2 SEMI-ANNUAL REPORT FEBRUARY 28, 2013

Dear Shareholder

Despite a number of headwinds, risk assets generated strong returns during the 6- and 12-month periods as investors sought meaningful yields in the ongoing low-interest-rate environment. About this time one year ago, the European debt crisis returned to the headlines as unresolved policy decisions left it unclear as to how troubled peripheral countries would finance their sovereign debt, causing yields to soar. In the second quarter of 2012, political instability in Greece and severe deficit and liquidity problems in Spain raised the specter of a full-blown euro collapse. Alongside the drama in Europe, investors were discouraged by gloomy economic reports from various parts of the world. A slowdown in China, a key powerhouse for global growth, emerged as a particular concern. As the outlook for the global economy worsened, however, investors grew increasingly optimistic that the world's largest central banks would soon intervene to stimulate growth. This theme, along with the announcement of the European Central Bank's (ECB's) firm commitment to preserve the euro currency bloc, drove most asset classes higher through the summer. Policy relief came in early September, when the ECB announced its decision to support the eurozone's debt-laden countries with unlimited purchases of short term sovereign debt. Days later, the US Federal Reserve announced its own much-anticipated stimulus package.

Although financial markets world-wide were buoyed by accommodative monetary policies, risk assets weakened in the fall. Global trade began to slow as many European countries fell into recession and growth continued to decelerate in China, where a once-a-decade leadership change compounded uncertainty. In the United States, stocks slid on lackluster corporate earnings reports and market volatility rose in advance of the US Presidential election. In the post-election environment, investors grew increasingly concerned over the fiscal cliff, the automatic tax increases and spending cuts that had been scheduled to take effect at the beginning of 2013. There was widespread fear that the fiscal cliff would push the United States into recession unless politicians could agree upon alternate measures to reduce the deficit before the end of 2012. Worries that bipartisan gridlock would preclude a timely budget deal triggered higher levels of volatility in financial markets around the world in the months leading up to the last day of the year. Ultimately, the worst of the fiscal cliff was averted with a last-minute tax deal; however, decisions relating to spending cuts and the debt ceiling continued to weigh on investors' minds.

Investors shook off the nerve-racking finale to 2012 and began the New Year with a powerful equity rally. Money that had been pulled to the sidelines amid year-end tax-rate uncertainty poured back into the markets in January. Key indicators signaled modest but broad-based improvements in the world's major economies, particularly in China. Global equities soared through January while rising US Treasury yields pressured high-quality fixed income assets. However, bond markets strengthened in February when economic momentum slowed and investors toned down their risk appetite. US stocks continued to rise, but at a more moderate pace. Uncertainty about how long the Federal Reserve would maintain its easing bias drove high levels of volatility later in the month, but these fears abated as the budget sequester (automatic spending cuts scheduled to take effect March 1) began to appear imminent and was deemed likely to deter any near-term curtailment of monetary easing policies. Outside the United States, equities largely declined as political uncertainty escalated after the Italian presidential election ended in a stalemate.

On the whole, riskier asset classes outperformed lower-risk investments for the 6- and 12-month periods ended February 28, 2013. International, US small cap and emerging market equities were the leading asset classes for the 6-month period, while US stocks and high yield bonds generated the strongest returns for the 12-month period. US Treasury yields remained relatively low overall, but have inched higher in recent months, pressuring Treasuries and investment-grade bonds. Tax-exempt municipal bonds, however, continued to benefit from favorable supply-and-demand dynamics. Near-zero short term interest rates continued to keep yields on money market securities near their all-time lows.

Investors continue to face many of the same risks as in years past. But we see a world of possibilities. BlackRock was built to provide the global market insight, breadth of capabilities, unbiased investment advice and deep risk management expertise these times require. Investors everywhere are asking, *So what do I do with my money?* Visit www.blackrock.com for answers.

Sincerely,

Rob Kapito

President, BlackRock Advisors, LLC

Despite a number of headwinds, risk assets generated strong returns during the 6- and 12-month periods as investors sought meaningful yields in the ongoing low-interest-rate environment.

Rob Kapito

Fund Summary as of February 28, 2013
Fund Overview

BlackRock Defined Opportunity Credit Trust

BlackRock Defined Opportunity Credit Trust s (BHL) (the Fund) primary investment objective is to provide high current income, with a secondary objective of long-term capital appreciation. The Fund seeks to achieve its investment objectives by investing substantially all of its assets in loan and debt instruments and loan-related and debt-related instruments (collectively credit securities). The Fund invests, under normal market conditions, at least 80% of its assets in any combination of the following credit securities: (i) senior secured floating rate and fixed rate loans; (ii) second lien or other subordinated or unsecured floating rate and fixed rate loans or debt; (iii) credit securities that are rated below investment grade quality; and (iv) investment grade corporate bonds. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objectives will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the six months ended February 28, 2013, the Fund returned 9.13% based on market price and 5.55% based on net asset value (NAV). For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 10.24% based on market price and 6.30% based on NAV. All returns reflect reinvestment of dividends. The Fund moved from a discount to NAV to a premium by period-end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Security selection among higher quality loan instruments (where the Fund maintained a quality bias) had a positive impact on performance. From an industry perspective, holdings within healthcare, chemicals and gaming boosted results. The Fund s tactical allocation to high yield bonds generated additional gains as the asset class outperformed floating rate loan interests (bank loans) during the period.

Conversely, security selection in the media non-cable and automotive industries detracted from results.

Describe recent portfolio activity.

During the period, the Fund maintained its focus on the higher quality segments of the loan market in terms of loan structure, liquidity and overall credit quality. Given mixed economic data and a tepid outlook for global growth, along with lingering global policy uncertainty, the Fund remained cautious of lower-rated less-liquid loans. Instead, the Fund sought issuers with attractive risk-reward characteristics and superior fundamentals. Monetary stimulus measures from global central banks largely supported risk asset prices in 2012; however, this development did not significantly influence the way the Fund invests in the loan market. More specifically, the Fund continued to adhere to a strict investment discipline with the goal of pursuing yield while minimizing exposure to macro risks. With the average loan trading at or just below par recently (i.e., with little or no upside), the Fund s principal emphasis is on investing in strong companies with the ability to pay their debts despite a slow growth environment.

Describe portfolio positioning at period end.

At period end, the Fund held 90% of its total portfolio in floating rate loan interests and 7% in corporate bonds, with the remainder in asset-backed securities. The Fund s largest industry exposures included healthcare, consumer services (housing-related) and wirelines.

Fund Summary as of February 28, 2013
Fund Overview

BlackRock Floating Rate Income Strategies Fund, Inc.

BlackRock Floating Rate Income Strategies Fund, Inc. s (FRA) (the Fund) investment objective is to provide shareholders with high current income and such preservation of capital as is consistent with investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments. The Fund seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in floating rate debt securities, including floating or variable rate debt securities that pay interest at rates that adjust whenever a specified interest rate changes and/or which reset on predetermined dates (such as the last day of a month or calendar quarter). The Fund invests a substantial portion of its investments in floating rate debt securities consisting of secured or unsecured senior floating rate loans that are rated below investment grade. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objective will be achieved.

Portfolio Management Commentary

On October 5, 2012, the Fund acquired substantially all of the assets and assumed substantially all of the liabilities of BlackRock Diversified Income Strategies Fund, Inc. and BlackRock Floating Rate Income Strategies Fund II, Inc. in exchange for newly issued shares of the Fund.

How did the Fund perform?

For the six months ended February 28, 2013, the Fund returned 12.50% based on market price and 6.53% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 10.24% based on market price and 6.30% based on NAV. All returns reflect reinvestment of dividends. The Fund s premium to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Security selection among higher quality loan instruments (where the Fund maintained a quality bias) had a positive impact on performance, as did the Fund s high-conviction holdings of lower quality loan credits. From an industry perspective, holdings within paper, chemicals and gaming boosted results. The Fund s tactical allocation to high yield bonds generated additional gains as the asset class outperformed floating rate loan interests (bank loans) during the period.

Conversely, security selection in the media non-cable, independent energy and automotive industries detracted from results.

Describe recent portfolio activity.

During the period, the Fund maintained its focus on the higher quality segments of the loan market in terms of loan structure, liquidity and overall credit quality. Given mixed economic data and a tepid outlook for global growth, along with lingering global policy uncertainty, the Fund remained cautious of lower-rated less-liquid loans. Instead, the Fund sought issuers with attractive risk-reward characteristics and superior fundamentals. Monetary stimulus measures from global central banks largely supported risk asset prices in 2012; however, this development did not significantly influence the way the Fund invests in the loan market. More specifically, the Fund continued to adhere to a strict investment discipline with the goal of pursuing yield while minimizing exposure to macro risks. With the average loan trading at or just below par recently (i.e., with little or no upside), the Fund s principal emphasis is on investing in strong companies with the ability to pay their debts despite a slow growth environment.

Describe portfolio positioning at period end.

At period end, the Fund held 88% of its total portfolio in floating rate loan interests and 8% in corporate bonds, with the remainder in asset-backed securities and common stocks. The Fund s largest industry exposures included healthcare, building materials and wirelines.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT FEBRUARY 28, 2013 7

Fund Summary as of February 28, 2013
Fund Overview

BlackRock Limited Duration Income Trust

BlackRock Limited Duration Income Trust s (BLW) (the Fund) investment objective is to provide current income and capital appreciation. The Fund seeks to achieve its investment objective by investing primarily in three distinct asset classes:

intermediate duration, investment grade corporate bonds, mortgage-related securities, asset-backed securities and US Government and agency securities;
senior, secured floating rate loans made to corporate and other business entities; and

US dollar-denominated securities of US and non-US issuers rated below investment grade and, to a limited extent, non-US dollar denominated securities of non-US issuers rated below investment grade.

The Fund s portfolio normally has an average portfolio duration of less than five years (including the effect of anticipated leverage), although it may be longer from time to time depending on market conditions. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objective will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the six-month period ended February 28, 2013, the Fund returned 9.10% based on market price and 7.17% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of 4.30% based on market price and 8.66% based on NAV. All returns reflect reinvestment of dividends. The Fund s premium to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Spread sectors outperformed government-related debt for the six-month period as accommodative monetary policy in the United States and Europe along with the continued recovery of the US economy drove credit spreads tighter. The Fund s allocations to high yield bonds and floating rate loan interests (bank loans) were the largest contributors to performance, followed by its positions in non-US sovereign securities. The Fund also benefited from its exposure to structured products including commercial mortgage-backed securities (CMBS), asset-backed securities (ABS) and non-agency residential mortgage-backed securities (MBS). An allocation to investment grade credit also had a positive impact.

The Fund s duration profile (sensitivity to interest rate movements) detracted from performance as interest rates moved higher during the period.

Describe recent portfolio activity.

During the six-month period, the Fund maintained a positive view on spread sectors and increased exposure to high yield credit, floating rate loan interests and securitized products such as CMBS and ABS. Within investment grade credit, the Fund favored financials over industrials and utilities. In financials, the Fund rotated out of senior bank debt into subordinated bank debt to take advantage of the yield differential. In addition, the Fund added to positions in floating rate preferred securities to benefit from a potential rise in interest rates.

Describe portfolio positioning at period end.

