatively steep over the 12-month period even as the spread between 2- and 30-year maturities flattened by 22 bps and the spread between 2- and 10-year maturities flattened by 20 bps.

During the same time period, U.S. Treasury rates fell by 15 bps on 30-year bonds, 14 bps on 10-year bonds and 9 bps in 5-years. Accordingly, tax-exempt municipal bonds underperformed Treasuries across the yield curve, most notably in the intermediate part of the curve as a result of increased supply and tempered demand. In absolute terms, positive performance of muni bonds was driven largely by a supply/demand imbalance within the municipal market as investors sought income and incremental yield in an environment where opportunities had become scarce. More broadly, municipal bonds benefited from the greater appeal of tax-exempt investing in light of the higher tax rates implemented in 2014. The asset class is known for its lower relative volatility and preservation of principal with an emphasis on income as tax rates rise.

### **Financial Conditions of Municipal Issuers**

The majority of municipal credits remain strong, despite well-publicized distress among a few issuers. The four largest states California, New York, Texas and Florida have exhibited markedly improved credit fundamentals during the slow national recovery. However, several states with the largest unfunded pension liabilities have seen their bond prices decline noticeably and remain vulnerable to additional price deterioration. On the local level, Chicago s credit quality downgrade is an outlier relative to other cities due to its larger pension liability and inadequate funding remedies. BlackRock maintains the view that municipal bond defaults will remain minimal and in the periphery while the overall market is fundamentally sound. We continue to advocate careful credit research and believe that a thoughtful approach to structure and security selection remain imperative amid uncertainty in a modestly improving economic environment.

The opinions expressed are those of BlackRock as of August 31, 2015, and are subject to change at any time due to changes in market or economic conditions. The comments should not be construed as a recommendation of any individual holdings or market sectors. Investing involves risk including loss of principal. Bond values fluctuate in price so the value of your investment can go down depending on market conditions. Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make

principal and interest payments. There may be less information on the financial condition of municipal issuers than for public corporations. The market for municipal bonds may be less liquid than for taxable bonds. Some investors may be subject to Alternative Minimum Tax (AMT). Capital gains distributions, if any, are taxable.

The Standard & Poor s Municipal Bond Index, a broad, market value-weighted index, seeks to measure the performance of the U.S. municipal bond market. All bonds in the index are exempt from U.S. federal income taxes or subject to AMT. Past performance is no guarantee of future results. Index performance is shown for illustrative purposes only. It is not possible to invest directly in an index.

## The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the distribution rate on, and net asset value ( NAV ) of, their common shares ( Common Shares ). However, these objectives cannot be achieved in all interest rate environments.

In general, the concept of leveraging is based on the premise that the financing cost of leverage, which is based on short-term interest rates, is normally lower than the income earned by a Trust on its longer-term portfolio investments purchased with the proceeds from leverage. To the extent that the total assets of the Trusts (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Trusts—shareholders benefit from the incremental net income. The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV.

To illustrate these concepts, assume a Trust s Common Shares capitalization is \$100 million and it utilizes leverage for an additional \$30 million, creating a total value of \$130 million available for investment in longer-term income securities. If prevailing short-term interest rates are 3% and longer-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, a Trust s financing costs on the \$30 million of proceeds obtained from leverage are based on the lower short-term interest rates. At the same time, the securities purchased by a Trust with the proceeds from leverage earn income based on longer-term interest rates. In this case, a Trust s financing cost of leverage is significantly lower than the income earned on a Trust s longer-term investments acquired from leverage proceeds, and therefore the holders of Common Shares (Common Shareholders) are the beneficiaries of the incremental net income.

However, in order to benefit Common Shareholders, the return on assets purchased with leverage proceeds must exceed the ongoing costs associated with the leverage. If interest and other costs of leverage exceed the Trusts—return on assets purchased with leverage proceeds, income to shareholders is lower than if the Trusts had not used leverage. Furthermore, the value of the Trusts—portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the value of the Trusts—obligations under their respective leverage arrangements generally does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trusts—NAVs positively or negatively. Changes in the future direction of interest rates are very difficult to predict accurately, and there is no assurance that a Trust—s intended leveraging strategy will be successful.

