PART I FINANCIAL INFORMATION

INTERPOOL, INC. AND SUBSIDIARIES

FINANCIAL STATEMENTS

The condensed consolidated financial statements of Interpool, Inc. and Subsidiaries (the "Company") included herein have been prepared by the registrant, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations, although the Registrant believes that the disclosures are adequate to make the information presented not misleading. It is suggested that these condensed consolidated financial statements be read in conjunction with the financial statements and the notes thereto included in the Company's latest Annual Report on Form 10-K. These condensed consolidated financial statements reflect, in the opinion of management, all adjustments (consisting only of normal recurring adjustments) necessary to present fairly the results for the interim periods. The results of operations for such interim periods are not necessarily indicative of the results for the full year.

INTERPOOL, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(dollars in thousands, except per share amounts)
(Unaudited)

Note 1 Nature of operations and accounting policies:

A. Nature of operations:

The Company and its subsidiaries conduct business principally in a single industry segment, the leasing of intermodal dry freight standard containers, chassis and other transportation related equipment. Within this single industry segment, the Company has two reportable segments: container leasing and domestic intermodal equipment. The container-leasing segment specializes in the leasing of intermodal dry freight standard containers, while the domestic intermodal equipment segment specializes in the leasing of intermodal container chassis and freight rail cars. The Company leases its containers principally to international container shipping lines located throughout the world. The customers for the Company's chassis are a large number of domestic companies, many of which are domestic subsidiaries or branches of international shipping lines, as well as major U.S. railroads. Equipment is purchased directly or acquired through conditional sales contracts and lease agreements, many of which qualify as capital leases.

The Company had formerly operated in a third reportable segment, computer equipment leasing. The Company operated in this segment through two majority owned subsidiaries, Microtech Leasing Corporation (Microtech) and Personal Computer Rentals (PCR). During the third quarter of 2001, Company management, having the authority to do so, adopted a formal plan to exit this segment through the sale of PCR and liquidation of Microtech. See Note 2 for further information regarding the sale of PCR and discontinued operations of the computer leasing segment.

The Company's accounting records are maintained in United States dollars and the consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States.

B. Basis of consolidation:

The consolidated financial statements include the accounts of the Company and subsidiaries more than 50% owned. All significant intercompany transactions have been eliminated.

C. Net income per share:

Basic net income per share is computed by dividing net income by the weighted average number of shares outstanding during the period (which is net of treasury shares). Diluted income per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. The dilutive effect of stock options have been added to the weighted shares outstanding in the diluted earnings per share computation.

A reconciliation of weighted average common shares outstanding to weighted average common shares outstanding assuming dilution follows:

A. Nature of operations:

Edgar Filing: INTERPOOL INC - Form 10-Q

	<i>(in thousands)</i>	
	Three Months Ended	
	March 31,	
	2002	2001

Average common shares outstanding assuming dilution	29,247	29,122

(1) Issuable under stock option plans.

8

(dollars in thousands, except per share amounts)

D. Adoption of New Accounting Standard:

Prior to the adoption of Statement 133, interest differentials paid or received under these contracts are recognized as yield adjustments to the effective yield of the underlying debt instruments hedged. Interest rate swap contracts would only be recognized at fair value if the hedged relationship is terminated. Gains or losses accumulated prior to termination of the relationship would be amortized as a yield adjustment over the shorter of the remaining life of the contract, or the remaining period to maturity of the underlying debt instrument hedged. If the contract remained outstanding after termination of the hedged relationship, subsequent changes in market value of the contract would be recognized in earnings. The Company does not use leveraged swaps and does not use leverage in any of its investment activities that would put principal capital at risk.

In June 1998, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities*. In June 1999, the FASB issued Statement No. 137, *Accounting for Derivative Instruments and Hedging Activities - Deferral of the Effective Date of FASB Statement No. 133*. In June 2000, the FASB issued Statement 138, *Accounting for Certain Derivative Instruments and Certain Hedging Activities, an amendment of FASB Statement No. 133*. Statement 133, as amended, establishes accounting and reporting standards requiring that every derivative instrument (including certain derivative instruments embedded in other contracts) be recorded in the balance sheet as either an asset or liability measured at its fair value. The Statement requires that changes in the derivative instrument's fair value be recognized currently in earnings unless specific hedge accounting criteria are met. Special accounting for qualifying hedges allows a derivative instrument's gains and losses to offset related results on the hedged item in the income statement, to the extent effective, and requires that a company must formally document, designate, and assess the effectiveness of transactions that receive hedge accounting.

On January 1, 2001, the Company adopted Statement 133. Statement 133, in part, allows special hedge accounting for fair value and cash flow hedges. Statement 133 provides that the gain or loss on a derivative instrument designated and qualifying as a fair value hedging instrument as well as the offsetting loss or gain on the hedged item attributable to the hedged risk be recognized currently in earnings in the same accounting period. Statement 133 provides that the effective portion of the gain or loss on a derivative instrument designated and qualifying as a cash flow hedging instrument be reported as a component of other comprehensive income and be reclassified into earnings in the same period or periods during which the hedged forecasted transaction affects earnings. (The remaining gain or loss on the derivative instrument, if any, must be recognized currently in earnings.)

