Bank of Marin Bancorp
Form 10-Q
May 08, 2014

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2014

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 001-33572

Bank of Marin Bancorp
(Exact name of Registrant as specified in its charter)

California
(State or other jurisdiction of incorporation)

20-8859754
(IRS Employer Identification No.)

504 Redwood Blvd., Suite 100, Novato, CA
(Address of principal executive office)

94947
(Zip Code)

Registrant's telephone number, including area code: (415) 763-4520

Indicate by check mark whether the registrant (1) has filed all reports to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b(2) of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark if the registrant is a shell company, as defined in Rule 12b(2) of the Exchange Act.

Yes No

As of April 30, 2014, there were 5,912,941 shares of common stock outstanding.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Introductory Explanation

References in this report to “Bancorp” mean the Bank of Marin Bancorp as the parent holding company for Bank of Marin, the wholly-owned subsidiary (the “Bank”). References to “we,” “our,” “us” mean Bancorp and the Bank that are consolidated for financial reporting purposes.

Note 1: Basis of Presentation

The consolidated financial statements include the accounts of Bancorp and its only wholly-owned bank subsidiary, the Bank. All material intercompany transactions have been eliminated. In the opinion of Management, the unaudited interim consolidated financial statements contain all adjustments necessary to present fairly our financial position, results of operations, changes in stockholders' equity and cash flows. All adjustments are of a normal, recurring nature. Management has evaluated subsequent events through the date of filing, and has determined that there are no subsequent events that require recognition or disclosure.

On November 29, 2013, we completed the merger of NorCal Community Bancorp (“NorCal”), parent company of Bank of Alameda, to enhance our market presence (the “Acquisition”). On the date of acquisition, Bancorp assumed ownership of NorCal Community Bancorp Trusts I and II, respectively (the “Trusts”), which were formed for the sole purpose of issuing trust preferred securities. Bancorp is not considered the primary beneficiary of the Trusts (variable interest entities), therefore the Trusts are not consolidated in our consolidated financial statements, but rather the subordinated debentures are shown as a liability on our consolidated statements of condition. Bancorp's investment in the common stock of the Trusts is accounted for under the equity method and is included in interest receivable and other assets on the consolidated statements of condition.

Certain information and footnote disclosures presented in the annual consolidated financial statements are not included in the interim consolidated financial statements. Accordingly, the accompanying unaudited interim consolidated financial statements should be read in conjunction with our 2013 Annual Report on Form 10-K. The results of operations for the three months ended March 31, 2014 are not necessarily indicative of the operating results for the full year.

The following table shows: 1) weighted average basic shares, 2) potentially diluted common shares related to stock options, unvested restricted stock and stock warrant, and 3) weighted average diluted shares. Basic earnings per share (“EPS”) are calculated by dividing net income by the weighted average number of common shares outstanding during each period, excluding unvested restricted stock. Diluted EPS are calculated using the weighted average diluted shares. The number of potentially diluted common shares included in quarterly diluted EPS is computed using the average market prices during the three months included in the reporting period under the treasury stock method. The number of potentially diluted common shares included in year-to-date diluted EPS is a year-to-date weighted average of potentially diluted common shares included in each quarterly diluted EPS computation. We have two forms of outstanding common stock: common stock and unvested restricted stock awards. Holders of restricted stock awards receive non-forfeitable dividends at the same rate as common shareholders and they both share equally in undistributed earnings.

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

(dollars in thousands; except per share data; unaudited)	Three months ended	
	March 31, 2014	March 31, 2013

Diluted EPS	\$0.76	\$0.89
Weighted average anti-dilutive shares not included in the calculation of diluted EPS	44	45

Page-8

Note 2: Recently Issued Accounting Standards

In February 2013, the FASB issued ASU No. 2013-04, Liabilities (Topic 405) Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation is Fixed at the Reporting Date. The ASU requires an entity to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date. Entities are required to record the amount the entity agreed to pay on the basis of its arrangement among its co-obligors and any additional amount the reporting entity expects to pay on behalf of its co-obligors at the reporting date. Examples of obligations within the scope of this guidance include debt arrangements, other contractual obligations, settled litigation and judicial rulings. ASU 2013-04 is effective retrospectively to all periods presented for fiscal years and interim periods beginning after December 15, 2013 for public entities. We have adopted this ASU in 2014 and the adoption did not have an impact on our financial condition or results of operations.

In July 2013, the FASB issued ASU No. 2013-10, Derivatives and Hedging (Topic 815) Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedging Accounting Purposes. The ASU provides for the inclusion of the Fed Funds Effective Swap Rate or also referred to as the Overnight Index Swap Rate ("OIS") as a U.S. benchmark interest rate for hedge accounting purposes, in addition to direct Treasury obligations of the U.S. government ("UST") and London Interbank Offered Rate ("LIBOR"). The ASU is a result of the financial crisis in 2008, as the exposure to and the demand for hedging the Fed Funds rate have increased significantly. ASU 2013-10 is effective prospectively for qualifying new or re-designated hedging relationships entered into on or after July 17, 2013. We do not expect this ASU to have a significant impact on our financial condition or results of operations.

In July 2013, the FASB issued ASU No. 2013-11, Income Taxes (Topic 740) Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. The ASU requires an entity to present an unrecognized tax benefit as a reduction of a deferred tax asset for an net operating loss ("NOL") carryforward, or similar tax loss or tax credit carryforward, rather than as a liability, when (1) the uncertain tax position would reduce the NOL or other carryforward under the tax law of the applicable jurisdiction and (2) the entity intends to and is able to use the deferred tax asset for that purpose. Otherwise, the unrecognized tax benefit should be presented as a liability and should not be combined with deferred tax assets. ASU 2013-11 is effective prospectively for fiscal years, and interim periods beginning after December 15, 2013 for public entities. We have adopted this ASU in the first quarter of 2014 and the adoption did not have an impact on our financial condition or results of operations.

In January 2014, the FASB issued ASU No. 2014-01, Investments-Equity and Joint Ventures (Topic 323) Accounting for Investments in Qualified Affordable Projects. This ASU permits entities to make an accounting policy election to account for their investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, the initial cost of the investment is amortized in proportion to the tax credits and other tax benefits received and the net investment performance is recognized in the income statement as part of income tax expense (benefit). We have adopted this ASU in the first quarter of 2014 and elected to account for all low income housing investments using the proportional amortization method instead of cost method. The change in accounting policy did not have a significant impact on our financial condition or results of operations.

In January 2014, the FASB issued ASU No. 2014-04, Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40) Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure. Current accounting literature on troubled debt restructurings include guidance on when a creditor obtains one or more collateral assets in satisfaction of all or part of the receivable. The accounting literature indicates that a

creditor should reclassify a collateralized mortgage loan such that the loan should be de-recognized and the collateral asset recognized when it is determined that there has been in substance a repossession or foreclosure by the creditor. However, in substance repossession or foreclosure and physical possession are not currently defined and there is diversity about when a creditor should de-recognize the loan receivable and recognize the real estate property. This ASU clarifies when an in substance repossession or foreclosure occurs. ASU 2014-04 is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014 for public entities. We do not expect this ASU to have a significant impact on our financial condition or results of operations.

Note 3: Acquisition

On November 29, 2013, we completed the merger of NorCal, parent company of Bank of Alameda, to enhance our market presence. The merger added \$173.8 million in loans, \$241.0 million in deposits and \$53.7 million in investment securities to Bank of Marin as well as four branch offices serving Alameda, Emeryville, and Oakland. The assets acquired and liabilities assumed, both tangible and intangible, were recorded at their fair values as of the acquisition date in accordance with ASC 805, Business Combinations. We have up to a year from the acquisition date to obtain additional information that existed at the acquisition date and affected the identification and measurement of assets acquired and liabilities assumed. There have been no changes in the fair value of assets acquired or liabilities assumed since the acquisition date. The acquisition was treated as a "reorganization" within the definition of section 368(a) of the Internal Revenue Code and is generally considered tax-free for U.S. federal income tax purposes.

The following table reflects the estimated fair values of the assets acquired and liabilities assumed related to the NorCal acquisition:

(dollars in thousands)	Acquisition Date (November 29, 2013)
Assets:	
Cash and cash equivalents	\$ 31,804
Investment securities	53,731
Loans	173,759
Core deposit intangible	4,572
Deferred tax asset	4,114
Goodwill	6,436
Bank premises and equipment	203
Other assets	6,298
Total assets acquired	\$ 280,917
Liabilities:	
Deposits:	
Non-interest-bearing	\$ 69,123
Interest-bearing	
Transaction accounts	57,337
Savings accounts	10,835
Money market accounts	81,464
Other time accounts	22,267
Total deposits	241,026
Subordinated debentures	4,950
Other liabilities	408
Total liabilities assumed	\$ 246,384
Merger consideration (cash payment of \$16.0 million and \$18.5 million in stock)	\$ 34,533

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

The following table presents the net assets acquired from NorCal and the estimated fair value adjustments:

(dollars in thousands)	Acquisition Date (November 29, 2013)
Book value of net assets acquired from NorCal	\$25,551
Fair value adjustments:	
Loans	(3,462)
Subordinated debentures	3,298
Core deposit intangible asset	\$4,572
Time deposits	(14)
Total purchase accounting adjustments	4,394
Deferred tax liabilities (tax effect of purchase accounting adjustments at 42.05%)	(1,848)
Fair value of net assets acquired from NorCal	\$28,097
Merger consideration	\$34,533
Less: fair value of net assets acquired	(28,097)
Goodwill	\$6,436

As a result of the NorCal acquisition, we recorded \$6.4 million in goodwill, which represents the excess of the total purchase price paid over the fair value of the assets acquired, net of the fair values of liabilities assumed. Goodwill mainly reflects expected value created through the combined operations of NorCal and Bank of Marin and our expanded footprint in the East Bay. It is evaluated for impairment annually. We determined that the fair value of our traditional community banking activities (provided through our branch network) exceeded its carrying amount and no impairment on goodwill has been recorded. The goodwill is not expected to be deductible for tax purposes. The following is a description of the methods used to determine the fair values of significant assets and liabilities at acquisition date presented above.

The core deposit intangible represents estimated future benefits of acquired deposits and is booked separately from the related deposits in other assets. We recorded a core deposit intangible asset of \$4.6 million on November 29, 2013, of which \$69 thousand was amortized in 2013 and \$193 thousand was amortized in the first quarter of 2014. It is amortized on an accelerated basis over an estimated ten-year life. The core deposit intangible asset is evaluated periodically for impairment, and no impairment loss was recognized as of March 31, 2014.

Acquisition-related expenses were recognized as incurred and continued until all systems were converted and operational functions became fully integrated in March 2014. We incurred one-time third-party acquisition-related expenses in the consolidated statements of comprehensive income for the three months ended March 31, 2014 for the NorCal acquisition as follows:

(dollars in thousands; unaudited)	Three Months Ended March 31, 2014
Data processing	\$442
Personnel severance	304
Total	\$746

Note 4: Fair Value of Assets and Liabilities

Fair Value Hierarchy and Fair Value Measurement

We group our assets and liabilities that are measured at fair value in three levels within the fair value hierarchy, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1: Valuations are based on quoted prices in active markets for identical assets or liabilities. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not involve a significant degree of judgment.

Level 2: Valuations are based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuations for which all significant assumptions are observable or can be corroborated by observable market data.

Level 3: Valuations are based on unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Values are determined using pricing models and discounted cash flow models and include management judgment and estimation which may be significant.

Transfers between levels of the fair value hierarchy are recognized on the actual date of the event or circumstances that caused the transfer, which generally coincides with our monthly and/or quarterly valuation process.

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

The following table summarizes our assets and liabilities that were required to be recorded at fair value on a recurring basis.

(dollars in thousands) Description of Financial Instruments	Carrying Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
At March 31, 2014 (unaudited):

Derivative financial liabilities (interest rate contracts)	\$ 2,519	\$—	\$ 2,519	\$—

Securities available-for-sale are recorded at fair value on a recurring basis. When available, quoted market prices (Level 1) are used to determine the fair value of securities available-for-sale. If quoted market prices are not available, we obtain pricing information from a reputable third-party service provider, who may utilize valuation techniques that use current market-based or independently sourced parameters, such as bid/ask prices, dealer-quoted prices, interest rates, benchmark yield curves, prepayment speeds, probability of default, loss severity and credit spreads (Level 2). Level 2 securities include U.S. agencies or government sponsored agencies' debt securities, mortgage-backed securities, government agency-issued and privately-issued collateralized mortgage obligations. As of March 31, 2014 and December 31, 2013, there are no securities that are considered Level 1 or Level 3 securities.

On a recurring basis, derivative financial instruments are recorded at fair value, which is based on the income approach using observable Level 2 market inputs, reflecting market expectations of future interest rates as of the measurement date. Standard valuation techniques are used to calculate the present value of the future expected cash flows assuming an orderly transaction. Valuation adjustments may be made to reflect both our own credit risk and the

counterparties' credit quality in determining the fair value of the derivatives. Level 2 inputs for the valuations are limited to observable market prices for LIBOR cash rates (for the very short term), quoted prices for LIBOR futures contracts, observable market prices for LIBOR swap rates, and one-month and three-month LIBOR basis spreads at commonly quoted intervals. Mid-market pricing of the inputs is used as a practical expedient in the fair value measurements. Key inputs for interest rate valuations are used to project spot rates at resets specified by each swap, as well as to discount those

future cash flows to present value at the measurement date. When the value of any collateral placed with counterparties is less than the interest rate derivative liability, the interest rate liability position is further discounted to reflect our potential credit risk to counterparties. We have used the spread between the Standard & Poors BBB rated U.S. Bank Composite rate and LIBOR with the maturity term corresponding to the duration of the swaps to calculate this credit-risk-related discount of future cash flows.

