UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the Quarterly Period Ended September 30, 2013
Commission File No. 000-22490

FORWARD AIR CORPORATION
(Exact name of registrant as specified in its charter)

Tennessee
(State or other jurisdiction of incorporation)
430 Airport Road
Greeneville, Tennessee
(Address of principal executive offices)

62-1120025
(I.R.S. Employer Identification No.)
37745
(Zip Code)

Registrant's telephone number, including area code: (423) 636-7000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

The number of shares outstanding of the registrant's common stock, \$0.01 par value, as of October 21, 2013 was 30,615,604.

(Unaudited)

September 30, 2013

1. Basis of Presentation

Forward Air Corporation's ("the Company") services can be classified into three principal reporting segments: Forward Air, Inc. ("Forward Air"), Forward Air Solutions, Inc. ("FASI") and Total Quality, Inc. ("TQI").

Through the Forward Air segment, the Company is a leading provider of time-definite transportation and related logistics services to the North American deferred air freight market and its activities can be classified into three categories of service: airport-to-airport, logistics, and other. Forward Air's airport-to-airport service operates a comprehensive national network for the time-definite surface transportation of expedited ground freight. The airport-to-airport service offers customers local pick-up and delivery and scheduled surface transportation of cargo as a cost effective, reliable alternative to air transportation. Forward Air's logistics services provide expedited truckload brokerage and dedicated fleet services. Forward Air's other services include shipment consolidation and deconsolidation, warehousing, customs brokerage, and other handling. The Forward Air segment primarily provides its transportation services through a network of terminals located at or near airports in the United States and Canada.

FASI provides pool distribution services throughout the Mid-Atlantic, Southeast, Midwest and Southwest continental United States. Pool distribution involves managing high-frequency handling and distribution of time-sensitive product to numerous destinations in specific geographic regions. FASI's primary customers for this service are regional and nationwide distributors and retailers, such as mall, strip mall and outlet based retail chains.

TQI is a provider of maximum security and temperature-controlled logistics services, primarily truckload services, to the pharmaceutical and life science industries. In addition to core pharmaceutical services, TQI provides truckload and less-than-truckload brokerage transportation services.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by United States generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. The Company's operating results are subject to seasonal trends when measured on a quarterly basis; therefore operating results for the three and nine months ended September 30, 2013 are not necessarily indicative of the results that may be expected for the year ending December 31, 2013. For further information, refer to the consolidated financial statements and notes thereto included in the Forward Air Corporation Annual Report on Form 10-K for the year ended December 31, 2012.

The accompanying unaudited condensed consolidated financial statements of the Company include Forward Air Corporation and its subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation.

2. Acquisitions and Goodwill

Acquisition of TQI

On March 4, 2013, the Company entered into a Stock Purchase Agreement ("Agreement") with all of the shareholders of TQI to acquire 100% of the outstanding stock. Pursuant to the terms of the Agreement and concurrently with the execution of the Agreement, the Company acquired all of the outstanding capital stock of TQI in exchange for \$45,328 in net cash, \$20,113 in assumed debt and an available earn-out of \$5,000. The assumed debt was immediately paid in full after funding of the acquisition. The acquisition and settlement of the assumed debt were funded using the Company's cash on hand. Under the purchase agreement, \$4,500 of the purchase price was paid into an escrow account to protect the Company against potential unknown liabilities. The amount held in escrow will be remitted to the sellers on September 4, 2014.

Pursuant to the terms of the Agreement, the Company could pay the former shareholders of TQI additional cash consideration from \$0 to \$5,000 if certain earnings before interest, taxes, depreciation and amortization ("EBITDA") goals are exceeded. The ultimate payout is based on the level by which TQI operating results exceed specified thresholds as defined by the Agreement in both 2013 and 2014. The Company has recognized an estimated earn-out liability of \$614 based on the most probable outcomes as of the acquisition date and September 30, 2013. The fair value of the earn-out liability (level 3) was estimated using an income

Table of Contents

Forward Air Corporation

Notes to Condensed Consolidated Financial Statements

(In thousands, except share and per share data)

(Unaudited)

September 30, 2013

approach based on the present value of probability-weighted amounts payable under a range of performance scenarios for 2013 and 2014 and a discount rate of 10.9%. If TQI's 2013 or 2014 EBITDA performance fails to meet or exceeds the projections used in our valuation of the earn out liability the final value of the liability could be significantly lower or higher than the liability the Company has currently recorded.

The Company incurred total transaction costs related to the acquisition of approximately \$943, which was expensed during the nine months ended September 30, 2013, in accordance with U.S. GAAP. These transaction costs were primarily included in "Other operating expenses" expense in the consolidated statements of comprehensive income. The acquisition allows the Company to expand and diversify its complimentary truckload operations while maintaining its goal of offering high-value added services.

The following table presents the preliminary allocation of the TQI purchase price to the assets acquired and liabilities assumed based on their estimated fair values and resulting residual goodwill (in thousands):

	March 4, 2013
Tangible assets:	
Accounts receivable	\$ 5,639
Prepaid expenses and other current assets	1,201
Property and equipment	5,103
Other assets	728
Deferred income taxes	937
Total tangible assets	13,608
Intangible assets:	
Non-compete agreements	470
Trade name	1,000
Customer relationships	22,300
Goodwill	45,072
Total intangible assets	68,842
Total assets acquired	82,450
Liabilities assumed:	
Current liabilities	4,833
Other liabilities	1,735
Debt	20,113
Deferred income taxes	10,441
Total liabilities assumed	37,122
Net assets acquired	\$ 45,328

The above estimated fair values of assets acquired and liabilities assumed are based on the information that was available as of the TQI acquisition date through the date of this filing. The Company is still in the process of finalizing the valuation of income tax related assets and liabilities and certain disputed charges for other taxes and associated professional fees. The acquired non-compete agreements and trade names are being amortized on straight-line basis over a 5 year life. Customer relationships acquired are being amortized on straight-line basis over a 15 year life. The fair value of the non-compete agreements, trade name and customer relationship assets were estimated using an income approach (level 3). Under this method, an intangible asset's fair value is equal to the present value of the incremental after-tax

Table of Contents

Forward Air Corporation

Notes to Condensed Consolidated Financial Statements

(In thousands, except share and per share data)

(Unaudited)

September 30, 2013

cash flows (excess earnings) attributable solely to the intangible asset over its remaining useful life. To calculate fair value, the Company used cash flows discounted at rates considered appropriate given the inherent risks associated with each type of asset. The Company believes that the level and timing of cash flows appropriately reflect market participant assumptions. The fair value of the TQI trade name was estimated using an income approach, specifically known as the relief from royalty method. The relief from royalty method is based on a hypothetical royalty stream that would be paid if the Company did not own the TQI name and had to license the trade name. The Company derived the hypothetical royalty income from the projected revenues of TQI. Cash flows were assumed to extend through the remaining economic useful life of each class of intangible asset.

Included in the assumed liabilities of TQI is a liability for unrecognized tax benefits for \$1,120. The liability is attributable to TQI not filing income tax returns in all jurisdictions in which it operated. The \$1,120 consists of unrecognized tax benefits of \$853 and related penalties and interest of \$174 and \$93, respectively. In accordance with the Agreement, the former shareholders of TQI have indemnified the Company against this tax exposure. As a result, the Company also recognized an offsetting receivable net of the estimated federal tax benefit for \$728.

The assets, liabilities, and operating results of TQI have been included in the Company's consolidated financial statements from the date of acquisition and have been assigned to a new TQI reportable segment. The results of TQI reflected in the Company's consolidated statements of comprehensive income are as follows (in thousands, except per share data):

	Three months ended September 30, 2013	Since acquisition date to September 30, 2013
Logistics revenue	\$ 12,431	\$ 28,545
Operating income	934	1,936

Goodwill

The following is a summary of the changes in goodwill for the nine months ended September 30, 2013. All goodwill, except the goodwill assigned to TQI, is deductible for tax purposes.

	Forward Air		FASI		TQI		Total
	Goodwill	Accumulated Impairment	Goodwill	Accumulated Impairment	Goodwill	Accumulated Impairment	Net
Beginning balance, December 31, 2012	\$37,926	\$—	\$12,359	\$(6,953)	\$—	\$—	\$43,332
TQI acquisition	—	—	—	—	45,072	—	45,072
Ending balance, September 30, 2013	\$37,926	\$—	\$12,359	\$(6,953)	\$45,072	\$—	\$88,404

The Company conducted its annual impairment assessments and tests of goodwill for each reporting unit as of June 30, 2013 and no impairment charges were required. The Company conducts an annual (or more frequently if circumstances indicate possible impairment) impairment test of goodwill for each reporting unit at June 30 of each year. The first step of the goodwill impairment test is the Company assesses qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than the reporting unit's carrying amount, including goodwill. When performing the qualitative assessment, the Company considers the impact of factors including, but not limited to, macroeconomic and industry conditions, overall financial performance of each reporting unit, litigation and new legislation. If based on the qualitative assessments, the Company believes it more likely than not that the fair value of a reporting unit is less than the reporting unit's carrying amount, or periodically as deemed appropriate by management, the Company will prepare an estimation of the respective reporting unit's fair value utilizing a quantitative approach. If a quantitative fair value estimation is required, the Company calculates the fair value of the applicable reportable units, using a combination of discounted projected cash flows and market valuations for comparable companies as of the valuation date. The Company's inputs into the fair value calculations for goodwill are classified within level 3 of the fair value hierarchy as defined in the FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles ("the FASB Codification"). If this estimation of fair value indicates that impairment potentially exists, the Company will then measure the amount of the impairment, if any. Goodwill impairment exists when the calculated implied fair value of goodwill is less than its carrying value. Changes in strategy or market conditions could significantly impact these fair value estimates and require adjustments to recorded asset balances.

