ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended March 29, 2014

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission File Number 000-08822

Cavco Industries, Inc.

(Exact name of registrant as specified in its charter)

Delaware

56-2405642

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

1001 North Central Avenue, Suite 800

85004

Phoenix, Arizona

(Zip Code)

(Address of principal executive offices)

602-256-6263

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Name of each exchange on which registered

Common Stock, par value \$0.01

The NASDAQ Stock Market LLC
(Global Select Market)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this Chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or

Edgar Filing: CAVCO INDUSTRIES INC - Form 10-K

information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a small reporting company. See definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input checked="" type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>

(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of voting and non-voting common equity held by non-affiliates as of September 28, 2013 (based on the closing price on the NASDAQ Stock Market, LLC on September 28, 2013) was \$304,032,256. Shares of Common Stock held by each officer, director and holder of 5% or more of the outstanding Common Stock have been excluded in that such persons may be deemed affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of June 9, 2014, 8,849,824 shares of Registrant's Common Stock, \$.01 par value, were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of Cavco Industries, Inc.'s definitive Proxy Statement relating to its 2014 Annual Meeting of Stockholders are incorporated by reference into Part III hereof.

PART I

ITEM 1. BUSINESS

General

Cavco Industries, Inc., a Delaware corporation, was formed on June 30, 2003 as a successor corporation to previous Cavco entities operating since 1965. Headquartered in Phoenix, Arizona, the Company designs and produces factory-built homes primarily distributed through a network of independent and Company-owned retailers, planned community operators and residential developers. We are a leading producer of manufactured homes in the United States, based on reported wholesale shipments, marketed under a variety of brand names, which include Cavco Homes, Fleetwood Homes, and Palm Harbor Homes. The Company is also a leading builder of park model homes, vacation cabins and systems-built commercial structures, as well as modular homes built primarily under the Nationwide Homes brand. Our mortgage subsidiary, CountryPlace Acceptance Corp. ("CountryPlace"), is an approved Fannie Mae and Ginnie Mae seller/servicer and offers conforming mortgages to purchasers of factory-built and site-built homes. Our insurance subsidiary, Standard Casualty Co. ("Standard Casualty"), provides property and casualty insurance to owners of manufactured homes. The terms "Cavco," "us," "we," "our," the "Company," and any other similar terms refer to Cavco Industries, Inc. and its consolidated subsidiaries, unless otherwise indicated in this Form 10-K.

We construct our homes using an assembly-line process in which each module or floor section is assembled in stages. Our assembly-line process is designed to be flexible enough to accommodate significant customization, as requested by our customers. As of March 29, 2014, the Company operated 15 homebuilding facilities located in the Pacific, Mountain, South Central and South Atlantic regions. These factories range in size from 79,000 to 250,000 square feet. As of March 29, 2014, we distributed our homes through 47 Company-owned retail outlets and a network of independent distribution points in 44 states, Canada, Japan and Mexico. A significant number of these independent distribution points are located in Arizona, California, Florida and Texas. Thirty-one of the Company-owned retail stores are located in Texas. See "Management's Discussion and Analysis of Financial Condition and Results of Operations — Industry and Company Outlook."

CountryPlace originates single-family residential mortgages and services, for itself and others, conforming mortgages, non-conforming land-home mortgages and manufactured home chattel loans. CountryPlace is authorized by the U.S. Department of Housing and Urban Development ("HUD") to directly endorse Federal Housing Administration ("FHA") Title I and Title II mortgage insurance, is approved by the Government National Mortgage Association ("GNMA" or "Ginnie Mae") to issue GNMA-insured mortgage-backed securities and is authorized to sell mortgages to, and service mortgages for the Federal National Mortgage Association ("FNMA" or "Fannie Mae"). A conforming mortgage or loan is one that conforms to the guidelines of a Government-Sponsored Enterprise ("GSE"), such as Fannie Mae, or a government agency, such as FHA; a non-conforming mortgage or loan does not conform to these guidelines (see Note 5 to the Consolidated Financial Statements).

Standard Casualty is domiciled in Texas and is primarily a specialty writer of manufactured home physical damage insurance. Standard Casualty holds insurance licenses in multiple states; however, a significant portion of its writings occur in Texas and Arizona. In addition to writing direct policies, Standard Casualty assumes and cedes reinsurance in the ordinary course of business (see Note 12 to the Consolidated Financial Statements).

See Note 21 for financial information regarding our business segments (factory-built housing and financial services), both of which are discussed below.

Table of Contents

Industry Overview

General. Manufactured housing provides an alternative in urban, suburban and rural areas to other forms of new low-cost housing, such as site-built housing and condominiums, and to existing housing, such as pre-owned homes and apartments. According to statistics published by the Institute for Building Technology and Safety ("IBTS") and the United States Department of Commerce, Bureau of the Census, for the year ended December 31, 2013, manufactured housing wholesale shipments of HUD code homes accounted for an estimated 12% of all new single-family homes sold.

According to data reported by the Manufactured Housing Institute ("MHI"), during calendar year 2013, our industry shipped approximately 60,000 HUD code manufactured homes. This followed approximately 55,000 homes shipped in 2012, 52,000 in 2011 and 50,000 shipped in each of calendar years 2010 and 2009, the lowest levels since shipment statistics began to be recorded in 1959. Yearly home shipments from 2003 to 2013 were less than the annual home shipments for each of the 40 years from 1963 to 2002. For the past 10- and 20-year periods, annual home shipments averaged 84,000 and 183,000, respectively. While industry HUD code manufactured home shipments improved modestly the three most recent years, the manufactured housing industry continues to operate at relatively low production and shipment levels compared to historical shipment statistics.

We believe the segment of the housing market in which manufactured housing is most competitive includes consumers with household incomes under \$60,000. This segment has a high representation of young single persons and young married couples, as well as persons age 55 and older. The comparatively low cost of fully-equipped manufactured housing is attractive to these consumers. Persons in rural areas and those who presently live in manufactured homes also make up a significant portion of the demand for new manufactured housing. Innovative engineering and design, as well as efficient production techniques, continue to position manufactured homes to meet the demand for affordable housing in markets such as rural areas and manufactured housing communities. The markets for affordable factory-built housing are very competitive as well as cyclical and seasonal. The industry is sensitive to employment levels, consumer confidence, availability of financing and general economic conditions. Protracted Industry Downturn. Since mid-1999, the manufactured housing industry has experienced a prolonged and significant downturn. This downturn has resulted in part from the fact that, beginning in 1999, consumer lenders in the sector began to tighten underwriting standards and curtail credit availability in response to higher than anticipated rates of loan defaults and significant losses upon the repossession and resale of the manufactured homes securing defaulted loans. From 2004 to 2007, the industry's downturn was exacerbated by the aggressive financing methods available to customers of developers and marketers of standard site-built homes, which had the effect of diverting potential manufactured housing buyers to more expensive site-built homes. Since 2008, the global credit crisis and general deterioration of economic conditions have extended the depressed market conditions in which our industry operates. These factors have resulted in low wholesale shipment levels and underutilized manufacturing and retail locations.

As a result of the foregoing factors, based on industry data as of the end of 2013, the number of active industry manufacturing facilities was 123, a decrease of 200 plants since the end of 1999, representing a 62% reduction. Weak industry conditions have adversely affected the results of operations of all of the major producers of manufactured homes, including our Company.

Business Strategies

Our marketing strategy is to offer a line of manufactured homes that appeal to a wide range of home buyers. Our principal focus is on two large and diverse markets, which include the sale of high-value homes to entry-level and move-up buyers and to persons aged 55 and older. We also market to special niches such as subdivision developers, active adult community operations and vacation home buyers.

Our production strategy is to develop and maintain the resources necessary to build to varied and unique customer specifications in an efficient factory production environment. This enables us to attract retailers and consumers who want the flexibility to build homes to meet their specific needs, but still seek the value created by building a home on a factory production line.

Table of Contents

Our competitive strategy is to build homes of superior quality, offer innovative designs and floor plans, demonstrate exceptional value and provide the engineering and technical resources to enable custom home building and be responsive and efficient in servicing the customer after the sale. We strive to maintain a competitive advantage by reacting quickly to changes in the marketplace and to the specific needs of our retailers and consumers.

The purchase of the Fleetwood Homes, Inc. ("Fleetwood") and Palm Harbor Homes, Inc. ("Palm Harbor") assets in August 2009 and April 2011, respectively, provided further operating capacity, increased home production capabilities and distribution and entry into financial and insurance businesses specific to the Company's industry, allowing the Company to be vertically integrated. The transactions further expanded the Company's geographic reach at a national level by adding factories and retail locations serving the Northwest, West, South, South-Central and Mid-Atlantic regions.

Products

We are among the largest producers of manufactured homes in the United States, based on reported wholesale shipments, marketed under a variety of brand names including Cavco Homes, Fleetwood Homes, and Palm Harbor Homes. The Company is also a leading producer of modular homes, built primarily under the Nationwide Homes brand, as well as park model homes, vacation cabins and systems-built commercial structures.

