**GOL Adopts GPS Landing System for its Latest Generation Fleet**

*As of January 2010, GOL's aircraft will be able to take off and land with even more precision, reducing operating costs and CO2 emissions*

**São Paulo, December 1, 2009** GOL Linhas Aéreas Inteligentes S.A. (Bovespa: GOLL4 and NYSE: GOL), the largest low cost and low fare airline in Latin America, hereby announces that as of January 2010, its aircraft will be equipped with sensors to enable the use of the GPS Landing System, an innovative landing and takeoff system, as well as Vertical Situation Display, a sophisticated tool for determining the aircraft's position in relation to the ground.

The GPS Landing System enables with more accurate and safer, the plotting of curved segments in a single procedure, thereby permitting continuous ascent or descent.

This type of navigation reduces fuel consumption and the emission of environmentally harmful gases by up to 15% in these flight stages, declared GOL's Technical Vice-President Fernando Rockert de Magalhães. We are anticipating a global trend which will become the dominant technology in the near future.

*The GPS Landing System reduces fuel consumption and the emission of environmentally harmful gases.*

GOL's aircraft will also be equipped with Vertical Situation Display, which will allow pilots to accurately identify, from the cockpit, information on ground relief and obstacles. This equipment further enhances safety, by providing an additional tool for monitoring the position of the aircraft in relation to the ground.

It also permits more efficient landing planning, reducing landing component wear and tear and, consequently, future maintenance expenses.

**FORWARD-LOOKING STATEMENTS**

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
