"Safe Harbor" Statement under the Private Securities Litigation Reform Act of 1995

This document contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934. Any statements in this document that do not describe historical facts are forward-looking statements. Forward-looking statements in this document (including forward-looking statements regarding the continued health of segments of the hospitality industry, future information technology outsourcing opportunities, an expected increase or decrease in contract funding by the U.S. Government, the impact of current world events on our results of operations, the effects of inflation on our margins, and the effects of interest rate and foreign currency fluctuations on our results of operations) are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. When we use words such as "intend," "anticipate," "believe," "estimate," "plan," "will," or "expect", we are making forward-looking statements. We believe the assumptions and expectations reflected in such forward-looking statements are reasonable, based on information available to us on the date hereof, but we cannot assure you these assumptions and expectations will prove to have been correct or we will take any action we presently may be planning. We have disclosed certain important factors that could cause our actual future results to differ materially from our current expectation, including: a decline in the volume of purchases made by one or a group of our major customers; risks in technology development and commercialization; risks of downturns in economic conditions generally, and in the quick-service sector of the hospitality market specifically; risks associated with government contracts; risks associated with competition and competitive pricing pressures; and risks related to foreign operations. Forward-looking statements made in connection with this report are necessarily qualified by these factors. We are not undertaking to update or revise publicly any forward-looking statement if we obtain new information or upon the occurrence of future events or otherwise.

PAR TECHNOLOGY CORPORATION

PART I

Item 1: Business

PAR Technology Corporation (PAR or the Company) has operations in two distinct business segments: Hospitality and Government.

PAR's Hospitality business, representing approximately 64% of consolidated revenue for 2012, provides technology solutions, including hardware, software and a range of support services, to businesses and organizations in the global hospitality industries. The Company continues to be a leading provider of hospitality management technology systems to restaurants (the Quick Service, Fast Casual and Table Service categories make up our Restaurant business, which is conducted through the Company's ParTech, Inc., subsidiary) with over 50,000 systems installed in over 110 countries. The Company's PAR Springer-Miller Systems, Inc. (PSMS) subsidiary provides guest-centric property management solutions to hotels, resorts, spas, casinos, and other hospitality properties worldwide.

PAR's Government business, representing approximately 36% of consolidated revenue for 2012, provides a range of technical services for the U.S. Department of Defense and other federal, state, and local governmental organizations.

PAR Government Systems Corporation specializes in the development of advanced signal and image processing and management systems with a focus on geospatial intelligence, geographic information systems, and command and control applications. Additionally, the Company's Rome Research Corporation subsidiary provides information technology, communications, and related services to the U.S. Department of Defense, providing comprehensive operational support worldwide.

Information concerning the Company's industry segments for the two years ended December 31, 2012 is set forth in Note 11 "Segments and Related Information" in the Notes to the Consolidated Financial Statements.

PAR's corporate headquarters are located at PAR Technology Park, 8383 Seneca Turnpike, New Hartford, NY 13413-4991, and our telephone number is (315) 738-0600. We maintain significant facilities for our Hospitality segment in our New Hartford headquarters, as well as Boca Raton, FL, Boulder, CO, Las Vegas, NV, Shanghai, People's Republic of China, Stowe, VT, and Toronto, Canada. We maintain Hospitality sales offices worldwide. The Company's Government business has a presence in our New Hartford headquarters, and maintains significant facilities in Rome, NY. Our Government business has employees worldwide in fulfillment of our contract-based support services.

The Company's common stock is traded on the New York Stock Exchange under the symbol "PAR". Through PAR's website (our website address is <http://www.partech.com>), our Annual Report on Form 10-K, quarterly reports on Form 10-Q, and current reports on Form 8-K and amendments thereto are available to interested parties, free of charge. Information contained on our website is not part of this Annual Report on Form 10-K.

Unless the context otherwise requires, the term "PAR" or "Company" as used herein, means PAR Technology Corporation and its wholly-owned subsidiaries.

Hospitality Segment

PAR provides information technology solutions to two markets within its Hospitality Segment: Restaurants and Hotels. The Hotel market also includes Resorts and Spas. PAR's solutions for the Restaurant market combine software applications, hardware platforms and installation and lifecycle support services. PAR's hardware offerings for the Restaurant market include order-entry terminals, self-service kiosks, kitchen systems utilizing printers and/or video monitors, and a range of food safety monitoring and task management tools. PAR's software offerings for the Restaurant market include front-of-store (known as Point-of-Sale or POS) software applications, operations management software applications (known as Back Office or BOH), and enterprise software applications for content management and business intelligence.

As a leading vendor to the Restaurant market, PAR has developed committed long-term relationships with the industry's three largest organizations, McDonald's Corporation, Yum! Brands, Inc., and the SUBWAY® franchisees of Doctor's Associates Inc. McDonald's® has over 34,000 restaurants in more than 119 countries, and PAR has been an approved provider of restaurant technology systems and support services to their organization since 1979. Yum! Brands®, which includes Taco Bell®, KFC®, and Pizza Hut™, has been a PAR customer since 1983. Yum! Brands have nearly 38,000 units in more than 120 countries, and PAR continues to be a major supplier of management technology systems to chains within the Yum! Brands portfolio. The Company continues to expand our installed base of hardware technology with SUBWAY, which has more than 38,000 restaurants in over 100 countries. Other significant hospitality chains for which PAR is the POS vendor of choice include the Baskin-Robbins® unit of Dunkin' Brands Group, Inc., Boston Market Corporation, the Hardee's® and Carl's Jr.® units of CKE Restaurants, Inc., the Carnival Cruise Lines® unit of Carnival Corporation & plc, Catalina Restaurant Group Inc., Legal Sea Foods, LLC, and franchisees of these organizations.

In the Hotel/Resort/Spa market, PAR, through the Company's PSMS subsidiary, is a leading global provider of software solutions for a variety of property types including city-center hotels, destination spa and golf resorts, cruise ships, and casino hotels. High profile customers utilizing PAR solutions include The Old Course Hotel at St. Andrews, a unit of Kohler Company, Pebble Beach Resorts® of the Pebble Beach Company, and Gleneagles Hotel© unit of Diageo plc. Large hotel chains utilizing one or more of PAR's software solution offerings include Accor SA, Four Seasons Hotels Limited, the Fairmont® and Swisotel® units of FRHI Holdings Limited, Hilton Worldwide, Inc., Kempinski AG, Mandarin Oriental Hotel Group, Marriott International, Inc. and its Ritz-Carlton subsidiary, The Maybourne Group, and Starwood Hotels & Resorts Worldwide, Inc.

Products

The Company offers its hardware, software and services as an integrated solution or unbundled, on an individual basis. PAR's hardware offerings, particularly our POS terminals, are well regarded by customers for their broad functionality, reliability, and high quality. The Company frequently sells our hardware in combination with our services, thereby delivering maximum system performance on a cost-effective turnkey basis. PAR emphasizes to customers the operational and economic value of a bundled, integrated solution, combining hardware, software and services, offering customers a comprehensive solution capable of not only enabling efficient restaurant operation, but also providing operational and marketing insights.

Hardware

PAR's EverServ® family of hardware platforms are designed for harsh hospitality environments, to be durable, scalable and easily integrated - offering customers' competitive performance at a cost-conscious price. Our hardware platforms, compatible with popular operating systems, support a distributed processing environment and are suitable for a broad range of use and functions within the markets we serve. PAR's open architecture POS terminals are optimized to host our EverServ POS software applications, as well as most third-party POS applications, and are compatible with many peripheral devices, including various customer "interaction" peripherals. We partner with numerous vendors of complementary in-store peripherals, from cash drawers, card readers and printers to kitchen video systems, allowing us to provide a complete solution coordinated and delivered by one vendor.

PAR currently offers a range of POS hardware system designs and capabilities, from counter systems to kiosks designed with the intent to meet the needs of our customers, regardless of the restaurant concept, the size of the organization or the complexity of its requirements. During 2012, PAR's hardware terminal offerings were comprised of three POS system lines: PAR EverServ 7000, PAR EverServ 6000 and PAR EverServ 2000.

Introduced in 2012, the EverServ 7000 series is PAR's flagship POS platform that was designed to offer PAR's ultimate combination of performance, style, ease of service, remote management, flexibility and modularity.

The EverServ 6000 platform has been PAR's high performance, rugged and reliable POS terminal for the past several years which has been deployed globally across some of the world's largest restaurant chain.

The more compact EverServ 2000 platform was designed for value conscious customers and for environments where space is a premium.

Software: Restaurant Market

Our 2012 restaurant market software offerings were designed to meet the requirements of large and small operators, franchise and enterprise alike in the three dominant restaurant categories: Quick Serve Restaurants (QSR), Fast Casual Restaurants (FC), and Table Service Restaurants (TSR). Each of these restaurant categories has distinct operating characteristics and service delivery requirements and PAR's family of EverServ™ software offerings, were designed with the intent of, enabling customers to configure their technology systems to meet their order entry, food preparation, inventory, and workforce management needs, while capturing all pertinent POS and BOH transaction data at each location and delivering valuable insight throughout the enterprise.

In addition to POS software, PAR offers a number of complementary restaurant applications for the enterprise customer. EverServ Operations Reporting is a Web-based enterprise reporting solution that consolidates data from all restaurant locations, and is offered either as an on-premises installation or as a Software-as-a-Service (SaaS).

Designed for corporate, field, and site managers, this decision-making solution provides visibility into every restaurant location via a dashboard displaying customer-defined financials, sales analysis, marketing, inventory, and workforce variables. EverServ Operations reporting was also designed to be capable of integration into customers' business applications such as financials, payroll, and supply-chain systems. PAR also offers tools for forecasting, labor scheduling, and inventory management.

Software: Hotel/Resort/Spa Market

For the Hotel/Resort/Spa market, the Company's guest-centric property management software provides a series of fully integrated modules that manage all aspects of the guest experience, as well as consolidating guest information and history across the operation into a single database. PAR develops, sells and supports the SMS|Host® Hospitality Management System, a leading solution in the market for the luxury and resort segment of the global hospitality industry. PAR's SMS|Host platform remains a market leader because of its robust guest-centric functionality, allowing hotel staff to coordinate, cross-sell, and deliver personalized guest services across all various services of large, complex resort operations. The flexibility of the SMS|Host platform, with numerous seamlessly integrated, guest-centric modules, provides the tools our hotel customers need to personalize service, anticipate guest needs, and consistently exceed guest expectations.

With PAR's continued competitive focus and position as a leader in the high-end property segment and trends in the Hotel/Resort/Spa market, in 2011 we developed a highly flexible, highly scalable next generation software solution that increased PAR's addressable market to drive future revenue growth. PSMS introduced the ATRIO® platform of solutions, which was designed as a significant redefinition of the functionality and delivery of hospitality management software. While PSMS will continue to sell and support SMS|Host, the Company expects ATRIO, with its innovative capabilities and broader market application, to become a source of revenue growth for PSMS in 2013 and beyond.

PSMS also provides SpaSoft®, the industry's leading Spa Management System. Twenty-two of the top thirty five star spas in the world use SpaSoft to support their operations. We designed SpaSoft to satisfy the unique needs of resort spas, day spas, and medi-spas. SpaSoft's unique booking engine, advanced resource inventory, yield management module, scheduling, management and reporting tools assist in the total management of sophisticated hotel/resort spas and day spas. Because we designed SpaSoft specifically for the needs of the spa industry, it enables the spa staff to provide the individualized, impeccable guest service that their most important clients desire and expect.