Approximately 80% of our products are constructed in accordance with the National Manufactured Home Construction and Safety Standards promulgated by HUD ("HUD code"). We also build park model homes, constructed to standards approved by the American National Standards Institute, a private, non-profit organization that administers and coordinates a voluntary standardization and conformity program. Park model homes are less than 400 square feet in size, are primarily used as vacation dwellings and seasonal retirement living, and are placed in planned communities, recreational home parks and resorts. We produce a wide variety of modular homes, which include single and multi-section/modular ranch-style dwellings, split-level homes, Cape Cod style homes, two and three story homes and multi-family units. We also build commercial modular structures including apartment buildings, condominiums, hotels, workforce housing, schools and housing for U.S. military troops (e.g., barracks). Commercial buildings are constructed in the same facilities in which we build our residential homes using similar assembly line processes and techniques. These commercial projects are generally engineered to the purchaser's specifications. The buildings are transported to the customer's site in the same manner as homes and are often set by crane and finished at the site.

We produce our residential homes in a variety of floor plans. Most of these homes are single-story and generally range in size from approximately 500 to 3,300 square feet, but may be larger in the case of multi-level modular homes. In fiscal year 2014 and 2013, we sold 9,537 and 8,398 homes, respectively.

Each home typically contains a living room, dining area, kitchen, one to five bedrooms and one or more bathrooms, and is equipped with central heating and hot water systems, kitchen appliances, carpeting and window treatments. Feature upgrades include fireplaces, central air conditioning, tile roofs, high ceilings, skylights, hardwood floors, custom cabinetry, granite countertops and energy conservation elements. We also offer a variety of structural and decorative customizations to meet the home buyer's specifications. With manufacturing centers strategically positioned across the nation, we utilize local market research to design homes to meet the demands of our customers. We have the ability to react and modify floor plans and designs to consumers' specific needs. By offering a full range of homes from entry-level models to large custom homes and with the ability to engineer designs in-house, we can accommodate virtually any customer request.

We are focused on building quality, energy efficient homes for the modern day home buyer. Green building involves the creation of an energy efficient envelope, including higher utilization of renewable materials. These homes provide environmentally-friendly maintenance requirements, generally lower utility costs, specially designed ventilation systems, best use of space and passive solar orientation. We also build homes designed to use alternative energy sources such as solar and wind.

Table of Contents

Our manufactured homes are constructed and equipped at our factories. The finished home is then primarily transported by independent trucking companies either to a retail sales center, planned community, housing development, work site or the customer's site. Retailers or other independent installers are responsible for placing the home on site and, in most instances, arranging for connections to utilities and providing installation and finish-out services. Although our manufactured homes are designed to be transportable, typically only a small percentage are moved from their original site after installation.

We are constantly introducing new floor plans, decors, exteriors, features and accessories to appeal to changing trends in different regions of the country. Our factory-built homes are designed after extensive field research and consumer feedback. We have developed engineering systems which, through the use of computer-aided technology, permit customization of homes and assist with product development and enhancement. We work with a variety of partners, meeting an expanding range of housing needs from a home buyer's private land to planned neighborhoods to recreational or resort properties to accommodations for workforces in agriculture and industry.

Factory-built Housing

Manufacturing Operations. Our homes are constructed in plant facilities using an assembly-line process employing from 70 to 200 employees at each facility. Most of our homes are constructed in one or more sections (also known as floors or modules) on a permanently affixed steel or wood support chassis. Each section is assembled in stages beginning with the construction of the chassis, followed by the addition of other constructed and purchased components and ending with a final quality control inspection. The efficiency of the assembly-line process and the benefits of constructing homes in a controlled factory environment enables us to produce quality homes in less time and at a lower cost per square foot than building homes on individual sites.

During fiscal year 2014, we operated 15 manufacturing facilities in Millersburg and Woodburn, Oregon; Nampa, Idaho; Riverside, California; Phoenix and Goodyear, Arizona; Austin, Fort Worth, Seguin and Waco, Texas; Lafayette, Tennessee; Martinsville and Rocky Mount, Virginia; Douglas, Georgia; and Plant City, Florida. These manufacturing facilities range from approximately 79,000 to 250,000 square feet of floor space. The production schedules for our manufacturing facilities are based on wholesale orders received from independent and Company-owned distributors, which fluctuate from week to week. In general, however, our facilities are structured to operate on a one shift per day, five days per week basis, and we currently manufacture a typical home in approximately six production days. During the fiscal quarters ended March 29, 2014 and March 30, 2013, our rates of production were approximately 58 and 48 home sections per day, respectively.

Manufactured housing is a regional business and the primary geographic market for a typical manufacturing facility is within a 350-mile radius. Each of our manufacturing facilities serves between 7 to 90 retailers along with a large number of one-time purchasers. Because we produce homes to fill existing wholesale orders, our manufacturing plants generally do not carry finished goods inventories, except for homes awaiting delivery.

The principal materials used in the production of our manufactured homes include wood, wood products, steel, aluminum, gypsum wallboard, windows, doors, fiberglass insulation, carpet, vinyl, fasteners, appliances and electrical items. We buy these materials from various third-party manufacturers and distributors. The inability to obtain any materials used in the production of our homes, whether resulting from material shortages, limitation of supplier facilities or other events affecting production of component parts, may affect our ability to meet or maintain production requirements.

At March 29, 2014, we had a backlog of home orders of approximately \$33.6 million, compared to a backlog of \$26.0 million at March 30, 2013. Retailers may cancel orders prior to production without penalty. After production of a particular home has commenced, the order becomes noncancelable and the retailer is obligated to take delivery of the home. Accordingly, until production of a particular home has commenced, we do not consider our order backlog to be firm orders. Because of the seasonality of the housing market, the level of our order backlog historically declines during the winter months.

Table of Contents

Revenue and Distribution. The following table sets forth the number and proportion of homes sold by us through Company-owned and independent distribution channels during the last three fiscal years, as well as the number of Company-owned centers at the end of the applicable period. The distribution channels are as follows:

	Year Ended			
	March 29, 2014	March 30, 2013	March 31, 2012	
Factory-built homes sold:				
by Company-owned retail sales centers	2,127	1,933	1,770	
to independent retailers, builders, communities & developers	7,410	6,465	6,090	
Total homes sold	9,537	8,398	7,860	
Percentage of factory-built homes sold:				
by Company-owned stores	22	% 23	% 23	%
to independent retailers, builders, communities & developers	78	% 77	% 77	%
Number of Company-owned retail centers at the end of the period	47	50	53	

Independent Retailers, Builders, Communities and Developers. As of March 29, 2014, we had a network of independent distribution points, of which 27% were in Texas, 13% in Arizona and 8% in California. The remaining 52% were in 41 other states, Canada, Japan and Mexico. As is common in the industry, our independent distributors typically sell manufactured homes produced by other manufacturers in addition to those we produce. Some independent retailers operate multiple sales outlets. No independent retailer accounted for 10% or more of our manufacturing revenue during any fiscal year within the three-year period ended March 29, 2014.

We continually seek to increase our wholesale shipments by growing sales at our existing independent retailers and by finding new independent retailers to sell our homes. We provide comprehensive sales training to retail sales associates and bring them to our manufacturing facilities for product training and to view new product designs as they are developed. These training seminars facilitate the sale of our homes by increasing the skill and knowledge of the retail sales consultants. In addition, we display our products in trade shows and support our retailers through the distribution of floor plan literature, brochures, decor selection displays, point of sale promotional material, as well as internet-based marketing assistance.

Independent retailers frequently finance a portion of their home purchases through wholesale floor plan financing arrangements. In most cases, we receive a deposit or a commitment from the retailer's lender for each home ordered. We then manufacture the home and it is shipped at the retailer's expense. Payment is due from the lender upon shipment of the product to the retailer. For a description of wholesale floor plan financing arrangements used by independent retailers and our obligations in connection with these arrangements, see "Financing—Wholesale Financing" below.

Company-Owned Retail Sales Centers. As of March 29, 2014, we had a total of 47 Company-owned retail centers, located in Oregon, Arizona, New Mexico, Texas, Oklahoma, Louisiana, Virginia, North Carolina and Florida. Thirty-one of the Company-owned retail stores are located in Texas. Each of our Company-owned retail sales centers has a sales office, which is generally a factory-built structure, and a variety of model homes of various sizes, floor plans, features and prices. Customers may purchase a home from an inventory of homes maintained at the location, including a model home, or may order a home that will be built at a manufacturing facility. Our Company-owned sales centers are generally located on a main road or highway for high visibility. Model homes may be displayed in a residential setting with sidewalks and landscaping. Each sales center usually employs a manager and one to five salespersons, who are compensated through a combination of salary and commission. As of March 29, 2014, Company-owned sales centers had an average inventory of 14 new homes per location. This number of homes in inventory includes homes delivered to a consumer home site but not yet recorded as a sale. We internally finance our inventories.

Table of Contents

Warranties. We provide the retail home buyer a one-year limited warranty covering defects in material or workmanship in home structure, plumbing and electrical systems. Nonstructural components of a cosmetic nature are warranted for 120 days, except in specific cases where state laws require longer warranty terms. Our warranty does not extend to installation and setup of the home, which is generally arranged by the retailer. Appliances, carpeting, roofing and certain other components are warranted by their original manufacturer for various lengths of time. Refer to our discussion of the Magnuson-Moss Warranty Federal Trade Commission Improvement Act under "Government Regulation" below.