As of December 31, 2000, the Company had entered into 13 interest rate swap agreements with various financial institutions. The aggregate notional balance of the swaps was \$389,500 as of December 31, 2000. These agreements are used by the Company to manage interest rate risks created by loans indexed to a floating rate index, primarily LIBOR, and contractually terminate at various dates between 2001 and 2007. Under previous generally accepted accounting principals (GAAP), the interest differential payable or receivable by the Company on its interest rate swaps was accrued by the Company as interest rates changed, and was recognized by the Company over the life of the swap agreement. In contrast Statement 133 requires that changes in the fair value of the swap agreements which are designated as effective cash flow hedges, be reported as a component of other comprehensive income and changes in the fair value of the swap agreements that do not qualify for

C. Net income per share:

Edgar Filing: INTERPOOL INC - Form 10-Q

hedge accounting to be reported in earnings. The Company has determined that of the 13 interest rate swap agreements held, 10 qualify under Statement 133 as effective cash flow hedges with no ineffectiveness, while the remaining 3 interest rate swap agreements intended as cash flow hedges do not qualify for hedge accounting treatment. The adoption of Statement 133 on January 1, 2001 increased liabilities by approximately \$9,012, with offsetting amounts recorded as decreases to deferred tax liabilities of \$2,435 and accumulated other comprehensive income of \$7,411 and an increase to earnings (net of tax) of \$833. See Note 10 for further information regarding the Company's accounting for the swap agreements under Statement 133.

On June 29, 2001, the Financial Accounting Standards Board approved its proposed Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets.

Statement 142 applies to all acquired intangible assets whether acquired singly, as part of a group, or in a business combination. This statement supersedes Accounting Principals Board, or APB, Opinion No. 17, Intangible Assets, and will incorporate provisions in APB Opinion No 17 related to internally developed intangible assets. Adoption of Statement 142 also requires that companies cease amortizing goodwill. During the three months ended March 31, 2001, the Company recorded amortization expense related to its goodwill of \$189 which is included in other income, net in the accompanying condensed consolidated statements of income. On January 1, 2002, the Company adopted Statement 142. The adoption of this statement did not result in an adjustment to recorded goodwill. Total goodwill recorded by the Company is approximately \$9,625 related to certain investments accounted for under the equity method of accounting.

9

(dollars in thousands, except per share amounts)

In August 2001, the Financial Accounting Standards Board (FASB) approved its proposed Statement of Financial Accounting Standards No. 144, *Accounting for the Impairment or Disposal of Long Lived Assets*. Statement 144 addresses financial accounting and reporting for the impairment or disposal of long-lived assets. This Statement supersedes FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*, and the accounting and reporting provisions of APB Opinion No. 30, *Reporting the Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, for the disposal of a *segment of a business* (as previously defined in that Opinion). This Statement also amends ARB No. 51, *Consolidated Financial Statements*, to eliminate the exception to consolidation for a subsidiary for which control is likely to be temporary. During the first quarter of 2002, the Company evaluated the carrying value of its long lived assets as prescribed by Statement 144. The adoption of this statement in the first quarter of 2002 did not result in an adjustment to our consolidated financial statements.

E. Comprehensive income (loss) and accumulated other comprehensive loss:

The tax effect of comprehensive income (loss) is as follows:

	Before-Tax Amount	Tax Effect	Net of Tax Amount
Three Months Ended March 31, 2002			
Unrealized holding gains arising during the period:			
Marketable securities	\$ 20	\$ (7)	\$ 13
Swap agreements	7,249	(1,729)	5,520
	\$ 7,269	\$(1,736)	\$ 5,533
Three Months Ended March 31, 2001			
Unrealized holding (losses) arising during the period:			
Marketable securities	\$ (14)	\$ 5	\$ (9)
Other investment securities	(223)	11	(212)
Swap agreements	(6,317)	1,323	(4,994)
	(6,554)	1,339	(5,215)

D. Adoption of New Accounting Standard:

Edgar Filing: INTERPOOL INC - Form 10-Q

Before-Tax Amount	Tax Effect	Net of Tax Amount
\$(6,554)	\$ 1,339	\$(5,215)

The components of accumulated other comprehensive loss, net of taxes, are as follows:

	March 31, 2002	December 31, 2001
Marketable securities	\$ (15)	\$ (28)
Other investment securities	618	618
Swap agreements	(9,873)	(15,393)
	<u>\$(9,270)</u>	<u>\$(14,803)</u>

Note 2 Discontinued Operations:

During the three months ended September 30, 2001, the Company adopted a formal plan to dispose of PCR, a 51%-owned subsidiary, and to discontinue the operations of Microtech, a 75.5%-owned subsidiary, and liquidate its lease portfolio. Within the historical financial statements of the Company, PCR and Microtech comprised the computer-leasing segment and specialized in the leasing of microcomputers and related equipment.

As a result of the decision made by the Company, PCR and Microtech have been classified as discontinued operations. Pursuant to Accounting Principles Board Opinion No. 30, Reporting the Results of Operations-Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions, the accompanying unaudited Condensed Consolidated Financial Statements and notes thereto have been restated for all comparative periods presented to reflect the decision to discontinue the computer leasing segment. Accordingly, the assets and liabilities, results of operations and cash flows of PCR and Microtech have been accounted for as Discontinued Operations in the accompanying unaudited Condensed Consolidated Financial Statements.

