No officer or director of the Company has any substantial interest in the Actions, other than his or her role as an officer or director of the Company.

ACTION ONE – AMENDMENT TO THE ARTICLES OF INCORPORATION TO EFFECT THE REVERSE STOCK SPLIT

On August 9, 2013, the Board adopted resolutions authorizing an amendment to the Company's Articles of Incorporation to effect a reverse stock split of the outstanding shares of Common Stock at a specific ratio within a range from 1-for-5 to 1-for-10 as the Board shall determine (the "Reverse Stock Split").

On August 15, 2013, pursuant to Section 78.320 of the NRS, we received written consents from the Majority Stockholders approving the amendment to the Articles of Incorporation to effect the Reverse Stock Split at a ratio as determined by the Board within the foregoing parameters.

Reasons for the Reverse Stock Split

The Reverse Stock Split is intended to increase the per share stock price of our Common Stock. As of August 9, 2013, the last reported closing price of the Common Stock was \$1.36 per share. The Board believes that if we are successful in maintaining a higher price per share of our Common Stock, we will be able to generate greater interest among investors and institutions. If we are successful in generating such interest, we anticipate that our Common Stock would have greater liquidity and a stronger investor base. Our Board also believes that a higher stock price is necessary in order for our Common Stock to qualify for a listing on a national stock exchange or the NASDAQ Stock Market.

The Company cannot assure you that it will be successful in generating greater interest among investors and institutions or that the Common Stock will qualify for a listing on a national stock exchange or the NASDAQ Stock Market. Stockholders should also note that if the Company elects to implement a Reverse Stock Split, there is no assurance that prices for shares of the Common Stock after the Reverse Stock Split will increase proportionally to the exchange ratio of the Reverse Stock Split (or at all). Other factors such as our financial results, market conditions and the market perception of our business may adversely affect the market price of our Common Stock. The Company cannot guarantee to stockholders that the price of its shares will reach or sustain any price level in the future, and it is possible the Reverse Stock Split will have no lasting impact on its share price. Furthermore, the liquidity of our Common Stock could be adversely affected by the reduced number of shares that would be outstanding after the Reverse Stock Split. Consequently, there can be no assurance that the Reverse Stock Split will achieve the desired results.

The Board may determine in its discretion the exchange ratio for the Reverse Stock Split, provided that such exchange ratio is from of 1-for-5 to 1-for-10, whereby one post-Reverse Stock Split share of Common Stock (the "New Shares") is exchanged for up to ten pre-Reverse Stock Split shares of Common Stock (the "Old Shares"). In determining the range of Reverse Stock Split ratios, the Board considered numerous factors, including:

- the historical and projected performance of the Common Stock and volume level before and after the Reverse Stock Split;
- the prevailing trading price for the Common Stock and the volume level thereof;
- potential devaluation of our market capitalization as a result of the Reverse Stock Split;

- prevailing market conditions and general economic and other related conditions prevailing in our industry and in the marketplace generally; and
- the projected impact of the Reverse Stock Split ratio on trading liquidity in the Common Stock.

In evaluating the Reverse Stock Split, the Board also took into consideration negative factors associated with reverse stock splits in general. These factors include the negative perception of reverse stock splits held by some investors, analysts and other stock market participants, as well as the fact that the stock price of some companies that have effected reverse stock splits has subsequently declined back to pre-reverse stock split levels. The Board, however, determined that these negative factors were outweighed by the potential benefits.

Table of Contents

Effects of the Reverse Stock Split

At the Effective Time (as defined below), each lot of up to ten Old Shares, as determined by the Board, issued and outstanding immediately prior to the Effective Time will, automatically and without any further action on the part of our stockholders, be combined into and become one New Share, subject to the treatment for fractional shares described below, and each certificate which, immediately prior to the Effective Time, represented Old Shares will be deemed, for all corporate purposes, to evidence ownership of New Shares. STOCKHOLDERS SHOULD NOT DESTROY ANY STOCK CERTIFICATE(S) AND SHOULD NOT SUBMIT ANY CERTIFICATE(S) UNTIL REQUESTED TO DO SO.

The Reverse Stock Split will be effected simultaneously for all our then-existing Old Shares and the exchange ratio will be the same for all of our shares of outstanding Common Stock. The Reverse Stock Split will affect all of our stockholders uniformly and will not affect any stockholder's percentage ownership interests in the Company, subject to the treatment for fractional shares described below. See "Fractional Shares" below. The New Shares issued pursuant to the Reverse Stock Split will be fully paid and non-assessable. All New Shares will have the same par value, voting rights and other rights as Old Shares. Stockholders of the Company do not have preemptive rights to acquire additional shares of Common Stock. The following table provides the effects of the Reverse Stock Split based on the ratios in the specified range and is based on 97,811,977 shares of Common Stock outstanding as of October 1, 2013.