Certain financial assets may be measured at fair value on a non-recurring basis. These assets are subject to fair value adjustments that result from the application of the lower of cost or fair value accounting or write-downs of individual assets, such as impaired loans and other real estate owned ("OREO").

When a loan is identified as impaired, it is reported at the lower of cost or fair value, measured based on the loan's observable market price (Level 1) or the current net realizable value of the underlying collateral securing the loan, if the loan is collateral dependent (Level 3). Net realizable value of the underlying collateral is the fair value of the collateral less estimated selling costs and any prior liens. Appraisals, recent comparable sales, offers and listing prices are factored in when valuing the collateral. We review and verify the qualifications and licenses of the certified general appraisers used for appraising commercial properties or certified residential appraisers for residential properties. Real estate appraisals may utilize a combination of approaches including replacement cost, sales comparison and the income approach. Comparable sales and income data are analyzed by the appraisers and adjusted to reflect differences between them and the subject property such as type, leasing status and physical condition. When the appraisals are received, Management reviews the assumptions and methodology utilized in the appraisal, as well as the overall resulting value in conjunction with independent data sources such as recent market data and industry-wide statistics. We generally use a 6% discount for selling costs which is applied to all properties, regardless of size. Appraised values may be adjusted to reflect changes in market conditions that have occurred subsequent to the appraisal date, or for revised estimates regarding the timing or cost of the property sale. These adjustments are based on qualitative judgments made by management on a case-by-case basis. There have been no significant changes in the valuation techniques during the quarter ended March 31, 2014.

OREO represents collateral acquired through foreclosure and is initially recorded at fair value as established by a current appraisal, adjusted for disposition costs. Subsequently, OREO is measured at lower of cost or fair value. OREO values are reviewed on an ongoing basis and any subsequent decline in fair value is recorded as a foreclosed asset expense in the current period. The value of OREO is determined based on independent appraisals, similar to the process used for impaired loans, discussed above, and is generally classified as Level 3. At March 31, 2014 and December 31, 2013, we had \$461 thousand of OREO acquired from Bank of Alameda as part of the Acquisition. There was no change in the estimated fair value of the OREO from the date of the Acquisition through March 31, 2014.

Securities held-to-maturity may be written down to fair value (determined using the same techniques discussed above for securities available-for-sale) as a result of an other-than-temporary impairment, if any.

The following table presents the carrying value of financial instruments that were measured at fair value on a nonrecurring basis and that were still held in the statements of condition at each respective period end, by level within the fair value hierarchy as of March 31, 2014 and December 31, 2013.

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

(dollars in thousands) Description of Financial Instruments	Carrying Value ¹	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3) ¹
At March 31, 2014 (unaudited):				
Impaired loans carried at fair value:				
Construction	2,653	—	—	2,653
Installment and other consumer	32	—	—	32
Total	\$2,685	\$—	\$—	\$2,685

At December 31, 2013:				
Impaired loans carried at fair value:				
Construction	3,037	—	—	3,037
Installment and other consumer	35	—	—	35
Total	\$3,072	\$—	\$—	\$3,072

¹ Represents collateral-dependent loan principal balances that had been generally written down to the values of the underlying collateral, net of specific valuation allowances of \$341 thousand and \$363 thousand at March 31, 2014 and December 31, 2013, respectively. The carrying value of loans fully charged-off, which includes unsecured lines of credit, overdrafts and all other loans, is zero.

Disclosures about Fair Value of Financial Instruments

The table below is a summary of fair value estimates for financial instruments as of March 31, 2014 and December 31, 2013, excluding financial instruments recorded at fair value on a recurring basis (summarized in the first table in this note). The carrying amounts in the following table are recorded in the consolidated statements of condition under the indicated captions. We have excluded non-financial assets and non-financial liabilities defined by the Codification (ASC 820-10-15-1A), such as Bank premises and equipment, deferred taxes and other liabilities. In addition, we have not disclosed the fair value of financial instruments specifically excluded from disclosure requirements of the Financial Instruments Topic of the Codification (ASC 825-10-50-8), such as Bank-owned life insurance policies.

Following is a description of methods and assumptions used to estimate the fair value of each class of financial instrument not recorded at fair value but required for disclosure purposes:

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

Cash and Cash Equivalents - The carrying amounts of cash and cash equivalents approximate their fair value because of the short-term nature of these instruments.

Held-to-maturity Securities - Held-to-maturity securities, which generally consist of mortgage-backed securities, obligations of state and political subdivisions and corporate bonds, are recorded at their amortized cost. Their fair value for disclosure purposes is determined using methodologies similar to those described above for available-for-

Page-15

sale securities using Level 2 inputs. If Level 2 inputs are not available, we may utilize pricing models that incorporate unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities (Level 3). As of March 31, 2014 and December 31, 2013, we did not hold any securities whose fair value was measured using significant unobservable inputs.

Loans - The fair value of loans with variable interest rates approximates current carrying value, because loan rates are regularly adjusted to current market rates. The fair value of fixed rate loans or variable loans at negotiated interest rate floors or ceilings with remaining maturities in excess of one year is estimated by discounting the future cash flows using current market rates at which similar loans would be made to borrowers with similar credit worthiness and similar remaining maturities. The allowance for loan losses ("ALLL") is considered to be a reasonable estimate of the portion of loan discount attributable to credit risks.

Interest Receivable and Payable - The interest receivable and payable balances approximate their fair value due to the short-term nature of their settlement dates.

Deposits - The fair value of non-interest-bearing deposits, interest-bearing transaction accounts, savings accounts and money market accounts is the amount payable on demand at the reporting date. The fair value of time deposits is estimated by discounting the future cash flows using current rates offered for deposits of similar remaining maturities.

Federal Home Loan Bank Borrowing - The fair value is estimated by discounting the future cash flows using current rates offered by the Federal Home Loan Bank of San Francisco ("FHLB") for similar credit advances corresponding to the remaining duration of our fixed-rate credit advances.

Subordinated Debentures - As part of the Acquisition, we assumed two subordinated debentures from NorCal. See Note 7 for further information. The fair values of the subordinated debentures were estimated by discounting the future cash flows (interest payment at a rate of three-month LIBOR plus 3.05% and 1.40%, respectively) to their present values using current market rates at which similar bonds would be issued with similar credit ratings as ours and similar remaining maturities. Each payment was discounted at a spot rate of the corresponding term, determined based on the yields and terms of comparable trust preferred securities, plus an illiquidity premium of 3.00%. In July 2010, the Dodd-Frank Act was signed into law and limits the ability of certain bank holding companies to treat trust preferred security debt issuances as Tier 1 capital. This law effectively closed the trust-preferred securities markets for new issuance and led to the absence of observable or comparable transactions in the market place. Due to the use of unobservable inputs in the valuation of trust preferred securities, we consider the fair value to be a Level 3 measurement.

Commitments - Loan commitments and standby letters of credit generate ongoing fees, which are recognized over the term of the commitment period. In situations where the borrower's credit quality has declined, we record a reserve for these off-balance sheet commitments. Given the uncertainty in the likelihood and timing of a commitment being drawn upon, the carrying value of the related unamortized commitment fees and the reserve for these off-balance sheet commitments are determined to approximate fair value, which is not material.

Note 5: Investment Securities

Our investment securities portfolio consists of obligations of state and political subdivisions, corporate bonds, U.S. government agency securities, including mortgage-backed securities (“MBS”) and collateralized mortgage obligations (“CMOs”) issued or guaranteed by Federal National Mortgage Association (“FNMA”), Federal Home Loan Mortgage Corporation (“FHLMC”), or Government National Mortgage Association (“GNMA”), debentures issued by government-sponsored agencies such as FNMA and FHLMC, as well as privately issued CMOs, as reflected in the table below:

(dollars in thousands; 2014 unaudited)	March 31, 2014				December 31, 2013			
	Amortized Cost	Fair Value	Gross Gains	Unrealized (Losses)	Amortized Cost	Fair Value	Gross Gains	Unrealized (Losses)

As part of our ongoing review of our investment securities portfolio, we reassessed the classification of certain MBS pass-through securities issued by FHLMC and FNMA that are qualified for Community Reinvestment Act (“CRA”) credit. Effective January 31, 2014, we transferred \$14.2 million of these CRA qualified MBS, which we intend and have the ability to hold to maturity, from available-for-sale securities to held-to-maturity at fair value. The unrealized pre-tax holding gain of \$84 thousand at the date of transfer remained in accumulated other comprehensive income and is amortized over the remaining lives of the securities as an adjustment to yield.

The amortized cost and fair value of investment debt securities by contractual maturity at March 31, 2014 are shown below. Expected maturities will differ from contractual maturities because the issuers of the securities may have the

right to call or prepay obligations with or without call or prepayment penalties.

Page-17

(dollars in thousands; 2014 unaudited)	March 31, 2014				December 31, 2013

After ten years	15,492	15,369	158,901	159,258	1,265	1,193	171,175	170,661
Total	\$132,019	\$133,765	\$230,067	\$230,337	\$122,495	\$123,858	\$245,158	\$243,998

We sold one available-for-sale and three held-to-maturity securities in the first quarter of 2014 with total proceeds of \$2.0 million and \$725 thousand, respectively, and incurred a loss of \$15 thousand and a gain of \$7 thousand, respectively. The sale of the held-to-maturity securities issued by the same municipality was due to evidence of significant deterioration of creditworthiness of the issuer since purchase. Two available-for-sale securities were sold in January 2013 with proceeds of \$1.1 million and a small net gain of \$339.

Investment securities carried at \$61.4 million and \$61.8 million at March 31, 2014 and December 31, 2013, respectively, were pledged with the State of California: \$60.7 million and \$61.1 million to secure public deposits in compliance with the Local Agency Security Program at March 31, 2014 and December 31, 2013, respectively, and \$735 thousand and \$732 thousand to provide collateral for trust deposits at March 31, 2014 and December 31, 2013, respectively. In addition, investment securities carried at \$1.1 million were pledged to collateralize an internal Wealth Management and Trust Services (“WMTS”) checking account at both March 31, 2014 and December 31, 2013.

Other-Than-Temporarily Impaired Debt Securities

We have evaluated the credit ratings of our investment securities and their issuer and/or insurers. Based on our evaluation, Management has determined that no investment security in our investment portfolio is other-than-temporarily impaired. We do not have the intent, and it is more likely than not that we will not have to sell the remaining securities temporarily impaired at March 31, 2014 before recovery of the cost basis.

Fifty-one and ninety-five investment securities were in unrealized loss positions at March 31, 2014 and December 31, 2013, respectively. The table below shows investment securities that were in unrealized loss positions at March 31, 2014 and December 31, 2013, respectively. They are summarized and classified according to the duration of the loss period as follows:

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

Total available-for-sale	164,815	(2,643)	3,331	(350)	168,146	(2,993)
Total temporarily impaired securities	\$ 181,765	\$(3,073)	\$ 17,327	\$(696)	\$ 199,092	\$(3,769)

As of March 31, 2014, there were ten investment positions totaling \$14.4 million in fair value that had been in a continuous loss position for more than 12 months. These securities had an unrealized loss of \$502 thousand and consisted of obligations of U.S. state and political subdivisions, MBS, a privately issued CMO and corporate bonds. We have evaluated each of the bonds and believe that the decline in fair value is primarily driven by factors other than credit. It is probable that we will be able to collect all amounts due according to the contractual terms and no other-than-temporary impairment exists. MBS are supported by the U.S. Federal government to protect us from credit losses. Additionally, the obligations of state and political subdivisions and corporate bond were deemed creditworthy based on our review of the issuers' recent financial information and their insurers, if any. The CMO is collateralized by residential mortgages with low loan-to-value and delinquency ratios, may be prepaid at par prior to maturity and is rated AA+ by Standard & Poors. Based upon our assessment of expected credit losses given the performance of the underlying collateral and the credit enhancements, we concluded that the security was not other-than-temporarily impaired at March 31, 2014.

Forty-one investment securities in our portfolio were in a temporary loss position for less than twelve months as of March 31, 2014. They consisted of obligations of U.S. state and political subdivisions, a corporate bond, MBS, CMOs, debentures issued by government agencies and privately issued CMOs. We determine that the strengths of GNMA and FNMA through guarantee or support from the U.S. Federal Government are sufficient to protect us from credit losses. The other temporarily impaired securities are deemed credit worthy after our internal analysis. Additionally, all are rated as investment grade by at least one major rating agency. As a result of this impairment analysis, we concluded that these securities were not other-than-temporarily impaired at March 31, 2014.

Securities Carried at Cost

As a member of the FHLB, we are required to maintain a minimum investment in the FHLB capital stock determined by the Board of Directors of the FHLB. The minimum investment requirements can also increase in the event we need to increase our borrowings with the FHLB. Shares cannot be purchased or sold except between the FHLB and its members at its \$100 per share par value. We held \$7.8 million of FHLB stock recorded at cost in other assets on the consolidated statements of condition at both March 31, 2014 and December 31, 2013. On March 20, 2014, the FHLB distributed a cash dividend for the fourth quarter of 2013 at an annualized dividend rate of 6.67%. Management does

not believe that the FHLB stock is other-than-temporarily-impaired, as we expect to be able to redeem this stock at cost.