At period end, the Fund held 46% in corporate bonds and 34% of its total portfolio in floating rate loan interests (bank loans). The remainder of the portfolio was invested in MBS, structured products (including CMBS and ABS), US government sponsored agency securities and common stocks.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT FEBRUARY 28, 2013 9

The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and NAV of their common shares (Common Shares). However, these objectives cannot be achieved in all interest rate environments.

The Funds may utilize leverage through a credit facility or by entering into reverse repurchase agreements. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund's shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Funds had not used leverage.

To illustrate these concepts, assume a Fund's capitalization is \$100 million and it borrows for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays borrowing costs and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Fund with assets received from the borrowings earn income based on long-term interest rates. In this case, the borrowing costs and interest expense of the borrowings is significantly lower than the income earned on the Fund's long-term investments, and therefore the Fund's shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates, the yield curve has a negative slope. In this case, the Fund pays higher short-term interest rates whereas the Fund's total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Funds' portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Funds' debt securities does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Funds' NAVs positively or negatively in addition to the impact on Fund performance from leverage from borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Funds, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Funds' NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Funds' net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Fund's net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. Each Fund may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Fund to incur losses. The use of leverage may limit each Fund's ability to invest in certain types of securities or use certain types of hedging strategies. Each Fund will incur expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income.

Under the Investment Company Act of 1940, as amended (the 1940 Act), the Funds are permitted to issue senior securities representing indebtedness up to 33 $\frac{1}{3}$ % of their total managed assets (each Fund's net assets plus the proceeds of any outstanding borrowings). If the Funds segregate liquid assets having a value not less than the repurchase price (including accrued interest), a reverse repurchase agreement will not be considered a senior security and therefore will not be subject to this limitation. In addition, each Fund voluntarily limits its aggregate economic leverage to 50% of its managed assets. As of February 28, 2013, the Funds had aggregate economic leverage from reverse repurchase agreements and/or borrowings through a credit facility as a percentage of their total managed assets as follows:

**Percent of
Economic
Leverage**

BHL	27%
FRA	27%
BLW	32%

Derivative Financial Instruments

The Funds may invest in various derivative financial instruments, including financial futures contracts, foreign currency exchange contracts, options and swaps, as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market, equity, credit, interest rate and/or foreign currency exchange rate risks. Derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Funds' ability to use a derivative financial instrument successfully depends on the investment advisor's ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Fund to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Fund can realize on an investment, may result in lower dividends paid to shareholders or may cause a Fund to hold an investment that it might otherwise sell. The Funds' investments in these instruments are discussed in detail in the Notes to Financial Statements. Report of Independent Registered Public Accounting Firm

¹Using S&P's rating of the issuer.²The maximum potential amount the Fund may pay should a negative event take place as defined under the terms of agreement.

For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Fund has the ability to access

Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period.

The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to the Fund's most recent financial statements as contained in its semi-annual report.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT FEBRUARY 28, 2013 17

Schedule of Investments (continued) **BlackRock Defined Opportunity Credit Trust (BHL)**

The following tables summarize the Fund's investments and derivative financial instruments categorized in the disclosure hierarchy as of February 28, 2013:

	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term Investments:				
Asset-Backed Securities			\$ 5,105,830	\$ 5,105,830
Common Stocks		\$ 700,836		700,836
Corporate Bonds		12,915,870		12,915,870
Floating Rate Loan Interests		163,277,715	13,767,786	177,045,501
Short-Term Securities	\$ 4,275,893			4,275,893
Unfunded Commitments		180		180
Total	\$ 4,275,893	\$ 176,894,601	\$ 18,873,616	\$ 200,044,110

	Level 1	Level 2	Level 3	Total
Derivative Financial Instruments¹				
Assets:				
Credit contracts		\$ 66,901		\$ 66,901
Foreign currency exchange contracts		156,557		156,557
Liabilities:				
Credit contracts		(682)		(682)
Total		\$ 222,776		\$ 222,776

¹ Derivative financial instruments are swaps and foreign currency exchange contracts. Swaps and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument.

Certain of the Fund's assets and liabilities are held at carrying amount, which approximates fair value for financial statement purposes. As of February 28, 2013, such assets and liabilities are categorized within the disclosure hierarchy as follows:

	Level 1	Level 2	Level 3	Total
Assets:				
Foreign currency at value	\$ 141,316			\$ 141,316
Liabilities:				
Bank overdraft		\$ (313,625)		(313,625)
Loans payable		(48,000,000)		(48,000,000)
Total	\$ 141,316	\$ (48,313,625)		\$ (48,172,309)

There were no transfers between Level 1 and Level 2 during the six months ended February 28, 2013.

A reconciliation of Level 3 investments is presented when the Fund had a significant amount of Level 3 investments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset-Backed Securities	Floating Rate Loan Interests	Total
Assets:			
Opening Balance, as of August 31, 2012	\$ 3,427,772	\$10,204,028	\$13,631,800
Transfers into Level 3 ²		2,977,415	2,977,415
Transfers out of Level 3 ³		(3,112,046)	(3,112,046)
Accrued discounts/premiums	12,834	13,111	25,945
Net realized gain (loss)	69,456	29,826	99,282
Net change in unrealized appreciation/depreciation ⁴	352,013	128,358	480,371
Purchases	2,276,608	5,633,808	7,910,416
Sales	(1,032,853)	(2,106,714)	(3,139,567)
Closing Balance, as of February 28, 2013	\$ 5,105,830	\$13,767,786	\$18,873,616

As of August 31, 2012, the Fund used observable inputs in determining the value of certain investments. As of February 28, 2013, the Fund used significant unobservable inputs in determining the value of the same investments.

² As a result, investments with a beginning of period value of \$3,112,046 transferred from Level 2 to Level 3 in the disclosure hierarchy.

³ As of August 31, 2012, the Fund used significant unobservable inputs in determining the value of certain investments. As of February 28, 2013, the Fund used observable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$2,977,415 transferred from Level 3 to Level 2 in the disclosure hierarchy.

⁴ Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of February 28, 2013 was \$503,059. See Notes to Financial Statements.

18 SEMI-ANNUAL REPORT FEBRUARY 28, 2013

Schedule of Investments (concluded)

BlackRock Defined Opportunity Credit Trust (BHL)

The following table summarizes the valuation techniques used and unobservable inputs developed by the BlackRock Global Valuation Methodologies Committee (Global Valuation Committee) to determine the value of certain of the Fund's Level 3 investments as of February 28, 2013. The table does not include Level 3 investments with values derived utilizing third party pricing information without adjustment. A significant change in third party pricing information could result in a significantly lower or higher value of such Level 3 investments. The value of Level 3 investments derived using third party pricing information is \$16,811,868.

	Value	Valuation Techniques	Unobservable Inputs ¹	Range of Unobservable Inputs Utilized
Assets:				
Floating Rate Loan Interests	\$673,382	Discounted Cash Flow	Yield	9.50%
	309,499	Market Comparable Yield Analysis	Yield	8.375%
	1,078,867	Cost ²	N/A	
Total	\$2,061,748			

¹A change to the unobservable input may result in a significant change to the value of the investment as follows:

Unobservable Input	Impact to Value if Input Increases	Impact to Value if Input Decreases
--------------------	------------------------------------	------------------------------------

Yield	Decrease	Increase
-------	----------	----------

The Fund fair values certain of its Level 3 investments using prior transaction prices (acquisition cost), although the transaction may not have occurred during the current reporting period. In such cases, these investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public companies are not identical to the investments being fair valued by the Fund.

See Notes to Financial Statements.

- (a) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (b) Variable rate security. Rate shown is as of report date.
- (c) When-issued security. Unsettled when-issued transactions were as follows:

Counterparty	Value	Unrealized Appreciation
Bank of America Securities LLC	\$ 176,356	\$ 3,670
Citigroup Global Markets, Inc.	\$ 663,434	\$ 13,806
Deutsche Bank Securities, Inc	\$ 486,750	\$ 97

- (d) Non-income producing security.
- (e) Convertible security.
- (f) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (g) Issuer filed for bankruptcy and/or is in default of principal and/or interest payments.
- (h) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.
- (i) Other interests represent beneficial interests in liquidation trusts and other reorganization or private entities.
- (j) Warrants entitle the Fund to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date of the warrants, if any.
- (k) Investments in issuers considered to be an affiliate of the Fund during the six months ended February 28, 2013, for purposes of Section 2(a)(3) of the 1940 Act, were as follows:

Affiliate	Shares Held at August 31, 2012	Net Activity	Shares Held at February 28, 2013	Income

BlackRock Liquidity Funds, TempFund, Institutional Class	1,779,337	12,651,253	14,430,590	\$1,622
-------------------------------------------------------------	-----------	------------	------------	---------

See Notes to Financial Statements.

26 SEMI-ANNUAL REPORT FEBRUARY 28, 2013

BlackRock Floating Rate Income Strategies Fund, Inc. (FRA)

Consolidated Schedule of Investments (continued)

(l) Represents the current yield as of report date.

Foreign currency exchange contracts as of February 28, 2013 were as follows:

Currency Purchased	Currency Sold	Counterparty	Settlement Date	Unrealized Appreciation (Depreciation)
CAD 292,000	USD 289,532	Bank of America Corp.	4/17/13	\$(6,674)
CAD 384,000	USD 378,335	Citigroup, Inc.	4/17/13	(6,356)
USD 4,173,973	CAD 4,118,000	Deutsche Bank AG	4/17/13	184,889

¹Using S&P's rating of the issuer.

²The maximum potential amount the Fund may pay should a negative credit event take place as defined under the terms of the agreement.

For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for consolidated financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Fund has the ability to access

Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period.

The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Consolidated Financial Statements.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT FEBRUARY 28, 2013 27

BlackRock Floating Rate Income Strategies Fund, Inc. (FRA)

Consolidated Schedule of Investments (continued)

The following tables summarize the Fund's investments and derivative financial instruments categorized in the disclosure hierarchy as of February 28, 2013:

	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term Investments				
Asset-Backed Securities				
			\$24,036,705	\$ 24,036,705
Common Stocks	\$ 1,896,270	\$ 2,287,861	1,486,008	5,670,139
Corporate Bonds		64,338,072	3,576,120	67,914,192
Floating Rate Loan Interests		695,100,484	60,538,258	755,638,742
Other Interests			2,803,647	2,803,647
Preferred Securities	1,448,916			1,448,916
Warrants			9,283	9,283
Short-Term Securities	14,430,590			14,430,590
Unfunded Commitments		777		777
Total	\$ 17,775,776	\$ 761,727,194	\$92,450,021	\$871,952,991
	Level 1	Level 2	Level 3	Total

Derivative Financial Instruments¹**Assets:**

Credit contracts	\$ 372,158	\$ 372,158
Foreign currency exchange contracts	616,559	616,559

Liabilities:

Credit contracts	(2,961)	(2,961)
Foreign currency exchange contracts	(14,902)	(14,902)
Total	\$ 970,854	\$ 970,854

¹ Derivative financial instruments are swaps and foreign currency exchange contracts. Swaps and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument.