Financial Services

Finance. We provide a source of home buyer financing to our customers on competitive terms through our subsidiary, CountryPlace. CountryPlace offers conforming mortgages to purchasers of numerous brands of factory-built homes sold by Company-owned retail sales centers and certain independent retailers, builders, communities and developers. CountryPlace is an approved seller/servicer with Fannie Mae, is approved by HUD to originate FHA-insured mortgages under its Direct Endorsement program and is approved to issue Ginnie Mae mortgage-backed securities. Most loans originated through CountryPlace are sold to investors. CountryPlace also provides various loan origination and servicing functions for non-affiliated entities under contract.

All of CountryPlace's loan contracts held are fixed rate and have monthly scheduled payments of principal and interest. The scheduled payments for each contract would, if made on their respective due dates, result in a full amortization of the contract. Loan contracts secured by collateral that is geographically concentrated could experience higher rates of delinquencies, default and foreclosure losses than loan contracts secured by collateral that is more geographically dispersed. CountryPlace has loan contracts secured by factory-built homes located in 25 states, including the states of Texas, Florida, New Mexico, Arizona and Alabama.

Changes in laws or other events that adversely affect liquidity in the secondary mortgage market could hurt our business. The GSEs, principally Fannie Mae, Ginnie Mae and the Federal Home Mortgage Corporation, as well as the FHA, play a significant role in buying home mortgages and creating investment securities that are either sold to investors or held in their portfolios. These organizations provide liquidity to the secondary mortgage market and have experienced financial difficulties in recent years. Any new federal laws or regulations that restrict or curtail their activities, or any other events or conditions that prevent or restrict these enterprises from continuing their historic businesses, could affect the ability of our customers to obtain loans or could increase home loan interest rates, fees and credit standards. This could reduce demand for our homes and/or the loans that we originate and adversely affect our results of operations.

We believe that providing financing alternatives to our customers improves our responsiveness to the financing needs of prospective purchasers and provides us with opportunities for additional sources of loan origination and servicing revenues.

Insurance. Standard Casualty specializes in homeowner property and casualty insurance products for the manufactured housing industry. Standard Casualty is domiciled in Texas and is primarily a specialty writer of manufactured home physical damage insurance. Standard Casualty holds insurance licenses in multiple states; however, a significant portion of its writings occur in Texas and Arizona. In addition to writing direct policies, Standard Casualty assumes and cedes reinsurance in the ordinary course of business. In Texas, the policies are written through one affiliated managing general agent, which produces all premiums, except surety, and through local agents, most of which are manufactured home retailers. All business outside the state of Texas is written on a direct basis through local agents.

Table of Contents

Financing

Wholesale Financing. Certain of our wholesale factory-built housing sales to independent retailers were purchased through wholesale floor plan financing arrangements. Under a typical floor plan financing arrangement, an independent financial institution specializing in this line of business provides the retailer with a loan for the purchase price of the home and maintains a security interest in the home as collateral. The financial institution customarily requires us, as the manufacturer of the home, to enter into a separate repurchase agreement with the financial institution under which we are obligated, upon default by the retailer and under certain other circumstances, to repurchase the financed home at declining prices over the term of the repurchase agreement (which in most cases is 18 to 36 months). The price at which we may be obligated to repurchase a home under these agreements is based upon our original invoice price, plus certain administrative and shipping expenses. Our obligation under these repurchase agreements ceases upon the purchase of the home by the retail customer. The maximum amount of our contingent obligations under such repurchase agreements was approximately \$25.5 million as of March 29, 2014 compared to \$17.7 million as of March 30, 2013. The risk of loss under these agreements is spread over many retailers and is further reduced by the resale value of the homes.

Inventory financing for the industry's wholesale distribution chain continues to be in short supply. Faced with illiquid capital markets in late calendar year 2008, each of the manufactured housing sector's remaining inventory finance companies (floor plan lenders) initiated significant changes and one company ceased lending activities in the industry entirely. Other finance programs are subject to more restrictive terms that continue to evolve, and in some cases, require the financial involvement of the Company. In connection with certain of these participation inventory finance programs, the Company provides a significant amount of the funds that independent financiers lend to distributors to finance retail inventories of our products. In addition, the Company has entered into direct inventory finance arrangements with distributors of our products under which the Company provides all of the funds for financing inventory (see Note 6 to the Consolidated Financial Statements). The Company's involvement in inventory finance has increased the availability of manufactured home inventory financing to distributors of our products. We believe that our taking part in the wholesale financing of inventory is helpful to retailers and allows our homes continued exposure to potential home buyers. These initiatives support the Company's ongoing efforts to expand our distribution base in all of our markets with existing and new customers. However, the initiatives expose the Company to risks associated with the creditworthiness of certain customers and business partners, including independent retailers, developers, communities and inventory financing partners, many of whom may be adversely affected by the volatile conditions in the economy and financial markets.

Consumer Financing. Sales of factory-built homes are significantly affected by the availability and cost of consumer financing. There are three basic types of consumer financing in the factory-built housing industry: chattel or personal property loans for purchasers of a home with no real estate involved (generally HUD code homes); non-conforming mortgages for purchasers of the home and the land on which the home is placed; and conforming mortgage loans which comply with the requirements of FHA, Veterans Affairs or GSE loans.

Beginning in mid-1999, lenient credit standards for chattel loans resulted in increased numbers of repossessions of manufactured homes and excessive inventory levels at that time. The poor performance of manufactured home loan portfolios made it difficult for consumer finance companies in the industry to obtain long-term capital in the asset-backed securitization market. As a result, many consumer finance companies curtailed their lending or exited the manufactured housing loan industry entirely. Since then, the lenders who remained in the business tightened their credit standards and, in some cases, increased fees and interest rates for chattel loans, which reduced lending volumes and lowered sales volumes of manufactured homes.

Table of Contents

Consumer financing for the retail purchase of manufactured homes needs to become generally more available before marked emergence from current low home shipment levels can occur. Restrictive underwriting guidelines, irregular appraisal processes, higher interest rates compared to site-built homes, regulatory burdens, a limited number of institutions lending to manufactured home buyers and limited secondary market availability for manufactured home loans are significant restraints to industry growth. We are working directly with other industry participants to develop manufactured home consumer financing models to better attract industry financiers interested in furthering or expanding lending opportunities in the industry. We have invested in community-based lending initiatives that provide home-only financing to new residents of certain manufactured home communities. We are also working through industry trade associations to encourage favorable legislative and GSE action to address the mortgage financing needs of potential buyers of affordable homes. Only limited progress has been made in this area and meaningful positive impact in the form of increased home orders has yet to be realized.

Competition

The manufactured housing industry is highly competitive at both the manufacturing and retail levels, with competition based upon several factors, including price, product features, reputation for service and quality, depth of distribution, promotion, merchandising and the terms of retail customer financing. We compete with approximately 45 other producers of manufactured homes, as well as companies offering for sale homes repossessed from wholesalers or consumers. In addition, manufactured homes compete with new and existing site-built homes, as well as apartments, townhouses and condominiums.

In addition to us, there are a number of other national manufacturers competing for a significant share of the manufactured housing market in the United States, including Clayton Homes, Inc., Champion Home Builders, Inc. and Skyline Corporation. Certain of these competitors possess greater financial, manufacturing, distribution and marketing resources.

Although many lenders to factory-built home buyers have reduced their volume or exited the business, there are significant competitors to CountryPlace in the markets we serve. These competitors include national, regional and local banks, independent finance companies, mortgage brokers and mortgage banks, including: 21st Mortgage Corporation, an affiliate of Clayton Homes, Inc. and Berkshire Hathaway, Inc.; Triad Finance Corporation; and U.S. Bank Manufactured Housing Finance. Certain of these competitors are larger than CountryPlace and have access to substantially more capital and cost efficiencies.

The market for homeowners insurance is highly competitive. Standard Casualty competes principally in property and casualty insurance for owners of manufactured homes with companies such as National Lloyds and Columbia Lloyds. We compete based on price, the breadth of our product offerings, product features, customer service, claim handling and use of technology.

Table of Contents

Government Regulation

Our manufactured homes are subject to a number of federal, state and local laws, codes and regulations. Construction of manufactured housing is governed by the National Manufactured Housing Construction and Safety Standards Act of 1974, as amended, or the Home Construction Act. In 1976, HUD issued regulations under the Home Construction Act establishing comprehensive national construction standards. In 1994, the codes were amended and expanded to, among other things, address specific requirements for homes destined for geographic areas subject to severe weather conditions. The HUD regulations, known collectively as the Federal Manufactured Home Construction and Safety Standards, cover all aspects of manufactured home construction, including structural integrity, fire safety, wind loads, thermal protection and ventilation. Such regulations preempt conflicting state and local regulations on such matters, and are subject to periodic change. Our manufacturing facilities, and the plans and specifications of the HUD code manufactured homes they produce, have been approved by a HUD-certified inspection agency. Further, an independent HUD-certified third-party inspector regularly reviews our manufactured homes for compliance with HUD regulations during construction. Failure to comply with applicable HUD regulations could expose us to a wide variety of sanctions, including mandated closings of our manufacturing facilities. We believe our manufactured homes are in substantial compliance with all present HUD requirements. Our park model homes are not subject to HUD regulations, but we believe that our park model homes meet all present standards of the American National Standards Institute.