As a member bank of Visa U.S.A., we hold 16,939 shares of Visa Inc. Class B common stock with a carrying value of zero, which is equal to our cost basis. These shares are restricted from resale until their conversion into Class A (voting) shares upon the termination of Visa Inc.'s covered litigation escrow account. As a result of the restriction, these shares are not considered available-for-sale and are not carried at fair value. Upon conversion of this Class B common stock at a conversion rate of 0.4206 to Class A common stock, the value would be \$1.5 million and \$1.6 million at March 31, 2014 and December 31, 2013, respectively. The conversion rate is subject to further reduction upon the final settlement of the covered litigation against Visa Inc. and its member banks. See Note 9 herein.

Note 6: Loans and Allowance for Loan Losses

Credit Quality of Loans

Outstanding loans by class and payment aging as of March 31, 2014 and December 31, 2013 are as follows:

Loan Aging Analysis by Class as of March 31, 2014 and December 31, 2013

loans

¹ Our residential loan portfolio includes no sub-prime loans, nor is it our normal practice to underwrite loans commonly referred to as "Alt-A mortgages", the characteristics of which are loans lacking full documentation, borrowers having low FICO scores or higher loan-to-value ratios.

² Amounts include \$1.5 million and \$1.4 million of Purchased Credit Impaired ("PCI") loans that have stopped accruing interest at March 31, 2014 and December 31, 2013, respectively, and exclude accruing PCI loans of \$5.8 million and \$5.7 million at March 31, 2014 and December 31, 2013, respectively, as their accretible yield interest recognition is independent from the underlying contractual loan delinquency status. There were no accruing loans past due more than ninety days at March 31, 2014 or December 31, 2013.

³ Amounts include net deferred loan costs of \$104 thousand and \$24 thousand at March 31, 2014 and December 31, 2013, respectively. Amounts are also net of unaccreted purchase discounts on non-PCI loans of \$6.3 million and \$7.6 million at March 31, 2014 and December 31, 2013, respectively.

Our commercial loans are generally made to established small and mid-sized businesses to provide financing for their working capital needs, acquisitions, or refinancings. Management examines historical, current, and projected cash flows to determine the ability of the borrower to repay obligations as agreed. Commercial loans are primarily made based on the identified cash flows of the borrower and secondarily on the underlying collateral. The cash flows of borrowers, however, may not occur as expected, and the collateral securing these loans may fluctuate in value. Most commercial and industrial loans are secured by the assets being financed, such as accounts receivable or inventory, and include a personal guarantee. Some short-term loans may be made on an unsecured basis. We target stable local businesses with guarantors that have proven to be more resilient in periods of economic stress. Typically, the guarantors provide an additional source of repayment for most of our credit extensions.

Commercial real estate loans are subject to underwriting standards and processes similar to commercial loans discussed above. We underwrite these loans to be repaid from cash flow and to be supported by real property collateral.

Repayment of commercial real estate loans is largely dependent on the successful operation of the property securing the loan, or of the business conducted on the property securing the loan. Underwriting standards for commercial real estate loans include, but are not limited to, conservative debt coverage and loan-to-value ratios. Furthermore, substantially all of our loans are guaranteed by the owners of the properties. Commercial real estate loans may be adversely affected by conditions in the real estate markets or in the general economy. When a vacancy has occurred, strong guarantors have historically carried the loans until a replacement tenant could be found. The owner's substantial equity investment provides a strong economic incentive to continue to support the commercial real estate projects. As such, we have generally experienced a relatively low level of loss and delinquencies in this portfolio.

Construction loans are generally made to developers and builders to finance land acquisition as well as the subsequent construction. These loans are underwritten after evaluation of the borrower's financial strength, reputation, prior track record, and after obtaining independent appraisals. The construction industry can be impacted by significant events, including: the inherent volatility of real estate markets and vulnerability to delays due to weather, change orders, ability to obtain construction permits, labor or material shortages, and price hikes. Estimates of construction costs and value associated with the completed project may be inaccurate. Repayment of construction loans is largely dependent on the ultimate success of the project.

Consumer loans primarily consist of home equity lines of credit, other residential (tenancy-in-common, or "TIC") loans, and other personal loans. We originate consumer loans utilizing credit score information, debt-to-income ratio and loan-to-value ratio analysis. Diversification, relatively small loan amounts that are spread across many individual borrowers, also mitigates risk. Additionally, trend reports are reviewed by Management on a regular basis. Underwriting standards for home equity lines of credit include, but are not limited to, a conservative loan-to-value ratio, the number of such loans a borrower can have at one time, and documentation requirements. Personal loans are nearly evenly split between mobile home loans and floating home loans along with a small number of installment loans.

We use a risk rating system to evaluate asset quality, and to identify and monitor credit risk in individual loans, and ultimately in the portfolio. Definitions of loans that are risk graded "Special Mention" or worse are consistent with those used by the Federal Deposit Insurance Corporation ("FDIC"). Our internally assigned grades are as follows:

Pass – Loans to borrowers of acceptable or better credit quality. Borrowers in this category demonstrate fundamentally sound financial condition, repayment capacity, credit history and management expertise. Loans in this category must have an identifiable and stable source of repayment and meet the Bank's policy regarding debt service coverage ratios. These borrowers are capable of sustaining normal economic, market or operational setbacks without significant financial impacts. Negative external industry factors are generally not present. The loan may be secured, unsecured or supported by non-real estate collateral for which the value is more difficult to determine and/or marketability is more uncertain. This category also includes "Watch" loans, where the primary source of repayment has been delayed. "Watch" is intended to be a transitional grade, with either an upgrade or downgrade within a reasonable period.

Special Mention - Potential weaknesses that deserve close attention. If left uncorrected, those potential weaknesses may result in deterioration of the payment prospects for the asset. Special Mention assets do not present sufficient risk to warrant adverse classification.

Substandard - Inadequately protected by either the current sound worth and paying capacity of the obligor or the collateral pledged, if any. A Substandard asset has a well-defined weakness or weaknesses that jeopardize(s) the liquidation of the debt. Substandard assets are characterized by the distinct possibility that we will sustain some loss if such weaknesses or deficiencies are not corrected. Well-defined weaknesses include adverse trends or developments of the borrower's financial condition, managerial weaknesses and/or significant collateral deficiencies.

Doubtful - Critical weaknesses that make collection or liquidation in full improbable. There may be specific pending events that work to strengthen the asset; however, the amount or timing of the loss may not be determinable. Pending events generally occur within one year of the asset being classified as Doubtful. Examples include: merger, acquisition, or liquidation; capital injection; guarantee; perfecting liens on additional collateral; and refinancing. Such loans are placed on non-accrual status and usually are collateral-dependent.

We regularly review our credits for accuracy of risk grades whenever new information is received. Borrowers are required to submit financial information at regular intervals:

Generally, commercial borrowers with lines of credit are required to submit financial information with reporting intervals ranging from monthly to annually depending on credit size, risk and complexity.

Page-22

Investor commercial real estate borrowers with loans greater than \$750 thousand are required to submit rent rolls or property income statements at least annually.

Construction loans are monitored monthly, and assessed on an ongoing basis.

Home equity and other consumer loans are assessed based on delinquency.

Loans graded "Watch" or more severe, regardless of loan type, are assessed no less than quarterly.

The following table represents our analysis of loans by internally assigned grades, including the PCI loans, at March 31, 2014 and December 31, 2013:

Troubled Debt Restructuring

Our loan portfolio includes certain loans that have been modified in a Troubled Debt Restructuring ("TDR"), where economic concessions have been granted to borrowers experiencing financial difficulties. These concessions typically result from our loss mitigation activities and could include reductions in the interest rate, payment extensions, forgiveness of principal, forbearance or other actions. TDRs on nonaccrual status at the time of restructure may be returned to accruing status after considering the borrower's sustained repayment performance for a reasonable period, generally six months, and there is reasonable assurance of repayment and performance.

When a loan is modified, Management evaluates any possible impairment based on the present value of expected future cash flows, discounted at the contractual interest rate of the original loan agreement, except when the sole (remaining) source of repayment for the loan is the operation or liquidation of the collateral. In these cases Management uses the current fair value of the collateral, less selling costs, instead of discounted cash flows. If Management determines that the value of the modified loan is less than the recorded investment in the loan (net of previous charge-offs and unamortized premium or discount), impairment is recognized through a specific allowance or a charge-off of the loan.

The table below summarizes outstanding TDR loans by loan class as of March 31, 2014 and December 31, 2013. The summary includes those TDRs that are on non-accrual status and those that continue to accrue interest.

(dollars in thousands; 2014 unaudited)	As of March 31, 2014	December 31, 2013
Recorded investment in Troubled Debt Restructurings ¹		
Commercial and industrial	\$6,188	\$5,117
Commercial real estate, owner-occupied	4,312	4,333
Commercial real estate, investor	531	534
Construction	6,303	6,335
Home equity	648	506
Other residential	2,044	2,063
Installment and other consumer	1,819	1,693
Total	\$21,845	\$20,581

¹ Includes \$14.5 million and \$12.9 million of TDR loans that were accruing interest as of March 31, 2014 and December 31, 2013, respectively.

Includes \$1.8 million of acquired loans at both March 31, 2014 and December 31, 2013, respectively.

The tables below present the following information for TDRs modified during the periods presented: number of contracts modified, the recorded investment in the loans prior to modification, and the recorded investment in the loans after the loans were restructured. The tables below exclude fully paid-off or fully charged-off TDR loans.

(dollars in thousands; unaudited)	Number of Contracts Modified	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment at period end
Troubled Debt Restructurings during the three months ended March 31, 2014:				
Commercial and industrial	3	\$ 1,420	\$ 1,405	\$1,405
Home equity	1	150	150	150
Installment and other consumer	3	170	168	169
Total	7	\$ 1,740	\$ 1,723	\$1,724

Troubled Debt Restructurings during the three months ended March 31, 2013:

Commercial and industrial	4	\$ 717	\$ 715	\$714
---------------------------	---	--------	--------	-------

Modifications during the three months ended March 31, 2014 primarily involved maturity extensions and interest rate concessions, while modifications during the three months ended March 31, 2013 primarily involved maturity extensions and payment extensions. During the first three months of both 2014 and 2013, there were no loans modified as troubled debt restructuring that subsequently defaulted, where the default occurred within the first twelve months after modification into a TDR. We are reporting these defaulted TDRs based on a payment default definition of more than ninety days past due.

Impaired Loan Balances and Their Related Allowance by Major Classes of Loans

The tables below summarize information on impaired loans and their related allowance. Total impaired loans include non-accrual loans, accruing TDR loans and accreting PCI loans that have experienced post-acquisition declines in cash flows expected to be collected.

(dollars in thousands; unaudited)	Commercial and industrial	Commercial real estate, owner-occupied	Commercial real estate, investor	Construction	Home equity	Other residential	Installment and other consumer	Total

Specific allowance	\$ 1,170	\$ 90	\$ —	\$ 341	\$ 1	\$ 23	\$ 364	\$ 1,989

The gross interest income that would have been recorded had non-accrual loans been current totaled \$205 thousand, and \$264 thousand in the quarters ended March 31, 2014, and March 31, 2013, respectively. PCI loans are excluded from the foregone interest data above as their accretable yield interest recognition is independent from the underlying contractual loan delinquency status. See “Purchased Credit-Impaired Loans” below for further discussion.

Management monitors delinquent loans continuously and identifies problem loans, generally loans graded substandard or worse, to be evaluated individually for impairment testing. Generally, we charge off our estimated losses related to specifically-identified impaired loans when it is deemed uncollectible. The charged-off portion of impaired loans outstanding at March 31, 2014 totaled approximately \$5.7 million. At March 31, 2014, there were \$538 thousand

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

outstanding commitments to extend credit on impaired loans, including loans to borrowers whose terms have been modified in troubled debt restructurings.

The following table discloses loans by major portfolio category and activity in the ALLL, as well as the related ALLL disaggregated by impairment evaluation method:

Allowance for loan losses to non-accrual loans	257	% 143	% 221	% 12	% 374	% 48	% 372	% NM	122

¹ Total excludes \$2.9 million PCI loans that have experienced credit deterioration post-acquisition, which are included in the "purchased credit-impaired" amount in the next line below.

NM - Not Meaningful

Purchased Credit-Impaired Loans

We evaluated loans purchased in acquisitions in accordance with accounting guidance in ASC 310-30 related to loans acquired with deteriorated credit quality. Acquired loans are considered credit-impaired if there is evidence of deterioration of credit quality since origination and it is probable, at the acquisition date, that we will be unable to collect all contractually required payments receivable. Management has determined certain loans purchased in the Acquisition to be PCI loans based on credit indicators such as nonaccrual status, past due status, loan risk grade, loan-to-value ratio, etc. Revolving credit agreements (e.g. home equity lines of credit and revolving commercial loans) are not considered PCI loans as cash flows cannot be reasonably estimated.

For acquired loans not considered credit-impaired, the difference between the contractual amounts due (principal amount) and the fair value is accounted for subsequently through accretion. We elect to recognize discount accretion based on these acquired loans' contractual cash flows using an effective interest rate method. The accretion is recognized through the net interest margin.

