Portfolio Managers'
COMMENTS

Portfolio managers Tom Spalding, Scott Romans, and Paul Brennan review the market environment at the national and state levels, key investment strategies, and the annual performance of the Nuveen Select Tax-Free Income Portfolios. With 29 years of investment experience, Tom has managed NXP, NXQ, and NXR since 1999. Scott, who joined Nuveen in 2000, and Paul, who has 13 years of investment experience, assumed portfolio management responsibility for NXC and NXN, respectively, in January 2003.

WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE REPORTING PERIOD ENDED MARCH 31, 2004?

During this reporting period, the greatest influences on the national economy and the municipal market continued to be historically low interest rates, little movement in the reported rate of inflation and growing evidence of economic improvement. Since its last credit easing in June 2003, the Federal Reserve has maintained the fed funds rate at 1.0%, the lowest level since 1958. This accommodative monetary policy helped to spur GDP (gross domestic product) growth of 4.2% (annualized) in the first quarter of 2004, following a 3.1% rise in

2003.

This generally favorable environment helped many municipal bonds perform well during the 12 months ended March 31, 2004. Nationally, municipal supply reached \$382.7 billion in 2003, breaking the record set in 2002, although issuance slowed somewhat during the second half of 2003. Tighter supply continued into the first two months of 2004 before issuance picked up significantly in March.

HOW WERE ECONOMIC AND MARKET CONDITIONS IN CALIFORNIA AND NEW YORK?

In California, the political uncertainty surrounding the recall initiative served to further complicate the state's financial difficulties. The California economy remained hindered by the slow recovery of the technology sector, and the state continued to lose jobs in government, manufacturing, and business services. This was offset to some degree by California's strong housing market, which fueled growth in construction, financial services, and consumer spending, while increased defense spending had positive implications for the state's aerospace industry. In addition, California's \$100 billion export industry was aided by the decline in the U.S. dollar over this period.

Moody's and Fitch downgraded California's general obligation debt to Baal/BBB from A3/A in December 2003. Standard & Poor's, which had downgraded the state in July 2003, kept its rating at BBB, and all three agencies maintained negative outlooks. However, in March 2004, California voters approved the issuance of \$15 billion in economic recovery bonds as well as a resolution calling for future limits on spending and borrowing. Moody's and S&P subsequently revised their outlooks for California to stable and positive, respectively.

New York continued to recover from financial problems triggered by the national economic downturn and deepened by the terrorist attacks of 2001. Although increased Wall Street activity and a rebounding tourism industry had positive implications for the state's economy and future tax revenues, New York continued to slightly lag the national pace of recovery during this reporting period.

2

New York was the largest issuer in the nation during the first three months of 2004, with \$11 billion in new paper. In February 2004, Standard & Poor's (S&P) reconfirmed its rating of New York's general obligation debt at AA with a negative outlook, while Moody's and Fitch maintained their ratings of A2 with a stable outlook and AA-, respectively. As of March 31, 2004, New York City was rated A2/A/A+, by Moody's, S&P and Fitch, respectively, with all three rating agencies returning their outlooks for the city to stable from negative over the past year.

California and New York continued to rank as the nation's largest issuers of municipal debt in 2003, with \$58 billion (an increase of 18% over 2002) and \$42 billion (a decline of 14%) in new bonds, respectively. For the first three months of 2004, however, California supply fell 37% from January-March 2003 levels, with total issuance of \$10 billion. In New York, supply was more plentiful during the first three months of 2004, with \$11 billion in new paper, an increase of 20% over January-March 2003.

IN THIS ENVIRONMENT, WHAT KEY STRATEGIES WERE USED TO MANAGE THE PORTFOLIOS DURING THE 12 MONTHS ENDED MARCH 31, 2004?

Over this reporting period, we continued to work on transitioning the Select Portfolios from their previous positioning with fixed termination dates, largely static portfolios, intermediate durations¹ and, in the case of NXC and NXN, 100%

insured portfolios. As part of this transition, one of our priorities during this period was duration management, with the goal of enhancing the Portfolios' performance potential and positioning them to produce potentially more consistent returns over time. To implement this strategy, we took advantage of attractive opportunities to sell bonds with shorter durations--pre-refunded bonds, bonds with short call dates, and bonds that mature in the next year or two--and reinvested the proceeds, as well as proceeds from called bonds, in bonds with longer durations to extend the Portfolios' durations. In keeping with the steepness of the municipal bond yield curve over this period, the majority of our purchase activity focused on securities in the long-intermediate part of the yield curve. In the national Portfolios, this meant bonds that mature in 20 to 25 years, while NXC and NXN focused on maturities of 15 to 20 years. In many cases, bonds in this area of the curve offered yields similar to those of longer-term bonds with less inherent interest rate risk.