Manufactured and site-built homes are all typically built with wood products that contain formaldehyde resins. HUD regulates the allowable concentrations of formaldehyde in certain products used in manufactured homes and requires manufacturers to warn purchasers as to formaldehyde-associated risks. The Environmental Protection Agency ("EPA") and other governmental agencies have in the past evaluated the effects of formaldehyde. We use materials in our manufactured homes that meet HUD standards for formaldehyde emissions and believe we comply with HUD and other applicable government regulations in this regard.

The transportation of manufactured homes on highways is subject to regulation by various federal, state and local authorities. Such regulations may prescribe size and road use limitations and impose lower than normal speed limits and various other requirements.

We have leased space for our manufacturing facility in Goodyear, Arizona since 1993. The leased premises is part of what is referred to as the Phoenix-Goodyear Airport (South) Superfund Site ("PGAS"), which was designated as a National Priorities List ("NPL") site under the authority of the Comprehensive Environmental Response, Compensation and Liability Act in 1983. The reason for the site's NPL designation was because of extensive soil and groundwater contamination (trichloroethylene, chromium and cadmium) that resulted from historic manufacturing by the Goodyear Tire and Rubber Company ("Goodyear Tire") and the United States Department of Defense.

Pursuant to a consent decree entered into with the EPA, Goodyear Tire is responsible for taking certain remedial actions at the PGAS site. In February 2010, the EPA completed its five-year review of the PGAS site and reported that the contaminant concentrations in groundwater at the site have been reduced, and treated groundwater from the treatment systems has met cleanup goals throughout that period of operation. Nonetheless, the groundwater still contains contaminant levels above specified cleanup goals as the remediation progresses. The EPA's five-year review identified several issues regarding the ongoing effectiveness of the remedy and several new issues regarding possible presence of trace metals, vapor intrusion, institutional controls, ecological risks, and migration, all of which the EPA is addressing. In January 2013, the EPA reported that Goodyear Tire began an investigation regarding specific areas of the ground water plume in the northern area of the PGAS. This investigation is being performed to help the EPA better understand the effectiveness of the groundwater cleanup and whether a change made to the remedy may accelerate cleanup.

Table of Contents

Our lease specifically refers to the consent decree with the EPA and provides that, as between our Landlord (now JRC Goodyear, LLC) and us, the Landlord will be responsible for any liabilities resulting from the existing contamination at the site and that the Landlord will indemnify, defend, and hold us, our directors, our officers, our employees, our agents, and our successors, harmless for such liabilities. During the 20 years that we have conducted manufacturing operations at the Goodyear, Arizona facility, we have never received any inquiry or notice from the EPA or the Arizona Department of Environmental Quality suggesting that we may be liable for any costs associated with the remediation of the PGAS site. There are no underground storage tanks at the Goodyear, Arizona facility.

Our manufactured homes are subject to local zoning and housing regulations. In certain cities and counties in areas where our homes are sold, local governmental ordinances and regulations have been enacted which restrict the placement of manufactured homes on privately-owned land or which require the placement of manufactured homes in manufactured home communities. Such ordinances and regulations may adversely affect our ability to sell homes for installation in communities where they are in effect. A number of states have adopted procedures governing the installation of manufactured homes. Utility connections are subject to state and local regulations which must be complied with by the retailer or other person installing the home.

Certain warranties we issue may be subject to the Magnuson-Moss Warranty Federal Trade Commission Improvement Act ("Magnuson-Moss Warranty Act"), which regulates the descriptions of warranties on consumer products. In the case of warranties subject to the Magnuson-Moss Warranty Act, the Company is subject to a number of additional regulatory requirements. For example, warranties that are subject to the Magnuson-Moss Warranty Act must be included in a single easy-to-read document that is generally made available prior to purchase. The Magnuson-Moss Warranty Act also prohibits certain attempts to disclaim or modify implied warranties and the use of deceptive or misleading terms. A claim for a violation of the Magnuson-Moss Warranty Act can be the subject of an action in federal court in which consumers may be able to recover attorneys' fees. The description and substance of our warranties are also subject to a variety of state laws and regulations. A number of states require manufactured home producers to post bonds to ensure the satisfaction of consumer warranty claims.

A variety of laws affect the financing of the homes we manufacture. The Federal Consumer Credit Protection Act ("Truth-in-Lending Act") and Regulation Z promulgated thereunder require written disclosure of information relating to such financing, including the amount of the annual percentage interest rate and the finance charge. The Federal Fair Credit Reporting Act also requires certain disclosures to potential customers concerning credit information used as a basis to deny credit. The Federal Equal Credit Opportunity Act and Regulation B promulgated thereunder prohibit discrimination against any credit applicant based on certain specified grounds. The Real Estate Settlement Procedures Act and Regulation X promulgated thereunder require certain disclosures regarding the nature and costs of real estate settlements. The Federal Trade Commission has adopted or proposed various Trade Regulation Rules dealing with unfair credit and collection practices and the preservation of consumers' claims and defenses. Installment sales contracts, direct loans and mortgage loans eligible for inclusion in a Ginnie Mae program are subject to the credit underwriting requirements of the FHA. A variety of state laws also regulate the form of financing documents and the allowable deposits, finance charge and fees chargeable pursuant to financing documents.

In 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act") was passed into law. The Dodd-Frank Act is a sweeping piece of legislation, and the financial services industry is still assessing its implications and implementing necessary changes in procedures and business practices. Although Congress detailed some significant changes, and new rules have been implemented, the full impact will not be fully known for months or even years, as regulations that are intended to implement the Dodd-Frank Act are adopted by the appropriate agencies, and the text of the Dodd-Frank Act is analyzed by impacted stakeholders and possibly the courts. The Dodd-Frank Act established the Consumer Financial Protection Bureau ("CFPB") to regulate consumer financial products and services.

Table of Contents

On January 10, 2013, the CFPB released certain mortgage finance rules required under the Dodd-Frank Act. These rules define standards for origination of "Qualified Mortgages," establish specific requirements for lenders to prove borrowers' ability to repay loans and outline the conditions under which Qualified Mortgages are subject to safe harbor limitations on liability to borrowers. The rules became effective January 10, 2014, and apply to consumer credit transactions secured by a dwelling, including real property mortgages and chattel loans (financed without land) secured by manufactured homes. The rules also establish interest rate and other cost parameters for determining which Qualified Mortgages fall under safe harbor protection. Among other issues, Qualified Mortgages with interest rates and other costs outside the limits are deemed "rebuttable" by borrowers and expose the lender and its assignees (including investors in loans, pools of loans, and instruments secured by loans or loan pools) to litigation and penalties.

On January 10, 2013, the CFPB also issued a rule amending the Truth-in-Lending Act and the Real Estate Settlement Procedures Act. The rule became effective on January 10, 2014, amending Regulation Z by expanding the types of mortgage loans that are subject to the protections of the Home Ownership and Equity Protections Act of 1994 ("HOEPA"), revising and expanding the tests for coverage under HOEPA, and imposing additional restrictions on mortgages that are covered by HOEPA. As a result, certain manufactured home loans are now subject to HOEPA limits on interest rates and fees. Loans with rates or fees in excess of the limits are deemed High Cost Mortgages and provide additional protections for borrowers, including with respect to determining the value of the home. Most loans for the purchase of manufactured homes have been written at rates and fees that would not be considered High Cost Mortgages under the new rule. Although some lenders may continue to offer loans that are now deemed High Cost Mortgages, the rate and fee limits may deter some lenders from offering loans to certain borrowers due to the limits on rates and fees or the reluctance to enter into loans subject to HOEPA borrower protections. If so, some prospective buyers of manufactured homes may be unable to secure financing necessary to complete purchases.

While many manufactured homes are currently financed with agency-conforming mortgages in which the ability to repay is verified and at interest rates and other costs that are within the safe harbor limits, a significant amount of loans to finance the purchase of manufactured homes, especially chattel loans and non-conforming land-home loans, fall outside the safe harbor limits. The rules have caused some lenders to curtail underwriting such loans, and some investors may be reluctant to own or participate in owning such loans because of the uncertainty of potential litigation and other costs. If so, some prospective buyers of manufactured homes may be unable to secure financing necessary to complete purchases. In addition, compliance with the law is causing lenders to incur additional costs to implement new processes, procedures, controls and infrastructure required to comply with the regulations. Compliance is also creating constraints in some lender's ability to profitably price certain loans. Failure to comply with these regulations, changes in these or other regulations, or the imposition of additional regulations, could affect our earnings, limit our access to capital and have a material adverse effect on our business and results of operations.