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

The following table reflects the outstanding balance and related carrying value of PCI loans as of March 31, 2014 and December 31, 2013:

PCI Loans (dollars in thousands; 2014 unaudited)	March 31, 2014		December 31, 2013	
	Unpaid principal balance	Carrying value	Unpaid principal balance	Carrying value
Commercial and industrial	\$1,071	\$339	\$1,094	\$333
Commercial real estate	9,115	6,745	9,152	6,698
Construction	145	12	149	15
Home equity	236	66	239	69
Total purchased credit-impaired loans	\$10,567	\$7,162	\$10,634	\$7,115

The activities in the accretable yield, or income expected to be earned, for PCI loans were as follows:

Accretable Yield (dollars in thousands, unaudited)	Three months ended	
	March 31, 2014	March 31, 2013
Balance at beginning of period	\$3,649	\$3,960
Removals ¹	—	(596)
Accretion	(180)	(236)
Reclassifications from nonaccretable difference ²	1,832	455
Balance at end of period	\$5,301	\$3,583

¹ Represents the accretable difference that is relieved when a loan exits the PCI population due to payoff, full charge-off, or transfer to repossessed assets, etc.

² Primarily relates to improvements in expected credit performance and changes in expected amounts and/or timing of cash flows.

Pledged Loans

Our FHLB line of credit is secured under terms of a blanket collateral agreement by a pledge of certain qualifying loans with an unpaid principal balance of \$844.9 million and \$716.2 million at March 31, 2014 and December 31, 2013, respectively. Our FHLB line of credit totaled \$494.9 million and \$416.3 million at March 31, 2014 and December 31, 2013, respectively. In addition, we pledge a certain residential loan portfolio, which totaled \$25.8 million and \$24.4 million at March 31, 2014 and December 31, 2013, respectively, to secure our borrowing capacity with the Federal Reserve Bank (“FRB”). Also see Note 7 below.

Note 7: Borrowings

Federal Funds Purchased – We had unsecured lines of credit totaling \$87.0 million with correspondent banks for overnight borrowings at both March 31, 2014 and December 31, 2013. In general, interest rates on these lines approximate the Federal funds target rate. At March 31, 2014 and December 31, 2013, we had no overnight borrowings outstanding under these credit facilities.

Federal Home Loan Bank Borrowings – As of March 31, 2014 and December 31, 2013, we had lines of credit with the FHLB totaling \$494.9 million and \$416.3 million, respectively, based on eligible collateral of certain loans. At March 31, 2014 and December 31, 2013, we had no FHLB overnight borrowings.

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

On February 5, 2008, we entered into a ten-year borrowing agreement under the same FHLB line of credit for \$15.0 million at a fixed rate of 2.07%, which remained outstanding at March 31, 2014. Interest-only payments are required every three months until the entire principal is due on February 5, 2018. The FHLB has the unconditional right to accelerate the due date on May 5, 2014 and every three months thereafter (the “put dates”). If the FHLB exercises its right to accelerate the due date, the FHLB will offer replacement funding at the current market rate, subject to certain conditions. We must comply with the put date, but are not required to accept replacement funding.

At March 31, 2014, \$479.7 million was remaining as available for borrowing from the FHLB, net of the term borrowing and a line of credit acquired from NorCal totaling \$241 thousand.

Page-28

Federal Reserve Line of Credit – We have a line of credit with the FRB secured by a certain residential loan portfolio. At March 31, 2014 and December 31, 2013, we had borrowing capacity under this line totaling \$25.8 million and \$24.4 million, respectively, and had no outstanding borrowings with the FRB.

As part of the Acquisition, we assumed two tranches of subordinated debentures due to the NorCal Community Bancorp grantor trusts at fair values totaling \$4.95 million at acquisition date and contractual values totaling \$8.2 million. The difference between the contractual balance and the fair value at acquisition date is accreted into interest expense over the lives of the debentures. Accretion on the subordinated debentures totaled \$54 thousand in the first three months of 2014. The Trusts have the option to defer payment of the distributions for a period of up to five years, as long as there is no default on the subordinated debentures. In the event of interest deferral, dividends to common stockholders are limited. The trust preferred securities were sold and issued in private transactions pursuant to an exemption from registration under the Securities Act of 1933, as amended. Bancorp has guaranteed, on a subordinated basis, distributions and other payments due on trust preferred securities totaling \$8.0 million issued by the grantor trusts which have identical maturity, repricing and payment terms as the subordinated debentures.

The following is a summary of the contractual terms of the subordinated debentures due to NorCal Community Bancorp grantor trusts as of March 31, 2014:

Subordinated debentures due to NorCal Community Bancorp Trust I on October 7, 2033 with interest payable quarterly, based on 3-month LIBOR plus 3.05%, repricing quarterly (3.29% as of March 31, 2014), redeemable, in whole or in part, on any interest payment date.	\$4,124
Subordinated debentures due to NorCal Community Bancorp Trust II on March 15, 2036 with interest payable quarterly, based on 3-month LIBOR plus 1.40%, repricing quarterly (1.63% as of March 31, 2014), redeemable, in whole or in part, on any interest payment date.	\$4,124
Total	\$8,248

Note 8: Stockholders' Equity

Preferred Stock

Under the United States Department of the Treasury Capital Purchase Program (the “TCPP”), which was intended to stabilize and inject liquidity into the financial industry, on December 5, 2008, Bancorp issued to the U.S. Treasury 28,000 shares of senior preferred stock with a zero par value and a \$1,000 per share liquidation preference, along with a warrant to purchase 154,242 shares of common stock at a per share exercise price of \$27.23, in exchange for aggregate consideration of \$28.0 million. The proceeds of \$28.0 million were allocated between the preferred stock and the warrant with \$27.0 million allocated to preferred stock and \$961 thousand allocated to the warrant, based on their relative fair value at the time of issuance. The warrant was immediately exercisable and expires 10 years after the issuance date.

Under the American Recovery and Reinvestment Act of 2009, which allowed participants in the TCPP to withdraw from the program, we repurchased all 28,000 shares of outstanding preferred stock from the U.S. Treasury at \$28 million plus accrued but unpaid dividends of \$179 thousand on March 31, 2009. At the time of repurchase, we also accelerated the remaining accretion of the preferred stock totaling \$945 thousand through retained earnings, reducing our net income available to common stockholders. The warrant was subsequently auctioned to two institutional investors in November 2011 and remains outstanding. It is adjusted for cash dividend increases to represent a right to purchase 156,314 shares of common stock at \$26.87 per share as of March 31, 2014 in accordance with Section 13(c)

of the Form of Warrant to Purchase Common Stock.

Page-29

Dividends

Presented below is a summary of cash dividends paid to common shareholders, recorded as a reduction of retained earnings.

(dollars in thousands except per share data, unaudited)	Three months ended	
	March 31, 2014	March 31, 2013
Cash dividends to common stockholders	\$ 1,120	\$ 971
Cash dividends per common share	\$0.19	\$0.18

Share-Based Payments

The fair value of stock options on the grant date is recorded as a stock-based compensation expense in the consolidated statements of comprehensive income over the requisite service period with a corresponding increase in common stock. Stock-based compensation also includes compensation expense related to the issuance of unvested restricted common shares pursuant to the 2007 Equity Plan. The grant-date fair value of the restricted common shares, which equals its intrinsic value on that date, is being recorded as compensation expense over the requisite service period with a corresponding increase in common stock as the shares vest. In addition, we record excess tax benefits on the exercise

of non-qualified stock options, the disqualifying disposition of incentive stock options and vesting of in-the-money restricted stock as an addition to common stock with a corresponding decrease in current taxes payable.

The holders of the unvested restricted common shares are entitled to dividends on the same per-share ratio as the holders of common stock. Dividends paid on the portion of share-based awards not expected to vest are also included in stock-based compensation expense. Tax benefits on dividends paid on the portion of share-based awards expected to vest are recorded as an increase to common stock with a corresponding decrease in current taxes payable.

Note 9: Commitments and Contingencies

Financial Instruments with Off-Balance Sheet Risk

We make commitments to extend credit in the normal course of business to meet the financing needs of our customers. These financial instruments include commitments to extend credit in the form of loans or through standby letters of credit. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being fully drawn upon, the total commitment amount does not necessarily represent future cash requirements.

We are exposed to credit loss equal to the contract amount of the commitment in the event of nonperformance by the borrower. We use the same credit policies in making commitments as we do for on-balance-sheet instruments and we evaluate each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by us, is based on Management's credit evaluation of the borrower. Collateral held varies, but may include accounts receivable, inventory, property, plant and equipment, and real property.

The contractual amount of loan commitments and standby letters of credit not reflected on the consolidated statements of condition was \$339.5 million at March 31, 2014 at rates ranging from 1.70% to 18.00%. This amount included \$178.9 million under commercial lines of credit (these commitments are contingent upon customers maintaining specific credit standards), \$107.1 million under revolving home equity lines, \$29.0 million under undisbursed construction loans, \$13.3 million under standby letters of credit, and a remaining \$11.2 million under personal and other lines of credit. We have set aside an allowance for losses in the amount of \$679 thousand for these commitments

as of March 31, 2014, which is recorded in interest payable and other liabilities on the consolidated statements of condition.

Operating Leases

We rent certain premises and equipment under long-term, non-cancelable operating leases expiring at various dates through the year 2028. Most of the leases contain certain renewal options and escalation clauses. At March 31, 2014, the approximate minimum future commitments payable under non-cancelable contracts for leased premises are as follows:

Page-30

(dollars in thousands; unaudited)	2014	2015	2016	2017	2018	Thereafter	Total
Operating leases	\$2,638	\$3,575	\$3,654	\$3,681	\$3,708	\$10,078	\$27,334

Litigation and Regulatory Matters

We may be party to legal actions which arise from time to time as part of the normal course of our business. We believe, after consultation with legal counsel, that we have meritorious defenses in these actions, and that litigation contingency liabilities, if any, will not have a material adverse effect on our financial position, results of operations, or cash flows.

We are responsible for our proportionate share of certain litigation indemnifications provided to Visa U.S.A. ("Visa") by its member banks in connection with lawsuits related to anti-trust charges and interchange fees. On December 13, 2013, the district court issued a memorandum and order approving Visa's definitive class settlement agreement in the interchange multidistrict litigation ("Settlement Agreement") with the class plaintiffs. On January 14, 2014, the court entered the final judgment order approving the settlement. A number of objectors to the settlement have appealed that order. Until the appeals are finally adjudicated, no assurance can be provided that Visa will be able to resolve the class plaintiffs' claims as contemplated by the Settlement Agreement. On January 27, 2014, Visa's portion of the takedown payments related to the opt-out merchants, which was calculated to be approximately \$1.1 billion, was deposited into the litigation escrow account, and is expected to reduce our conversion rate of Visa Class B common stock that we hold. The full impact to member banks is still uncertain. However, we are not aware of significant future cash settlement payments required by us on the litigation.

Note 10: Derivative Financial Instruments and Hedging Activities

We have entered into interest rate swap agreements, primarily as an asset/liability management strategy, in order to mitigate the changes in the fair value of specified long-term fixed-rate loans (or firm commitments to enter into long-term fixed-rate loans) caused by changes in interest rates. These hedges allow us to offer long-term fixed rate loans to customers without assuming the interest rate risk of a long-term asset. Converting our fixed-rate interest payments to floating-rate interest payments, generally benchmarked to the one-month U.S. dollar LIBOR index, protects us against changes in the fair value of our loans associated with fluctuating interest rates.

The fixed-rate payment features of the interest rate swap agreements are generally structured at inception to mirror substantially all of the provisions of the hedged loan agreements. These interest rate swaps, designated and qualified as fair value hedges, are carried on the consolidated statements of condition at their fair value in other assets (when the fair value is positive) or in other liabilities (when the fair value is negative). One of our interest rate swap agreements qualifies for shortcut hedge accounting treatment. The change in fair value of the swap using the shortcut accounting treatment is recorded in other non-interest income, while the change in fair value of swaps using non-shortcut accounting is recorded in interest income. The unrealized gain or loss in fair value of the hedged fixed-rate loan due to LIBOR interest rate movements is recorded as an adjustment to the hedged loan and offset in other non-interest income (for shortcut accounting treatment) or interest income (for non-shortcut accounting treatment).

From time to time, we make firm commitments to enter into long-term fixed-rate loans with borrowers backed by yield maintenance agreements and simultaneously enter into forward interest rate swap agreements with correspondent banks to mitigate the change in fair value of the yield maintenance agreement. Prior to loan funding, yield maintenance agreements with net settlement features that meet the definition of a derivative are considered as non-designated hedges and are carried on the consolidated statements of condition at their fair value in other assets (when the fair value is positive) or in other liabilities (when the fair value is negative). The offsetting changes in the fair value of the forward swap and the yield maintenance agreement are recorded in interest income. In August 2010

and June 2011, two previously undesignated forward swaps were designated to offset the change in fair value of a fixed-rate loan originated in each of those periods. Subsequent to the point of the swap designations, the related yield maintenance agreements are no longer considered derivatives. Their fair value at the designation date was recorded in other assets and is amortized using the effective yield method over the life of the respective designated loans.

The net effect of the change in fair value of interest rate swaps, the amortization of the yield maintenance agreement and the change in the fair value of the hedged loans result in an insignificant amount of hedge ineffectiveness recognized in interest income.