EverServ SureCheck™

In 2011, we introduced the EverServ SureCheck platform, which provides food safety monitoring and employee task management capabilities. The EverServ SureCheck platform combines a cloud-based enterprise server application, a PDA-based mobile application and an integrated temperature measuring device for managing Hazard Analysis & Critical Control Points (HACCP) inspection programs for retail and food service organizations, and automates the monitoring of quality risk factors while dramatically lowering the potential for human error. The SureCheck platform was also designed to help hospitality and retail operators efficiently complete and monitor compliance of employee - assigned tasks, providing guidance on abnormal checklist conditions, configurable, automated alerts when checks are behind schedule or out of compliance and for oversight and loss prevention, safety, merchandising, and other audits with SureCheck.

Services

PAR offers customer support services to both its Restaurant customers and its Hotel/Resort/Spa customers, although, for the Restaurant market, the scale of our infrastructure is substantially larger and the nature of the services provided far broader.

The Company believes its ability to offer direct installation, maintenance, and support services are one of PAR's key differentiators in the Restaurant market. PAR works closely with its customers to identify and address the latest hospitality technology requirements by creating interfaces to equipment, including innovations such as automated cooking and drink-dispensing devices, customer-activated terminals and order display units located inside and outside of the customer's premises. PAR provides systems integration expertise to interface specialized components, such as video monitors, coin dispensers and non-volatile memory for journalizing transaction data, as is required in some international applications.

PAR employs experienced individuals with diverse hospitality backgrounds in both the Restaurant and Hotel/Resort/Spa markets. The Company's personnel continuously evaluate new technologies and adopt those that allow PAR to provide significant improvements in customers' day-to-day systems. From hand-held wireless devices to advances in internet performance, the technical staff is available for consultation on a wide variety of topics including network infrastructures, system functionality, operating system platforms, and hardware expandability. In addition, the Company has secured strategic partnerships with third-party organizations to offer a variety of credit, debit and gift card payment options.

Installation and Training

In the United States, Canada, Europe, the Middle East, Australia, and Asia, PAR personnel provide software configuration, installation, training, and integration services as a normal part of the software or equipment purchase agreement. In certain areas of North and South America, Europe, and Asia, we provide these installation and training services through PAR certified partners. PAR is also staffed to provide complete application training for a site's staff as well as technical instruction for customers' information systems personnel.

Maintenance and Service

PAR offers a wide range of maintenance and support services as part of its total solution for the hospitality markets we serve. In North America, the Company provides comprehensive maintenance and installation services for its software, hardware and systems, as well as those of third parties, utilizing PAR-staffed, round-the-clock, central telephone customer support and diagnostic service centers in Boulder, CO, and Las Vegas, NV. The Company also has direct service capabilities in Australia and Asia.

PAR maintains a field service network, consisting of over 100 locations, offering on-site service and repair, as well as depot repair and overnight unit replacements. At the time a hospitality technology system is installed, PAR trains customer employees and managers to ensure efficient and effective use of the system.

PAR's service organization utilizes a suite of software applications that allows PAR to offer value to its customers through the utilization of its extensive and growing knowledge base to diagnose and resolve customer-service issues. This also enables PAR to compile the kind of in-depth information it needs to identify trends and opportunities. If an issue arises with our products (hardware or software), PAR's customer service management software allows a service technician to diagnose the problem remotely, thereby reducing in many cases the on-site service calls. PAR's service organization is further enabled by a sophisticated customer relationship management system that allows our call center personnel to maintain a profile on each customer's background, hardware and software details, client service history, and a problem-resolution database.

Sales and Marketing

Within the Hospitality Segment, PAR has separate sales organizations and channels targeting the markets we serve.

In the Restaurant market, the Company employs a direct sales force in several sales groups concentrating on both large chain corporate customers and their franchisees. Sales efforts also are directed toward franchisees of large chains for which the Company is not a selected corporate vendor. The Company utilizes an International Sales Group that markets to major customers with global locations and to international chains without a presence in the United States.

The Company's Indirect Sales Channel targets distributors, sales representatives, and value-added resellers serving the independent restaurant sector and non-foodservice markets such as retail, convenience, amusement parks, movie theaters, cruise lines, spas and other ticketing and entertainment venues.

Sales in the Hotel/Resort/Spa market are coordinated by five sales groups. The Domestic Sales Group targets independent, business class and luxury hotels, resorts and spas in the United States, Canada and the Caribbean, while the International Sales Group targets independent hotels and resorts outside of the United States. The Major Accounts Sales Group works with high profile corporate and chain clients. The Company's Installed Accounts Sales Group works solely with clients who have already installed the ^{SMS}|Host product suite. The Business Development group focuses on proactive identification of an initial penetration into new business channels for the ATRIO, ^{SMS}|Host and SpaSoft product lines worldwide.

Competition

The markets in which we operate are highly competitive. Important competitive variables in the hospitality market include functionality, reliability, quality, pricing, service and support. In the Restaurant market, we believe our competitive advantages include our focus on an integrated technology solution offering, advanced development capabilities, extensive domain knowledge and expertise, excellent product reliability, a direct sales force organization, world class support and quick service response. In the Hotel/Resort/Spa market, we believe our competitive advantages include our extensive domain knowledge, long-standing industry leadership, the guest-centric orientation of our software, and our high level of customer support. Most of our significant customers have approved several suppliers offering some form of sophisticated hospitality technology system similar to that of the Company. Major competitors include Micros Systems, Inc., NCR Corporation and Panasonic Corporation.

Backlog

Due to the nature of the hospitality business, backlog is not significant at any point in time. The Hospitality segment orders are generally of a short-term nature and are usually booked and shipped in less than 12 months.

Research and Development

The highly technical nature of the Company's hospitality products requires a significant and continuous research and development effort. Ongoing product research and quality development efforts are an integral part of all activities within the Company. Functional and technical enhancements are actively being made to our products to increase customer satisfaction and maintain the high caliber of PAR's software. Research and development expenses were approximately \$13.7 million in 2012 and \$13.8 million in 2011. The Company capitalizes certain software costs in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic No. 985. See Note 1, "Summary of Significant Accounting Policies," to the Consolidated Financial Statements included in Part IV, Item 15 for further discussion.

Manufacturing and Suppliers

The Company sources and/or assembles some of its products from standard electronic components, fabricated parts such as printed circuit boards, and mechanical components. Many assemblies and components are manufactured by third parties to our specifications. PAR depends on outside suppliers for the continued availability of its assemblies and components. Although most items are generally available from a number of different suppliers, PAR purchases certain final assemblies and components from single sources. Items purchased from single sources include certain POS devices, peripherals, custom molded and tooled components, and electronic assemblies and components. If such a supplier should cease to supply an item, we believe new sources could be found to provide the components. However, added cost and manufacturing delays could result and adversely affect our performance. The Company has not experienced significant delays of this nature in the past, but there can be no assurance that delays in delivery due to supply shortages will not occur in the future.

Intellectual Property

The Company owns or has rights to certain patents, copyrights and trademarks. PAR relies upon non-disclosure agreements, license agreements and applicable domestic and foreign patent, copyright and trademark laws for protection of our intellectual property. To the extent such protective measures are unsuccessful, or the Company need to enter into protracted litigation to enforce such rights, the Company's business could be adversely impacted. Similarly, there is no assurance that the Company's products will not become the subject of a third-party claim of infringement or misappropriation. To the extent such claims result in costly litigation or force the Company to enter into royalty or license agreements, rather than enter into a prolonged dispute, our performance could be adversely impacted. The Company also licenses certain third-party software with its products. While PAR maintains strong relationships with our licensors, there is no assurance such relationships will continue or that the licenses will be continued under fees and terms acceptable to the Company.

Government Segment

The Company operates two wholly-owned subsidiaries within the Government segment, PAR Government Systems Corporation (PGSC) and Rome Research Corporation (RRC). PGSC and RRC provide command, control, communications, computers, intelligence, surveillance and reconnaissance (C4ISR) support to U.S. Department of Defense and other federal agencies.

PAR's PGSC subsidiary delivers advanced technology in geospatial intelligence, geographic information systems, and command and control applications. PGSC's offerings support the entire technology lifecycle to include requirements analysis, design specification, development, implementation, installation, test and evaluation.

PAR's RRC subsidiary provides worldwide communication and information technology support. RRC's technical services support satellite operations and communications, battlefield networks, the global information grid, and various other information technology requirements ranging from advanced systems to basic help desk support. RRC supports the U.S. Navy, the U.S. Army, the U.S. Air Force and the Department of State with operations worldwide.

PAR pursues businesses in four service areas:

Intelligence, Surveillance and Reconnaissance (ISR): The Company provides a variety of geospatial intelligence solutions including full motion video, geospatial information assurance, raster imagery, and light detection and ranging (LiDAR). In depth expertise in these domains provides government customers and large systems integrators with key technologies supporting a range of applications from strategic enterprise systems to tactical individual users. Furthermore, PAR has developed a number of products relative to these advanced technologies and provides integration and training support.

Systems Engineering & Evaluation: The Company integrates and tests Electro-Optical (EO), Infrared (IR), Radar, and multi/hyper-spectral sensor systems for a broad range of government and industry surveillance applications. PAR developed the Multi-mission Advanced Sensor System (MASS), which assists with counter-terrorism, first responder, environmental, and drug enforcement applications. In addition, the Company designs and integrates radar sensor systems including experimentation, demonstration, and test support.

Communications Systems Support: The Company provides a wide range of technical and support services to sustain mission critical components of the Department of Defense Global Information Grid (GIG). These services include continuous operations, system enhancements and maintenance of very low frequency (VLF), high frequency (HF) and very high frequency (VHF) radio transmitter/receiver facilities, and extremely high frequency (EHF) and super high frequency (SHF) satellite communication heavy earth terminal facilities. These Department of Defense communications systems services are provided at customer locations in and outside of the continental United States. The various facilities, operating 24 x 7, are integral to the command and control of the nation's air, land and naval forces and those of United States coalition allies.

Information Systems: The Company provides technical expertise to support the government's information management systems, primarily net-centric information technology services in support of Department of Defense customers. This on-site support includes infrastructure sustainment, configuration management, system staging, information assurance and network security tasks.

Products

Although a minor part of the Company's Government business, PAR markets a software product line built on PAR's background and expertise in both Federal Government and commercial video standards and visualization products.

The centerpiece of the PAR software is Gv²F™, a software toolkit for developers seeking to integrate full-motion video (FMV) into their geospatial software products. The toolkit provides simple yet robust C++, C#, and Java Application Programming Interfaces (APIs) and is fully compliant with Commercial MPEG-2 Transport Program Stream and Motion Imagery Standards Board (MISB) Key Length Value (KLV) meta-data standards. Additional software in the Gv product line provide further tools for visualizing and manipulating motion and still imagery files. PAR also sells encryption and watermarking technology, called VectorLock®, for management of high value Geographic Information System (GIS) information.

Government Contracts

The Company performs work for U.S. Government agencies under firm fixed-price, cost-plus-fixed-fee, and time-and-material contracts. The majority of these contracts have a period of performance of one to five years. There are several risks associated with Government contracting. For instance, contracts may be reduced in size, scope and value, as well as modified, delayed and/or cancelled depending upon the Government's requests, budgets, policies and/or changes in regulations. Contracts can also be terminated for the convenience of the Government at any time the Government believes that such termination would be in its best interests. In this circumstance, the Company is entitled to receive payments for its allowable costs and, in general, a proportionate share of its fee or profit for the work actually performed. The Company may also perform work prior to formal authorization or prior to adjustment of the contract price for increased work scope, change orders and other funding adjustments. In this situation, the Company is performing the work under our own risk and would be responsible for any costs incurred during this time.

