UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

[X] QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE

SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2015

Commission file number 1-8491

HECLA MINING COMPANY

(Exact name of registrant as specified in its charter)

Delaware (State or other jurisdiction of incorporation or organization)	77-0664171 (I.R.S. Employer Identification No.)
6500 Mineral Drive, Suite 200 Coeur d'Alene, Idaho (Address of principal executive offices)	 83815-9408 (Zip Code)

208-769-4100

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes XX . No __ .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes XX . No___.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act (check one):

Large Accelerated Filer XX. Accelerated Filer __ .
Non-Accelerated Filer __ . Smaller reporting company _ .
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes __ . No XX.

Indicate the number of shares outstanding of each of the issuer’s classes of common stock, as of the latest practicable date.

Class	Shares Outstanding May 5, 2015
Common stock, par value $0.25 per share	370,348,437

Payment of accrued compensation in restricted stock units	$3,016	$4,600

The accompanying notes are an integral part of the interim condensed consolidated financial statements.

Table Of Contents

Note 1. Basis of Preparation of Financial Statements

In the opinion of management, the accompanying unaudited interim condensed consolidated financial statements and notes to the interim condensed consolidated financial statements contain all adjustments, consisting of normal recurring items, necessary to present fairly, in all material respects, the financial position of Hecla Mining Company and its consolidated subsidiaries (“we” or “our” or “us”). These unaudited interim condensed consolidated financial statements should be read in conjunction with our audited consolidated financial statements and related footnotes as set forth in our annual report filed on Form 10-K for the year ended December 31, 2014, as it may be amended from time to time.

The results of operations for the periods presented may not be indicative of those which may be expected for a full year. The unaudited interim condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in audited financial statements prepared in accordance with generally accepted accounting principles in the United States (“GAAP”) have been condensed or omitted pursuant to those rules and regulations, although we believe that the disclosures are adequate for the information not to be misleading.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements, the reported amounts of revenues and expenses during the reporting period and the disclosures of contingent liabilities. Accordingly, ultimate results could differ materially from those estimates.

Note 2. Investments and Restricted Cash

Investments

At March 31, 2015 and December 31, 2014, the fair value of our non-current investments was $4.3 million and $4.9 million, respectively. Our non-current investments consist of marketable equity securities, which are carried at fair value as they are classified as “available-for-sale.” The cost basis of our non-current investments was approximately $4.9 million and $7.3 million at March 31, 2015 and December 31, 2014, respectively. During the first quarter of 2015, we recognized a $2.8 million impairment charge against current earnings, as we determined the impairment to be other-than-temporary. We also acquired equity in other mining companies for a total cost of $0.9 million during the first quarter of 2015.

At March 31, 2015, a net unrealized loss position of $0.6 million for our non-current investments was included in accumulated other comprehensive loss on our condensed consolidated balance sheet.

Restricted Cash and Investments

Various laws, permits, and covenants require that funds be in place for certain environmental and reclamation obligations and other potential liabilities. These restricted investments are used primarily for reclamation funding or for funding surety bonds, and were $0.9 million at March 31, 2015 and December 31, 2014, respectively. Restricted investments primarily represent investments in money market funds and certificates of deposit.

6

Table Of Contents

Note 3. Income Taxes

Major components of our income tax provision for the three months ended March 31, 2015 and 2014 are as follows (in thousands):

	Three Months Ended March 31,	
	2015	2014
Current:		
Domestic	$97	$6,499
Foreign	708	156
Total current income tax provision	805	6,655
Deferred:		
Domestic	2,422	(3,130)
Foreign	(1,788)	258
Total deferred income tax provision	634	(2,872)
Total income tax provision	$1,439	$3,783

As of March 31, 2015, we have a net deferred tax asset in the U.S. of $108.6 million and a net deferred tax liability in Canada of $138.4 million for a consolidated worldwide net deferred tax liability of $29.8 million. Our ability to utilize our deferred tax assets depends on future taxable income generated from operations. For the three months ended March 31, 2015, there were no circumstances that caused us to change our assessment of the ability to generate sufficient future taxable income to realize the currently recognized U.S. deferred tax assets. At March 31, 2015 and December 31, 2014, the balances of the valuation allowances on our deferred tax assets were $36 million and $32 million, respectively, primarily for foreign net operating loss carryforwards. The amount of the deferred tax asset considered recoverable, however, could be reduced in the near term if estimates of future taxable income are reduced.

The current income tax provisions for the three months ended March 31, 2015 and 2014 vary from the amounts that would have resulted from applying the statutory income tax rate to pre-tax income primarily due to the effects of percentage depletion for all periods presented and the impact of taxation in foreign jurisdictions.

Note 4. Commitments, Contingencies and Obligations

General

We follow the FASB Accounting Standards Codification guidance in determining our accruals and disclosures with respect to loss contingencies, and evaluate such accruals and contingencies for each reporting period. Accordingly, estimated losses from loss contingencies are accrued by a charge to income when information available prior to issuance of the financial statements indicates that it is probable that a liability could be incurred and the amount of the loss can be reasonably estimated. Legal expenses associated with the contingency are expensed as incurred. If a loss contingency is not probable or reasonably estimable, disclosure of the loss contingency is made in the financial statements when it is at least reasonably possible that a material loss could be incurred.

Rio Grande Silver Guaranty

Our wholly-owned subsidiary, Rio Grande Silver Inc. (“Rio”), is party to a joint venture with Emerald Mining & Leasing, LLC (“EML”) and certain other parties with respect to a land package in the Creede Mining District of Colorado that is adjacent to other land held by Rio. Rio holds a 70% interest in the joint venture. In connection with the joint venture, we are required to guarantee certain environmental remediation-related obligations of EML to a third party up to a maximum liability to us of $2.5 million. As of March 31, 2015, we have not been required to make any payments pursuant to the guaranty. We may be required to make payments in the future, limited to the $2.5 million maximum liability, should EML fail to meet its obligations to the third party. However, to the extent that any payments are made by us under the guaranty, EML, in addition to other parties, have jointly and severally agreed to reimburse and indemnify us for any such payments. We have not recorded a liability relating to the guaranty as of March 31, 2015.

Table Of Contents

Lucky Friday Water Permit Matters

Over the last several years, the Lucky Friday unit has experienced several regulatory issues relating to its water discharge permits and water management more generally.

- In late 2008 and early 2009, Hecla Limited experienced a number of alleged permit exceedances for water discharges at the Lucky Friday unit. These alleged violations resulted in Hecla Limited entering into a Consent Agreement and Final Order ("CAFO") and a Compliance Order with the EPA in April 2009, which included an extended compliance timeline. In connection with the CAFO, Hecla Limited paid the maximum administrative penalty to the EPA of $177,500 to settle any liability for such alleged exceedances.

- In 2009, additional alleged permit exceedances for water discharges at the Lucky Friday unit occurred. In 2010, alleged unpermitted discharges of pollutants occurred at the Lucky Friday unit. These alleged permit exceedances and certain alleged unpermitted discharges were the subject of a December 2010 notice of violation ("2010 NOV") from the EPA informing Hecla Limited that the EPA was prepared to seek civil penalties for these alleged violations. Hecla Limited disputes many of EPA's assertions, but commenced negotiations with the EPA in 2010 in an attempt to resolve the matter. There has not yet been any resolution of the 2010 NOV.