Certain of the Fund's assets and liabilities are held at carrying amount, which approximates fair value for financial statement purposes. As of February 28, 2013, such assets and liabilities are categorized within the disclosure hierarchy as follows:

	Level 1	Level 2	Level 3	Total
--	---------	---------	---------	-------

Assets:

Cash	\$ 1,844,191	\$ 1,844,191
Foreign currency at value	12,535	12,535
Cash pledged as collateral for swaps	620,000	620,000

Liabilities:

Loans payable		\$ (208,000,000)	(208,000,000)
Total	\$ 2,476,726	\$ (208,000,000)	\$(205,523,274)

There were no transfers between Level 1 and Level 2 during the six months ended February 28, 2013. A reconciliation of Level 3 investments is presented when the Fund had a significant amount of Level 3 investments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Asset-Backed Securities	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Other Interests	Warrant	Total
Balance, as of 2012	\$ 7,043,642	\$ 6,034	\$ 2,355,204	\$ 23,180,519	\$ 835,765		\$ 30,414,164
Change to Level 3 ²		215		6,481,543			6,481,758
Change from Level 3 ³				(6,684,789)			(6,684,789)
Premiums	47,027		46,401	122,910			216,338
Gain (loss)	270,089		291,984	(329,303)			232,770
Change in unrealized appreciation/depreciation ⁴	1,475,295	(5,449,635)	(565,100)	1,497,084	(1,280,852)	\$9,279	(4,313,229)
	19,166,762	6,929,394	3,200,581	49,060,785	4,372,036	4	86,729,562
	(3,966,110)		(1,752,950)	(12,790,491)	(1,123,302)		(19,632,853)
Balance, as of February 28, 2013	\$24,036,705	\$ 1,486,008	\$ 3,576,120	\$ 60,538,258	\$ 2,803,647	\$9,283	\$ 92,439,711

As of August 31, 2012, the Fund used observable inputs in determining the value of certain investments. As of February 28, 2013, the Fund used significant unobservable inputs in determining the value of the same investments.

² As a result, investments with a beginning of period value of \$6,684,789 transferred from Level 2 to Level 3 in the disclosure hierarchy.

³ As of August 31, 2012, the Fund used significant unobservable inputs in determining the value of certain investments. As of February 28, 2013, the Fund used observable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$6,481,544 transferred from Level 3 to Level 2 in the disclosure hierarchy.

⁴ Included in the related net change in unrealized appreciation/depreciation in the Statement of Operations. The change in unrealized appreciation/depreciation on investments still held as of February 28, 2013 was \$(3,374,156).

See Notes to Financial Statements.

Consolidated Schedule of Investments (concluded) **BlackRock Floating Rate Income Strategies Fund, Inc. (FRA)**

The following table summarizes the valuation techniques used and unobservable inputs developed by the Global Valuation Committee to determine the value of certain of the Fund's Level 3 investments as of February 28, 2013. The table does not include Level 3 investments with values derived utilizing third party pricing information without adjustment. A significant change in third party pricing information could result in a significantly lower or higher value of such Level 3 investments. The value of Level 3 investments derived using third party pricing information is \$77,534,994.

	Value	Valuation Techniques	Unobservable Inputs ¹	Range of Unobservable Inputs Utilized
Assets:				
Common Stocks	\$1,486,000	Market Comparable Companies	EBITDA Multiple	5.25x - 6.56x
Corporate Bonds	2,666,040	Market Comparable Companies	EBITDA Multiple	5.25x
Floating Rate Loan Interests	2,851,289	Discounted Cash Flow	Yield	9.50%
	1,346,076	Market Comparable Yield Analysis	Yield	8.375%
	4,825,089	Cost ²	N/A	
Other Interests ³	1,731,250	Discounted Cash Flow	Perpetuity Growth Rate	3.50%
			Free Cash Flow Weighted Cost of Capital	\$25.2 - \$35.2
			EBITDA Multiple	10.90%
Warrant	9,283	Market Comparable Companies	EBITDA Multiple	5.25x
Total	\$14,915,027			

¹A change to the unobservable input may result in a significant change to the value of the investment as follows:

Unobservable Input	Impact to Value if Input Increases	Impact to Value if Input Decreases
EBITDA Multiple	Increase	Decrease
Free Cash Flow	Increase	Decrease
Perpetuity Growth Rate	Increase	Decrease
Weighted Cost of Capital	Decrease	Increase
Yield	Decrease	Increase

²The Fund fair values certain of its Level 3 investments using prior transaction prices (acquisition cost), although the transaction may not have occurred during the current reporting period. In such cases, these investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public

companies are not identical to the investments being fair valued by the Fund.

³ For the six months ended February 28, 2013, the valuation technique for other interests changed from a market approach to an income approach. Market information previously utilized to determine fair value under the market approach no longer applied to this investment. Therefore, the income approach is considered to be a more relevant measure of fair value for this investment.

⁴ Amount is in millions.

See Notes to Financial Statements.

Notes to Schedule of Investments

- (a) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (b) Variable rate security. Rate shown is as of report date.
- (c) Non-income producing security.
- (d) Issuer filed for bankruptcy and/or is in default of principal and/or interest payments.
- (e) All or a portion of security has been pledged as collateral in connection with open reverse repurchase agreements.
- (f) Convertible security.
- (g) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (h) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.
- (i) When-issued security. Unsettled when-issued transactions were as follows:

Counterparty	Value	Unrealized Appreciation
Citigroup, Inc	\$2,242,560	\$ 15,558
Pershing LLC	\$1,491,240	\$ 19,724

- (j) Security is perpetual in nature and has no stated maturity date.
- (k) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown is as of report date.
- (l) Other interests represent beneficial interests in liquidation trusts and other reorganization or private entities.
- (m) Investments in issuers considered to be an affiliate of the Fund during the six months ended February 28, 2013, for purposes of Section 2(a)(3) of the 1940 Act, were as follows:

liate	Shares Held at August 31, 2012	Net Activity	Shares Held at February 28, 2013	Income	Real Gain
BlackRock Liquidity Funds, TempFund, Institutional Class	2,323,267	43,652	2,366,919	\$4,226	\$11

(n) Represents the current yield as of report date.

Reverse repurchase agreements outstanding as of February 28, 2013 were as follows:

Counterparty	Interest Rate	Trade Date	Maturity Date	Face Value	Face Value Including Accrued Interest

¹Using S&P's rating of the issuer.

²The maximum potential amount the Fund may pay should a negative event take place as defined under the terms of agreement.

Interest rate swaps outstanding as of February 28, 2013 were as follows:

Fixed Rate	Floating Rate	Counterparty/Exchange	Expiration Date	Notional Amount (000)	Unrealized Depreciation
1.10% ³	3-month LIBOR	Deutsche Bank AG	5/14/17	USD 14,500	\$ (219,310)
	³ Fund pays the fixed rate and receives the floating rate.				

For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this

report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Fund has the ability to access

Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

See Notes to Financial Statements.

44 SEMI-ANNUAL REPORT FEBRUARY 28, 2013

BlackRock Limited Duration Income Trust (BLW)

Consolidated Schedule of Investments (continued)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period.

The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the Fund's investments and derivative financial instruments categorized in the disclosure hierarchy as of February 28, 2013:

Liabilities:

Interest rate contracts		(219,310)	(219,310)
Foreign currency exchange contracts		(47,438)	(47,438)
Credit contracts		(86,990)	(86,990)
Total	\$ 160,762	\$ 3,161,962	\$ 3,222,724

Derivative financial instruments are swaps, financial futures contracts and foreign currency exchange contracts.

¹ Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at value.

Certain of the Fund's assets and liabilities are held at carrying amount or face value, which approximates fair value for financial statement purposes. As of February 28, 2013, such assets and liabilities are categorized within the disclosure hierarchy as follows:

	Level 1	Level 2	Level 3	Total
Assets:				
Cash pledged as collateral for financial futures contracts	\$ 15,500			\$ 15,500
Liabilities:				
Bank overdraft		\$ (940,679)		(940,679)
Bank overdraft on foreign currency at value		(1,618,646)		(1,618,646)
Cash received as collateral for swaps		(1,200,000)		(1,200,000)
Reverse repurchase agreements		(311,588,502)		(311,588,502)
Total	\$ 15,500	\$ (315,347,827)		\$ (315,332,327)

There were no transfers between Level 1 and Level 2 during the six months ended February 28, 2013. See Notes to Financial Statements.

BlackRock Limited Duration Income Trust (BLW)

Consolidated Schedule of Investments (concluded)

A reconciliation of Level 3 investments and derivative financial instruments is presented when the Fund had a significant amount of Level 3 investments and derivatives at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset-Backed Securities	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Non-Agency Mortgage Backed	Other Interests	Total
Balance, as of 2012	\$9,845,241	\$2,007,283	\$1,727	\$38,594,979		\$1,608,923	\$52,069,153
Transferred into Level 3 ¹		22,945	9,145,125	6,470,114			15,638,184
Transferred out of Level 3 ²				(7,121,367)			(7,121,367)
Discounts/premiums	(470,911)		(17,982)	65,449		18,810	(404,634)
Net gain (loss)	65,279		11,578	(108,690)			(31,833)
Change in unrealized appreciation/depreciation ³	1,072,279	1,474,842	(2,203,610)	962,859	\$16,283	136,210	1,458,863
	18,975,721	269,245	1,175,000	11,423,588	1,322,030	10,000	33,175,584
	(1,563,216)		(261,776)	(8,544,554)		(861,000)	(11,192,546)
Balance, as of 2013	\$27,924,393	\$3,774,315	\$7,850,062	\$41,742,378	\$1,338,313	\$912,943	\$83,642,304

As of August 31, 2012, the Fund used observable inputs in determining the value of certain investments. As of February 28, 2013, the Fund used significant unobservable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$7,121,367 transferred from Level 2 to Level 3 in the disclosure hierarchy.

²As of August 31, 2012, the Fund used significant unobservable inputs in determining the value of certain investments. As of February 28, 2013, the Fund used observable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$15,638,184 transferred from Level 3 to Level 2 in the disclosure hierarchy.

³Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of February 28, 2013 was \$1,096,578.

The following table summarizes the valuation techniques used and unobservable inputs developed by the Global Valuation Committee to determine the value of certain of the Fund's Level 3 investments as of February 28, 2013. The table does not include Level 3 investments with values derived utilizing third party pricing information without adjustment. A significant change in third party pricing information could result in a significantly lower or higher value of such Level 3 investments. The value of Level 3 investments derived using third party pricing information is \$72,727,794.

	Value	Valuation Techniques	Unobservable Inputs ⁴	Range of Unobservable Inputs Utilized
Assets:				
Common Stocks	\$ 2,594,787			6.56x

Corporate Bonds	1,727	Market Comparable Companies Estimated Final Distribution Cost ⁵	EBITDA Multiple Recovery Rate	0.05%
Floating Rate Loan Interests	3,293,096	Discounted Cash Flow Cost ⁵	N/A Yield	9.50%
Total	\$ 10,814,610			

⁴A change to the unobservable input may result in significant change to the value of the investment as follows:

Unobservable Input	Impact to Value if Input Increases	Impact to Value if Input Decreases
EBITDA Multiple	Increase	Decrease
Recovery Rate	Increase	Decrease
Yield	Decrease	Increase

The Fund fair values certain of its Level 3 investments using prior transaction prices (acquisition cost), although the transaction may not have occurred during the current reporting period. In such cases, these investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public companies are not identical to the investments being fair valued by the Fund. See Notes to Financial Statements.