Additionally, the Defense Contract Audit Agency regularly audits the financial records of the Company. Such audits can result in adjustments to contract costs and fees. Audits have been completed through the Company's fiscal year 2006 and have not resulted in any material adjustments.

Marketing and Competition

Contracts are obtained principally through competitive proposals in response to solicitations from government organizations and prime contractors. In addition, the Company sometimes obtains contracts by submitting unsolicited proposals. Although the Company believes it is well positioned in its business areas, competition for Government contracts is intense. Many of the Company's competitors are major corporations, or subsidiaries thereof, that are significantly larger and have substantially greater financial resources. The Company also competes with many smaller companies, many of which are designated by the Government for preferential "set aside" treatment, that target particular segments of the government contract market. The principal competitive factors are past performance, the ability to perform the statement of work, price, technological capabilities, management capabilities and service. Many of the Company's Department of Defense customers are now migrating to commercial software standards, applications, and solutions.

Backlog

The value of existing Government contracts at December 31, 2012, net of amounts relating to work performed to that date was approximately \$139.5 million, of which \$52.7 million was funded. The value of existing Government contracts at December 31, 2011, net of amounts relating to work performed to that date was approximately \$134.4 million, of which \$51.4 million was funded. Funded amounts represent those amounts committed under contract by Government agencies and prime contractors. The December 31, 2012 Government contract backlog of \$139.5 million represents firm, existing contracts. Of this backlog amount, approximately \$74.1 million is expected to be completed in calendar year 2013, as funding is committed.

Employees

As of December 31, 2012, the Company had 1,382 employees, approximately 59% of whom were engaged in the Company's Hospitality segment, 37% of whom were in the Government segment, and 4% of whom were corporate employees.

Due to the highly technical nature of the Company's business, the Company's future can be significantly influenced by its ability to attract and retain its technical staff. The Company believes it has and will be able to continue to fulfill its near-term needs for technical staff.

Approximately 11% of the Company's employees are covered by collective bargaining agreements. The Company considers its employee relations to be good.

Exchange Certifications

The certification of the Chief Executive Officer of PAR required by Section 303A.12(a) of the New York Stock Exchange (NYSE) Listed Company Manual, relating to PAR's compliance with the NYSE's corporate governance listing standards, was submitted to the NYSE on July 3, 2012 with no qualifications.

Item 1A: Risk Factors

The Company operates in a dynamic and rapidly changing environment involving numerous risks and uncertainties.

The following section describes some, but not all, of the risks and uncertainties that could have a material adverse effect on our business, financial condition, results of operations and the market price of our common stock, and could cause our actual results to differ materially from those expressed or implied in our forward-looking statements.

Our future operating results are difficult to predict and are subject to fluctuations.

Our future operating results, including revenues, gross margins, operating expenses and net income (loss), have fluctuated on a quarterly and annual basis, are difficult to predict, and may be materially affected by a number of factors, many of which are beyond our control, including:

- the effects of adverse macroeconomic conditions in the United States and international markets, especially in light of the continued challenges in global credit and financial markets;
- changes in customer demand for our products;
- the timing of our new product announcements or introductions, as well as those by our competitors;
- the level of demand and purchase orders from our customers, and our ability to adjust to changes in demand and purchase order patterns;
- the ability of our third party suppliers, subcontractors and manufactures to supply us with sufficient quantities of high quality products or components, on a timely basis;
- the effectiveness of our efforts to reduce product costs and manage operating expenses;
- the ability to hire, retain and motivate qualified employees to meet the demands of our customers;
- intellectual property disputes;
- potential significant litigation-related costs;
- costs related to compliance with increasing worldwide environmental and other regulations; and
- the effects of public health emergencies, natural disasters, security risk, terrorist activities, international conflicts and other events beyond our control.

As a result of these and other factors, there can be no assurance that the Company will not experience significant fluctuations in future operating results on a quarterly or annual basis. In addition, if our operating results do not meet the expectations of investors, the market price of our common stock may decline.

Our stock price has been volatile and may fluctuate in the future.

The trading price of our common stock has and may continue to fluctuate significantly. Such fluctuations may be influenced by many factors, including:

- the volatility of the financial markets;
- uncertainty regarding the prospects of domestic and foreign economies;
- uncertainty regarding domestic and international political conditions, including tax policies;
- our performance and prospects;
- the performance and prospects of our major customers;
- investor perception of our company and the industry in which we operate;
- the limited availability of earnings estimates and supporting research by investment analysts;
- the liquidity of the market for our common stock; and

the concentration of beneficial ownership of our common stock by Dr. John W. Sammon, Director and Chairman Emeritus of PAR's Board of Directors.

Public stock markets have recently experienced price and trading volume volatility. This volatility significantly and negatively affected the market prices of securities of many technology companies and the return of such volatility could result in broad market fluctuations that could materially and adversely affect the market price of our common stock for indefinite periods. In addition, fluctuations in our stock price, volume of shares traded, and changes in our trading multiples may make our stock attractive to certain categories of investors who often shift funds into and out of stocks rapidly, exacerbating price fluctuations in either direction.

A decline in the volume of purchases made by any one of the company's major customers would materially adversely affect our business.

A small number of related customers have historically accounted for a majority of the Company's net revenues in any given fiscal period. For each of the fiscal years ended December 31, 2012 and 2011, aggregate sales to our top two Hospitality segment customers, McDonald's Corporation and Yum! Brands, Inc. amounted to 35% and 42% of total revenues, respectively. Most of the Company's customers are not obligated to provide us with any minimum level of future purchases or with binding forecasts of product purchases for any future period. In addition, major customers may elect to delay or otherwise change the timing of orders in a manner that could adversely affect the Company's quarterly and annual results of operations. There can be no assurance our current customers will continue to place orders with us, or we will be able to obtain orders from new customers.

An inability to produce new products that keep pace with technological developments and changing market conditions could result in a loss of market share.

The products we sell are subject to rapid and continual changes in technology. Our competitors offer products that have an increasingly wider range of features and capabilities. We believe that in order to compete effectively, we must provide systems incorporating new technologies at competitive prices. There can be no assurance we will be able to continue funding research and development at levels sufficient to enhance our current product offerings, or the Company will be able to develop and introduce on a timely basis, new products that keep pace with technological developments and emerging industry standards and address the evolving needs of customers. There also can be no assurance we will not experience difficulties that will result in delaying or preventing the successful development, introduction and marketing of new products in our existing markets, or our new products and product enhancements will adequately meet the requirements of the marketplace or achieve any significant degree of market acceptance.

Likewise, there can be no assurance as to the acceptance of our products in new markets, nor can there be any assurance as to the success of our penetration of these markets, nor to the revenue or profit margins realized by the Company with respect to these products. If any of our competitors were to introduce superior software products at competitive prices, or if our software products no longer meet the needs of the marketplace due to technological developments and emerging industry standards, our software products may no longer retain any significant market share.

We generate much of our revenue from the hospitality industry and therefore are subject to decreased revenues in the event of a downturn in that industry.

For the fiscal years ended December 31, 2012 and 2011, we derived 64% and 70%, respectively, of our total revenues from the hospitality industry, primarily the QSR market. Consequently, our hospitality technology product sales are dependent in large part on the health of the hospitality industry, which in turn is dependent on the domestic and international economy, as well as factors such as consumer buying preferences and weather conditions. Instabilities or downturns in the hospitality market could disproportionately impact our revenues, as clients may exit the industry or delay, cancel or reduce planned expenditures for our products. Although we believe we can succeed in the quick service restaurant sector of the hospitality industry in a competitive environment, given the cyclical nature of that industry, there can be no assurance our profitability and growth will continue.

we face extensive competition in the markets in which we operate, and our failure to compete effectively could result in price reductions and/or decreased demand for our products and services.

Several competing suppliers offer hospitality management systems similar to ours. Some of these competitors are larger than PAR and have access to substantially greater financial and other resources and, consequently, may be able to obtain more favorable terms than we can for components and subassemblies incorporated into these hospitality technology products. The rapid rate of technological change in the Hospitality segment makes it likely we will face competition from new products designed by companies not currently competing with us. These new products may have features not currently available from us. We believe our competitive ability depends on our total solution offering, our experience in the industry, our product development and systems integration capability, our direct sales force and our customer service organization. There is no assurance; however, we will be able to compete effectively in the hospitality technology market in the future.

Our Government contracting business has been focused on niche offerings, reflecting our expertise, primarily in the areas of Communications Systems Support, Intelligence, Surveillance and Reconnaissance (ISR), Systems Engineering & Evaluation and Information Systems services. Many of our competitors are larger and have substantially greater financial resources and broader capabilities in information technology. We also compete with smaller companies, many of which are designated by the Government for preferential "set aside" treatment, that target particular segments of the government market and may have superior capabilities in a particular segment. These companies may be better positioned to obtain contracts through competitive proposals. Consequently, there are no assurances we will continue to win Government contracts as a direct contractor or indirect subcontractor.

we may not be able to meet the unique operational, legal and financial challenges that relate to our international operations, which may limit the growth of our business.

For the fiscal years ended December 31, 2012, and 2011, our net revenues from sales outside the United States were 15% and 13%, respectively, of the Company's total revenues. We anticipate international sales will continue to account for a significant portion of sales. We intend to continue to expand our operations outside the United States and to enter additional international markets, which will require significant management attention and financial resources. Our operating results are subject to the risks inherent in international sales, including, but not limited to, regulatory requirements, political and economic changes and disruptions, geopolitical disputes and war, transportation delays, difficulties in staffing and managing foreign sales operations, and potentially adverse tax consequences. In addition, fluctuations in exchange rates may render our products less competitive relative to local product offerings, or could result in foreign exchange losses, depending upon the currency in which we sell our products. There can be no assurance these factors will not have a material adverse affect on our future international sales and, consequently, on our operating results.

We derive a portion of our revenue from U.S. government contracts, which contain provisions unique to public sector customers, including the U.S. government's right to modify or terminate these contracts at any time.

For the fiscal years ended December 31, 2012 and 2011, we derived 36% and 30%, respectively, of our total revenues from contracts to provide technical expertise to Government organizations and prime contractors. In any year, the majority of our Government contracting activity is associated with the U.S. Department of Defense. Contracts with the U.S. Government typically provide that such contracts are terminable, in full or in part, at the convenience of the U.S. Government. If the U.S. Government terminated a contract on this basis, we would be entitled to receive payment for our allowable costs and, in general, a proportionate share of our fee or profit for work actually performed. Most U.S. Government contracts are also subject to modification or termination in the event of changes in funding.

As such, we may perform work prior to formal authorization, or the contract prices may be adjusted for changes in scope of work. Termination or modification of a substantial number of our U.S. Government contracts could have a material adverse effect on our business, financial condition and results of operations.

In addition, the general uncertainty in U.S. defense total workforce policies (military, civilian and contract), procurement cycles and spending levels for the next several years may impact the performance of this business.

Specifically, the Company could experience reductions in revenue as a result of the U.S. Government in-sourcing its current service contracts or the Company could experience a reduction of funding due to U.S. Government sequester or other funding reductions.