The Secure and Fair Enforcement for Mortgage Licensing Act of 2008 ("SAFE Act") established requirements for the licensing and registration of all individuals that are Mortgage Loan Originators ("MLOs"). MLOs must be registered or licensed by the states. Traditionally, manufactured housing retailers have assisted home buyers with securing financing for the purchase of homes. This assistance may have included assisting with loan applications and presenting terms of loans. Under the SAFE Act, these activities are prohibited unless performed by a registered or licensed MLO. Although the definition of an MLO contains exemptions for administrative and other specific functions and industries, such as time-share plans, manufactured housing retailers are no longer able to negotiate rates and terms for loans unless they are licensed as MLOs. Compliance may require some manufactured housing retailers to become licensed lenders and employ MLOs, or alter business practices related to assisting home buyers in securing financing. This may result in increased costs for retailers who elect to employ MLOs, penalties assessed against or litigation costs incurred by retailers found to be in violation, reduced home sales from home buyers' inability to secure financing without retailer assistance, or increased costs to home buyers or reduced transaction profitability for retailers as a result of the additional cost of mandatory MLO involvement.

Our sale of insurance products is subject to various state insurance laws and regulations which govern allowable charges and other insurance practices. Standard Casualty's insurance operations are regulated by the state insurance boards where it underwrites its policies. Underwriting, premiums, investments and capital reserves (including

dividend payments to stockholders) are subject to the rules and regulations of these state agencies.

12

Table of Contents

Governmental authorities have the power to enforce compliance with their regulations, and violations may result in the payment of fines, the entry of injunctions or both. Although we believe that our operations are in substantial compliance with the requirements of all applicable laws and regulations, these requirements have generally become more strict in recent years. Accordingly, we are unable to predict the ultimate cost of compliance with all applicable laws and enforcement policies.

See also "Regulatory Developments" in Part II, Item 7 of this Annual Report.

Seasonality

Generally we experience higher sales volume during the months of March through October. Our sales are slower during the winter months and shipments can be delayed in areas of the country that experience harsh weather conditions.

Employees

As of March 29, 2014, we had approximately 3,000 employees. We believe that our relationship with our employees is good.

Available Information

We make available free of charge through our Internet site, www.cavco.com, the following filings as soon as reasonably practicable after they are electronically filed with, or furnished to, the Securities and Exchange Commission ("SEC"): the Annual Report on Form 10-K, the Quarterly Reports on Form 10-Q, the Conflict Minerals Report on Form SD, the Current Reports on Form 8-K and amendments to those Reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 ("Exchange Act").

Table of Contents

ITEM 1A. RISK FACTORS

Our business involves a number of risks and uncertainties. You should carefully consider the following risks, together with the information provided elsewhere in this Annual Report. The items described below are not the only risks facing us. Additional risks that are currently unknown to us or that we currently consider to be immaterial may also impair our business or adversely affect our financial condition or results of operations.

We operate in an industry that is currently experiencing a prolonged and significant downturn

Since mid-1999, the manufactured housing industry has experienced a prolonged and significant downturn. This downturn has resulted in part from the fact that, beginning in 1999, consumer lenders in the sector began to tighten underwriting standards and curtail credit availability in response to higher than anticipated rates of loan defaults and significant losses upon the repossession and resale of the manufactured homes securing defaulted loans. From 2004 to 2007, the industry's downturn was exacerbated by the aggressive financing methods available to customers of developers and marketers of standard site-built homes, which had the effect of diverting potential manufactured housing buyers to more expensive site-built homes. Since 2008, the global credit crisis and general deterioration of economic conditions have extended the depressed market conditions in which our industry operates. These factors have resulted in reduced wholesale shipments and excess manufacturing and retail locations.

As a result of the foregoing factors, based on industry data as of the end of 2013, the number of active industry manufacturing facilities was 123, a decrease of 200 plants since 1999, representing a 62% reduction. The availability of consumer financing for the purchase of manufactured homes continues to be constrained, as discussed below. If current industry conditions continue or get materially worse, we may be required to take steps in an attempt to mitigate the effect of unfavorable industry conditions, such as the closure of facilities or consolidation of existing operations. These steps could impair our ability to conduct our business in a manner consistent with past practice and could make it more difficult for us to expand our operations if and when industry conditions improve. Furthermore, some of these steps could lead to fixed asset, goodwill or other impairment charges.

We may not be able to successfully integrate Fleetwood, Palm Harbor, CountryPlace, Standard Casualty and any future acquisition or attain the anticipated benefits, and the acquisition of Fleetwood, Palm Harbor, CountryPlace, Standard Casualty and other future acquisitions may adversely impact the Company's liquidity

On April 23, 2011, a subsidiary of Fleetwood purchased substantially all of the assets and certain liabilities of Palm Harbor Homes, Inc., a Florida corporation, a manufacturer and marketer of factory-built housing and a provider of related consumer financing and insurance products. In addition, we purchased all of the outstanding shares of CountryPlace, CountryPlace Mortgage, Ltd. and their wholly-owned finance subsidiaries. We also acquired all of the outstanding shares of Standard Casualty, Standard Insurance Agency, Inc. and its wholly-owned insurance agency subsidiary. Further, we assumed certain liabilities of Palm Harbor, including debt facilities of the finance subsidiaries and certain warranty obligations.

We completed the acquisition of certain manufactured housing assets and liabilities of Fleetwood in fiscal year 2010 and of Palm Harbor in fiscal year 2012. We may consider other strategic acquisitions if such opportunities arise. The Palm Harbor and Fleetwood acquisitions, and other transactions that we may consider in the future, involve a number of risks, including the diversion of our management's attention from our existing business for those transactions that we complete, or possible adverse effects on our operating results during the integration process and on our liquidity. In addition, we may not be able to successfully or profitably integrate, operate, maintain and manage the operations or employees of Fleetwood, Palm Harbor or potential future acquisitions. We also may not be able to maintain uniform standards, controls, procedures and policies, which may lead to financial losses.

Table of Contents

Our entry into new lines of business, namely manufactured housing consumer finance and insurance, through the Palm Harbor transaction, exposes the Company to additional risks

CountryPlace offers conforming mortgages to purchasers of factory-built homes sold by Company-owned retail sales centers and independent retailers, builders, communities and developers. CountryPlace is an approved seller/servicer with Fannie Mae, is approved by HUD to originate FHA-insured mortgages under its Direct Endorsement program and is approved to issue Ginnie Mae mortgage-backed securities. Most loans originated through CountryPlace are sold to investors. CountryPlace also provides various loan origination and servicing functions for non-affiliated entities under contract.

If CountryPlace's customers are unable to repay their loans, CountryPlace may be adversely affected. CountryPlace makes loans to borrowers that it believes are creditworthy based on its underwriting guidelines. However, the ability of these customers to repay their loans may be affected by a number of factors, including, but not limited to: national, regional and local economic conditions; changes or continued weakness in specific industry segments; natural hazard risks affecting the region in which the borrower resides; and employment, financial or life circumstances.

If customers do not repay their loans, CountryPlace may repossess or foreclose on the secured property in order to liquidate its loan collateral and minimize losses. The homes and land securing the loans are subject to fluctuating market values, and proceeds realized from liquidating repossessed or foreclosed property are highly susceptible to adverse movements in collateral values. Home price depreciation and elevated levels of unemployment may result in additional defaults and exacerbate actual loss severities upon collateral liquidation beyond those normally experienced by CountryPlace.

Some of the loans CountryPlace has originated or may originate in the future may not have a liquid market, or the market may contract rapidly and the loans may become illiquid. Although CountryPlace offers loan products and prices its loans at levels that it believes are marketable at the time of credit application approval, market conditions for mortgage-related loans may deteriorate rapidly and significantly. CountryPlace's ability to respond to changing market conditions is bound by credit approval and funding commitments it makes in advance of loan completion. In this environment, it is difficult to predict the types of loan products and characteristics that may be susceptible to future market curtailments and tailor our loan offerings accordingly. As a result, no assurances can be given that the market value of our loans will not decline in the future, or that a market will continue to exist for loan products.

CountryPlace sells loans through GSE-related programs and whole-loan purchasers. In connection with these activities, CountryPlace provides to the GSEs and whole-loan purchasers representations and warranties related to the loans sold. These representations and warranties generally relate to the ownership of the loans, the validity of the liens securing the loans, the loans' compliance with the criteria for inclusion in the sale transactions, including compliance with underwriting standards or loan criteria established by buyers and CountryPlace's ability to deliver documentation in compliance with applicable laws. Generally, representations and warranties may be enforced at any time over the life of the loan. Upon a breach of a representation, CountryPlace may be required to repurchase the loan or to indemnify a party for incurred losses. Repurchase demands and claims for indemnification payments are reviewed on a loan-by-loan basis to validate if there has been a breach requiring repurchase. CountryPlace manages the risk of repurchase through underwriting and quality assurance practices and by servicing the mortgage loans to investor standards. CountryPlace maintains a reserve for these contingent repurchase and indemnification obligations.

Standard Casualty and Standard Insurance Agency specialize in the manufactured housing industry, primarily serving the Texas, Georgia, Arizona and New Mexico markets. In Texas, the policies are written through one affiliated managing general agent, which produces all premiums, except surety, through local agents, most of which are manufactured home retailers. All insurance policies outside the state of Texas are written on a direct basis through local agents. Property and casualty insurance companies are subject to certain risk-based capital requirements as specified by the National Association of Insurance Commissioners. Under those requirements, the amount of capital and surplus maintained by a property and casualty insurance company is determined based on its various risk factors.