54 SEMI-ANNUAL REPORT FEBRUARY 28, 2013

Notes to Financial Statements (Unaudited)

1. Organization and Significant Accounting Policies:

BlackRock Defined Opportunity Credit Trust (BHL), BlackRock Floating Rate Income Strategies Fund, Inc. (FRA) and BlackRock Limited Duration Income Trust (BLW) (collectively, the Funds or individually as a Fund) are registered under the 1940 Act, as diversified, closed-end management investment companies. BHL and BLW are organized as Delaware Statutory trusts. FRA is organized as Maryland corporation. The Funds' financial statements are prepared in conformity with accounting principles generally accepted in the United States of America (US GAAP), which may require management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates. The Boards of Directors and the Boards of Trustees of the Funds are collectively referred to throughout this report as the Board of Directors or the Board , and the directors/trustees thereof are collectively referred to throughout this report as Directors . The Funds determine and make available for publication the NAV of their Common Shares on a daily basis.

Reorganization: The Board and shareholders of FRA and the Board and shareholders of each of BlackRock Diversified Strategies Fund, Inc. (DVF) and BlackRock Floating Rate Income Strategies Fund II, Inc., (FRB) (individually, a Target Fund and collectively the Target Funds) approved the reorganization of its respective Target Fund into FRA pursuant to which FRA acquired substantially all of the assets and substantially all of the liabilities of each Target Fund in exchange for an equal aggregate value of newly-issued shares of FRA.

Each shareholder of a Target Fund received shares of FRA in an amount equal to the aggregate NAV of such shareholder's Target Fund shares, as determined at the close of business on October 5, 2012. Cash was distributed for any fractional shares.

The reorganizations were accomplished by a tax-free exchange of shares of FRA in the following amounts and at the following conversion ratios:

Target Fund	Shares Prior to Reorganization	Conversion Ratio	Shares of FRA
FRB	10,585,281	0.91462449	9,681,549
DVF	12,405,453	0.72423797	8,984,499

Each Target Fund's net assets and composition of net assets on October 5, 2012, the date of the reorganization, were as follows:

	Target Funds	
	FRB	DVF
Net assets	\$ 145,503,247	\$ 135,026,897
Paid-in capital	\$ 199,061,613	\$ 228,382,252
Undistributed (distributions in excess of) net investment income	\$ (164,508)	\$ (88,960)
Accumulated net realized loss	\$ (54,909,880)	\$ (89,378,206)
Net unrealized appreciation (depreciation)	\$ 1,516,022	\$ (3,888,189)

For financial reporting purposes, assets received and shares issued by FRA were recorded at fair value. However, the cost basis of the investments being received from the Target Funds were carried forward to align ongoing reporting of FRA's realized and unrealized gains and losses with amounts distributable to shareholders for tax purposes.

The net assets of FRA before the acquisition were \$278,016,037. The aggregate net assets of FRA immediately after the acquisition amounted to \$558,546,181. Each Target Fund's fair value and cost of investments prior to the reorganization were as follows:

Target Fund	Fair Value of Investments	Cost of Investments
-------------	---------------------------	---------------------

Edgar Filing: BLACKROCK FLOATING RATE INCOME STRATEGIES FUND, INC. - Form N-CSRS

FRB	\$220,588,307	\$219,010,017
DVF	\$206,051,284	\$209,710,937

The purpose of these transactions was to combine three funds managed by the Manager with the same or substantially similar (but not identical) investment objectives, investment policies, strategies, risks and restrictions. Each reorganization was a tax-free event and was effective on October 5, 2012.

Assuming the acquisition had been completed on September 1, 2012 the beginning of the fiscal reporting period of FRA, the pro forma results of operations for the six months ended February 28, 2013, are as follows:

Net investment income: \$18,393,758

Net realized and change in unrealized gain/loss on investments: \$14,776,513

Net increase/decrease in net assets resulting from operations: \$33,170,271

Because the combined investment portfolios have been managed as a single integrated portfolio since the acquisition was completed, it is not practicable to separate the amounts of revenue and earnings of the Target Funds that have been included in FRA's Statement of Operations since October 5, 2012.

Reorganization costs incurred in connection with the reorganization were expensed by FRA.

The following is a summary of significant accounting policies followed by the Funds:

Basis of Consolidation: The accompanying consolidated financial statements include the accounts of FRA Subsidiary, LLC and BLW Subsidiary, LLC (the Taxable Subsidiaries), all of which are wholly owned taxable subsidiaries of each Fund. The Taxable Subsidiaries enable the Funds to hold investments in operating companies and still satisfy Regulated Investment Company (RIC) tax requirements. Income earned and gains realized on the investments held by the Taxable Subsidiaries are taxable to such subsidiaries. A tax provision for income, if any, is shown as income tax in the Consolidated Statements of Operations. A tax provision for income from realized and unrealized gains, if any, is included as a reduction of realized and unrealized gain (loss) in the Consolidated Statements of Operations. Each Fund may invest up to 25% of their total

SEMI-ANNUAL REPORT FEBRUARY 28, 2013 55

Notes to Financial Statements (continued)

assets in the Taxable Subsidiary. Intercompany accounts and transactions have been eliminated. The Taxable Subsidiary is subject to the same investment policies and restrictions that apply to the Funds.

Valuation: US GAAP defines fair value as the price the Funds would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. The Funds fair value their financial instruments at market value using independent dealers or pricing services under policies approved by the Board. The Global Valuation Committee is the committee formed by management to develop global pricing policies and procedures and to provide oversight of the pricing function for the Funds for all financial instruments.

The Funds value their bond investments on the basis of last available bid prices or current market quotations provided by dealers or pricing services. Floating rate loan interests are valued at the mean of the bid prices from one or more brokers or dealers as obtained from a pricing service. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrixes, market transactions in comparable investments, various relationships observed in the market between investments and calculated yield measures. Asset-backed and mortgage-backed securities are valued by independent pricing services using models that consider estimated cash flows of each tranche of the security, establish a benchmark yield and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. Financial futures contracts traded on exchanges are valued at their last sale price. Swap agreements are valued utilizing quotes received daily by the Funds pricing service or through brokers, which are derived using daily swap curves and models that incorporate a number of market data factors, such as discounted cash flows, trades and values of the underlying reference instruments. Investments in open-end registered investment companies are valued at NAV each business day. Short-term securities with remaining maturities of 60 days or less may be valued at amortized cost, which approximates fair value.

Municipal investments (including commitments to purchase such investments on a when-issued basis) are valued on the basis of prices provided by dealers or pricing services. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrixes, market transactions in comparable investments and information with respect to various relationships between investments.

Equity investments traded on a recognized securities exchange or the NASDAQ Global Market System (NASDAQ) are valued at the last reported sale price that day or the NASDAQ official closing price, if applicable. For equity investments traded on more than one exchange, the last reported sale price on the exchange where the stock is primarily traded is used. Equity investments traded on a recognized exchange for which there were no sales on that day are valued at the last available bid (long positions) or ask (short positions) price. If no bid or ask price is available, the prior day s price will be used, unless it is determined that such prior day s price no longer reflects the fair value of the security.

Securities and other assets and liabilities denominated in foreign currencies are translated into US dollars using exchange rates determined as of the close of business on the New York Stock Exchange (NYSE). Foreign currency exchange contracts are valued at the mean between the bid and ask prices and are determined as of the close of business on the NYSE. Interpolated values are derived when the settlement date of the contract is an interim date for which quotations are not available.

Exchange-traded options are valued at the mean between the last bid and ask prices at the close of the options market in which the options trade. An exchange-traded option for which there is no mean price is valued at the last bid (long positions) or ask (short positions) price. If no bid or ask price is available, the prior day s price will be used, unless it is determined that the prior day s price no longer reflects the fair value of the option. Over-the-counter (OTC) options and swaptions are valued by an independent pricing service using a mathematical model, which incorporates a number of market data factors, such as the trades and prices of the underlying instruments.

In the event that application of these methods of valuation results in a price for an investment that is deemed not to be representative of the market value of such investment, or if a price is not available, the investment will be valued by the Global Valuation Committee, or its delegate, in accordance with a policy approved by the Board as reflecting fair value (Fair Value Assets). When determining the price for Fair Value Assets, the Global Valuation Committee, or its delegate, seeks to determine the price that each Fund might reasonably expect to receive from the current sale of that asset in an arm s-length transaction. Fair value determinations shall be based upon all available factors that the Global Valuation Committee deem relevant consistent with the principles of fair value measurement, which include the market approach, income approach and/or in the case of recent investments, the cost approach, as appropriate. A market approach generally consists of using comparable market transactions. The income approach generally is used to discount future cash flows to present value and adjusted for liquidity as appropriate. These factors include but are not limited to: (i) attributes specific to the investment or asset; (ii) the principal market for the

investment or asset; (iii) the customary participants in the principal market for the investment or asset; (iv) data assumptions by market participants for the investment or asset, if reasonably available; (v) quoted prices for similar investments or assets in active markets; and (vi) other factors, such as future cash flows, interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks, recovery rates, liquidation amounts and/or default rates. Due to the inherent uncertainty of valuations of such investments, the fair values may differ from the values that would have been used had an active market existed. The Global Valuation Committee, or its delegate, employs various methods for calibrating valuation approaches for investments where an active market does not exist, including regular due diligence of the Funds' pricing vendors, a regular review of key inputs and assumptions, transactional back-testing or disposition analysis to compare unrealized gains and losses to realized gains and losses, reviews of missing or stale prices and large movements in market values and reviews of any market related activity. The pricing of all Fair Value Assets is subsequently reported to the Board or a committee thereof on a quarterly basis.

56 SEMI-ANNUAL REPORT FEBRUARY 28, 2013

Notes to Financial Statements (continued)

Generally, trading in foreign instruments is substantially completed each day at various times prior to the close of business on the NYSE. Occasionally, events affecting the values of such instruments may occur between the foreign market close and the close of business on the NYSE that may not be reflected in the computation of the Funds' net assets. If events (for example, a company announcement, market volatility or a natural disaster) occur during such periods that are expected to affect the value of such instruments materially, those instruments may be Fair Value Assets and be valued at their fair value, as determined in good faith by the Global Valuation Committee using a pricing service and/or policies approved by the Board.

Foreign Currency: The Funds' books and records are maintained in US dollars. Purchases and sales of investment securities are recorded at the rates of exchange prevailing on the respective date of such transactions. Generally, when the US dollar rises in value against a foreign currency, the Funds' investments denominated in that currency will lose value because that currency is worth fewer US dollars; the opposite effect occurs if the US dollar falls in relative value.

The Funds do not isolate the portion of the results of operations arising as a result of changes in the foreign exchange rates from the changes in the market prices of investments held or sold for financial reporting purposes. Accordingly, the effects of changes in foreign currency exchange rates on investments are not segregated on the Statement of Operations from the effects of changes in market prices of those investments but are included as a component of net realized and unrealized gain (loss) from investments. The Funds report realized currency gains (losses) on foreign currency related transactions as components of net realized gain (loss) for financial reporting purposes, whereas such components are treated as ordinary income for federal income tax purposes.