Leverage also generally causes greater changes in the Trusts NAVs, market prices and dividend rates than comparable portfolios without leverage. In a declining market, leverage is likely to cause a greater decline in the net asset value and market price of a Trust s Common Shares than if the Trusts were not leveraged. In addition, the Trusts may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause the Trusts to incur losses. The use of leverage may limit a Trust s ability to invest in certain types of securities or use certain types of hedging strategies. The Trusts incur expenses in connection with the use of leverage, all of which are borne by Common Shareholders and may reduce income to the Common Shares. Moreover, to the extent the calculation of the Trusts investment advisory fees includes assets purchased with the proceeds of leverage, the investment advisory fees payable to the Trusts investment advisor will be higher than if the Trusts did not use leverage.

To obtain leverage, each Trust has issued Variable Rate Demand Preferred Shares (VRDP Shares), or Variable Rate Muni Term Preferred Shares (VMTP Shares) (collectively, Preferred Shares) and/or leveraged its assets through the use of tender option bond trusts (TOB Trusts) as described in the Notes to Financial Statements.

Under the Investment Company Act of 1940, as amended (the 1940 Act ), each Trust is permitted to issue debt up to \$\frac{9}{3}\% of its total managed assets or equity securities (e.g., Preferred Shares) up to 50\% of its total managed assets. A Trust may voluntarily elect to limit its leverage to less than the maximum amount permitted under the 1940 Act. In addition, a Trust may also be subject to certain asset coverage, leverage or portfolio composition requirements imposed by the Preferred Shares governing instruments or by agencies rating the Preferred Shares, which may be more stringent than those imposed by the 1940 Act.

If a Trust segregates or designates on its books and records cash or liquid assets having a value not less than the value of the Trusts obligations under the TOB Trust (including accrued interest), a TOB Trust is not considered a senior security and is not subject to the foregoing limitations and requirements under the 1940 Act.

## **Derivative Financial Instruments**

The Trusts may invest in various derivative financial instruments. Derivative financial instruments are used to obtain exposure to a security, index and/or market without owning or taking physical custody of securities or to manage market, equity, credit, interest rate, foreign currency exchange rate, commodity and/or other risks. Derivative financial instruments may give rise to a form of economic leverage. Derivative financial instruments also involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Trusts ability to use a derivative financial instrument successfully depends on the investment advisor s ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may limit the amount of appreciation a Trust can realize on an investment and/or may result in lower distributions paid to shareholders. The Trusts investments in these instruments are discussed in detail in the Notes to Financial Statements.

## Trust Summary as of August 31, 2015

**BlackRock Municipal Bond Investment Trust** 

### **Trust Overview**

BlackRock Municipal Bond Investment Trust s (BIE) (the Trust ) investment objective is to provide current income exempt from regular federal income tax and Florida intangible personal property tax. The Trust seeks to achieve its investment objective by investing at least 80% of its assets in municipal bonds the interest of which is exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax) and Florida intangible personal property tax. Under normal market conditions, the Trust invests at least 80% of its assets in municipal bonds that are investment grade quality at the time of investment. The Trust may invest directly in such securities or synthetically through the use of derivatives. Due to the repeal of the Florida intangible personal property tax, in September 2008, the Board gave approval to permit the Trust the flexibility to invest in municipal obligations regardless of geographic location since municipal obligations issued by any state or municipality that provides income exempt from regular federal income tax would now satisfy the foregoing objective and policy.

No assurance can be given that the Trust s investment objective will be achieved.

Initial Offering Date	April 30, 2002
Yield on Closing Market Price as of August 31, 2015 (\$14.10) <sup>1</sup>	6.47%
Tax Equivalent Yield <sup>2</sup>	11.43%
Current Monthly Distribution per Common Share <sup>3</sup>	\$0.076
Current Annualized Distribution per Common Share <sup>3</sup>	\$0.912
Economic Leverage as of August 31, 2015 <sup>4</sup>	39%

- Yield on closing market price is calculated by dividing the current annualized distribution per share by the closing market price. Past performance does not guarantee future results.
- Tax equivalent yield assumes the maximum marginal federal tax rate of 43.4%, which includes the 3.8% Medicare tax. Actual tax rates will vary based on income, exemptions and deductions. Lower taxes will result in lower tax equivalent yields.
- The distribution rate is not constant and is subject to change.
- Represents VRDP Shares and TOB Trusts as a percentage of total managed assets, which is the total assets of the Trust, including any assets attributable to VRDP Shares and TOB Trusts, minus the sum of accrued liabilities. For a discussion of leveraging techniques utilized by the Trust, please see The Benefits and Risks of Leveraging on page 5.

### Performance

Returns for the 12 months ended August 31, 2015 were as follows:

	Returns Bas	Returns Based On		
	Market Price	NAV <sup>7</sup>		
BIE <sup>5</sup>	2.85%	4.26%		
Lipper General & Insured Municipal Debt Funds (Leveraged) <sup>6</sup>	3.91%	4 56%		

- 5 All returns reflect reinvestment of dividends and/or distributions.
- 6 Average return.
- 7 The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV.