10

(dollars in thousands, except per share amounts)

On December 31, 2001, the Company completed the sale of its 51% ownership stake of PCR to an investment group comprised of the management of PCR. Under the agreement, the Company sold its share of PCR for \$2,297. As payment for the transaction, the management of PCR transferred its 24.5% ownership in Microtech valued at \$792 to the Company, thereby increasing the Company's ownership in Microtech to 100%. The purchase price of \$2,297 was settled through the issuance of a non-recourse note issued by the investment group comprised of the management of PCR to the Company in the amount of \$1,657 at an effective interest rate of 15%, and a payment of \$640 received by the Company on January 2, 2002. The original terms of the note are interest only at 5% through December 31, 2004 and an annual rate of 7.5% for the period from December 31, 2004 through December 31, 2010 (the maturity date). Monthly principal payments in equal installments of \$35 commence on January 31, 2005 and continue through the maturity date.

During the three months ended March 31, 2002, Microtech experienced \$710 of losses primarily the result of additional bad debt reserves due to a weaker economic environment resulting in specific customer defaults.

In addition, on April 6, 1999, the Company entered into a \$3,500 long-term revolving credit facility with PCR. This revolving credit facility is due on demand and remains outstanding as of March 31, 2002. The line of credit bears interest at 12% per annum and is payable monthly. This line of credit is secured by substantially all of PCR's assets, subordinated to the interest of a financial institution which provided PCR an additional line of credit. Since 2000, the Company has guaranteed PCR debts due to parties other than the Company totaling \$5,000, which remain in effect.

Edgar Filing: INTERPOOL INC - Form 10-Q

The assets and liabilities of discontinued operations, presented in the accompanying unaudited Condensed Consolidated Balance Sheets are primarily comprised of Cash, Accounts Receivable, Net Investment in Direct Financing Leases, Leasing Equipment, Other Assets, Accounts Payable and Accrued Expenses and Debt Obligations.

Note 3 Chassis Holdings I LLC:

On July 1, 2001, the Company restructured its relationship with The Ivy Group and its principals to provide the Company with managerial control over 6,047 chassis previously leased by Trac Lease, Inc. (Trac Lease), a wholly owned subsidiary of the Company, from The Ivy Group. As a result of the restructuring, the partners of The Ivy Group contributed these 6,047 chassis and certain other assets and liabilities to a newly formed subsidiary, Chassis Holdings I LLC (Chassis Holdings), in exchange for \$26,000 face value of preferred membership units and 10% of the common membership units, and Trac Lease contributed 902 chassis and \$2,407 in cash to Chassis Holdings in exchange for \$3,000 face value of preferred membership units and 90% of the common membership units. The preferred membership units are entitled to receive a preferred return prior to the receipt of any distributions by the holders of the common membership units. The value of the contributed chassis was determined by taking the arithmetic average of the results of independent appraisals performed by three nationally recognized appraisal firms in connection with the Company's establishment of a chassis securitization facility in July 2000. As the managing member of Chassis Holdings, Trac Lease exercises sole managerial control over the entity's operations. Chassis Holdings leases all of its chassis to Trac Lease at a rental rate equal to the then current Trac Lease fleet average per diem. Chassis Holdings and the holders of the preferred membership units are party to a Put/Call Agreement which provides that the holders of preferred units may put such units to Chassis Holdings under certain circumstances and Chassis Holdings may redeem such units under certain circumstances. Chassis Holdings will be required to make certain option payments to the holders of the preferred membership units in order to preserve its right to redeem such units.

The terms of all arrangements between Chassis Holdings and Trac Lease, including rental rates, are, in the opinion of our management, comparable to terms that we would have obtained in arms-length transactions with unrelated third parties. The Ivy Group has entered into an agreement with us pursuant to which it has agreed not to engage in any business activities that are competitive with the business activities of Interpool or its subsidiaries without our prior written consent.

Based on 90% common unit ownership held by Trac Lease, the Company's condensed consolidated financial statements include the accounts of Chassis Holding I LLC. The Ivy Group's interest in the common and preferred units of Chassis Holdings I LLC of approximately \$26,326 is classified as minority interest in equity of subsidiaries in the accompanying condensed consolidated balance sheets. For the three months ended March 31, 2002, dividends paid on the common units and distributions on the preferred units owned by The Ivy Group, totaling \$780, are included in lease operating and administrative expenses in the accompanying condensed consolidated statements of income.

11

(dollars in thousands, except per share amounts)

Note 4 Cash flow information:

For the three months ended March 31, 2002 and 2001 cash paid for interest was approximately \$29,431 and \$37,639, respectively. Cash paid for income taxes was approximately \$622 and \$860, respectively.

Note 5 Leasing Activities:

As lessor:

During the three months ended June 30, 2001, the Company initiated a bankruptcy claim against a customer and sought to collect receivables and to recover equipment values through its insurance policies. The Company demanded the return of approximately \$48,588 of equipment, including \$8,482 of direct finance leases which were reclassified to leasing equipment. At March 31, 2002, the outstanding receivables from this customer, including amounts for equipment the Company anticipates will not be recovered, totaled approximately \$35,500 which is covered by insurance, or reserved for in the allowance for doubtful accounts. At this time, the Company has estimated no impairment upon the liquidation and/or re-lease of these assets after considering anticipated insurance proceeds. The maximum insurance coverage related to this claim is \$35,000. The overall recovery of the asset values has been evaluated taking into consideration the equipment book value, the cost to recover and

Note 2 Discontinued Operations:

11

Edgar Filing: INTERPOOL INC - Form 10-Q

re-lease the equipment, and the total outstanding receivables, as well as the likelihood to collect through the recovery and sale of the equipment or the stipulated equipment values within the insurance policy. The Company continued to record revenue from these leases through August 20, 2001 at which time, revenue recognition was discontinued, as lease payments through August 20, 2001 were covered by the insurance policies. The Company will continue to assess the overall recovery of the asset values and adjust the assumptions used in evaluating the total insurance claim with respect to this customer's bankruptcy. As additional information becomes available, reserves for the impairment of the asset values may be necessary based upon changes in economic conditions and the assumptions used in evaluating the total insurance claim.