Our credit exposure, if any, on interest rate swaps is limited to the favorable value (net of any collateral pledged to us) and interest payments of all swaps by each counterparty. Conversely, when an interest rate swap is in a liability position exceeding a certain threshold, we may be required to post collateral to the counterparty in an amount determined by the agreements (generally when our derivative liability position is greater than \$100 thousand or \$1.3 million, depending upon the counterparty). Collateral levels are monitored and adjusted on a regular basis for changes in interest rate swap values.

As of March 31, 2014, we have eight interest rate swap agreements, which are scheduled to mature in September 2018, June 2020, August 2020, June 2031, October 2031, July 2032, August 2037 and October 2037. All of our derivatives are accounted for as fair value hedges. Our interest rate swaps are settled monthly with counterparties. Accrued interest on the swaps totaled \$43 thousand and \$70 thousand as of March 31, 2014 and December 31, 2013, respectively. Information on our derivatives follows:

(dollars in thousands; 2014 unaudited)	Asset derivatives		Liability derivatives	
	March 31, 2014	December 31, 2013	March 31, 2014	December 31, 2013
Fair value hedges:				
Interest rate contracts notional amount	\$ 10,506	\$ 17,956	\$ 22,413	\$ 21,577
Interest rate contracts fair value ¹	\$ 638	\$ 961	\$ 1,459	\$ 2,519

(dollars in thousands; unaudited)			March 31, 2014	March 31, 2013
Increase in value of designated interest rate swaps recognized in interest income			\$ 736	\$ 647
Payment on interest rate swaps recorded in interest income			(253)	(358)
Decrease in value of hedged loans recognized in interest income			(531)	(692)
Decrease in value of yield maintenance agreement recognized against interest income			(47)	(18)
Net loss on derivatives recognized against interest income ²			\$(95)	\$(421)

¹ See Note 4 for valuation methodology.

² Includes hedge ineffectiveness of \$(158) thousand and \$(63) thousand for the quarters ended March 31, 2014 and March 31, 2013, respectively. Changes in value of swaps were included in the assessment of hedge effectiveness.

Our derivative transactions with counterparties are under International Swaps and Derivative Association (“ISDA”) master agreements that include “right of set-off” provisions. “Right of set-off” provisions are legally enforceable rights to offset recognized amounts and there may be an intention to settle such amounts on a net basis. We do not offset such financial instruments for financial reporting purposes.

Information on financial instruments that are eligible for offset in the consolidated statements of condition follows:

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's discussion of the financial condition and results of operations should be read in conjunction with the related consolidated financial statements in this Form 10-Q and with the audited consolidated financial statements and accompanying notes included in our 2013 Annual Report on Form 10-K. Average balances, including balances used in calculating certain financial ratios, are generally comprised of average daily balances.

Forward-Looking Statements

This discussion of financial results includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, (the "1933 Act") and Section 21E of the Securities Exchange Act of 1934, as amended, (the "1934 Act"). Those sections of the 1933 Act and 1934 Act provide a "safe harbor" for forward-looking statements to encourage companies to provide prospective information about their financial performance so long as they provide meaningful, cautionary statements identifying important factors that could cause actual results to differ significantly from projected results.

Our forward-looking statements include descriptions of plans or objectives of Management for future operations, products or services, and forecasts of revenues, earnings or other measures of economic performance. Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. They often include the words "believe," "expect," "intend," "estimate" or words of similar meaning, or future or conditional verbs such as "will," "would," "should," "could" or "may."

Forward-looking statements are based on Management's current expectations regarding economic, legislative, and regulatory issues that may impact our earnings in future periods. A number of factors—many of which are beyond Management's control—could cause future results to vary materially from current Management expectations. Such factors include, but are not limited to, general economic conditions, the economic uncertainty in the United States and abroad, changes in interest rates, deposit flows, real estate values, expected future cash flows on acquired loans and securities, integration of acquisitions and competition; changes in accounting principles, policies or guidelines; changes in legislation or regulation; adverse weather conditions, including the drought in California; and other economic, competitive, governmental, regulatory and technological factors affecting our operations, pricing, products and services.

The events or factors that could cause results or performance to materially differ from those expressed in our prior forward-looking statements concerning the NorCal acquisition include:

- lower than expected consolidated revenues;
- losses of deposit and loan customers resulting from the acquisition;
- greater than expected loan losses;
- significant increases in competition;
- the inability to achieve expected cost savings from the acquisition, or the inability to achieve those savings as soon as expected; and
- unexpected costs, including litigation risk not discovered during the due diligence period.

These and other important factors are detailed in the Risk Factors section of our 2013 Form 10-K as filed with the SEC, copies of which are available from us at no charge. Forward-looking statements apply only as of the date they are made. We do not undertake to update forward-looking statements to reflect circumstances or events that occur after the date the forward-looking statements are made or to reflect the occurrence of unanticipated events.

RESULTS OF OPERATIONS

Highlights of the financial results are presented in the following table:

(dollars in thousands, except per share data; unaudited)	For the three months ended		
	March 31, 2014	March 31, 2013	
For the period:

Total risk based capital ratio - Bancorp	13.5	% 13.2	%
Tier 1 leverage ratio (to average assets) - Bancorp	9.9	% 10.8	%

Executive Summary

On November 29, 2013, we completed the purchase of NorCal Community Bancorp ("NorCal"), parent company of Bank of Alameda with four branch offices serving Alameda, Emeryville, and Oakland, adding \$173.8 million in loans, \$241.0 million in deposits, and \$53.7 million in investment securities to Bank of Marin. The acquisition expanded our geographic footprint into the East Bay and is an important part of our long-term growth strategy. Accordingly, our first quarter 2014 results reflect the impact of NorCal earnings for a full quarter. No significant one-time expenses related to the NorCal acquisition are expected going forward.

Earnings in the first quarter of 2014 totaled \$4.5 million, compared to \$2.3 million the fourth quarter of 2013 and \$4.9 million in the first quarter of 2013. Diluted earnings per share totaled \$0.76 in the first quarter of 2014, compared to \$0.41 in the prior quarter and \$0.89 in the same quarter last year. The first quarter 2014 results include several non-recurring non-interest expense items, including \$746 thousand in one-time expenses related to the acquisition of NorCal, the net impact of which was a \$0.05 reduction in diluted earnings per share. One-time acquisition-related expenses of \$3.4 million in the fourth quarter of 2013 negatively impacted diluted earnings per share by \$0.38.

Gross loans totaled \$1.3 billion at both March 31, 2014 and December 31, 2013, and totaled \$1.1 billion at March 31, 2013. The increase in loans from a year ago reflects both loans acquired from NorCal and organic growth. Credit quality continues to be very strong with non-accrual loans representing 0.79% of total loans at March 31, 2014, down from 0.92% at year-end and 1.43% a year ago.

Deposits totaled \$1.6 billion at both March 31, 2014 and December 31, 2013, compared to \$1.2 billion at March 31, 2013. Non-interest-bearing deposits totaled 44.5% of total deposits at March 31, 2014, compared to 40.8% at December 31, 2013 and 39.5% at March 31, 2013. The increase primarily reflects the conversion of certain NorCal interest-bearing accounts to non-interest-bearing Bank of Marin accounts.

The total risk-based capital ratio for Bancorp was 13.5% at March 31, 2014, compared to 13.2% at December 31, 2013 and 14.0% at March 31, 2013. The total tier 1 leverage ratio for Bancorp was 9.9% at March 31, 2014, compared to 10.8% at December 31, 2013 and 10.9% at March 31, 2013. The ratios fell compared to the same quarter a year ago due to \$10.7 million in goodwill and intangibles related to the NorCal acquisition, which are excluded from regulatory capital. The risk-based capital ratios continue to be well above regulatory requirements for a well-capitalized institution.

Net interest income totaled \$17.9 million in the first quarter of 2014 compared to \$15.6 million in the prior quarter and \$14.8 million in the same quarter a year ago. The increase from the prior quarter and the same quarter a year ago primarily relates to a full quarter of interest income on loans acquired from NorCal and a higher volume of investment securities. The tax-equivalent net interest margin was 4.25%, 4.05% and 4.48% for these respective periods. The accretion of the purchase discounts on loans acquired from NorCal and a shift towards higher yielding assets contributed to the increase in net-interest margin in the first quarter of 2014 compared to the prior quarter. The decrease in the first quarter of 2014 compared to the same quarter a year ago relates to the impact of the low interest rate environment on our loan portfolio rates, an increase in cash balances as a percentage of interest-earning assets and the absence of gains on pay-offs of purchase credit-impaired ("PCI") loans. This decrease is partially offset by the accretive effects of loans from the NorCal acquisition.

Non-interest income in the first quarter of 2014 totaled \$2.2 million, compared to \$2.1 million in both the prior quarter and the same quarter a year ago. The increase from the prior quarter and the same quarter a year ago primarily relates to an increase in other income, including higher dividend income from the Federal Home Loan Bank of San Francisco.

Non-interest expense totaled \$12.8 million in the first quarter of 2014, compared to \$13.9 million in the prior quarter and \$9.7 million in the same quarter a year ago. First quarter 2014 non-interest expense includes \$746 thousand in one-time acquisition-related expenses associated with data processing and personnel severance costs, compared to \$3.4 million one-time acquisition-related expenses in the fourth quarter of 2013. The increase in non-interest expense from the same quarter a year ago primarily reflects the one-time acquisition-related expenses in the first quarter of 2014 (discussed above), temporary conversion personnel, and higher staffing and occupancy costs. Ongoing expenses for data processing transaction volumes, staffing and facilities are projected to stabilize at somewhat higher than pre-acquisition levels due to the expansion into the East Bay and a team of lenders added in Napa with significant lending experience in the wine industry.

Critical Accounting Policies

Critical accounting policies are those that are both most important to the portrayal of our financial condition and results of operations and require Management's most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

Management has determined the following five accounting policies to be critical: Allowance for Loan Losses, Acquired Loans, Other-than-temporary Impairment of Investment Securities, Accounting for Income Taxes and Fair Value Measurements.

Allowance for Loan Losses

Allowance for Loan Losses is based upon estimates of loan losses and is maintained at a level considered adequate to provide for probable losses inherent in the loan portfolio. The allowance is increased by provisions for loan losses charged against earnings and reduced by charge-offs, net of recoveries.

In periodic evaluations of the adequacy of the allowance balance, Management considers current economic conditions, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, our past loan loss experience and other factors. The ALLL is based on estimates, and ultimate losses may vary from current estimates. Our Asset/Liability Management Committee ("ALCO") reviews the adequacy of the ALLL at least quarterly. The allowance is adjusted based on that review if, in the judgment of the ALCO and Management, changes are warranted.

The overall allowance consists of 1) specific allowances for individually identified impaired loans ("ASC 310-10") and 2) general allowances for pools of loans ("ASC 450-20"), which incorporate changing qualitative and environmental factors (e.g., portfolio growth and trends, credit concentrations, economic and regulatory factors, etc.).

The first component, specific allowances, result from the analysis of identified problem credits and the evaluation of sources of repayment including collateral, as applicable. Through Management's ongoing loan grading and credit monitoring process, individual loans are identified that have conditions indicating the borrower may be unable to pay all amounts due in accordance with the contractual terms. These loans are evaluated for impairment individually by Management. Management considers an originated loan to be impaired when it is probable we will be unable to collect all amounts due according to the contractual terms of the loan agreement. For allowance established on acquired loans, refer to Acquired Loans discussed below. When the fair value of the impaired loan is less than the recorded investment in the loan, the difference is recorded as impairment through the establishment of a specific allowance. For loans determined to be impaired, the extent of the impairment is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate at origination (for originated loans), based on the loan's observable market price, or based on the fair value of the collateral if the loan is collateral dependent or if foreclosure is imminent. Generally with problem credits that are collateral-dependent, we obtain appraisals of the collateral at least annually. We may obtain appraisals more frequently if we believe the collateral value is subject to market volatility, if a specific event has occurred to the collateral, or if we believe foreclosure is imminent.

The second component is an estimate of the probable inherent losses in each loan pool with similar characteristics. This analysis encompasses our entire loan portfolio and excludes acquired loans where the discount has not been fully accreted. For allowance established on acquired loans, see below under Acquired Loans. Under our allowance model, loans are evaluated on a pool basis by loan segment which is further delineated by Federal regulatory reporting codes ("call codes"). Each segment is assigned an expected loss factor which is primarily based on a twelve quarter look-back at our historical losses for that particular segment, as well as a number of other factors.

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

The model determines loan loss reserves based on objective and subjective factors. Objective factors include a rolling historical loss rate using the twelve quarter look-back, changes in the volume and nature of the loan portfolio, changes in credit quality metrics (past due loans, non-accrual loans, net charge-offs), and the existence of credit concentrations. Subjective factors include changes in the overall economic environment, legal and regulatory conditions, lending management and other relevant staff, uncertainties related to acquisitions, as well as the quality of our loan review process. The total amount allocated is determined by applying loss multipliers to outstanding loans by call code.

Page-37

Acquired Loans

From time to time, we acquire loans through business acquisitions. Acquired loans are recorded at their estimated fair values at acquisition date in accordance with ASC 805 Business Combinations, factoring in credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for loan losses is not carried over or recorded for acquired loans as of the acquisition date.

The process of estimating fair values of the acquired loans, including the estimate of losses that are expected to be incurred over the estimated remaining lives of the loans at acquisition date and the ongoing updates to Management's expectation of future cash flows, requires significant subjective judgments and assumptions, particularly considering the economic environment. The economic environment and the lack of market liquidity and transparency are factors that have influenced, and may continue to affect, these assumptions and estimates.

