### Fair Value Measurements

The following is a summary of the inputs used as of August 31, 2008 in valuing the Fund's investments. Please see below for information on the Fund's policy regarding valuation inputs, and their aggregate levels used in the table below:

Valuation Inputs	Investments in Securities
Level 1	\$ -
Level 2	951,995,891
Level 3	-
<b>Total</b>	<b>\$ 951,995,891</b>

The Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements ("FAS 157"), effective at the beginning of the Fund's fiscal year. FAS 157 establishes a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and requires additional disclosure about the classification of fair value measurements.

Various inputs are used in determining the value of the Fund's investments. These inputs are summarized in three broad levels. Level 1 includes quoted prices in active markets for identical securities. Level 2 includes other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.). Level 3 includes significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.