The following discussion relates to the Trust s absolute performance based on NAV:

U.S. municipal bonds finished the 12-month period in positive territory, as the contribution of yields to total returns more than offset the impact of a small decline in prices. Yields moved slightly higher in the period as investors began to prepare for the possibility of interest rate increases by the Fed. (Bond prices fall when rates rise.) The short end of the yield curve, which is most sensitive to Fed policy shifts, experienced the largest increase in yields. In contrast, yields on longer-term bonds rose only slightly amid the environment of moderate economic growth and low inflation.

Given the outperformance of longer-term bonds, the Trust s duration positioning (interest rate sensitivity) had a positive impact on performance. The Trust s longer-dated holdings in the transportation and health sectors were particularly strong contributors to performance. At a time of modest price gains for the municipal bond market, the income generated from coupon payments on the Trust s portfolio of tax-exempt bonds made a meaningful contribution to absolute performance. In addition, the use of leverage allowed the Trust to enhance its level of income.

The Trust s use of U.S. Treasury futures contracts to manage interest rate risk detracted slightly, as 10-year Treasury yields diverged from municipal bond yields and finished the period lower.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

## Trust Summary as of August 31, 2015

**BlackRock Municipal Bond Trust** 

### **Trust Overview**

BlackRock Municipal Bond Trust s (BBK) (the Trust) investment objective is to provide current income exempt from regular federal income tax. The Trust seeks to achieve its investment objective by investing primarily in municipal bonds exempt from regular federal income taxes (except that the interest may be subject to the federal alternative minimum tax). The Trust invests, under normal market conditions, at least 80% of its assets in municipal bonds that are investment grade quality. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

### Performance

Returns for the 12 months ended August 31, 2015 were as follows:

	Returns Based On	
	Market Price	NAV <sup>7</sup>
BBK <sup>5</sup>	3.83%	5.96%
Lipper General & Insured Municipal Debt Funds (Leveraged) <sup>6</sup>	3.91%	4.56%

<sup>5</sup> All returns reflect reinvestment of dividends and/or distributions.

- 6 Average return.
- 7 The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV.

The following discussion relates to the Trust s absolute performance based on NAV:

U.S. municipal bonds finished the 12-month period in positive territory, as the contribution of yields to total returns more than offset the impact of a small decline in prices. Yields moved slightly higher in the period as investors began to prepare for the possibility of interest rate increases by the Fed. (Bond prices fall when rates rise.) The short end of the yield curve, which is most sensitive to Fed policy shifts, experienced the largest increase in yields. In contrast, yields on longer-term bonds rose only slightly amid the environment of moderate economic growth and low inflation.

With this as the backdrop, the Trust s position in longer-dated bonds benefited performance. The Trust s allocations to the health, transportation and utilities sectors were also positive contributors to performance. The Trust s investment-grade holdings in the AA and A rated categories contributed positively, as did its exposure to higher yielding bonds.

Given the modest total return for the municipal bond market, the income generated from coupon payments on the Trust s portfolio of tax-exempt bonds made a meaningful contribution to absolute performance. In addition, the use of leverage allowed the Trust to enhance its level of income.

The Trust s position in certain longer duration bonds detracted from performance. Its use of U.S. Treasury futures contracts to manage interest rate risk detracted slightly, as 10-year Treasury yields diverged from municipal bonds and finished the period lower.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

3 Scheduled maturity dates and/or bonds that are subject to potential calls by issuers over the next five years.

\* Excludes short-term securities.

Trust Summary as of August 31, 2015

**BlackRock Municipal Income Investment Quality Trust** 

### **Trust Overview**

BlackRock Municipal Income Investment Quality Trust s (BAF) (the Trust ) investment objective is to provide current income exempt from federal income tax, including the alternative minimum tax and Florida intangible property tax. The Trust seeks to achieve its investment objective by investing, under normal circumstances, at least 80% of its assets in municipal bonds exempt from federal income taxes, including the alternative minimum tax. The Trust also invests at least 80% of its assets in municipal bonds that are investment grade quality at the time of investment. The Trust may invest directly in such securities or synthetically through the use of derivatives. Due to the repeal of the Florida intangible personal property tax, in September 2008, the Board gave approval to permit the Trust the flexibility to invest in municipal obligations regardless of geographic location since municipal obligations issued by any state or municipality that provides income exempt from regular federal income tax would now satisfy the foregoing objective and policy.