Table of Contents

Tightened credit standards, curtailed lending activity by home-only lenders and increased government lending regulations have contributed to a constrained consumer financing market

Since 1999, home-only lenders have tightened the credit underwriting standards and increased interest rates for loans to purchase manufactured homes, which has reduced lending volumes and negatively impacted our revenue. Most of the national lenders who have historically provided home-only loans have exited this sector of the industry. Conseco Finance Corp. ("Conseco Finance") was historically one of the largest originators of home-only loans in the manufactured housing industry. In December 2002, Conseco Inc., the parent company of Conseco Finance, filed for bankruptcy protection and ceased its lending activities. In May 2004, JPMorgan Chase Bank N.A., the lender with the largest loan origination volume in the home-only financing market at that time, announced it was ceasing its manufactured housing lending activities. In March 2008, Origen Financial, Inc. announced that it was suspending originations of manufactured home loans as a result of unfavorable conditions in the secondary market for its loans. Another major lender, 21st Mortgage Corporation, citing unreliable and inadequate sources of funding, announced in January 2009 that it was significantly curtailing its retail lending program. Remaining retail lenders have tightened their loan underwriting standards.

Consumers who buy our manufactured homes have historically secured retail financing from third-party lenders. Home-only financing is at times more difficult to obtain than financing for site-built homes. The availability, terms and costs of retail financing depend on the lending practices of financial institutions, governmental policies and economic and other conditions, all of which are beyond our control.

Changes in laws or other events that adversely affect liquidity in the secondary mortgage market could hurt our business. The GSEs and the FHA play significant roles in insuring or purchasing home mortgages and creating or insuring investment securities that are either sold to investors or held in their portfolios. These organizations provide significant liquidity to the secondary market. Any new federal laws or regulations that restrict or curtail their activities, or any other events or conditions that alter the roles of these organizations in the housing finance market could affect the ability of our customers to obtain mortgage loans or could increase mortgage interest rates, fees, and credit standards, which could reduce demand for our homes and/or the loans that we originate and adversely affect our results of operations.

In 2010, the Dodd-Frank Act was passed into law. The Dodd-Frank Act is a sweeping piece of legislation, and the financial services industry is still assessing its implications and implementing necessary changes in procedures and business practices. Although Congress detailed some significant changes, and new rules have been implemented, the full impact will not be fully known for months or even years, as regulations that are intended to implement the Dodd-Frank Act are adopted by the appropriate agencies, and the text of the Dodd-Frank Act is analyzed by impacted stakeholders and possibly the courts. The Dodd-Frank Act established the CFPB to regulate consumer financial products and services.

On January 10, 2013, the CFPB released certain mortgage finance rules required under the Dodd-Frank Act. These rules define standards for origination of "Qualified Mortgages," establish specific requirements for lenders to prove borrowers' ability to repay loans and outline the conditions under which Qualified Mortgages are subject to safe harbor limitations on liability to borrowers. The rules became effective January 10, 2014, and apply to consumer credit transactions secured by a dwelling, including real property mortgages and chattel loans (financed without land) secured by manufactured homes. The rules also establish interest rate and other cost parameters for determining which Qualified Mortgages fall under safe harbor protection. Among other issues, Qualified Mortgages with interest rates and other costs outside the limits are deemed "rebuttable" by borrowers and expose the lender and its assignees (including investors in loans, pools of loans, and instruments secured by loans or loan pools) to litigation and penalties.

Table of Contents

While many manufactured homes are currently financed with agency-conforming mortgages in which the ability to repay is verified and at interest rates and other costs that are within the safe harbor limits, a significant amount of loans to finance the purchase of manufactured homes, especially chattel loans and non-conforming land-home loans, fall outside the safe harbor limits. The rules have caused some lenders to curtail underwriting such loans, and some investors may be reluctant to own or participate in owning such loans because of the uncertainty of potential litigation and other costs. If so, some prospective buyers of manufactured homes may be unable to secure financing necessary to complete purchases. In addition, compliance with the law is causing lenders to incur additional costs to implement new processes, procedures, controls and infrastructure required to comply with the regulations. Compliance is also creating constraints in some lender's ability to profitably price certain loans. Failure to comply with these regulations, changes in these or other regulations or the imposition of additional regulations could affect our earnings, limit our access to capital and have a material adverse effect on our business and results of operations.

The availability of wholesale financing for industry retailers is limited due to a reduced number of floor plan lenders and reduced lending limits

Manufactured housing retailers generally finance their inventory purchases with wholesale floor plan financing provided by lending institutions. The availability of wholesale financing is significantly affected by the number of floor plan lenders and their lending limits. Since 1999, a substantial number of wholesale lenders have exited the industry or curtailed their floor plan operations. Conseco Finance was historically the largest floor plan lender, previously providing about 25% of the industry's wholesale financing. Conseco Finance discontinued approving and funding new floor plan loan requests in April 2002 and filed for bankruptcy protection in December 2002. With Conseco Finance's exit, Deutsche Financial Services was the largest remaining floor plan lender, providing approximately 20% of the industry's wholesale financing. Deutsche Financial Services discontinued approving and funding new floor plan loan requests in November 2002 and proceeded to liquidate its existing floor plan receivables. Textron Financial Corporation and GE Commercial Distribution Finance subsequently exited the business. As a result of these departures, the Company's independent retailers have relied primarily on 2nd Mortgage Corporation and smaller national lending institutions that have specialized in providing wholesale floor plan financing to manufactured housing retailers. We are concerned that floor plan financing providers could further reduce their levels of floor plan lending. Reduced availability of floor plan lending negatively affects the inventory levels of our independent retailers, the number of retail sales center locations and related wholesale demand, and adversely affects the availability of and access to capital on an ongoing basis.

Our participation in certain financing programs for the purchase of our products by industry distributors and consumers may expose us to additional risk of credit loss, which could adversely impact the Company's liquidity and results of operations

We are exposed to risks associated with the creditworthiness of certain independent retailers, builders, developers, community owners, inventory financing partners and home buyers, many of whom may be adversely affected by the volatile conditions in the economy and financial markets. These conditions could result in financial instability or other adverse effects. The consequences of such adverse effects could include delinquencies by customers who purchase our product under special financing initiatives, and deterioration of collateral values. In addition, we may incur losses if our collateral cannot be recovered or liquidated at prices sufficient to recover recorded inventory finance notes receivable balances. The realization of any of these factors may adversely affect our cash flow, profitability and financial condition.

Table of Contents

Our results of operations could be adversely affected by significant warranty and construction defect claims on factory-built housing

In the ordinary course of our business, we are subject to home warranty and construction defect claims. We record a reserve for estimated future warranty costs relating to homes sold, based upon our assessment of historical experience factors. Construction defect claims may arise during a significant period of time after product completion. Although we maintain general liability insurance and reserves for such claims, based on our assessments, which to date have been adequate, there can be no assurance that warranty and construction defect claims will remain at current levels or that such reserves will continue to be adequate. A large number of warranty and construction defect claims exceeding our current levels could have a material adverse effect on our results of operations.

We have contingent repurchase obligations related to wholesale financing provided to industry retailers

In accordance with customary business practice in the manufactured housing industry, we have entered into repurchase agreements with various financial institutions and other credit sources who provide floor plan financing to industry retailers, which provide that we will be obligated, under certain circumstances, to repurchase homes sold to retailers in the event of a default by a retailer in its obligation to such credit sources. Under these agreements, we have agreed to repurchase homes at declining prices over the term of the agreement (which in most cases is 18 to 36 months). The maximum amount of our contingent obligations under such repurchase agreements was approximately \$25.5 million as of March 29, 2014, without reduction for the resale value of the homes. We may be required to honor contingent repurchase obligations in the future and may incur additional expense as a consequence of these repurchase agreements.

Our operating results could be affected by market forces and declining housing demand

As a participant in the homebuilding industry, we are subject to market forces beyond our control. These market forces include employment and employment growth, interest rates, consumer confidence, land availability and development costs, apartment vacancy levels, inflation and the health of the general economy. Unfavorable changes in any of the above factors or other issues could have an adverse effect on our revenue and earnings.

We have incurred net losses in certain prior periods and there can be no assurance that we will generate income in the future

Since becoming a stand-alone public company, we have generated net income each complete fiscal year, except for fiscal year 2010, in which we incurred net losses attributable in substantial part to the downturn affecting the manufactured housing industry, which is discussed in detail above. The likelihood that we will generate net income in the future must be considered in light of the difficulties facing the manufactured housing industry as a whole, economic conditions, the competitive environment in which we operate and the other risks and uncertainties discussed in Item IA of the Annual Report. There can be no assurance that we will generate net income in the future.

A write-off of all or part of our goodwill could adversely affect our operating results and net worth

As of March 29, 2014, 14% of our total assets consisted of goodwill, all of which is attributable to our manufacturing operations. In accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 350, Intangibles—Goodwill and Other ("ASC 350"), we test goodwill annually for impairment by reporting unit by first making a qualitative assessment, and if necessary, performing the two-step test and recording an impairment charge if the implied fair value of a reporting unit, including goodwill, is less than its carrying value. If goodwill has become impaired, we charge the impairment as an expense in the period in which the impairment occurred. See Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies" and Note 1 to the Consolidated Financial Statements. Our goodwill could be impaired if developments affecting our manufacturing operations or the markets in which we produce manufactured homes lead us to conclude that the cash flows we expect to derive from our manufacturing operations will be substantially reduced. A write off of all or part of our goodwill could adversely affect our results of operations and financial condition.