3. Share-Based Payments

The Company's general practice has been to make a single annual grant of share-based compensation to key employees and to make other employee grants only in connection with new employment or promotions. Forms of share-based compensation granted to employees by the Company include stock options, non-vested shares of common stock ("non-vested share"), and performance shares. The Company also typically makes a single annual grant of non-vested shares to non-employee directors in conjunction with the annual election of non-employee directors to the Board of Directors. Share-based compensation is based on the grant

Table of Contents

Forward Air Corporation

September 30, 2013

date fair value of the instrument and is recognized, net of estimated forfeitures, ratably over the requisite service period, or vesting period. The Company estimates forfeitures based upon historical experience. All share-based compensation expense is recognized in salaries, wages and employee benefits.

Employee Activity - Stock Options

Stock option grants to employees generally expire seven years from the grant date and typically vest ratably over a three-year period. The Company used the Black-Scholes option-pricing model to estimate the grant-date fair value of options granted. The weighted-average fair value of options granted and assumptions used to calculate their fair value during the three and nine months ended September 30, 2013 and 2012 were as follows:

	Three months ended			
	September 30, 2013		September 30, 2012	
Expected dividend yield	1.2	%	-	
Expected stock price volatility	43.4	%	-	
Weighted average risk-free interest rate	1.5	%	-	
Expected life of options (years)	4.5		-	
Weighted average grant date fair value	\$ 13		-	

	Nine months ended			
	September 30, 2013		September 30, 2012	
Expected dividend yield	1.2	%	0.9	%
Expected stock price volatility	43.7	%	46.6	%
Weighted average risk-free interest rate	0.9	%	0.8	%
Expected life of options (years)	5.3		4.2	
Weighted average grant date fair value	\$ 13		\$ 13	

The following tables summarize the Company's employee stock option activity and related information:

	Three months ended September 30, 2013			
	Options (000)	Weighted- Average Exercise Price	Aggregate Intrinsic Value (000)	Weighted- Average Remaining Contractual Term
Outstanding at June 30, 2013	1,902	\$ 27

Employee Activity - Performance Shares

In 2013 and 2012, the Company granted performance shares to key employees. Under the terms of the performance share agreements, on the third anniversary of the grant date, the Company will issue to the employees a calculated number of common stock shares based on the three year performance of the Company's common stock share price as compared to the share price performance of a selected peer group. No shares may be issued if the Company share price performance outperforms 30% or less of the peer group, but the number of shares issued may be doubled if the Company share price performs better than 90% of the peer group. The fair value of the performance shares was estimated using a Monte Carlo simulation. The weighted average assumptions used in the Monte Carlo calculation were as follows:

	Nine months ended			
	September 30, 2013		September 30, 2012	
Expected stock price volatility	34.5	%	40.8	%

Employee Activity - Employee Stock Purchase Plan

Under the 2005 Employee Stock Purchase Plan (the “ESPP”), which has been approved by shareholders, the Company is authorized to issue up to a remaining 416,881 shares of common stock to employees of the Company. These shares may be issued at a price equal to 90% of the lesser of the market value on the first day or the last day of each six-month purchase period. Common stock purchases are paid for through periodic payroll deductions and/or up to two large lump sum contributions. For the nine months ended September 30, 2013, participants under the plan purchased 4,241 shares at an average price of \$32.34 per share. For the nine months ended September 30, 2012, participants under the plan purchased 4,121 shares at an average price of \$29.04 per share.

(In thousands, except share and per share data)

(Unaudited)

September 30, 2013

The weighted-average fair value of each purchase right under the ESPP granted for the nine months ended September 30, 2013, which is equal to the discount from the market value of the common stock at the end of each six month purchase period, was \$5.94 per share. The weighted-average fair value of each purchase right under the ESPP granted for the nine months ended September 30, 2012, which is equal to the discount from the market value of the common stock at the end of each six month purchase period, was \$3.23 per share. Share-based compensation expense of \$26 and \$13 was recognized during the nine months ended September 30, 2013 and 2012, respectively.

Non-employee Director Activity - Non-vested Shares

Grants of non-vested shares to non-employee directors vest ratably over the elected term to the Board of Directors, or one year. The following tables summarize the Company's non-employee non-vested share activity and related information:

	Three months ended September 30, 2013

Non-employee Director Activity - Stock Options

In addition to the above activity, each May from 1995 to 2005 options were granted to the non-employee directors of the Company. The options have terms of ten years and are fully exercisable. At September 30, 2013, 26,250 options were outstanding and will expire between May 2014 and May 2015. At September 30, 2013, the weighted average exercise price per share and remaining contractual term for the outstanding options of non-employee directors were \$23 and 1.2 years, respectively.

4. Senior Credit Facility

In February 2012, the Company entered into a new \$150,000 credit facility. This facility has a term of five years and matures in February 2017. The Company entered into this larger credit facility in order to fund potential acquisitions, the repurchase of its common stock and the financing of other general business purposes. Interest rates for advances under the facility are LIBOR plus 1.1% based upon covenants related to total indebtedness to earnings (1.3% at September 30, 2013). The agreement contains certain covenants and restrictions, none of which are expected to significantly affect the Company's operations or ability to pay dividends. No assets are pledged as collateral against the credit facility. As of September 30, 2013, the Company had no borrowings outstanding under the senior credit facility. At September 30, 2013, the Company had utilized \$9,374 of availability for outstanding letters of credit and had \$140,626 of available borrowing capacity outstanding under the senior credit facility.

5. Net Income Per Share

The following table sets forth the computation of basic and diluted net income per share:

	Three months ended		Nine months ended

6. Income Taxes

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, various states and Canada. With a few exceptions, the Company is no longer subject to U.S. federal, state and local, or Canadian examinations by tax authorities for years before 2007.

For the three and nine months ended September 30, 2013 and 2012, the effective income tax rates varied from the statutory federal income tax rate of 35.0%, primarily as a result of the effect of state income taxes, net of the federal benefit, and permanent differences between book and tax net income. The combined federal and state effective tax rate for the nine months ended September 30, 2013 was 36.1% compared to a rate of 38.0% for the same period in 2012. The reduction in the effective tax rate was primarily due to the 2013 retroactive reinstatement of alternative fuel tax credits for 2012 and benefits obtained from disqualified dispositions by employees of previously non-deductible incentive stock options.

7. Financial Instruments

Concentrations of Credit Risk

Financial instruments that potentially subject the Company to significant concentrations of credit risk consist principally of cash and trade accounts receivable. The Company does not generally require collateral from its customers. Concentrations of credit risk with respect to trade accounts receivable on a consolidated basis are limited due to the large number of entities comprising the Company's customer base and their dispersion across many different industries.

Fair Value of Financial Instruments

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

Accounts receivable and accounts payable: The carrying amounts reported in the balance sheet for accounts receivable and accounts payable approximate their fair value based on their short-term nature.

The Company's senior credit facility bears interest at LIBOR plus 1.1% based upon covenants related to total indebtedness to earnings. Using interest rate quotes and discounted cash flows, the Company estimated the fair value of its outstanding debt and capital lease obligations as follows:

	September 30, 2013	
	Carrying Value	Fair Value
Debt and capital leases	\$96	\$131

The Company's fair value calculations for the above financial instruments are classified within level 3 of the fair value hierarchy.

8. Shareholders' Equity

During the first and second quarters of 2012, the Company's Board of Directors declared a cash dividend of \$0.07 per share of common stock. During the third and fourth quarters of 2012 and each quarter of 2013, the Company's Board of Directors declared a cash dividend of \$0.10 per share of common stock. The Company expects to continue to pay regular quarterly cash dividends, though each subsequent quarterly dividend is subject to review and approval by the Board of Directors.

9. Commitments and Contingencies

From time to time, the Company is party to ordinary, routine litigation incidental to and arising in the normal course of business. The Company does not believe that any of these pending actions, individually or in the aggregate, will have a material adverse effect on its business, financial condition or results of operations.

Table of Contents

(Unaudited)

September 30, 2013

The primary claims in the Company's business relate to workers' compensation, property damage, vehicle liability and medical benefits. Most of the Company's insurance coverage provides for self-insurance levels with primary and excess coverage which management believes is sufficient to adequately protect the Company from catastrophic claims. In the opinion of management, adequate provision has been made for all incurred claims up to the self-insured limits, including provision for estimated claims incurred but not reported.

The Company estimates its self-insurance loss exposure by evaluating the merits and circumstances surrounding individual known claims and by performing hindsight and actuarial analysis to determine an estimate of probable losses on claims incurred but not reported. Such losses could be realized immediately as the events underlying the claims have already occurred as of the balance sheet dates.

Because of the uncertainty of the ultimate resolution of outstanding claims, as well as uncertainty regarding claims incurred but not reported, it is possible that management's provision for these losses could change materially in the near term. However, no estimate can currently be made of the range of additional loss that is at least reasonably possible.

10. Segment Reporting

The Company operates in three reportable segments based on information available to and used by the chief operating decision maker. Forward Air provides time-definite transportation and logistics services to the deferred air freight market. FASI provides pool distribution services primarily to regional and national distributors and retailers. TQI is a provider of maximum security and temperature-controlled logistics services, primarily truckload services, to the pharmaceutical and life science industries.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies disclosed in Note 1 to the Consolidated Financial Statements included in the Company's 2012 Annual Report on Form 10-K. Segment data includes intersegment revenues. Assets and costs of the corporate headquarters are allocated to the segments based on usage. The Company evaluates the performance of its segments based on net income (loss). The Company's business is conducted in the U.S. and Canada.

The following tables summarize segment information about net income (loss) and assets used by the chief operating decision maker of the Company in making decisions regarding allocation of assets and resources as of and for the three and nine months ended September 30, 2013 and 2012.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Overview and Executive Summary

Our operations can be broadly classified into three principal segments: Forward Air, Inc. ("Forward Air"), Forward Air Solutions, Inc. ("FASI") and Total Quality, Inc. ("TQI").