No assurance can be given that the Trust s investment objective will be achieved.

- Yield on closing market price is calculated by dividing the current annualized distribution per share by the closing market price. Past performance does not guarantee future results.
- Tax equivalent yield assumes the maximum marginal federal tax rate of 43.4%, which includes the 3.8% Medicare tax. Actual tax rates will vary based on income, exemptions and deductions. Lower taxes will result in lower tax equivalent yields.
- <sup>3</sup> The distribution rate is not constant and is subject to change.
- Represents VMTP Shares and TOB Trusts as a percentage of total managed assets, which is the total assets of the Trust, including any assets attributable to VMTP Shares and TOB Trusts, minus the sum of accrued liabilities. For a discussion of leveraging techniques utilized by the Trust, please see The Benefits and Risks of Leveraging on page 5.

### Performance

Returns for the 12 months ended August 31, 2015 were as follows:

	Returns Ba	Returns Based On	
	Market Price	NAV <sup>7</sup>	
BAF <sup>5</sup>	3.68%	4.71%	
Lipper General & Insured Municipal Debt Funds (Leveraged) <sup>6</sup>	3.91%	4.56%	

- 5 All returns reflect reinvestment of dividends and/or distributions.
- 6 Average return.
- 7 The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV.

The following discussion relates to the Trust s absolute performance based on NAV:

U.S. municipal bonds finished the 12-month period in positive territory, as the contribution of yields to total returns more than offset the impact of a small decline in prices. Yields moved slightly higher in the period as investors began to prepare for the possibility of interest rate increases by the Fed. (Bond prices fall when rates rise.) The short end of the yield curve, which is most sensitive to Fed policy shifts, experienced the largest increase in yields. In contrast, yields on longer-term bonds rose only slightly amid the environment of moderate economic growth and low inflation.

Given the outperformance of longer-term bonds, the Trust s duration positioning (interest rate sensitivity) had a positive impact on performance. (Bond prices rise when rates fall.) The Trust s longer-dated holdings in the transportation, school districts, utilities and state tax-backed sectors were particularly strong contributors to performance. At a time of modest price gains for the municipal bond market, the income generated from coupon payments on the Trust s portfolio of tax-exempt bonds made a meaningful contribution to absolute performance. In addition, the use of leverage allowed the Trust to enhance its level of income.

The Trust s use of U.S. Treasury futures contracts to manage interest rate risk detracted slightly, as 10-year Treasury yields diverged from municipal bonds and finished the period lower.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

**BlackRock Municipal Income Quality Trust** 

### **Trust Overview**

BlackRock Municipal Income Quality Trust s (BYM) (the Trust ) investment objective is to provide current income exempt from federal income taxes, including the alternative minimum tax. The Trust seeks to achieve its investment objective by investing, under normal circumstances, at least 80% of its assets in municipal bonds exempt from federal income taxes, including the alternative minimum tax. The Trust also invests at least 80% of its assets in municipal bonds that are investment grade quality at the time of investment. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

### Performance

Returns for the 12 months ended August 31, 2015 were as follows:

	Returns B	Returns Based On	
	Market Price	NAV <sup>7</sup>	
BYM <sup>5</sup>	4.03%	3.85%	
Lipper General & Insured Municipal Debt Funds (Leveraged) <sup>6</sup>	3.91%	4.56%	

<sup>5</sup> All returns reflect reinvestment of dividends and/or distributions.

- 6 Average return.
- The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV.

The following discussion relates to the Trust s absolute performance based on NAV:

Municipal bonds delivered a positive total return during the 12-month period. Long-term bonds outperformed short-term debt, leading to a flattening of the yield curve for the full 12 months. Performance trends differed significantly during throughout the 12-month period. In the first five months (September 2014 through February 2015), the market rallied significantly and the municipal yield curve flattened aggressively. During this time, long-term rates fell much more than intermediate rates, while two-year rates rose. In contrast, the final seven months of the period brought weaker price performance and a steepening of the yield curve.

Given the modest total return for the municipal bond market, the income generated from coupon payments on the Trust s portfolio of tax-exempt bonds made a meaningful contribution to absolute performance. The Trust s positions in the school district and transportation sectors also contributed positively.