Over the course of this annual period, we were able to extend the durations of NXP, NXQ, and NXC, while the duration of NXN remained essentially unchanged for the period ended March 31, 2004. NXR's duration shortened slightly.

Although the heavy volume of municipal issuance during 2003 provided opportunities to make trades that would benefit the Portfolios, we saw supply soften in California and New York as well as at the national level during the last half of 2003. As noted earlier, tighter supply also continued into the first quarter of 2004 in the California market. This presented some challenges in finding securities that we believed had the potential to add value and that carried the types of structures and features we prefer.

1 Duration is a measure of a Portfolio's net asset value (NAV) volatility in reaction to interest rate movements.

3

For NXP, NXQ, and NXR, our emphasis was on maintaining the Portfolios' credit quality by purchasing high-quality bonds as credit spreads remained narrow, improving call exposure by reinvesting proceeds in issues with at least eight years of call protection, and watching both the primary and secondary markets for bonds that can help these Portfolios achieve their long-term objectives.

For NXC, as we continued to work to diversify the credit quality of the Portfolio over this period, we were active buyers of bonds rated BBB, including toll roads, water and sewer, tobacco, and general obligation (GO) bonds. One of our strategies over the longer term has centered on purchasing and selling California GOs to take advantage of general market moves. In February 2004, we bought part of the \$2 billion issuance of state GOs at an attractive yield, with the goal of modestly increasing NXC's exposure to this sector of the market. As California continues to work its way out of its current credit problems, we anticipate that the yield spreads on these bonds relative to national AAA credits with similar maturities may narrow, providing us with opportunities to sell some of these GO holdings at attractive prices in the future.

While our objectives and management strategies were similar in NXN, the New York market did not provide as many lower-rated opportunities as California did over the past 12 months. As of March 31, 2004, NXN continued to have the highest percentage of bonds rated AAA/U.S. guaranteed among these five Portfolios at 81%, down from 86% in March 2003. Of this 81%, more than two-thirds were insured. As with NXC, we used proceeds from the sale of pre-refunded bonds to purchase lower-rated securities as appropriate opportunities became available in the New York market during this period.

4

For the 12 months ended March 31, 2004, the total returns of all five of the Select Portfolios outperformed their respective Lehman Brothers benchmarks. In addition to the duration management strategies discussed in the previous section, sector weightings and individual security selection were among the primary factors that influenced the Portfolios' performances over the 12 month period. For example, during this period, the healthcare sector, as measured by the Lehman Municipal Bond Index, ranked second in terms of performance, outperforming the market as a whole by approximately 120 basis points. Each of the Portfolios had a substantial allocation of healthcare bonds, ranging from 10% in NXN to 15% in NXC, 16% in NXQ, 17% in NXP, and 18% in NXR as of March 31, 2004, which benefited their performances.

In addition, the past 12 month period saw increased market demand for high-yield paper, which caused credit spreads to narrow. In this environment, the Portfolios benefited from their holdings of lower-rated credits, as bonds rated BBB outperformed the market as a whole over this period. As of March 31, 2004, allocations of BBB bonds ranged from 4% in NXN, 7% in NXP, and 9% in NXR to 11% in NXQ and 14% in NXC. Among the lower-rated holdings making a positive contribution to the Portfolios' total annual returns were tobacco bonds, most of which were rated BBB over the majority of this reporting period. These bonds appreciated strongly during the last half of this period as the result of some favorable legal developments. Over this period, we maintained our exposure to tobacco-backed bonds at approximately 2% of NXP, 2% of NXN, and 5% of NXQ and NXR.

In April 2004, following the end of this reporting period, Moody's announced a ratings downgrade on all tobacco securities that were not enhanced or additionally secured, based on an adverse ruling in a tobacco-related lawsuit in New York. As of April 21, 2004, the majority of the Portfolios' tobacco bond holdings were downgraded to Baa1, Baa2, or Baa3. It is important to note, however, that the other major credit agencies--S&P and Fitch--did not change their ratings based on the litigation cited by Moody's. We continue to closely monitor all of these tobacco holdings.