Asset-Backed and Mortgage-Backed Securities: The Funds may invest in asset-backed securities. Asset-backed securities are generally issued as pass-through certificates, which represent undivided fractional ownership interests in an underlying pool of assets, or as debt instruments, which are also known as collateralized obligations, and are generally issued as the debt of a special purpose entity organized solely for the purpose of owning such assets and issuing such debt. Asset-backed securities are often backed by a pool of assets representing the obligations of a number of different parties. The yield characteristics of certain asset-backed securities may differ from traditional debt securities. One such major difference is that all or a principal part of the obligations may be prepaid at any time because the underlying assets (i.e., loans) may be prepaid at any time. As a result, a decrease in interest rates in the market may result in increases in the level of prepayments as borrowers, particularly mortgagors, refinance and repay their loans. An increased prepayment rate with respect to an asset-backed security subject to such a prepayment feature will have the effect of shortening the maturity of the security. In addition, a Fund may have to subsequently reinvest the proceeds at lower interest rates. If a Fund has purchased such an asset-backed security at a premium, a faster than anticipated prepayment rate could result in a loss of principal to the extent of the premium paid.

The Funds may purchase certain mortgage pass-through securities. There are a number of important differences among the agencies and instrumentalities of the US government that issue mortgage-related securities and among the securities that they issue. For example, mortgage-related securities guaranteed by Ginnie Mae are guaranteed as to the timely payment of principal and interest by Ginnie Mae and such guarantee is backed by the full faith and credit of the United States. However, mortgage-related securities issued by Freddie Mac and Fannie Mae, including Freddie Mac and Fannie Mae guaranteed mortgage pass-through certificates, which are solely the obligations of Freddie Mac and Fannie Mae, are not backed by or entitled to the full faith and credit of the United States but are supported by the right of the issuer to borrow from the Treasury.

Collateralized Debt Obligations: Certain Funds may invest in collateralized debt obligations (CDOs), which include collateralized bond obligations (CBOs) and collateralized loan obligations (CLOs). CBOs and CLOs, are types of asset-backed securities. A CDO is a bankruptcy remote entity, which is backed by a diversified pool of debt securities (CBOs) or syndicated bank loans (CLOs). The cash flows of the CDO can be split into multiple segments, called tranches , which will vary in risk profile and yield. The riskiest segment is the subordinated or equity tranche. This tranche bears the greatest risk of defaults from the underlying assets in the CDO and serves to protect the other, more senior, tranches from default in all but the most severe circumstances. Since it is shielded from defaults by the more junior tranches, a senior tranche will typically have higher credit ratings and lower yields than their underlying securities, and often receive investment grade ratings from one or more of the nationally recognized rating agencies. Despite the protection from the more junior tranches, senior tranches can experience substantial losses due to actual defaults, increased sensitivity to future defaults and the disappearance of one or more protecting tranches as a result of changes in the credit profile of the underlying pool of assets.

Multiple Class Pass-Through Securities: Certain Trusts may invest in multiple class pass-through securities, including collateralized mortgage obligations (CMOs) and commercial mortgage-backed securities. These multiple class securities may be issued by Ginnie Mae, US government agencies or instrumentalities or by trusts formed by private originators of, or investors in, mortgage loans. In general, CMOs are debt obligations of a legal entity that are collateralized by, and multiple class pass-through securities represent direct ownership interests in, a pool of residential or commercial mortgage loans or mortgage pass-through securities (the Mortgage Assets), the payments on which are used to make payments on the CMOs or multiple pass-through

securities. Classes of CMOs include interest only (IOs), principal only (POs), planned amortization classes and targeted amortization classes. IOs and POs are stripped mortgage-backed securities representing interests in a pool of mortgages, the cash flow from which has been separated into interest and principal components. IOs receive the interest portion of the cash flow while POs receive the principal portion. IOs and POs can be extremely volatile in response to changes in interest rates. As interest rates rise and fall, the value of IOs tends to move in the same direction as interest rates. POs perform best when prepayments on the underlying mortgages rise since this increases the rate at which the principal is returned and the yield to

SEMI-ANNUAL REPORT FEBRUARY 28, 2013 57

Notes to Financial Statements (continued)

maturity on the PO. When payments on mortgages underlying a PO are slower than anticipated, the life of the PO is lengthened and the yield to maturity is reduced. If the underlying Mortgage Assets experience greater than anticipated pre-payments of principal, the Trusts may not fully recoup their initial investment in IOs.

Stripped Mortgage-Backed Securities: Certain Trusts may invest in stripped mortgage-backed securities issued by the US government, its agencies and instrumentalities. Stripped mortgage-backed securities are usually structured with two classes that receive different proportions of the interest (IOs) and principal (POs) distributions on a pool of Mortgage Assets. The Trusts also may invest in stripped mortgage-backed securities that are privately issued.

Zero-Coupon Bonds: The Funds may invest in zero-coupon bonds, which are normally issued at a significant discount from face value and do not provide for periodic interest payments. Zero-coupon bonds may experience greater volatility in market value than similar maturity debt obligations which provide for regular interest payments.

Capital Trusts: Certain Trusts may invest in capital trusts. These securities are typically issued by corporations, generally in the form of interest-bearing notes with preferred securities characteristics, or by an affiliated business trust of a corporation, generally in the form of beneficial interests in subordinated debentures or similarly structured securities. The securities can be structured as either fixed or adjustable coupon securities that can have either a perpetual or stated maturity date. Dividends can be deferred without creating an event of default or acceleration, although maturity cannot take place unless all cumulative payment obligations have been met. The deferral of payments does not affect the purchase or sale of these securities in the open market. Payments on these securities are treated as interest rather than dividends for federal income tax purposes. These securities generally are rated below that of the issuing company's senior debt securities.

Preferred Stock: Certain Funds may invest in preferred stock. Preferred stock has a preference over common stock in liquidation (and generally in receiving dividends as well) but is subordinated to the liabilities of the issuer in all respects. As a general rule, the market value of preferred stock with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk, while the market price of convertible preferred stock generally also reflects some element of conversion value. Because preferred stock is junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar stated yield characteristics. Unlike interest payments on debt securities, preferred stock dividends are payable only if declared by the issuer's board of directors. Preferred stock also may be subject to optional or mandatory redemption provisions.

Floating Rate Loan Interests: The Funds may invest in floating rate loan interests. The floating rate loan interests the Funds hold are typically issued to companies (the borrower) by banks, other financial institutions, and privately and publicly offered corporations (the lender). Floating rate loan interests are generally non-investment grade, often involve borrowers whose financial condition is troubled or uncertain and companies that are highly leveraged. The Funds may invest in obligations of borrowers who are in bankruptcy proceedings. Floating rate loan interests may include fully funded term loans or revolving lines of credit. Floating rate loan interests are typically senior in the corporate capital structure of the borrower. Floating rate loan interests generally pay interest at rates that are periodically determined by reference to a base lending rate plus a premium. The base lending rates are generally the lending rate offered by one or more European banks, such as the London Interbank Offered Rate (LIBOR), the prime rate offered by one or more US banks or the certificate of deposit rate. Floating rate loan interests may involve foreign borrowers, and investments may be denominated in foreign currencies. The Funds consider these investments to be investments in debt securities for purposes of its investment policies.

When a Fund purchases a floating rate loan interest it may receive a facility fee and when it sells a floating rate loan interest it may pay a facility fee. On an ongoing basis, the Funds may receive a commitment fee based on the undrawn portion of the underlying line of credit amount of a floating rate loan interest. Facility and commitment fees are typically amortized to income over the term of the loan or term of the commitment, respectively. Consent and amendment fees are recorded to income as earned. Prepayment penalty fees, which may be received by the Funds upon the prepayment of a floating rate loan interest by a borrower, are recorded as realized gains. The Funds may invest in multiple series or tranches of a loan. A different series or tranche may have varying terms and carry different associated risks.

Floating rate loan interests are usually freely callable at the borrower's option. The Funds may invest in such loans in the form of participations in loans (Participations) or assignments (Assignments) of all or a portion of loans from third parties. Participations typically will result in the Funds having a contractual relationship only with the lender, not with the borrower. The Funds will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the Participation and only upon receipt by the lender of the payments from the borrower. In connection with purchasing Participations, the Funds generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, nor any rights of offset

against the borrower, and the Funds may not benefit directly from any collateral supporting the loan in which it has purchased the Participation. As a result, the Funds will assume the credit risk of both the borrower and the lender that is selling the Participation. The Funds' investment in loan participation interests involves the risk of insolvency of the financial intermediaries who are parties to the transactions. In the event of the insolvency of the lender selling the Participation, the Funds may be treated as a general creditor of the lender and may not benefit from any offset between the lender and the borrower. Assignments typically result in the Funds having a direct contractual relationship with the borrower, and the Funds may enforce compliance by the borrower with the terms of the loan agreement.

Forward Commitments and When-Issued Delayed Delivery Securities: The Funds may purchase securities on a when-issued basis and may purchase or sell securities on a forward commitment basis. Settlement of such transactions normally occurs within a month or more after the purchase or

58 SEMI-ANNUAL REPORT FEBRUARY 28, 2013

Notes to Financial Statements (continued)

sale commitment is made. The Funds may purchase securities under such conditions with the intention of actually acquiring them, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Funds may be required to pay more at settlement than the security is worth. In addition, the Funds are not entitled to any of the interest earned prior to settlement. When purchasing a security on a delayed delivery basis, the Funds assume the rights and risks of ownership of the security, including the risk of price and yield fluctuations. In the event of default by the counterparty, the Funds' maximum amount of loss is the unrealized appreciation of unsettled when-issued transactions, which is shown in the Schedules of Investments.

Reverse Repurchase Agreements: Certain Funds may enter into reverse repurchase agreements with qualified third party broker-dealers. In a reverse repurchase agreement, the Funds sell securities to a bank or broker-dealer and agrees to repurchase the same securities at a mutually agreed upon date and price. Securities sold under reverse repurchase agreements are recorded as a liability in the Statement of Assets and Liabilities at face value including accrued interest. Due to the short-term nature of the reverse repurchase agreements, face value approximates fair value. During the term of the reverse repurchase agreement, the Funds continue to receive the principal and interest payments on these securities. Certain agreements have no stated maturity and can be terminated by either party at any time. Interest on the value of the reverse repurchase agreements issued and outstanding is based upon competitive market rates determined at the time of issuance. The Funds may utilize reverse repurchase agreements when it is anticipated that the interest income to be earned from the investment of the proceeds of the transaction is greater than the interest expense of the transaction. Reverse repurchase agreements involve leverage risk and also the risk that the market value of the securities that the Funds are obligated to repurchase under the agreement may decline below the repurchase price. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Funds' use of the proceeds of the agreement may be restricted while the other party, or its trustee or receiver, determines whether or not to enforce the Funds' obligation to repurchase the securities.

Segregation and Collateralization: In cases in which the 1940 Act and the interpretive positions of the Securities and Exchange Commission (SEC) require that the Funds either deliver collateral or segregate assets in connection with certain investments (e.g., financial futures contracts, foreign currency exchange contracts and swaps), or certain borrowings (e.g., reverse repurchase agreements and loan payable), the Funds will, consistent with SEC rules and/or certain interpretive letters issued by the SEC, segregate collateral or designate on its books and records cash or liquid securities having a market value at least equal to the amount that would otherwise be required to be physically segregated. Furthermore, based on requirements and agreements with certain exchanges and third party broker-dealers, each party to such transactions has requirements to deliver/deposit securities as collateral for certain investments.

Investment Transactions and Investment Income: For financial reporting purposes, investment transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on investment transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Dividends from foreign securities where the ex-dividend date may have passed are subsequently recorded when the Funds are informed of the ex-dividend date. Under the applicable foreign tax laws, a withholding tax at various rates may be imposed on capital gains, dividends and interest. Upon notification from issuers, some of the dividend income received from a real estate investment trust may be redesignated as a reduction of cost of the related investment and/or realized gain. Interest income, including amortization and accretion of premiums and discounts on debt securities, is recognized on the accrual basis.