The Trust s positions in Chicago general obligation bonds and related securities, as well as New Jersey state-appropriated credits, detracted from performance. The yield spreads on these securities widened significantly due to concerns over pension funding and the associated downgrades to the issuers—credit ratings. The Trust was also negatively impacted by its duration exposure, as municipal yields increased slightly during the annual period. Additionally, the Trust—s use of U.S. Treasury futures contracts to manage interest rate risk detracted slightly, as 10-year Treasury yields diverged from municipal bonds and finished the period lower.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

# Trust Summary as of August 31, 2015

BlackRock Municipal Income Trust II

### **Trust Overview**

BlackRock Municipal Income Trust II s (BLE) (the Trust ) investment objective is to provide current income exempt from regular federal income tax. The Trust seeks to achieve its investment objective by investing primarily in municipal bonds exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax). The Trust invests, under normal market conditions, at least 80% of its assets in municipal bonds that are investment grade quality at the time of investment. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Trust Information

### Performance

Returns for the 12 months ended August 31, 2015 were as follows:

	Returns B	ased On
	Market Price	NAV <sup>7</sup>
BLE <sup>5</sup>	2.83%	5.01%
Lipper General & Insured Municipal Debt Funds (Leveraged) <sup>6</sup>	3.91%	4.56%

<sup>5</sup> All returns reflect reinvestment of dividends and/or distributions.

6 Average return.

7 The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV.

The following discussion relates to the Trust s absolute performance based on NAV:

U.S. municipal bonds finished the 12-month period in positive territory, as the contribution of yields to total returns more than offset the impact of a small decline in prices. Yields moved slightly higher in the period as investors began to prepare for the possibility of interest rate increases by the Fed. (Bond prices fall when rates rise.) The short end of the yield curve, which is most sensitive to Fed policy shifts, experienced the largest increase in yields. In contrast, yields on longer-term bonds rose only slightly amid the environment of moderate economic growth and low inflation.

Given the modest total return for the municipal bond market, the income generated from coupon payments on the Trust s portfolio of tax-exempt bonds made a meaningful contribution to absolute performance. The Trust s investment-grade holdings in the AA and A rated categories contributed positively, as did its concentrations in the transportation, health, utilities and corporate-related sectors. The Trust s positioning with respect to duration (sensitivity to interest rate movements) and the yield curve made more modest contributions. In addition, the use of leverage allowed the Trust to enhance its level of income.

The Trust s use of U.S. Treasury futures contracts to manage interest rate risk detracted slightly, as 10-year Treasury yields diverged from municipal bonds and finished the period lower. Additionally, the Trust s positions in tax-backed bonds issued by Illinois and New Jersey underperformed due to increasing concerns regarding unfunded pension liabilities and future budget gaps. The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of August 31, 2015

BlackRock MuniHoldings Investment Quality Fund

### **Trust Overview**

BlackRock MuniHoldings Investment Quality Fund s (MFL) (the Trust) investment objective is to provide shareholders with current income exempt from federal income tax and to provide shareholders with the opportunity to own shares the value of which is exempt from Florida intangible personal property tax. The Trust seeks to achieve its investment objective by investing primarily in long-term, investment grade municipal obligations exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax). Under normal market conditions, the Trust invests at least 80% of its assets in municipal obligations with remaining maturities of one year or more at the time of investment. The Trust may invest directly in such securities or synthetically through the use of derivatives. Due to the repeal of the Florida intangible personal property tax, in September 2008, the Board gave approval to permit the Trust the flexibility to invest in municipal obligations regardless of geographic location since municipal obligations issued by any state or municipality that provides income exempt from regular federal income tax would now satisfy the foregoing objective and policy.

No assurance can be given that the Trust s investment objective will be achieved.

## Trust Summary as of August 31, 2015

BlackRock MuniVest Fund, Inc.

### **Trust Overview**

BlackRock MuniVest Fund, Inc. s (MVF) (the Trust ) investment objective is to provide shareholders with as high a level of current income exempt from federal income taxes as is consistent with its investment policies and prudent investment management. The Trust seeks to achieve its investment objective by investing at least 80% of its assets in municipal obligations exempt from federal income taxes (except that the interest may be subject to the federal alternative minimum tax). Under normal market conditions, the Trust primarily invests in long term municipal obligations rated investment grade at the time of investment and in long term municipal obligations with maturities of more than ten years at the time of investment. The Trust may invest up to 20% of its total assets in securities rated below investment grade or deemed equivalent at the time of purchase. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

6		
O	Average	refurn

The following discussion relates to the Trust s absolute performance based on NAV:

U.S. municipal bonds finished the 12-month period in positive territory, as the contribution of yields to total returns more than offset the impact of a small decline in prices. Yields moved slightly higher in the period as investors began to prepare for the possibility of interest rate increases by the Fed. (Bond prices fall when rates rise.) The short end of the yield curve, which is most sensitive to Fed policy shifts, experienced the largest increase in yields. In contrast, yields on longer-term bonds rose only slightly amid the environment of moderate economic growth and low inflation.