We perform work for various U.S. Government agencies and departments pursuant to fixed-price, cost-plus fixed fee and time-and-material prime contracts and subcontracts. Approximately 51% of the revenue that we derived from government contracts for the year ended December 31, 2012 came from fixed-price or time-and-material contracts.

The balance of the revenue that we derived from Government contracts in 2012 primarily came from cost-plus fixed fee contracts. Most of our contracts are for one-year to five-year terms.

While fixed-price contracts allow us to benefit from cost savings, they also expose us to the risk of cost overruns. If the initial estimates we use for calculating the contract price are incorrect, we can incur losses on those contracts. In addition, some of our governmental contracts have provisions relating to cost controls, and audit rights and if we fail to meet the terms specified in those contracts, then we may not realize their full benefits. Lower earnings caused by cost overruns would have an adverse effect on our financial results.

Under time-and-materials contracts, we are paid for labor at negotiated hourly billing rates and for certain expenses.

Under cost-plus fixed fee contracts, we are reimbursed for allowable costs and paid a fixed fee. However, if our costs under either of these types of contract exceed the contract ceiling or are not allowable under the provisions of the contract or applicable regulations, we may not be able to obtain reimbursement for all of our costs.

If we are unable to control costs incurred in performing under each type of contract, such inability to control costs could have a material adverse effect on our financial condition and operating results. Cost over-runs also may adversely affect our ability to sustain existing programs and obtain future contract awards.

a significant portion of our total assets consists of goodwill and identifiable intangible assets, which are subject to a periodic impairment analysis and a significant impairment determination in any future period, could have an adverse effect on our results of operations even without a significant loss of revenue or increase in cash expenses attributable to such period.

We have goodwill and identifiable intangible assets at December 31, 2012 totaling approximately \$6.8 million and \$11.7 million, respectively; resulting primarily from business acquisitions and internally developed capitalized software. The Company tests goodwill for impairment annually or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. We describe the impairment testing process and results of this testing more thoroughly herein in Item 7 under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies." If we determine an impairment has occurred at any point in time, we will be required to reduce goodwill or identifiable intangible assets on our balance sheet.

Item 1B: Unresolved Staff Comments

None.

Item 2: Properties

The following are the principal facilities (by square footage) of the Company:

Location	Industry Segment	Floor Area Principal Operations	Number of Sq. Ft.
New Hartford, NY	Hospitality Government	Principal executive offices, manufacturing, research and development laboratories, computing facilities	128,675
Rome, NY	Government	Research and development	31,900
Stowe, VT	Hospitality	Sales, service and research and development	21,300
Boulder, CO	Hospitality	Service	20,500
Boca Raton, FL	Hospitality	Research and development	14,900
Sydney, Australia	Hospitality	Sales and service	14,000
Las Vegas, NV	Hospitality	Service	12,000
Vaughn, Canada	Hospitality	Sales, service and research and development	10,000
Toronto, Canada	Hospitality	Sales, service and research and development	7,700

The Company's headquarters and principal business facility is located in New Hartford, NY, which is near Utica, in central New York State.

The Company owns its principal facility and adjacent space in New Hartford. All of the other facilities are leased for varying terms. Substantially all of the Company's facilities are fully utilized, well maintained, and suitable for use. The Company believes its present and planned facilities and equipment are adequate to service its current and immediately foreseeable business needs.

Item 3: Legal Proceedings

The Company is subject to legal proceedings which arise in the ordinary course of business. During 2012, the results from continuing operations were materially affected by legal costs incurred in our defense and resolution of a non-practicing entity patent claim. Total costs incurred in 2012 related to this specific matter were \$1.5 million.

Item 4: Mine Safety Disclosures

Not Applicable.

19

PART II

Item 5: Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The Company's Common Stock, par value \$.02 per share, trades on the New York Stock Exchange (NYSE symbol - PAR). At December 31, 2012, there were approximately 423 owners of record of the Company's Common Stock, plus those owners whose stock certificates are held by brokers.

The following table shows the high and low stock prices for the two years ended December 31, 2012 as reported by New York Stock Exchange:

Period	2012		2011	
	Low	High	Low	High
First Quarter	\$3.84	\$5.18	\$4.28	\$6.63
Second Quarter	\$4.50	\$5.14	\$3.63	\$4.99
Third Quarter	\$4.57	\$5.59	\$3.04	\$3.93
Fourth Quarter	\$4.75	\$5.55	\$3.22	\$4.00

The Company has not paid cash dividends on its Common Stock, and its Board of Directors presently intends to continue to retain earnings for reinvestment in growth opportunities. Accordingly, it is anticipated no cash dividends will be paid in the foreseeable future.

Item 6: Selected Financial Data

Not Required.

Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This document contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934. Any statements in this document that do not describe historical facts are forward-looking statements. Forward-looking statements in this document (including forward-looking statements regarding the continued health of segments of the hospitality industry, future information technology outsourcing opportunities, an expected increase or decrease in contract funding by the U.S. Government, the impact of current world events on our results of operations, the effects of inflation on our margins, and the effects of interest rate and foreign currency fluctuations on our results of operations) are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. When we use words such as "intend," "anticipate," "believe," "estimate," "plan," "will," or "expect", we are making forward-looking statements. We believe the assumptions and expectations reflected in such forward-looking statements are reasonable based on information available to us on the date hereof, but we cannot assure you these assumptions and expectations will prove to have been correct or we will take any action that we presently may be planning. We have disclosed certain important factors that could cause our actual future results to differ materially from our current expectations, including: a decline in the volume of purchases made by one or a group of our major customers; risks in technology development and commercialization; risks of downturns in economic conditions generally, and in the quick-service sector of the hospitality market specifically; risks associated with government contracts; risks associated with competition and competitive pricing pressures; and risks related to foreign operations. Forward-looking statements made in connection with this report are necessarily qualified by these factors. We are not undertaking to update or revise publicly any forward-looking statements if we obtain new information or upon the occurrence of future events or otherwise.

Overview

PAR's technology solutions for the Hospitality segment feature software, hardware and support services tailored for the needs of restaurants, luxury hotels, resorts and spas, casinos, cruise lines, movie theatres, theme parks and retailers. The Company's Government segment provides technical expertise in the contract development of advanced systems and software solutions for the U.S. Department of Defense and other federal agencies, as well as information technology and communications support services to the U.S. Department of Defense.

The Company's products sold in the Hospitality segment are utilized in a range of applications by thousands of customers. The Company faces competition across all of its markets within the Hospitality segment, competing on the basis of product design, features and functionality, quality and reliability, price, customer service, and delivery capability. PAR's continuing strategy is to provide complete integrated technology solutions and services with industry leading customer service in the markets in which it participates. The Company conducts its research and development efforts to create innovative technology offerings that meet and exceed customer requirements and also have a high probability for broader market appeal and success.

The Company is focused on expanding four distinct parts of its Hospitality businesses. First, it is investing in the market introduction and deployment of ATRIO, its next generation, cloud-based property management software for the Hotel/Resort/Spa market. Second, we are investing in the enhancement of existing software and the development of the Company's SureCheck™ product for food safety and task management applications. Third, the Company continues to work on building more robust and extensive third-party distribution channels. Fourth, as the Company's customers continue to expand in international markets, PAR has created an international infrastructure focused on that expansion.

The QSR market, PAR's primary market, continues to perform well for the majority of large, international companies, despite worldwide macroeconomic uncertainty. However, the Company has seen an impact of current economic conditions on smaller, regional QSR organizations, whose business is slowing because of higher unemployment and lack of consumer confidence in certain regions. The Company is continuing to reassess the alignment of its product and service offerings to support improved operational efficiency and profitability going forward. These conditions could have a material adverse impact on the Company's significant estimates, specifically the fair value of its assets related to its legacy products.

Approximately 36% of the Company's revenues are generated by its Government business. The Company's focus is to expand two separate aspects of its Government business: services and solutions. Through outstanding performance of existing service contracts and investing in enhancing its business development staff and processes, the Company is able to consistently win the renewal of expiring contracts, extend existing contracts, and be awarded new efforts. With its intellectual property and investment in new technologies, the Company provides solutions to the U.S. Department of Defense and other federal/state agencies with systems integration, products and highly-specialized services. The general uncertainty in U.S. defense total workforce policies (military, civilian and contract), procurement cycles and spending levels for the next several years may impact the performance of this business segment.

Results of Operations — 2012 Compared to 2011

The Company reported revenues of \$245.2 million for the year ended December 31, 2012, an increase of 7% from the \$229.4 million reported for the year ended December 31, 2011. The Company's net loss from continuing operations for the year ended December 31, 2012 was \$1.8 million, or \$0.12 loss per share, compared to net loss of \$13.4 million, or \$0.89 loss per share for the same period in 2011. During 2012, the Company reported income from discontinued operations of \$1.4 million, or \$0.10 per diluted share associated with the sale of its Logistics Management business. This compares to a loss of \$2.2 million or \$0.15 loss per share for the same period in 2011.

The Company's net loss for the year ended December 31, 2012 was \$315,000, or \$0.02 loss per share, compared to a net loss of \$15.5 million, or \$1.04 per share for fiscal year 2011.

Product revenues for the year ended December 31, 2012 were \$90.5 million, slightly below the \$91.0 million recorded for the same period 2011. This decrease was primarily the result of a decline in domestic sales to McDonald's as their significant North American upgrade program was completed in 2011. Partially offsetting this decrease was an increase in sales of the Company's SureCheck product to a significant launch customer during the year, as well as increases in product sales to YUM! Brands and SUBWAY, commensurate with new store rollouts and upgrades. Lastly, the Company experienced an increase in international product sales compared to 2011, primarily related to an increase in international McDonald's sales, as well as increases in sales made through the Company's dealer channels, which have increased 15% over 2011.

Service revenue primarily includes installation, software maintenance, training, 24 hour help desk support and various depot and on-site service options. Customer service revenues were \$66.1 million for the year ended December 31, 2012, a 5% decrease from \$69.5 million reported for the same period in 2011. This decrease was associated with a decline in installation revenue commensurate with the related decline in full system installations in the Company's Hospitality businesses as well as a decline in call center revenue resulting from a modification to existing service contracts. These decreases were partially offset by an increase in software maintenance and professional services revenue associated with the deployment of the Company's SureCheck product.

Government contract revenues were \$88.5 million for the year ended December 31, 2012, an increase of 28% when compared to the \$68.9 million recorded in 2011. This increase is mostly attributable to the Company's new Intelligence, Surveillance, and Reconnaissance (ISR) systems integration contract with the U.S. Army.

Product margins for the year ended December 31, 2012 were 27.9%, a decrease from 36.4% in the same period in 2011. The decrease was primarily the result of accelerated amortization of \$5.3 million to reduce the net carrying value of capitalized software asset in conjunction with the Company's strategic initiative to streamline its Hospitality product portfolio. Also contributing to this decrease was an unfavorable mix in product sales resulting from a reduction in the amount of terminals sold relative to lower margin peripheral devices, partially offset by an increase in software revenue driven by sales of the Company's SureCheck software product.

Customer service margins were 30.3% for the year ended December 31, 2012, compared to 18.3% for the same period in 2011. During 2011, the Company recorded a charge of \$7.7 million associated with the write down of service parts inventory related to discontinued products which did not recur in 2012. Other factors contributing to the increase were improved margins in multiple areas including international sales and depot revenue. Offsetting the aforementioned increase was a decrease in the Company's call center margin due to the modification of existing contracts.