Through our Forward Air segment, we are a leading provider of time-definite surface transportation and related logistics services to the North American expedited ground freight market. We offer our customers local pick-up and delivery (Forward Air Complete™) and scheduled surface transportation of cargo as a cost-effective, reliable alternative to air transportation. We transport cargo that must be delivered at a specific time, but is less time-sensitive than traditional air freight. This type of cargo is frequently referred to in the transportation industry as deferred air freight. We operate our Forward Air segment through a network of terminals located on or near airports in 88 cities in the United States and Canada, including a central sorting facility in Columbus, Ohio and 12 regional hubs serving key markets. We also offer our customers an array of logistics and other services including: expedited truckload brokerage ("TLX"); dedicated fleets; warehousing; customs brokerage; and shipment consolidation, deconsolidation and handling.

FASI provides pool distribution services throughout the Mid-Atlantic, Southeast, Midwest and Southwest continental United States. Pool distribution involves managing high-frequency handling and distribution of time-sensitive product to numerous destinations in specific geographic regions. Our primary customers for this service are regional and nationwide distributors and retailers, such as mall, strip mall and outlet based retail chains. We service these customers through a network of terminals and service centers located in 24 cities.

TQI is a provider of maximum security and temperature-controlled logistics services, primarily truckload services, to the pharmaceutical and life science industries. In addition to core pharmaceutical services, TQI provides truckload and less-than-truckload brokerage transportation services.

Our operations, particularly our network of hubs and terminals, represent substantial fixed costs. Consequently, our ability to increase our earnings depends in significant part on our ability to increase the amount of freight and the revenue per pound for the freight shipped through our networks and to grow other lines of businesses, such as TLX, FASI and TQI, which will allow us to maintain revenue growth in challenging shipping environments.

Trends and Developments

Acquisition of TQI

On March 4, 2013, we entered into a Stock Purchase Agreement ("Agreement") with all of the shareholders of TQI to acquire 100% of the outstanding stock. Pursuant to the terms of the Agreement and concurrently with the execution of the Agreement, we acquired all of the outstanding capital stock of TQI in exchange for \$45.3 million in net cash, \$20.1 million in assumed debt and an available earn-out of \$5.0 million. The assumed debt was immediately paid in full after funding of the acquisition. The acquisition and settlement of the assumed debt were funded using our cash on hand.

Pursuant to the terms of the Agreement, we could pay the former shareholders of TQI additional cash consideration from \$0 to \$5.0 million if certain earnings before interest, taxes, depreciation and amortization ("EBITDA") goals are exceeded. The ultimate payout is based on the level by which TQI operating results exceed specified thresholds as defined by the Agreement in both 2013 and 2014.

Results from Operations

Edgar Filing: FORWARD AIR CORP - Form 10-Q

During the three months ended September 30, 2013, we experienced a 18.5% increase in our consolidated revenues compared to the three months ended September 30, 2012. The increase in revenue is primarily attributable to revenue from our newly acquired segment, TQI, and increased revenue from FASI. In addition, during the third quarter of 2013 we experienced increased revenue from Forward Air. During the three months ended September 30, 2013, TQI contributed \$12.4 million in operating revenue and approximately \$0.9 million in operating income.

Table of Contents

FASI revenue increased 52.8% and operating results improved \$1.1 million for the three months ended September 30, 2013, compared to the same period in 2012. The FASI revenue increase was primarily the result of new business wins. The increase in revenue drove the \$1.1 million improvement in FASI's income from operations during the three months ended September 30, 2013, compared to the three months ended September 30, 2012.

Forward Air's revenue and operating income improved 3.5% and 6.7%, respectively, for the three months ended September 30, 2013, compared to the same period in 2012. These increases were largely attributable to higher business volumes for our airport-to-airport services.

Our net fuel surcharge revenue is the result of our fuel surcharge rates, which are set weekly using the national average for diesel price per gallon, and the tonnage transiting our network. During the three and nine months ended September 30, 2013, total net fuel surcharge revenue increased 40.6% and 23.5%, respectively, as compared to the same period in 2012. The increase in net fuel surcharge revenue for the three and nine months ended September 30, 2013 compared to the same period in 2012 was mostly due to the acquisition of TQI and increased FASI business volumes.

Goodwill

As of September 30, 2013, the carrying value of goodwill related to the Forward Air, FASI and TQI segments was \$37.9 million, \$5.4 million and \$45.1 million, respectively. In accordance with our accounting policy, we conducted our annual impairment assessments and tests of goodwill for each reporting unit as of June 30, 2013 and no impairment charges were required.

Results of Operations

The following table sets forth our consolidated historical financial data for the three months ended September 30, 2013 and 2012 (in millions):

	Three months ended				
	September 30, 2013	September 30, 2012	Change	Percent Change

Three Months Ended September 30, 2013 compared to Three Months Ended September 30, 2012

Revenues

Operating revenue increased by \$26.5 million, or 18.5%, to \$170.0 million for the three months ended September 30, 2013 from \$143.5 million in the same period of 2012.

Forward Air

Forward Air operating revenue increased \$4.3 million, or 3.5%, to \$128.8 million from \$124.5 million, accounting for 75.8% of consolidated operating revenue for the three months ended September 30, 2013 compared to 86.8% for the same period in 2012. Airport-to-airport revenue, which is the largest component of our consolidated operating revenue, increased \$4.2 million, or 4.3%, to \$101.2 million from \$97.0 million, accounting for 78.6% of the segment's operating revenue during the three months ended September 30, 2013 compared to 77.9% during the three months ended September 30, 2012. The increase in revenue was attributable to higher tonnage net of reductions in linehaul pricing and increased Complete and net fuel surcharge revenues. A 5.5% increase in tonnage, net of a 1.0% decrease in our base revenue per pound, excluding net fuel surcharge revenue and Complete revenue, accounted for \$3.3 million of the increase in airport-to-airport revenue. Average base revenue per pound decreased mainly due to passing the anniversary date of our last general rate increase. The remaining increase in airport-to-airport revenue is the result of higher net fuel surcharge revenue and revenue from our Complete pick-up and delivery service. Complete revenue increased \$0.2 million, or 1.6%, during the three months ended September 30, 2013 compared to the same period of 2012. The increase in Complete revenue was attributable to improved shipping volumes in our airport-to-airport network, net of a reduction in the attachment rate of Complete activity to linehaul shipments. Net fuel surcharge revenue increased \$0.7 million and 8.2% during the three months ended September 30, 2013 compared to the same period in 2012. Net fuel surcharge revenue increased largely on improved airport-to-airport tonnage volumes.

Logistics revenue, which is primarily TLX, decreased \$0.5 million, or 2.4%, to \$20.4 million in the third quarter of 2013 from \$20.9 million in the same period of 2012. The \$0.5 million decrease in logistics revenue was attributable declines in our non-mileage based services, primarily drayage, due to the loss of a customer. TLX revenue remained

flat during the three months ended September 30, 2013, compared to the same period in 2012, as a 2.0% reduction in miles driven to support TLX revenue was mostly offset by a 1.8% increase in TLX's average revenue per mile.

Other revenue, which includes warehousing services and terminal handling, accounted for the final component of Forward Air operating revenue. Other revenue increased \$0.6 million, or 9.1%, to \$7.2 million in the third quarter of 2013 from \$6.6 million in the same period of 2012. The increase in revenue was mainly attributable to container handling services performed at certain terminals.

Table of Contents

FASI

FASI operating revenue increased \$10.3 million, or 52.8%, to \$29.8 million for the three months ended September 30, 2013 from \$19.5 million for the same period in 2012. The increase in revenue was attributable to new business wins, primarily from two new customers for which the new revenue streams began during the fourth quarter of 2012, February 2013 and April 2013. In order to service this new business FASI opened three new agent stations and two new service centers.

TQI

TQI operating revenue of \$12.4 million represents temperature-controlled truckload and less-than-truckload services provided during the three months ended September 30, 2013.

Intercompany Eliminations

Intercompany eliminations increased \$0.5 million, or 100.0%, to \$1.0 million in the third quarter of 2013 from \$0.5 million in the same period of 2012. The intercompany eliminations are the result of truckload, airport-to-airport, and handling services Forward Air provided to FASI, truckload services Forward Air provided to TQI and FASI cartage and handling services provided to Forward Air during the three months ended September 30, 2013 and 2012.

Purchased Transportation

Purchased transportation increased by \$12.1 million, or 19.2%, to \$75.2 million in the third quarter of 2013 from \$63.1 million in the same period of 2012. As a percentage of total operating revenue, purchased transportation was 44.2% during the three months ended September 30, 2013 compared to 44.0% for the same period of 2012.

Forward Air

Forward Air's purchased transportation increased by \$1.8 million, or 3.1%, to \$59.9 million for the three months ended September 30, 2013 from \$58.1 million for the three months ended September 30, 2012. The increase in purchased transportation is primarily attributable to a 3.0% increase in miles driven and a 0.1% increase in the total cost per mile for the third quarter of 2013 versus the same period in 2012. As a percentage of segment operating revenue, Forward Air purchased transportation was 46.5% during the three months ended September 30, 2013 compared to 46.7% for the same period in 2012.

Purchased transportation costs for our airport-to-airport network increased \$2.3 million, or 5.7%, to \$42.6 million for the three months ended September 30, 2013 from \$40.3 million for the three months ended September 30, 2012. For the three months ended September 30, 2013, purchased transportation for our airport-to-airport network increased to 42.1% of airport-to-airport revenue from 41.5% for the same period in 2012. The \$2.3 million increase is mostly attributable to a 5.3% increase in miles driven by our network of owner-operators or third party transportation providers and a 1.8% increase in the cost per mile paid to our network of owner-operators or third party transportation providers. The higher miles increased purchased transportation by \$1.6 million while the higher cost per mile increased purchased transportation by \$0.6 million. Miles driven by our network of owner-operators or third party transportation providers increased in conjunction with the higher business volumes discussed above. The cost per mile increase was attributable to higher utilization of more costly third party transportation providers as opposed to our network of owner-operators. The remaining \$0.1 million increase in airport-to-airport purchased transportation was attributable to increased third party transportation costs associated with the higher Complete revenue discussed above.