- In 2012, the Lucky Friday unit had two weekly water samples, one of which exceeded the permit concentration limit for lead (but not the associated load limit), and one of which exceeded the permit limits for zinc. Also, in late 2012, heavy rains resulted in alleged impacted storm water being discharged to a nearby river. After these incidents, in February 2013, the EPA issued a notice of violation and request for information to Hecla Limited alleging that the two storm water incidents were each a violation of Hecla Limited's storm water permit. In March 2014, the Lucky Friday unit had a weekly water sample which exceeded the maximum daily permitted concentration limit for zinc (but not the associated load limit).

The EPA referred the two alleged 2012 permit exceedances, along with the alleged violations in the 2010 NOV and some additional alleged unpermitted discharges from 2010 that were not included in the 2010 NOV, to the U.S. Department of Justice to possibly file a civil complaint by the United States against Hecla Limited. In addition, it is possible that the United States may include other alleged unpermitted discharges (including the 2012 storm water incidents) or permit violations in any complaint. There is the potential for larger civil penalties in the context of a United States complaint than in an administrative action by the EPA such as the 2009 CAFO.

In December 2013, the EPA issued to Hecla Limited a notice of violation ("2013 NOV") alleging certain storm water reporting violations under Lucky Friday's Clean Water Act Multi-Sector General Stormwater Permit for Industrial Activities. The 2013 NOV also contained a request for information under Section 308 of the Clean Water Act directing Hecla Limited to undertake a comprehensive groundwater investigation of Lucky Friday's tailings pond no. 3 to evaluate whether the pond is causing the discharge of pollutants via seepage to groundwater that is discharging to

surface water. We cannot ascertain what impacts, if any, the 2013 NOV and request for information will have on the matters that were already pending with the United States, including the 2010 NOV.

Hecla Limited strives to maintain its water discharges at the Lucky Friday unit in full compliance with its permits and applicable laws; however, we cannot provide assurance that in the future it will be able to fully comply with the permit limits and other regulatory requirements regarding water management.

Table Of Contents

We believe that it is reasonably possible that Hecla Limited faces some liability for the above water issues; however, we cannot with reasonable certainty estimate the amount or range of any such liability because, among other reasons, we have not completed the investigation called for by the request for information contained in the 2013 NOV, and thus we do not know what the impact of the investigation will be.

Johnny M Mine Area near San Mateo, McKinley County, New Mexico

In May 2011, the EPA made a formal request to Hecla Mining Company for information regarding the Johnny M Mine Area near San Mateo, McKinley County, New Mexico, and asserted that Hecla Mining Company may be responsible under CERCLA for environmental remediation and past costs the EPA has incurred at the site. Mining at the Johnny M was conducted for a limited period of time by a predecessor of our subsidiary, Hecla Limited. In August 2012, Hecla Limited and the EPA entered into a Settlement Agreement and Administrative Order on Consent for Removal Action (“Consent Decree”), pursuant to which Hecla Limited agreed to pay (i) $1.1 million to the EPA for its past response costs at the site and (ii) any future response costs at the site, in exchange for a covenant not to sue by the EPA. Hecla Limited paid the $1.1 million to the EPA for its past response costs in the fourth quarter of 2012 and in December 2014, submitted to EPA the Engineering Evaluation and Cost Analysis (“EE/CA”) for the site. The EE/CA evaluates three alternative response actions: 1) no action, 2) off-site disposal, and 3) on-site disposal. The range in estimated costs of these alternatives is $0 to $221 million, and in the EE/CA, Hecla Limited recommends that EPA approve on-site disposal, which is currently estimated to cost $5.6 million, on the basis that such alternative is the most appropriate response action under CERCLA. There is no guarantee EPA will select this alternative. The EPA must review and approve the EE/CA, including the response action alternatives, after which the approved response action will be implemented by Hecla Limited. Based on the foregoing, we believe it is probable that Hecla Limited will incur a liability for remediation at the site, and our best estimate of that liability as of the date of this report is $5.6 million. There can be no assurance that Hecla Limited’s liability will not be more than $5.6 million, or that its ultimate liability will not have a material adverse effect on Hecla Limited’s or our results from operations or financial position.

Carpenter Snow Creek Site, Cascade County, Montana

In July 2010, the EPA made a formal request to Hecla Mining Company for information regarding the Carpenter Snow Creek Superfund Site located in Cascade County, Montana. The Carpenter Snow Creek Site is located in a historic mining district, and in the early 1980s Hecla Limited leased 6 mining claims and performed limited exploration activities at the site. Hecla Limited terminated the mining lease in 1988.

In June 2011, the EPA informed Hecla Limited that it believes Hecla Limited, among several other viable companies, may be liable for cleanup of the site or for costs incurred by the EPA in cleaning up the site. The EPA stated in the June 2011 letter that it has incurred approximately $4.5 million in response costs and estimated that total remediation costs may exceed $100 million. Hecla Limited cannot with reasonable certainty estimate the amount or range of

liability, if any, relating to this matter because of, among other reasons, the lack of information concerning the site.

South Dakota and Colorado Superfund Sites Related to CoCa Mines, Inc.

In 1991, Hecla Limited acquired all of the outstanding common stock of CoCa Mines, Inc. ("CoCa"). CoCa is alleged to have current or prior ownership interests, and engaged in exploration activities, at each of Gilt Edge Mine in South Dakota and in the area adjacent to the Nelson Tunnel property in Creede, Colorado.

Gilt Edge Mine Superfund Site

In August 2008, the EPA made a formal request to CoCa for information regarding the Gilt Edge Mine Site located in Lawrence County, South Dakota, and asserted that CoCa may be liable for environmental cleanup at the site. The Gilt Edge Mine Site was explored and/or mined beginning in the 1870s. Beginning in the mid-1970s, CoCa held property interests at the site (primarily in the form of mining claims), and was party to an agreement with another mining company (the "operator") that conducted a limited program of exploration work at the site. The two companies assigned the right to mine in 1983 to a third mining company, and by 1986 CoCa had divested itself of any property interests at the site.

Table Of Contents

In July 2010, the United States informed CoCa that it intended to pursue CoCa and other potentially responsible parties ("PRPs") on a strict, joint and several basis under CERCLA for liability for past and future response costs incurred at Gilt Edge. Currently, the United States alleges that CoCa is liable based on its historical relationship to the site, and that CoCa has succeeded to the liabilities of one or more predecessor entities that may have held certain property interests at the site. Most of the other viable PRPs have settled with the United States. The operator of the exploration effort to which CoCa was a party settled for $26 million, while the third mining company referred to above settled for $4.2 million.