Government contract margins were 6.4% for the year ended December 31, 2012, relatively unchanged when compared to the 6.7% for the same period in 2011. Contract margins for each year were benefited by the sale of Gv²F enterprise licenses. The most significant components of contract costs in 2012 and 2011 were labor and fringe benefits. For 2012, labor and fringe benefits were \$40.7 million, or 49% of contract costs, compared to \$45.7 million or 71% of contract costs for the same period in 2011. This decrease is mostly attributable to the amount of contract work performed by subcontractors under the Company's new ISR systems integration contract with the U.S. Army.

Selling, general and administrative expenses for the year ended December 31, 2012 were \$40.5 million, an increase of 13% from the \$35.8 million recorded for the same period in 2011. This increase was partially the result of an increase in legal expenses associated with the defense and resolution of a non-practicing entity patent claim, as well as increases in severance and other costs related to the cancellation of certain office lease matters. In addition, the increase was due to higher commission expense associated with the increase in software sales during the year, as well as an increase in sales and marketing effort associated with the Company's Hospitality products.

Research and development expenses were \$13.7 million for the year ended December 31, 2012, a slight decrease from the \$13.8 million recorded in 2011.

During the second quarter of 2011, the Company determined that as a result of the decline in the stock price that occurred during the second quarter, a goodwill impairment triggering event had occurred. The fair value of the Company's common shares declined from \$4.60 per share at April 1, 2011 to \$3.83 per share at June 30, 2011, resulting in the Company no longer being able to reconcile the aggregate fair value of its reporting units to its market capitalization after consideration of a reasonable control premium. Although there was no significant adverse change to the long term financial outlook of any of its businesses, the Company concluded that a triggering event had occurred and as a result, performed additional analyses over the valuation of its reporting units in accordance with the relevant accounting rules, recording a non-cash impairment charge of \$20.2 million to its goodwill in the second quarter of 2011. In addition to the aforementioned goodwill impairment charge, as part of this analysis, the Company recorded an impairment charge of \$580,000 associated with its indefinite lived intangible assets.

Amortization of identifiable intangible assets was \$455,000 for the year ended December 31, 2012 compared to \$840,000 for the same period in 2011. This decrease was due to certain intangible assets becoming fully amortized during 2011 and 2012.

Other income, net, was \$876,000 for the year ended December 31, 2012 compared to \$203,000 for the same period in 2011. Other income primarily includes unrealized gains on the Company's investments, strategic product development partnerships, rental income, finance charges and foreign currency gains and losses. The increase in 2012 was due to foreign currency gains as well as income related to strategic product development partnerships within the Company's Hospitality businesses.

Interest expense represents interest charged on the Company's short-term borrowings from banks and from long-term debt. Interest expense was \$69,000 for the year ended December 31, 2012, compared to \$211,000 for the same period in 2011. This reduction is associated with a lower outstanding borrowing in 2012 versus 2011.

For the year ended December 31, 2012, the Company's effective income tax rate was a benefit of 44.5%, compared to a benefit of 35.8% in 2011. The variance from the federal statutory rate in 2012 was due to state and foreign income taxes, as well as the tax impact of liquidating a foreign subsidiary. The variance from the federal statutory rate in 2011 was primarily due to research credits and state tax benefits, partially offset by an additional valuation allowance necessary related to certain deferred tax assets.

In connection with the American Taxpayer Relief Act of 2012 that was signed into law in January 2013, the Company expects to record a one-time benefit of approximately \$390,000 related to retroactive tax relief for certain tax law provisions that expired in 2012. Because the legislation was signed into law after the end of PAR's 2012 fiscal year, the retroactive effects of the bill will be reflected in the first quarter of 2013.

Liquidity and Capital Resources

The Company's primary sources of liquidity have been cash flow from operations and lines of credit with various commercial banks. Cash provided by operating activities of continuing operations was \$15.1 million for the year ended December 31, 2012 compared to \$13.7 million for the same period in 2011. In 2012, cash was generated by the Company's operating results plus the add back of non-cash expenses including the accelerated amortization of internally developed software assets that were previously capitalized. The most significant changes to the Company's operating assets and liabilities that impacted cash flow were an increase in accounts payable primarily due to the timing of payments associated with the Company's ISR contract with the U.S. Government, as well as an increase in deferred service revenue due to the timing of billing of customer service contracts. Offsetting these changes was an increase in inventory in support of shipments planned for early 2013.

In 2011, cash was generated by the Company's operating results before the non-cash goodwill and intangible asset impairment and inventory charges, offset by reductions to changes in operating assets and liabilities. The most significant changes to the Company's operating assets and liabilities were the decrease in accounts receivable due to the timing of collections of advanced service and maintenance contract billings. This was partially offset by cash used towards payments of accounts payable and accrued salaries and benefits based on the timing of payments. Cash was also used to support the execution of existing service support contracts with customers.

Cash used in investing activities from continuing operations was \$247,000 for the year ended December 31, 2012 versus \$8.3 million for the same period in 2011. In 2012, the Company received cash proceeds of \$4 million related to the sale of its Logistics Management business, and generated \$1.9 million from the maturity of its investments. In addition, \$828,000 of the proceeds from the Company's sale of its Logistics Management business remains in escrow as of yearend. Capital expenditures were \$1.9 million and were primarily related to capital investments to support the Company's new hardware products, as well as for purchases of office and computer equipment. Capitalized software was \$3.4 million and was associated with the Company's Hospitality software platforms.

In 2011, capital expenditures were \$896,000 and were primarily related to the purchase of office and computer equipment. Capitalized software costs relating to software development of Hospitality segment products were \$7.4 million, an increase from the prior year as a result of investment in the Company's Restaurant and Hotel /Resort / Spa software.

Cash used in financing activities from continuing operations was \$1.5 million for the year ended December 31, 2012 versus \$1.6 million for the same period in 2011. In 2012, the Company decreased its long-term borrowings by \$1.5 million and benefited \$24,000 from the exercise of employee stock options. In 2011, the Company decreased its long term debt by \$1.7 million and benefited \$133,000 from the exercise of employee stock options.

The Company maintains a credit facility which provides borrowing availability up to \$20 million (with the option to increase to \$30 million) in the form of a line of credit. This agreement allows the Company, at its option, to borrow funds at the LIBOR rate plus the applicable interest rate spread or at the bank's prime lending rate (3.25% at December 31, 2012). This agreement expires in June 2014. At December 31, 2012, the Company did not have any outstanding balance on this line of credit. The weighted average interest rate paid by the Company was 1.31% during fiscal year 2012. This agreement contains certain loan covenants including leverage and fixed charge coverage ratios. In February 2013, the agreement was amended to allow the Company to exclude certain extraordinary or non-recurring non-cash expenses, charges or losses, and certain litigation expenses incurred during the fourth quarter of 2012. The exclusion of these charges will be applied to the Company's debt covenant calculation through December 31, 2013. Additionally, as part of this amendment, the Company modified its definition of Earnings before Interest, Taxes, Depreciation and Amortization (EBITDA), to exclude certain non-cash charges for the remainder of the agreement. The Company is in compliance with these amended covenants at December 31, 2012. This credit facility is secured by certain assets of the Company.

The Company has a \$1.2 million mortgage loan, collateralized by certain real estate. This mortgage matures on November 1, 2019. In May 2012, the Company amended its mortgage to reduce the fixed interest rate to 4.05% through October 1, 2014. Beginning on October 1, 2014 and through the maturity date of the loan, the fixed rate will be converted to a new rate equal to the then-current five year fixed advanced rate charged by the New York Federal Home Loan bank, plus 225 basis points. The annual mortgage payment including interest through October 1, 2014 totals \$207,000.

During fiscal year 2013, the Company anticipates that its capital requirements will not exceed approximately \$5-6 million. The Company does not usually enter into long term contracts with its major Hospitality segment customers. The Company commits to purchasing inventory from its suppliers based on a combination of internal forecasts and actual orders from customers. This process, along with good relations with suppliers, minimizes the working capital investment required by the Company. Although the Company lists two major customers, McDonald's and Yum! Brands, it sells to hundreds of individual franchisees of these corporations, each of which is individually responsible for its own debts. These broadly made sales substantially reduce the impact on the Company's liquidity if one individual franchisee reduces the volume of its purchases from the Company in a given year. The Company, based on internal forecasts, believes its existing cash, line of credit facilities and its anticipated operating cash flow will be sufficient to meet its cash requirements through the next twelve months. However, the Company may be required, or could elect, to seek additional funding prior to that time. The Company's future capital requirements will depend on many factors including its rate of revenue growth, the timing and extent of spending to support product development efforts, potential growth through strategic acquisition, expansion of sales and marketing, the timing of introductions of new products and enhancements to existing products, and market acceptance of its products. The Company cannot assure additional equity or debt financing will be available on acceptable terms or at all. The Company's sources of liquidity beyond twelve months, in management's opinion, will be its cash balances on hand at that time, funds provided by operations, funds available through its lines of credit and the long-term credit facilities that it can arrange. The Company's future principal payments under its term loan, mortgage and operating leases are as follows (in thousands):

	Total	Less Than 1 Year	1-3 Years	3 - 5 Years	More than 5 Years
Long-term debt obligations	\$1,243	\$159	\$326	\$367	\$391
Operating lease	4,709	1,967	2,011	731	0
Total	\$5,952	\$2,126	\$2,337	\$1,098	\$391

Critical Accounting Policies

The Company's consolidated financial statements are based on the application of U.S. generally accepted accounting principles (GAAP). GAAP requires the use of estimates, assumptions, judgments and subjective interpretations of accounting principles that have an impact on the assets, liabilities, revenue and expense amounts reported. The Company believes its use of estimates and underlying accounting assumptions adhere to GAAP and are consistently applied. Valuations based on estimates are reviewed for reasonableness and adequacy on a consistent basis throughout the Company. Primary areas where financial information of the Company is subject to the use of estimates, assumptions and the application of judgment include revenue recognition, accounts receivable, inventories, goodwill and intangible assets, and taxes.

Revenue Recognition Policy

Product revenues consist of sales of the Company's standard point-of-sale and property management systems of the Hospitality segment. Product revenues include both hardware and software sales. The Company also records service revenues relating to its standard point-of-sale and property management systems of the Hospitality segment.

Hardware

Revenue recognition on hardware sales occurs upon delivery to the customer site (or when shipped for systems that are not installed by the Company) when persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed or determinable, and collectability is reasonably assured.

Software

Revenue recognition on software sales generally occurs upon delivery to the customer site (or when shipped for systems that are not installed by the Company), when persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed or determinable, and collectability is probable. For software sales where the Company is the sole party that has the proprietary knowledge to install the software, revenue is recognized upon installation and when the system is ready to go live.

Service

Service revenue consists of installation and training services, support maintenance, and field and depot repair.

Installation and training service revenue are based upon standard hourly/daily rates, and revenue is recognized as the services are performed. Support maintenance and field and depot repair are provided to customers either on a time and materials basis or under a maintenance contract. Services provided on a time and materials basis are recognized as the services are performed. Service revenues from maintenance contracts are recorded as deferred revenue when billed to the customer and are recognized ratably over the underlying contract period.

