Demand outlook among customers in developed market is more stable. Continued contract base growth bodes well for the future of the service business.

The quarterly Equipment order intake may fluctuate due to the timing of the large port crane projects.

Konecranes redefines its financial guidance due to booking the effect of the fraudulent actions against Konecranes as part of non-recurring items that is included in the operating profit.

PREVIOUS FINANCIAL GUIDANCE

Based on the order book, service contract base, and the near-term demand outlook, the year 2015 sales are expected to be slightly higher than in 2014. We expect the 2015 operating profit, excluding restructuring costs and transaction costs related to the Terex merger, to be approximately on the same level as in 2014.

NEW FINANCIAL GUIDANCE

Based on the order book, service contract base, and the near-term demand outlook, the year 2015 sales are expected to be slightly higher than in 2014. We expect the 2015 operating profit, excluding restructuring costs, transaction costs related to the Terex merger and the effect of the fraudulent actions against Konecranes, to be approximately on the same level as in 2014.

The non-recurring items in 2014 included restructuring costs only.

Acting CEO Teo Ottola:

“Our third quarter was a combination of continued tough market conditions affecting our order intake and sales, as well as successful execution of cost savings actions. Business Area Service continued to improve its operating profit in a year-on-year comparison, although the rate of the improvement came in lower than in the first half of 2015 due to the lower-than-expected sales in the quarter. Sustained robust order intake and contract base suggest that this was mostly a timing issue. Hence, we look forward to a strong fourth quarter in Service. Operating profit in Business Area Equipment, which came in slightly below the previous year, reflected the low level of deliveries during the quarter. In fact, sales declined by 6 percent year-on-year at comparable currencies, which resulted in under absorption of fixed costs in manufacturing and other operations. Demand continued weak in emerging markets and sales in North America did not meet our expectations. Additionally, there have been some delays in customers’ decision-making on new investments and execution of on-going projects. Taking these challenges into account, the third-quarter result demonstrated that our cost savings are producing results and that we are on track to reach EUR 30 million cost savings by the end of the first quarter of 2016.

As indicated in the financial guidance issued in September, the market situation remains uncertain. Those operating in emerging markets or commodities are feeling the effect of the changes in trading conditions. The impact concerning developed markets is still unclear. Against this backdrop, we continue to streamline our cost base. In addition to the previously announced EUR 30 million cost savings program, we continuously adapt our cost structure to the current demand.

The merger process with Terex, including antitrust filings, is proceeding according to plan.”

Konecranes Plc

Interim report January–September 2015

MARKET REVIEW

In January–September, emerging economies struggled, while industrial production in the euro area saw a slight upturn. At the same time, the U.S. economic data was still generally positive, but some signs of weaker momentum could be observed in the business conditions.

American factory output, measured by the Purchasing Managers' Index (PMI), continued in the expansive territory, although the rate of growth softened from 2014. The U.S. manufacturing capacity utilization rate was above the previous year's level on average in January–September. However, the capacity utilization rate levelled off during 2015.

According to the PMI surveys in the Eurozone, manufacturing production growth accelerated in January–September 2015, but the overall rate of expansion remained moderate. Germany, Spain, the Netherlands, and Italy were the leading lights, whereas the French manufacturing sector contracted for the most of the first nine months of 2015. Correspondingly, the EU capacity utilization was slightly up on a year-on-year basis.

Based on the January–September 2015 Purchasing Managers' Indexes, manufacturing activity worsened further in the BRIC countries with the exception of India. PMIs in Brazil, China, and Russia pointed to a contraction of manufacturing output, while the signs of modest growth could be observed in India.

Overall, the activity in the world's manufacturing sector, according to the aggregated JPMorgan Global Manufacturing PMI, continued to increase in January–September 2015, but the rate of

Raw material prices, including steel and copper, continued to be under downward pressure in January–September 2015 and were clearly down on year-on-year basis. The EUR/USD exchange rate stabilized in the second quarter of 2015 at the level that was clearly below the previous year's corresponding period.