The United States alleges that estimated total costs associated with the site may exceed $225 million, including both past and future response costs. We believe that it is reasonably possible that CoCa faces some liability under CERCLA based on its historical ownership interests at the site; however, we cannot with reasonable certainty estimate the amount or range of any such liability. Furthermore, in the event CoCa incurs a liability at this site, it has limited assets with which to satisfy any claim. Because of this, we believe that it is possible that the United States will seek to recover some of the alleged $225 million in costs associated with the site from Hecla Limited, as the sole stockholder of CoCa. However, we believe Hecla Limited has strong defenses and would vigorously defend against any such claim. For example, Hecla Limited did not acquire CoCa until 1991, well after CoCa discontinued its involvement with the Gilt Edge site. In addition, CoCa is and always has been a separate corporate entity from Hecla Limited. Therefore, we believe that Hecla Limited is not liable for any claims at the Gilt Edge site.

Settlement negotiations with the United States commenced in 2010 and are ongoing. Because of the unpredictability of settlement negotiations or the outcome of any trial, as well as the nature of CERCLA as a strict, joint and several liability statute, we cannot with reasonable certainty estimate the amount or range of liability faced by CoCa or Hecla Limited. Furthermore, there can be no assurance settlement negotiations will be successful, or that Hecla Limited will not incur a material liability with respect to this site.

Nelson Tunnel/Commodore Waste Rock Pile Superfund Site

In August 2009, the EPA made a formal request to CoCa for information regarding the Nelson Tunnel/Commodore Waste Rock Pile Superfund Site in Creede, Colorado. CoCa was involved in exploration and mining activities in Creede during the 1970s and the 1980s. In October 2013, the EPA made a formal claim against CoCa for past response costs under CERCLA as an owner/operator of the site, and against Hecla Limited as a corporate successor to CoCa. The EPA is seeking a total of approximately $5 million for past response costs, plus an undetermined amount of interest from CoCa, Hecla Limited, and other PRPs. The EPA stated that it is continuing its remedial investigation/feasibility study at the site, and once that is complete, it will begin remedial design and remedial action for the site. Presumably, the EPA will also seek reimbursement of at least some of those costs from viable PRPs. In April 2014, CoCa received notice from another PRP alleging that CoCa is required to indemnify it in connection with any liability it may have with respect to the Nelson/Commodore site. We believe that it is reasonably possible that CoCa faces some liability under CERCLA based on its historical ownership interests at the site. However, in the event CoCa incurs a liability for this site, it has limited assets with which to satisfy any claim. Because of this, we believe

that it is possible that the United States will seek to recover some of the costs associated with the site from Hecla Limited, as the sole stockholder of CoCa. However, we believe Hecla Limited would have strong defenses to such a claim and would vigorously defend against any such claim. For example, Hecla Limited did not acquire CoCa until 1991, well after CoCa discontinued its historical activities in the vicinity of the site. In addition, CoCa is and always has been a separate corporate entity from Hecla Limited. Therefore, we believe that Hecla Limited is not liable for any claims at this site.

Settlement negotiations with the United States commenced in 2014 and are ongoing. We cannot with reasonable certainty estimate the amount or range of any liability CoCa or Hecla Limited may have because, among other things, there is little information known on EPA's remediation plans for the site, as well as the unpredictability of settlement negotiations or the outcome of any trial. Thus, there can be no assurance that Hecla Limited will not incur a material liability with respect to this site.

Table Of Contents

Senior Notes

On April 12, 2013, we completed an offering of $500 million aggregate principal amount of 6.875% Senior Notes ("Notes") due 2021. The net proceeds from the offering of the Notes were used to partially fund the acquisition of Aurizon Mines Ltd. ("Aurizon") and for general corporate purposes, including expenses related to the Aurizon acquisition. In 2014, we completed additional issuances of our Notes in the aggregate principal amount of $6.5 million, which were contributed to our pension plan to satisfy the funding requirement for 2014. Interest on the Notes is payable on May 1 and November 1 of each year, commencing November 1, 2013. See *Note 9* for more information.

Other Commitments

Our contractual obligations as of March 31, 2015 included approximately $4.0 million for various non-capital costs. In addition, our open purchase orders at March 31, 2015 included approximately $0.5 million, $2.2 million, and $0.8 million, respectively, for various capital items at the Greens Creek, Lucky Friday, and Casa Berardi units, and approximately $8.8 million, $1.3 million and $0.3 million, for various non-capital costs at the Greens Creek, Lucky Friday and Casa Berardi units. We also have total commitments of approximately $22.7 million relating to scheduled payments on capital leases, including interest, primarily for equipment at our Greens Creek, Lucky Friday and Casa Berardi units (see *Note 9* for more information).

See *Note 13* for a discussion of our commitment, upon satisfaction of certain conditions, to close the proposed acquisition of Revett Mining Company and issue shares of our common stock as consideration.

As part of our ongoing business and operations, we are required to provide surety bonds and bank letters of credit for various purposes, including financial support for environmental reclamation obligations and workers compensation programs. As of March 31, 2015, we had surety bonds totaling $68.9 million in place as financial support for future reclamation and closure of the Greens Creek mine. In addition, we had letters of credit for approximately $7.9 million outstanding as of December 31, 2014 for environmental reclamation and workers' compensation insurance bonding. The obligations associated with these instruments are generally related to performance requirements that we address through ongoing operations. As the requirements are met, the beneficiary of the associated instruments cancels or returns the instrument to the issuing entity. Certain of these instruments are associated with operating sites with long-lived assets and will remain outstanding until closure of the sites. We believe we are in compliance with all applicable bonding and will be able to satisfy future bonding requirements as they arise.

Other Contingencies

In March 2012, Hecla Limited received notice of a complaint filed against it by the United Steel Workers, Local 5114, with the Federal Mine Safety and Health Review Commission ("FMSHRC") for compensation for bargaining unit workers at the Lucky Friday mine idled as a result of the temporary suspension of production at the mine. The complaint alleged the bargaining unit workers were entitled to compensation under Section 111 of the Federal Mine Safety and Health Act of 1977 the "Mine Act") from November 16, 2011 - the date an order was issued by the Mine Safety Health Administration (“MSHA”) to Hecla Limited - until June 12, 2013 - the date the order was terminated. On February 4, 2015, the judge hearing the case issued an Order finding the applicable period of time for compensation under Section 111 of the Mine Act to be approximately 8 days and the compensation owed to the employees to be approximately $13,000, plus interest. On March 4, 2015, the Union filed an appeal for discretionary review with the FMSHRC. On March 12, 2015, the FMSHRC issued a notice granting discretionary review. We believe the claim is without merit, and that all wages due under Section 111, which was an immaterial amount, have already been paid. Therefore, we have not recorded a liability relating to the claim as of March 31, 2015. The value of the union's claim is estimated to be in the range of $0 to $10 million.

Table Of Contents

On April 12, 2013, the family of Larry Marek, an employee of Hecla Limited who was fatally injured in an April 2011 accident, filed a lawsuit against us and certain of our officers and employees seeking damages for, among other claims, wrongful death and infliction of emotional distress. No dollar amount of damages is specified in the complaint, which was filed in state court in Idaho (Kootenai County District Court). We cannot reasonably predict the outcome of this matter, however, we believe the case is without merit and are vigorously defending this lawsuit. On April 21, 2015, the judge hearing the case granted Hecla's motion for summary judgment and dismissed the case. The plaintiffs have an opportunity to appeal the decision. As of the date of this report, no such appeal has been filed. On April 29, 2015, the plaintiffs filed a motion with the court seeking to reconsider the summary judgment decision in light of a recent decision by the FMSHRC upholding two orders and one citation issued to Hecla Limited that relate to the same April 2011 accident.