Table of Contents

The cyclical and seasonal nature of the manufactured housing industry causes our revenues and operating results to fluctuate, and we expect this cyclical and seasonality to continue in the future

The manufactured housing industry is highly cyclical and seasonal and is influenced by many national and regional economic and demographic factors, including the availability of consumer financing for home buyers, the availability of wholesale financing for retailers, seasonality of demand, consumer confidence, interest rates, demographic and employment trends, income levels, housing demand, general economic conditions, including inflation and recessions, and the availability of suitable home sites.

As a result of the foregoing economic, demographic and other factors, our revenues and operating results fluctuate, and we expect them to continue to fluctuate in the future. Moreover, we have experienced and could again experience operating losses during cyclical downturns in the manufactured housing market.

Our liquidity and ability to raise capital may be limited

We may need to obtain debt or additional equity financing in the future. The type, timing and terms of the financing selected by us will depend on, among other things, our cash needs, the availability of other financing sources and prevailing conditions in the financial markets. There can be no assurance that any of these sources will be available to us at any time or that they will be available on satisfactory terms.

The manufactured housing industry is highly competitive, and increased competition may result in lower revenue
The manufactured housing industry is highly competitive. Competition at both the manufacturing and retailing levels is based upon several factors, including price, product features, reputation for service and quality, merchandising, terms of retailer promotional programs and the terms of retail customer financing. Numerous companies produce manufactured homes in our markets. In addition, our homes compete with repossessed homes that are offered for sale in our markets. Certain of our manufacturing competitors also have their own retail distribution systems and consumer finance and insurance operations. In addition, there are many independent manufactured housing retail locations in most areas where we have retail operations. We believe that where wholesale floor plan financing is available, it is relatively easy for new retailers to enter into our markets as competitors. In addition, our products compete with other forms of low- to moderate-cost housing, including new and existing site-built homes, apartments, townhouses and condominiums. If we are unable to compete effectively in this environment, our factory-built housing revenue could be reduced.

If we are unable to establish or maintain relationships with independent distributors who sell our homes, our revenue could decline

During fiscal year 2014, approximately 78% of our wholesale sales of manufactured homes were to independent distributors. As is common in the industry, independent distributors may also sell homes produced by competing manufacturers. We may not be able to establish relationships with new independent distributors or maintain good relationships with independent distributors that sell our homes. Even if we do establish and maintain relationships with independent distributors, these distributors are not obligated to sell our homes exclusively and may choose to sell our competitors' homes instead. The independent distributors with whom we have relationships can cancel these relationships on short notice. In addition, these distributors may not remain financially solvent, as they are subject to industry, economic, demographic and seasonal trends similar to those faced by us. If we do not establish and maintain relationships with solvent independent distributors in one or more of our markets, revenue in those markets could decline.

Table of Contents

Our business and operations are concentrated in certain geographic regions, which could be impacted by market declines

Our operations are concentrated in certain states, most notably Texas, California, Florida and Arizona. Due to the concentrated nature of our operations, there could be instances where these regions are negatively impacted by economic, natural or population changes that could, in turn, negatively impact the results of the business, more than other companies that are more geographically dispersed.

As of March 29, 2014, the Company operated 15 homebuilding facilities located in the Pacific, Mountain, South Central and South Atlantic regions. We have a significant presence in Texas with factories in the cities of Austin, Ft. Worth, Seguin and Waco. Further, of our 47 company-owned sales centers, 31 are located in Texas.

Loan contracts secured by collateral that is geographically concentrated could experience higher rates of delinquencies, default and foreclosure losses than loan contracts secured by collateral that is more geographically dispersed. CountryPlace has loan contracts secured by factory-built homes located in 25 states, including the states of Texas, Florida, New Mexico, Arizona and Alabama.

Standard Casualty and Standard Insurance Agency specialize in the manufactured housing industry, primarily serving the Texas, Georgia, Arizona and New Mexico markets. In Texas, the policies are written through one affiliated managing general agent, which produces all premiums, except surety, through local agents, most of which are manufactured home retailers. All insurance policies outside the state of Texas are written on a direct basis through local agents.

A decline in the economic conditions in Texas, California, Florida and/or Arizona could have a material adverse effect on our results of operations.

Our results of operations can be adversely affected by labor shortages and the pricing and availability of raw materials. The homebuilding industry has from time to time experienced labor shortages and other labor-related issues. A number of factors may adversely affect the labor force available to us and our subcontractors in one or more of our markets, including high employment levels, construction market conditions and government regulation, which include laws and regulations related to workers' health and safety, wage and hour practices and immigration. An overall labor shortage or a lack of skilled labor could cause significant increases in costs or delays in construction of homes, which could have a material adverse effect upon our revenue and results of operations.

Our results of operations can be affected by the pricing and availability of raw materials. Although we attempt to increase the sales prices of our homes in response to higher materials costs, such increases may lag behind the escalation of materials costs. Sudden increases in price and lack of availability of raw materials can be caused by natural disaster or other market forces, as has occurred in recent years. Although we have not experienced any production halts, severe or prolonged shortages of some of our most important building materials, which include wood and wood products, gypsum wallboard, steel, insulation, and other petroleum-based products, have occurred. There can be no assurance that sufficient supplies of these and other raw materials will continue to be available to us. If the manufactured housing industry is not able to secure favorable local zoning ordinances, our revenue could decline and our business could be adversely affected

Manufactured housing communities and individual home placements are subject to local zoning ordinances and other local regulations relating to utility service and construction of roadways. In the past, property owners often have resisted the adoption of zoning ordinances permitting the location of manufactured homes in residential areas, which we believe has restricted the growth of the industry. Manufactured homes may not achieve widespread acceptance and localities may not adopt zoning ordinances permitting the development of manufactured home communities. If the manufactured housing industry is unable to secure favorable local zoning ordinances, our revenue could decline and our business, results of operations and financial condition could be adversely affected.

Table of Contents

The loss of any of our executive officers could reduce our ability to execute our business strategy and could have a material adverse effect on our business and results of operations

We are dependent to a significant extent upon the efforts of our executive officers. The loss of the services of one or more of our executive officers could impair our ability to execute our business strategy and have a material adverse effect upon our business, financial condition and results of operations. We currently have no key person life insurance for our executive officers.

Certain provisions of our organizational documents could delay or make more difficult a change in control of our Company

Certain provisions of our restated certificate of incorporation and restated bylaws could delay or make more difficult transactions involving a change of control of our Company, and may have the effect of entrenching our current management or possibly depressing the market price of our common stock. For example, our restated certificate of incorporation and restated bylaws authorize blank series preferred stock, establish a staggered board of directors and impose certain procedural and other requirements for stockholder proposals. Furthermore, the fact that income taxes could be imposed as a result of ownership changes occurring in conjunction with a distribution may have the effect of delaying or making more difficult certain transactions involving a change of control of our Company.

Volatility of stock price

The price of our common stock may fluctuate widely, depending upon a number of factors, many of which are beyond our control. These factors include: the perceived prospects of our business and the manufactured housing industry as a whole; differences between our actual financial and operating results and those expected by investors and analysts; changes in analysts' recommendations or projections; changes affecting the availability of financing in the wholesale and consumer lending markets; actions or announcements by competitors; changes in the regulatory environment in which we operate; significant sales of shares by a principal stockholder; actions taken by stockholders that may be contrary to Board of Director recommendations; and changes in general economic or market conditions. In addition, stock markets generally experience significant price and volume volatility from time to time which may adversely affect the market price of our common stock for reasons unrelated to our performance.

Deterioration in economic conditions in general and continued turmoil in credit markets could reduce our earnings and financial condition

Deterioration in global economic conditions and continued turmoil in credit markets could have a negative impact on our business. Among other things, unfavorable changes in employment levels, job growth, consumer confidence and income, and interest rates may further reduce demand for our products, which could negatively affect our business, results of operations and financial condition. Unprecedented contraction in the credit markets and the financial services industry have occurred in recent years, characterized by the bankruptcy, failure or consolidation of various financial institutions and extraordinary intervention from the federal government. These factors could have an adverse effect on the availability of financing to our customers, causing our revenues to decline.

The cost of operations could be adversely impacted by increased costs of healthcare benefits provided to employees. In 2010, the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (collectively, the "Health Reform Law"), was passed into law. As enacted, the Health Reform Law reforms, among other things, certain aspects of health insurance. The Health Reform Law could increase our healthcare costs, adversely impacting the Company's earnings.

Table of Contents

A prolonged delay by Congress and the President to approve budgets or continuing appropriation resolutions to facilitate the operations of the federal government could delay the completion of home sales and/or cause cancellations, and thereby negatively impact our deliveries and revenues

Congress and the President may not timely approve budgets or appropriation legislation to facilitate the operations of the federal government. As a result, many federal agencies have historically and may again cease or curtail some activities. The affected activities include Internal Revenue Service ("IRS") verification of loan applicants' tax return information and approvals by the FHA and other government agencies to fund or insure mortgage loans under programs that these agencies operate. As a number of our home buyers use these programs to obtain financing to purchase our homes, and many lenders, including CountryPlace, require ongoing coordination with these and other governmental entities to originate home loans, a prolonged delay in the performance of their activities could prevent prospective qualified buyers of our homes from obtaining the loans they need to complete such purchases, which could lead to delays or cancellations of home sales. These and other affected governmental bodies could cause interruptions in various aspects of our business and investments. Depending on the length of disruption, such factors could have a material adverse impact on our consolidated financial statements.