During the three months ended March 31, 2002, the Company recognized \$2,434 of a gain for the excess of amounts billable to the lease customer for unrecovered equipment over the Company's net book value of the equipment which is expected to be recovered through insurance proceeds.

Allowance for doubtful accounts

The following summarizes the activity in the allowance for doubtful accounts:

	2002	2001
Balance beginning of year	\$ 5,862	\$ 14,271
Provision charged to expense	821	713
Write-offs, net of recoveries	(378)	(9,804)
	\$ 6,305	\$ 5,180
Balance, March 31		

Note 6 Segment and geographic data:

The Company has two reportable segments: container leasing and domestic intermodal equipment. The container leasing segment specializes in the leasing of intermodal dry freight standard containers, while the domestic intermodal equipment segment specializes in the leasing of intermodal container chassis and freight rail cars.

The accounting policies of the segments are the same as those described in Note 1. The Company evaluates performance based on profit or loss from continuing operations before income taxes and extraordinary items. The Company's reportable segments are strategic business units that offer different products and services.

The Company's shipping line customers utilize international containers in world trade over many varied and changing trade routes. In addition, most large shipping lines have many offices in various countries involved in container operations. The Company's revenue from international containers is earned while the containers are used in service carrying cargo around the world, while certain other equipment is utilized in the United States. Accordingly, the information about the business of the Company by geographic area is derived from either international sources or from United States sources. Such presentation is consistent with industry practice.

Edgar Filing: INTERPOOL INC - Form 10-Q

Note 7 Other contingencies and commitments:

At March 31, 2002, commitments for capital expenditures totaled approximately \$10,100.

Under certain of the Company's leasing agreements, the Company, as lessee, may be obligated to indemnify the lessor for loss, recapture or disallowance of certain tax benefits arising from the lessor's ownership of the equipment.

The Company is engaged in various legal proceedings from time to time incidental to the conduct of its business. In the opinion of management, the Company is adequately insured against the claims relating to such proceedings, and any ultimate liability arising out of such proceedings will not have a material adverse effect on the financial condition or results of operations of the Company.

Note 8 Lease securitization program:

On March 30, 1999, the Company entered into an asset backed note program (the "ABN Program"). The ABN Program involved the sale by the Company of direct finance leases (collateralized by intermodal containers) with a historical net book value of \$228,832 (the "Assets"). The Assets were sold to a special purpose entity whose sole business activity is issuing asset backed notes ("ABNs"), supported by the future cash flows of the Assets. Proceeds received by the Company upon selling the Assets were \$189,087 of cash and the lowest priority ABN issued in the ABN Program (the "retained interest") with an allocated historical book value of \$47,687.

The Company classified the retained interest as an available for sale security, which is included in "Other Investment Securities" in the accompanying condensed consolidated balance sheets. Accordingly, the retained interest is accounted for at fair value, with any changes in fair value over its allocated historical book value recorded as a component of other comprehensive income, net of tax, in the statement of changes in shareholders' equity. As of March 31, 2002 and December 31, 2001, the Company estimated the fair market value of the retained interest was \$13,585 and \$15,970, respectively. During the three months ended March 31, 2002 and 2001, the Company recorded interest income on the retained interest totaling \$544 and \$978 which is included in revenues in the accompanying condensed consolidated statements of income.

Interpool Limited, a subsidiary of the Company (the "Servicer"), acts as servicer for the Assets. Pursuant to the terms of the servicing agreement, the Servicer is paid a fee of 0.40% of the assets under management. The Company's management has determined that the servicing fee paid approximates the fair value for services provided, as such, no servicing asset or liability has been recorded. For the three months ended March 31, 2002 and 2001, the Company received servicing fees totaling \$126 and \$118 which are included in revenues in the accompanying condensed consolidated statements of income. For the three months ended March 31, 2002 and 2001, cash flows received on the retained interest were \$2,929 and \$3,656, respectively.

14

(dollars in thousands, except per share amounts)

At March 31, 2002 and December 31, 2001, key economic assumptions and the sensitivity of the current fair value of residual cash flows to immediate 10 percent and 20 percent adverse changes in those assumptions are as follows:

	March 31, 2002	December 31, 2001
Carrying amount/fair value of retained interests	\$13,585	\$15,970
Weighted-average life (in years)	1.8	2.0
Expected credit losses (annual rate)	1.5%	1.5%
Impact on fair value of 10% adverse change	\$ 94	\$ 129
Impact on fair value of 20% adverse change	\$ 222	\$ 275
Residual cash flows discount rate (annual)	12.6%	12.6%
Impact on fair value of 10% adverse change	\$ 250	\$ 310
Impact on fair value of 20% adverse change	\$ 507	\$ 619

Note 9 Acquisition of North American Intermodal Division of Transamerica Leasing, Inc.:

In October 2000, the Company completed the acquisition of the North American Intermodal division of Transamerica Leasing, Inc. (TA), a subsidiary of Transamerica Finance Corporation and AEGON N.V. In the acquisition, the Company acquired approximately 70,000 chassis, 23,000 rail trailers and 18,000 domestic containers. The acquisition was effective October 1, 2000 in a transaction accounted for under the purchase method of accounting, accordingly the acquired assets and liabilities have been recorded at the estimated fair values at the date of acquisition. In January 2001, the Company and TIP Intermodal Services (TIP), a GE Capital Company, announced the signing of a definitive agreement for the sale of 50,000 rail trailers and domestic containers by the Company to TIP, including all of the rail trailers and domestic containers the Company acquired from TA in October 2000. The Company established a basis in the assets acquired from TA to be sold to TIP equal to (i) TA's historical net book value of the assets (\$273,572), (ii) the expected gain to be realized from the sale to TIP (\$5,614), (iii) the estimated cash collections (net of cash disbursements) resulting from the operations of these assets from October 1, 2000 through the estimated date of disposition of March 31, 2001 (\$7,296) and (iv) the incremental amount of interest expense from October 1, 2000 through March 31, 2001 associated with the acquisition of these assets (\$18,828). The excess of the purchase price paid over the book value of the assets and liabilities acquired (after establishing the basis associated with the assets held for sale) in an amount approximating \$66,500 was allocated to the chassis acquired from TA and is being amortized over the remaining depreciable life of those chassis.

During the year ended 2001, the Company adjusted the excess of the purchase price paid over the book value of the assets and liabilities acquired for certain pre-acquisition contingencies and estimated costs included in the original purchase price allocation. This adjustment increased the premium paid over the book value of the assets and liabilities acquired by \$5,112, and is being amortized over the average remaining depreciable life of the chassis acquired.

In March 2001, the Company sold 50,000 rail trailers and domestic containers, including all 41,000 rail trailers and domestic containers the Company acquired from TA in October 2000 to TIP. The Company recorded a gain of \$1,774 upon the consummation of this sale, which represents the premium paid for the units previously owned by the Company over their net book value.

Note 10 Derivative instruments:

The Company's assets are primarily fixed rate in nature while its debt instruments are primarily floating rate. The Company employs derivative financial instruments (interest rate swap agreements) to effectively convert certain floating rate debt instruments into fixed rate instruments and thereby manage its exposure to fluctuations in interest rates.

The unrealized pre-tax income on cash flow hedges for the three months ended March 31, 2002 of \$7,249 have been reported in the Company's condensed consolidated balance sheet as a component of accumulated other comprehensive income (loss), along with related deferred income tax expense of \$1,729.

Amounts recorded in accumulated other comprehensive income would be reclassified into earnings upon termination of these interest rate swap agreements prior to their contractual maturity. The Company does not intend to terminate any such interest rate swap agreements prior to maturity and therefore does not expect any gains or losses to be reclassified into income within the next twelve months.

15

(dollars in thousands, except per share amounts)

Pre-tax income for the three months ended March 31, 2002 resulting from the change in fair value of interest rate swap agreements held which do not qualify as cash flow hedges under Statement 133 of \$320 have been recorded on the condensed consolidated statements of income as market value adjustment for derivative instruments. Interest rate swap agreements which qualify as perfect cash flow hedges have no effectiveness and therefore are not reflected in the condensed consolidated statements of income. Interest rate swap agreements which qualify as cash flow hedges but are not perfectly correlated have associated ineffectiveness of \$330 which has been recorded in the condensed consolidated statements of income as market value adjustment for derivative instruments. Future ineffectiveness related to these interest rate swap agreements will continue to be recorded in the condensed consolidated statements of income during the next twelve months.

Note 8 Lease securitization program:

15

Edgar Filing: INTERPOOL INC - Form 10-Q

As of March 31, 2002, the Company holds 12 interest rate swap agreements with various financial institutions. The aggregate notional balance of the swaps was \$760,746 as of March 31, 2002.

16

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

General

The Company generates revenues through leasing transportation equipment, primarily intermodal dry freight standard containers and container chassis. Most of the Company's revenues are derived from payments under operating leases and income earned under finance leases, under which the lessee has the right to purchase the equipment at the end of the lease term. For the three months ended March 31, 2002 and 2001 revenues from direct financing leases were \$6.0 million (8% of leasing revenues) and \$4.3 million (6% of leasing revenues), respectively.

During the three months ended September 30, 2001, the Company initiated a plan to dispose of PCR, a 51%-owned subsidiary engaged in leasing computers and related equipment, and to discontinue the operations of Microtech, a 75.5%-owned subsidiary, also engaged in computer leasing. As a result, PCR and Microtech have been classified as discontinued operations in the condensed consolidated financial statements.

Three Months Ended March 31, 2002 compared to Three Months Ended March 31, 2001

Revenues

The Company's revenues decreased to \$72.9 million for the three months ended March 31, 2002, from \$76.5 million in the three months ended March 31, 2001, a decrease of \$3.6 million or 5%. The decrease was attributable to reduced operating lease revenues of \$5.3 million, partially offset by increased finance lease revenues of \$1.7 million. The decrease in operating lease revenue was experienced in the domestic intermodal division resulting from the slowdown of economic activity in North America, a change in how California licensing fees are charged to lessees of chassis (a decrease of \$1.5 million) and the elimination of revenues from non-core assets sold to TIP in 2001 (a decrease of \$1.4 million). Utilization rates of the container and chassis operating lease fleet at March 31, 2002 were 97% and 92%, respectively, and at March 31, 2001 were 99% and 95%, respectively.