Dividends and Distributions: Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates. The portion of dividends and distributions that exceeds a Fund's current and accumulated earnings and profits, which are measured on a tax basis, may be treated as a tax return of capital. Distributions in excess of a Fund's taxable income and net capital gains, but not in excess of a Fund's earnings and profits, will be taxable to shareholders as ordinary income and will not constitute a nontaxable return of capital. Capital losses carried forward from years beginning before 2011 do not reduce earnings and profits, even if such carried forward losses offset current year realized gains. The character and timing of dividends and distributions are determined in accordance with federal income tax regulations, which may differ from US GAAP.

Income Taxes: It is each Fund's policy to comply with the requirements of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

Each Fund files US federal and various state and local tax returns. No income tax returns are currently under examination. The statute of limitations on the Funds' US federal tax returns remains open for each of the four years ended August 31, 2012. The statutes of limitations on the Funds' state and local tax returns may remain open for an additional year depending upon the

jurisdiction. Management does not believe there are any uncertain tax positions that require recognition of a tax liability.

Recent Accounting Standards: In December 2011, the Financial Accounting Standards Board (the FASB) issued guidance that will expand current disclosure requirements on the offsetting of certain assets and liabilities. The new disclosures will be required for investments and derivative financial instruments subject to master netting or similar agreements, which are eligible for offset in the Statements of Assets and Liabilities and will require an entity to disclose both gross and net information about such investments and transactions in the financial statements. In January 2013, the FASB issued guidance that clarifies which investments and transactions are subject to the offsetting disclosure requirements. The scope of the disclosure requirements for offsetting will be limited to derivative instruments, repurchase agreements and reverse

SEMI-ANNUAL REPORT FEBRUARY 28, 2013 59

Notes to Financial Statements (continued)

repurchase agreements, and securities borrowing and securities lending transactions. The guidance is effective for financial statements with fiscal years beginning on or after January 1, 2013, and interim periods within those fiscal years. Management is evaluating the impact of this guidance on the Funds' financial statement disclosures.

Deferred Compensation Plan: Under the Deferred Compensation Plan (the Plan) approved by each Fund's Board, the independent Directors (Independent Directors) may defer a portion of their annual complex-wide compensation. Deferred amounts earn an approximate return as though equivalent dollar amounts had been invested in common shares of certain other BlackRock Closed-End Funds selected by the Independent Directors. This has the same economic effect for the Independent Directors as if the Independent Directors had invested the deferred amounts directly in certain other BlackRock Closed-End Funds.

The Plan is not funded and obligations thereunder represent general unsecured claims against the general assets of each Fund. Deferred compensation liabilities are included in officers' and directors' fees payable in the Statements of Assets and Liabilities and will remain as a liability of the Funds until such amounts are distributed in accordance with the Plan.

Other: Expenses directly related to a Fund are charged to that Fund. Other operating expenses shared by several funds are pro-rated among those funds on the basis of relative net assets or other appropriate methods.

The Funds have an arrangement with the custodian whereby fees may be reduced by credits earned on uninvested cash balances, which, if applicable, are shown as fees paid indirectly in the Statements of Operations. The custodian imposes fees on overdrawn cash balances, which can be offset by accumulated credits earned or may result in additional custody charges.

2. Derivative Financial Instruments:

The Funds engage in various portfolio investment strategies using derivative contracts both to increase the returns of the Funds and/or to economically hedge, or protect, their exposure to certain risks such as credit risk, equity risk, interest rate risk, foreign currency exchange rate risk. These contracts may be transacted on an exchange or OTC.

Losses may arise if the value of the contract decreases due to an unfavorable change in the market rates or values of the underlying instrument or if the counterparty does not perform under the contract. The Funds' maximum risk of loss from counterparty credit risk on OTC derivatives is generally the aggregate unrealized gain netted against any collateral pledged by/posted to the counterparty. For OTC options purchased, the Funds bear the risk of loss in the amount of the premiums paid plus the positive change in market values net of any collateral received on the options should the counterparty fail to perform under the contracts. Options written by the Funds do not give rise to counterparty credit risk, as options written obligate the Funds and not the counterparty to perform. Counterparty risk related to exchange-traded financial futures contracts and options and centrally cleared swaps is deemed to be minimal due to the protection against defaults provided by the exchange on which these contracts trade.

The Funds may mitigate counterparty risk by procuring collateral and through netting provisions included within an International Swaps and Derivatives Association, Inc. master agreement (ISDA Master Agreement) implemented between a Fund and each of its respective counterparties. An ISDA Master Agreement allows each Fund to offset with each separate counterparty certain derivative financial instruments' payables and/or receivables with collateral held. The amount of collateral moved to/from applicable counterparties is generally based upon minimum transfer amounts of up to \$500,000. To the extent amounts due to the Funds from their counterparties are not fully collateralized, contractually or otherwise, the Funds bear the risk of loss from counterparty non-performance. See Note 1 Segregation and Collateralization for information with respect to collateral practices. In addition, the Funds manage counterparty risk by entering into agreements only with counterparties that it believes have the financial resources to honor their obligations and by monitoring the financial stability of those counterparties.

Certain ISDA Master Agreements allow counterparties to OTC derivatives to terminate derivative contracts prior to maturity in the event the Funds' net assets decline by a stated percentage or the Funds fail to meet the terms of its ISDA Master Agreements, which would cause the Funds to accelerate payment of any net liability owed to the counterparty.

Financial Futures Contracts: The Funds purchase or sell financial futures contracts and options on financial futures contracts to gain exposure to, or economically hedge against, changes in interest rates (interest rate risk). Financial futures contracts are agreements between the Funds and a counterparty to buy or sell a specific quantity of an underlying instrument at a specified price and at a specified date. Depending on the terms of the particular contract, financial futures contracts are settled either through physical delivery of the underlying instrument on the settlement date or by payment of a cash settlement amount on the settlement date. Pursuant to the contract, the Funds agree to receive from or pay to the broker an amount of cash equal to the daily fluctuation

in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Funds as unrealized appreciation or depreciation. When the contract is closed, the Funds record a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The use of financial futures contracts involves the risk of an imperfect correlation in the movements in the price of financial futures contracts, interest or foreign currency exchange rates and the underlying assets.

Foreign Currency Exchange Contracts: The Funds enter into foreign currency exchange contracts as an economic hedge against either specific transactions or portfolio instruments or to obtain exposure to foreign currencies (foreign currency exchange rate risk). A foreign currency exchange contract is an agreement between two parties to buy and sell a currency at a set exchange rate on a future date. Foreign currency exchange contracts, when used by the Funds, help to manage the overall

60SEMI-ANNUAL REPORT FEBRUARY 28, 2013

Notes to Financial Statements (continued)

exposure to the currencies in which some of the investments held by the Funds are denominated. The contract is marked-to-market daily and the change in market value is recorded by the Funds as an unrealized gain or loss. When the contract is closed, the Funds record a realized gain or loss equal to the difference between the value at the time it was opened and the value at the time it was closed. The use of foreign currency exchange contracts involves the risk that the value of a foreign currency exchange contract changes unfavorably due to movements in the value of the referenced foreign currencies and the risk that the counterparty to the contract does not perform its obligations under the agreement.

Options: The Funds purchase and write call and put options to increase or decrease their exposure to underlying instruments (equity and/or interest rate risk) and/or, in the case of options written, to generate gains from options premiums. A call option gives the purchaser (holder) of the option the right (but not the obligation) to buy, and obligates the seller (writer) to sell (when the option is exercised), the underlying instrument at the exercise or strike price at any time or at a specified time during the option period. A put option gives the holder the right to sell and obligates the writer to buy the underlying instrument at the exercise or strike price at any time or at a specified time during the option period. When the Funds purchase (write) an option, an amount equal to the premium paid (received) by the Funds is reflected as an asset (liability). The amount of the asset (liability) is subsequently marked-to-market to reflect the current market value of the option purchased (written). When an instrument is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the instrument acquired or deducted from (or added to) the proceeds of the instrument sold. When an option expires (or the Funds enter into a closing transaction), the Funds realize a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premiums received or paid). When the Funds write a call option, such option is covered, meaning that the Funds holds the underlying instrument subject to being called by the option counterparty. When the Funds write a put option, such option is covered by cash in an amount sufficient to cover the obligation.

Options on swaps (swaptions) are similar to options on securities except that instead of selling or purchasing the right to buy or sell a security, the writer or purchaser of the swap option is granting or buying the right to enter into a previously agreed upon interest rate or credit default swap agreement (interest rate risk and/or credit risk) at any time before the expiration of the option.

In purchasing and writing options, the Funds bear the risk of an unfavorable change in the value of the underlying instrument or the risk that the Funds may not be able to enter into a closing transaction due to an illiquid market. Exercise of a written option could result in the Funds purchasing or selling a security at a price different from the current market value.

Swaps: The Funds enter into swap agreements, in which the Funds and a counterparty agree either to make periodic net payments on a specified notional amount or a net payment upon termination. Swap agreements are privately negotiated in the OTC market and may be entered into as a bilateral contract or centrally cleared (centrally cleared swaps). In a centrally cleared swap, immediately following execution of the swap agreement, the swap agreement is novated to a central counterparty (the CCP) and the Funds face the CCP through a future commission merchant. Unlike a bilateral swap agreement, for centrally cleared swaps, the Funds have no credit exposure to the counterparty as the CCP stands between the Funds and the counterparty. These payments received or made by the Funds are recorded in the Statements of Operations as realized gains or losses, respectively. Any upfront fees paid are recorded as assets and any upfront fees received are recorded as liabilities and are shown as swap premiums paid and swap premiums received, respectively in the Statements of Assets and Liabilities and amortized over the term of the swap. Swaps are marked-to-market daily and changes in value are recorded as unrealized appreciation (depreciation). The daily change in valuation of centrally cleared swaps, if any, is recorded as a receivable or payable for variation margin in the Statements of Assets and Liabilities. When the swap is terminated, the Funds will record a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Funds' basis in the contract, if any. Generally, the basis of the contracts is the premium received or paid. Swap transactions involve, to varying degrees, elements of interest rate, credit and market risk in excess of the amounts recognized in the Statements of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreements, and that there may be unfavorable changes in interest rates and/or market values associated with these transactions.

Credit default swaps The Funds enter into credit default swaps to manage their exposure to the market or certain sectors of the market, to reduce their risk exposure to defaults of corporate and/or sovereign issuers or to create exposure to corporate and/or sovereign issuers to which they are not otherwise exposed (credit risk). The Funds enter into credit default swap agreements to provide a measure of protection against the default of an issuer (as buyer of protection) and/or gain credit exposure to an issuer to which it is not otherwise exposed (as seller of protection). The Funds may either buy or sell (write) credit default swaps on single-name issuers (corporate or sovereign), a combination or basket of single-name issuers or traded indexes. Credit default swaps on single-name issuers are agreements in which the buyer pays fixed periodic payments to the seller in consideration for a guarantee from the seller to make a specific payment should a negative credit event take place with respect to the referenced entity (e.g., bankruptcy, failure to pay, obligation accelerators, repudiation, moratorium or restructuring). Credit default swaps on

traded indexes are agreements in which the buyer pays fixed periodic payments to the seller in consideration for a guarantee from the seller to make a specific payment should a write-down, principal or interest shortfall or default of all or individual underlying securities included in the index occurs. As a buyer, if an underlying credit event occurs, the Funds will either receive from the seller an amount equal to the notional amount of the swap and deliver the referenced security or underlying securities comprising the index or receive a net settlement of cash equal to the notional amount of

SEMI-ANNUAL REPORT FEBRUARY 28, 2013 61

Notes to Financial Statements (continued)

the swap less the recovery value of the security or underlying securities comprising the index. As a seller (writer), if an underlying credit event occurs, the Funds will either pay the buyer an amount equal to the notional amount of the swap and take delivery of the referenced security or underlying securities comprising the index or pay a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising the index.