At a time of low total returns for the municipal bond market, the income generated from coupon payments on the Trust s portfolio of tax-exempt bonds made a meaningful contribution to absolute performance. The Trust s exposure to long-maturity bonds benefited performance given the flattening of the yield curve. Exposure to the health and transportation sectors provided the largest sector total returns for the period.

The Trust s duration positioning (sensitivity to interest rate movements) detracted modestly from performance given that bond yields rose across the yield curve during the period. The Trust s use of U.S. Treasury futures contracts to manage interest rate risk detracted slightly, as 10-year Treasury yields diverged from municipal bonds and finished the period lower.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

<sup>7</sup> The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV.

#### Notes to Schedule of investments

- (a) U.S. Government securities, held in escrow, are used to pay interest on this security, as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (b) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (c) Represent bonds transferred to a TOB Trust in exchange of cash and residual certificates received by the Trust. These bonds serve as collateral in a secured borrowing. See Note 4 of the Notes to Financial Statements for details of municipal bonds transferred to TOB Trusts.
- (d) All or a portion of security is subject to a recourse agreement, which may require the Trust to pay the liquidity provider in the event there is a shortfall between the TOB Trust Certificates and proceeds received from the sale of the security contributed to the TOB Trust or in the event of a default on the security. In the case of a shortfall or default, the aggregate maximum potential amount the Trust could ultimately be required to pay under the agreements, which expire from October 1, 2016 to November 15, 2019, is \$4,102,786.

See Notes to Financial Statements.

#### Schedule of Investments (continued)

BlackRock Municipal Bond Investment Trust (BIE)

(e) During the year ended August 31, 2015, investments in issuers considered to be an affiliate of the Trust for purposes of Section 2(a)(3) of the 1940 Act were as follows:

	Shares Held at August 31,	Net	Shares Held at August 31,		
Affiliate	2014	Activity	2015	Inc	come
FFI Institutional Tax-Exempt Fund	698,423	161,863	860,286	\$	672

(f) Represents the current yield as of report date.

Derivative Financial Instruments Outstanding as of August 31, 2015

#### **Financial Futures Contracts**

Contracts				Notional Unrealized	
Short	Issue	Exchange	Expiration	Value Appreciation	n
(37)	10-Year U.S. Treasury Note	Chicago Board of Trade	December 2015	\$ 4,701,313 \$ 18,446	5

#### Derivative Financial Instruments Categorized by Risk Exposure

The following is a summary of the Trust s derivative financial instruments categorized by risk exposure. For information about the Trust s investment risks regarding derivative financial instruments, refer to the Notes to Financial Statements.

As of August 31, 2015, the fair values of derivative financial instruments were as follows:

				Foreign		
				Currency	Interest	
Derivative Financial		Commodity	Credit	<b>Equity Exchange</b>	Rate	
Instruments Assets	Statements of Assets and Liabilities Location	Contracts	Contracts	Contracts Contracts	Contracts	Total
Financial futures						
contracts	Net unrealized appreciation <sup>1</sup>				\$ 18,446	\$ 18,446

<sup>&</sup>lt;sup>1</sup> Includes cumulative appreciation (depreciation) on financial futures contracts, as reported in the Schedule of Investments. Only current day s variation margin is reported within the Statements of Assets and Liabilities.

For the year ended August 31, 2015, the effect of derivative financial instruments in the Statements of Operations was as follows:

	Commodity Contracts	Credit Contracts	Equity Contracts	Foreign Currency Exchange Contracts	Interest Rate Contracts	Total
Net Realized Gain (Loss) from:						
Financial futures contracts					\$ (183,536)	\$ (183,536)
	Commodity Contracts	Credit Contracts	Equity Contracts	Foreign	Interest	Total

Currency Rate Exchange Contracts Contracts

Net Change in Unrealized Appreciation

(Depreciation) on:

Financial futures contracts \$ 26,090 \$ 26,090

For the year ended August 31, 2015, the average quarterly balances of outstanding derivative financial instruments were as follows:

#### Financial futures contracts:

Average notional value of contracts short

\$ 5,701,355

#### Fair Value Hierarchy as of August 31, 2015

Various inputs are used in determining the fair value of investments and derivative financial instruments. For information about the Trust spolicy regarding valuation of investments and derivative financial instruments, refer to the Notes to Financial Statements.