The individual hardware, service, and software offerings that are included in arrangements with our customers are identified and priced separately to the customer based upon the stand alone price for each individual hardware, service, or software sold in the arrangement irrespective of the combination of products and services which are included in a particular arrangement. As such, the units of accounting are based on each individual hardware, service, and software sold, and revenue is allocated to each element based on vendor specific objective evidence (VSOE) of fair value. VSOE of fair value for each individual hardware, service, and software is based on separate individual prices of these products and services. The sales price used to establish fair value is the sales price of the element when it is sold individually in a separate arrangement and not as a separate element in a multiple element arrangement.

Revenue recognition for complex contractual arrangements, especially those with multiple elements, requires a significant level of judgment and is based upon review of specific contracts, past experiences, the selling price of undelivered elements when sold separately, creditworthiness of customers, international laws and other factors.

In situations where PAR's solutions contain software that is more than incidental, revenue related to software and software related elements is recognized in accordance with authoritative guidance on software revenue recognition. For the software and software-related elements of such transactions, revenue is allocated based on the relative fair value of each element, and fair value is determined by venter specific objective evidence (VSOE). If the Company cannot objectively determine the fair value of any undelivered element included in such multiple-element arrangements, the Company defers the revenue until all elements are delivered and services have been performed, or until fair value can objectively be determined for any remaining undelivered elements.

Government Contracts

The Company's contract revenues generated by the Government segment result primarily from contract services performed for the U.S. Government under a variety of cost-plus fixed fee, time-and-material, and fixed-price contracts. Revenue on cost-plus fixed fee contracts is recognized based on allowable costs for labor hours delivered, as well as other allowable costs plus the applicable fee. Revenue on time and material contracts is recognized by multiplying the number of direct labor hours delivered in the performance of the contract by the contract billing rates and adding other direct costs as incurred. Revenue from fixed-price contracts is recognized as labor hours are delivered, which approximates the straight-line basis of the life of the contract. The Company's obligation under these contracts is to provide labor hours to conduct research or to staff facilities with no other deliverables or performance obligations. Anticipated losses on all contracts are recorded in full when identified. Unbilled accounts receivable are stated in the Company's consolidated financial statements at their estimated realizable value. Contract costs, including indirect expenses, are subject to audit and adjustment through negotiations between the Company and U.S.

Government representatives.

Accounts Receivable-Allowance for Doubtful Accounts

Allowances for doubtful accounts are based on estimates of probable losses related to accounts receivable balances.

The establishment of allowances requires the use of judgment and assumptions regarding probable losses on receivable balances. We continuously monitor collections and payments from our customers and maintain a provision for estimated credit losses based on our historical experience and any specific customer collection issues that we have identified. While such credit losses have historically been within our expectations and appropriate reserves have been established, we cannot guarantee that we will continue to experience the same credit loss rates that we have experienced in the past. Thus, if the financial condition of our customers were to deteriorate, our actual losses may exceed our estimates, and additional allowances would be required.

Inventories

The Company's inventories are valued at the lower of cost or market, with cost determined using the first-in, first-out (FIFO) method. The Company uses certain estimates and judgments and considers several factors including product demand, changes in customer requirements and changes in technology to provide for excess and obsolescence reserves to properly value inventory.

Capitalized Software Development Costs

The Company capitalizes certain costs related to the development of computer software used in its Hospitality segment. Software development costs incurred prior to establishing technological feasibility are charged to operations and included in research and development costs. The technological feasibility of a computer software product is established when the Company has completed all planning, designing, coding, and testing activities that are necessary to establish that the product can be produced to meet its design specifications including functions, features, and technical performance requirements. Software development costs incurred after establishing feasibility (as defined within ASC 985-20) are capitalized and amortized on a product-by-product basis when the product is available for general release to customers. Annual amortization, charged to cost of sales when the product is available for general release to customers, is computed using the greater of (a) the straight-line method over the remaining estimated economic life of the product, generally three to seven years or (b) the ratio that current gross revenues for a product bear to the total of current and anticipated future gross revenues for that product.

Goodwill

The Company tests goodwill for impairment on an annual basis, or more often if events or circumstances indicate there may be impairment. The Company operates in two business segments, Hospitality and Government. Goodwill impairment testing is performed at the sub-segment level (referred to as a reporting unit). The three reporting units utilized by the Company for its impairment testing are: Restaurant, Hotel/Resort/Spa, and Government. Goodwill is assigned to a specific reporting unit at the date the goodwill is initially recorded. Once goodwill has been assigned to a specific reporting unit, it no longer retains its association with a particular acquisition, and all of the activities within a reporting unit, whether acquired or organically grown, are available to support the value of the goodwill.

Goodwill impairment analysis is a two-step test. The first step, used to identify potential impairment, involves comparing each reporting unit's fair value to its carrying value including goodwill. If the fair value of a reporting unit exceeds its carrying value, applicable goodwill is considered not to be impaired. If the carrying value exceeds fair value, there is an indication of impairment, at which time a second step would be performed to measure the amount of impairment. The second step involves calculating an implied fair value of goodwill for each reporting unit for which the first step indicated impairment.

With respect to the Government and Hotel/Resort/Spa reporting units, the Company utilizes three different methodologies in performing its goodwill impairment test. These methodologies include both an income approach, namely a discounted cash flow method, and two market approaches, namely the guideline public company method and quoted price method. As a result of the write-off of goodwill recorded in 2011, the Company did not utilize the discounted cash flow method for its Restaurant reporting unit as this reporting unit no longer carries a goodwill balance. As such, the Company has applied a 50% weight to each of the aforementioned market approaches for this reporting unit. Other than the aforementioned change, the valuation methodologies and weightings used in the current year are generally consistent with those used in the Company's past annual impairment tests.

The discounted cash flow method derives a value by determining the present value of a projected level of income stream, including a terminal value. This method involves the present value of a series of estimated future cash flows at the valuation date by the application of a discount rate, one which a prudent investor would require before making an investment in the equity of the Company. The Company considers this method to be most reflective of a market participant's view of fair value given the current market conditions, as it is based on the Company's forecasted results and, therefore, established its weighting at 80% of the fair value calculation.

Key assumptions within the Company's discounted cash flow model utilized for its annual impairment test included projected financial operating results, a long term growth rate of 3% (beyond five years) and discount rates ranging from 17% to 27%, depending on the reporting unit. As stated above, as the discounted cash flow method derives value from the present value of a projected level of income stream, a modification to the Company's projected operating results including changes to the long term growth rate could impact the fair value. The present value of the cash flows is determined using a discount rate based on the capital structure and capital costs of comparable public companies, as well as company-specific risk premium, as identified by the Company. A change to the discount rate could impact the fair value determination.

The market approach is a generally-accepted way of determining a value indication of a business, business ownership interest, security or intangible asset by using one or more methods that compare the subject to similar businesses, business ownership interests, securities or intangible assets that have been sold. There are two methodologies considered under the market approach: the public company method and the quoted price method.

The public company method and quoted price method of appraisal are based on the premise that pricing multiples of publicly traded companies can be used as a tool to be applied in valuing closely held companies. The mechanics of the method require the use of the stock price in conjunction with other factors to create a pricing multiple that can be used, with certain adjustments, to apply against the subject's similar factor to determine an estimate of value for the subject company. The Company considered these methods appropriate as they provide an indication of fair value as supported by current market conditions. The Company established its weighting at 10% of the fair value calculation for each method.

The most critical assumption underlying the market approaches utilized by the Company are the comparable companies utilized. Each market approach described above estimates revenue and earnings multiples for the Company based on its comparable companies. As such, a change to the comparable companies could have an impact on the fair value determination.

The amount of goodwill carried by the Hotel/Resort/Spa and Government reporting units is \$6.1 million and \$0.7 million, respectively. The estimated fair value of the Hotel/Resort/Spa reporting unit exceeds its carrying value by approximately 14%. The estimated fair value of the Government reporting unit is substantially in excess of its carrying value.

Hotel /Resort/Spa:

In deriving its fair value estimates, the Company has utilized key assumptions built on the current core business adjusted to reflect anticipated revenue increases from continued investment in its next generation software. These assumptions, specifically those included within the discounted cash flow estimate, are comprised of the revenue growth rate, gross margin, operating expenses, working capital requirements, and depreciation and amortization expense.

The Company has utilized annual revenue growth rates ranging between 5% and 27%. The high end growth rate reflects the Company's projected revenues resulting from the release of ATRIO. This software platform will expand the Company's capabilities into new markets. The Company believes these estimates are reasonable given the size of the overall market which it will enter, combined with the projected market share the Company expects to achieve. The projected revenue growth rates ultimately trend to an estimated long term growth rate of 3%.

The Company has utilized gross margin estimates materially consistent with historical gross margins achieved. Estimates of operating expenses, working capital requirements and depreciation and amortization expense utilized for this reporting unit are generally consistent with actual historical amounts, adjusted to reflect its continued investment and projected revenue growth from ATRIO. The Company believes utilization of actual historical results adjusted to reflect its continued investment in ATRIO is an appropriate basis supporting the fair value of the Hotel/Resort/Spa reporting unit.

Lastly, the Company utilized a discount rate of approximately 27% for this reporting unit. This estimate was derived through a combination of current risk-free interest rate data, financial data from companies that PAR has deemed as its competitors, and was based on volatility between the Company's historical financial projections and actual results achieved.

The current economic conditions and the continued volatility in the U.S. and in many other countries in which the Company operates could contribute to decreased consumer confidence and continued economic uncertainty which may adversely impact the Company's operating performance. Although the Company has seen an improvement in the markets which it serves, the continued volatility in these markets could have an impact on purchases of the Company's products, which could result in a reduction of sales, operating income and cash flows. Reductions in these results could have a material adverse impact on the underlying estimates used in deriving the fair value of the Company's reporting units used in support of its annual goodwill impairment test or could result in a triggering event requiring a fair value remeasurement, particularly if the Company is unable to achieve the estimates of revenue growth indicated in the preceding paragraphs. These conditions may result in an impairment charge in future periods.

The Company has reconciled the aggregate estimated fair value of the reporting units to the market capitalization of the consolidated Company, including a reasonable control premium.

Taxes

The Company has significant amounts of deferred tax assets that are reviewed for recoverability and valued accordingly. These assets are evaluated by using estimates of future taxable income and the impact of tax planning strategies. Valuations related to tax accruals and assets can be impacted by changes to tax codes, changes in statutory tax rates and the Company's estimates of its future taxable income levels.

New Accounting Pronouncements Not Yet Adopted

See Note 1 to the Consolidated Financial Statements included in Part IV, Item 15 of this Report for details of New Accounting Pronouncements Not Yet Adopted.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

inflation

Inflation had little effect on revenues and related costs during 2012. Management anticipates that margins will be maintained at acceptable levels to minimize the effects of inflation, if any.

interest rates

As of December 31, 2012, the Company has \$1.2 million in variable long-term debt and did not have any variable short-term debt. The Company believes that an adverse change in interest rates of 100 basis points would not have a material impact on our business, financial condition, results of operations or cash flows.

foreign currency

The Company's primary exposures relate to certain non-dollar denominated sales and operating expenses in Europe and Asia. These primary currencies are the Euro, the Australian dollar and the Singapore dollar. Management believes that foreign currency fluctuations should not have a significant impact on our business, financial conditions, and results of operations or cash flows due to the low volume of business affected by foreign currencies.

Item 8: Financial Statements and Supplementary Data

The Company's 2012 consolidated financial statements, together with the report thereon of BDO USA, LLP dated March 13, 2013, are included elsewhere herein. See Part IV, Item 15 for a list of Financial Statements.

Item 9: Changes in and Disagreements With Accounting and Financial Disclosure

None.