Proposed Reverse Stock Split	Percentage Reduction in the Outstanding Shares of Common Stock		Common Stock Outstanding after the Reverse Stock Split	Common Stock Available for Issuance after the Reverse Stock Split and Decrease in Authorized Common Stock
1 for 5	80.0	%	19,562,395	30,437,605
1 for 6	83.3	%	16,334,600	33,665,400
1 for 7	85.7	%	13,987,113	36,012,887
1 for 8	87.5	%	12,226,497	37,773,503
1 for 9	88.9	%	10,857,129	39,142,871
1 for 10	90.0	%	9,781,198	40,218,802

A new CUSIP number will also be assigned to the Common Stock following the Reverse Stock Split.

Commencing at the Effective Time, all outstanding options, warrants and other convertible securities entitling holders thereof to purchase shares of Common Stock would entitle such holders to receive, upon exercise of their securities, a fraction (depending on the actual exchange ratio of the Reverse Stock Split) of the number of shares of Common Stock which such holders may purchase upon exercise or conversion of their securities. In addition, commencing at the Effective Time, the exercise or conversion price of all outstanding options, warrants and other convertible securities of the Company would be increased proportionally, based on the actual exchange ratio of the Reverse Stock Split.

Fractional Shares

No scrip or fractional shares would be issued if, as a result of the Reverse Stock Split, a stockholder would otherwise become entitled to receive a fractional share of Common Stock. In lieu of issuing fractional shares, the Company would round up to one whole share of Common Stock in the event a stockholder would be entitled to receive a fractional share of Common Stock.

Effect on Voting Rights of, and Dividends on, Common Stock

Proportionate voting rights and other rights of the holders of Common Stock would not be affected by the Reverse Stock Split. The percentage of outstanding shares owned by each stockholder prior to the Reverse Stock Split, if implemented, will remain the same, except for adjustment as a consequence of rounding up of any fractional shares created by the Reverse Stock Split. See “Fractional Shares” above.

Table of Contents

We have not in the past declared, nor do we have any plans to declare in the foreseeable future, any distributions of cash, dividends or other property, and we are not in arrears on any dividends. Therefore, we do not believe that the Reverse Stock Split would have any effect with respect to future distributions, if any, to our stockholders.

Effect on Liquidity

The decrease in the number of shares of our Common Stock outstanding as a consequence of the Reverse Stock Split may decrease the liquidity in our Common Stock if the anticipated beneficial effects do not occur. See “Purposes of the Reverse Stock Split” above. If implemented, the Reverse Stock Split may result in some stockholders owning “odd-lots” of less than 100 shares of Common Stock on a post-split basis. Odd lots may be more difficult to sell, or require greater transaction costs per share to sell than shares in “even lots” of even multiples of 100 shares.

Certain U.S. Federal Income Tax Consequences

The discussion below is only a summary of certain U.S. federal income tax consequences of the Reverse Stock Split generally applicable to beneficial holders of shares of our Common Stock and does not purport to be a complete discussion of all possible tax consequences. This summary addresses only those stockholders who hold their Old Shares as “capital assets” as defined in the Internal Revenue Code of 1986, as amended (the “Code”), and will hold the New Shares as capital assets. This discussion does not address all U.S. federal income tax considerations that may be relevant to particular stockholders in light of their individual circumstances or to stockholders that are subject to special rules, such as financial institutions, tax-exempt organizations, insurance companies, dealers in securities, and foreign stockholders. The following summary is based upon the provisions of the Code, applicable Treasury Regulations thereunder, judicial decisions and current administrative rulings, as of the date hereof, all of which are subject to change, possibly on a retroactive basis. Tax consequences under state, local, foreign, and other laws are not addressed herein. Each stockholder should consult his, her or its own tax advisor as to the particular facts and circumstances that may be unique to such stockholder and also as to any estate, gift, state, local or foreign tax considerations arising out of the Reverse Stock Split.

The Reverse Stock Split will qualify as a recapitalization for U.S. federal income tax purposes. As a result:

- Stockholders should not recognize any gain or loss as a result of the Reverse Stock Split.
- The aggregate basis of a stockholder’s pre-Reverse Stock Split shares will become the aggregate basis of the shares held by such stockholder immediately after the Reverse Stock Split.
- The holding period of the shares owned immediately after the Reverse Stock Split will include the stockholder’s holding period before the Reverse Stock Split.

The above discussion is not intended or written to be used, and cannot be used by any person, for the purpose of avoiding U.S. federal tax penalties. It was written solely in connection with the proposed Reverse Stock Split of our Common Stock.