HOW ABOUT THE PORTFOLIOS' DIVIDENDS AND SHARE PRICES?

With call exposure affecting up to 28% of their portfolios during 2003, the Select Portfolios continued to face the need to reinvest proceeds from called bonds over the 12 months ended March 31, 2004. This meant that older bonds offering higher coupons had to be replaced with the bonds available in a market where interest rates remained at historically low levels. While we were able to maintain the dividend of NXR, the number of calls necessitated a single dividend cut in each of the four remaining Portfolios over the 12 month period.

All of these Portfolios seek to pay stable dividends at rates that reflect each Portfolio's past results and projected future performance. During certain periods, each Portfolio may pay dividends at a rate

5

that may be more or less than the amount of net investment income actually earned by the Portfolio during the period. If a Portfolio has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Portfolio's net asset value (NAV). Conversely, if a Portfolio has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Portfolio's NAV. Each Portfolio will, over time, pay all of its net investment income as dividends to shareholders. As of March 31, 2004, NXN had positive UNII, while NXQ, NXP, NXR, and NXC had negative UNII.

At the close of this reporting period on March 31, 2004, all five Portfolios were trading at discounts to their common share NAVs (see charts on individual Performance Overview pages).

HOW WERE THE PORTFOLIOS POSITIONED IN TERMS OF CREDIT QUALITY AND BOND CALLS AS OF MARCH 31, 2004?

Given the current geopolitical and economic climate, we continued to believe that maintaining strong credit quality was a vital requirement. As of the end of March 2004, all five of the Select Portfolios continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 69% in NXC, 71% in NXR, 76% in NXP, and 79% in NXQ to 96% in NXN. At the same time, NXC also had an increase in its holdings rated BBB or lower, due in part to the downgrade of California general obligation bonds by Moody's and Fitch in December 2003. We also purchased additional BBB bonds for the portfolio.

As of March 31, 2004, potential call exposure for these Portfolios during 2004-2005 ranged from 13% in NXN, 14% in NXP and NXC to 19% in NXQ and NXR. The actual number of bond calls in all of the Portfolios depends largely on market interest rates.

FINANCIAL STATEMENTS

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The Trusts covered in this report and their corresponding Common share New York Stock Exchange symbols are Nuveen Select Tax-Free Income Portfolio (NXP), Nuveen Select Tax-Free Income Portfolio 2 (NXQ), Nuveen Select Tax-Free Income Portfolio 3 (NXR), Nuveen California Select Tax-Free Income Portfolio (NXC) and Nuveen New York Select Tax-Free Income Portfolio (NXN). The Trusts are registered under the Investment Company Act of 1940, as amended, as closed-end, diversified management investment companies.

Each Trust seeks to provide stable dividends consistent with the preservation of capital, exempt from regular federal and designated state income taxes, where applicable, by investing primarily in a diversified portfolio of municipal obligations.

The following is a summary of significant accounting policies followed by the Trusts in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Trust's investment portfolio are provided by a pricing service approved by the Trust's Board of Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Trusts, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification

method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Trusts have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At March 31, 2004, New York Select Tax-Free (NXN) had an outstanding when-issued purchase commitment of \$834,420. There were no such outstanding purchase commitments in any of the other Trusts.

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Income Taxes

Each Trust is a separate taxpayer for federal income tax purposes. Each Trust intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Trust intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, where applicable, to retain such tax-exempt status when distributed to shareholders of the Trusts. All monthly tax-exempt income dividends paid during the fiscal year ended March 31, 2004, have been designated Exempt Interest Dividends.

Dividends and Distributions to Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

37

Notes to

FINANCIAL STATEMENTS (continued)

Distributions to shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States.

Derivative Financial Instruments

The Trusts are not authorized to invest in derivative financial instruments.

Custodian Fee Credit

Each Trust has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Trust's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Build Your Wealth
AUTOMATICALLY

Sidebar text: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name

Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-CSR

of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

PROXY VOTING POLICIES AND PROCEDURES

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling Nuveen Investments at (800) 257-8787; and (ii) on the Commission's website at <http://www.sec.gov>.

GLOSSARY OF TERMS USED IN THIS REPORT

Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

Average Effective Maturity: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

Leverage-Adjusted Duration: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund.

Market Yield (also known as Dividend Yield or Current Yield): An investment's current annualized dividend divided by its current market price.

Net Asset Value (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

Taxable-Equivalent Yield: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the period ended March 31, 2004. Any future repurchases will be reported to shareholders in the next annual or semiannual report.