Purchased transportation costs for our logistics revenue decreased \$0.7 million, or 4.4%, to \$15.3 million for the three months ended September 30, 2013 from \$16.0 million for the three months ended September 30, 2012. For the three months ended September 30, 2013, logistics' purchased transportation costs represented 75.0% of logistics revenue compared to 76.6% for the same period in 2012. The decrease in logistics' purchased transportation was mostly attributable to a \$0.5 million decrease in TLX purchased transportation. Miles driven to support our TLX revenue decreased 2.0% and our TLX cost per mile decreased 1.5% during the three months ended September 30, 2013 compared to the same period in 2012. Miles driven decreased in conjunction with the lower revenue volumes discussed above and the improvement in cost per mile was mostly attributable to increased utilization of our network of owner-operators as opposed to more costly third party transportation providers. The remaining \$0.2 million decline in logistics purchased transportation was attributable to other non-mileage based costs, such as drayage services. Purchased transportation associated with drayage services does not decline in direct correlation to drayage revenue as part of these services are performed by company-employed drivers, whose costs are included in salaries, wages and benefits.

Table of Contents

Purchased transportation costs related to our other revenue increased \$0.2 million, or 11.1%, to \$2.0 million for the three months ended September 30, 2013 from \$1.8 million for the three months ended September 30, 2012. Other purchased transportation costs as a percentage of other revenue increased to 27.8% of other revenue for the three months ended September 30, 2013 from 27.3% for the same period in 2012. Other purchased transportation increased as a percentage of the associated revenue as certain airport-to-airport linehaul business required the use of local pick-up and delivery services. This new business required us to incur other purchased transportation costs without direct corresponding other revenue.

FASI

FASI purchased transportation increased \$3.7 million, or 68.5%, to \$9.1 million for the three months ended September 30, 2013 from \$5.4 million for the three months ended September 30, 2012. FASI purchased transportation as a percentage of revenue was 30.5% for the three months ended September 30, 2013 compared to 27.7% for the three months ended September 30, 2012. The majority of the increase in FASI purchased transportation as a percentage of revenue was attributable to the new business discussed above having an increased linehaul component which increased the utilization of owner-operators and third-party transportation providers.

TQI

TQI purchased transportation of \$6.9 million, or 55.6% of revenue, represents costs associated with payments to owner-operators, Forward Air and third party transportation providers for services performed during the three months ended September 30, 2013.

Intercompany Eliminations

Intercompany eliminations increased to \$0.7 million for the three months ended September 30, 2013 from \$0.4 million for the same period in 2012. The intercompany eliminations are the result of truckload, airport-to-airport, and handling services Forward Air provided to FASI, truckload services Forward Air provided to TQI and FASI cartage and handling services provided to Forward Air during the three months ended September 30, 2013.

Salaries, Wages, and Benefits

Salaries, wages and employee benefits increased by \$7.4 million, or 23.3%, to \$39.1 million in the third quarter of 2013 from \$31.7 million in the same period of 2012. As a percentage of total operating revenue, salaries, wages and employee benefits was 23.0% during the three months ended September 30, 2013 compared to 22.1% for the same period in 2012.

Forward Air

Salaries, wages and employee benefits of Forward Air increased by \$3.0 million, or 12.3%, to \$27.3 million in the third quarter of 2013 from \$24.3 million in the same period of 2012. Salaries, wages and employee benefits were 21.2% of Forward Air's operating revenue in the third quarter of 2013 compared to 19.5% for the same period of 2012. The increase in salaries, wages and employee benefits in total dollars and as a percentage of revenue was mainly due to health insurance expenses and increased incentives. Health insurance expenses increased \$1.0 million, or 0.7% as a percentage of revenue, for the three months ended September 30, 2013 compared to the same period in 2012. The increase was largely driven by increased claim activity for the three months ended September 30, 2013 compared to the same period in 2012. Accruals for employee incentives increased approximately \$0.4 million, or 0.3% as a percentage of revenue, as incentives were increased in conjunction with Forward Air meeting certain third

quarter performance goals. Also, employee wages increased \$1.5 million, or 0.7% as a percentage of revenue, in conjunction with the increased tonnage and revenue volumes discussed previously. The increase in employee wages as a percentage of revenue is largely due to 2013 cost of living adjustments and merit pay increases implemented in the fourth quarter of 2012.

FASI

FASI salaries, wages and employee benefits increased \$2.6 million, or 35.1%, to \$10.0 million for the three months ended September 30, 2013 compared to \$7.4 million for the three months ended September 30, 2012. As a percentage of FASI operating revenue, salaries, wages and benefits decreased to 33.6% for the three months ended September 30, 2013 compared to 37.9% for the same period in 2012. The increase in salaries, wages and employee benefits in total dollars is largely due to higher wages and benefits which grew in conjunction with the revenue volume increases discussed previously. The decline as a percentage of revenue is largely attributable to improved terminal efficiency and leverage on fixed salaries and benefits as a result of the higher revenue volumes discussed above.

Table of Contents

TQI

TQI salaries, wages and employee benefits were \$1.8 million, or 14.5% of revenue, for the three months ended September 30, 2013, and represent salaries and wages for company-employed drivers, other operations personnel and TQI management.

Operating Leases

Operating leases increased \$0.1 million, or 1.4%, to \$7.0 million for the three months ended September 30, 2013 from \$6.9 million for the same period in 2012. Operating leases, the largest component of which is facility rent, were 4.1% of consolidated operating revenue for the three months ended September 30, 2013 compared with 4.8% in the same period of 2012.

Forward Air

Operating leases decreased \$0.3 million, or 5.8%, to \$4.9 million for the three months ended September 30, 2013 from \$5.2 million for the same period in 2012. Operating leases were 3.8% of Forward Air operating revenue for the three months ended September 30, 2013 compared with 4.2% in the same period of 2012. The decrease in total dollars is attributable to reduced trailer rentals in conjunction with the acquisition of new trailers during 2013. The decrease as a percentage of revenue is attributable to the reduction in trailer rentals combined with increased Forward Air revenue for the three months end September 30, 2013 compared to the same period in 2012.

FASI

Operating leases increased \$0.4 million, or 23.5%, to \$2.1 million for the three months ended September 30, 2013 from \$1.7 million for the same period in 2012. Operating leases were 7.0% of FASI operating revenue for the three months ended September 30, 2013 compared with 8.7% in the same period of 2012. The decrease as a percentage of revenue is attributable to the increase in FASI revenue for the three months end September 30, 2013 compared to the same period in 2012. The increase in total dollars was attributable to a \$0.4 million increase in truck rentals associated with the increased revenue volumes discussed previously. FASI facility leases did not increase as new locations opened in conjunction with the new business were either agent stations or service centers operated within a customer's facility.

TQI

TQI incurred less than \$0.1 million for operating leases as the only on-going lease activity is for the TQI corporate headquarters.

Depreciation and Amortization

Depreciation and amortization increased \$0.7 million, or 12.7%, to \$6.2 million for the three months ended September 30, 2013 from \$5.5 million for the same period in 2012. Depreciation and amortization was 3.7% of consolidated operating revenue for the three months ended September 30, 2013 compared with 3.8% for the same period in 2012.

Forward Air

Depreciation and amortization decreased \$0.1 million, or 2.3%, to \$4.2 million in the third quarter of 2013 from \$4.3 million in the same period of 2012. Depreciation and amortization expense as a percentage of Forward Air operating revenue was 3.3% in the third quarter of 2013 compared to 3.4% in the same period of 2012. The decrease is primarily attributable to older equipment becoming fully depreciated, partially offset by depreciation on newly acquired trailers and other equipment and improvements.

FASI

FASI depreciation and amortization increased \$0.1 million, or 8.3%, to \$1.3 million for the three months ended September 30, 2013 from \$1.2 million for the same period of 2012. Depreciation and amortization expense as a percentage of FASI operating revenue was 4.4% in the third quarter of 2013 compared to 6.2% in the same period of 2012. The increase in FASI depreciation is attributable to new tractors purchased to replace aging fully depreciated equipment.

TQI

TQI depreciation and amortization of \$0.7 million, or 5.7% of revenue, represents \$0.3 million of depreciation on acquired equipment and \$0.4 million of amortization on acquired intangible assets.

Table of Contents

Insurance and Claims

Insurance and claims expense increased \$0.2 million, or 6.5%, to \$3.3 million for the three months ended September 30, 2013 from \$3.1 million for the three months ended September 30, 2012. Insurance and claims were 1.9% of consolidated operating revenue for the three months ended September 30, 2013 compared with 2.1% for the same period in 2012.

Forward Air

Forward Air insurance and claims expense decreased \$0.3 million, or 11.5%, to \$2.3 million for the three months ended September 30, 2013 from \$2.6 million for the three months ended September 30, 2012. The decrease in Forward Air insurance and claims was driven by a \$0.3 million decrease in cargo claims. The three months ended September 30, 2012 included unusually large claims for which no similar claims re-occurred in the current period.

FASI

FASI insurance and claims expense increased \$0.3 million, or 60.0%, to \$0.8 million for the three months ended September 30, 2013 from \$0.5 million for the three months ended September 30, 2012. FASI insurance and claims were of 2.7% operating revenue for the three months ended September 30, 2013 compared with 2.6% for the same period in 2012. The increase in FASI insurance and claims was attributable a \$0.2 million increase in cargo claims and a \$0.1 million increase in vehicle accident damage repairs.

TQI

TQI insurance and claims of \$0.2 million, or 1.6% of revenue, represents \$0.1 million of insurance premiums and \$0.1 million of vehicle accident damage repairs.

Fuel Expense

Fuel expense increased \$1.6 million, or 69.6%, to \$3.9 million in the third quarter of 2013 from \$2.3 million in the same period of 2012. Fuel expense was 2.3% of consolidated operating revenue for the three months ended September 30, 2013 compared with 1.6% for the same period in 2012.

Forward Air

Fuel expense decreased \$0.1 million, or 10.0%, to \$0.9 million in the third quarter of 2013 from \$1.0 million for the same period in 2012. Fuel expense was 0.7% of Forward Air operating revenue in the third quarter of 2013 compared with 0.8% in the same period of 2012. Decrease was attributable to a decline in miles driven by company-employed drivers.

FASI

FASI fuel expense increased \$0.4 million, or 30.8%, to \$1.7 million for the third quarter of 2013 from \$1.3 million in the same period of 2012. Fuel expenses were 5.7% of FASI operating revenue in the third quarter of 2013 compared to 6.7% in the third quarter of 2012. FASI fuel expenses grew on increased mileage associated with the higher revenue volumes partially offset by lower comparative period fuel prices and increased utilization of owner-operators and third party transportation providers as opposed to company-owned or leased equipment.

TQI

TQI fuel expense was \$1.3 million, or 10.5% of revenue, and represents fuel expense incurred during the three months ended September 30, 2013. TQI fuel expense is significantly higher as a percentage of operating revenue than Forward Air and FASI's fuel expense, as TQI utilizes a higher ratio of company-employed drivers and company-owned vehicles in its operations.

Other Operating Expenses

Other operating expenses increased \$1.1 million, or 9.7%, to \$12.4 million in the third quarter of 2013 from \$11.3 million in the same period of 2012. Other operating expenses were 7.3% of consolidated operating revenue for the three months ended September 30, 2013 compared with 7.9% in the same period of 2012.

Table of Contents

Forward Air

Other operating expenses decreased \$1.0 million, or 10.3%, to \$8.7 million during the three months ended September 30, 2013 from \$9.7 million in the same period of 2012. Other operating expenses were 6.7% of Forward Air operating revenue in the third quarter of 2013 compared to 7.8% in the same period of 2012. The decrease in other operating expenses and in total dollars and as a percentage of revenue is mostly attributable to reduced sales and marketing expenses and a higher gain on the sale of assets. Sales and marketing expenses decreased \$0.4 million as the three months ended September 30, 2012 included expenses for a customer marketing event, while no similar event took place during the three months ended September 30, 2013. During the third quarter of 2013, operating expenses were reduced by a \$0.2 million gain on the sale of trailers, but the three months ended September 30, 2012 included a \$0.1 million loss on the sale of used equipment. The remaining decrease is primarily attributable to reduced facility maintenance costs offset by increased variable spend for vehicle maintenance and related costs in conjunction with increased business volumes discussed previously.

FASI

FASI other operating expenses increased \$1.7 million, or 100.0%, to \$3.4 million for the three months ended September 30, 2013 compared to \$1.7 million for the same period in 2012. FASI other operating expenses for the third quarter of 2013 were 11.4% of the segment's operating revenue compared to 8.7% for the same period in 2012. The increase in FASI's other operating expenses as a percentage of revenue and in terms of total dollars, was mostly driven by a \$1.4 million increase in agent station costs. As noted above, we opened additional agent stations to service the new business initiated during February and April 2013. The remaining \$0.3 million increase is attributable to higher variable terminal and maintenance costs in conjunction with the increased revenue volumes discussed previously.

TQI

TQI other operating expenses were \$0.6 million, or 4.8% of revenue, and represent costs such as vehicle maintenance and miscellaneous office and administrative expenses incurred during the three months ended September 30, 2013.

Intercompany Eliminations

Intercompany eliminations increased by \$0.2 million, or 200.0%, to \$0.3 million for the third quarter of 2013 compared to \$0.1 million for the same period of 2012. These intercompany eliminations are the result of handling services Forward Air and FASI provided each other during the three months ended September 30, 2013 and 2012.

Results from Operations

Income from operations increased by \$3.3 million, or 16.8%, to \$22.9 million for the third quarter of 2013 compared to \$19.6 million in the same period of 2012. Income from operations was 13.5% of consolidated operating revenue for the three months ended September 30, 2013 compared with 13.7% in the same period of 2012.

Forward Air

Income from operations increased by \$1.3 million, or 6.7%, to \$20.6 million for the third quarter of 2013 compared with \$19.3 million for the same period in 2012. Income from operations as a percentage of Forward Air operating revenue was 16.0% for the three months ended September 30, 2013 compared with 15.5% in the same period of 2012. The improvement in income from operations was primarily the result of increased airport-to-airport business

volumes and improved cost control performance in most expense categories, net of increases in salaries, wages and benefits primarily for health insurance and incentives.

FASI

FASI's income from operations increased \$1.1 million to \$1.4 million for the three months ended September 30, 2013 from \$0.3 million during the three months ended September 30, 2012. The improvement in operating performance is largely attributable to the significant increase in revenue during the three months ended September 30, 2013 compared to the same period in 2012.

TQI

TQI income from operations was \$0.9 million, or 7.3% of revenue, for the three months ended September 30, 2013.

Table of Contents

Interest Expense

Interest expense was \$0.1 million for the three months ended September 30, 2013 and 2012.

Income Taxes

The combined federal and state effective tax rate for the third quarter of 2013 was 37.6% compared to a rate of 37.1% for the same period in 2012. The increase in our effective tax rate was primarily due to the timing of disqualified dispositions by employees of previously non-deductible incentive stock options.

Net Income

As a result of the foregoing factors, net income increased by \$1.9 million, or 15.4%, to \$14.2 million for the third quarter of 2013 compared to \$12.3 million for the same period in 2012.

Results of Operations

The following table sets forth our consolidated historical financial data for the nine months ended September 30, 2013 and 2012 (in millions):

	Nine months ended				
	September 30, 2013	September 30, 2012	Change	Percent Change	%
Operating revenue	\$471.4	\$428.9	\$42.5	9.9	%

Nine Months Ended September 30, 2013 compared to Nine Months Ended September 30, 2012

Revenues

Operating revenue increased by \$42.5 million, or 9.9%, to \$471.4 million for the nine months ended September 30, 2013 from \$428.9 million in the same period of 2012.

Forward Air

Forward Air operating revenue decreased \$4.4 million, or 1.2%, to \$369.0 million from \$373.4 million, accounting for 78.3% of consolidated operating revenue for the nine months ended September 30, 2013 compared to 87.1% for the same period in 2012. Airport-to-airport revenue, which is the largest component of our consolidated operating revenue, decreased \$1.2 million, or 0.4%, to \$289.2 million from \$290.4 million, accounting for 78.4% of the segment's operating revenue during the nine months ended September 30, 2013 compared to 77.8% for the same period in 2012. The decline in airport-to-airport revenue was driven by reduced revenue from our Complete pick up and delivery services. Complete revenue decreased \$1.9 million, or 4.7%, during the nine months ended September 30, 2013 compared to the same period of 2012. The decrease in Complete revenue is attributable lower customer utilization of our Complete service due to the loss of a customer and the reduction in airport-to-airport tonnage volumes. The decline in Complete revenue was partially offset by increased airport-to airport linehaul and associated fuel surcharge revenues. Airport-to-airport linehaul revenue increased \$0.3 million, or 0.1%, as a 0.3% increase in average revenue per pound, excluding net fuel surcharge revenue and Complete revenue, was partially offset by a 0.2% decrease in tonnage that transited our network. Average base revenue per pound increased as a result of a general rate increase we implemented in September 2012, partially offset by pricing pressures experienced during the 2013. Net fuel surcharge revenue increased \$0.4 million, or 1.7%, during the nine months ended September 30, 2013 as compared to the nine months ended September 30, 2012 in response to increased fuel prices.

Logistics revenue, which is primarily TLX, decreased \$3.8 million, or 6.0%, to \$59.6 million for the nine months ended September 30, 2013 from \$63.4 million in the same period of 2012. TLX revenue, which is priced on a per

mile basis, decreased \$2.5 million, or 4.4%, on decreases in TLX miles and average revenue per mile. Miles driven to support our TLX revenue decreased by approximately 4.0% during the nine months ended September 30, 2013 compared to the same period in 2012 and TLX average revenue per mile also decreased by 0.4% during the nine months ended September 30, 2013 as compared to the same period in 2012. The decrease in miles is mainly attributable to a customer loss in April 2012 and reduced shipping volumes during the first half of 2013. The remaining \$1.3 million decrease in logistics revenue was attributable to reductions in various other non-mileage based logistic revenues, such as drayage services, which declined due to a customer loss and in conjunction with the overall decrease in TLX business volumes.

Table of Contents

Other revenue, which includes warehousing services and terminal handling, accounted for the final component of Forward Air operating revenue. Other revenue increased \$0.6 million, or 3.1%, to \$20.2 million during the nine months ended September 30, 2013 from \$19.6 million in the same period of 2012. The increase in revenue was mainly attributable to container handling services performed at certain terminals.

FASI

FASI operating revenue increased \$19.4 million, or 34.0%, to \$76.4 million for the nine months ended September 30, 2013 from \$57.0 million for the same period in 2012. The increase in revenue was attributable to new business wins, primarily from two new customers that were initiated during the fourth quarter of 2012, February 2013 and April 2013. In order to service this new business FASI opened three new agent stations and two new service centers.

TQI

TQI operating revenue of \$28.5 million represents temperature-controlled truckload and less-than-truckload services provided from the acquisition date of March 4, 2013 through September 30, 2013.

Intercompany Eliminations

Intercompany eliminations increased \$1.0 million, or 66.7%, to \$2.5 million for the nine months ended September 30, 2013 from \$1.5 million in the same period of 2012. The intercompany eliminations are the result of truckload, airport-to-airport, and handling services Forward Air provided to FASI, truckload services Forward Air provided to TQI and FASI cartage and handling services provided to Forward Air during the nine months ended September 30, 2013 and 2012.

Purchased Transportation

Purchased transportation increased by \$19.0 million, or 10.1%, to \$206.5 million for the nine months ended September 30, 2013 from \$187.5 million in the same period of 2012. As a percentage of total operating revenue, purchased transportation was 43.8% during the nine months ended September 30, 2013 compared to 43.7% for the nine months ended September 30, 2012.

Forward Air

Forward Air's purchased transportation decreased by \$4.4 million, or 2.5%, to \$168.9 million for the nine months ended September 30, 2013 from \$173.3 million for the nine months ended September 30, 2012. The decrease in purchased transportation is primarily attributable to a 0.5% reduction in miles driven and a 2.0% decrease in the total cost per mile for the nine months ended September 30, 2013 versus the same period in 2012. As a percentage of segment operating revenue, Forward Air purchased transportation was 45.8% during the nine months ended September 30, 2013 compared to 46.4% for the same period in 2012.

Purchased transportation costs for our airport-to-airport network decreased \$1.1 million, or 0.9%, to \$119.0 million for the nine months ended September 30, 2013 from \$120.1 million for the nine months ended September 30, 2012. For the nine months ended September 30, 2013, purchased transportation for our airport-to-airport network declined to 41.1% of airport-to-airport revenue from 41.4% for the same period in 2012. The decline in airport-to-airport purchased transportation was mostly attributable to a \$1.6 million decline in third party transportation costs associated with the lower Complete shipment volumes discussed above. The decline in Complete purchased transportation was partially offset by a \$0.5 million increase in airport-to-airport linehaul costs. The \$0.5

million increase in airport-to-airport linehaul costs was attributable to a 1.2% increase in linehaul miles driven by our network of owner-operators or third party transportation providers, partially offset by 0.6% decline in the average cost per mile paid to our network of owner-operators or third party transportation providers. The increase in miles increased purchased transportation by \$1.1 million while the lower cost per mile decreased purchased transportation by \$0.6 million. Miles driven by our network of owner-operators or third party transportation providers increased in conjunction with the higher business volumes during the third quarter of 2013. The cost per mile decrease was attributable to lower rates per mile charged from third party transportation providers for most of 2013.

Purchased transportation costs for our logistics revenue decreased \$3.8 million, or 7.9%, to \$44.2 million for the nine months ended September 30, 2013 from \$48.0 million for the nine months ended September 30, 2012. For the nine months ended September 30, 2013, logistics' purchased transportation costs represented 74.2% of logistics revenue compared to 75.7% for the same period in 2012. The reduction in logistics' purchased transportation was mostly attributable to a \$3.1 million, or 7.0%, decrease in TLX purchased transportation. Miles driven to support our TLX revenue decreased 4.0% while our TLX cost per mile decreased approximately 3.0% during the nine months ended September 30, 2013 compared to the same period in 2012. Miles driven decreased in conjunction with the revenue volumes discussed above and the improvement in cost per mile was mostly

Table of Contents

attributable to lower average rates per mile charged from third party transportation providers. The remaining \$0.7 million decline in logistics purchased transportation was attributable to other non-mileage based costs, such as drayage services.

Purchased transportation costs related to our other revenue increased \$0.5 million, or 9.6%, to \$5.7 million for the nine months ended September 30, 2013 from \$5.2 million for the nine months ended September 30, 2012. Other purchased transportation costs as a percentage of other revenue increased to 28.2% of other revenue for the nine months ended September 30, 2013 from 26.5% for the same period in 2012. Other purchased transportation increased as a percentage of the associated revenue as certain airport-to-airport linehaul business required the use of local pick-up and delivery services. This new business required us to incur other purchased transportation costs without direct corresponding other revenue.

FASI

FASI purchased transportation increased \$8.1 million, or 52.3%, to \$23.6 million for the nine months ended September 30, 2013 from \$15.5 million for the nine months ended September 30, 2012. FASI purchased transportation as a percentage of revenue was 30.9% for the nine months ended September 30, 2013 compared to 27.2% for the nine months ended September 30, 2012. Approximately 80.0% of the increase in FASI purchased transportation as a percentage of revenue was attributable to the new business discussed above having an increased linehaul component which increased the utilization of owner-operators and third-party transportation providers. The remaining increase was attributable to higher utilization of more costly third party transportation providers in our terminal pick up and delivery operations due to the increased volumes from the new customer business discussed above.

TQI

TQI purchased transportation of \$15.9 million, or 55.8% of revenue, represents costs associated with payments to owner operators, Forward Air and third party transportation providers for services performed from the acquisition date of March 4, 2013 through September 30, 2013.

Intercompany Eliminations

Intercompany eliminations increased \$0.6 million, or 46.2%, to \$1.9 million for the nine months ended September 30, 2013 from \$1.3 million for the nine months ended September 30, 2012. The intercompany eliminations are the result of truckload, airport-to-airport, and handling services Forward Air provided to FASI, truckload services Forward Air provided to TQI and FASI cartage and handling services provided to Forward Air during the nine months ended September 30, 2013.

Salaries, Wages, and Benefits

Salaries, wages and employee benefits increased by \$11.8 million, or 12.1%, to \$109.2 million for the nine months ended September 30, 2013 from \$97.4 million in the same period of 2012. As a percentage of total operating revenue, salaries, wages and employee benefits was 23.2% during the nine months ended September 30, 2013 compared to 22.7% for the same period in 2012.

Forward Air

Salaries, wages and employee benefits of Forward Air increased by \$2.6 million, or 3.4%, to \$78.0 million for the nine months ended September 30, 2013 from \$75.4 million in the same period of 2012. Salaries, wages and employee benefits were 21.1% of Forward Air's operating revenue in the nine months ended September 30, 2013 compared to 20.2% for the same period of 2012. The increase in salaries, wages and employee benefits in total dollars was mainly due to increased health insurance and workers' compensation expenses and higher wages and benefits paid to employees, net of reductions in employee incentives. Health insurance and workers' compensation expenses increased \$2.6 million for the nine months ended September 30, 2013 compared to the same period in 2012. The increase was largely driven by increased health insurance claims during the nine months ended September 30, 2013, and favorable claim development in the second quarter of 2012 identified in our semi-annual actuarial review. A similar favorable development did not recur in 2013. Wages and benefits paid to employees increased \$1.8 million, or 2.9%, mainly as a result of 2013 cost of living increases and 2012 merit pay increases. Accruals for employee incentives decreased approximately \$1.8 million as incentives were reduced in conjunction with Forward Air not meeting earnings and performance goals.

Table of Contents

FASI

FASI salaries, wages and employee benefits increased \$4.8 million, or 21.8%, to \$26.8 million for the nine months ended September 30, 2013 compared to \$22.0 million for the nine months ended September 30, 2012. As a percentage of FASI operating revenue, salaries, wages and benefits decreased to 35.1% for the nine months ended September 30, 2013 compared to 38.6% for the same period in 2012. The increase in salaries, wages and employee benefits in total dollars is largely due to the increase in wages and benefits which increased in conjunction with the higher revenue volumes discussed previously. The decline as a percentage of revenue is largely attributable to improved terminal efficiency during the third quarter of 2013 and leverage on fixed salaries and benefits as a result of the increased revenue volumes discussed above.

Despite the improvement as percentage of revenue FASI salaries, wages and benefits were adversely impacted by the new business start up in late February 2013. Due to the anticipated volumes from the new business, FASI maintained higher headcount, primarily of driver personnel, during January and February which resulted in approximately \$0.1 million of additional costs during the first quarter of 2013.

TQI

TQI salaries, wages and employee benefits were \$4.4 million, or 15.4% of revenue, for the nine months ended September 30, 2013, and represent salaries, wages and benefits for company-employed drivers, other operations personnel and TQI management since the acquisition on March 4, 2013 through September 30, 2013.

Operating Leases

Operating leases increased by \$0.1 million, or 0.5%, to \$20.9 million for the nine months ended September 30, 2013 from \$20.8 million in the same period of 2012. Operating leases, the largest component of which is facility rent, were 4.4% of consolidated operating revenue for the nine months ended September 30, 2013 compared with 4.9% in the same period of 2012.

Forward Air

Operating leases decreased \$0.4 million, or 2.6%, to \$14.9 million for the nine months ended September 30, 2013 from \$15.3 million for the same period in 2012. Operating leases were 4.0% of Forward Air operating revenue for the nine months ended September 30, 2013 compared with 4.1% in the same period of 2012. The decrease in total dollars is attributable to reduced trailer rentals in conjunction with the decline in Forward Air revenue in the first half of 2013 and new trailers purchased during 2013.

FASI

FASI operating lease expense increased \$0.4 million, or 7.3%, to \$5.9 million for the nine months ended September 30, 2013 from \$5.5 million for the same period in 2012. Operating leases were 7.7% of FASI operating revenue for the nine months ended September 30, 2013 compared with 9.7% in the same period of 2012. The increase in total dollars was attributable to \$0.7 million increase for additional trailer and truck leases and rentals due to the increased revenue volumes discussed previously. However, these additional trailer and tractor costs were partially offset by a \$0.3 million decline in facility rentals as we relocated certain facilities to less costly facilities in the second half of 2012. Further, FASI facility lease expense did not increase for the new locations opened in conjunction with the new business, as the new locations were either agent stations or service centers operated within a customer's facility.

TQI

Operating lease expense for TQI was \$0.1 million for the nine months ended September 30, 2013, as currently TQI does not utilize leased or rented equipment and only leases one facility for its administrative offices.

Depreciation and Amortization

Depreciation and amortization increased \$1.4 million, or 8.8%, to \$17.4 million for the nine months ended September 30, 2013 from \$16.0 million for the same period in 2012. Depreciation and amortization was 3.7% of consolidated operating revenue for the nine months ended September 30, 2013 and 2012.

Table of Contents

Forward Air

Depreciation and amortization decreased \$0.4 million, or 3.2%, to \$12.1 million for the nine months ended September 30, 2013 from \$12.5 million for the same period in 2012. Depreciation and amortization expense as a percentage of Forward Air operating revenue was 3.3% for the nine months ended September 30, 2013 compared to 3.4% for the nine months ended September 30, 2012. The decrease is primarily attributable to older trailers becoming fully depreciated during 2012. These older trailers were sold and replaced with new trailers throughout 2013.

FASI

FASI depreciation and amortization increased \$0.1 million, or 2.9%, to \$3.6 million for the nine months ended September 30, 2013 from \$3.5 million for the same period in 2012. Depreciation and amortization expense as a percentage of FASI operating revenue was 4.7% in the nine months ended September 30, 2013 compared to 6.1% in the same period of 2012. The increase in FASI depreciation is attributable to new tractors purchased to replace aging fully depreciated equipment.

TQI

TQI depreciation and amortization of \$1.7 million, or 6.0% of revenue, represents \$0.6 million of depreciation on acquired equipment and \$1.1 million of amortization on acquired intangible assets since the acquisition of TQI on March 4, 2013.

Insurance and Claims

Insurance and claims expense increased \$1.1 million, or 13.6%, to \$9.2 million for the nine months ended September 30, 2013 from \$8.1 million for the nine months ended September 30, 2012. Insurance and claims were 1.9% of consolidated operating revenue for the nine months ended September 30, 2013 and 2012.

Forward Air

Forward Air insurance and claims expense increased \$0.1 million, or 1.6%, to \$6.5 million for the nine months ended September 30, 2013 from \$6.4 million for the nine months ended September 30, 2012. The increase in Forward Air insurance and claims was driven by a \$0.6 million increase in insurance premiums and vehicle loss reserves and a \$0.4 million increase in vehicle accident repairs. These increases were partially offset by a \$0.3 million decrease in professional fees associated with litigating vehicle accident claims and a \$0.6 million decline in cargo claims. The increase in insurance premiums and vehicle loss reserves was mostly attributable to 2012 being reduced by a \$0.4 million loss development reserve reduction. During the nine months ended September 30, 2012, our mid year actuary analysis of vehicle claims allowed us to record a \$0.4 million reduction of our vehicle loss development reserves. The 2013 mid year actuary analysis did not result in a similar adjustment.

FASI

FASI insurance and claims expense increased \$0.6 million, or 35.3%, to \$2.3 million for the nine months ended September 30, 2013 from \$1.7 million for the nine months ended September 30, 2012. FASI insurance and claims were 3.0% of FASI operating revenue for the nine months ended September 30, 2013 and 2012. The increase in FASI insurance and claims was largely attributable to a \$0.2 million increase in cargo claims, a \$0.2 million increase in vehicle damage and a \$0.2 million increase in reserves for vehicle accidents.

TQI

TQI insurance and claims of \$0.4 million, or 1.4% of revenue, includes \$0.3 million for insurance premiums and \$0.1 million of vehicle accident repairs since the TQI acquisition on March 4, 2013 through September 30, 2013.

Fuel Expense

Fuel expense increased \$3.2 million, or 43.8%, to \$10.5 million for the nine months ended September 30, 2013 from \$7.3 million in the same period of 2012. Fuel expense was 2.2% of consolidated operating revenue for the nine months ended September 30, 2013 compared with 1.7% for the same period in 2012.

Table of Contents

Forward Air

Fuel expense decreased \$0.3 million, or 9.4%, to \$2.9 million in the nine months ended September 30, 2013 from \$3.2 million in the same period of 2012. Fuel expense was 0.8% of Forward Air operating revenue in the nine months ended September 30, 2013 and 0.9% for the same period of 2012. The decrease in fuel expense resulted from reduced mileage in conjunction with lower shipping volumes in the first half of 2013.

FASI

FASI fuel expense increased \$0.7 million, or 17.1%, to \$4.8 million in the nine months ended September 30, 2013 from \$4.1 million in the same period of 2012. Fuel expenses were 6.3% of FASI operating revenue in the nine months ended September 30, 2013 compared to 7.2% in the same period in 2012. The increase in FASI fuel expense was mostly the result of increased company mileage associated with the higher business volumes discussed previously partially offset by increased usage of owner-operators and third party carriers and lower fuel prices during most of 2013.

TQI

TQI fuel expense was \$2.8 million, or 9.8% of revenue, and represents fuel expense incurred since the acquisition of TQI on March 4, 2013 through September 30, 2013. TQI fuel expense is significantly higher as a percentage of operating revenue than Forward Air and FASI's fuel expense, as TQI utilizes a higher ratio of company-employed drivers and company-owned vehicles in its operations.

Other Operating Expenses

Other operating expenses increased \$4.3 million, or 13.3%, to \$36.6 million for the nine months ended September 30, 2013 from \$32.3 million in the same period of 2012. Other operating expenses were 7.8% of consolidated operating revenue for the nine months ended September 30, 2013 compared with 7.5% in the same period of 2012.

Forward Air

Other operating expenses decreased \$0.5 million, or 1.8%, to \$26.9 million during the nine months ended September 30, 2013 from \$27.4 million in the same period of 2012. Other operating expenses were 7.3% of Forward Air operating revenue for the nine months ended September 30, 2013 and 2012. The decrease in other operating expenses was mostly attributable to a \$0.7 million increase in the gain on the sale of assets and reduced variable terminal and maintenance expenses associated with the reduced business volumes experienced during the first half of 2013. These decreases were partially offset by \$0.9 million of transaction costs incurred for the acquisition of TQI.

FASI

FASI other operating expenses increased \$3.9 million, or 76.5%, to \$9.0 million for the nine months ended September 30, 2013 compared to \$5.1 million for the same period in 2012. FASI other operating expenses for the nine months ended September 30, 2013 were 11.8% of the segment's operating revenue compared to 8.9% for the same period in 2012. The increase in FASI's other operating expenses as a percentage of revenue and in terms of total dollars, was driven by a \$2.8 million increase in agent station costs. As noted above, we opened additional agent stations to service the new business initiated during February and April 2013. The remaining increase is attributable to higher variable terminal and maintenance costs which increased in conjunction with the revenue volumes discussed previously.

TQI

TQI other operating expenses were \$1.3 million, or 4.5% of revenue, and represent costs such as vehicle maintenance and miscellaneous office and administrative expenses incurred since the acquisition of TQI on March 4, 2013 through September 30, 2013.

Intercompany Eliminations

Intercompany eliminations were \$0.6 million for the nine months ended September 30, 2013 compared to \$0.2 million for the same period in 2012. These intercompany eliminations are the result of handling services Forward Air and FASI provided each other during the nine months ended September 30, 2013.

Table of Contents

Results from Operations

Income from operations increased by \$1.6 million, or 2.7%, to \$61.1 million for the nine months ended September 30, 2013 compared to \$59.5 million in the same period of 2012. Income from operations was 13.0% of consolidated operating revenue for the nine months ended September 30, 2013 compared with 13.9% in the same period of 2012.

Forward Air

Income from operations decreased by \$1.1 million, or 1.8%, to \$58.8 million for the nine months ended September 30, 2013 compared with \$59.9 million for the same period in 2012. Income from operations as a percentage of Forward Air operating revenue was 15.9% for the nine months ended September 30, 2013 compared with 16.0% in the same period of 2012. The decline in income from operations was primarily the result of the reduced revenue and increased workers' compensation and health insurance costs.

FASI

FASI's income from operations improved approximately \$0.8 million, or 200.0%, to income of \$0.4 million for the nine months ended September 30, 2013 compared to a \$0.4 million loss for the nine months ended September 30, 2012. The improvement in operating performance is largely attributable to the significant increase in revenue during the nine months ended September 30, 2013 compared to the same period in 2012. Improvements driven by the increased revenue were partially mitigated by start up and integration costs incurred during the first half of 2013.

TQI

TQI income from operations was \$1.9 million, or 6.7% of revenue, since the acquisition of TQI on March 4, 2013 through September 30, 2013.

Interest Expense

Interest expense was \$0.4 million for the nine months ended September 30, 2013 compared to \$0.2 million for the same period of 2012. Increase is primarily a full nine months of fees associated with our line of credit.

Other, net

Other, net of \$0.1 million for the nine months ended September 30, 2013 primarily represents interest income earned on excess cash balances and unrealized gains on trading securities held.

Income Taxes

The combined federal and state effective tax rate for the nine months ended September 30, 2013 was 36.1% compared to a rate of 38.0% for the same period in 2012. The reduction in our effective tax rate was primarily due to the 2013 retroactive reinstatement of alternative fuel tax credits for 2012 and benefits obtained from disqualified dispositions by employees of previously non-deductible incentive stock options.

Net Income

As a result of the foregoing factors, net income increased by \$2.2 million, or 6.0%, to \$38.9 million for the nine months ended September 30, 2013 compared to \$36.7 million for the same period in 2012.

Critical Accounting Policies

Our unaudited condensed consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles (“GAAP”). The preparation of financial statements in accordance with GAAP requires our management to make estimates and assumptions that affect the amounts reported in the unaudited condensed consolidated financial statements and accompanying notes. Our estimates and assumptions are based on historical experience and changes in the business environment. However, actual results may differ from estimates under different conditions, sometimes materially. Critical accounting policies and estimates are defined as those that are both most important to the portrayal of our financial condition and results and require management’s most subjective judgments. A summary of significant accounting policies is disclosed in Note

Table of Contents

1 to the Consolidated Financial Statements included in our 2012 Annual Report on Form 10-K. Our critical accounting policies are further described under the caption “Discussion of Critical Accounting Policies” in Management’s Discussion and Analysis of Financial Condition and Results of Operations in our 2012 Annual Report on Form 10-K.