Note: Unless otherwise stated, the figures in brackets in the sections below refer to the same period in the previous year.

ORDERS RECEIVED

January–September orders received totaled EUR 1,452.9 million (1,390.2), representing an increase of 4.5 percent compared to previous year. Orders received grew by 10.7 percent in Service and by 0.4 percent in Equipment compared to a year before. Group orders received rose in the Americas and APAC but were stable in EMEA.

Third-quarter order intake rose by 3.8 percent from a year before and totaled EUR 443.8 million (427.4). Order intake increased in Service by 12.7 percent, but decreased by 1.9 percent in Equipment. Order intake grew in EMEA and APAC, while it declined in the Americas.

ORDER BOOK

The value of the order book at end-September totaled EUR 1,075.3 million. The order book increased by 4.8 percent from the last year's comparison figure of EUR 1,026.2 million, but decreased by 2.3 percent from end-June 2015 when it stood at EUR 1,100.4 million. Service accounted for EUR 185.4 million (17 percent) and Equipment for EUR 889.9 million (83 percent) of the total end-September order book.

growth weakened from 2014 and it was only slightly above stagnation at the end of the period.

Compared to the previous year, the demand for cranes and hoists improved among industrial customers in Europe, whereas the demand weakened in the Americas, Middle East and Asia. The demand for heavy-duty cranes continued to suffer from the low investment activity within the process industries. Demand for lift trucks was strong across the globe, with the exception of Middle East and Africa.

The growth of global container traffic was weak at approximately 1 percent in January–September 2015. In the third quarter, container throughput declined by approximately 1 percent. Declining port handling volumes have been reported predominantly in some Asian ports, as well as in the Baltic Sea. The demand for yard cranes was robust.

The demand growth for lifting equipment services was driven by EMEA and Asia-Pacific, where as the demand was stable in the Americas.

SALES

Group sales in January–September increased by 8.1 per-cent from the previous year and totaled EUR 1,517.2 million (1,403.2). Sales in Service grew by 12.6 percent and in Equipment by 4.1 percent.

Third-quarter sales rose by 2.5 percent from a year ago and totaled EUR 506.7 million (494.4). Sales increased in Service by 7.3 percent, but decreased in Equipment by 1.7 percent.

At end-September, the regional breakdown calculated on a rolling 12 months basis was as follows: EMEA 46 (46), Americas 38 (36) and APAC 16 (18) percent.

RISKS AND UNCERTAINTIES

Konecranes operates in emerging countries that entail political, economic, and regulatory uncertainties. Adverse changes in the operating environment of these countries may result in currency losses, elevated delivery costs, or loss of assets. Konecranes operates a crane factory in Zaporozhye, Ukraine. The value of the total assets related to the Zaporozhye factory amounted to approximately EUR 10 million on September 30, 2015.

The operations in emerging countries have had a negative impact on the aging structure of accounts receivable and may increase credit losses or the need for higher provisions for doubtful accounts.

Konecranes has made several acquisitions and expanded organically into the new countries. A failure to integrate the acquired business or grow newly established operations may result in an impairment of goodwill and other assets.

One of the key strategic initiatives of Konecranes is oneKONECRANES. This initiative involves a major capital expenditure for the information systems. Higher-than-expected development or implementation costs or a failure to extract business benefits from the new processes and systems may lead to an impairment of assets or decrease in profitability.

Konecranes delivers projects, which involve the risks related to, for example, engineering and project execution including Konecranes' suppliers. A failure to plan or manage these projects may lead to higher-than-estimated costs or disputes with customers.

Challenges in financing, e.g., due to the currency fluctuations, may force customers to postpone projects or even to cancel the existing orders. Konecranes intends to avoid incurring costs for major projects under

MARKET OUTLOOK

Customers are cautious about investing as economic growth has slowed down across the globe. Companies operating in emerging and commodity markets are particularly under pressure to save costs. Demand outlook among customers in developed market is more stable. Continued contract base growth bodes well for the future of the service business. The quarterly Equipment order intake may fluctuate due to the timing of the large port crane projects.

