GOL Receives 50th Aircraft; Increases Fleet Plan

São Paulo, June 27, 2006 GOL Linhas Aéreas Inteligentes (BOVESPA: GOLL4 and NYSE: GOL), Brazilian low cost, low fare airline, announces that it has incorporated its 49th and 50th aircraft into its fleet of Boeing 737s. As a result, the Company will increase its daily operations to 530 flights. GOL currently serves 50 airports in 47 cities throughout Brazil and South America.

The Company also announces that it has increased its fleet plan for the 2006-2008 period, as part of the Company's continuing plans for route expansion and cost reductions. The fleet expansion will adequately meet the increasing demand in the domestic market – an estimated growth of 18% growth in 2006. GOL's aircraft have the highest productivity index in Brazil and one of the best in the world, at over 14 block hours per day. In addition, the Company's 25 minute turnaround time is one of the shortest among airlines throughout the world.

According to David Barioni, Technical Vice President of GOL, "our fleet expansion allows the company to adequately serve market growth in Brazil and in South America. The additional aircraft allow us to add more flight frequencies, providing more opportunities for passengers to enjoy our high-quality, low-fare transportation services."

The Company has increased its fleet plan by two 737-700 NGs in 2006, one 737-700 NG in 2007 and one 737-700 NG in 2008. GOL's revised fleet plan is presented in the table below:
