CRIMSON WINE GROUP, LTD.

Notes to Unaudited Interim Condensed Consolidated Financial Statements

1. Background and Basis of Presentation

Background

Crimson Wine Group, Ltd. and its subsidiaries (collectively, “Crimson” or the “Company”) is a Delaware corporation that has been conducting business since 1991. Crimson is in the business of producing and selling ultra-premium plus wines (i.e., wines that retail for over \$15 per 750ml bottle). Crimson is headquartered in Napa, California and through its subsidiaries owns six wineries: Pine Ridge Vineyards, Archery Summit, Chamisal Vineyards, Seghesio Family Vineyards, Double Canyon and Seven Hills Winery and Vineyard.

Financial Statement Preparation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the U.S. (“GAAP”) and pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”) for interim financial information. The unaudited interim condensed consolidated financial statements, which reflect all adjustments (consisting of normal recurring items or items discussed herein) that management believes necessary to fairly state results of interim operations, should be read in conjunction with the Notes to Consolidated Financial Statements (including the Significant Accounting Policies and Recent Accounting Pronouncements) included in the Company’s audited consolidated financial statements for the year ended December 31, 2016, as filed with the SEC on Form 10-K (the “2016 Report”). Results of operations for interim periods are not necessarily indicative of annual results of operations. The unaudited condensed consolidated balance sheet at December 31, 2016 was extracted from the audited annual consolidated financial statements and does not include all disclosures required by GAAP for annual financial statements.

Significant Accounting Policies

Except as described below under Recent Accounting Pronouncements, there were no changes to the Company’s significant accounting policies during the six months ended June 30, 2017. See Note 3 to the 2016 Report for a description of the Company’s significant accounting policies.

Reclassifications

Certain reclassifications have been made to the prior period unaudited interim condensed consolidated balance sheet and statement of cash flows to conform to the current period presentation. The reclassifications had no impact on previously reported equity or cash flows.

Recent Accounting Pronouncements

Subsequent to the filing of the 2016 Report there were no accounting pronouncements issued by the Financial Accounting Standards Board (“FASB”) that would have a material effect on Crimson’s unaudited interim condensed consolidated financial statements. The following table provides a brief description of recent accounting pronouncements adopted during the six months ended June 30, 2017:

Table of Contents

Standard	Description	Date of adoption	Effect on the financial statements or other significant matters
Standards that were adopted			
ASU 2016-15, Statement of Cash Flows (Topic 230)	Amends the guidance in Topic 230 on the classification of certain cash receipts and payments in the statement of cash flows. The primary purpose of the ASU is to reduce the diversity in practice that has resulted from the lack of consistent principles on this topic.	January 1, 2017	The adoption of this standard did not have a material impact on the Company's unaudited interim condensed consolidated financial statements.
ASU 2015-11, Inventory (Topic 330)	Topic 330, Inventory, currently requires an entity to measure inventory at the lower of cost or market, with market value represented by replacement cost, net realizable value or net realizable value less a normal profit margin. The amendments in ASU 2015-11 require an entity to measure inventory at the lower of cost or net realizable value.	January 1, 2017	The adoption of this standard did not have a material impact on the Company's unaudited interim condensed consolidated financial statements.

2. Acquisition of Seven Hills Winery

On January 27, 2016, one of Crimson's wholly-owned subsidiaries entered into a purchase agreement pursuant to which Crimson's subsidiary acquired, or has rights in, substantially all of the assets and certain liabilities with respect to the Seven Hills Winery located in Walla Walla, Washington. The acquisition provides a strategic opportunity for Crimson to expand its portfolio.

The acquisition-date fair value of total consideration for the Seven Hills Winery acquisition was \$7.9 million, consisting of \$7.3 million in cash, which included a working capital adjustment of \$0.3 million, and \$0.6 million of non-cash contingent consideration. The contingent consideration arrangement requires the Company to pay up to \$0.8 million in future earn-out payments based on certain achievements of the acquired business over the 38 months following the closing of the acquisition. Achievements defined in the purchase agreement through June 30, 2017 have been met and therefore \$0.4 million of earn-out payments have been made. Total acquisition related costs were \$0.3 million, which were recorded during the year ended December 31, 2016. Pro forma financial statements are not presented as they are not material to the Company's overall condensed consolidated financial statements.

During the three and six months ended June 30, 2016, the Company recognized \$0.1 million and \$0.2 million of acquisition related costs that were expensed under the line item entitled 'General and administrative.' The Company's results for the three and six months ended June 30, 2016 include the results of Seven Hills Winery for the period since the date of acquisition.

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the acquisition date (in thousands):

Accounts receivable	\$232
Inventory	4,148
Property and equipment	2,927
Intangible assets	600
Deferred tax asset	47
Total assets	7,954
Accounts payable and accruals	233
Net assets acquired	7,721
Goodwill	209

Total purchase price \$7,930

Goodwill recognized of \$0.2 million was primarily attributable to synergies expected from combining the Company's operations with Seven Hills Winery's operations, as well as the assembled workforce. All of the goodwill is deductible for income tax purposes. As described in Note 11 "Business Segment Information," based on the nature of the Company's business, revenue generating assets are utilized across segments. Therefore, goodwill recognized has not been allocated to any particular segment of the Company.