On December 11, 2013, four employees of Hecla Limited who were injured in a December 2011 rock burst filed a lawsuit against us and certain of our employees seeking damages for, among other claims, intentional and willful injury and infliction of emotional distress. The plaintiffs seek damages in excess of $1,000,000, as claimed in the complaint, which was filed in state court in Idaho (Kootenai County District Court). We cannot reasonably predict the outcome of this matter, however, we believe the case is without merit and intend to vigorously defend this lawsuit.

We also have certain other contingencies resulting from litigation, claims, EPA investigations, and other commitments and are subject to a variety of environmental and safety laws and regulations incident to the ordinary course of business. We currently expect that the resolution of such contingencies will not materially affect our financial position, results of operations or cash flows. However, in the future, there may be changes to these contingencies, and additional contingencies may occur as well, any of which might result in an accrual or a change in the estimated accruals recorded by us, and there can be no assurance that their ultimate disposition will not have a material adverse effect on our financial position, results of operations or cash flows.

Note 5. Earnings Per Common Share

We are authorized to issue 500,000,000 shares of common stock, $0.25 par value per share. At March 31, 2015, there were 372,426,357 shares of our common stock issued and 2,433,518 shares issued and held in treasury, for a net of 369,992,839 shares outstanding.

The following table reconciles weighted average common shares used in the computations of basic and diluted earnings per share for the three-month periods ended March 31, 2015 and 2014 (thousands, except per-share amounts):

	Three Months Ended	
	March 31,	
	2015	2014
Numerator		
Net income	$12,552	$11,641
Preferred stock dividends	(138)	(138)
Net income applicable to common shares for basic and diluted earnings per share	$12,414	$11,503
Denominator		
Basic weighted average common shares	368,789	342,666
Dilutive stock options and restricted stock	902	7,352
Diluted weighted average common shares	369,691	350,018
Basic earnings per common share		
Net income applicable to common shares	$0.03	$0.03
Diluted earnings per common share		
Net income applicable to common shares	$0.03	$0.03

Table Of Contents

Diluted income per share for the three months ended March 31, 2015 and 2014 excludes the potential effects of outstanding shares of our convertible preferred stock, as their conversion and exercise would have no effect on the calculation of dilutive shares.

Options to purchase 244,342 shares of our common stock were excluded from the computation of diluted earnings per share for the three-month period ended March 31, 2015. For the three-month period ended March 31, 2014, options to purchase 612,745 shares of our common stock were excluded from the computation of diluted earnings per share. In each case, the exercise price of the options not included in the computations of diluted earnings per share exceeded the average price of our stock during those periods and therefore would not affect the calculation of earnings per share.

Note 6. Business Segments

We are currently organized and managed in three reporting segments: the Greens Creek unit, the Lucky Friday unit and the Casa Berardi unit.

General corporate activities not associated with operating units and their various exploration activities, as well as discontinued operations and idle properties, are presented as "other." Interest expense, interest income and income taxes are considered general corporate items, and are not allocated to our segments.

The following tables present information about reportable segments for the three months ended March 31, 2015 and 2014 (in thousands):

	Three Months Ended	
	March 31,	
	2015	2014
Net sales to unaffiliated customers:		
Greens Creek	$67,355	$63,596
Lucky Friday	19,891	20,096
Casa Berardi	31,846	42,095
	$119,092	$125,787
Income (loss) from operations:		
Greens Creek	$14,693	$11,046
Lucky Friday	3,546	4,700
Casa Berardi	(765)	3,441

Other	(12,552)	(11,276)
	$4,922	$7,911

The following table presents identifiable assets by reportable segment as of March 31, 2015 and December 31, 2014 (in thousands):

	March 31, 2015	December 31, 2014
Identifiable assets:		
Greens Creek	$704,348	$704,121
Lucky Friday	369,503	356,482
Casa Berardi	789,989	800,961
Other	396,111	400,500
	$2,259,951	$2,262,064

Table Of Contents

Note 7. Employee Benefit Plans

We sponsor defined benefit pension plans covering substantially all U.S. employees. Net periodic pension cost for the plans consisted of the following for the three months ended March 31, 2015 and 2014 (in thousands):

	Three Months Ended March 31,	
	2015	2014
Service cost	$1,054	$1,020
Interest cost	1,206	1,186
Expected return on plan assets	(1,345)	(1,249)
Amortization of prior service benefit	(84)	(84)
Amortization of net loss	1,065	756
Net periodic benefit cost	$1,896	$1,629

In January 2015, we contributed approximately $5.0 million in shares of our common stock to our defined benefit plans, with no additional contributions anticipated in 2015. We expect to contribute approximately $0.4 million to our unfunded supplemental executive retirement plan during 2015.

Note 8. Stockholders' Equity

Share-based Compensation Plans

We periodically grant restricted stock unit awards and/or shares of common stock to our employees and directors. Grants to individual executives upon hiring or retention vest over a defined service period, with cost amortized over that period. We measure compensation cost for restricted stock units and stock grants at the closing price of our stock at the time of grant. Restricted stock unit grants vest after a specified period with compensation cost amortized over that period. Although we have no current plans to issue stock options, we have in the past and may do so in the future.

On March 5, 2015, the Board of Directors granted 911,148 shares of common stock to employees for payment of annual and long-term incentive compensation for the period ended December 31, 2014. The shares were distributed in March 2015, and the $3.0 million in expense related to the stock awards has been recognized as of March 31, 2015.

Stock-based compensation expense recorded in the first three months of both 2015 and 2014 totaled $1.1 million and was related to amortization of restricted stock unit grants to employees in prior periods.

In connection with the vesting of restricted stock units or other issuances of common stock to employees as compensation, employees have in the past, at their election and when permitted by us, chosen to satisfy their tax withholding obligations through net share settlement, pursuant to which the Company withholds the number of shares necessary to satisfy such withholding obligations. Pursuant to such net settlements, in the first quarter of 2015 we repurchased 284,243 shares for approximately $941,000, or approximately $3.31 per share.

Table Of Contents

Common Stock Dividends

In September 2011 and February 2012, our Board of Directors adopted a common stock dividend policy that has two components: (1) a dividend that links the amount of dividends on our common stock to our average quarterly realized silver price in the preceding quarter, and (2) a minimum annual dividend of $0.01 per share of common stock, in each case, payable quarterly, when and if declared by the Board. For illustrative purposes only, the table below summarizes potential per share dividend amounts at different quarterly average realized price levels according to the first component of the policy:

Quarterly average realized silver price per ounce	Quarterly dividend per share	Annualized dividend per share
$30	$0.01	$0.04
$35	$0.02	$0.08
$40	$0.03	$0.12
$45	$0.04	$0.16
$50	$0.05	$0.20
$55	$0.06	$0.24
$60	$0.07	$0.28

On May 6, 2015, our Board of Directors declared a dividend on common stock, pursuant to the minimum annual dividend component of the policy described above, of $0.0025 per share, for a total dividend of $0.9 million payable in June 2015. Because the average realized silver price for the first quarter of 2015 was $17.18 per ounce, below the minimum threshold of $30 according to the policy, no silver-price-linked component was declared or paid. The declaration and payment of common stock dividends is at the sole discretion of our Board of Directors.

Common Stock Repurchase Program

On May 8, 2012, we announced that our Board of Directors approved a stock repurchase program. Under the program, we are authorized to repurchase up to 20 million shares of our outstanding common stock from time to time in open market or privately negotiated transactions, depending on prevailing market conditions and other factors. The repurchase program may be modified, suspended or discontinued by us at any time. Whether or not to engage in repurchases from time to time may depend on a variety of factors, including not only price and cash resources, but customary black-out restrictions, whether we have any material inside information, limitations on share repurchases or cash usage that may be imposed by our credit agreement or in connection with issuances of securities, alternative uses for cash, applicable law, and other investment opportunities from time to time. As of March 31, 2015, 934,100 shares have been purchased in prior periods at an average price of $3.99 per share, leaving 19.1 million shares that may yet be purchased under the program. The closing price of our common stock at May 5, 2015, was $3.01 per share.

Note 9. Senior Notes, Credit Facilities and Capital Leases

Senior Notes

On April 12, 2013, we completed an offering of $500 million in aggregate principal amount of our Senior Notes due May 1, 2021, and in 2014, an additional $6.5 million aggregate principal amount of the Notes was issued to our pension plan in order to satisfy the funding requirement for 2014 (collectively, the “Notes”). The Notes are governed by the Indenture, dated as of April 12, 2013, as amended (the “Indenture”), among Hecla Mining Company ("Hecla") and certain of our subsidiaries and The Bank of New York Mellon Trust Company, N.A., as trustee. The net proceeds from the initial offering of the Notes ($490 million) were used to partially fund the acquisition of Aurizon and for general corporate purposes, including expenses related to the Aurizon acquisition.

Table Of Contents

The Notes are recorded net of a 2% initial purchaser discount totaling $10 million at the time of the April 2013 issuance and having an unamortized balance of $7.7 million as of March 31, 2015. The Notes bear interest at a rate of 6.875% per year from the date of original issuance or from the most recent payment date on which interest has been paid or provided for. Interest on the Notes is payable on May 1 and November 1 of each year, commencing November 1, 2013. During the first quarter of 2015 and 2014, interest expense related to the Notes and amortization of the initial purchaser discount and fees related to the issuance of the Notes, net of $3.3 million and $2.7 million, respectively, in capitalized interest, totaled $5.7 million and $6.3 million, respectively.

The Notes are guaranteed on a senior unsecured basis by certain of our subsidiaries (the "Guarantors"). The Notes and the guarantees are, respectively, Hecla's and the Guarantors' general senior unsecured obligations and are subordinated to all of Hecla's and the Guarantors' existing and future secured debt to the extent of the assets securing that secured debt. In addition, the Notes are effectively subordinated to all of the liabilities of Hecla's subsidiaries that are not guaranteeing the Notes, to the extent of the assets of those subsidiaries.

The Notes will be redeemable in whole or in part, at any time and from time to time on or after May 1, 2016, on the redemption dates and at the redemption prices specified in the Indenture, plus accrued and unpaid interest, if any, to the date of redemption. Prior to May 1, 2016, we may redeem some or all of the Notes at a redemption price of 100% of the principal amount, plus accrued and unpaid interest, if any, to the redemption date, plus a “make whole” premium. We may redeem up to 35% of the Notes before May 1, 2016 with the net cash proceeds from certain equity offerings.

Upon the occurrence of a change of control (as defined in the Indenture), each holder of Notes will have the right to require us to purchase all or a portion of such holder's Notes pursuant to a change of control offer (as defined in the Indenture), at a purchase price equal to 101% of the principal amount thereof plus accrued and unpaid interest, if any, to the date of purchase, subject to the rights of holders of the Notes on the relevant record date to receive interest due on the relevant interest payment date.

Table Of Contents

Credit Facilities

In February 2014, we entered into a $100 million senior secured revolving credit facility, which was amended in November 2014 to extend the maturity date to November 18, 2018. The credit facility is collateralized by the shares of common stock held in our material domestic subsidiaries and by our joint venture interests in the Greens Creek mine, all of our rights and interests in the joint venture agreement, and all of our rights and interests in the assets of the joint venture. This credit facility replaced our previous $100 million credit facility which had the same terms of collateral as described above. Below is information on the interest rates, standby fee, and financial covenant terms under our current credit facility:

Interest rates:	
Spread over the London Interbank Offer Rate	2.25 - 3.25%
Spread over alternative base rate	1.25 - 2.25%
Standby fee per annum on undrawn amounts	0.50%
Covenant financial ratios:	
Senior leverage ratio (debt secured by liens/EBITDA)	not more than 2.50:1
Leverage ratio (total debt less unencumbered cash/EBITDA)	not more than 4.00:1
Interest coverage ratio (EBITDA/interest expense)	not more than 3.00:1

We were in compliance with all covenants under the credit agreement and no amounts were outstanding as of March 31, 2015. We have not drawn funds on the current revolving credit facility as of the filing date of this report.

Capital Leases

We have entered into various lease agreements, primarily for equipment at our Greens Creek, Lucky Friday and Casa Berardi units, which we have determined to be capital leases. At March 31, 2015, the total liability balance associated with capital leases, including certain purchase option amounts, was $21.9 million, with $10.3 million of the liability classified as current and the remaining $11.6 million classified as non-current. At December 31, 2014, the total liability balance associated with capital leases was $23.1 million, with $9.5 million of the liability classified as current and $13.7 million classified as non-current. The total obligation for future minimum lease payments was $22.7 million at March 31, 2015, with $1.0 million attributed to interest.

At March 31, 2015, the annual maturities of capital lease commitments, including interest, are (in thousands):

Twelve-month period ending March 31,	
2016	$10,195
2017	6,997
2018	3,821
2019	1,700
Total	22,713
Less: imputed interest	(1,046)
Net capital lease obligation	$21,667

Note 10. Developments in Accounting Pronouncements

In May 2014, the FASB issued ASU No. 2014-09 Revenue Recognition, replacing guidance currently codified in Subtopic 605-10 Revenue Recognition-Overall with various SEC Staff Accounting Bulletins providing interpretive guidance. The guidance establishes a new five step principle-based framework in an effort to significantly enhance comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets. ASU No. 2014-09 is effective for annual and interim reporting periods beginning after December 15, 2016. We are in the process of evaluating this guidance and our method of adoption.

In April 2015, the FASB issued ASU No. 2015-03 Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. The update requires debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of the related debt liability instead of being presented as an asset. Debt disclosures will include the face amount of the debt liability and the effective interest rate. The update requires retrospective application and represents a change in accounting principle. The update is effective for fiscal years beginning after December 15, 2015. ASU No. 2015-03 is not expected to have a material impact on our condensed consolidated financial statements.

Table Of Contents

Note 11. Derivative Instruments

At times, we use commodity forward sales commitments, commodity swap contracts and commodity put and call option contracts to manage our exposure to fluctuation in the prices of certain metals which we produce. Contract positions are designed to ensure that we will receive a defined minimum price for certain quantities of our production, thereby partially offsetting our exposure to fluctuations in the market. These instruments do, however, expose us to (i) credit risk in the event of non-performance by counterparties for contracts in which the contract price exceeds the spot price of a commodity and (ii) price risk to the extent that the spot price exceeds the contract price for quantities of our production covered under contract positions.

We are currently using financially-settled forward contracts to manage the exposure to changes in prices of silver, gold, zinc and lead contained in our concentrate shipments between the time of shipment and final settlement. In addition, we use financially-settled forward contracts to manage the exposure to changes in prices of zinc and lead (but not silver and gold) contained in our forecasted future concentrate shipments. These contracts do not qualify for hedge accounting and are marked-to-market through earnings each period. At March 31, 2015, we recorded the following balances related to these contracts:

- a current asset of $6.8 million which is included in other current assets and is net of $0.9 million in contracts in a fair value current liability position; and
- a non-current asset of $7.5 million which is included in other non-current assets and is net of $0.2 million in contracts in a fair value current liability position.

We recognized a $0.3 million net gain during the first three months of 2015 on the contracts utilized to manage exposure to prices of metals in our concentrate shipments, which is included in sales of products. The net gain recognized on the contracts offsets losses related to price adjustments on our provisional concentrate sales due to changes to silver, gold, lead and zinc prices between the time of sale and final settlement.

We recognized a $5.8 million net gain during the first three months of 2015 on the contracts utilized to manage exposure to prices for forecasted future concentrate shipments, which includes $1.9 million in gains realized on settled contracts. The net gain on these contracts is included as a separate line item under other income (expense), as they relate to forecasted future shipments, as opposed to sales that have already taken place but are subject to final pricing as discussed in the preceding paragraph. The net gain during the first three months of 2015 is the result of decreasing zinc and lead prices. This program is designed to mitigate the impact of potential future declines in lead and zinc prices from the price levels established in the contracts (see average price information below).

18

Table Of Contents

The following tables summarize the quantities of metals committed under forward sales contracts at March 31, 2015 and December 31, 2014:

March 31, 2015	**Ounces/pounds under contract (in 000's)**				**Average price per ounce/pound**			
	Silver (ounces)	**Gold (ounces)**	**Zinc (pounds)**	**Lead (pounds)**	**Silver (ounces)**	**Gold (ounces)**	**Zinc (pounds)**	**Lead (pounds)**
Contracts on provisional sales								
2015 settlements	1,587	6	25,849	8,874	$16.71	$ 1,194	$ 0.94	$ 0.81
Contracts on forecasted sales								
2015 settlements	—	—	27,999	22,487	N/A	N/A	$ 0.95	$ 1.10
2016 settlements	—	—	44,699	34,337	N/A	N/A	$ 0.99	$ 1.03
2017 settlements	—	—	1,984	—	N/A	N/A	$ 1.04	N/A

December 31, 2014	**Ounces/pounds under contract (in 000's)**				**Average price per ounce/pound**			
	Silver (ounces)	**Gold (ounces)**	**Zinc (pounds)**	**Lead (pounds)**	**Silver (ounces)**	**Gold (ounces)**	**Zinc (pounds)**	**Lead (pounds)**
Contracts on provisional sales								
2015 settlements	1,607	6	19,456	8,378	$16.06	$ 1,195	$ 1.01	$ 0.87
Contracts on forecasted sales								
2015 settlements	—	—	46,738	29,652	N/A	N/A	$ 0.96	$ 1.07
2016 settlements	—	—	44,699	34,337	N/A	N/A	$ 0.99	$ 1.03
2017 settlements	—	—	1,984	—	N/A	N/A	$ 1.04	N/A

Our concentrate sales are based on a provisional sales price containing an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of the concentrates at the forward price at the time of the sale. The embedded derivative, which does not qualify for hedge accounting, is marked-to-market through earnings each period prior to final settlement.

Table Of Contents

Note 12. Fair Value Measurement

The table below sets forth our assets and liabilities that were accounted for at fair value on a recurring basis and the fair value calculation input hierarchy level that we have determined applies to each asset and liability category (in thousands).

Description	Balance at March 31, 2015	Balance at December 31, 2014	Input Hierarchy Level
Assets:			
Cash and cash equivalents:			
Money market funds and other bank deposits	$196,231	$209,665	Level 1
Available for sale securities:			
Equity securities – mining industry	4,334	4,920	Level 1
Trade accounts receivable:			
Receivables from provisional concentrate sales	27,280	17,696	Level 2
Restricted cash balances:			
Certificates of deposit and other bank deposits	883	883	Level 1
Derivative contracts:			
Metal forward contracts	14,317	11,347	Level 2
Total assets	$243,045	$244,511	

Cash and cash equivalents consist primarily of money market funds and are valued at cost, which approximates fair value.

Current and non-current restricted cash balances consist primarily of certificates of deposit and U.S. Treasury securities and are valued at cost, which approximates fair value.

Our current and non-current investments consist of marketable equity securities which are valued using quoted market prices for each security.

Trade accounts receivable include amounts due to us for shipments of concentrates and doré sold to customers. Revenues and the corresponding accounts receivable for sales of concentrates and doré are recorded when title and risk of loss transfer to the customer (generally at the time of loading on truck or ship). Sales of concentrates

are recorded using estimated forward prices for the anticipated month of settlement applied to our estimate of payable metal quantities contained in each shipment. Sales are recorded net of estimated treatment and refining charges, which are also impacted by changes in metals prices and quantities of contained metals. We estimate the prices at which sales of our concentrates will be settled due to the time elapsed between shipment and final settlement with the customer. Receivables for previously recorded concentrate sales are adjusted to reflect estimated forward metals prices at the end of each period until final settlement by the customer. We obtain the forward metals prices used each period from a pricing service. Changes in metals prices between shipment and final settlement result in changes to revenues previously recorded upon shipment. The embedded derivative contained in our concentrate sales is marked-to-market through earnings each period prior to final settlement.

We utilize financially-settled forward contracts to manage the exposure to changes in prices of silver, gold, zinc and lead contained in our concentrate shipments that have not reached final settlement. We also utilize financially-settled forward contracts to manage the exposure to changes in prices of zinc and lead contained in our forecasted future concentrate shipments. See *Note 11* for more information. These contracts do not qualify for hedge accounting, and are marked-to-market through earnings each period. The fair value of each contract represents the difference between the forward metal price for the contract settlement period as of the measurement date and the contract settlement metal price, multiplied by the quantity of metal involved in the contract.

Our Senior Notes issued in April 2013, which were recorded at their carrying value of $498.8 million, net of unamortized initial purchaser discount at March 31, 2015, had a fair value of $445.3 million at March 31, 2015. Quoted market prices, which we consider to be Level 1 inputs, are utilized to estimate fair values of the Notes. See *Note 9* for more information.