Lease Operating and Administrative Expenses

The Company's lease operating and administrative expenses decreased to \$19.5 million for the three months ended March 31, 2002 from \$21.9 million in the three months ended March 31, 2001, a decrease of \$2.4 million or 11%. The decrease was primarily due to reductions in licensing expense related to California of \$1.2 million, equipment rental expense of \$1.0 million, maintenance and repairs expense of \$.8 million, salary expense of \$.8 million, computer expense of \$.4 million and facilities expense of \$.3 million, partially offset by increased storage expense of \$1.2 million and minority interest expense of \$.8 million. The decrease in maintenance and repairs expense is primarily the result of \$1.0 million of billable repairs to a customer in default which is recoverable from insurance.

Provision for Doubtful Accounts

The Company's provision for doubtful accounts increased to \$.8 million for the three months ended March 31, 2002 from \$.7 million in the three months ended March 31, 2001, an increase of \$.1 million or 15%.

Depreciation and Amortization of Leasing Equipment

The Company's depreciation and amortization expenses increased to \$20.3 million for the three months ended March 31, 2002 from \$18.8 million for the three months ended March 31, 2001, an increase of \$1.5 million or 8%. The increase was primarily a result of an expanding fleet size, partially offset by reduced depreciation expense of \$1.3 million as a result of the

Company's sale of rail trailers and domestic containers to TIP in March 2001.

17

Other (Income)/Expense, Net

The change in other (income)/expense, net of \$.7 million was due to a reduction in the Company's net gains on the sale of leasing equipment of \$.3 million during the three months ended March 31, 2002, as well as a decrease in the Company's income from unconsolidated subsidiaries of \$.4 million during the three months ended March 31, 2002. During the three months ended March 31, 2002, the Company's net gain on the sale of leasing equipment was primarily due to \$2.4 million of gains expected to be recovered through insurance for unrecovered equipment, partially offset by \$.9 million of losses on sales of equipment recovered from a customer in default. During the three months ended March 31, 2001, the Company's net gain on the sale of leasing equipment was primarily due to a gain of \$1.8 million on the sale of the rail trailers and domestic containers previously owned by the Company to TIP.

Interest Expense, Net

The Company's net interest expense decreased to \$21.3 million in the three months ended March 31, 2002 from \$21.9 million in the three months ended March 31, 2001, a decrease of \$.6 million or 3%. The decrease in net interest expense was due to reduced interest expense of \$1.2 million, as well as decreased investment income of \$.6 million. The decrease in interest expense was primarily due to reduced borrowing costs resulting in reduced interest expense of \$3.0 million, partially offset by increased borrowings to fund capital expenditures, resulting in incremental interest expense of \$1.8 million.

Provision for Income Taxes

The Company's provision for income taxes decreased to \$1.1 million from \$2.9 million primarily due to a lower effective tax rate resulting from greater income contribution from the international container leasing division, which is subject to a lower statutory rate than our domestic intermodal division.

Income from Continuing Operations Before Cumulative Effect of Change in Accounting Principle

As a result of the factors described above, the Company's income from continuing operations before cumulative effect of change in accounting principle was \$11.4 million in the three months ended March 31, 2002 versus \$11.0 million in the three months ended March 31, 2001.

(Loss) Gain from Discontinued Operations

The Company's loss from discontinued operations was \$.7 million for the three months ended March 31, 2002, as compared to a nominal loss from discontinued operations for the three months ended March 31, 2001. The increased loss is primarily due to \$.7 million of losses incurred by Microtech during the three months ended March 31, 2002, as compared to \$.1 million of income during the three months ended March 31, 2001. The increased losses are primarily the result of additional bad debt reserves due to a weaker economic environment resulting in specific customer defaults. The Company, along with the management of Microtech, believes all future losses expected to be incurred by Microtech during the liquidation of its lease portfolio have been properly accrued as of March 31, 2002. The Company, along with the management of Microtech, will continue to assess whether additional accruals for losses are necessary, as additional information becomes available during the liquidation of Microtech's lease portfolio.

Cumulative Effect of Change in Accounting Principle

The Company recorded the cumulative effect of a change in accounting principle of \$.8 million in the three months ended March 31, 2001. This represents the cumulative effect through December 31, 2000 regarding the Company's accounting for swap transactions not accounted for as hedges in accordance with the Financial Accounting Standards Board issued statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities*. The adoption of Statement 133 on January 1, 2001 increased liabilities by approximately \$9.0 million, with offsetting amounts recorded as decreases to deferred tax liabilities of \$2.4 million and accumulated other comprehensive income of \$7.4 million.

Net Income

As a result of the factors described above, the Company's net income decreased to \$10.7 million in the three months ended March 31, 2002 from \$11.8 million in the three months ended March 31, 2001.

19

Liquidity and Capital Resources

The Company uses funds from various sources to finance the acquisition of equipment for lease to customers. The primary funding sources are cash provided by operations, borrowings (generally from banks), securitization of lease receivables, the issuance of capital lease obligations and the sale of the Company's debt securities. In addition, the Company generates cash from the sale of equipment being retired from the Company's fleet. In general, the Company seeks to meet debt service requirements from the leasing revenue generated by its equipment.