Effective Date of the Reverse Stock Split

The Reverse Stock Split will become effective upon the filing of a Certificate of Amendment to our Articles of Incorporation with the Secretary of State of the State of Nevada or at such later time as indicated in such amendment (the “Effective Time”), but in no event prior to the end of the 20-day period following the date on which this Information Statement is mailed first to our stockholders. We intend to file the Certificate of Amendment to our Articles of Incorporation in the form attached hereto as Annex I with the Secretary of State of the State of Nevada

promptly after the 20-day period following the date on which this Information Statement is first mailed to our stockholders. However, the exact timing of the filing of the amendment will be determined by the Board based on its evaluation as to when such action will be the most advantageous to us and our stockholders, and the Board. In addition, the Board reserves the right, notwithstanding stockholder approval and without further action by the stockholders, to elect not to proceed with the Reverse Stock Split if, at any time prior to filing the amendment, the Board, in its sole discretion, determines that it is no longer in our best interests and the best interests of our stockholders.

Table of Contents

ACTION TWO – AMENDMENT OF THE ARTICLES OF INCORPORATION TO DECREASE THE
AUTHORIZED NUMBER OF COMMON STOCK

On August 9, 2013, the Board adopted resolutions authorizing an amendment of the Company's Articles of Incorporation to decrease the authorized number of shares from 150,000,000 to 50,000,000 (the "Authorized Capital Decrease").

On August 15, 2013, pursuant to Section 78.320 of the NRS, we received written consents approving the Authorized Capital Decrease from the Majority Stockholders.

Reasons for the Authorized Capital Decrease

In the discussion that follows, note that the figures regarding the number of outstanding shares and other securities are numbers before taking into account of the Reverse Stock Split. As of the close of business on August 7, 2013, there were 97,338,482 shares of Common Stock issued and outstanding. In addition, as of the close of business on August 7, 2013, there were (i) 30,885,007 shares of Common Stock issuable upon exercise of outstanding warrants, and (ii) 34,907,130 shares of Common Stock issuable upon exercise of outstanding options. The Company's Articles of Incorporation currently authorizes the issuance of up to 150,000,000 shares of Common Stock, par value \$0.001 per share.

The proposed Reverse Stock Split discussed in Action One above would have the effect of increasing the number of shares of Common Stock remaining available for issuance. The effective increase in authorized shares of Common Stock resulting from the proposed Reverse Stock Split would create a reserve of authorized but unissued stock that is significantly more than what is necessary to account for the issued and outstanding shares of the Company's Common Stock, shares issuable pursuant to outstanding derivative securities and future issuances for various corporate purposes, as summarized above. Accordingly, the Board determined that it is in the best interests of the Company to decrease the authorized number of shares from 150,000,000 to 50,000,000. In such determination, the Board considered the effect of the proposed Reverse Stock Split on its outstanding securities and the level of availability of authorized but unissued shares it deems necessary for the Company allow the Company to accommodate the following additional issuances:

- issue up to 30,885,007 shares of Common Stock upon exercise of the above described outstanding warrants;
- issue up to 34,907,130 shares of Common Stock upon exercise of the above described options; and
- issue additional shares of Common Stock for any proper corporate purposes, including but not limited to, public or private financings, stock splits, stock dividends, potential strategic transactions, including mergers, acquisitions, strategic partnerships, joint ventures and other business combinations, as well as for other general corporate transactions.

Other than as described above, the Company has no current plan, commitment, arrangement, understanding or agreement regarding the issuance of the additional shares of Common Stock resulting from the proposed increase in the number of authorized shares of Common Stock. The additional shares of Common Stock will be available for issuance from time to time as determined by the Board of Directors.

Effect of the Authorized Capital Decrease

If we issue additional shares of Common Stock (or securities convertible into, or exercisable or exchangeable for, shares of Common Stock) as described above, this could have the effect of diluting existing stockholders'

ownership. Further, depending upon the price at which shares might be issued, this may have the effect of depressing the price of shares of our Common Stock or diluting the book value of Common Stock per share or earnings per share. Additional issuances could also reduce the per share amounts available upon our liquidation, if that should occur. While the issuance of shares in certain instances may have the effect of forestalling a hostile takeover, the Board does not intend nor does it view the increase in authorized shares as an antitakeover measure, nor are we aware of any proposed or contemplated transaction of this type.

-7-

Table of Contents

The additional authorized shares of Common Stock when issued will have the identical powers, preferences, and rights as the shares now issued and outstanding, including the right to cast one vote per share and to receive dividends, if any.

Effective Date of the Authorized Capital Decrease

The Authorized Capital Decrease will become effective upon the filing of a Certificate of Amendment to our Articles of Incorporation with the Secretary of State of the State of Nevada or at such later time as indicated in such amendment. We intend to file the Certificate of Amendment to our Articles of Incorporation in the form attached hereto as Annex I with the Secretary of State of the State of Nevada promptly after the 20-day period following the date on which this Information Statement is first mailed to our stockholders.