Item 9A: Controls and Procedures

1. Evaluation of Disclosure Controls and Procedures.

Based on an evaluation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of December 31, 2012, the end of the period covered by this Annual Report on Form 10-K (the "Evaluation Date"), conducted under the supervision of and with the participation of the Company's chief executive officer and chief financial officer, such officers have concluded that the Company's disclosure controls and procedures, which are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and designed to ensure that information required to be disclosed by the Company in the reports filed or submitted under the Exchange Act is accumulated and communicated to management, including the chief executive and financial officers, as appropriate, to allow timely decisions regarding required disclosures, are effective as of the Evaluation Date.

2. Management's Report on Internal Control over Financial Reporting.

PAR's management is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Rule 13a-15(f) under the Exchange Act. The Company's internal control system has been designed to provide reasonable assurance to management and the Board of Directors regarding the preparation and fair presentation of published financial statements in accordance with U.S. generally accepted accounting principles.

A company's internal control over financial reporting includes those policies and procedures that (a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (b) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

34

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Because of inherent limitations due to, for example, the potential for human error or circumvention of controls, internal controls over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

PAR's management, under the supervision of and with the participation of the Company's chief executive officer and chief financial officer, assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2012. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) based on the framework in Internal Control – Integrated Framework. Based on its assessment, based on those criteria, management believes that as of December 31, 2012, the Company's internal control over financial reporting was effective.

3.Changes in Internal Controls over Financial Reporting.

During the Company's last fiscal quarter of 2012 (the fourth fiscal quarter), there were no changes in the Company's internal control over financial reporting (as defined in Rule 13 a-15(f)) that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors

PAR Technology Corporation:

We have audited the accompanying consolidated balance sheet of PAR Technology Corporation and subsidiaries as of December 31, 2012, and the related consolidated statements of operations, comprehensive loss, changes in shareholders' equity, and cash flows for the year ended December 31, 2012. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of PAR Technology Corporation and subsidiaries at December 31, 2012, and the results of their operations and its cash flows for the year ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

Report of Independent Registered Public Accounting Firm

The Board of Directors

PAR Technology Corporation:

We have audited the accompanying consolidated balance sheet of PAR Technology Corporation and subsidiaries as of December 31, 2011, and the related consolidated statements of operations, comprehensive loss, changes in shareholders' equity, and cash flows for the year then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of PAR Technology Corporation and subsidiaries as of December 31, 2011, and the results of their operations and their cash flows for the year then ended in conformity with U.S. generally accepted accounting principles.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 — Summary of Significant Accounting Policies

Basis of consolidation

The consolidated financial statements include the accounts of PAR Technology Corporation and its subsidiaries (ParTech, Inc., PAR Springer-Miller Systems, Inc., PAR Canada ULC, PAR Government Systems Corporation, Rome Research Corporation, Ausable Solutions, Inc., and PAR Logistics Management Systems Corporation), collectively referred to as the "Company." All significant intercompany transactions have been eliminated in consolidation.

During the fourth quarter of fiscal year 2011, the Company entered into a definitive agreement to sell substantially all of the assets of its Logistics Management business, PAR Logistics Management Systems Corporation (LMS) to ORBCOMM Inc., including but not limited to assets such as accounts receivable, inventory, equipment, intellectual property and LMS's customer contracts. As a result of the sale of this reporting unit, the Company operates with two reporting units; Hospitality and Government. This transaction closed on January 12, 2012. The results of operations of LMS fiscal years 2012 and 2011 have been recorded as discontinued operations in accordance with Accounting Standards Codification (ASC) 205-20, Presentation of Financial Statements – Discontinued Operations. All prior period amounts have been reclassified to conform to the current period presentation. Refer to Note 2 "Discontinued Operations" in the Notes to the Consolidated Financial Statements for further discussion.

Revenue Recognition Policy

Product revenues consist of sales of the Company's standard point-of-sale and property management systems of the Hospitality segment. Product revenues include both hardware and software sales. The Company also records service revenues relating to its standard point-of-sale and property management systems of the Hospitality segment.

Hardware

Revenue recognition on hardware sales occurs upon delivery to the customer site (or when shipped for systems that are not installed by the Company) when persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed or determinable, and collectability is reasonably assured.

Software

Revenue recognition on software sales generally occurs upon delivery to the customer site (or when shipped for systems that are not installed by the Company), when persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed or determinable, and collectability is probable. For software sales where the Company is the sole party that has the proprietary knowledge to install the software, revenue is recognized upon installation and when the system is ready to go live.

Service

Service revenue consists of installation and training services, support maintenance, and field and depot repair.

Installation and training service revenue are based upon standard hourly/daily rates, and revenue is recognized as the services are performed. Support maintenance and field and depot repair are provided to customers either on a time and materials basis or under a maintenance contract. Services provided on a time and materials basis are recognized as the services are performed. Service revenues from maintenance contracts are recorded as deferred revenue when billed to the customer and are recognized ratably over the underlying contract period.

The individual hardware, service, and software offerings that are included in arrangements with our customers are identified and priced separately to the customer based upon the stand alone price for each individual hardware, service, or software sold in the arrangement irrespective of the combination of products and services which are included in a particular arrangement. As such, the units of accounting are based on each individual hardware, service, and software sold, and revenue is allocated to each element based on vendor specific objective evidence (VSOE) of fair value. VSOE of fair value for each individual hardware, service, and software is based on separate individual prices of these products and services. The sales price used to establish fair value is the sales price of the element when it is sold individually in a separate arrangement and not as a separate element in a multiple element arrangement.

Revenue recognition for complex contractual arrangements, especially those with multiple elements, requires a significant level of judgment and is based upon review of specific contracts, past experiences, the selling price of undelivered elements when sold separately, creditworthiness of customers, international laws and other factors.

In situations where PAR's solutions contain software that is more than incidental, revenue related to software and software related elements is recognized in accordance with authoritative guidance on software revenue recognition.

For the software and software-related elements of such transactions, revenue is allocated based on the relative fair value of each element, and fair value is determined by vendor specific objective evidence (VSOE). If the Company cannot objectively determine the fair value of any undelivered element included in such multiple-element arrangements, the Company defers the revenue until all elements are delivered and services have been performed, or until fair value can objectively be determined for any remaining undelivered elements.

Government Contracts

The Company's contract revenues generated by the Government segment result primarily from contract services performed for the U.S. Government under a variety of cost-plus fixed fee, time-and-material, and fixed-price contracts. Revenue on cost-plus fixed fee contracts is recognized based on allowable costs for labor hours delivered, as well as other allowable costs plus the applicable fee. Revenue on time and material contracts is recognized by multiplying the number of direct labor hours delivered in the performance of the contract by the contract billing rates and adding other direct costs as incurred. Revenue from fixed-price contracts is recognized as labor hours are delivered which approximates the straight-line basis of the life of the contract. The Company's obligation under these contracts is to provide labor hours to conduct research or to staff facilities with no other deliverables or performance obligations. Anticipated losses on all contracts are recorded in full when identified. Unbilled accounts receivable are stated in the Company's consolidated financial statements at their estimated realizable value. Contract costs, including indirect expenses, are subject to audit and adjustment through negotiations between the Company and U.S.

Government representatives.

Statement of cash flows

For purposes of reporting cash flows, the Company considers all highly liquid investments, purchased with a remaining maturity of three months or less, to be cash equivalents.

Accounts receivable – Allowance for doubtful accounts

Allowances for doubtful accounts are based on estimates of probable losses related to accounts receivable balances. The establishment of allowances requires the use of judgment and assumptions regarding probable losses on receivable balances.

Inventories

The Company's inventories are valued at the lower of cost or market, with cost determined using the first-in, first-out (FIFO) method. The Company uses certain estimates and judgments and considers several factors including product demand, changes in customer requirements and changes in technology to provide for excess and obsolescence reserves to properly value inventory.

Property, plant and equipment

Property, plant and equipment are recorded at cost and depreciated using the straight-line method over the estimated useful lives of the assets, which range from three to twenty-five years. Expenditures for maintenance and repairs are expensed as incurred.

Other assets

Other assets consist of cash surrender value of life insurance related to the Company's Deferred Compensation Plan.

Income taxes

The provision for income taxes is based upon pretax earnings with deferred income taxes provided for the temporary differences between the financial reporting basis and the tax basis of the Company's assets and liabilities. The Company records a valuation allowance when necessary to reduce deferred tax assets to their net realizable amounts. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Other long-term liabilities

Other long-term liabilities represent amounts owed to certain employees who are participants in the Company's Deferred Compensation Plan.

Foreign currency

The assets and liabilities for the Company's international operations are translated into U.S. dollars using year-end exchange rates. Income statement items are translated at average exchange rates prevailing during the year. The resulting translation adjustments are recorded as a separate component of shareholders' equity under the heading Accumulated Other Comprehensive Loss. Exchange gains and losses on intercompany balances of a long-term investment nature are also recorded as a translation adjustment and are included in Accumulated Other Comprehensive Income (Loss). Foreign currency transaction gains and losses are recorded in other income in the accompanying statements of operations.

Other income

The components of other income for the three years ending December 31 are as follows:

	Year ended December 31 (in thousands)	
	2012	2011
Foreign currency gains / (loss)	\$ 186	\$(454)
Rental income-net	174	191
Other	516	466
	\$876	\$203

Identifiable intangible assets

The Company capitalizes certain costs related to the development of computer software sold by its Hospitality segment. Software development costs incurred prior to establishing technological feasibility are charged to operations and included in research and development costs. Software development costs incurred after establishing feasibility (as defined within ASC 985-20) are capitalized and amortized on a product-by-product basis when the product is available for general release to customers. Annual amortization, charged to cost of sales when the product is available for general release to customers, is computed using the greater of (a) the straight-line method over the remaining estimated economic life of the product, generally three to seven years or (b) the ratio that current gross revenues for a product bear to the total of current and anticipated future gross revenues for that product. Amortization of capitalized software costs amounted to \$6.8 million and \$465,000, in 2012 and 2011, respectively. The increase in 2012 was primarily the result of accelerated amortization of \$5.3 million to reduce the net carrying value of a specific capitalized software asset in conjunction with the Company's strategic initiative to streamline its Hospitality product portfolio. During the fourth quarter of 2012, the Company reviewed its product portfolio and determined it appropriate to cease future development associated with this specific asset.

The Company acquired identifiable intangible assets in connection with its acquisitions in prior years. Amortization of identifiable intangible assets amounted to \$455,000 in 2012 and \$840,000 in 2011.

The components of identifiable intangible assets, including capitalized internal software development costs are:

	December 31, (in thousands)	
	2012	2011
Acquired and internally developed software costs	\$11,988	\$17,902
Customer relationships	-	4,519
Trademarks (non-amortizable)	1,800	2,100
Other	-	690
	13,788	25,211
Less accumulated amortization	(2,041)	(9,323)
	\$11,747	\$15,888

The future amortization of these intangible assets is as follows (in thousands):

2013	\$1,527
2014	1,521
2015	1,421
2016	1,393
2017	1,368
Thereafter	2,717
	\$9,947

The Company has elected to test for impairment of indefinite lived intangible assets during the fourth quarter of its fiscal year. To value the indefinite lived intangible assets, the Company utilizes the royalty method to estimate the fair values. In conjunction with this testing, the Company recorded an impairment charge of \$300,000 for the period ending December 31, 2012.