The following tables summarize the Trust s investments and derivative financial instruments categorized in the disclosure hierarchy:

	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term Investments <sup>1</sup>		\$ 85,658,854		\$ 85,658,854
Short-Term Securities	\$ 860,286			860,286
Total	\$ 860,286	\$ 85,658,854		\$ 86,519,140

<sup>&</sup>lt;sup>1</sup> See above Schedule of Investments for values in each state or political subdivision.

See Notes to Financial Statements.

BlackRock Municipal Bond Investment Trust
(BIE)

	Level 1	Level 2	Level 3	T	otal
Derivative Financial Instruments <sup>1</sup>					
Assets:					
Interest rate contracts	\$ 18,446		\$	6	18,446

Derivative financial instruments are financial futures contracts, which are valued at the unrealized appreciation (depreciation) on the instrument.

The Trust may hold assets and/or liabilities in which the fair value approximates the carrying amount for financial statement purposes. As of August 31, 2015, such assets and/or liabilities are categorized within the disclosure hierarchy as follows:

	Level 1	Level 2	Level 3	Total
Assets:				
Cash pledged for financial futures contracts	\$ 49,950			\$ 49,950
Liabilities:				
TOB Trust Certificates		\$ (16,235,837)		(16,235,837)
VRDP Shares		(17,800,000)		(17,800,000)
Total	\$ 49,950	\$ (34,035,837)		\$ (33,985,887)

During the year ended August 31, 2015, there were no transfers between levels.

See Notes to Financial Statements.

#### Derivative Financial Instruments Categorized by Risk Exposure

The following is a summary of the Trust s derivative financial instruments categorized by risk exposure. For information about the Trust s investment risks regarding derivative financial instruments, refer to the Notes to Financial Statements.

As of August 31, 2015, the fair values of derivative financial instruments were as follows:

					Foreign			
					Currency	Interest		
Derivative Financial		Commodity	Credit	Equity	Exchange	Rate		
Instruments Assets	Statements of Assets and Liabilities Location	Contracts	Contracts	Contracts	Contracts	Contracts	Total	
Financial futures								
contracts	Net unrealized appreciation <sup>1</sup>					\$ 29,619	\$ 29,619	

<sup>&</sup>lt;sup>1</sup> Includes cumulative appreciation (depreciation) on financial futures contracts, as reported in the Schedule of Investments. Only current day s variation margin is reported within the Statements of Assets and Liabilities.

For the year ended August 31, 2015, the effect of derivative financial instruments in the Statements of Operations was as follows:

				Foreign		
				Currency	Interest	
	Commodity	Credit	Equity	Exchange	Rate	
	Contracts	Contracts	Contracts	Contracts	Contracts	Total
Net Realized Gain (Loss) from:						
Financial futures contracts					\$ (425,764)	\$ (425,764)
				Foreign		
				Currency	Interest	
	Commodity	Credit	Equity	Exchange	Rate	
	Contracts	Contracts	Contracts	Contracts	Contracts	Total
Net Change in Unrealized Appreciation (Depreciation) on:						
Financial futures contracts		C 1' 1 .			\$ 58,922	\$ 58,922

 $For the year ended \ August \ 31, 2015, the \ average \ quarterly \ balances \ of \ outstanding \ derivative \ financial \ instruments \ were \ as \ follows:$ 

Financial futures contracts:

Average notional value of contracts short \$ 26,922,582

#### Fair Value Hierarchy as of August 31, 2015

Various inputs are used in determining the fair value of investments and derivative financial instruments. For information about the Trust s policy regarding valuation of investments and derivative financial instruments, refer to the Notes to Financial Statements.

The following tables summarize the Trust s investments and derivative financial instruments categorized in the disclosure hierarchy:

	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term Investments <sup>1</sup>		\$ 266,241,467		\$ 266,241,467
Short-Term Securities	\$ 6,015,344			6,015,344
Total	\$ 6,015,344	\$ 266,241,467		\$ 272,256,811
Total	\$ 0,015,544	\$ 200,241,407		\$ 272,230,011

<sup>1</sup> See above Schedule of Investments for values in each state or political subdivision.

			Level		
	Level 1	Level 2	3	,	Total
Derivative Financial Instruments <sup>1</sup>					
Assets:					
Interest rate contracts	\$ 29,619			\$	29,619

Derivative financial instruments are financial futures contracts, which are valued at the unrealized appreciation (depreciation) on the instrument.

See Notes to Financial Statements.