Information technology failures or data security breaches could harm our business

We use information technology and other computer resources to carry out important operational activities and to maintain our business records. Our computer systems, including our back-up systems, are subject to damage or interruption from power outages, computer and telecommunications failures, computer viruses, security breaches (through cyber-attacks from computer hackers and sophisticated organizations), catastrophic events such as fires, tornadoes and hurricanes and human error. Given the unpredictability of the timing, nature and scope of information technology disruptions, if our computer systems and our backup systems are damaged, breached, or cease to function properly, we could potentially be subject to production downtimes, operational delays, the compromising of confidential or otherwise protected information (including information about our home buyers and business partners), destruction or corruption of data, security breaches, other manipulation or improper use of our systems and networks or financial losses from remedial actions, any of which could have a material adverse effect on our cash flows, competitive position, financial condition or results of operations.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The following table sets forth certain information with respect to our properties:

Location	Date of Commencement of Operations	Owned / Leased	Square Feet
Active manufacturing facilities:			
Goodyear, Arizona (1)	1993	Leased	250,000
Woodburn, Oregon (2)	1976	Owned	221,000
Nampa, Idaho (2)	1957	Owned	171,000
Millersburg, Oregon (3)	1995	Owned	169,000
Lafayette, Tennessee (2)	1996	Owned	149,000
Douglas, Georgia (2)	1988	Owned	142,000
Rocky Mount, Virginia (2)	1995	Owned	137,000
Waco, Texas (2)	1971	Owned	132,000
Martinsville, Virginia (two facilities) (3)	1969	Owned	132,000
Seguin, Texas	2006	Owned	129,000
Fort Worth, Texas (3)	1993	Owned	121,000
Riverside, California (2)	1960	Owned	107,000
Austin, Texas (3)	1981	Owned	104,000
Plant City, Florida (3)	1981	Owned	87,000
Phoenix, Arizona	1978	Owned	79,000
Component and supply facilities:			
Martinsville, Virginia (3)	1972	Owned	148,000
Inactive manufacturing facilities:			
Woodland, California (2)(4)		Owned	149,000
Albemarle, North Carolina (3)		Owned	113,000
Plant City, Florida (3)		Owned	94,000
Austin, Texas (3)		Owned	77,000
Martinsville, Virginia (3)		Owned	44,000
Administrative and other locations:			
Addison, Texas		Leased	24,000
Phoenix, Arizona		Leased	11,000
New Braunfels, Texas		Owned	9,000

(1)This lease expires in 2018.

(2)These facilities were purchased by the Company during fiscal year 2010.

(3)These facilities were purchased by the Company during fiscal year 2012.

(4)This facility is currently leased to a third party.

Table of Contents

We own the land on which the manufacturing facilities are located, except for the Goodyear, Arizona plant, which is currently leased through February 2018. We also own substantially all of the machinery and equipment used at these factories. We believe that these facilities are adequately maintained and suitable for the purposes for which they are used. In addition to our production facilities, we own an office building and land in New Braunfels, Texas, which houses Standard Casualty's operations, as well as ten properties upon which six of our active retail centers are located. The remaining active sales centers are leased under operating leases with lease terms generally ranging from monthly to five years. Our Company-owned retail centers generally range in sizes up to nine acres. We lease office space in Addison, Texas for CountryPlace operations and Palm Harbor administrative support services, which lease expires in 2016. Our Phoenix, Arizona corporate headquarters lease was extended for a period of five years, commencing in February 2013 and expiring in January 2018. The Company has the right to terminate the lease prior to the expiration of the initial five year term, effective as of any date after January 31, 2016.

ITEM 3. LEGAL PROCEEDINGS

We are party to certain legal proceedings that arise in the ordinary course and are incidental to our business. Certain of the claims pending against us in these proceedings allege, among other things, breach of contract and warranty, product liability, construction defect, wrongful termination and personal injury. Although litigation is inherently uncertain, based on past experience and the information currently available, our management does not believe that the currently pending and threatened litigation or claims will have a material adverse effect on the Company's consolidated financial position or results of operations. However, future events or circumstances, currently unknown to management will determine whether the resolution of pending or threatened litigation or claims will ultimately have a material effect on our consolidated financial position, liquidity or results of operations in any future reporting periods.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

SUPPLEMENTAL ITEM: EXECUTIVE OFFICERS OF THE REGISTRANT (See Item 10 of Part III of this Report)

The following is a listing of our executive officers as of June 11, 2014, as such term is defined under the rules and regulations of the Securities and Exchange Commission. Officers are generally elected by the Board of Directors at its meeting immediately following our annual stockholders' meeting, with each officer serving until a successor has been elected and qualified. There is no family relationship between these officers.

Name	Age	Positions with Cavco or Business Experience
Joseph H. Stegmayer	63	Chairman of the Board, President and Chief Executive Officer since March 2001; Director of Palm Harbor Homes, Inc. since April 2011; Director of Fleetwood Homes, Inc. since August 2009; President of Centex Manufactured Housing Group, LLC from September 2000 to June 2003; President - Retail Operations and Chief Financial Officer of Champion Enterprises, Inc. from January 1998 to September 2000; President, Vice Chairman and Chairman of the Executive Committee of Clayton Homes, Inc. from 1993 to January 1998
Daniel L. Urness	46	Vice President, Chief Financial Officer and Treasurer since January 2006; Director of Palm Harbor Homes, Inc. since April 2011; Director of Fleetwood Homes, Inc. since August 2009; Interim Chief Financial Officer of the Company from August 2005 to January 2006; Corporate Controller from May 2005 to August 2005; Financial Consultant from June 2002 to May 2005; Controller from May 1999 to June 2002; Manager and staff with Deloitte & Touche, LLP from September 1993 to May 1999
Charles E. Lott	66	President of Fleetwood Homes, Inc. since August 2009; President and Vice President - Housing Group of Fleetwood Enterprises, Inc. from April 2005 to August 2009; Mr. Lott has worked for Fleetwood Enterprises and subsequently Fleetwood Homes for all but six years of his over 40-year career in the manufactured housing industry

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The Company's common stock is traded on the NASDAQ Global Select Market ("NASDAQ") under the symbol CVCO. The following table sets forth, for each of the periods indicated, the reported high and low sale prices per share on the NASDAQ for the Company's common stock.

	Sales Price	
	High	Low
Year ended March 29, 2014		
Fourth Quarter	\$84.80	\$66.60
Third Quarter	71.63	54.01
Second Quarter	60.34	48.40
First Quarter	51.00	40.43
Year ended March 30, 2013		
Fourth Quarter	\$52.29	\$44.41
Third Quarter	51.84	43.90
Second Quarter	52.97	44.03
First Quarter	52.73	40.51

As of June 4, 2014, the Company had 784 stockholders of record and approximately 3,100 beneficial holders of its common stock, based upon information in securities position listings by registered clearing agencies upon request of the Company's transfer agent.

We do not expect to pay any dividends on our common stock in the foreseeable future. The payment of dividends to our stockholders is subject to the discretion of our board of directors and various factors may prevent us from paying dividends. Such factors include our cash requirements and liquidity and the requirements of state corporate and other laws.

Equity Compensation Plan Table

Information concerning equity compensation plans is included in Part III, Item 12, "Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters" in this Annual Report.

Issuer Purchases of Equity Securities

In January 2008, we announced a stock repurchase program. A total of \$10.0 million may be used to repurchase our outstanding common stock. The repurchases may be made in the open market or in privately negotiated transactions in compliance with applicable state and federal securities laws and other legal requirements. The level of repurchase activity is subject to market conditions and other investment opportunities. The repurchase program does not obligate us to acquire any particular amount of common stock and may be suspended or discontinued at any time. The repurchase program will be funded using our available cash. No repurchases have been made under this program to date.

Performance Graph

The following graph compares the yearly change in the cumulative total stockholder return on Cavco common stock during the five fiscal years ended March 29, 2014 with the NASDAQ composite index and a peer group composed of companies with businesses in one or more of Cavco's primary lines of business, the production and sale of manufactured homes. The companies comprising the peer group are weighted by their respective market capitalization and include the following: Deer Valley Corp., Liberty Homes, Inc. (Class A Common Stock), Nobility Homes, Inc. and Skyline Corporation. The comparison assumes \$100 (with reinvestment of all dividends) was invested on March 31, 2009 in Cavco common stock and in each of the foregoing indices.

CAVCO INDUSTRIES, INC.

	3/31/2009	3/31/2010	3/31/2011	3/31/2012	3/30/2013	3/29/2014
Cavco Industries, Inc.	\$ 100	\$ 145	\$ 191	\$ 197	\$ 202	\$ 333
Nasdaq Composite Index	\$ 100	\$ 157	\$ 182	\$ 202	\$ 214	\$ 272
Peer Group	\$ 100	\$ 106	\$ 115	\$ 52	\$ 39	\$ 50