We estimated the fair value of acquired loans at the acquisition date based on a discounted cash flow methodology that considered factors including the type of loan and related collateral, risk classification, fixed or variable interest rate, term of loan, whether or not the loan was amortizing, and current discount rates. Loans, except for PCI loans, were grouped together according to similar characteristics and were treated in the aggregate when applying various valuation techniques. The estimate of expected cash flows incorporates our best estimate of current key assumptions, such as property values, default rates, loss severity and prepayment speeds. Discount rates were based on market rates for new originations of comparable loans, where available, and included adjustments for liquidity factors.

To the extent comparable market rates are not readily available, a discount rate was derived based on the assumptions of market participants' cost of funds, servicing costs and return requirements for comparable risk assets. In either case, the discount rate does not include a factor for credit losses, as that has been considered in estimating the cash flows. The initial estimate of cash flows to be collected was derived from assumptions such as default rates, loss severities and prepayment speeds.

For acquired loans not considered credit impaired ("non-PCI") loans, we recognize the entire fair value discount accretion based on the acquired loan's contractual cash flows using an effective interest rate method for term loans, and on a straight line basis to interest income for revolving lines, as the timing and amount of cash flows under revolving lines are not predictable. The level of accretion on non-PCI loans varies from period to period due to maturities and early pay-offs of these loans during the reporting periods. Subsequent to acquisition, if the probable and estimable losses for non-PCI loans exceed the amount of the remaining unaccreted discount, the excess is established as an allowance for loan losses.

We acquired some loans from business combinations with evidence of credit quality deterioration subsequent to their origination and for which it was probable, at acquisition, that we would be unable to collect all contractually required payments (PCI loans). These loans are evaluated on an individual basis. Management has applied significant subjective judgment in determining which loans are PCI loans. Evidence of credit quality deterioration as of the purchase date may include data such as past due and nonaccrual status, risk grades and charge-off history. Revolving credit agreements (e.g., home equity lines of credit and revolving commercial loans) where the borrower had revolving rights at acquisition date are not considered PCI loans because the timing and amount of cash flows cannot be reasonably estimated.

The accounting guidance for PCI loans provides that the difference between the contractually required payments and the cash flows expected to be collected at acquisition, considering the impact of prepayments, is referred to as the nonaccretable difference and is not recorded. Furthermore, the difference between the expected cash flows and the fair value at acquisition date ("accretable difference") is accreted into interest income at a level yield of return over the remaining term of the loan, provided that the timing and amount of future cash flows is reasonably estimable.

All PCI loans that were classified as non-accrual loans prior to the acquisition were no longer classified as non-accrual if we believed that we would fully collect the new carrying value of these loans at acquisition. When there is doubt as to the timing and amount of future cash flows to be collected, PCI loans are classified as non-accrual loans. It is important to note that judgment is required to classify PCI loans as accruing or non-accrual, and is dependent on having a reasonable expectation about the timing and amount of cash flows expected to be collected.

If we have probable decreases in cash flows expected to be collected on PCI loans, specific allowances are established for these PCI loans that have experienced credit deterioration subsequent to acquisitions. The amount of cash flows expected to be collected and, accordingly, the adequacy of the allowance for loan losses are particularly sensitive to

changes in loan credit quality. If we have probable and significant increases in cash flows expected to be collected on PCI loans, we first reverse any previously established specific allowance for loan loss and then increase interest income as a prospective yield adjustment over the remaining life of the loans. The impact of changes in variable interest rates is recognized prospectively as adjustments to interest income.

The estimate of cash flows expected to be collected is updated each quarter and requires the continued usage of key assumptions and estimates similar to the initial estimate of fair value. Given the current economic environment, we apply judgment to develop our estimate of cash flows for PCI loans given the impact of collateral value changes, loan workout plans, changing probability of default, loss severities and prepayments. Therefore, accretion on PCI loans fluctuates based on changes in cash flows expected to be collected.

For purposes of accounting for the PCI loans from past business combinations, we elected not to apply the pooling method but to account for these loans individually. Disposals of loans, which may include sales of loans to third parties, receipt of payments in full by the borrower, or foreclosure of the collateral, result in removal of the loan from the PCI loan portfolio at its carrying amount. If a PCI loan pays-off earlier than expected, a gain is recorded as interest income when the pay-off amount exceeds the recorded investment.

For further information regarding our acquired loans, see Note 6 to our Consolidated Financial Statements in this Form 10-Q.

Other-than-temporary Impairment of Investment Securities

At each financial statement date, we assess whether declines in the fair value of held-to-maturity and available-for-sale securities below their costs are deemed to be other-than-temporary. We consider, among other things, (i) the length of time and the extent to which the fair value has been less than cost, (ii) the financial condition and near-term prospects of the issuer, and (iii) our intent and ability to retain the investment for a period of time sufficient to allow for any anticipated recovery in fair value. Evidence evaluated includes, but is not limited to, the remaining payment terms of the instrument and economic factors that are relevant to the collectability of the instrument, such as: current prepayment speeds, the current financial condition of the issuer(s), industry analyst reports, credit ratings, credit default rates, interest rate trends, the quality of any credit enhancement and the value of any underlying collateral.

For each security in an unrealized loss position, we assess whether we intend to sell the security or if it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis less any current-period credit losses. If we intend to sell the security or it is more likely than not we will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss, the entire difference between the investment's amortized cost basis and its fair value at the balance sheet date is recognized against earnings.

For impaired securities that are not intended for sale and will not be required to be sold prior to recovery of our amortized cost basis, we determine if the impairment has a credit loss component. For both held-to-maturity and available-for-sale securities, if the amount of cash flows expected to be collected are less than those at the last reporting date, an other-than-temporary impairment shall be considered to have occurred and the credit loss component is recognized in earnings as the present value of the change in expected future cash flows. In determining the present value of the expected cash flows, we discount the expected cash flows at the effective interest rate implicit in the security at the date of purchase. The remaining difference between the fair value and the amortized basis is deemed to be due to factors that are not credit related and is recognized in other comprehensive income, net of applicable taxes.

For held-to-maturity securities, if there is no credit loss, no impairment is recognized. The other-than-temporary impairment recognized in other comprehensive income for credit impaired debt securities classified as held-to-maturity is accreted from other comprehensive income to the amortized cost of the debt security over the remaining life of the debt security in a prospective manner on the basis of the amount and timing of future estimated cash flows.

Accounting for Income Taxes

Income taxes reported in the consolidated financial statements are computed based on an asset and liability approach. We recognize the amount of taxes payable or refundable for the current year and we recognize deferred tax assets and liabilities related to expected future tax consequences. Under this method, deferred tax assets and liabilities are determined based on the differences between the financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. We record net deferred tax assets to the extent it is more likely than not that they will be realized. In evaluating our ability to recover the deferred

tax assets, Management considers all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies and recent financial operations. In projecting future taxable income, Management develops assumptions including the amount of future state and federal pretax operating income, the reversal of temporary differences, and the implementation of feasible and prudent tax planning strategies. These assumptions require significant judgment about the forecasts of future taxable income and are consistent with the plans and estimates being used to manage the underlying business. Bancorp files consolidated federal and combined state income tax returns.

We recognize the financial statement effect of a tax position when it is more likely than not, based on the technical merits and all available evidence, that the position will be sustained upon examination, including the resolution through protests, appeals or litigation processes. For tax positions that meet the more-likely-than-not threshold, we measure and record the largest amount of tax benefit that is greater than fifty percent likely of being realized upon ultimate settlement with the taxing authority. The remainder of the benefits associated with tax positions taken is recognized as a liability for unrecognized tax benefits, along with any related interest and penalties. Interest and penalties related to unrecognized tax benefits are recorded in tax expense.

In deciding whether or not our tax positions taken meet the more-likely-than-not recognition threshold, we must make judgments and interpretations about the application of inherently complex state and federal tax laws. To the extent tax authorities disagree with tax positions taken by us, our effective tax rates could be materially affected in the period of settlement with the taxing authorities. Revision of our estimate of accrued income taxes also may result from our own income tax planning, which may impact effective tax rates and results of operations for any given quarter.

Fair Value Measurements

We use fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. We base our fair values on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Securities available-for-sale and derivatives are recorded at fair value on a recurring basis. Additionally, from time to time, we may be required to record certain assets at fair value on a non-recurring basis, such as purchased loans recorded at acquisition date, certain impaired loans held for investment, other real estate owned and securities held-to-maturity that are other-than-temporarily impaired. These non-recurring fair value adjustments typically involve write-downs of individual assets due to application of lower-of-cost or market accounting.

When we develop our fair value measurement process, we maximize the use of observable inputs. Whenever there is no readily available market data, we use our best estimate and assumptions in determining fair value, but these estimates involve inherent uncertainties and the application of Management's judgment. As a result, if other assumptions had been used, our recorded earnings or disclosures could have been materially different from those reflected in these financial statements. For detailed information on our use of fair value measurements and our related valuation methodologies, see Note 4 to the Consolidated Financial Statements in this Form 10-Q.

Net Interest Income

Net interest income is the difference between the interest earned on loans, investments and other interest-earning assets and the interest expense incurred on deposits and other interest-bearing liabilities. Net interest income is impacted by changes in general market interest rates and by changes in the amounts and composition of interest-earning assets and interest-bearing liabilities. Interest rate changes can create fluctuations in the net interest margin due to an imbalance in the timing of repricing or maturity of assets or liabilities. We manage interest rate risk exposure with the goal of minimizing the impact of interest rate volatility on net interest margin.

Net interest margin is expressed as net interest income divided by average interest-earning assets. Net interest rate spread is the difference between the average rate earned on total interest-earning assets and the average rate incurred on total interest-bearing liabilities. Both of these measures are reported on a taxable-equivalent basis. Net interest margin is the higher of the two because it reflects interest income earned on assets funded with non-interest-bearing sources of funds, which include demand deposits and stockholders' equity.

The following table, Average Statements of Condition and Analysis of Net Interest Income, compares interest income and average interest-earning assets with interest expense and average interest-bearing liabilities for the periods presented. The table also indicates net interest income, net interest margin and net interest rate spread for each period presented.

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

Average Statements of Condition and Analysis of Net Interest Income

(dollars in thousands; unaudited)	Three months ended March 31, 2014				Three months ended March 31, 2013			
	Average Balance	Interest Income/ Expense	Yield/ Rate		Average Balance	Interest Income/ Expense	Yield/ Rate	
Assets								
Interest-bearing due from banks ¹	\$85,750	\$51	0.24	%	\$5,710	\$8	0.56	%

Loans ^{1, 3, 4}	1,268,841	16,511	5.20	%	1,062,957	13,808	5.20	%
Total interest-earning assets ¹	1,716,386	18,855	4.39	%	1,353,096	15,596	4.61	%
Cash and non-interest-bearing due from banks	41,793				28,250			
Bank premises and equipment, net	9,088				9,425			
Interest receivable and other assets, net	55,829				37,892			
Total assets	\$1,823,096				\$1,428,663			
Liabilities and Stockholders' Equity								
Interest-bearing transaction accounts	\$127,098	\$23	0.07	%	\$129,379	\$11	0.03	%
Savings accounts	121,278	11	0.04	%	96,561	8	0.03	%
Money market accounts	518,930	158	0.12	%	432,154	99	0.09	%
CDARS® time accounts	36	—	—	%	12,866	5	0.16	%
Other time accounts	160,942	235	0.59	%	140,254	232	0.67	%
FHLB fixed-rate advances	15,000	78	2.07	%	18,513	79	1.71	%
Subordinated debenture ¹	4,988	105	8.58	%	—	—	—	%
Total interest-bearing liabilities	948,272	610	0.26	%	829,727	434	0.21	%
Demand accounts	674,689				429,335			
Interest payable and other liabilities	15,748				14,892			
Stockholders' equity	184,387				154,709			
Total liabilities & stockholders' equity	\$1,823,096				\$1,428,663			
Tax-equivalent net interest income/margin ¹		\$18,244	4.25	%		\$15,162	4.48	%
Reported net interest income/margin ¹		\$17,894	4.17	%		\$14,796	4.37	%
Tax-equivalent net interest rate spread			4.13	%			4.40	%

¹ Interest income/expense is divided by actual number of days in the period times 360 days to correspond to stated interest rate terms, where applicable.

² Yields on available-for-sale securities are calculated based on amortized cost balances rather than fair value, as changes in fair value are reflected as a component of stockholders' equity. Investment security interest is earned on 30/360 day basis monthly.

³ Yields and interest income on tax-exempt securities and loans are presented on a taxable-equivalent basis using the Federal statutory rate of 35 percent.

⁴ Average balances on loans outstanding include non-performing loans. The amortized portion of net loan origination fees is included in interest income on loans, representing an adjustment to the yield.

The tax-equivalent net interest margin was 4.25% in the first quarter of 2014, compared to 4.48% in the same quarter a year ago. The decrease of twenty-three basis points was primarily due to the impact of the low interest rate environment on our loan portfolio rates, an increase in cash balances as a percentage of interest-earning assets and the absence of gains on pay-offs of PCI loans, partially offset by the accretive effects of loans from the NorCal acquisition. The net interest spread decreased twenty-seven basis points over the same period for the same reasons.