Interest rate swaps The Trusts enter into interest rate swaps to gain or reduce exposure to interest rates or to manage duration, the yield curve or interest rate risk by economically hedging the value of the fixed rate bonds, which may decrease when interest rates rise (interest rate risk). Interest rate swaps are agreements in which one party pays a stream of interest payments, either fixed or floating, for another party's stream of interest payments, either fixed or floating, on the same notional amount for a specified period of time. Interest rate floors, which are a type of interest rate swap, are agreements in which one party agrees to make payments to the other party to the extent that interest rates fall below a specified rate or floor in return for a premium. In more complex swaps, the notional principal amount may decline (or amortize) over time.

3. Investment Advisory Agreement and Other Transactions with Affiliates:

The PNC Financial Services Group, Inc. (PNC) is the largest stockholder and an affiliate, for 1940 Act purposes, of BlackRock, Inc. (BlackRock).

Each Fund entered into an Investment Advisory Agreement with BlackRock Advisors, LLC (the Manager), the Funds investment advisor, an indirect, wholly owned subsidiary of BlackRock, to provide investment advisory and administration services. The Manager is responsible for the management of each Fund s portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of each Fund. For such services, each Fund pays the Manager a monthly fee based on a percentage of each Fund s average daily net assets at the following annual rates, plus the proceeds of any outstanding borrowings used for leverage as follows:

BHL	1.00%
FRA	0.75%
BLW	0.55%

The Manager voluntarily agreed to waive its investment advisory fees by the amount of investment advisory fees each Fund pays to the Manager indirectly through its investment in affiliated money market funds. However, the Manager does not waive its investment advisory fees by the amount of investment advisory fees paid in connection with each Fund s investment in other affiliated investment companies, if any. These amounts are included in, fees waived by Manager in the Statements of Operations.

The Manager provides investment management and other services to the Taxable Subsidiaries. The Manager does not receive separate compensation from the Taxable Subsidiaries for providing investment management or administrative services. However, each Fund pays the Manager based on the Fund s net assets which includes the assets of the Taxable Subsidiaries.

Notes to Financial Statements (continued)

The Manager entered into a sub-advisory agreement with BlackRock Financial Management, Inc. (BFM), an affiliate of the Manager. The Manager pays BFM, for services it provides, a monthly fee that is a percentage of the investment advisory fees paid by each Fund to the Manager.

Certain officers and/or Directors of the Funds are officers and/or Directors of BlackRock or its affiliates. The Funds reimburse the Manager for a portion of the compensation paid to the Funds' Chief Compliance Officer, which is included in officer and directors in the Statements of Operations.

4. Investments:

Purchases and sales of investments including paydowns and excluding short-term securities and US government securities for the six months ended February 28, 2013, were as follows:

	Purchases	Sales
BHL	\$ 95,015,208	\$ 86,554,331
FRA	\$ 389,340,846	\$ 364,351,206
BLW	\$ 415,779,704	\$ 366,522,355

Purchases and sales of US government securities for BLW for the six months ended February 28, 2013 were \$0 and \$1,745,676, respectively.

Transactions in options written for the six months ended February 28, 2013 were as follows:

BLW	Puts		
	Contracts	Notional (000)	Premiums Received
Outstanding options, beginning of year	6,000		\$ 75,600
Options written			
Options exercised			
Options expired	(6,000)		(75,600)
Outstanding options, end of year			

5. Income Tax Information:

As of August 31, 2012, the Funds had capital loss carryforwards available to offset future realized capital gains through the indicated expiration dates as follows:

Expires August 31,	BHL	FRA	BLW
2013		\$ 691,829	
2016		475,453	\$ 21,882,229
2017		20,954,032	9,996,868
2018	\$ 3,695,649	43,990,722	37,509,275
2019		2,206,081	
No expiration date ¹		4,931,753	4,356,066
Total	\$ 3,695,649	\$ 73,249,870	\$ 73,744,438

¹ Must be utilized prior to losses subject to expiration.

As of February 28, 2013, gross unrealized appreciation and gross unrealized depreciation based on cost for federal income tax purposes were as follows:

BHL	FRA	BLW
-----	-----	-----

Tax cost	\$ 196,810,430	\$ 867,114,867	\$ 988,955,528
Gross unrealized appreciation	\$ 4,169,700	\$ 19,322,594	\$ 38,037,425
Gross unrealized depreciation	(936,200)	(14,485,247)	(20,030,771)
Net unrealized appreciation	\$ 3,233,500	\$ 4,837,347	\$ 18,006,654

6. Borrowings:

Effective March 3, 2011, the BHL and FRA were party to a senior committed secured, 364-day revolving line of credit and a separate security agreement (the SSB Agreement) with State Street Bank and Trust Company (SSB). The Funds have granted a security interest in substantially all of their assets to SSB. The SSB Agreement allowed for the following maximum commitment amounts:

	Commitment Amounts
BHL	\$ 63,300,000
FRA	\$137,200,000

Advances were made by SSB to the Funds, at the Funds' option of (a) the higher of (i) 0.80% above the Fed Funds rate and (ii) 0.80% above the Overnight LIBOR or (b) 0.80% above 7-day, 30-day, 60-day or 90-day LIBOR.

Effective March 2, 2012, the SSB Agreement was renewed for an additional 364 days. The SSB Agreement allows for the following maximum commitment amounts:

	Commitment Amounts
BHL	\$ 63,300,000
FRA	\$137,200,000

Advances were be made by SSB to the Funds, at the Funds' option of (a) the higher of (i) 0.75% above the Fed Funds rate and (ii) 0.75% above the Overnight LIBOR or (b) 0.75% above 7-day, 30-day, 60-day or 90-day LIBOR.

On March 1, 2013, the SSB Agreement was renewed and amended from a 364-day revolving line of credit to a 360-day rolling facility whereby SSB may elect to terminate its commitment upon 360-days written notice to the Funds at any time after February 24, 2014. The SSB Agreement allows for the following maximum commitment amounts:

	Commitment Amounts
BHL	\$ 63,300,000
FRA	\$137,200,000

Notes to Financial Statements (continued)

Advances will be made by SSB to the Funds, at the Funds' option of (a) the higher of (i) 0.80% above the Fed Funds rate and (ii) 0.80% above the Overnight LIBOR or (b) 0.80% above 7-day, 30-day, 60-day or 90-day LIBOR.

In addition, the Funds pay a facility fee and utilization fee (based on the daily unused portion of the commitments). The commitment fees are waived if the Funds meet certain conditions. The fees associated with each of the agreements are included in the Statements of Operations as borrowing costs. Advances to the Funds as of February 28, 2013 are shown in the Statements of Assets and Liabilities as loan payable. Based on the short-term nature of the borrowings under the line of credit and the variable interest rate, the carrying amount of the borrowings approximates fair value.

The Funds may not declare dividends or make other distributions on shares or purchase any such shares if, at the time of the declaration, distribution or purchase, asset coverage with respect to the outstanding short-term borrowings is less than 300%.

For the six months ended February 28, 2013, the daily weighted average interest rates for Funds with loans under the revolving credit agreements were as follows:

	Daily Weighted Average Interest Rate
BHL	0.94%
FRA	0.94%

For the six months ended February 28, 2013, the daily weighted average interest rate for BLW with borrowings, which include reverse repurchase agreements was as follows:

	Daily Weighted Average Interest Rate
BLW	0.48%

7. Commitments:

The Funds may invest in floating rate loan interests. In connection with these investments, the Funds may also enter into unfunded floating rate loan interests (commitments). In connection with these commitments, the Funds earn a commitment fee, typically set as a percentage of the commitment amount. Such fee income, which is included in interest income in the Statements of Operations, is recognized ratably over the commitment period. Unfunded floating rate loan interests are marked-to-market daily, and any unrealized appreciation or depreciation is included in the Statements of Assets and Liabilities and Statements of Operations. As of February 28, 2013, the Funds had the following unfunded floating rate loan interests:

	Borrower	Unfunded Floating Rate Loan Interest	Value of Underlying Floating Rate Loan Interest	Unrealized Appreciation
BHL	Leslie's Poolmart, Inc.	\$11,949	\$ 12,080	\$ 180
FRA	Leslie's Poolmart, Inc.	\$51,672	\$ 52,240	\$ 777

8. Concentration, Market and Credit Risk:

In the normal course of business, the Funds invest in securities and enter into transactions where risks exist due to fluctuations in the market (market risk) or failure of the issuer of a security to meet all its obligations (issuer credit risk). The value of securities held by the Funds may decline in response to certain events, including those directly involving the issuers whose securities are owned by the Funds; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency and interest rate and price fluctuations. Similar to issuer credit risk, the Funds may be exposed to counterparty credit risk, or the risk that an entity with which the Funds have unsettled or open transactions may fail to or be unable to perform on its commitments. The Fund manages counterparty credit risk by entering into transactions only with counterparties that it believes have the financial resources to honor their obligations and by monitoring the financial stability of those counterparties. Financial assets, which potentially expose the Funds to market, issuer and counterparty credit risks, consist principally of financial instruments and receivables due from counterparties. The extent of the Funds' exposure to market, issuer and counterparty credit risks with respect to these financial assets is generally approximated by their value recorded in Statements of Assets and Liabilities, less any collateral held by the Funds.

The Funds invests a significant portion of its assets in securities backed by commercial or residential mortgage loans or in issuers that hold mortgage and other asset-backed securities. Please see the Schedules of Investments for these securities. Changes in economic conditions, including delinquencies and/or defaults on assets underlying these securities, can affect the value, income and/or liquidity of such positions.

SEMI-ANNUAL REPORT FEBRUARY 28, 2013 65

Notes to Financial Statements (concluded)

9. Capital Share Transactions:

BHL and BLW are authorized to issue an unlimited number of shares, par value \$0.001, all of which were initially classified as Common Shares. FRA is authorized to issue 200 million shares, par value \$0.10, all of which were initially classified as Common Shares. The Board is authorized, however, to reclassify any unissued Common Shares without approval of Common Shareholders.

For the periods shown, shares issued and outstanding increased by the following amounts as a result of dividend reinvestment:

Six Months Ended February 28, 2013	Year Ended August 31, 2012
BHL 7,413	
FRA 18,712,185 ¹	17,388
BLW 33,959	34,642

¹ Includes 18,666,048 shares issued from the reorganization.