Table Of Contents

Note 13. Proposed Merger with Revett

On March 26, 2015, we and Revett Mining Company, Inc. (Revett) entered into a merger agreement pursuant to which we would acquire all of the issued and outstanding common stock of Revett. Revett holds 100% ownership of two properties in Northwest Montana: the Troy Mine, which is currently on care-and-maintenance, and the Rock Creek project, a significant undeveloped silver and copper deposit. In the proposed merger, each outstanding common share of Revett would be exchanged for 0.1622 of a share of our common stock, which have an estimated value of $0.52 per Revett common share based on the closing price of Hecla's common stock of $3.23 per share on March 25, 2015, the last full day before the merger agreement was entered into. The actual value of consideration transferred will be based on the market price of Hecla's common stock on the date the merger is consummated. Based on the closing price of Hecla stock of $3.01 per share on May 5, 2015, total consideration would be $18.8 million. A 10% change in the price per share of Hecla stock from its closing price on May 5, 2015 would result in a $1.9 million change in the amount of consideration transferred in the merger. Estimated consideration is based on Revett having 38,548,989 outstanding common shares, excluding 725,000 shares owned by our wholly-owned subsidiary which would be canceled in the merger. All consideration given to Revett stockholders will be in newly issued Hecla stock. The proposed merger is subject to approval by Revett's stockholders. No assurance can be given as to whether the merger will be approved and consummated.

In April 2015, we entered into a term loan and security agreement with Revett pursuant to which we agreed to provide one or more secured loans to Revett in an aggregate amount not to exceed $1.5 million. The loans bear interest at a rate per annum equal to LIBOR plus 5% and will be due and payable on July 1, 2015. The loans are secured by certain real estate holdings of Revett's subsidiary, Revett Holdings, Inc., and the equity interests in Revett Holdings, Inc.

Note 14. Guarantor Subsidiaries

Presented below are Hecla’s unaudited interim condensed consolidating financial statements as required by Rule 3-10 of Regulation S-X of the Securities Exchange Act of 1934, as amended, resulting from the guarantees by certain of Hecla's subsidiaries (the "Guarantors") of the Notes (see *Note 9* for more information). The Guarantors consist of the following of Hecla's 100%-owned subsidiaries: Hecla Limited; Silver Hunter Mining Company; Rio Grande Silver, Inc.; RHL Holdings, Inc.; Hecla MC Subsidiary, LLC; Hecla Silver Valley, Inc.; Burke Trading, Inc.; Hecla Alaska LLC; Hecla Greens Creek Mining Company; Hecla Admiralty Company; and Hecla Juneau Mining Company. We completed the initial offering of the Notes on April 12, 2013, and a related exchange offer for virtually identical notes registered with the SEC on January 3, 2014.

The unaudited interim condensed consolidating financial statements below have been prepared from our financial information on the same basis of accounting as the unaudited interim consolidated financial statements. Investments in the subsidiaries are accounted for under the equity method. Accordingly, the entries necessary to consolidate Hecla, the Guarantors, and Non-Guarantors are reflected in the intercompany eliminations column. In the course of preparing consolidated financial statements, we eliminate the effects of various transactions conducted between Hecla's subsidiaries. While valid at an individual subsidiary level, such activities are eliminated in consolidation because, when taken as a whole, they do not represent business activity with third-party customers, vendors, and other parties. Examples of such eliminations include the following:

- ***Investments in subsidiaries***. The acquisition of a company results in an investment on the records of the parent company and a contribution of capital on the records of the subsidiary. Such investments and capital contributions are eliminated in consolidation.

- ***Capital contributions***. Certain of Hecla's subsidiaries do not generate cash flow, either at all or sufficient to meet their capital needs, and their cash requirements are routinely met with inter-company advances from their parent companies. On an annual basis, the boards of directors of such parent companies declare contributions of capital to their subsidiary companies, which increase the parents' investment and the subsidiaries' additional paid-in capital. In consolidation, investments in subsidiaries and related additional paid-in capital are eliminated.

Table Of Contents

- ***Dividends.*** Certain of Hecla's subsidiaries which generate cash flow routinely provide cash to their parent companies through inter-company transfers. On an annual basis, the boards of directors of such subsidiary companies declare dividends to their parent companies, which reduces the subsidiaries' retained earnings and increases the parents' dividend income. In consolidation, such activity is eliminated.

- ***Debt.*** Inter-company debt agreements have been established between certain of Hecla's subsidiaries and their parents. The related debt liability and receivable balances, accrued interest expense and income activity, and payments of principal and accrued interest amounts by the subsidiary companies to their parents are eliminated in consolidation.

- ***Deferred taxes***. Our ability to realize deferred tax assets and liabilities is considered on a consolidated basis for subsidiaries within the United States, with all subsidiaries' estimated future taxable income contributing to the ability to realize all such assets and liabilities. However, when Hecla's subsidiaries are viewed independently, we use the separate return method to assess the realizability of each subsidiary's deferred tax assets and whether a valuation allowance is required against such deferred tax assets. In some instances, a parent company or subsidiary may possess deferred tax assets whose realization depends on the future taxable incomes of other subsidiaries on a consolidated-return basis, but would not be considered realizable if such parent or subsidiary filed on a separate stand-alone basis. In such a situation, a valuation allowance is assessed on that subsidiary's deferred tax assets, with the resulting adjustment reported in the eliminations column of the guarantor and parent's financial statements, as is the case in the unaudited interim financial statements set forth below. The separate return method can result in significant eliminations of deferred tax assets and liabilities and related income tax provisions and benefits. Non-current deferred tax asset balances are included in other non-current assets on the condensed consolidating balance sheets and make up a large portion of that item, particularly for the guarantor balances.

Separate financial statements of the Guarantors are not presented because the guarantees by the Guarantors are joint and several and full and unconditional, except for certain customary release provisions, including: (1) the sale or disposal of all or substantially all of the assets of the Guarantor; (2) the sale or other disposition of the capital stock of the Guarantor; (3) the Guarantor is designated as an unrestricted entity in accordance with the applicable provisions of the indenture; (4) Hecla ceases to be a borrower as defined in the indenture; and (5) upon legal or covenant defeasance or satisfaction and discharge of the indenture.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Certain statements contained in this Form 10-Q, including in Management's Discussion and Analysis of Financial Condition and Results of Operations and Quantitative and Qualitative Disclosure About Market Risk, are intended to be covered by the safe harbor provided for under Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Our forward-looking statements include our current expectations and projections about future results, performance, results of litigation, prospects and opportunities, including reserves and other mineralization. We have tried to identify these forward-looking statements by using words such as "may," "will," "expect," "anticipate," "believe," "intend," "feel," "plan," "estimate," "project," "forecast" and similar expressions. These forward-looking statements are based on information currently available to us and are expressed in good faith and believed to have a reasonable basis. However, our forward-looking statements are subject to a number of risks, uncertainties and other factors that could cause our actual results, performance, prospects or opportunities to differ materially from those expressed in, or implied by, these forward-looking statements.

These risks, uncertainties and other factors include, but are not limited to, those set forth under Part I, Item 1A – Business – Risk Factors in this Form 10-Q and in our annual report filed on Form 10-K for the year ended December 31, 2014. Given these risks and uncertainties, readers are cautioned not to place undue reliance on our forward-looking statements. All subsequent written and oral forward-looking statements attributable to Hecla Mining Company or to persons acting on our behalf are expressly qualified in their entirety by these cautionary statements. Except as required by federal securities laws, we do not intend to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Overview

Hecla Mining Company and our subsidiaries have provided precious and base metals to the U.S. and worldwide since 1891. We discover, acquire, develop, and produce silver, gold, lead and zinc.