The Company generated cash flow from operations of \$21.4 million and \$25.5 million in the first three months of 2002 and 2001, respectively, and net cash provided by (used for) financing activities was \$117.3 million and \$(245.6) million for the first three months of 2002 and 2001, respectively. The Company has purchased the following amounts of equipment: \$99.2 million for the three months ended March 31, 2002 and \$32.9 million for the three months ended March 31, 2001.

In March 2002, the Company completed a \$500.0 million chassis asset-based securitization facility. This facility is guaranteed by MBIA and was therefore rated AAA by Standard & Poor's and Aaa by Moody's. The proceeds from this financing were used to repay debt related to a secured financing facility used to fund the Transamerica transaction, to repay a previously established chassis securitization facility, to fund growth of our intermodal equipment fleet and for working capital purposes. At March 31, 2002, \$500.0 million of this facility was outstanding with an interest rate of 7.66%, including the effect of interest rate swap contracts in place for the \$500.0 million as of March 31, 2002. This facility is accounted for as on-balance sheet secured debt financing.

The Company has a \$215.0 million revolving credit facility with a group of commercial banks; on March 31, 2002, \$215.0 million was outstanding, with an interest rate of 6.23%, including the effect of interest rate swap contracts in place as of March 31, 2002. In July 2000, this facility was renewed and amended with the term extended to July 31, 2005. The credit limit remains at \$215.0 million through July 31, 2003; thereafter the credit limit declines to \$193.5 million through July 31, 2004 and \$172.0 million through July 21, 2005. In addition, as of March 31, 2002, the Company had an available line of credit of \$10.0 million under one facility, under which \$3.2 million was outstanding. The interest rate under this facility is 5.0%. Subsequent to March 31, 2002 the Company has continued to incur and repay debt obligations in connection with financing its equipment leasing activities. Under our revolving credit facility and most of our other debt instruments, the Company is required to maintain a tangible net worth (as defined) of \$125 million, a fixed charge coverage ratio of 1.5 to 1 and a funded debt to net worth ratio of 4.0 to 1. At March 31, 2002, the Company was in compliance with these requirements.

In October 2000, the Company established a secured financing facility in the amount of \$300.0 million to fund the TA transaction. At December 31, 2001, \$97.7 million of this facility was outstanding with an interest rate of 4.69%. The Company repaid this facility in full in March 2002 with proceeds from our new chassis asset-based securitization facility completed in March 2002.

In July 2000, the Company established a chassis securitization facility of \$280.0 million. In October 2000, this chassis securitization facility was increased to \$300.0 million. At December 31, 2001, \$277.4 million of this facility was outstanding, with an interest rate of 4.75%, including the effect of interest rate swap contracts in place as of December 31, 2001. The Company repaid this facility in full in March 2002 with proceeds from our new chassis asset-based securitization facility completed in March 2002.

In March 1999, the Company established a container securitization facility of \$250.0 million. This program provides the Company with a lower cost of capital for its finance lease business and access to an additional source of funding. Included in other investment securities at March 31, 2002, is approximately \$13.6 million of retained interests in the securitized lease receivables. In July 2001, the container securitization facility, which was originally established as an off-balance sheet source of financing, was amended allowing additional financings to be accounted for as on-balance sheet secured debt financing. At March 31, 2002, \$109.7 million of the container securitization facility was utilized, of which \$57.1 million relates to

Edgar Filing: INTERPOOL INC - Form 10-Q

off-balance sheet financing, while \$52.6 million relates to on-balance sheet financing and is included in debt and capital lease obligations in the condensed consolidated balance sheets.

In February 1998, the Company issued \$100.0 million principal amount of 6-5/8% Note due 2003. During the second and third quarter of 2001, the Company retired a total of \$27.2 million of the 6-5/8% Notes and recognized an extraordinary gain of \$0.4 million. As of March 31, 2002, \$47.6 million principal amount of 6-5/8% Notes remain outstanding.

In March 2001, the Company completed the sale of 50,000 rail trailers and domestic containers to TIP, including all 40,000 rail trailers and domestic containers the Company acquired from TA in October 2000, for approximately \$345.0 million.

19

In May 1999, our Microtech subsidiary acquired a 51% interest in Personal Computer Rentals, Inc. (PCR), a nationwide lessor of computers and related equipment. We also provided financing to PCR. During the three months ended September 30, 2001, we initiated a plan to dispose of PCR, a 51%-owned subsidiary, and to discontinue the operations of Microtech, a 75.5%-owned subsidiary and liquidate its lease portfolio. As a result of this decision, PCR and Microtech have been classified as discontinued operations in the consolidated financial statements. On December 31, 2001, we completed the sale of our 51% ownership stake of PCR to an investment group comprised of the management of PCR.

During the three months ended June 30, 2001, we initiated a bankruptcy claim against a customer and sought to collect receivables and to recover equipment values through its insurance policies. We demanded the return of approximately \$48.6 million of equipment, including \$8.5 million of direct finance leases which were reclassified to leasing equipment. At March 31, 2002, we anticipate that approximately \$8.3 million of this equipment will not be recovered from the customer. In addition, the outstanding receivables from this customer as of March 31, 2002 totaled approximately \$35.5 million which is covered by insurance or reserved for in the allowance for doubtful accounts. At this time, we estimate no impairment upon the liquidation and/or re-lease of these assets after considering anticipated insurance proceeds. The maximum insurance coverage related to this claim is \$35.0 million. The overall recovery of the asset values has been evaluated taking into consideration the equipment book value, the cost to recover and re-lease the equipment, and the total outstanding receivables, as well as the likelihood to collect through the recovery and sale of the equipment or the stipulated equipment values within the insurance policy. We recorded revenue from these leases through August 20, 2001 at which time, revenue recognition was discontinued, as lease payments through August 20, 2001 were covered by the insurance policies. We will continue to assess the overall recovery of the asset values and adjust the assumptions used in evaluating the total insurance claim with respect to this customer's bankruptcy. As additional information becomes available, reserves for the impairment of the asset values may be necessary based upon changes in economic conditions and the assumptions used in evaluating the total insurance claim.