Table of Contents

Adjustments to record the assets acquired and liabilities assumed at fair value include the recognition of \$0.6 million of intangible assets as follows (in thousands, except estimated life information):

	Amount	Estimated Life
Brand	\$ 500	15 years
Distributor relationships	100	10 years
Total	\$ 600	

The methodology utilized to fair value the assets acquired and liabilities assumed related to Seven Hills Winery was as follows:

Accounts Receivable and Accounts Payable

The carrying values for current assets and current liabilities were deemed to approximate their fair values due to the short-term nature of these assets and liabilities. The Company has subsequently collected on and paid out all of these balances.

Inventory

Inventory fair values were estimated by significant component. In-process wine was valued at the estimated selling prices of finished goods less the sum of costs to complete, costs of disposal and reasonable profit allowances for completing and selling efforts based on profits for similar finished goods. Cased wine was valued at estimated selling price less the sum of costs of disposal and reasonable profit allowances for the selling efforts. These fair value measurements were based on significant inputs not observable in the market and thus represent a Level 3 measurement as defined in ASC 820, Fair Value Measurement.

Property and Equipment

Property and equipment acquired consisted primarily of a building, land and machinery and equipment used in manufacturing operations. Property and equipment fair values were estimated at their highest and best use value using either the cost or market approach, when appropriate based on available data, and further corroborated with an income approach when appropriate. These fair value measurements represent Level 2 and Level 3 measurements.

Intangible Assets

The identifiable intangible assets acquired consisted of brand and distributor relationships. The relief from royalty valuation method, a form of the income approach, was used to estimate the fair value of the brand. The multi-period excess earnings method, a form of the income approach, was used to estimate the fair value of the distributor relationships. These fair value measurements represent Level 3 measurements.

Contingent Consideration

The Company estimated the fair value of the contingent consideration at January 27, 2016 (the acquisition date) to be \$0.6 million, using a probability-weighted discounted cash flow model. This fair value measurement represents a Level 3 measurement. Changes to the estimated fair value of the contingent consideration at each reporting period are recorded in the Company's condensed consolidated income statement under the line item titled 'General and administrative' as an operating expense. The fair value of the contingent consideration as of June 30, 2017 and December 31, 2016 was \$0.3 million and \$0.7 million, respectively, and during each of the three and six months ended June 30, 2017 and 2016, changes in the estimated fair value of the contingent consideration were insignificant.

3. Inventory

A summary of inventory at June 30, 2017 and December 31, 2016 is as follows (in thousands):

	June 30, December 31,	
	2017	2016
Case wine	\$37,589	\$ 33,650
In-process wine	28,700	32,828

A summary of property and equipment at June 30, 2017 and December 31, 2016, and depreciation expense for the six months ended June 30, 2017 and 2016, is as follows (in thousands):

5. Financial Instruments

The Company's material financial instruments include cash and cash equivalents, investments classified as available for sale and short-term and long-term debt; investments classified as available for sale are the only assets or liabilities that are measured at fair value on a recurring basis. All of the Company's investments mature within three years or less.

The par value, amortized cost, gross unrealized gains and losses and estimated fair value of investments classified as available for sale as of June 30, 2017 and December 31, 2016 are as follows (in thousands):

June 30, 2017	Par Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Level 1	Level 2	Total Fair Value Measurements

Total	\$23,750	\$ 23,750	\$ 27	\$ (23)	\$9,995	\$13,759	\$ 23,754

Gross unrealized losses on available-for-sale securities were less than \$0.1 million as of June 30, 2017, and the Company believes the gross unrealized losses are temporary as it does not intend to sell these securities and it is more likely than not that the Company will not be required to sell these securities before the recovery of their amortized cost basis.

As of June 30, 2017 and December 31, 2016, other than the assets and liabilities related to the Seven Hills Winery acquisition (see Note 2), the Company did not have any assets or liabilities measured at fair value on a nonrecurring basis. For cash and cash equivalents, the carrying amounts of such financial instruments approximate their fair values. For short-term liabilities, the carrying amounts of such financial instruments approximate their fair values. As of June 30, 2017 the Company has estimated the fair value

Table of Contents

of its outstanding debt to be approximately \$24.4 million compared to its carrying value of \$24.9 million, based upon discounted cash flows with Level 3 inputs, such as the terms that management believes would currently be available to the Company for similar issues of debt, taking into account the current credit risk of the Company and other factors.

The Company does not invest in any derivatives or engage in any hedging activities.

6. Intangible and Other Non-Current Assets

A summary of intangible and other non-current assets at June 30, 2017 and December 31, 2016, and amortization expense for the six months ended June 30, 2017 and 2016, is as follows (in thousands):

Revolving Credit Facility								

In March 2013, Crimson and its subsidiaries entered into a \$60.0 million revolving credit facility with American AgCredit, FLCA, as agent for the lenders identified in the revolving credit facility, comprised of a revolving loan facility and a term revolving loan facility, which together are secured by substantially all of Crimson's assets. The revolving loan facility is for up to \$10.0 million of availability in the aggregate for a five year term, and the term revolving loan facility is for up to \$50.0 million in the aggregate for a fifteen year term. All obligations of Crimson under the revolving credit facility are collateralized by certain real property, including vineyards and certain winery facilities of Crimson, accounts receivable, inventory and intangible assets. In addition to unused line fees ranging from 0.15% to 0.25%, rates for the borrowings are priced based on a performance grid tied to certain financial ratios and the London Interbank Offered Rate. The revolving credit facility can be used to fund acquisitions, capital projects and other general corporate purposes. Covenants include the maintenance of specified debt and equity ratios, limitations on the incurrence of additional indebtedness, limitations on dividends and other distributions to shareholders and restrictions on certain mergers, consolidations and sales of assets. No amounts have been borrowed under the revolving credit facility to date.

The Company’s effective tax rates for the three months ended June 30, 2017 and 2016 were 39.0% and 44.3%, respectively. The Company’s effective tax rates for the six months ended June 30, 2017 and 2016 were 38.7% and 42.4%, respectively. The difference between the consolidated effective income tax rate and the U.S. federal statutory rate was primarily attributable to state taxes and the effect of certain permanent differences, which primarily consisted of meals and entertainment and the domestic production activity deduction.

The Company does not have any amounts in its condensed consolidated balance sheet for unrecognized tax benefits related to uncertain tax positions at June 30, 2017 and December 31, 2016.

11. Business Segment Information

The Company has identified two operating segments which are reportable segments for financial statement reporting purposes, Wholesale net sales and Direct to Consumer net sales, based upon their different distribution channels, margins and selling strategies. Wholesale net sales include all sales through a third party where prices are given at a wholesale rate, whereas Direct to Consumer net sales include retail sales in the tasting room, remote sites and on-site events, wine club net sales and other sales made directly to the consumer without the use of an intermediary.

The two segments reflect how the Company’s operations are evaluated by senior management and the structure of its internal financial reporting. The Company evaluates performance based on the gross profit of the respective business segments. Selling expenses that can be directly attributable to the segment are allocated accordingly. However, centralized selling expenses and general and administrative expenses are not allocated between operating segments. Therefore, net income information for the respective segments is not available. Based on the nature of the Company’s business, revenue generating assets are utilized across segments. Therefore, discrete financial information related to segment assets and other balance sheet data is not available and that information continues to be aggregated.

The following table outlines the net sales, cost of sales, gross profit, directly attributable selling expenses and operating income for the Company’s reportable segments for the three and six months ended June 30, 2017 and 2016, and also includes a reconciliation of consolidated income (loss) from operations. Other/Non-allocable net sales and gross profit include bulk wine and grape sales, event fees and retail sales. Other/Non-allocable expenses include centralized corporate expenses not specific to an identified reporting segment. Sales figures are net of related excise taxes.

Overview of Business

The Company generates revenues from sales of wine to wholesalers and direct to consumers, sales of bulk wine and grapes, special event fees, tasting fees and retail sales.

Our wines are primarily sold to wholesale distributors, who then sell to retailers and restaurants. As permitted under federal and local regulations, we have also been placing increased emphasis on generating revenue from direct sales to consumers which occur through wine clubs, at the wineries' tasting rooms and through the internet and direct outreach to customers. Direct sales to consumers are more profitable for the Company as we are able to sell our products at a price closer to retail prices rather than the wholesale price sold to distributors. From time to time, we may sell grapes or bulk wine, because the wine does not meet the quality standards for the Company's products, market conditions have changed resulting in reduced demand for certain products, or because the Company may have produced more of a particular varietal than it can use. When these sales occur, they may result in a loss.

Cost of sales includes grape and bulk wine costs, whether purchased or produced from the Company's controlled vineyards, crush costs, winemaking and processing costs, bottling, packaging, warehousing and shipping and handling

costs. For the Company controlled vineyard produced grapes, grape costs include annual farming labor costs, harvest costs and depreciation of vineyard assets. For wines that age longer than one year, winemaking and processing costs continue to be incurred and capitalized to the cost of wine, which can range from 3 to 36 months. Reductions to the carrying value of inventories are also included in costs of sales.

At June 30, 2017, wine inventory includes approximately 0.7 million cases of bottled and bulk wine in various stages of the aging process. Cased wine is expected to be sold over the next 12 to 36 months and generally before the release date of the next vintage.

Seasonality

As discussed in the 2016 Report, the wine industry in general historically experiences seasonal fluctuations in revenues and net income. The Company typically has lower sales and net income during the first quarter and higher sales and net income during the fourth quarter due to seasonal holiday buying as well as wine club shipment timing. We anticipate similar trends in the future.