10. Subsequent Events:

Management's evaluation of the impact of all subsequent events on the Funds' financial statements was completed through the date the financial statements were issued and the following item was noted:

Each Fund paid a net investment income dividend in the following amounts per share on March 28, 2013 to Common Shareholders of record on March 15, 2013:

	Common Dividend Per Share
BHL	\$0.0685
FRA	\$0.0770
BLW	\$0.1095

Additionally, the Funds declared a net investment income dividend on April 1, 2013 payable to Common Shareholders of record on April 15, 2013 for the same amounts noted above.

Additional Information

Proxy Results

At a special meeting of all shareholders of BlackRock Floating Rate Income Strategies Fund, Inc. held on September 13, 2012, the results were as follows:

With respect to the Proposals, the shares of the Fund were voted as follows:

	Votes For	Votes Against	Abstain
To approve the issuance of additional shares of common stock of the Fund in connection with the Agreement and Plan of Reorganization among BlackRock Floating Rate Income Strategies Fund II, Inc., FRA Merger Subsidiary and the Fund.	10,225,182	503,452	253,747
To approve the issuance of additional shares of common stock of the Fund in connection with the Agreement and Plan of Reorganization among BlackRock Diversified Income Strategies Fund, Inc., FRA Merger Subsidiary and the Fund.	10,097,723	628,903	255,755

Regulation Regarding Derivatives

Effective December 31, 2012, the Commodity Futures Trading Commission (CFTC) adopted certain regulatory changes that subject registered investment companies and advisers to registered investment companies to regulation by the CFTC if a fund invests more than a prescribed level of its net assets in CFTC-regulated futures, options and swaps (CFTC Derivatives), or if the fund markets itself as providing investment exposure to such instruments. To the extent a Fund uses CFTC-regulated futures, options and swaps, it intends to do so below such prescribed levels and will not market itself as a commodity pool or a vehicle for trading such instruments. Accordingly, BlackRock Advisors, LLC has claimed an exclusion from the definition of the term commodity pool operator under the Commodity Exchange Act (CEA) pursuant to Rule 4.5 under the CEA. BlackRock Advisors, LLC is not, therefore, subject to registration or regulation as a commodity pool operator under the CEA in respect of each Fund.

A Fund may also have investments in underlying funds not advised by BlackRock (which for purposes of the no-action letter referenced below may include certain securitized vehicles and/or mortgage REITS that may invest in CFTC Derivatives). BlackRock Advisors, LLC has no transparency into the holdings of these underlying funds because they are not advised by BlackRock. To address this issue of lack of transparency, the CFTC staff issued a no-action letter on November 29, 2012 permitting the adviser of a fund that invests in such underlying funds and that would otherwise have filed a claim of exclusion pursuant to Rule 4.5, to delay registration as a commodity pool operator until June 30, 2013 or six months from the date in which the CFTC issues additional guidance on the treatment of CFTC Derivatives held by underlying funds. BlackRock Advisors, LLC, the adviser of the Funds, has filed a claim with the CFTC to rely on this no-action relief.

68 SEMI-ANNUAL REPORT FEBRUARY 28, 2013

Additional Information (continued)

Dividend Policy

Each Fund's dividend policy is to distribute all or a portion of its net investment income to its shareholders on a monthly basis. In order to provide shareholders with a more stable level of dividend distributions, the dividends paid by the Funds for any particular month may be more or less than the amount of net investment income earned by the Funds during such month. The portion of dividend distributions that exceeds a Fund's current and accumulated earnings and profits, which are measured on a tax basis, will constitute a nontaxable return of capital. Dividend distributions in excess of a Fund's taxable income and net capital gains, but not in excess of a Fund's earnings and profits, will be taxable to shareholders as ordinary income and will not constitute a nontaxable return of capital. The Funds' current accumulated but undistributed net investment income, if any, is disclosed in the Statements of Assets and Liabilities, which comprises part of the financial information included in this report.

General Information

The Funds do not make available copies of their Statements of Additional Information because the Funds' shares are not continuously offered, which means that the Statement of Additional Information of each Fund has not been updated after completion of the respective Fund's offerings and the information contained in each Fund's Statement of Additional Information may have become outdated.

During the period, there were no material changes in the Funds' investment objectives or policies or to the Funds' charters or by-laws that would delay or prevent a change of control of the Funds that were not approved by shareholders or in the principal risk factors associated with investment in the Funds. There have been no changes in the persons who are primarily responsible for the day-to-day management of the Funds' portfolios.

Quarterly performance, semi-annual and annual reports and other information regarding the Funds may be found on BlackRock's website, which can be accessed at <http://www.blackrock.com>. This reference to BlackRock's website is intended to allow investors public access to information regarding the Funds and does not, and is not intended to, incorporate BlackRock's website in this report.

Electronic Delivery

Electronic copies of most financial reports are available on the Funds' web-sites or shareholders can sign up for e-mail notifications of quarterly statements, annual and semi-annual reports by enrolling in the Funds' electronic delivery program.

Shareholders Who Hold Accounts with Investment Advisors, Banks or Brokerages:

Please contact your financial advisor to enroll. Please note that not all investment advisors, banks or brokerages may offer this service.

Householding

The Funds will mail only one copy of shareholder documents, including annual and semi-annual reports and proxy statements, to shareholders with multiple accounts at the same address. This practice is commonly called "householding" and is intended to reduce expenses and eliminate duplicate mailings of shareholder documents. Mailings of your shareholder documents may be househanded indefinitely unless you instruct us otherwise. If you do not want the mailing of these documents to be combined with those for other members of your household, please call the Funds at (800) 882-0052.

Availability of Quarterly Schedule of Investments

The Funds file their complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Funds' Forms N-Q are available on the SEC's website at <http://www.sec.gov> and may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on how to access documents on the SEC's website without charge may be obtained by calling (800) SEC-0330. The Funds' Forms N-Q may also be obtained upon request and without charge by calling (800) 882-0052.

Additional Information (concluded)

General Information (concluded)

Availability of Proxy Voting Policies and Procedures

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available (1) without charge, upon request, by calling (800) 882-0052; (2) at <http://www.blackrock.com>; and (3) on the SEC's website at <http://www.sec.gov>.

Availability of Proxy Voting Record

Information about how the Funds voted proxies relating to securities held in the Funds' portfolios during the most recent 12-month period ended June 30 is available upon request and without charge (1) at <http://www.blackrock.com> or by calling (800) 882-0052 and (2) on the SEC's website at <http://www.sec.gov>.

Availability of Fund Updates

BlackRock will update performance and certain other data for the Funds on a monthly basis on its website in the Closed-end Funds section of <http://www.blackrock.com> as well as certain other material information as necessary from time to time. Investors and others are advised to periodically check the website for updated performance information and the release of other material information about the Funds. This reference to BlackRock's website is intended to allow investors public access to information regarding the Funds and does not, and is not intended to, incorporate BlackRock's website in this report.

Section 19(a) Notice

These reported amounts and sources of distributions are estimates and are not being provided for tax reporting purposes. The actual amounts and sources for tax reporting purposes will depend upon each Fund's investment experience during the year and may be subject to changes based on the tax regulations. Each Fund will provide a Form 1099-DIV each calendar year that will explain the character of these dividends and distributions for federal income tax purposes.

February 28, 2013

	Total Fiscal Year-to-Date Cumulative Distributions by Character			Percentage of Fiscal Year-to-Date Cumulative Distributions by Character			
	Net Investment Income	Net Realized Capital Gains	Return of Capital	Net Investment Income	Net Realized Capital Gains	Return of Capital	Total Per Common Share

BlackRock Privacy Principles

BlackRock is committed to maintaining the privacy of its current and former fund investors and individual clients (collectively, Clients) and to safeguarding their non-public personal information. The following information is provided to help you understand what personal information BlackRock collects, how we protect that information and why in certain cases we share such information with select parties.

If you are located in a jurisdiction where specific laws, rules or regulations require BlackRock to provide you with additional or different privacy-related rights beyond what is set forth below, then BlackRock will comply with those specific laws, rules or regulations.

Edgar Filing: BLACKROCK FLOATING RATE INCOME STRATEGIES FUND, INC. - Form N-CSRS

BlackRock obtains or verifies personal non-public information from and about you from different sources, including the following: (i) information we receive from you or, if applicable, your financial intermediary, on applications, forms or other documents; (ii) information about your transactions with us, our affiliates, or others; (iii) information we receive from a consumer reporting agency; and (iv) from visits to our websites.

BlackRock does not sell or disclose to non-affiliated third parties any non-public personal information about its Clients, except as permitted by law or as is necessary to respond to regulatory requests or to service Client accounts. These non-affiliated third parties are required to protect the confidentiality and security of this information and to use it only for its intended purpose.

We may share information with our affiliates to service your account or to provide you with information about other BlackRock products or services that may be of interest to you. In addition, BlackRock restricts access to non-public personal information about its Clients to those BlackRock employees with a legitimate business need for the information. BlackRock maintains physical, electronic and procedural safeguards that are designed to protect the non-public personal information of its Clients, including procedures relating to the proper storage and disposal of such information.

70SEMI-ANNUAL REPORT FEBRUARY 28, 2013

[THIS PAGE INTENTIONALLY LEFT BLANK]

This report is transmitted to shareholders only. It is not a prospectus. Past performance results shown in this report should not be considered a representation of future performance. The Funds have leveraged their Common Shares, which creates risks for Common Shareholders, including the likelihood of greater volatility of net asset value and market price of Common Shares, and the risk that fluctuations in short-term interest rates may reduce the Common Shares yield. Statements and other information herein are as dated and are subject to change.

CEFT-BK3-2/13-SAR

Item 2 – Code of Ethics – Not Applicable to this semi-annual report

Item 3 – Audit Committee Financial Expert – Not Applicable to this semi-annual report

Item 4 – Principal Accountant Fees and Services – Not Applicable to this semi-annual report

Item 5 – Audit Committee of Listed Registrants – Not Applicable to this semi-annual report

Item 6 – Investments

(a) The registrant’s Schedule of Investments is included as part of the Report to Stockholders filed under Item 1 of this Form.

(b) Not Applicable due to no such divestments during the semi-annual period covered since the previous Form N-CSR filing.

Item 7 – Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies – Not Applicable to this semi-annual report

Item 8 – Portfolio Managers of Closed-End Management Investment Companies

(a) Not Applicable to this semi-annual report

(b) As of the date of this filing, there have been no changes in any of the portfolio managers identified in the most recent annual report on Form N-CSR.

Item 9 – Purchases of Equity Securities by Closed-End Management Investment Company and Affiliated Purchasers – Not Applicable

Item 10 – Submission of Matters to a Vote of Security Holders – There have been no material changes to these procedures.

Item 11 – Controls and Procedures

(a) – The registrant’s principal executive and principal financial officers, or persons performing similar functions, have concluded that the registrant’s disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the “1940 Act”)) are effective as of a date within 90 days of the filing of this report based on the evaluation of these controls and procedures required by Rule 30a-3(b) under the 1940 Act and Rule 13a-15(b) under the Securities Exchange Act of 1934, as amended.

(b) – There were no changes in the registrant’s internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act) that occurred during the second fiscal quarter of the period covered by this report that have materially affected, or are reasonably likely to materially affect, the registrant’s internal control over financial reporting.

Item 12 – Exhibits attached hereto

(a)(1) – Code of Ethics – Not Applicable to this semi-annual report

(a)(2) – Certifications – Attached hereto

(a)(3) – Not Applicable

(b) – Certifications – Attached hereto

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