PREVIOUS FINANCIAL GUIDANCE

Based on the order book, service contract base, and the near-term demand outlook, the year 2015 sales are expected to be slightly higher than in 2014. We expect the 2015 operating profit, excluding restructuring costs and transaction costs related to the Terex merger, to be approximately on the same level as in 2014.

NEW FINANCIAL GUIDANCE

Based on the order book, service contract base, and the near-term demand outlook, the year 2015 sales are expected to be slightly higher than in 2014. We expect the 2015 operating profit, excluding restructuring costs, transaction costs related to the Terex merger and the effect of the fraudulent actions against Konecranes, to be approximately on the same level as in 2014.

construction in excess of advance payments. However, it is possible that the cost-related commitments in some projects temporarily exceed the amount of advance payments.

The completion of the Merger is subject to a number of conditions, including, among other things, the approval by Terex stockholders of the merger proposal, the approval by Konecranes shareholders of all of the proposals relating to the merger and the obtainment of antitrust and other regulatory approvals in the United States, the European Union, China and certain other jurisdictions, which make the completion and timing of the completion of the merger uncertain. In addition, either Terex or Konecranes may terminate the business combination agreement if the Merger has not been completed by August 10, 2016 (subject to certain extension rights).

The Group's other risks are presented in the Annual Report.

Contingent liabilities relating to litigation

Various legal actions, claims and other proceedings are pending against the Group in various countries. These actions, claims and other proceedings are typical for this industry and consistent with a global business offering that encompasses a wide range of products and services. These matters involve contractual disputes, warranty claims, product liability (including design defects, manufacturing defects, failure to warn and asbestos legacy), employment, vehicles and other matters involving claims of general liability.

While the final outcome of these matters cannot be predicted with certainty, Konecranes is of the opinion, based on the information available to date and considering the grounds presented for such claims, the available insurance coverage and the reserves made, that the outcome of such actions, claims and other proceedings, if unfavorable, would not have a material, adverse impact on the financial condition of the Group.

Contingent assets

Company has contingent asset of EUR 10.0 million from the crime insurance against the unwarranted payments due to the identity theft and fraudulent actions.

Notes

IMPAIRMENTS

Restructuring actions during the first, second and third quarter of 2015 have led to an impairment of intangible assets (mainly customer relations as well as software) and tangible assets (machinery and equipment), which were written off by EUR 5.8 million.

FINANCIAL INSTRUMENTS

IFRS 7 requires that the classification of financial instruments at fair value be determined by reference to the source of inputs used to derive the fair value. This classification uses the following three-level hierarchy:

- Level 1 - quoted prices in active markets for identical financial instruments
- Level 2 - inputs other than quoted prices included within level 1 that are observable for the financial instrument, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3 - inputs for the financial instrument that are not based on observable market data (unobservable inputs)

Classification of financial instruments within the IFRS 7 fair value hierarchy: level 2 for all values as of 30 September 2015. There were no changes for classification within the fair value hierarchy.

Derivatives are initially recorded in the balance sheet at fair value and subsequently measured at fair value at each balance sheet date. All derivatives are carried as assets when fair value is positive and liabilities when fair value is negative. Derivative instruments that are not designated as hedges (hedge accounting) are measured at fair value, and the change in fair value is recognized in the consolidated statement of income. When the derivative is designated as a hedge (hedge accounting) the effective part of the change in fair value is recognized in other comprehensive income. Any ineffective part is recognized in the consolidated statement of income. The foreign exchange forward contracts are measured based on the closing date's observable spot exchange rates and the quoted yield curves of the respective currencies. Interest rate swaps are measured based on present value of the cash flows, which are discounted based on the quoted yield curves.