As of March 31, 2002, commitments for capital expenditures totaled approximately \$10.1 million. The Company believes that cash on hand, cash flow from operations, borrowings under credit facilities and the net proceeds of the issuance of debt and equity securities in appropriate markets will be sufficient to meet the working capital needs, capital expenditures and required debt repayments for the next twelve months. Required debt repayments are \$148.2 million for the next twelve months. In addition, the Company expects to rely in substantial part on long-term financing for any purchase of equipment or strategic acquisitions to expand its business in the future. The Company cannot assure that additional long-term financing will be available for these purposes on acceptable terms or at all. In addition, from time to time, the Company explores new sources of capital both at the parent and subsidiary levels.

On July 1, 2001, the Company restructured its relationship with The Ivy Group and its principals to provide the Company with managerial control over 6,047 chassis previously leased by Trac Lease, Inc. (Trac Lease), a wholly owned subsidiary of the Company, from The Ivy Group. As a result of the restructuring, the partners of The Ivy Group contributed these 6,047 chassis and certain other assets and liabilities to a newly formed subsidiary, Chassis Holdings I LLC (Chassis Holdings), in exchange for \$26.0 million face value of preferred membership units and 10% of the common membership units, and Trac Lease contributed 902 chassis and \$2.4 million in cash to Chassis Holdings in exchange for \$3.0 million face value of preferred membership units and 90% of the common membership units. The preferred membership units are entitled to receive a preferred return prior to the receipt of any distributions by the holders of the common membership units. The value of the contributed chassis was determined by taking the arithmetic average of the results of independent appraisals performed by three nationally recognized appraisal firms in connection with the Company's establishment of a chassis securitization facility in July 2000. As the managing member of Chassis Holdings, Trac Lease exercises sole managerial control over the entity's operations. Chassis Holdings leases all of its chassis to Trac Lease at a rental rate equal to the then current Trac Lease fleet average per diem. Chassis Holdings and the holders of the preferred membership units are party to a Put/Call Agreement which provides

that the holders of preferred units may put such units to Chassis Holdings under certain circumstances and Chassis Holdings may redeem such units under certain circumstances. Chassis Holdings will be required to make certain option payments to the holders of the preferred membership units in order to preserve its right to redeem such units. For the three months ended March 31, 2002, dividends paid on the common units and distributions on the preferred units owned by The Ivy Group, totaling \$.8 million, are included in lease operating and administrative expenses in the accompanying condensed consolidated statements of income.

20

During 1999, the Company authorized the repurchase up to 1,000,000 shares of its common stock. The shares will be purchased from time to time through open market purchases or privately negotiated transactions. During the first quarter of 2002, the Company purchased 2,100 shares for an aggregate purchase price of \$.04 million. During the fourth quarter of 2001, the Company purchased 58,100 shares for an aggregate purchase price of \$.9 million.

On April 17, 2002, the Company filed a registration statement with the Securities and Exchange Commission, for a subscription rights offering of up to \$31.5 million of 9.25% Convertible Redeemable Subordinated Debentures. The debentures will be offered to holders of the Company's common stock pursuant to the exercise of non-transferable subscription rights and will be convertible into shares of the Company's common stock. The Company expects to use the net proceeds of the offering for general corporate purposes. This registration statement has not yet become effective. The securities may not be sold, nor may offers to buy be accepted, prior to the time the registration statement becomes effective.

On June 29, 2001, the Financial Accounting Standards Board approved Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets.

Statement 142 applies to all acquired intangible assets whether acquired singly, as part of a group, or in a business combination. This statement supersedes Accounting Principals Board, or APB, Opinion No. 17, Intangible Assets, and will incorporate provisions in APB Opinion No 17 related to internally developed intangible assets. Adoption of Statement 142 also requires that companies cease amortizing goodwill. On January 1, 2002, the Company adopted Statement 142. The adoption of Statement 142 did not result in an adjustment to recorded goodwill. Total goodwill recorded by the Company was approximately \$9.6 million related to certain investments accounted for under the equity method of accounting.

In August 2001, the Financial Accounting Standards Board (FASB) approved its proposed Statement of Financial Accounting Standards No. 144, *Accounting for the Impairment or Disposal of Long Lived Assets*. Statement 144 addresses financial accounting and reporting for the impairment or disposal of long-lived assets. This Statement supersedes FASB Statement No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*, and the accounting and reporting provisions of APB Opinion No. 30, *Reporting the Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, for the disposal of a *segment of a business* (as previously defined in that Opinion). This Statement also amends ARB No. 51, *Consolidated Financial Statements*, to eliminate the exception to consolidation for a subsidiary for which control is likely to be temporary. During the first quarter of 2002, the Company evaluated the carrying value of our long lived assets as prescribed by Statement 144. The adoption of this statement in the first quarter of 2002 did not result in an adjustment to our consolidated financial statements.