### Schedule of Investments (concluded)

BlackRock Municipal Bond Trust (BBK)

The Trust may hold assets and/or liabilities in which the fair value approximates the carrying amount for financial statement purposes. As of August 31, 2015, such assets and/or liabilities are categorized within the disclosure hierarchy as follows:

	Level 1	Level 2	Level 3	Total
Assets:				
Cash pledged for financial futures contracts	\$ 220,050			\$ 220,050
Liabilities:				
TOB Trust Certificates		\$ (19,494,759)		(19,494,759)
VMTP Shares		(79,900,000)		(79,900,000)
Total	\$ 220,050	\$ (99,394,759)		\$ (99,174,709)

During the year ended August 31, 2015, there were no transfers between levels.

See Notes to Financial Statements.

#### Notes to Schedule of Investments

- (a) U.S. Government securities, held in escrow, are used to pay interest on this security, as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (b) Represent bonds transferred to a TOB Trust in exchange of cash and residual certificates received by the Trust. These bonds serve as collateral in a secured borrowing. See Note 4 of the Notes to Financial Statements for details of municipal bonds transferred to TOB Trusts.
- (c) All or a portion of security is subject to a recourse agreement, which may require the Trust to pay the liquidity provider in the event there is a shortfall between the TOB Trust Certificates and proceeds received from the sale of the security contributed to the TOB Trust or in the event of a default on the security. In the case of a shortfall or default, the aggregate maximum potential amount the Trust could ultimately be required to pay under the agreements, which expire from October 1, 2016 to July 1, 2020, is \$7,486,046.
- (d) Represents the current yield as of report date.
- (e) During the year ended August 31, 2015, investments in issuers considered to be an affiliate of the Trust for purposes of Section 2(a)(3) of the 1940 Act were as follows:

	Shares			
	Held at		Shares Held	
	August 31,	Net	at August 31,	
Affiliate	2014	Activity	2015	Income
FFI Institutional Tax-Exempt Fund	1,321,380	(367,769)	953,611	\$ 578

Derivative Financial Instruments Outstanding as of August 31, 2015

#### Derivative Financial Instruments Categorized by Risk Exposure

The following is a summary of the Trust s derivative financial instruments categorized by risk exposure. For information about the Trust s investment risks regarding derivative financial instruments, refer to the Notes to Financial Statements.

As of August 31, 2015, the fair values of derivative financial instruments were as follows:

	Foreign		
	Currency	Interest	
Derivative Financial	Commodity Credit Equity Exchange	Rate	
Instruments Assets	Statements of Assets and Liabilities Location Contracts Contracts Contracts	Contracts	Total
Financial futures contracts	Net unrealized appreciation <sup>1</sup>	\$ 67,803	\$ 67,803

	Foreign		
	Currency	Interest	
Derivative Financial	Commodity Credit Equity Exchange	Rate	
Instruments Liabilities	Statements of Assets and Liabilities Location ContractsContractsContracts	Contracts	Total
Financial futures contracts	Net unrealized depreciation <sup>1</sup>	\$ 18,334	\$ 18,334

<sup>&</sup>lt;sup>1</sup> Includes cumulative appreciation (depreciation) on financial futures contracts, as reported in the Schedule of Investments. Only current day s variation margin is reported within the Statements of Assets and Liabilities.

For the year ended August 31, 2015, the effect of derivative financial instruments in the Statements of Operations was as follows:

				Foreign			
					Interest		
	Commodity Contracts	Credit Contracts	Equity Contracts	Currency Exchange Contracts	Rate Contracts	,	Total
Net Realized Gain (Loss) from:							
Financial futures contracts					\$ (471,515)	\$	(471,515)
				Foreign			
					Interest		
				Currency			
	Commodity	Credit	Equity	Exchange	Rate		
	Contracts	Contracts	Contracts	Contracts	Contracts	,	Total
Net Change in Unrealized Appreciation (Depreciation)							
on:							
Financial futures contracts					\$ 67,942	\$	67,942
For the year ended August 31, 2015, the average quarterly balances of outstanding derivative financial instruments were as follows:							

Financial futures contracts:		
Average notional value of contracts	long	\$ 1,148,766
Average notional value of contracts	short	\$ 16,622,789

#### Fair Value Hierarchy as of August 31, 2015

Various inputs are used in determining the fair value of investments and derivative financial instruments. For information about the Trust s policy regarding valuation of investments and derivative financial instruments, refer to the Notes to Financial Statements.

The following tables summarize the Trust s investments and derivative financial instruments categorized in the disclosure hierarchy:

	Level 1	Level 2	Level 3	Total