In conjunction with quarterly financial close process for the second quarter of 2011, the Company reevaluated its indefinite lived intangibles and determined that two of its trade names within its Hospitality segment should no longer be considered to have indefinite lives. As a result of this determination, the Company recorded an impairment charge of \$580,000 during the quarter ended June 30, 2011.

There was no additional impairment of identifiable intangible assets in 2012 or 2011 other than as noted above.

Stock-based compensation

The Company recognizes all stock-based compensation to employees, including grants of employee stock options and restricted stock awards, in the financial statements as compensation cost over the vesting period using an accelerated expense recognition method, based on their fair value on the date of grant.

Earnings per share

Basic earnings per share are computed based on the weighted average number of common shares outstanding during the period. Diluted earnings per share reflect the dilutive impact of outstanding stock options and restricted stock awards.

The following is a reconciliation of the weighted average shares outstanding for the basic and diluted earnings per share computations (in thousands, except share and per share data):

	December 31,	
	2012	2011
Loss from continuing operations	\$(1,762)	\$(13,360)
Basic:		
Shares outstanding at beginning of year	15,051	14,909
Weighted shares issued during the year	64	91
Weighted average common shares, basic	15,115	15,000
Loss from continuing operations per common share, basic	\$(0.12)	\$(0.89)
Diluted:		
Weighted average common shares, basic	15,115	15,000
Weighted average shares issued during the year	-	-
Dilutive impact of stock options and restricted stock awards	-	-
Weighted average common shares, diluted	15,115	15,000
Loss from continuing operations per common share, diluted	\$(0.12)	\$(0.89)

At December 31, 2012, there were 5,000 of incremental shares from the assumed exercise of stock options and 31,000 restricted stock awards were not included in the computation of diluted earnings per share because of the anti-dilutive effect on earnings per share. At December 31, 2011, there were 22,000 of incremental shares from the assumed exercise of stock options and 27,000 restricted stock awards were not included in the computation of diluted earnings per share because of the anti-dilutive effect on earnings per share.

Goodwill

The Company tests goodwill for impairment on an annual basis, or more often if events or circumstances indicate there may be impairment. The Company operates in two business segments, Hospitality and Government. Goodwill impairment testing is performed at the sub-segment level (referred to as a reporting unit). The three reporting units utilized by the Company are: Restaurant, Hotel/Resort/Spa, and Government. Goodwill is assigned to reporting units at the date the goodwill is initially recorded. Once goodwill has been assigned to reporting units, it no longer retains its association with a particular acquisition, and all of the activities within a reporting unit, whether acquired or organically grown, are available to support the value of the goodwill. The amount outstanding for goodwill was \$6.9 million at December 31, 2012 and 2011.

There was no impairment of goodwill in 2012. During the second quarter of 2011, the Company determined that as a result of the decline in the stock price that occurred during the second quarter, a goodwill impairment triggering event had occurred. The fair value of the Company's common shares declined from \$4.60 per share at April 1, 2011 to \$3.83 per share at June 30, 2011, resulting in the Company no longer being able to reconcile the aggregate fair value of its reporting units to its market capitalization after consideration of a reasonable control premium. Although there was no significant adverse change to the long term financial outlook of any of its businesses, the Company concluded that a triggering event had occurred and as a result, performed additional analyses over the valuation of its reporting units in accordance with the relevant accounting rules, recording a non-cash impairment charge of \$20.2 million to its goodwill in the second quarter of 2011.

The changes and carrying amounts of goodwill by reporting unit were as follows (in thousands):

	Restaurants	Hotel/Resort/Spa	Government	Total
Net Balances at December 31, 2010:	\$ 12,272	\$ 13,946	\$ 736	\$26,954
Impairment Charge	(12,433)	(7,830)	-	(20,263)
Effects of foreign currency adjustments	161	-	-	161
Balances at December 31, 2011				
Goodwill	12,433	13,946	736	27,115
Accumulated Impairment charge	(12,433)	(7,830)	-	(20,263)
Net Balances at December 31, 2011:	-	6,116	736	6,852
Goodwill	12,433	13,946	736	27,115
Accumulated Impairment charge	(12,433)	(7,830)	-	(20,263)
Net balance at December 31, 2012	\$ -	\$ 6,116	\$ 736	\$6,852

Accounting for impairment or disposal of long-lived assets

The Company evaluates the accounting and reporting for the impairment of long-lived assets and for long-lived assets to be disposed. The Company will recognize impairment of long-lived assets or asset groups if the net book value of such assets exceeds the estimated future undiscounted cash flows attributable to such assets. If the carrying value of a long-lived asset or asset group is considered impaired, a loss is recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived asset or asset group for assets to be held and used, or the amount by which the carrying value exceeds the fair market value less cost to sell for assets to be sold. No impairment was identified during 2012 or 2011.

Reclassifications

Amounts in prior years' consolidated financial statements are reclassified whenever necessary to conform to the current year's presentation.

Use of estimates

The preparation of the consolidated financial statements requires management of the Company to make a number of estimates and assumptions relating to the reported amount of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. Significant items subject to such estimates and assumptions include the carrying amount of property, plant and equipment, identifiable intangible assets and goodwill, and valuation allowances for receivables, inventories and deferred income tax assets. Actual results could differ from those estimates.

The current economic conditions and the continued volatility in the U.S. and in many other countries where the Company operates could contribute to decreased consumer confidence and continued economic uncertainty which may adversely impact the Company's operating performance. Although the Company has seen an improvement in the markets which it serves, the continued volatility in these markets could have an impact on purchases of the Company's products, which could result in a reduction of sales, operating income and cash flows. This could have a material adverse effect on the Company's business, financial condition and/or results of operations and could have a material adverse impact on the Company's significant estimates discussed above, specifically the fair value of the Company's reporting units used in support of its annual goodwill impairment test.

Recently Issued Accounting Pronouncements Not Yet Adopted

On July 27, 2012, the FASB issued Accounting Standards Update 2012-02, Intangibles – Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment ("ASU 2012-02"). ASU 2012-02 is intended to reduce the cost and complexity of the annual indefinite-lived intangible assets impairment testing by providing entities an option to perform a "qualitative" assessment to determine whether further impairment testing is necessary. As such, there is the possibility that quantitative assessments would not need to be performed if it is more likely than not that no impairment exists. The Company is required to adopt the provisions of ASU 2012-02, which is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted. The adoption of ASU 2012-02 is not expected to have a significant impact on the Company's financial position or results of operations.

Recently Adopted Accounting Pronouncements

In September 2011, FASB issued ASU No. 2011-08, Intangibles-Goodwill and Other: Testing Goodwill for Impairment, which amends FASB Topic ASC 350, Intangible Assets-Goodwill and Other. Under ASU No. 2011-08, an entity may elect the option to assess qualitative factors to determine whether it is necessary to perform the first step in the two-step impairment testing process. ASU No. 2011-08 was effective on January 1, 2012. The adoption of ASU No. 2011-08 did not have a material impact on the Company's consolidated financial statements.

In May 2011, FASB issued ASU No. 2011-04, Amendment to Achieve Common Fair Value Measurement and Disclosure Requirements, in U.S. GAAP and International Financial Reporting Standards (IFRS), which amends FASB Topic ASC 820, Fair value measurement. ASU No. 2011-04 modifies the existing standard to include disclosure of all transfers between Level 1 and Level 2 asset and liability fair value categories. In addition, ASU No. 2011-04 provides guidance on measuring the fair value of financial instruments managed within a portfolio and the application of premiums and discounts on fair value measurements. ASU No. 2011-04 requires additional disclosure for Level 3 measurements regarding the sensitivity of fair value to changes in unobservable inputs and any interrelationships between those inputs. ASU No. 2011-04 was effective on January 1, 2012. The adoption of ASU No. 2011-04 did not have a material impact on the Company's consolidated financial statements.

Note 2 — Discontinued Operations

On January 12, 2012, PAR Technology Corporation completed its previously announced sale of substantially all of the assets of the PAR Logistics Management Systems Corporation (LMS) to ORBCOMM Inc. ("ORBCOMM").

The consideration payable by ORBCOMM at the closing with respect to substantially all the assets of LMS aggregates \$6,123,000 comprised of \$4,000,000 in cash and \$2,123,000 in shares of common stock of ORBCOMM Inc. (the Closing Consideration). Of the equity consideration, \$1,274,000 (based on the fair value as of the date of closing) was held in escrow to settle future claims, with release date of August 2012 and April 2013. During the second quarter of 2012, the Company liquidated its common stock investment of ORBCOMM Inc. which resulted in it recording a realized loss for the year ended December 31, 2012 of \$210,000. The Company recorded its loss on liquidation of its investment within other income (expense), net, on its Consolidated Statement of Operations. Of the total proceeds, \$828,000 remains in escrow to be released in 2013.

In addition to the Closing Consideration, contingent consideration of up to \$3,950,000 is payable by ORBCOMM to PAR post-closing in cash, ORBCOMM common stock or a combination of cash and ORBCOMM common stock, at ORBCOMM's option. Up to \$3,000,000 of the contingent consideration will be payable based on ORBCOMM achieving certain agreed-upon new subscriber targets for calendar year 2012 and up to \$950,000 of the contingent consideration will be payable based on ORBCOMM achieving agreed-upon sales targets for calendar years 2012 through 2014.

If paid in stock, the number of ORBCOMM shares to be issued to PAR will be based upon the average 20-day closing price of ORBCOMM common stock prior to the payment due date for such contingent consideration.

As of December 31, 2012, the Company has not recorded any amount associated with this contingent consideration as it does not believe achievement of the related targets is probable.

Summarized financial information for the Company's discontinued operations is as follows:

	December 31,	
	2012	2011
Assets		
Cash	\$-	\$6
Accounts receivable - net	-	1,398
Inventories	-	1,355
Other assets	-	423
Total assets of discontinued operations	\$-	\$3,182

Liabilities		
Accounts payable and accrued expenses	\$141	674
Accrued salaries and benefits	-	236
Other liabilities	-	15
Total liabilities of discontinued operations	\$141	\$925

	December 31,	
	2012	2011
Operations		
Total revenues	\$ 136	\$ 6,433
Loss from discontinued operations before income taxes	\$ (348)	\$ (3,525)
Gain on disposition	2,588	-
(Provision) benefit for income taxes	(793)	1,353
Income (loss) from discontinued operations	\$1,447	\$ (2,172)

Note 3 — Accounts Receivable

The Company's net accounts receivable consist of:

	(in thousands)	
	December 31, 2012	December 31, 2011
Government segment:		
Billed	\$11,226	\$12,903
Advanced billings	(3,561)	(1,552)
	7,665	11,351
Hospitality segment:		
Accounts receivable - net	22,225	19,329
	\$29,890	\$30,680

At December 31, 2012 and 2011, the Company had recorded allowances for doubtful accounts of \$541,000 and \$917,000, respectively, against Hospitality segment accounts receivable. Write-offs of accounts receivable during fiscal years 2012 and 2011 were \$585,000 and \$786,000, respectively. The provision for doubtful accounts recorded in the consolidated statements of operations was \$209,000 and \$124,000 in 2012 and 2011, respectively.

Note 4 — Inventories

Inventories are used primarily in the manufacture, maintenance, and service of the Hospitality segment systems. Inventories are net of related reserves. The components of inventories-net are:

	December 31, (in thousands)	
	2012	2011
Finished Goods	\$13,012	\$9,325
Work in process	352	1,007
Component parts	3,673	3,778
Service parts	9,135	11,150