FORM N-CSR DISCLOSURE RE: AUDIT FEES

The following table shows the amount of fees that Ernst & Young LLP, the Fund's auditor, billed to the Fund during the Fund's last two full fiscal years. For engagements with Ernst & Young LLP entered into on or after May 6, 2003, the Audit Committee approved in advance all audit services and non-audit services that Ernst & Young LLP provided to the Fund, except for those non-audit services that were subject to the pre-approval exception under Rule 2-01 of Regulation S-X (the "pre-approval exception"). The pre-approval exception for services provided directly to the Fund waives the pre-approval requirement for services other than audit, review or attest services if: (A) the aggregate amount of all such services provided constitutes no more than 5% of the total amount of revenues paid by the Fund during the fiscal year in which the services are provided; (B) the Fund did not recognize the services as non-audit services at the time of the engagement; and (C) the services are promptly brought to the Audit Committee's attention, and the Committee (or its delegate) approves the services before the audit is completed.

The Audit Committee has delegated certain pre-approval responsibilities to its Chairman (or, in his absence, any other member of the Audit Committee).

The above "Tax Fees" were billed for professional services for tax advice, tax compliance and tax planning.

SERVICES THAT THE FUND'S AUDITOR BILLED TO THE ADVISER AND AFFILIATED FUND SERVICE PROVIDERS

The following table shows the amount of fees billed by Ernst & Young LLP to Nuveen Institutional Advisory Corp. ("NIAC" or the "Adviser"), and any entity controlling, controlled by or under common control with NIAC ("control Affiliate") that provides ongoing services to the Fund ("Affiliated Fund Service Provider"), for engagements directly related to the Fund's operations and financial reporting, during the Fund's last two full fiscal years.

The table also shows the percentage of fees subject to the pre-approval

exception. The pre-approval exception for services provided to the Adviser and any Affiliated Fund Service Provider (other than audit, review or attest services) waives the pre-approval requirement if: (A) the aggregate amount of all such services provided constitutes no more than 5% of the total amount of revenues paid to Ernst & Young LLP by the Fund, the Adviser and Affiliated Fund Service Providers during the fiscal year in which the services are provided that would have to be pre-approved by the Audit Committee; (B) the Fund did not recognize the services as non-audit services at the time of the engagement; and (C) the services are promptly brought to the Audit Committee's attention, and the Committee (or its delegate) approves the services before the Fund's audit is completed.

NON-AUDIT SERVICES

The following table shows the amount of fees that Ernst & Young LLP billed during the Fund's last two full fiscal years for non-audit services. For engagements entered into on or after May 6, 2003, the Audit Committee is required to pre-approve non-audit services that Ernst & Young LLP provides to the Adviser and any Affiliated Fund Services Provider, if the engagement related directly to the Fund's operations and financial reporting (except for those subject to the de minimis exception described above). The Audit Committee requested and received information from Ernst & Young LLP about any non-audit services that Ernst & Young LLP rendered during the Fund's last fiscal year to the Adviser and any Affiliated Fund Service Provider. The Committee considered this information in evaluating Ernst & Young LLP independence.

| FISCAL YEAR ENDED | TOTAL NON-AUDIT FEES BILLED TO FUND | TOTAL NON-AUDIT FEES BILLED TO ADVISER AND AFFILIATED FUND SERVICE PROVIDERS (ENGAGEMENTS RELATED DIRECTLY TO THE OPERATIONS AND FINANCIAL REPORTING OF THE FUND) | TOTAL NON-AUDIT FEES BILLED TO ADVISER AND AFFILIATED FUND SE PROVIDERS (ALL OT ENGAGEMENTS) |

Generally, the audit committee must approve (i) all non-audit services to be performed for the Fund by the Fund's independent accountants and (ii) all audit and non-audit services to be performed by the Fund's independent accountants for the Affiliated Fund Service Providers with respect to operations and financial reporting of the Fund. Regarding tax and research projects conducted by the independent accountants for the Fund and Affiliated Fund Service Providers (with respect to operations and financial reports of the Fund) such engagements will be (i) pre-approved by the audit committee if they are expected to be for amounts greater than \$10,000; (ii) reported to the audit committee chairman for his verbal approval prior to engagement if they are expected to be for amounts under \$10,000 but greater than \$5,000; and (iii) reported to the audit committee at the next audit committee meeting if they are expected to be for an amount under \$5,000.