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

The tax-equivalent net interest margin increased twenty basis points from the quarter ended December 31, 2013. The accretion of the purchase discounts on loans acquired from NorCal and a shift towards higher yielding assets contributed to the increase in net-interest margin in the first quarter of 2014 compared to the prior quarter.

The average yield on interest-earning assets decreased twenty-two basis points in the first quarter of 2014 compared to the first quarter of 2013 due to the reasons listed above. The loan portfolio as a percentage of average interest-

Page-42

earning assets was 73.9% and 78.6% for the first quarter of 2014 and the first quarter of 2013, respectively. Total average interest-earning assets increased \$363.3 million, or 26.8%, in the first quarter of 2014, compared to the first quarter of 2013, due to both the NorCal acquisition and organic growth.

Market interest rates are, in part, based on the target Federal Funds interest rate (the interest rate banks charge each other for short-term borrowings) implemented by the Federal Reserve Open Market Committee ("FOMC"). In December of 2008, the target interest rate reached an historic low with a range of 0% to 0.25% where it remained as of March 31, 2014. The accommodative monetary policy measures taken by the FOMC in recent years, including three rounds of quantitative easing, has led to a prolonged low interest rate environment. As a result, we have experienced downward pricing pressure on our interest-earning assets that negatively impacted our net interest margin and yields on our earning assets.

Our net interest margin fluctuations due to acquired loans were as follows:

(dollars in thousands; unaudited)	Three months ended		March 31, 2013	
	March 31, 2014	Basis point impact to net interest margin	Dollar Amount	Basis point impact to net interest margin
Accretion on PCI loans	\$ 180	4 bps	\$ 236	7 bps
Accretion on non-PCI loans	\$ 1,330	31 bps	\$ 132	4 bps
Gains on pay-offs of PCI loans	\$—	0 bps	\$ 320	9 bps

Provision for Loan Losses

Management assesses the adequacy of the allowance for loan losses on a quarterly basis based on several factors including growth of the loan portfolio, analysis of probable losses in the portfolio, recent loss experience and the current economic climate. Actual losses on loans are charged against the allowance, and the allowance is increased by loss recoveries and through the provision for loan losses charged to expense. For further discussion, see the section captioned "Critical Accounting Policies."

The provision for loan losses totaled \$150 thousand in the first quarter of 2014, compared to a reversal in the provision for loan losses totaling 230 thousand in the same quarter a year ago.

The allowance for loan losses decreased to 1.11% of loans at March 31, 2014, from 1.12% at December 31, 2013. Non-accrual loans totaled \$10.1 million, or 0.79% of Bancorp's loan portfolio at March 31, 2014, compared to \$11.7 million, or 0.92% at December 31, 2013. The decrease in non-accrual loans primarily relates to \$1.4 million in commercial and construction loans that were resolved in the first quarter of 2014.

Impaired loan balances totaled \$25.8 million at March 31, 2014, compared to \$25.7 million at December 31, 2013, with specific valuation allowances of \$1.7 million and \$2.0 million, respectively. Classified loans, which have regulatory risk grades of "substandard" or "doubtful", increased to \$34.3 million at March 31, 2014, from \$31.1 million at December 31, 2013.

Net charge-offs in the first quarter of 2014 totaled \$142 thousand, compared to net recoveries of \$3 thousand in the same quarter a year ago. The net charge-offs in the first quarter of 2014 primarily related to the resolution of two non-accrual loans, for which reserves had been previously established. The percentage of net charge-offs to average loans was 0.01% in the first quarter of 2014, compared to 0.00% in the first quarter of 2013.

Non-interest Income

The table below details the components of non-interest income.

(dollars in thousands; unaudited)	Three months ended		Amount	Percent	
	March 31, 2014	March 31, 2013	Increase (Decrease)	Increase (Decrease)	
Service charges on deposit accounts	\$556	\$521	\$35	6.7	%
Wealth Management and Trust Services	564	547	17	3.1	%
Debit card interchange fees	300	252	48	19.0	%
Merchant interchange fees	198	205	(7) (3.4)%
Earnings on Bank-owned life insurance	213	401	(188) (46.9)%
Other income	385	180	205	113.9	%
Total non-interest income	\$2,216	\$2,106	\$110	5.2	%

Service charges on deposit accounts and debit card interchange fees increased in the first quarter of 2014 when compared to the first quarter of 2013 due to increased volume related to the NorCal acquisition.

The increase in Wealth Management and Trust Services (WMTS) income in the three-month period ended March 31, 2014 compared to the same period last year is due to the addition of new assets and market value appreciation of existing assets under management. Assets under management totaled approximately \$337.4 million at March 31, 2014 and \$304.4 million at March 31, 2013.

Bank-owned life insurance (“BOLI”) income decreased in the three-month period ended March 31, 2014 when compared to the three-month period ended March 31, 2013 due to a \$223 thousand death benefit realized on the death of an insured employee in the first quarter of 2013, partially offset by new policies acquired from NorCal and additional policies purchased during the last year.

Other income increased for the three months ended March 31, 2014 when compared to the same quarter a year ago, primarily due to higher dividend income from the FHLB and other one-time income.

Non-interest Expense

The table below details the components of non-interest expense.

(dollars in thousands; unaudited)	Three months ended		Amount Increase (Decrease)	Percent Increase (Decrease)	
	March 31, 2014	March 31, 2013			
Salaries and related benefits	\$6,930	\$5,298	\$1,632	30.8	%
Occupancy and equipment	1,334	1,073	261	24.3	%
Depreciation and amortization	416	336	80	23.8	%
Federal Deposit Insurance Corporation	250	214	36	16.8	%
Data processing	1,360	549	811	147.7	%
Professional services	628	527	101	19.2	%
Other non-interest expense					
Advertising	111	117	(6)	(5.1)	%
Other expense	1,814	1,581	233	14.7	%
Total other non-interest expense	1,925	1,698	227	13.4	%
Total non-interest expense	\$12,843	\$9,695	\$3,148	32.5	%

Salary and benefit expenses increased in the first quarter of 2014 when compared to the same quarter last year mainly due to acquisition-related personnel and severance costs, as well as the addition of commercial lenders in our Napa and Santa Rosa offices.

The increase in occupancy and equipment expenses in the three months ended March 31, 2014 compared to the three months ended March 31, 2013, including depreciation and amortization, is primarily due to the rent and common area maintenance expenses and other occupancy expenses related to the NorCal acquisition.

The increase in data processing in the first quarter of 2014 when compared to the first quarter of 2013 reflects one-time expenses of \$442 thousand related to the NorCal acquisition. Additionally, data processing, FDIC insurance and other expenses include higher ongoing expenses as a result of the acquisition.

Professional service expenses increased in the first quarter of 2014 when compared to the same quarter last year mainly due to accounting fees related to both internal and external audit.

Ongoing expenses for data processing transaction volumes, staffing, and facilities are projected to stabilize at somewhat higher than pre-acquisition levels due to the expansion into the East Bay and lenders added in the North Bay.

Provision for Income Taxes

The provision for income taxes for the first quarter of 2014 is \$2.6 million at an effective tax rate of 36.3%, compared to \$2.6 million at an effective tax rate of 34.6% in the same quarter last year. The increase in the effective tax rate is primarily due to a higher expected pre-tax income for 2014 compared to 2013, and the expiration of the California Enterprise Zone loan tax benefits at January 1, 2014. These provisions reflect accruals for taxes at the applicable rates for federal income tax and California franchise tax based upon pre-tax income, and adjusted for the effects of all permanent differences between income for tax and financial reporting purposes (such as earnings on qualified municipal securities, BOLI, certain tax-exempt loans and low income housing tax credits). Therefore, there are fluctuations in the effective rate from period to period based on the relationship of net permanent differences to income before tax.

Bancorp and the Bank have entered into a tax allocation agreement which provides that income taxes shall be allocated between the parties on a separate entity basis. The intent of this agreement is that each member of the consolidated group will incur no greater tax liability than it would have incurred on a stand-alone basis.

We file a consolidated return in the U.S. Federal tax jurisdiction and a combined return in the State of California tax jurisdiction. We are no longer subject to tax examinations by taxing authorities for years beginning before 2011 for U.S. Federal or before 2010 for California. There were no ongoing federal income tax examinations at the issuance of this report.

The State of California is currently examining 2011 and 2012 corporate income tax returns. At the time of issuance of this quarterly report, no adjustments have been proposed by the California Franchise Tax Board in connection with the examination. Although timing of the resolution or closure of the examination is uncertain, we do not anticipate a need to establish a reserve for uncertain tax positions in the next 12 months. At March 31, 2014 and December 31, 2013, neither the Bank nor Bancorp had accruals for interest and penalties related to unrecognized tax benefits.

FINANCIAL CONDITION SUMMARY

Investment Securities

During the first three months of 2014, total assets decreased \$7.3 million to \$1.8 billion. The decrease in assets primarily reflects decreases in cash, cash equivalents and investment securities partially redeployed to loan originations in the quarter. Investment securities in our portfolio that may be backed by mortgages having sub-prime or Alt-A features (certain privately issued CMOs) represent 1.1% of our total investment portfolio at March 31, 2014, compared to 1.7% at December 31, 2013.

Edgar Filing: Bank of Marin Bancorp - Form 10-Q

At March 31, 2014 and December 31, 2013, distribution of our investment in obligations of state and political subdivisions was as follows:

(dollars in thousands; unaudited)	March 31, 2014				December 31, 2013			
	Amortized Cost	Fair Value	% of state and municipal securities	¹	Amortized Cost	Fair Value	% of state and municipal securities	¹
Within California:								
General obligation bonds	\$23,177	\$23,414	25.1	%	\$23,765	\$23,858	24.7	%
Revenue bonds	19,648	19,844	21.3	%	19,721	19,672	20.5	%
Tax allocation bonds	8,360	8,294	8.7	%	9,114	8,902	9.1	%
Total in California	51,185	51,552	55.1	%	52,600	52,432	54.3	%
Outside California:								
General obligation bonds	30,338	31,668	33.2	%	30,490	31,819	32.1	%
Revenue bonds	11,010	10,854	11.7	%	13,239	12,949	13.6	%
Total outside California	41,348	42,522	44.9	%	43,729	44,768	45.7	%
Total obligations of state and political subdivisions	\$92,533	\$94,074	100.0	%	\$96,329	\$97,200	100.0	%

¹ Based on par values.

The portion of the portfolio outside the state of California is distributed among 17 states. The largest concentrations are in Illinois (8.5%), Ohio (5.0%) and Michigan (3.7%). Revenue bonds, both within and outside California, primarily consisted of bonds relating to essential services (such as roads and utilities) and school district bonds.

Investments in states, municipalities and political subdivisions are subject to an initial pre-purchase credit assessment and ongoing monitoring. Key considerations include:

- The soundness of a municipality's budgetary position and stability of its tax revenues;
- Debt profile and level of unfunded liabilities, diversity of revenue sources, taxing authority of the issuer;
- Local demographics/economics including unemployment data, largest local employers, income indices and home values;
- For revenue bonds, the source and strength of revenue for municipal authorities including obligor's financial condition and reserve levels, annual debt service and debt coverage ratio, and credit enhancement (such as insurer's strength);
- Credit ratings by major credit rating agencies.

There are six California tax allocation bonds totaling \$3.0 million at amortized cost and at fair value for which Moody's credit ratings diverge from the internal assessment. In June 2012, Moody's Investor Service downgraded to Ba1 all uninsured California redevelopment agency tax allocation bonds ("RDA"s) that were rated Baa3 or higher. The downgrade to Ba1 was prompted by the increased risk of default resulting from the state's dissolution of all redevelopment agencies. The downgrade was based on the potential risk that new laws governing "successor" agencies (Assembly bills 26 and 1484) might further reduce credit quality, and uncertainty as to whether there was sufficient information available to assess the credit quality of tax allocation bonds. In 2013, certain ratings of RDAs were withdrawn by Moody's. Internal research shows the dispute between the California State Department of Finance and certain successor agencies regarding funds on hand required for payment of debt service, has been successfully

resolved in the successor agencies' favor by the State Superior Court. In addition, the California State Department of Finance is in the process of approving refinancing requests from the successor agencies. Debt coverage ratios and assessed property value trends indicate that Moody's rating downgrade/withdrawal is not necessarily reflective of the issuers' credit profiles.

We sold one available-for-sale and three held-to-maturity securities in the first quarter of 2014 with total proceeds of \$2.0 million and \$725 thousand, respectively, and incurred a loss of \$15 thousand and a gain of \$7 thousand, respectively. The sale of the held-to-maturity securities issued by the same municipality was due to evidence of significant deterioration of creditworthiness of the issuer since purchase.

Loans

We had a relatively strong level of loan originations this quarter that was partially offset by early pay-offs and refinancing activity, in line with current market pressure and strong competition for quality loans, as well as maturities and our successful resolution of problem loans. Our residential loan portfolio includes no sub-prime loans, nor is it our normal practice to underwrite loans commonly referred to as "Alt-A mortgages," the characteristics of which are loans lacking full documentation, borrowers having low FICO scores or collateral compositions reflecting high loan-to-value ratios. Refer to Note 6 for the composition of our outstanding loans by class.

Liabilities

During the first three months of 2014, total liabilities decreased \$12.6 million to \$1.6 billion primarily due to a decrease in deposits. The lower level of money market accounts primarily reflects attrition in certain high-priced deposits from Bank of Alameda after repricing during the system conversion in March 2014. Non-interest-bearing deposits increased \$53.4 million while transaction accounts decreased \$41.2 million during the first quarter of 2014. Non-interest-bearing deposits totaled 44.5% of total deposits as of March 31, 2014, compared to 40.8% at the prior quarter-end and 39.5% at March 31, 2013. The increase primarily reflects the conversion of certain Bank of Alameda transaction accounts to non-interest-bearing accounts.