We produce lead, zinc and bulk concentrates, which we sell to custom smelters and brokers, and unrefined bullion bars (doré) containing gold and silver, which are further refined before sale to precious metals traders. We are organized and managed in three segments that encompass our operating units: the Greens Creek, Lucky Friday, and Casa Berardi units. The map below shows the locations of our operating units and our exploration and pre-development projects, as well as our corporate offices located in Coeur d'Alene, Idaho and Vancouver, British Columbia.

27

Table Of Contents

Our current business strategy is to focus our financial and human resources in the following areas:

- operating our properties safely, in an environmentally responsible manner, and cost-effectively;
- continue optimizing and improving operations at our Greens Creek, Lucky Friday, and Casa Berardi units;
- expanding our proven and probable reserves and production capacity at our operating properties;
- conducting our business with financial stewardship to preserve our financial position in varying metals price environments;
- continuing to advance our San Sebastian project in Mexico through additional drilling and a preliminary economic study with the goal of reaching a development decision in 2015;
- maintaining and investing in exploration and pre-development projects in the vicinities of five mining districts we believe to be under-explored and under-invested: North Idaho's Silver Valley in the historic Coeur d'Alene Mining District; our Greens Creek unit on Alaska's Admiralty Island located near Juneau; the silver-producing district near Durango, Mexico; the Abitibi region of north-western Quebec, Canada; and the Creede district of Southwestern Colorado; and
- continuing to seek opportunities to acquire and invest in mining properties and companies, including our proposed merger with Revett Mining Company announced in March 2015 and minority investments in certain exploration stage companies.

A number of key factors may impact the execution of our strategy, including regulatory issues and metals prices. Metals prices can be very volatile. As discussed in the *Critical Accounting Estimates* section below, metals prices are influenced by a number of factors beyond our control. Average market prices of silver, gold, and lead in the first three months of 2015 were lower than their levels from the comparable period last year, while average zinc prices were slightly higher, as illustrated by the table in *Results of Operations* below. While we believe current global economic and industrial trends could result in growing demand, prices have been volatile and there can be no assurance that current prices will continue.

Table Of Contents

On June 1, 2013, we completed the acquisition of all of the issued and outstanding common stock of Aurizon for total consideration of CAD$740.8 million (US$714.5 million). The acquisition gave us 100% ownership of the producing Casa Berardi gold mine, along with interests in various gold exploration properties in the Abitibi region of north-western Quebec, Canada. As further discussed in *Item 3. Quantitative and Qualitative Disclosures About Market Risk*, the acquisition has increased our exposure to risks associated with exchange fluctuations between the U.S. dollar and Canadian dollar. The acquisition was partially funded by $490 million in net proceeds from our issuance of Senior Notes in April 2013 (see *Note 9* of *Notes to Condensed Consolidated Financial Statements (Unaudited)*). As discussed in the *Financial Liquidity and Capital Resources* section below, we believe that we will be able to meet the obligations associated with the acquisition of Aurizon and additional debt; however, a number of factors could impact our ability to meet the debt obligations and fund our other projects.

On March 26, 2015, we and Revett Mining Company, Inc. (Revett) entered into a merger agreement pursuant to which we would acquire all of the issued and outstanding common stock of Revett, as further discussed in *Note 13* of *Notes to Condensed Consolidated Financial Statements (Unaudited).* Revett holds 100% ownership of two properties in Northwest Montana: the Troy Mine, which is currently on care-and-maintenance, and the Rock Creek project, a significant undeveloped silver and copper deposit. In the proposed merger, each outstanding common share of Revett would be exchanged for 0.1622 of a share of our common stock, for total consideration of approximately $18.8 million based on the based on the closing price of Hecla stock of $3.01 per share on May 5, 2015. The proposed merger is subject to approval by Revett's stockholders and other customary closing conditions. No assurance can be given as to whether the merger will be approved and consummated. See *Item 1A – Risk Factors* for information on potential risks relating to the merger and to us following the merger if it is consummated.

As further discussed in the *Lucky Friday Segment* section below, we are in the process of constructing an internal shaft at the Lucky Friday mine (“#4 Shaft”), which, we believe, will significantly increase production and extend the life of the mine. The #4 Shaft project will involve significant additional capital costs during the periods leading up to its expected completion date in 2016. Although we believe that our current capital resources will allow us to complete the #4 Shaft project, there are a number of factors that could affect its completion.

We strive to achieve excellent mine safety and health performance. We seek to implement this goal by: training employees in safe work practices; establishing, following and improving safety standards; investigating accidents, incidents and losses to avoid recurrence; involving employees in the establishment of safety standards; and participating in the National Mining Association's *CORESafety* program. We attempt to implement reasonable best practices with respect to mine safety and emergency preparedness. We work with the Mine Safety and Health Administration ("MSHA") to address issues outlined in its investigations and inspections and continue to evaluate our safety practices.

Another challenge is the risk associated with environmental litigation and ongoing reclamation activities. As described in *Part I, Item 1A. Risk Factors* of our annual report filed on Form 10-K for the year ended December 31, 2014 and *Note 4* of *Notes to Condensed Consolidated Financial Statements (Unaudited),* it is possible that our estimate of these

liabilities (and our ability to estimate liabilities in general) may change in the future, affecting our strategic plans. We are involved in various environmental legal matters with no assurance that the estimate of our environmental liabilities, liquidity needs, or strategic plans will not be significantly impacted as a result of these matters or new matters that may arise. We strive to ensure that our activities are conducted in compliance with applicable laws and regulations and attempt to resolve environmental litigation on as favorable terms as possible.

Table Of Contents

Results of Operations

Sales of products by metal for the three-month periods ended March 31, 2015 and 2014 were as follows:

	Three Months Ended March 31,	
(in thousands)	2015	2014
Silver	$50,281	$43,883
Gold	48,620	57,085
Lead	14,670	14,858
Zinc	21,037	24,277
Less: Smelter and refining charges	(15,516)	(14,316)
Sales of products	$119,092	$125,787

For the first quarter of 2015, we recorded income applicable to common stockholders of $12.4 million ($0.03 per basic common share), compared to $11.5 million ($0.03 per basic common share) during the first quarter of 2014. The following factors led to the results for the first three months of 2015 compared to the same period in 2014:

- A net foreign exchange gain in the first quarter of 2015 of $12.3 million versus a net gain of $4.1 million in the same period of 2014, as the acquisition of Aurizon has resulted in increased exposure to exchange fluctuations between the U.S. dollar and Canadian dollar.
- Decreased average silver, gold, and lead prices for the first quarter of 2015 compared to the same period in 2014. Average zinc prices were slightly higher compared to the same period in the prior year.

	Three months ended March 31,	
	2015	2014
Silver — London PM Fix ($/ounce)	$16.72	$20.49
Realized price per ounce	$17.18	$