Valuation of Goodwill

We test our goodwill for impairment annually or more frequently if events or circumstances indicate impairment may exist. Examples of such events or circumstances could include a significant change in business climate or a loss of significant customers. We complete our annual analysis of our reporting units as of the last day of our second quarter, June 30th. We first consider our operating segment and related components in accordance with U.S. GAAP. Goodwill is allocated to reporting units that are expected to benefit from the business combinations generating the goodwill. We have three reporting units - Forward Air, FASI and TQI. In evaluating reporting units, we first assess qualitative factors to determine whether it is more likely than not that the fair value of either of its reporting units is less than its carrying amount, including goodwill. When performing the qualitative assessment, we consider the impact of factors including, but not limited to, macroeconomic and industry conditions, overall financial performance of each reporting unit, litigation and new legislation. If based on the qualitative assessments we believe it is more likely than not that the fair value of either reporting unit is less than the reporting unit's carrying amount, or as periodically deemed appropriate by management, we will prepare an estimation of the respective reporting unit's fair value. If this estimation of fair value indicates that impairment potentially exists, we will then measure the amount of the impairment, if any. Goodwill impairment exists when the calculated implied fair value of goodwill is less than its carrying value.

We determine the fair value of our reporting units based on a combination of a market approach, which considers comparable companies, and the income approach, using a discounted cash flow model. Under the market approach, valuation multiples are derived based on a selection of comparable companies and applied to projected operating data for each reporting unit to arrive at an indication of fair value. Under the income approach, the discounted cash flow model determines fair value based on the present value of management prepared projected cash flows over a specific projection period and a residual value related to future cash flows beyond the projection period. Both values are discounted using a rate which reflects our best estimate of the weighted average cost of capital of a market participant, and is adjusted for appropriate risk factors. We believe the most sensitive estimate used in our income approach is the management prepared projected cash flows. As deemed appropriate by management, we perform sensitivity tests to ensure reductions of the present value of the projected cash flows by at least 10% would not adversely impact the results of the goodwill impairment tests. Historically, we have equally weighted the income and market approaches as we believed the quality and quantity of the collected information were approximately equal.

In 2013, we performed a fair value estimation for each reporting unit. Our 2013 calculations for Forward Air, FASI and TQI indicated that, as of June 30, 2013, the fair value of each reporting unit exceeded their carrying value by approximately 165.0%, 81.0% and 3.0%, respectively. For our 2013 analysis the significant assumptions used for the income approach were 10 years of projected net cash flows and the following discount and long-term growth rates.

	Forward Air	FASI	TQI		
Discount rate	13.5	% 18.0	% 19.0	%	
Long-term growth rate	5.0	% 5.0	% 4.0	%	

These estimates used to calculate the fair value of each reporting unit change from year to year based on operating results, market conditions, and other factors. Changes in these estimates and assumptions could materially affect the determination of the reporting unit's fair value and goodwill impairment for the reporting unit. For example, during the

first quarter of 2009, we determined there were indicators of potential impairment of the goodwill assigned to the FASI segment. This determination was based on the continuing economic recession, declines in current market valuations, FASI operating losses in excess of expectations and reductions of projected net cash flows. As a result, we performed an interim impairment test as of March 31, 2009. Based on the results of the interim impairment test, we concluded that an impairment loss was probable and could be reasonably estimated. Consequently, we recorded a goodwill impairment charge of \$7.0 million related to the FASI segment during the first quarter of 2009.

Liquidity and Capital Resources

We have historically financed our working capital needs, including capital expenditures, with cash flows from operations and borrowings under our bank lines of credit. Net cash provided by operating activities totaled approximately \$60.5 million for the nine months ended September 30, 2013 compared to approximately \$45.7 million for the nine months ended September 30, 2012. The \$14.8 million increase in cash provided by operating activities is mainly attributable to a \$2.6 million increase in net earnings

Table of Contents

after consideration of non-cash items, a \$1.3 million increase in cash collected from accounts receivable and a \$10.9 million decrease in cash used to fund accounts payable and prepaid assets. Improvement in cash used for accounts payable and prepaid assets is largely due to reduced estimated income tax prepayments.

Net cash used in investing activities was approximately \$77.0 million for the nine months ended September 30, 2013 compared with approximately \$19.9 million used in investing activities during the nine months ended September 30, 2012. Investing activities during the nine months ended September 30, 2013 consisted primarily of \$45.3 million used to acquire TQI and capital expenditures of \$33.3 million primarily for new trailers, vehicles and forklifts to replace aging units. The proceeds from disposal of property and equipment during the nine months ended September 30, 2013 and 2012 were primarily from sales of older trailers and vehicles.

Net cash provided by financing activities totaled approximately \$2.9 million for the nine months ended September 30, 2013 compared with \$8.4 million for the nine months ended September 30, 2012. Changes in cash from financing activities are mainly the settlement of the \$20.1 million in debt assumed with the acquisition of TQI, net of a \$17.0 million increase in cash received from the exercise of stock options and the related income tax benefit. Cash from financing for the nine months ended September 30, 2013 and 2012 also included quarterly dividend payments which increased \$2.1 million year over year as during the third quarter of 2012 our Board of the Directors increased the quarterly cash dividend from our historic \$0.07 per share to \$0.10 per share.

In February 2012, we entered into a \$150.0 million credit facility. This facility has a term of five years and matures in February 2017. Interest rates for advances under the facility are LIBOR plus 1.1% based upon covenants related to total indebtedness to earnings (1.3% at September 30, 2013). The agreement contains certain covenants and restrictions related to new indebtedness, investment types and dispositions of property. None of the covenants are expected to significantly affect our operations or ability to pay dividends. No assets are pledged as collateral against the credit facility. As of September 30, 2013, we had no borrowings outstanding under the credit facility. At September 30, 2013, we had utilized \$9.4 million of availability for outstanding letters of credit and had \$140.6 million of available borrowing capacity under this credit facility.

In July 2007, our Board of Directors approved a stock repurchase program (“Repurchase Plan”) for up to two million shares of our common stock. As of September 30, 2013, 815,059 shares remain that may be repurchased under the Repurchase Plan.

During the first and second quarters of 2012, our Board of Directors declared a cash dividend of \$0.07 per share of common stock. During each quarter of 2013 and the third and fourth quarters of 2012, our Board of Directors declared a cash dividend of \$0.10 per share. We expect to continue to pay regular quarterly cash dividends, though each subsequent quarterly dividend is subject to review and approval by our Board of Directors.

We believe that our available cash, investments, expected cash generated from future operations and borrowings under the available senior credit facility will be sufficient to satisfy our anticipated cash needs for at least the next twelve months.

Forward-Looking Statements

This report contains “forward-looking statements,” as defined in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements are statements other than historical information or statements of current condition and relate to future events or our future financial performance. Some forward-looking statements may be identified by use of such terms as “believes,” “anticipates,” “intends,” “plans,” “estimates,” “projects” or “expects.” Such forward-looking statements involve known and unknown risks,

uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. The following is a list of factors, among others, that could cause actual results to differ materially from those contemplated by the forward-looking statements: economic factors such as recessions, inflation, higher interest rates and downturns in customer business cycles, our inability to maintain our historical growth rate because of a decreased volume of freight moving through our network or decreased average revenue per pound of freight moving through our network, increasing competition and pricing pressure, surplus inventories, loss of a major customer, the creditworthiness of our customers and their ability to pay for services rendered, our ability to secure terminal facilities in desirable locations at reasonable rates, the inability of our information systems to handle an increased volume of freight moving through our network, changes in fuel prices, claims for property damage, personal injuries or workers' compensation, employment matters including rising health care costs, enforcement of and changes in governmental regulations, environmental and tax matters, the handling of hazardous materials, the availability and compensation of qualified independent owner-operators and freight handlers needed to serve our transportation needs and our inability to successfully integrate acquisitions. As a result of the foregoing, no assurance can be given as to future financial condition, cash flows or results of operations. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Our exposure to market risk related to our outstanding debt is not significant and has not changed materially since December 31, 2012.

Item 4. Controls and Procedures.

Disclosure Controls and Procedures

We maintain controls and procedures designed to ensure that we are able to collect the information required to be disclosed in the reports we file with the Securities and Exchange Commission (“SEC”), and to process, summarize and disclose this information within the time periods specified in the rules of the SEC. Based on an evaluation of our disclosure controls and procedures as of the end of the period covered by this report conducted by management, with the participation of the Chief Executive Officer and Chief Financial Officer, the Chief Executive Officer and Chief Financial Officer believe that these controls and procedures are effective to ensure that we are able to collect, process and disclose the information we are required to disclose in the reports we file with the SEC within the required time periods.

The SEC's general guidance permits the exclusion of an assessment of the effectiveness of a registrant's disclosure controls and procedures as they relate to its internal controls over financial reporting for an acquired business during the first year following such acquisition, if among other circumstances and factors there is not adequate time between the acquisition date and the date of assessment. As previously disclosed, the Company completed its acquisition of TQI Holdings, Inc. (“TQI”) on March 4, 2013. TQI represents approximately 17.2% percent of the Company's total assets as of September 30, 2013. Management's assessment and conclusion on the effectiveness of the Company's disclosure controls and procedures as of September 30, 2013 excluded an assessment of the internal control over financial reporting of TQI.

Changes in Internal Control

There were no changes in our internal control over financial reporting during the nine months ended September 30, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings.

From time to time, we are a party to ordinary, routine litigation incidental to and arising in the normal course of our business, most of which involve claims for personal injury and property damage related to the transportation and handling of freight, or workers' compensation. We do not believe that any of these pending actions, individually or in the aggregate, will have a material adverse effect on our business, financial condition or results of operations.

Item 1A. Risk Factors.

A summary of factors which could affect results and cause results to differ materially from those expressed in any forward-looking statements made by us, or on our behalf, are further described under the caption “Risk Factors” in the Business portion of our 2012 Annual Report on Form 10-K. There have been no changes in the nature of these factors since December 31, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

There were no unregistered purchases of shares of our common stock during the nine months ended September 30, 2013.

Item 3. Defaults Upon Senior Securities.

Not applicable.

40

Item 4. Mine Safety Disclosures.

Not applicable.

Item 5. Other Information.

Not applicable.