Capital Adequacy

We are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a material effect on our consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and the Bank's prompt corrective action classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Prompt corrective action provisions are not directly applicable to bank holding companies such as Bancorp.

Quantitative measures established by regulation to ensure capital adequacy require Bancorp and the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital to risk-weighted assets and of Tier 1 capital to quarterly average assets.

Capital ratios are reviewed by Management on a regular basis to ensure that capital exceeds the prescribed regulatory minimums and is adequate to meet our anticipated future needs. For all periods presented, the Bank's ratios exceed the regulatory definition of "well capitalized" under the regulatory framework for prompt corrective action and Bancorp's ratios exceed the required minimum ratios for capital adequacy purposes. We expect the Bank to remain well-capitalized under the current requirements for capital adequacy, as well as under the new Basel III rules.

In December 2010, the Basel Committee on Bank Supervision finalized a set of international guidelines for determining regulatory capital known as "Basel III." These guidelines were developed to address many of the perceived weaknesses in the banking industry that contributed to the past financial crisis, including excessive leverage, inadequate and low quality capital and insufficient liquidity buffers. In July 2013, the Board of Governors of the

Federal Reserve, the FDIC and the Office of the Comptroller, finalized a rule to implement Basel III. The rule is subject to a phase in period beginning January 2015, and all changes should be implemented by January 2019. The guidelines, among other things, increase minimum capital requirements of bank holding companies, including increasing the Tier 1 capital to risk-weighted assets ratio to 6%, introducing a new requirement to maintain a minimum ratio of common equity Tier 1 capital to risk-weighted assets of 4.5%, and in 2019, when fully phased in, a capital conservation buffer of an additional 2.5% of risk weighted assets. In addition, there have been several updates to the way risk weighted assets are assessed. The three changes that will affect the Bank most significantly are: the movement of past due exposures from 100% to 150% risk weight; the movement of off-balance sheet items with an original maturity of one year or less from 0% to 20% risk weight; and the risk weighting of mortgage-backed securities using the gross-up approach instead

of the ratings based approach. As a result of their implementation, we have modeled our ratios under the finalized rules and we do not expect that we will be required to raise additional capital.

The Bank's and Bancorp's capital adequacy ratios as of March 31, 2014 and December 31, 2013 are presented in the following tables. Bancorp's tier one capital includes the subordinated debentures, which are not included at the Bank level. We continue to build capital in 2014 due to the accumulation of net income.

Capital Ratios for Bancorp (dollars in thousands; March 31, 2014 unaudited)		Actual Ratio		Ratio to Capital Adequacy Purposes	
		Amount	Ratio	Amount	Ratio
As of March 31, 2014					
Total Capital (to risk-weighted assets)		\$195,115	13.52	% ≥\$115,476	≥ 8.0%
Tier 1 Capital (to risk-weighted assets)		\$180,203	12.48	% ≥\$57,738	≥ 4.0%
Tier 1 Capital (to average assets)		\$180,203	9.94	% ≥\$71,484	≥ 4.0%
As of December 31, 2013					
Total Capital (to risk-weighted assets)		\$190,738	13.21	% ≥\$115,524	≥ 8.0%
Tier 1 Capital (to risk-weighted assets)		\$175,835	12.18	% ≥\$57,762	≥ 4.0%
Tier 1 Capital (to average assets)		\$175,835	10.78	% ≥\$65,222	≥ 4.0%

Capital Ratios for the Bank (dollars in thousands; March 31, 2014 unaudited)		Actual Ratio		Ratio for Capital Adequacy Purposes		Ratio to be Well Capitalized under Prompt Corrective Action Provisions	
		Amount	Ratio	Amount	Ratio	Amount	Ratio
As of March 31, 2014							
Total Capital (to risk-weighted assets)		\$187,531	13.00	% ≥\$115,445	≥ 8.0%	≥\$144,306	≥ 10.0%

Liquidity

The goal of liquidity management is to provide adequate funds to meet both loan demand and unexpected deposit withdrawals. We accomplish this goal by maintaining an appropriate level of liquid assets, and formal lines of credit with the FHLB, FRB and correspondent banks that enable us to borrow funds as needed. Our Asset/Liability Management Committee ("ALCO"), which is comprised of certain directors of the Bank, is responsible for establishing and monitoring our liquidity targets and strategies.

Management regularly adjusts our investments in liquid assets based upon our assessment of expected loan demand, expected deposit flows, yields available on interest-earning securities and the objectives of our asset/liability management program. Management monitors the bank's liquidity and capital markets on a regular basis for signs of stress and has developed a contingency funding plan should liquidity risk increase above internal limits.

We obtain funds from the repayment and maturity of loans as well as deposit inflows, investment security maturities and pay-downs, Federal Funds purchases, FHLB advances, and other borrowings. Our primary uses of funds are the origination of loans, the purchase of investment securities, withdrawals of deposits, maturities of certificates of

deposits, repayment of borrowings, and dividends to common stockholders.

Page-49

We attract and retain new deposits, which depends upon the variety and effectiveness of our customer account products, service and convenience, and rates paid to customers, as well as our financial strength. Any long-term decline in retail deposit funding would adversely impact our liquidity. We have secured borrowing capacity through the FHLB and FRB that can be drawn upon and ensure diversification of funding sources. Management anticipates our current strong liquidity position and core deposit base will provide adequate liquidity to fund our operations.

As presented in the accompanying unaudited consolidated statements of cash flows, the sources of liquidity vary between periods. Our cash and cash equivalents at March 31, 2014 totaled \$91.6 million, a decrease of \$12.2 million from December 31, 2013. The primary uses of funds during the first three months of 2014 were \$9.9 million in purchases of available-for-sale investment securities, \$7.8 million in loan originations (net of principal collections) and a decline in deposits amounting to \$10.8 million, which was primarily due to attrition in certain high-priced deposits from Bank of Alameda after repricing during the system conversion in March 2014. The primary sources of funds included \$14.9 million in proceeds from sales, pay-downs and maturities of investment securities and \$2.1 million net cash provided by operating activities.

At March 31, 2014, our cash and cash equivalents and unpledged available-for-sale securities with estimated maturities within one year totaled \$97.1 million. The remainder of the unpledged available-for-sale securities portfolio of \$209.6 million provides additional liquidity. These liquid assets equaled 17.0% of our assets at March 31, 2014, compared to 18.4% at December 31, 2013.

We anticipate that cash and cash equivalents on hand and other sources of funds will provide adequate liquidity for our operating, investing and financing needs and our regulatory liquidity requirements for the foreseeable future. Management monitors our liquidity position daily, balancing loan fundings/payments with changes in deposit activity and overnight investments. Our emphasis on local deposits combined with our well-capitalized equity position, provides a very stable funding base. In addition to cash and cash equivalents, we have substantial additional borrowing capacity including unsecured lines of credit totaling \$87.0 million with correspondent banks. Further, we have pledged a certain residential loan portfolio to secure our borrowing capacity with the FRB, which totaled \$25.8 million at March 31, 2014. As of March 31, 2014, there is no debt outstanding to correspondent banks or the FRB. We are also a member of the FHLB and have a line of credit (secured under terms of a blanket collateral agreement by a pledge of essentially all of our unencumbered financial assets) in the amount of \$494.9 million, of which \$479.7 million was available at March 31, 2014. The interest rates on overnight borrowings with both correspondent banks and the FHLB are determined daily and generally approximate the Federal Funds target rate.

Undisbursed loan commitments, which are not reflected on the consolidated statements of condition, totaled \$339.5 million at March 31, 2014. This amount included \$178.9 million under commercial lines of credit (these commitments are contingent upon customers maintaining specific credit standards), \$107.1 million under revolving home equity lines, \$29.0 million under undisbursed construction loans, \$13.3 million under standby letters of credit, and a remaining \$11.2 million under personal and other lines of credit. These commitments, to the extent used, are expected to be funded primarily through the repayment of existing loans, deposit growth and existing balance sheet liquidity. Over the next twelve months \$96.9 million of time deposits will mature.

Since Bancorp is a holding company and does not conduct regular banking operations, its primary sources of liquidity are dividends from the Bank. Under the California Financial Code, payment of a dividend from the Bank to Bancorp without advance regulatory approval is restricted to the lesser of the Bank's retained earnings or the amount of the Bank's undistributed net profits from the previous three fiscal years. The primary uses of funds for Bancorp are shareholder dividends, interest payments on subordinated debentures and ordinary operating expenses. Bancorp held \$7.1 million of cash at March 31, 2014. These funds are deemed sufficient to cover Bancorp's operational needs and cash dividends to shareholders through the end of 2014. Management anticipates that there will be sufficient earnings at the Bank level to provide dividends to Bancorp to meet its funding requirements for the foreseeable future.

ITEM 3. Quantitative and Qualitative Disclosure about Market Risk

Market risk is defined as the risk of loss arising from an adverse change in the market value of financial instruments caused by fluctuations in market prices or interest rates. Our most significant form of market risk is interest rate risk, which is inherent in our investment, borrowing, lending and deposit gathering activities. Interest rate changes can create fluctuations in the net interest margin due to an imbalance in the timing of repricing or maturity of assets and liabilities. Management, together with ALCO, seeks to minimize the exposure of our earnings, liquidity and capital to changes in interest rates by minimizing the impact of interest rate volatility on our net interest margin.

Sensitivity of net interest income (“NII”), liquidity and capital to interest rate changes results from changes in market prices as well as differences in the maturity or repricing of asset and liability portfolios. To mitigate this risk, the structure of the Consolidated Statement of Condition is managed with the objective of correlating the movements of interest rates on loans and investments with those of deposits and borrowings. Company policies set limits on the acceptable amount of change to NII, liquidity and capital in changing interest rate environments. We use simulation models to forecast cash flows that produce NII and liquidity.

From time to time, we enter into certain interest rate swap contracts designated as fair value hedges to mitigate the changes in the fair value of specified long-term fixed-rate loans and firm commitments to enter into long-term fixed-rate loans caused by changes in interest rates. See Note 10 to the Consolidated Financial Statements in this Form 10-Q.

Exposure to interest rate and liquidity risk is reviewed at least quarterly by the ALCO and the Board of Directors. Simulation models are used to measure these risks and to develop ways to improve profitability. A simplified statement of condition is prepared on a quarterly basis as a starting point, using as inputs, actual loans, investments, borrowings and deposits. If potential changes to net equity value, liquidity and net interest income resulting from hypothetical interest changes are not within the limits established by the Board of Directors, Management may adjust the asset and liability mix to bring the risk position within approved limits.

Since 2008, there have been no changes in the Federal funds target rate which has been kept at an historically low level of 0-0.25%. The Bank currently has low interest rate risk and is asset sensitive (net interest margin positioned to increase if rates go up). Since the prior quarter, the yield curve has steepened mildly and rates along the intermediate to long end of the yield curve have increased. It is expected to benefit us when market yields in new loans respond to this yield curve movement, although it may be on a lagged basis. We are less asset sensitive compared to December 31, 2013 due to deployment of cash during the first quarter. Our earnings and net interest margin are expected to increase when short-term rates rise. In addition to our solid core deposit base, we have mitigated earnings sensitivity to a certain extent through the use of interest rate swaps.

ITEM 4. Controls and Procedures

We maintain a system of disclosure controls and procedures that is designed to provide reasonable assurance that information required to be disclosed is accumulated and communicated to management in an appropriate manner to allow timely decisions regarding required disclosures. Management, including the Chief Executive Officer and Chief Financial Officer, or persons performing similar functions, has reviewed this system of disclosure controls and procedures and believes that our disclosure controls and procedures (as that term is defined in Rule 13a-15(e) of the Exchange Act) were effective, as of the end of the period covered by this report, in recording, processing, summarizing and reporting information required to be disclosed in reports that we file or submit under the Securities and Exchange Act of 1934, within the time periods specified in the Securities and Exchange Commission’s rules and forms. No material changes were made in our internal controls over financial reporting during the last fiscal quarter.

PART II OTHER INFORMATION

ITEM 1 Legal Proceedings

We may be party to legal actions which arise from time to time as part of the normal course of our business. We believe, after consultation with legal counsel, that we have meritorious defenses in these actions, and that litigation contingency liability, if any, will not have a material adverse effect on our financial position, results of operations, or cash flows.

We are responsible for our proportionate share of certain litigation indemnifications provided to Visa U.S.A. by its member banks in connection with lawsuits related to anti-trust charges and interchange fees. For further details, see Note 13 to the Consolidated Financial Statements in Item 8 of our 2013 Form 10-K and Note 9 to the Consolidated Financial Statements in this Form 10-Q herein.

ITEM 1A Risk Factors

There have been no material changes from the risk factors previously disclosed in our 2013 Form 10-K. Refer to "Risk Factors" in our 2013 Form 10-K, pages 12 through 20.

ITEM 2 Unregistered Sales of Equity Securities and Use of Proceeds

We did not have any unregistered sales of our equity securities during the three months ended March 31, 2014.

ITEM 3 Defaults Upon Senior Securities

None.

ITEM 4 Mine Safety Disclosures

Not applicable.

ITEM 5 Other Information

None.
